Gifts or Investments? It's Your Money

It is seldom that we direct reader attention to what we would term recommended reading, but this month's issue of "Inside Michigan" a fearless, uncommitted publication which exposed the Rhone River development that is being financed by American tax dollars, has once again dug into facts and figures to score another scoop.

In a feature article by Richard B. Frost, taxpayers can find out where one hundred twenty three billion dollars of hard-earned tax money has been "invested" in Europe.

And here are some of the highlights of the article:

One million dollars of tax money has been used by the Danish government in financing a private enterprise known as "Kysten's Pearl," an ultra swank resort hotel on one of northern Europe's fine beaches. US Foreign Aid officials in Denmark proudly explain that the hotel could never have been built without the generosity of the American taxpayer. Asked why this is a proper subject for expenditure of the U.S. Taxpayer's money, Foreign Aid officials explain that it is "to increase Denmark's tourist traffic."

Luxury hotels are not the only enterprise the United States is subsidizing.

In Holland E.C.A. project No. 111, the Royal Netherlands Blast Furnaces and Steelworks Ltd., at Ijmuden, Holland is undergoing a \$51,000,000 expansion program. The cost is being financed by a LOAN from the Dutch government and a GIFT of \$23,500,000 from the taxpayers of the United States.

If you are an average taxpayer, says "Inside Michigan" the cost to you of United States Foreign Aid programs over the past decade will amount to \$2,680.00.

In 1952 the administration asked Congress for \$7,900,000,000 for Foreign Aid although this was the year we were told the Marshall Plan would end.

It did end. They gave it another name and now call it the Mutual Security Program. Instead of ECA it is now MSA.

No matter what they call it—it is still your money that is being spent!

North Lands Eyed For Oil Prospects

Oil companies and independent operators paid the state \$62,094 in leasing over 63,000 out of 100,000 state acres offered at August pub-

lic auction. The conservation department's lands division says acreage was leased in 25 lower peninsula counties, mainly in Mason, Oceana, Cheboygan and Roscommon. Average bid for wildcat acreage was \$1.08 an acre.

Intuition is that gift which enables a woman to arrive instantly at an infallible and irrevocable decision without the aid of reason, judgment, or discussion.

As the speaker of the evening sat at the banquet table during his introduction he coughed and dislodged his upper plate. It fell to the floor and broke. A guest at his side realized the man's plight, dug into his pocket and came up with a set. The speaker-to-be tried them. They were too big. The helpful guest supplied another set. They were too small. The third set fit. The speaker completed his address perfectly with the borrowed teeth and as he sat down, he returned them with profuse thanks. "By the way," he said, "are you a dentist?"

The helpful guest shook his head. "No. An undertaker."

Pvt. Bill Bates, husband of Mrs. Arvilla Bates, and Pvt. Wm. Sevenski, son of Mr. and Mrs. Joseph Sevenski, of Boyne Falls, are in the same outfit taking their basic training at Camp Chaffee, Arkansas.

The first little trumpet player for the Robert E. Lee ensemble arrived at Charlevoix hospital, 7:30 p.m., Sunday, blowing blue notes. He hasn't been named according to latest available information.

The History of Charlevoix County, as it starts in this issue of the Citizen will probably become a collector's item. Past experience with historical accounts of the region indicate that it would be a good idea to order your extra copies of the Citizen now. Last year, when we ran the story of Mary and Zachariah Morgan many people came in weeks after the series was concluded to ask for additional copies. We were sold out, and it was too late to make up a re-run. We've seen a number of alleged histories of this region, but this is the first publication that appears generally authentic in every respect. If you want extra copies, let us know now.

Anyone who doubts that this is a banner year for the tourist industry, ought to try looking up a cabin for a friend late at night. They're all sold out.

Friday night, we tried to locate a cabin for Mort Neff whose column appears weekly in this paper. Mort insisted on a cabin, because of the complexities of living with his pet coon, Goldie, which appears every week on his television show over WWJ-TV, Detroit, and WJIM-TV, Lansing, Thursday nights. Goldie, a five-month-old lady coon, could disrupt a hotel room or tourist home no-end with her night-time antics. We called Maple Rest, B&D, Anzalone's, and had friends call a number of other resorts. Luckily, LaCross' State Street Grocery had one cabin left for Goldie and Mort.

We spent the day doing a movie of the Jordan River float trip through the courtesy of Teddy Kotovich, famous Jordan river guide, and Andy Anderson, restaurant owner who also guides. During the six hour trip, we landed a total of 32 legal size trout which intrigued Goldie. She tried vainly throughout the entire trip to reach through a hole in the live-box to catch one of the trout. Failing to make the grade, the coon nearly got the trout out of their paper wrappings enroute here. And then Mort nearly forgot the trout Saturday morning, before returning to the East Jordan airport to fly back to Detroit. Goldie has become a TV character for Mort Neff. Mothers in droves call WWJ to complain that their children won't go to bed until they can see Goldie.

