Vol. 10

EAST JORDAN, MICHIGAN, SATURDAY, JANUARY 20, 1906.

No 3

tion.

The secretary of state is now preparing the enrollment books for the primary enrollment of voters of the various parties, to be made under direction of the registration officers at the apring election on the first of April. These will be supplied to the several county clerks as provided by the law. in time for their distribution to the various polling places: and it is essential to any practical operation of the primary reform method in our state, that voters shall generally enroll themselves. Those who fail to do so will cease to be voters for any of the purposes of this primary election, unless ncapacitated by sickness or absence, in which case, as in the ordinary registration they will be entitled to have their names entered on election day, in June. This is the 'off year' when no state officers are to be chosen at the spring election and the interests to call out the voters would be less than on the odd numbered years But there is another interest which should operate at this time to increase the attendance at the polls; we are to vote this spring upon the question of calling a convention to revise the con stitution, under Act 426 of the last session.

This opportunity is one of more importance than the opportunity of voting on the direct nomination of officers to be elected next fall. That is but the experimental test of a new law, which may be altered er repealed in a year, this is a proposition to outline the general policy and methods of the state for the next quarter or half century. In one, the legislature has put into the hands of the people the authority this year to name their legislators and governors and ad ministrative officers without any intermediary agency; in the other, the Three little babes were nextled in bed, legislature has impowered the people to enact for themselves the limiting and governing principles and regulations under which they would empower the legislature to mak laws, and the governor and other officers to execute and administer the laws, for many years to come. There is no comparison in the importance of the two, and it would be deplorable if the voter should give to this matter a languid and indifferent attention This is not likely to be, and the two enusual issues on this occasion will doubtless be mutually helpful in attracting attention and interest.

There is another act of the last legislature session, aimed to secure better attention to amendments and other questions submitted to voters at elections. That lack of attention has been not so much from indifference, as from want of information; and this is provided for in Act No. 23, which requires the secretary of state to prepare statements of the purport, nature and effect of such amendment or other question. These are to be supplied to all newspapers in the state three times -sixty; and thirty, and fifteen days previous to election, and also posted at each polling place, printed in English, German, Holland and Polish. This will evidently apply to the approaching vote upon a constitutional

Michigan Crop Report.

The temperature during December according to the Michigan State Weather Bureau, was over three degrees above the normal. The depar ture was quite uniform throughout the State. The precipitation was be-low the normal, the departure for the State being three-fourths of an inch below the average. The ground was not well covered with snow during the month and some correspondents are of the opinion that some damage has been done to wheat.

The number of bushels of wheat reported marketed by farmers in December at the flouring mills is 200,578, and at the elevators 151,495, or a total of 332,073 bushels, a

The average condition of live stock in the State is reported as follows comparison being with stock in good. healthy and thrifty condition: Horses 96, cattle 96, sheep 98 and swine 96 pe

The average prices January 1 of some of the principal farm products in the inarkets where farmers usually market such products were as follows:

The average price of wheat per bushel was 79 cents, rye 59 cents, corn 48 cents, and oats 31 cents; the average price of hay per ton was \$7.24,

The average price of fat cattle was \$3.49 per cwt., of fat hogs \$1.63 per

The Coming Spring Elec. cwt. and of dressed pork 85.98 per cwt. The average price of each class of herses was as follows: Under one year old \$36.35; between one and two years old \$59.06; between two and three years old \$107.43, and three years old and over \$117.08.

Milch cows were worth \$33.13 per head. Cattle other than milch cows, under one year old, were worth, per head \$9 96; between one and two years old \$17.00; between two and three years old \$26.30 and three years old and over \$34.17.

The average price of sheep under one year old was \$4.08, and one year old and over \$4.99; hogs not fatted were worth \$4.11 per cwt.

The prices given are for the State. The prices of tarm crops are in most cases considerably lower than one year ago: this is especially true of wheat and rve where the decrease is respectively 30 and 13 cents. All grades of horses are higher than one year ago: also cattle and hogs, both allye and dressed, are worth more than in January, 1905.

New Law In Effect.

Under a new law which went into effect January 1 all physicians and pains; bachache, bladder trouble or midwives, in the state, or anyone recumatism who, will take a dose of assuming to act in such capacity at Pineul's upon retiring at night shall the birth of a child, must file with the Under a new law which went into the birth of a child, must file with the township cierk a proper notice of such birth within ten days after its occurrence. The clerk's duties relative to recording such notices are clearly defined by statute. He must examine all reports filed with him, and if there be anything irregular on the face of the return, whether by alteration tenor or otherwise, he is required to investigate the matter, and if fraud or misrepresentation be developed, then to prosecute the persons offending. If clerks fail to carry out the mandate of the law they are liable to a fine of \$50 and costs of prosecution in each case. In cases where births come to tris notice, and are not previously, reported to his office, it is

also his duty to call for a report, and

if not forthcoming, then report the

same to the prosecuting attorney of

the county, who is required to prose-

cute the offending persons. The

penalty provided for a physician,

nurse, midwife or parents for neglect

or failure to report a birth within ten

days after its occurrence, is a fine of

from \$10 to \$100, or a jail sentence of

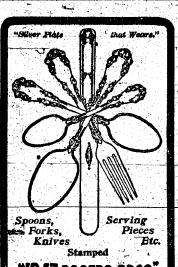

60 days, or both, such fine and im-

prisonment to be in the discretion of

the court.

BANQUET WITHOUT MEAT.

WASHINGTON SOCIETY EATS A UNIQUE VEGETARIAN DINNER.

Absence of Meat not Noticed by the Guests, Analysis of Foods Made by Dr. Wiley, the Government Food Expert.

Few wealthy and socially prominent women share with Mrs. John B. Henderson, wife of the former United States Senator from Missouri, the distinction of being a strict vegetarian and yet being able to entertain large dinner parties successfully without the use of any kind of meat.

Mrs. Henderson's home Boundary

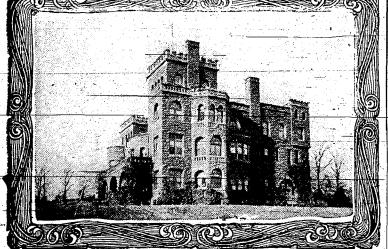

Henderson's home, Boundary Castle, in Washington, is one of the handsomest dwellings in the Capital and is fitted up in the most sumptuous

MRS. JOHN B. HENDERSON. Gold, silver and exquisite glass appointments characterize her entertainments and the most prominent people in the country are he guests during the social season.

