Vol. 10

EAST JORDAN, MICHIGAN, SATURDAY, MAY 19, 1906.

No 20

## Relief Fund Received.

Acknowledgment of the receipt of the money raised by the citizens of East Jordan for the relief of the citizens of San Francisco has been received as follows:

STATE OF MICHIGAN  
Executive Office  
Lansing, May 9th, 1906.  
MR. JOHN SHAPTON, PRESIDENT,  
East Jordan, Mich.

Dear Sir:—  
I write to acknowledge receipt of your letter of recent date, enclosing draft for \$204 which is contributed by people of East Jordan to the San Francisco Relief Fund. It will be forwarded without delay and I wish you would convey my thanks to the contributors for their prompt and generous response to the appeal for aid which I deemed it my duty to make.  
Yours very respectfully,  
FRED M. WARNER,  
Governor.

## Michigan Crop Report.

The temperature during April, according to the State Weather Bureau, was, in the upper peninsula, 4.6 degrees above the normal, in the northern counties 3.8, in the central counties 2.2, in the southern counties 2.4, and in the State 2.5 degrees above the normal.

### WHEAT.

Conditions were not very favorable for wheat during April, the weather being cold and dry which somewhat retarded its growth. Correspondents generally report wheat looking badly on clay soil, while on sandy ground it is quite promising. A traveling correspondent for an Ohio firm writes: "Wheat is a little mixed in Michigan, some very good, some very poor, some being plowed up; have been north, east and south and found some good wheat. Condition of 75, the April average has all along seemed a little low to me, but others interested in the crop seem to think it about right." The average condition of wheat is, in the southern counties 73, in the central counties 77, in the northern counties 84 and in the State 75.

### OATS.

The weather in April was not favorable for oats, as it was too cold and dry. In many cases seeding was late. The acreage of oats sown compared with an average for the past five years is, in the State and southern counties 97, in the central counties 95, and in the northern counties 106.

### FARM WAGES.

The average monthly wages, with board is, in the southern counties \$22.98, in the central counties \$21.14, in the northern counties \$23.02 and in the State \$1.37.

The average wages by the month last year with board was in the State \$21.85, and the average wages by the day without board was \$1.37.

### FRUIT.

The prospect for fruit, peaches excepted, is good and if favorable conditions follow there are indications of an average crop.

A goodly number of correspondents report peach buds injured by the warm weather in January followed by severe frosts; cherry trees dying from leaf blight and nearly all kinds of fruit trees badly affected with San Jose Scale, black knot and other insects.

Strawberries have been considerably damaged by frost which will result in a decrease of the acreage.

Spraying of fruit trees appears to be on the increase. The following table will show the prospect at the present time for a crop of the various kinds of fruit in Northern Michigan: Apples, 84; Pears, 77; Peaches, 61; Plums, 77; Cherries, 90; Small fruit, 91.

GEORGE A. PRESCOTT,  
Secretary of State.

## Bee Keepers Take Notice.

Before sending in your order for bee supplies see Ira D. Bartlett. If he has not on hand what you want give him your order and he will get it for you and save you the freight on same. Better get your supplies now. It will pay to have them ready. You can telephone your order if need be. Phone 149.

### Sale of beautiful Linens

Boostinger's. The best way to guard against schemes of grafters and keep up-to-date in general is to be a regular reader of this paper. It is always the one who does not read his home paper who gets caught by the grafters and takes

## Common Council.

Regular meeting Monday evening, May 14, 1906.

Present, President Shapton, Trustees Steffen, McMillan, Lemieux, Goodman and Sweet. Minutes of last two meetings read and approved.

On motion, the following bills were allowed:

St. Commission, labor, etc.	\$146.62
R. Bingham, dray	1.10
E. L. Co., lighting for April	98.31
Wm. Johnson, salary for April	60.00
Geo. Spencer, tappings, etc.	31.64
F. E. Boostinger, merchandise	71.60
The Enterprise, printing notice of elec. and reg.	5.25
N. Y. Belling & Packing Co., rubber boots	63.75
L. Otto, freight	83

A Committee of the G. A. R. requested the Council to make an appropriation of \$25.00 for the expenses of Memorial Day. On motion, same was appropriated.