Joe Bugai, of East Jordan, writes in to say that Dead Man's Hill is believed to have been named following the death of a lumberjack by the name of Sam Graczk about 1910 about three quarters of a mile from the site that is called Dead Man's Hill. Anyone else have any authentic information?

MINUTES OF THE SCHOOL BOARD

Annual meeting of the Boyne City Rural Agricultural School District No. 3.

The annual meeting of the Boyne City Rural Agricultural School District No. 3 was held in the assembly room of the main school building of said school district on the 14th day of July, 1952.

The meeting was called to order at approximately 8:00 p.m. by John Kujawski president of the Board of Education, there were 20 qualified electors present.

It was moved by Mrs. Wessels, supported by Mr. Tainter that John Kujawski act as chairman of the meeting. Motion carried.

It was moved by Mrs. Kightlinger, supported by Mr. Korthase, that Guy C. Conkle, jr. act as secretary of the meeting. Motion carried.

The minutes of the last meeting were read and approved as read. The financial report of the secretary and treasurer of the Board of Education was read and approved as read.

It was moved by Mrs. Wessels, supported by Mr. Tainter that the school district operate the school on a nine and one-half month basis for the year 1952-1953. Motion carried.

It was moved by Mrs. Wessels, supported by Mr. Hale, that the salaries of the Trustees of the Board of Education be set at the sum of \$120.00 per year for the year 1952-1953. Motion carried.

There then followed a discussion of the ski-class conducted by the school district; a discussion of the status of the school play grounds; a discussion of the improvements in the building to be made in the future; and a discussion of the participation of the Future Farmers of America in the horse show to be held July 18th and 19th.

It was then moved by Mr. Tainter, supported by Mr. Casper, that the meeting adjourn, motion carried, meeting adjourned.

Guy C. Conkle, jr.
Secretary

Regular Meeting of the Board of Education of the Boyne City Rural Agricultural School District No. 3. July 14, 1952

The meeting was called to order at approximately 9:15 p.m. by President Kujawski.

Present: Trustees Kujawski, Korthase, Heaton, Rouse and Conkle.

Absent: None.

The minutes of the last meeting were read and approved as read. Motion by Korthase, supported by Rouse that John Kujawski be President of the Board of Education for the year 1952-1953, motion carried.

Motion by Rouse, supported by Heaton that Guy C. Conkle, jr. be Secretary of the Board of Education for the year 1952-1953.

Motion by Korthase, supported by Heaton that Arthur K. Rouse be Treasurer for the Board of Education for the year 1952-1953, and that the Boyne City Branch State Bank of East Jordan be the depository for the year 1952-1953. Motion carried.

BEER
AMERICA'S BEVERAGE OF MODERATION

The American Way

The words "Michigan" and "fishing" are practically synonymous at this time of the year. And after an exciting day's fishing, it's the "American Way" to enjoy a glass of cool, refreshing Michigan brewed beer to top off the day.

For beer is the kind of beverage Americans like. It belongs... to pleasant living, to good fellowship, to sensible moderation. And our right to enjoy it, this too, belongs... to our own American heritage of personal freedom. *Beer Belongs... Enjoy It*

How Much Longer Can You Take It?

Recent figures on taxes prepared by Newsweek show that 32c of every dollar goes for taxes—7c above the danger line!

"You're being taxed right into the red, and you can't even see it!" the magazine declares.

Here are some examples:

If your income is \$4500, you'll shell out \$455 direct and \$1,039 more in hidden taxes!

If your income is \$7500, you'll pay \$869 on a form plus \$1,932 in unseen levies!

If your income is \$15,000, you'll spend \$2,606 to \$4,012 in taxes you can't see!

Not only the rich but YOU are hit with 200 separate taxes on every car, 475 levies on a new house, 116 on a man's suit, 12c out of 21c for a package of cigarettes, 14c out of 26c for a gallon of gas, and \$15 out of \$24 for a ton of coal!

Voters in the November election must determine which of the two candidates can best reverse this trend!

This series of advertisements paid for by citizens who believe that the public should have essential information regarding the present administration to help guide them in the fall election.

New "Early Red" raspberry lengthens season, boosts yield

A new red raspberry variety, named "Early Red," has been developed at Michigan State College's South Haven Experiment Station, after 20 years of breeding and testing. The "Early Red" starts producing berries early in the season when the crop is small and prices are usually higher. Plants are upright, tall, vigorous, hardy and very productive. The berries have good flavor and a long ripening season. They withstand canning without crumbling and freeze as well as Latham raspberries. For more information, call your County Agricultural Agent.

"Daddy Longlegs" guards the nation

This curious-looking device is a "thermistor." It's a speck of metallic oxide imbedded in a glass bead half the size of a grain of rice (or smaller!). The bead thermistor controls and measures the flow of electric current in radar sets used to guard the nation's defenses. It's also used in telephone equipment. Developed by Bell Telephone Laboratories and made by Western Electric Company, the bead thermistor is an example of the precision accuracy which has helped give America the finest telephone service in the world.