This distinguished hostess long ago became a convert to the vegetarian system and through a book which she wrote on the subject, "The Aristocracy of Health," held to her contention that meat is unnecessary not only to digestion, but to the palate. The bools aroused much discussion and during a recent health congress in Washington Mrs. Henderson arranged one of her celebrated vegetarian dinners in order to prove the strength of her theory. Some amusement was caused by the chilation of a prominent politician who has a reputation for liking good dimers, but who was afraid that without meat his evening meal would be

the dinner were unique. Rather than offer her own analysis

of the food which she proposed to dear old "Uncle Joe" Cannon, or even serve to her guests Mrs. Henderson Vice-President Fairbanks himself (the had a special analysis made hv Dr. President, it is understood, will stick wiley, Chief of the Bureau of Chemistry of the Department of Agriculture, br. Kellog of Battle Creek, and other scientists who were in Washington attending the convention. Mrs. Henderson has an English vegetarian chef, Benett, who is famed for his delicious recipes and after a sample of each dish had been made it was given over to the scientists for analysis. Souve-

C. C. Protose Timbale, Tomato Sauce.

Grape Fruit and Cherry Salad,

Cheese Souffle.

Gelee, Kellogg Gelatine. Mock Coffee,

Mrs. Henderson's vegetarian dinners have always been a feature of her social program during the winter. The only plea against them is that diners seriously object to being defrauded, even if ever so skilfully, into believing they are eating meat, patties and cro-quettes, when, in fact, they are eating "just vegetables."

This particular dinner in honor of delegates to the food congress was voted a distinct success. Those who were included in Mrs. Henderson's invitations declared that had they not known the exact character of the dinner to which they sat down they would have been convinced that vari-ous dishes were the result of the study and ingenuity of Mrs. Henderson's famous chef who had utilized meat, in

a strange but most alluring manner. Mrs. Henderson was formerly Miss Mary N. Foote, of New York, and is one of the most democratic and popuar hostesses in Washington.

NOW COMES THE MOTOR BOOT.

Threatens the Popularity of the Motor Bicycle, the Automobile and the Motor Boat.

Gay Paris has just been startled by the apparition of a gigantic person "whizzing along the Champs Elysees at the rate of twenty-five miles an hour." He was not on horseback, according to the Washington Post, neither was he in an auto. He simply stood up straight on his own legs, and throttle a proposal to send rations to the only unusual thing connected with his people, because it would pauperize his appearance consisted of a pair of immense boots. He didn't walk. He slaves to the whites." never lifted either foot from the pavement. He simply carried himself erect and "fairly flew."

Subsequent inquiry developed several interesting facts. Fastened to the soles of the tall stranger's boots were tiny automobiles, with rubber tires eight inches in diameter, and in a belt worn about his waist were "accumulators" of one and a quarter horsepower, connected with the boots by
means of wires. Thus equipped, the
mysterious person sped along the avenue at the speed above stated, exciting vonder, admiration and alarm in about equal proportions.

Seven-League Boots Not In It.

In other words, this astonishing but highly uncomfortable gentleman—Con-stantini is his name—appears to have invented the long-looked for and much-feared "motor boot." As a matter of fact his device will enable the indi-vidual citizen to acquire a pair of boots by means of which he can chase along the boulevards of Paris or any other canital at a frightful rate of speed, and capital at a frightful rate of speed, and make anywhere from six to thirty miles an hour. It is the much desired consummation—the apparatus whereby we may pay a hundred calls during any afternoon, evade policemen, street cars, footpads, the carriages of the aristocracy, and the importunities of the very fleetest newspaper reporter. No more need to squander money on night-hawks, herdics, "copays," or even colored man. broughams and victorias. Put on your thrice seven league boots, light your Lea cigarette, push the button, and away since he became Indian Commis-you go. The time is foreseen when sioner Mr. Leupp has appointed in sev-our greatest statesmen will provide themselves with the Constanting boot as a reputation for fixing good themselves with the constanting boot s, but who was afraid that with and laugh at would be interviewers.

Only one misgiving is nourished. There is always a fly in the ointment, a crumpled rose leaf on the couch of nner were unique.

Joy. Suppose, for instance, that Sec-

relary Taft, or General Grosvenor

dish had been made it was given over to the scientists for analysis. Souvenir menus were prepared for each sleepless pillow while as yet the deguest and attached to the card was the tails are in camera. The motor boot, recipe for every dish served throughout like other great agencies of progress, has come to stay. We can wait while our betters try it on.

LEAVE THEM INDIANS.

COMMISSIONER LEUPP OF INDIAN AFFAIRS AGAINST HIGHER EDUCATION.

The Red Man is Original and Should ing Resort.

The Indian should be an Indian and

nothing more.

So says Commissioner of Indian Affairs Francis E. Leupp in his annual report. He does not believe the Indian should be educated for higher professions in the great colleges of the coun-

try to the neglect of his sound and practical learning.

His report is, beyond any doubt, the most interesting one ever received from the Indian Office.

Made-Over Indians Useless

"The made-over Indian," he says, "is bound to be like the Navajo blanket, from which 1 the Navajo has been expurgated-neither one thing nor the expurgated—neither one thing nor the other. I like the Indian for what is Indian in him. I want him to retain all his old contempt for hunger, thirst, cold and danger when he has anything to do. I love the spirit of manly in dependence which moved a copper-colored sage once to beg that I would intercede with the Great Father and their young men and make them slaves to the whites."

Mr. Leupp declares that the common

mistake of white mendealing with In-

COMMISSIONER F. E. LEUPP.

dians is that they proceed upon the idea that the red man is merely a white man with a dusky skin. Another mis-take is to class the Indian with the

Lead Him Back.

eral of the schools a teacher who supervises the study of native music. The duties of this teacher are to lead the Indian back to the sublime and patriotic thoughts of his forefathers.

The Indian is a natural warrior, a acter, a great deal which is admirable, and which needs only to be developed along the right line. Our proper work with him is improvement, not transformation."

VANDERBILT'S NEW AUTO.

It is Planned to Make 150 Miles as Hour.

Mr. Alfred G. Vanderbilt is having constructed secretly an automobile which he hopes will be the fastest machine in the world. He is an automobile enthusiast and is determined with the aid of the wealth at his command to break the present record. The ma-chine which he is having built is estimated to be capable of developing 152 miles an hour with 250 horsepower. Such speed is the equivalent of 218 feet for every clock tick; it means a mile in 23 2-5 seconds. The present mile record is 32 4-5 seconds made by H. L. Bowden, at Ormond Beach, Fla., last Sebruary. Should Mr. Vanderbilt be able to at

should mr. vanderbilt be able to at-tain such extraordinary speed with this automobile it will mean that it will go faster than anything in the world heretofore. The best time ever made on a railroad was a mile in 30 seconds; this was on the Plant System on a run from Fleming to Jacksonville, Florida, when five miles were covered at the rate of 120 miles per hour. Not only will it go faster than the speed machines of to-day but the new automobile flyer promises to carry its driver faster than man has ever traveled be-fore in the world. In fact it is stated that even few birds could fly at such a

Cares for 1,000 Canaries.