On motion the Council accepted an invitation from the G. A. R. to take part in the Memorial Day program.

The drugist bond of L. C. Madison was received and approved.

Liquor bond of Joseph. Podleske, the Federal Union Surety Co. as sureties, was accepted and approved.

A petition to extend water mains to Bowen's Addition was received and referred to the Water Commission.

President Shapton appointed L. A. Hoyt and Alexander Bush as members Board of Review and John Cummins poundmaster.

The sum of \$400.00 was transferred from the General Fund to the Highway Fund.

On motion, Council Adjourned.

*Charles Hudson*  
Village Clerk.

## Marion Harland.

A very interesting feature of the Sunday edition of The Chicago Record-Herald and one looked for by every woman reader of that paper is the page devoted to Marion Harland. Under the heading "The Housewives' Exchange" queries and answers appear on subjects which conscientious housewives enjoy discussing. Whole some advice is given about the care of children and how to make a home beautiful and attractive.

On the same page are to be found some of Marion Harland's famous recipes. She is considered an authority on this subject, many people making it a practice to preserve her recipes whenever they are published.

A word about Marion Harland herself. Thousands of people who have read her articles are desirous of knowing more about her. Her real name is Mary Virginia Terhune. She was born in Amelia County, Virginia, Dec. 21, 1831; received a good education; began to write for the press in 1854, and in 1856 married Rev. Edward Payson Terhune. Besides writing for the press, she is the author of a large number of books. She has a summer home called Sunnybrook at Pompton N. J., but at present is living in New York City.

One of the last tributes which we can pay to our beloved dead is to see that their last resting place is fittingly marked. We owe it to them as well as ourselves to place an enduring monument over their graves.

What have the women contributed toward the upbuilding of our city? Many, many things—aye, more than can be enumerated in the brief space at command. There was a time in the history of the world, way back in Paul's day, when woman was looked upon with something of disdain. That was an unchristian era. Today the situation is vastly different, and instead of woman being inferior to man, she has proven herself to be his equal, if not his superior, in many of the virtues that make for good citizenship.

While the modern system of school may be deficient in some respects, and no doubt the tendency is to take on more work and too many branches of study for the pupil to master thoroughly in the time the average boy or girl is allowed for schooling, yet there is a fault on the part of parents which is persistently left out of account in the argument of the critic. The pupils, especially in the higher grades, are allowed to spend the nights during the week in various amusements which distract their minds from school work, and the loss of sleep incapacitates them for good work during school hours.

## Need for Clean Men.

If one were to go to the President of the United States and ask him to name the country's greatest need he would reply in his quick, conclusive way, "Clean men." He knows. Smart men there are by the thousands; rich men abound more than in any other age of the world; able men are found in every State and township, but even from a population of eighty millions the chief executive has difficulty in finding the man of exceptional character for a post which requires a square and flawless morality. It is to his credit that he misses no opportunity to preach clean manhood. "But neither Presidents nor preachers nor teachers can do the work of fathers except in their own families. We do not mean to underestimate the marvelous influence of the mother. In most lands men who reach success give their mothers the credit. 'All that I am I owe to my mother,' said Lincoln. 'It was you who taught me to write so. You really did, dear mother,' said the crabbed Carlyle. We get our moral qualities from our mothers, our mental from our fathers, say the physiologists, and as we look back we find this maternal affection the loveliest thing on earth. But isn't there a conviction deep in our souls that we should have done much better if our fathers had taken time and trouble to share our confidences in the years that counted most?—From The Delineator for June.

There is no better way of building up our town than giving to our home business men our entire and exclusive patronage. The more we help each other the more we help the town.