Mrs. Lola Moore and son, Jerry, of Taylor Center are spending their vacation with Mrs. Moore's mother, Mrs. Maybelle Willson, and brother, Loton, and family.

Miss Shirley Phelps of Walled Lake and sister, Charlotte, are visiting their grandmother, Mrs. Maybelle Willson, and other relatives for two weeks.

Jack Tompkins of Reed City is visiting at the home of his son, Harry Tompkins.

CRAZY JACK SAYS:

Credit Terms—30 days or less—PREFERABLY LESS.

Compliance with the above terms will avoid unpleasantness.

Water Levels May Change Duck Area

Michigan waterfowl hunters may find some changes in their favorite Great Lakes' hunting spots this fall because of high water levels, the conservation department reports.

Many marsh areas have shifted with rising water levels, some of former years being changed to open water, other being created where low ground had existed before.

High water probably has not damaged waterfowl habitat and one department specialist says the changes may be beneficial. With each yearly shift in the water level, certain plant growths are wiped out or replaced, thereby not allowing a single growth to take over an area.

Did You Know—

The jerboas, small jumping rodents, are said to be able to travel faster than a galloping horse.

Like Boston, the tiny community of Marshfield, Mass. also had its tea party. Before the Revolutionary War, patriots burned tea they had seized from a store.

OUTBOARD BOOM

In the last ten years the sale of outboard motors has more than doubled in this country—and the curve is still going up. Despite current high production some models are hard to get and one begins to wonder where all these compact little power plants are going.

Michigan, Minnesota and Wisconsin supply just about one third of the answer. These three states bordering the Great Lakes, and each with thousands of inland lakes, absorb more than 30% of the industry's total output of about a half million units annually.

You can get outboards in a dozen well-known makes in just about any size or power rating you want, to drive anything from a little 1-man 6-foot car-top boat to a full-sized cabin cruiser. And

they'll do a good job. Nevertheless they've made a lot of enemies here and there, mostly thru no fault of their own.

The Buzz Boys

On quiet inland lakes of modest size there'll always be one or two marine hot-rod pilots who have a knack for picking the wrong time and place to "open her up," dart in and out among fishermen, or swoop close to shore right in front of a cottage owned by an elderly couple who came to the lake for a quiet rest. These buzz boys are ruining the reputations of a lot of outboard motors that actually lead a model life. The conscientious and careful owners avoid such indiscretions. They know that these little gasoline engines turning up 4,000 revolutions per minute can kick up quite a fuss at full throttle. So they hold their tongue. If it's early in the morning or late evening they'll be especially careful in due respect to the neighbors. And they'll avoid fishermen.

Fish Not Bothered

The outboard motor industry got together and conducted a survey to find out what effect their product had on fish. In a hatchery pond where bluegills were building a nest in preparation for spawning an outboard-powered boat went 'round and 'round right over the spawning area. The bluegills may have become nervous wrecks, but they stayed right on the nest in spite of the noise and churning waters above. In another test a boat anchored and fished every day in a certain spot. Every other day an outboard motor boat buzzed back and forth past the fishing boat all day long. Careful figures were kept on the fish caught per hour on the days when the outboard wasn't operating and the days when it was. There was no perceptible difference in the catch. The survey didn't report the

effect on the fishermen however. The golden rule apply there as they might have wished for a shotgun! elsewhere!

So, if you own an outboard let

PIONEER DAYS

Chapter I
The county of Charlevoix is bounded on the north by the county of Emmet and Lake Michigan...

Sugar maple, elm, beech, basswood, ash, hemlock and cedar timber is found in great quantities throughout the county.

The principal crops are winter wheat, oats, corn, hay, clover, potatoes, and root crops.

As Pine Lake is navigable for large vessels, the timber business is an important enterprise in this county.

The map of Charlevoix County, given on another page, shows that the county is already well supplied with good roads...

of Pine River. Before us is a sandy slope, on the left of which we discover the usual features of a new settlement.

In the number and beauty of inland lakes, Charlevoix County is without a rival, and its resources are so abundant and varied...

Pine Lake is confessedly the loveliest of all the many that adorn this picturesque part of Michigan.

Round Lake is park-like body of water, covering an area of about thirty acres, upon the shores of which are situated the thriving village of Charlevoix...

of Pine River. Before us is a sandy slope, on the left of which we discover the usual features of a new settlement.

In the number and beauty of inland lakes, Charlevoix County is without a rival, and its resources are so abundant and varied...

Pine Lake is confessedly the loveliest of all the many that adorn this picturesque part of Michigan.

Round Lake is park-like body of water, covering an area of about thirty acres, upon the shores of which are situated the thriving village of Charlevoix...

Did You Know—