Mrs. Sarah Noble, a widow, of Cincinnati, Ohio, feeds 1,000 canaries in

A HOLLAND AIRSHIP.

Inventor of Sub-Marine Boat is Working on One that Will Fiv.

The report comes from New York that John P. Holland, the inventor of the submarine boat, is about to give to the public an invention of a flying not be Considered Merely White machine said to be of as perfect a With a Dusky Skin-Highly Interesthis name. Mr. Holland has been working on flying machines for nearly twelve years, during which time four models have been constructed and destroyed on account of their imperfections. He is now working on the fifth model, which he believes will be made to fly. This latter model weighs only thirty pounds. It is arranged to be strapped to the back of the person desiring to soar in the air. There will be two vertical arms crossing at right angles with the axis and two pairs of wings; these are to vibrate in oppo-site directions. One pair of wings will be placed at the back of the head and the other pair near the waist. They are of light steel construction, weighing about a pound each. In speaking of his invention, Mr. Holland said:
"Any man who walks three miles an

hour can easily fly the same distance n ten minutes with my invention and do not consider that statement an exaggeration.

With this machine men will be able to fly on the same principle as a bird flys. If a cog breaks or something else goes wrong, or if he becomes exhausted and the propelling ceases there will be no danger, for he will be able to descend gently to the earth and land easily upon his feet."

Mr. Holland discounts the course

taken by a number of flying machine experts who use a combination of balloon and aeroplane. This form, he believes, will never become practical for aerial navigation because he considers the gas bag offers too much resistance to the air and he to the air, and, on the other hand, believes that flying machines and the aeroplane idea—the latter of the Langley class—will be the real means of navigation or the air in the future. He expressed his belief that with the new Holland airship he will be able to fly from New York to Washington to attend the next presidential inaugura-tion and get back home the same night. It is his intention to make ex-periments with his machine next

Facts About Henry Hudson.

Why should an Englishman who rebe dubbed Hendrik? For more than half a century Americans have been writing and saying "Hendrik Hudson."

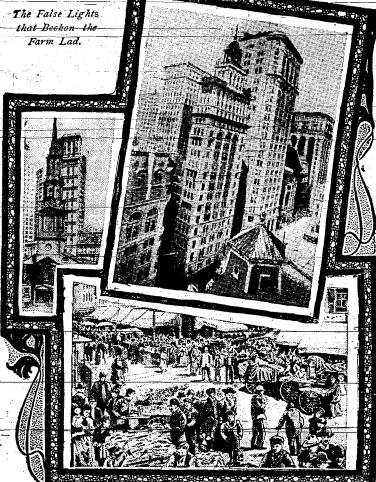

This habit, without a legitimate foundation, has been emphasized afresh reaptly in the "Hendrik Hudson Meantly in the "Hendrik Hudson" Meantly in the "Hendrik Hudson cently in the "Hendrik Hudson Me-morial Bridge" and the "Hendrik Hudson Intercentenary Committee. only excuse that can be offered for us-ling the Dutch equivalent is that Henry Hudson sailed under Dutch auspices on one of his four voyages of discovery. The Netherlands themselves knew him

The farm boy who receives a common-school or a high-school education naturally turns toward the place where he can best apply it. His schooling has not been such as would help him to farm better, to make more money on the farm or to make of farming an inthe farm or to make of farming an interesting employment. And so he goes to the city to utilize his special knowledge. The trend of the country-raised lad is irresistibly in that direction, while there is no equalizing current impelling the young people of the cities to fill his place in the country. And the city hoy as he grows up and marries would like to have a home of his own on a plece of land, of course, but he knows only the trade or profession that he has learned. He knows nothing of

he has learned. He knows nothing of farming and he would not know how to make a living from a piece of land if he had it. It has often been said that it is worse than useless to put the poor of the great cities out in the soundry, because they will not stay. country, because they will not stay there. As a matter of fact, they cannot be expected to, for to them it is a strange and barren story. The experi-ence of the Salvation Army, however, as shown in its farm colonies in different sections of the country, demon-

strates that men will go out from the cities and live on the land and make good citizens, when they are taught about the land after they get on it.

Agricultural Education Needed. Viewed from both standpoints, it is Viewed from both standpoints, it is a demonstrated and unquestionable fact that American public schools need far more of practical agriculture, in their courses, than they now teach. In fact the majority of them do not teach agriculture, in any of, its branches, at all. The teachers themselves, as they are graduated to-day, know nothing of the subject. Their educational system is in a rut from which it cannot be moved except by a strong popular which in itself must come from an intelligent comprehension of

the weak points of the system. The problem is one for the serious consideration of our most far-seeing statesmen-the stemming of this centripetal movement which is overcrowding our centers of industry where men work for day-wages, and which is steadily drawing from our ruraffcom- we differ, and we have always dif-

OLD BRITISH FESTIVAL.

PLOW MONDAY, AS OBSERVED IN FOURTEENTH CENTURY AT GRIMSBY, ENGLAND.

Farmers and Townsmen Gathered to Celebrate Bountiful Crops—Town Treasurer Paid Bills.

All old-time country people remember evenings at corn-husking, appleparing and sugar-boiling. Not so long ago a husking bee was a great event, and boys and girls, old and young, gathered from far and near to sit on the floor of the barn, husk big ears of ripened corn for several hours, end-ing with a grand feast of pie, cake, hot coffee, cider, and all the other goodies of the farm cupboard. But in this country there are no definite and fixed festivals held in the fall of the year at harvest time. Thanksgiving is only a formal remembrance. In this

THE MCKINLEY PORTRAIT.

PAINTING OF MARTYRED PRESI DENT HANGS IN THE WHITE HOUSE.

Artist Murphy. Hitherto Unknown, Paints This Portrait Without a Sitting and from Photographs Only. By Francis B, Gessner.

It is somewhat remarkable that the portrait of President McKinley that now hangs in the White House was painted by an humble and hitherto unknown artist in New York to whom the President never accorded a sitting. The lamented McKinley did pose for famous artists of Europe and the best portrait painters of our own country, yet it remained for Mr. William D. Murphy, of New York, to produce with the aid only of photographs the one portrait of McKinley most acceptable to the family and friends. More than that, it was considered the most dewalls of the White House.