The women of this town have labored earnestly and long in an endeavor to maintain truth and sobriety in the home, teaching their sons and daughters that these are cardinal virtues, and are to be prized far greater than rubies. They have recognized the fact that home-life is the foundation of all life, and that municipal, state and national existence is pure only as the home-life is pure. The women of this city have been the silent force, the under-current, that has been working so effectively through the years, the result of which has meant the ushering in of social conditions that are extremely wholesome.

The tar that is contained in Bee's Laxative Honey and Tar is harmless. It is not coal tar, but it is obtained from the pine trees of our own native forests. Bee's Laxative Honey and Tar is the best remedy for colds because it acts on the bowels—thus expelling all colds from the system. Bee's is the original Laxative Honey and Tar, and is best for coughs, croup, whooping cough, lung and bronchial affections. Sold by Warner's Pharmacy.

10 bars of Laundry Soap for 25 cents — E. A. Lewis.

Go to Superaw's for your Early Seed Potatoes.

John Mitchell's coal strike is the best after all. He struck an agreement.

That list of the members of the new Russian ministry reads like a sneezing match.

Very likely Senator Aldrich is merely holding up the denatured alcohol bill, for fear it would delay the passage of the rate bill.

We know a father in a neighboring town in this county who used to talk to his boys like he did to vicious animals, and who used a strap on them at random. He said he was curbing their dispositions. In years to come every one of those lads went to the bad. In age they had no more respect for that father than they did for Satan. By some means a father should gain the love and admiration of his boys.

If there is any great question pressing for solution, the influence of which is to affect the home-life, the women of our city are ever on the alert to see that it is correctly solved. Thus working, they've formed a nucleus around which have been erected institutions that stand as a living monument in their defense of the home. All hail, then, to the queenly, white-souled women of community!

There must have been something doing all right in Pelston Wednesday. Prosecuting Attorney Wade B. Smith went up there for the day and warrants were issued for keepers of blind pigs in the metropolis of northern Emmet county. Deputy Sheriff Engerton succeeded in catching six of the offenders and they were given preliminary hearings in the justice court and bound over to the circuit court. Up to last Thursday four of these had secured one handman each and were given a few hours longer to look up their friends. However, Charles Coon and his son, James, could not get bail and were brought down this morning by the officer and locked up in the Harbor Springs jail. If the others do not succeed any better there will be quite a Pelston colony under the watchful care of Jailer Foris until the circuit court convenes. —Petoskey Independent.

## CLARA BARTON ACTIVE.

**Red Cross Heroine Will Establish Railroad Hospital Car Service.**

**Although Over Eighty Years Old She Has Started in with Great Energy to Organize New Relief Work to Cope with Wrecks.**

Clara Barton, the famous Red Cross leader, has just given new evidence that she is one of the most remarkable women the world has ever known. Feeling that the Red Cross work has been placed on a permanent basis and no longer needs her close supervision, this untiring woman, although upward of eighty years of age, has lately returned to her old home in Massachusetts and opened headquarters for a great new movement to alleviate suffering, namely, a project for organizing hospital corps on all railroads in order that with the aid of hospital cars speedy succor may be brought to persons injured in wrecks.

The portrait here presented is of especial interest, inasmuch as it is the only likeness which Clara Barton has permitted to be made in many years. The famous Red Cross worker has no love for the camera, but her close personal friend, Mrs. John A. Logan, after much persuasion finally induced her to sit for this picture. Mrs. Logan is seen standing by her side.

**WORKED IN CIVIL AND FRANCO-PRUSSIAN WARS.**

Clara Barton, who is entering with so much enthusiasm into a new mis-

another New England girl—Clara Barton, when thrown on her own resources, took up school teaching as a means of livelihood, and when she was obliged to abandon this because of failing eyesight, she managed to secure a position in the Patent Office at Washington, and here she continued her service until the outbreak of the Civil War disclosed to her a lifework. Her advertisements in the Massachusetts papers that she would receive money and stores for the wounded soldiers and personally distribute them at the front brought quick response, and from this small beginning the scope of her work broadened. The ministering angel of the Army of the Potomac was present at the battles of Cedar Mountain, the second Bull Run, Antietam, Fredericksburg and the Wilderness.