Mr. Murphy has a modest little stu-

dio at 17 East Sixteenth street, New York, just off Union Square. He had achieved some local fame as a pains-taking portrait painter, but had never dreamed of having a picture hung in the White House along with portraits done by the most famous artists of sev- $\begin{smallmatrix} 0 & 3 & 4 \\ 0 & 0 & 10 \end{smallmatrix}$ eral generations. After the terrible tragedy at Buffalo, Mr. Murphy made a collection of the President's photographs, together with information as of 10 0 graphs, together with information as to coloring and alded by Mrs. Murphy, who is also an artist, produced a picture in pastel. When the picture was finished Mr. Murphy made efforts to have Abner McKinley, the brother of the President, see and criticise the work. Finally the artist had an interview with Colonel Wilbur C. Brown. Abner's business partner and who had bad and indifferent, and were themselves indifferent, the more so because
they knew that this unknown artist
had never been given a sitting. However, his pleadings were so earnest
that they finally went to the studio.
The picture was unveiled and the
brother stood amazed and startled, as
if the dead had suddenly come to life.
Tears came to the eyes of Abner and The dead had suddenly come to life. Tears came to the eyes of Abner and the eyes of Colonel Brown. They gazed in silence for a time, and then the brother said, "That is the best portrait of dear Will that I have ever seen." Colonel Brown said the same, and both advised the artist to put the conception in oil and compete for the honor of having it hung in the White or of having it hung in the House. Mr. Murphy did so, aided by his wife, and it was chosen in prefer-ence to the hundred or more paintings

REFORM IN LAW-MAKING.

Ex-Attorney General Griggs
Advocate of Deliberate Legislation.

John W. Griggs, at one time Attorney General during the McKinley administration, where he achieved fame for his ability as an exponent of the law, and later one of the strongest members of The Hague tribunal, has lately been expounding to the people of New Jer-sey a doctrine of real reform. It is believed that he knows whereof he speaks, for hardly any man in that State's political life should know either State's political life should know either the need for reform or the difficulties of achieving it better than he. Before President McKinley induced him to become a member of his Cabinet Mr. Griggs had earned his way to the head of the New Jersey bar, served as member of the General Assembly and State Senator, heen elected president of the Senator, been elected president of the latter body, and met the responsibilities of the governorship. He recently spoke at a celebration on Forefathers' Day in Orange, and laid this law down mildly but clearly to the State politicians in the name of the decent men of

the Commonwealth:

"Publicity, no backstair legislation; no passage of bills because some one has O K'd them beforehand; discussion of measures on the floor of the House; real reasons to the public given why measures are favored or proposed, and a return of the days when legislative bodies were debating socie-ties and the public favored as much with reason for voting as with elo-

quence."
Mr. Griggs advocates reform in the enactment of State legislation when he

says:

Rarely is a bill read each of the three constitutional times, except by title. It passes in accordance with a decision made previously somewhere else. I do not say the influence is an improper one, but that influence was felt in the side rooms or on the back stairs before the fate of a measure was decided. This method is a repression of individuality, sinking rights into a mere expression of some one else's views or wishes,"

News or wisnes.

Reports from New Jersey seem to show that legislation at Trenton is practically in the same condition as that which existed at Jefferson City before Governor Folk washed the Missouri capital clean. The policy advo-cated by Mr. Griggs has a tendency to break up the State "organization" for actual debate. The return of the legis latures to their old standing as delib erative bodies puts a premium on in dependent and personal individual strength—and these qualities are the death of "organization."

sounced the ion's nead knocker, once, twice, thrice, and got no answer. Then I looked up at the windows and saw a bill announcing "This House to Let," and noticed that the shutters were all tightly closed.

It was too dark to read the name of the agent and I was about to knock at the next door to learn where I could procure the key, when, to my astonishment, the door, as I happened to lean against it, moved slightly in-wards. I gave a gentle push and walked boldly in. I groped my way down the kitchen stairs. I tried the kitchen door; it was locked and the key was gone. I felt about and found down the kitchen staffs. I tried the kitchen door; it was locked and the key was gone. I felt about and found and back door. Can you tell me where the back door leading to the area; it was locked and the key gone. My best plan seemed to be to pick the lock of the cripple. "It's in Kitty's pocket." the back door, if I could find an old nail or a bit of wire. So I crept up "And the kitchen door key?" "In her pocket. They're all in her stelve to the hear party and grapped. stairs to the back parlor and groped my hand along the mantel and window frames, but with no success. I had noticed under the kitchen door the glimmering of the light of a fire, and decided that the house must be in-I put out my hand cautiously and laid and the candlestick is under my bed. it on a man's head. My tumble I lighted the candle and saw a man, against the bedstead had disturbed the about forty years of age, lying on a

"Ah," he answered with a sigh, "that comes of want of eyes. When I had my sight I took no note of such things, but now I've a delicate touch. I wish Kitty would come back with that supper. I'm getting throat hungry."
"Are you afraid of thieves here?" I asked.

"Why?"

pocket."

Here was another disappointment. I must wait until Kitty's return and face her boldly. I was interrupted in my reflections by my companion, who said: "Come, Jack, strike a light and take a habited. The next moment I stumbled look at your poor brother Bob. You'll against a wooden stretcher or bedstead. find the matches in one of my shoes

It was a darkish night with a stiff breeze blowing as I picked my way through those quiet streets that lie between Islington and Dalston. Just scratch along, somehow. But come, as I came to the corner of a street a long, somehow. But come, Jack, you've never offered your brother atrong puff of wind whipped off my new shiny hat as neat as need be and dropped it in an area. This was certainly a nulsance, but not without remedy. I rang at the area hell, once, twice, thrice, but get no answer. I sounded the lion's head knocker, once, twice, thrice, and got no answer. Then I looked up at the windows and saw a bill announcing "This Universal of the cripple anxiously; "never Slodden I should hope. Though you're a rich shillings a week and Kitty takes care of empty houses. We contrive to scratch along, somehow. But come, Jack, you've never offered your brother without remedy. I rang at the area hell, once, thrice, but get no answer. I sounded the lion's head knocker, once, i most like a gentieman's hand! It where the proposition of the cripple anxiously; "never Slodden I should hope. Though you're a rich man now and I'm a poor one, still recollect the name of Slodden was an lonest one 'till you went and tarnished it."

"Not Slodden, Jack," enswered the cripple anxiously; "never Slodden I should hope. Though you're a rich man now and I'm a poor one, still recollect the name of Slodden was an lonest one 'till you went and tarnished it."

"No, Bob, I shouldn't dream of such a thing. I call myself Thompson."

"That's right, Jack, and a brother I should hope. Though you're a rich man now and I'm a poor one, still recollect the name of Slodden was an lonest one 'till you went and tarnished it."

"No, Bob, I shouldn't dream of such a thing. I call myself Thompson."

"That's right, Jack, and a brother I should hope. Though you're a rich man now and I'm a poor one, till you went and tarnished it."

"No, Bob, I shouldn't dream of such a thing. I call myself Thompson."

"That's right, Jack, what did you tell Kitty? Is shouldn't d a thing. I call myself Thompson."

"That's right, Jack, and a brother I shall always remain to you in feeling even if we go by different names. And say, Jack, what did you tell Kitty? She believes you was a bounty ticket. What did you say to her?"

"Bob, I'll tell you a little secret. I haven't seen Kitty."

"Why, you came home with her." most like a gentieman's hand! It ain't so soft as, a dressmaker's or a haberdasher's; it's about equal to a master-builder."

"You seem to know all about hands," "Why, you came home with her,"
"No, I didn't,"
"Then how did you find your way "The door was ajar." "Why, Kitty never leaves the front door open. "She did this once, I knocked and rang before I found it out, however." "And I thought it was a run-away knock and ring. But where on earth is Kitty? Didn't you see her aboard the vessel?" "Jack," he exclaimed suddenly, seiz-

sake of recovering a seventeen-

termined to carry it through.
"What name do you suppose I've

gone under, Bob, since I've got my freedom?" I asked.

ing my hand, "are you sure you are playing no trick on me? Remember I'm a poor helpless creature. Where is Kitty?"

"On my honor, I don't know."
"Hush," he said, "there's her footstep coming up to the door. I would know it among a hundred, and she's alone.

These last three words made me decide what to do. As a heavy masculine-sounding foot came to the front door, I overset the candle as if by ac-

cident.

"There," said I, "my awkwardness has left us in the dark."

"So much the better, Jack," replied the cripple. "She's missed you down

at the ship. We'll give her an agree-able surprise." Somebody opened the street door

with a latch key and advanced along the passage, but I stood still and said nothing. Presently a rather gruff female voice exclaimed, "Bob, Bob, are you asleep?

"Asleep? Not a bit of it, my dear Kitty," replied the cripple, cheerily, "but wide awake and hungry as a hunter."

"Strike a light then. A pretty dance you've given me, Bob," she exclaimed. There was no such name as Slodden

"He came over under the name of

How do you know?" 'Because I've seen him."

Where? "Here," he said, as he struck a match and relighted the candle. "Brother Jack at your service. Look at him, Kitty, and tell me what you think of

"Why, Bob," answered Mrs. Slodden "you've always told me your brother lack was such a rough fellow. I think he looks quite the gentleman. Wel-come to Old England, Mr. Jack. Ours

is but a poor place, but such as it is you're welcome to it." I felt like a miserable humbug as my supposed sister-in-law put her hard, honest hand in mine, but what could I do? After a little general conversation, I said: "Can I speak to you done for a few moments, Mrs. Slod-

"Certainly," replied the unsuspect-ing woman, treating me with immense respect. "Step down stairs in the room in the house. And so my poor husband made shift to get up and let

'Here I am at any rate," said I with

"And now what may you be wanting, Mr. Jack?

"I just want you to unlock the area back-door. My hat blew off as I was coming around the corner of the street and has fallen down there.

"Oh, is that all," said Mrs. Slodden, feeling for her key. She was just in the act of inserting the key into the keyhole, when the sound of wheels was heard outside, followed by a thundering rapping at the street door. "Bless me, who can that be?" exclaimed Mrs. Slodden as she rushed the street in th upstairs, I following her with trem-bling steps, for I knew whose knock that arrival betokened.

"That's right," shouted a loud, jovial voice from the cab as the front door opened. "Give a haristocratic rapping, cabby, I'm a gentleman now, every inch of me."
"Name of Stodden," said the cab-

man, addressing my late sister-in-law.
I waited to hear no more, but bareheaded as I was darted down the steps into the street. A nut-brown face, ornamented with a great shaggy yellow beard, was thrust from the cab window and a jolly voice roared forth, "Hello, Brother Bob."

I made no answer, but ran as fast as my legs could carry me. When I had placed a good half mile between myself and Mrs. Slodden, I fell into a walk and tied a handkerchief over my head, called a cab and was driven to my rooms.

It was many months before I could pass that house without feeling the cold shivers run down my spine, al-though it looked more deserted than ever. I was only too happy to forego all search for my new silk hat and for all I know it may yet be reposing in the area.

Statues of Bismarck,

Bismarck has come to be about the most bestatued figure in nineteenth century hero worship. The monuments erected in Germany to the "man of blood and fron" are not less alarming was poaching. It sounds more respectable than, than—you know what.
"But I say, Jack," pursued the cripple, "transportation can't be as bad as it's represented. It has softened your voice, made you talk better and given you quite a touch of quality. You were a roughish young blade when I bid you good-bye at Milbank penitentiary. Do you recollect how Bill Hawkins jeered you because I gave you mother's little clasp Bible?"

Here was a pretty position for a respectable young fellow to occupy. For pelago.

blood and iron" are not less alarming in number than they are doubtlessaly low in any real art quality. Up to the present the number unhappily completed is 204, and there are still 39 to be inflicted on an already much-Bismarcked people. The Kingdom of Sax mars dwelling in the wild continents are also in the race. One Bismarck statue confronts, in an attitude of becoming defiance, the savages of the spectable young fellow to occupy. HOUSE OF ROMANOFF.

within our own recollection, more than one of Russia's great ones has laid down his life, the victim to Ni-hilistic hatred, the "Great White Czar"

of autocratic power and strength, or the "Little Father," of implied love, guidance and protection, both names and names only, falling before the cruel dynamite bomb and laying down his scepter under the call of death, even as the lowliest peasant of his

mighty Empire.

Peter the Great, founded the great
city of St Petersburg, but the best thing he did for his Empire, was to open its doors to western civilization, his ideas and plans living after him to fuifilment through his people, whom he had infused with his magnetic spirit. Catherine II, while intellectual, comprehensive in her plans, strong in their execution, and a wonderful diplomat, adding much to Russia's ferritory was utterly devoted. territory, was utterly devoid of conscience. She was succeeded by her son, Paul, who advanced the country to the rank of a first-class power, and

under Alexander I, Russia held the balance of dominion in Europe.
Alexander I was followed by his son, Nicholas I, a stern despot, with an inordinate faith in Russian prowess His over-confidence brought on the Crimean war, in which Russia was arrayed against Great Britain, France, Italy and Turkey, and which resulted in the success of the allied armies. Alexander, II liberated 23,000,000 serfs in 1861, but—was assussinated by

the Nihilists twenty years later, the present Czar, Nicholas II, coming to the throne November 1, 1894, and who can predict his successor. Who has the temerity to suggest that he shall have a successor to the absolute power, the autocratic dominion over his millions of people!