### WAS WITH THE VANGUARD.

In the Franco-Prussian war Miss Barton was the first person to enter Strasburg after the fall of that city, and was instrumental in organizing the relief. She performed a similar service at Paris, which she entered with the vanguard at the conclusion of the siege. After her return to the United States she directed relief work in addition to the instances above mentioned during the Mississippi flood of 1882, the overflow of the Ohio River in 1883, the Louisiana cyclone of the same year, and the Texas drought of 1889, ever at the fore aiding, sustaining, and supporting by her untiring presence the falling courage of those who in their suffering learned to depend upon her with passionate love and gratitude.

Mrs. John A. Logan (Mary Simmerman Cunningham Logan) who appears with Clara Barton in this picture, is a native of Missouri, but was educated in Kentucky and married John A. Logan in 1855. Since his death she has

## ERUPTION OF KRAKATOA.

**Volcanic Explosions in East Indies the Most Terrific in History.**

**Vast Volumes of Ashes Blown Twenty Miles Above Earth—Detonations Heard Three Thousand Miles Distant.**

By Sir Robert Ball.

The following description by Sir Robert Ball of the eruption of Krakatoa will be read with special interest at the present time. It is taken from his book, "The Earth's Beginning," recently published by D. Appleton & Co. Until the year 1883 few had ever heard of Krakatoa. It was not inhabited, but the natives from the surrounding shores of Sumatra and Java used occasionally to draw their canoes up on its beach while they roamed through the jungle in search of the wild fruits. The island seemed to owe its existence to some frightful eruption of bygone days, but for a couple of centuries there had been no fresh outbreak.

In 1883 Krakatoa suddenly sprang into notoriety. Insignificant though it had hitherto seemed, the little island was soon to compel by its tones of thunder the whole world to pay it instant attention. It was to become the scene of a volcanic outbreak so appalling that it is destined to be remembered throughout the ages.

At first the eruption did not threaten to be of any serious type. In fact, the good people of Batavia, so far from being terrified at what was in progress in Krakatoa, thought the display was such an attraction that they chartered a steamer and went forth for a pleasant picnic to the island. Many of us, I am sure, would have been delighted to have been able to join the party who were to witness so interesting a spectacle. With cautious steps the more venturesome of the excursion party clambered up the sides of the volcano, guided by the sounds which were issuing from its summit. There they beheld a vast column of steam pouring forth with terrific noise from a profound opening about thirty yards in width.

As the summer of this dread year advanced, the vigor of Krakatoa steadily increased. The noises became more and more vehement. These were presently audible on shores ten miles distant, and then twenty miles distant, until the great thunders of the volcano, now so rapidly developing, astonished the inhabitants that dwell over an area at least as large as Great Britain, and there were other symptoms of the approaching catastrophe. With each successive convulsion a quantity of fine dust was projected aloft into the clouds. The wind could not carry this dust away as rapidly as it was hurled upward by Krakatoa, and accordingly the atmosphere became heavily charged with suspended particles. A pall of darkness thus hung over the adjoining seas and islands. Such was the thickness and the density of these atmospheric volumes of Krakatoa dust that for a hundred miles around the darkness of midnight prevailed at midday. Then the awful tragedy of Krakatoa took place. Many thousands of the unfortunate inhabitants of the adjacent shores of Sumatra and Java were destined never to behold the sun again. They were presently swept away to destruction in an invasion of the shore by the tremendous waves with which the sea surrounding Krakatoa were agitated.

The development of the volcanic energy proceeded, and gradually the terror of the inhabitants of the surrounding coasts rose to a climax. July had ended before the manifestations of Krakatoa had attained their full violence. By the middle of August the panic was widespread, for the supreme catastrophe was at hand.