ROMANCE OF A COAT.

An Old Clothes Dealer Whose Kindly
Act Netted Him Twenty-five
Dollars.

The world is full of romance. There are persons who deny this, but there are persons who deny God and gravi Romance is not confined to tation. Romance is not connued to novels and the hearts of girls. It crops out often in strange places and sometimes in austere natures. But it is not often that a romance is found in the pocket of a cast-off coat. However, this story proves it. The story comes from New York. A dealer in old clothes, assorting his collection of "has been" raiment found in the pocket of a coat that had seen hetter days, a letter. It was sealed and addressed to a lady in an aristocratic part of the city far removed from the section of the city in which the old clothes man lived and worked. He laid the letter aside, thinking that some day when the spirit moved him and times were prosperous he would stamp and post

Perhaps it was several days later when he had occasion to call for bundle of disowned apparel in a part bundle of disowned apparel in a part of the town near the home of the ad-dressee of the letter. He took the missive with him, called at the house, was brushed aside by the man at the door, but a lady emerging at that moment, he handed the letter to her. She tore it open in great haste and as she read it blushes reddened her face and a happy smile spread over her lips. She folded the letter, put it in her purse and handed the "old clo" a \$5 note. He felt that he not only done a good deed but had been rewarded.

A week passed and a dapper, wellgroomed man entered his shop. He said he was the original owner of the coat from which the letter had been recovered. He said that in the letter he had proposed marriage to the girl he loved and thought he mailed it. Receiving no reply he believed that he had been rejected and left the city. He had recently received an adorable reply from the young lady with an iexplanation as to how the letter had been delivered and—the wedding day had been set. All this he thought was due to the "old clo man." To the man who had rendered him such good service he handed \$200 nets.

vice he handed a \$20 note.

The moral of this romance is "do a kindly act when you can." Another moral might be drawn from the inci-dent, and this is: When you write an offer of marriage to the girl you love be sure she gets the letter.

the the So unto the bow the cord is So unto the man is woman:
Though she bends him, she obeys him.
Though she draws him, yet she follows.
Useless each without the other.—Hiawatha.

much about Van Dieman's Land as I do of the moon.

"Ah, I see how it is, Jack," said the cripple. "You're ashamed, and no wonder. I like you the better for it. But you needn't mind now. You've served out your seven years and as I always said you was young and led away by Bill Hawkins. And, Jack," he added, confidentially, "we've always kept up the notion in the family that it was poaching. It sounds more re-

The Annual Loss Occasioned by Destructive insects in the United States.

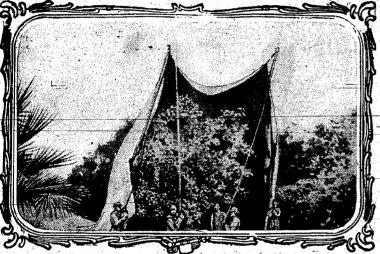

GUY ELLIGIT MITCHELL. Farmers of the United States in ad, corn rootworm. above. The tax collector in this latter case is one which is merciless and overbearing, paying no attention whatever to the necessities or obligations of the agriculturist each year, calling for his dues unremittingly, and gloating over the misfortunes of his tenant. The tax collector in this case, however, is the insect. The losses resulting from the depredations of insects on all plant products of the sell, both in their growing and in their stored state, together with those on livestock, ex-ceed the entire expenditures of the National Government, including the pension roll, and the maintenance of the army and the navy. Enormous as is the total value of all farm products of this country it often would be much greater were it not for the injurious work of insects. According to figures compiled by the Department of Agriculture the estimate is made that the culture the estimate is made that the total annual loss to the corn total value of farm products during the last year amounted to \$5,000,000,000.

The Bureau of Entomology, of the Department of Agriculture, being familiar with the work of the important portant species are the Hessian fly, the miliar with the work of the important chinch bug and the grain plant louse. While the chinch bug is notably a wheat shortage due to insect damage at a pest, its damage to other cereals and minimum of 10 per cent, while in varied crops is very considerable. The

The chinch worm dition to county, State and national causes depredations nearly as severe as taxes, probably pay a much heavier the above mentioned insects, making toll than they do to all three of the another loss of \$20,000,000 annually. Every year the Department receives reports from different sections of the country describing injury to corn by such insects as billbugs, the various wireworms, cutworms, army

stalk-borers, various species of locusts

PREPARING TO FUMIGATE AN ORANGE TREE.

greater.

ests of cotton.

for the control of insects.

years of excessive insect damage the losses from depredations of this insect shortage may amount to 50 per cent. on wheat in single States have ranged The annual shortage of 10 per cent. is between \$10,000,000 and \$20,000,000 in a low estimate, which is more often one year. A very reasonable average exceeded than failen below, and indicates at current farm prices a money country as a whole, would indicate loss of \$500,000,000—the minimum about \$20,000,000 a year chargeable to rearly which insents lay on the this insent. While in some years the eace, at current farm prices a money-loss of \$500,000,000—the minimum yearly tax which insects lay on the products of the farm. This estimate, however, does not include the damage caused to farm products in storage, such as cereals and forage crops and to natural forests and forest products, assigning at least \$100,000,000 to each of these two items. The total annual tax then chargeable to insects is \$700,000,000 annually.

The item of loss from insect damage

not only includes the actual destruc-tion or injury to crops, but the esti-mate must also include a very important item-the amount of money devoted to insect control. This amounts to a very considerable percentage of the value of the crop in the case of orchard fruits, truck crops and such field crops as cotton and tobacco. For instance in estimating the losses due to the codling moth it has been shown by figures of the Department of Agriculture that over \$8,000,000 a year is expended in spraying apple trees, allowing a cost of only 5 cents per tree. the leafworm, while many other in-sects inflict minor damage. Without counting the losses due to the latter-class of depredators we have a total loss of more than \$40,000,000 charge-able to the three important insect The cost of gassing and spraying citrus fruit trees ranges from 5 cents to \$1.50 per tree. Another source of loss is per tree. Another source of loss is that occasioned by a diminution of certain crops such as wheat or cotton.

THE HESSIAN FLY. (Magnifled)

Shortage may so increase values as to occasion the shutting down of mills. A shortage of a finished product such as flour, cotton or fabrics, may mean a corresponding less to transportation companies and to shippers. In other words shortage in an important product starts a train of losses to the end of the chapter, the total amount of which is quite beyond calculation or

Cereals Damaged Most.

The cereals suffer most from insect damage, the yearly amount of loss aggregating \$200,000,000. The leading cereal crop of the United States, of course, is king corn, with a value last year of \$1,216,000,000. While corn is less subject to insect damage and wheat next, the most important cereal, which is the corn product, would be considerably greater were it not for important insect pests. The corn root-worm causes an annual average loss worm causes an annual article loss of at least 2 per cent, of the crop or some \$20,000,000. The next most important insect pest of this cereal is the bollworm or earworm. This insect, according to the Bureau of Entoleaf defoliators and many other varies and many other varies mology, probably attacks from 90 to tes of depredating insects.

100 per cent. of the ears of sweet corn throughout the country and the damage caused by this pest is probably

are subject to attacks of similar para-sites and other insect enemies. If all these be considered including, for example, the buffalo gnats, often very destructive in the South, the many gadflies, botflies, the screw-worm fly, and such parasites as the ticks and lice, a heavy percentage of loss must be reckoned. A conservative estimate of the Department of Agriculture of these osses is \$175,000,000 a year, Stored Products Preyed Upon. While mention has been made of the lamage done to vegetable products dur-

THE CODLING MOTH (Magnified)

or grasshoppers, corn plant lice and other insects. This undoubtedly causes a loss of an additional \$20,000,000, or with a total annual loss to the corn

this insect. While in some years the damage caused by Hessian fly is enor-

mous, taking the average of ten years the loss to the wheat crop caused by

his bug has a value of \$40,000,000, and

so oh, numerous other insects and pests lay toll on the wheat crop of the farmer. Were it not fer their destruc-tive work the wheat crop of the coun-

A Seedless Persimmon.

The principal culprits are the ox-war ble, and various biting flies and ticks. Horses, sheep and other farm animals

ing the growing and maturing season these crops after they have run the gauntlet of insect enemies during their

entire period of growth, are still sub-ject to the inroads of insect depreda-tors while in storage on the farm, in

etc., fruits by various fruit and vine-gar flies and the woolens and house-hold furnishings by beetles, moths, silver fish, etc. Cured tobacco is es-

silver fish, etc. Cured tobacco is especially subject to insect attacks and

damage, the most important source of

injury being a minute insect known as the cigarette beetle which not only

eats into cigarettes but all other forms of cured tobacco. While an estimate of \$100,000,000 a year is placed upon

the damage done to the store products this does not include the destruction to products in the household or to tobacco.

A very considerable item which might be chargeable to insects and yet which cannot be estimated is that of

vent the ingress of flies, mosquitoes and moths, nor can an estimate be

placed upon the amount of money ex-pended to eradicate mosquitoes, but it is believed that the estimate of \$700,-

000,000 made by the officials of the Department of Agriculture is far below the actual annual loss. The problem

the economic entomologist of the fu ture must solve is the lessening or pre-vention of this loss.

The latest sensation in the seedles ruit Ishe reported at Washington is a seedless persimmon. The officials seedless persimmon, 144 Constitute to the Department of Agriculture to the Department of Agricultur of the Department of Agriculture tree other day received a visit from M. John H. Drury, who brought with him a specimen of seedless native persimmons from his place near the national capital.

The general impression is that the seedless persimmon is either non-existent or nearly so in this country. seedless variety of this fall luxury is not, however, a new thing, but, on the other hand, a number of trees are scat tered throughout the South bearing seedless persimmons. Seedless speci mens are occasionally found in the big Japanese variety and they are rather rare and the flavor is nothing to be

compared to the native sort.

A number of instances are known by
the efficials of the Bureau of Plant Industry of solitary persimmon trees beging seedless fruit, but when pollen from other persimmon trees in the beging seedless fruit, but when pollen and skill were concerned, as a child from other persimmon trees in the ten years old. And the pity of it was neighborhood is brought in contact that the husband was straining every with the flowers of the seedless sort nerve and working overtime to make he resultant fruit will be full of seed

The fruit brought to the Department of Agriculture by Mr. Drury proves to be a little smaller than the average when cut across were absolutely seedless and while the fruit was comparatively small it had really more across. tively small it had really more meat of economy in buying and proper prep

ECONOMY IN BUYING MEATS.

Cheaper Cuts, Well Cooked, Equal to Most Expensive in Flavor and Nutritive Quality. By Ida Finney.

"Roasts are bought, good ones, and

after one meal the bone and the rest of the meat is thrown away. I don't know whether women are too lazy, or whether they actually don't know how to make the soups which they could make out of so little. See the German women. They can make you a meal that is good out of a scrap of meat, and two or three cents' worth of vegetables. But American women, the most of them, don't know how, and they dont seem to learn. For instance, take a chuck piece of beef or a cut of the lower round, and if a young housekeeper only thought so she could make some good dishes out of elevators and mills, or again while in it that her husband would enjoy eating, transit especially in the case of long and praise, too. A good stew cooked shipments by sea. Food products in slowly in the oven; a pot reast; beef the kitchen and house-storeroom suffer from insect damage. Animal products are attacked by larder beetles, think they must have steaks and roasts ly good, nourishing soups. But they think they must have steaks and roasts -the best cuts-and if not those they resort to canned meats. We're here to sell meat, only I do hate to see

here to sell meat, only I do hate to see people throwing their money away."

The butcher was a thrifty German, and knew what economy meant. The truth of his statement is proven every day in the big markets. Steaks and roasts, roasts and steaks—these are the standbys. And if, by chance, the cheaper cuts of meat are suggested, oftentimes the reply will me: "Oh but my family likes only the hest cuts." my family likes only the hest outs."

I always feel sorry for the house-keeper who speaks thus, feeling sure she is ignorant of the nutritive value and delicate flavor of the "cheap cuts" preventing insect damage. No one can when properly cooked. And the unsetimate how much is expended on fortunate fact is that many house-wire screens for the household to prethe ignorant and unskillful servant.