On the night of Sunday, August 26, 1883, the blackness of the dust clouds, now much thicker than ever in the Straits of Sunda and adjacent parts of Sumatra and Java, was only occasionally illumined by lurid flashes from the volcano. The Krakatoa thunders were on the point of attaining their complete development. At the town of Batavia, a hundred miles distant, there was no quiet that night. The houses trembled with the subterranean violence, and the windows rattled as if heavy artillery were being discharged in the streets, and still these efforts seemed to be only rehearsing for the supreme display. On the morning of Monday, August 27, 1883, the rehearsals were over and the performance began. An overture, consisting of two or three introductory explosions, was succeeded by a frightful convulsion which tore away a large part of the island of Krakatoa and scattered it to the winds of heaven.

This supreme effort it was which produced the mightiest noise that, so far as we can ascertain, has ever been heard on this globe. It must have been indeed a loud noise which could travel from Krakatoa to Batavia and preserve its vehemence over so great a distance; but we should form a very inadequate conception of the energy of the eruption of Krakatoa if we thought that its sounds were heard by those merely a hundred miles off. This would be little indeed compared with what is recorded, on testimony which it is impossible to doubt.

Westward from Krakatoa stretches the wide expanse of the Indian Ocean. On the opposite side from the Straits of Sunda lies the island of Rodriguez, the distance from Krakatoa being almost 3,000 miles. It has been proved by evidence which cannot be doubted that the thunder of the great volcano attracted the attention of an intelligent co-guard on Rodriguez, who carefully noted the character of the sounds and the time of their occur-

rence. He had heard them just four hours after the actual explosion, for this is the time the sound occupied on its journey.

If Vesuvius were vigorous enough to emit a roar like Krakatoa, how great would be the consternation of the world! Such a report might be heard by King Edward, at Windsor, and by the Czar, at Moscow. It would astonish the German Emperor and all his subjects. It would penetrate to the seclusion of the Sultan at Constantinople. It would have extended to the sources of the Nile, near the equator. It would have been heard by Mohammedan pilgrims at Mecca. It would have reached the ears of exiles in Siberia. No inhabitants of Persia would have been beyond its range, while passengers on half the liners crossing the Atlantic, would also catch the mighty reverberation. Or, to take another illustration, let us suppose that a similar earth-shaking event took place in a central position in the United States. Let us say, for example, that an explosion occurred at Pike's Peak as resonant as that from Krakatoa. It would certainly startle not a little the inhabitants of Colorado far and wide. The ears of dwellers in the neighboring States would receive a considerable shock. With lessening intensity the sound would spread much farther around—indeed, it might be heard all over the United States. The sonorous waves would roll over to the Atlantic coast; they would be heard on the shores of the Pacific. Florida would not be too far to the south, nor Alaska too remote to the north. If indeed we could believe that the sound would travel as freely over the great continent as it did across the Indian Ocean, then we may boldly assert that every ear in North America might listen to the thunder from Pike's Peak, if it rivaled Krakatoa. Can we doubt that Krakatoa made the greatest noise that has ever been recorded?

Among the many other incidents connected with this explosion, I may specially mention the wonderful system of divergent ripples that started in our atmosphere from the point at which the eruption took place. The initial impetus was so tremendous that these waves spread for hundreds and thousands of miles. They diverged, in fact, until they put a mighty girdle round the earth on a great circle of which Krakatoa was the pole. The atmospheric waves, with the whole earth now well in their grasp, advanced into the opposite hemisphere. In their progress, they had necessarily to form gradually contracting circles, until at last they converged to a point in Central America, at the very opposite point of the diameter of our earth, 8,000 miles from Krakatoa. Thus the waves completely embraced the earth. Every part of our atmosphere had been set into a tingle by the great

## AWFUL BALLOON VOYAGE.

**German Military Aeronauts Safe Only After a Terrible Experience.**

**War Airship Was Driven Five Hundred Miles Over Baltic Sea and Dropped in Swedish Snow Bank—Barely Averted Drowning.**

The progress of balloon experiments in the German army has just received a severe setback by the fearful experiences of two members of the Aero-static Corps, named Wolf and Brand, who have returned to Berlin after having been given up for dead, following a balloon ascension, during which they completely disappeared. The two men were blown all the way from Berlin to the Baltic