Happening into the kitchen of a friend at four o'clock one afternoon I saw the negro cook drop a piece of meat, evidently intended for a stew, into a kettle of cold water and light the gas under it. "Pearl, what are

into a kettle of cold water and light
the gas under it. "Pearl, what are
you doing," I asked.
"Putting de meat on fo dinner. It's
a little late, but ill boil it hard and
maybe it'll-git done-by-six-o'clock.
Howsomever, dey's got to eat it, for we
ain't got nothin' else."
Here was a good niece of beef a

Here was a good piece of beef, a rather expensive cut, too, utterly ruined by the cooking. The cold water drew out the juices and the rapid boiling hardened the fibers, with the result that the finished product was not fit to put in any human stomach. And it should have been such an appetizing and thoroughly satisfying dinner. Both the mistress and the maid were ignorant and indifferent concerning question of the daily food for the fam-

Didn't Know a "Pot Roast"

To a neighbor complaining of the size of the meat bills was suggested the plan of buying cheaper cuts. A "pot roast" was suggested as a substi-tute for the expensive "prime ribs."
"Why, what is a pot roast?" she asked. And that little woman, with a husband on a moderate salary, was trying to run the house. She was about as well fitted for the work, as far as knowledge the money to keep things going.

THE FIRE ENGINE DRIVER.

There May be Better Drivers of

Earth, but if There Are, Where
Are They?
Is there a better driver in the world
than the man who drives the fire engine? If there is, he is yet to be discovered.

a cross street, to turn up an inter-secting avenue. Under the edge of the rounded off corner where the machine was to turn there was a sewer opening. with the street pavement sloping down smoothly toward it all around from the higher general level of the street.

ligher general level of the street.

If the driver, coming as he was at a dead gallop, should make a broad turn around this corner, out where the street was level, the engine would swing more or less, thus checking the horses' speed, and there would be a second or two lost before they could get the load straightened and get under full headway with it once more up full headway with it once more, up the avenue. But if the driver could make that corner with the two wheels on the inner side of the curve down in that sloping depression leading to the sewer opening close by the curb, and the two outside wheels on the higher level nearer the middle of the street, the higher level here would be for the engine what the banked up outer rail is for the locomotive round-ing a curve, making it so he wouldn't lose an inch. And that's the way he

been standing at the edge of this cor-ner, waiting to see the engine go by, saw it so near to him and pushing in 50 close to him that he could have touched it. The driver, aloft in his high seat leaning inwards as he was, lign seat teaning inwards as ne was, too, actually hanging over him as the engine passed, with whistle acreaming and steam hissing, and that driver, as he flung 'em in this fashion 'round this curve, was talking low to his horses and calling on 'em each by name—a man absorbed if there ever was one

A new numor has been added to the French duel. A. M. de Groze had an engagement with swords with a M. Carillot. At the last moment he sent word that he would not fight, but was sending his second in his stead. Happily the second acquitted himself so brilliantly that the principal's absence was not felt, for he actually shed some of his adversary's gore. It was a de lightful touch, the courtesy of not dis appointing a waiting antagonist, but sending instead a nice, obliging friend to pink him.

Roosevelt Translates Gaelie.

President Roosevelt in the near fu-ture may publish for private circula-tion a book of Irish poems which he translated from the Gaetic. The President was taught Gaelic by James Jeffrey Roche.

An O'er True Tale.

"Does anyone know how to make a Maltese cross?" asked the instructor in architecture. "Yes," answered the son of the Chief of the Naval Board, "Step on her tail."

Here was an engine coming along

Before he knew it a man who had man absorbed if there ever was one.

The Great Home Magazine of America

makes this unequaled offer for a limited time only

Eight V is., Strongly and Richly Bound in Red Vellum de Luxe cloth. Edited by CHARLES LEONARD-STEWART, B. A. of the staff of the Encyclopædia Americana, International Encyclo-Biographical Dictionary, etc. THE

Over sixty-five thousand important subjects are treated at length. The late occurrences of international interest, such as the Russo-Japanese Dispute and War-Panama's Ind endence—Radium—Wireless Telegraphy, and the Alaskan Boaudary Decision—all have their places in this most modern work. In short, there is much later and better information in this set than in manya much more pretantious work. The business man, the teacher, the farmer, the professional man, the student, will all find it the ideal reference work of modern times, where courdse, accurate, up-to-date information can be had on every subject without wasting words on which see non-essentials. often almost utterly destroy the trees, as in the case of the black locust, to leaf defoliators and many other varie-

n it than the bigger seed-bearing va- aration of plain foods with which we are so abundantly supplied, and can be extended to reach every school in the land, they will serve a great purpose, and the benefit to the coming generation will be incalculable.

THE ARTIFICIAL LIFE.

Consists in Part in Eating Adulter ated and injurious Foods. The State Board of Health of Massa

chusetts has had chemical analyse made of prepared foods and the repor of the Board shows what we really ea in the course of everyday life. When we use pepper, we also get ground nutshell and fruit stones with a little pepper mixed in. Mustard consists pepper mixed in. Mustard consists chiefly of wheat flour and turmeric, this latter is an East Indian safron colored root with an acrid and pungent aste. When we use lime juice we ge taste. When we use time juice we get a little of the juice with 40 to 63 per cent. water, the whole preserved with sulphurous; salicylic or benzoic acid. Ale is preserved with salicylic acid, also porter and likewise beer; "pure Vermont'—maple syrup is nothing more than cane syrup. Canned clams are preserved with boric acid. than cane syrup. Canned clams are preserved with boric acid. While this revelation of the Massa-

chusetts authorities is something aw ful to contemplate, yet we are stag gered by a further report of the Board which shows that an enterprising chemist has discovered that the odor of spoiled eggs can be neutralized through the addition of formaldehyde. Since this discovery a number of establishments have entered into the business of collecting bad eggs, treating them with formaldehyde and selling the mixture to bakers, who use it in cake and other foods sold to the public. While the addition of formaldehyde utterly destroys any bad odor, the process renders the eggs extremely hurtful to the human system. Form erly the mixture of bad eggs was sold to leather manufacturers, but since

this later discovery the price of mixed eggs has risen from 10 cents per case

should be used henceforth as a "resting place for weary Christians, either from the home or foreign field, and is to be called the House of Rest." DR. MILES' Anti-Pain Pills

Dr. Miles' Anti-Pain Pills

Cure Headache

Almost instantly, and leave no bad effects. They also relieve every other pain, Neuralgia, Rheumatic Pain, Sciatica, Backache, Stomach ache, Ague Pains, Pains from injury, Bearing-down pains, Indigestion, Dizziness, Nervousness and Sleeplessness.

Pain is sure to follow any strain or weakening fluence upon the nerves. It may be caused by over-exertion, heat, intense mental effort, colds, indigestion, or any cause that depresses, excites or agitates the nerves. So sensitive are they that the least pressure or strain causes suffering. By soothignst pressure of strain causes autering. By soothing strengthening and quieting the nerves, Dr. Miles' Anti-Pain Pills relieve the pain.

They are sold by druggists, 25c a box, under a guarantee that the first box will benefit, or money refunded. Never sold in bulk.
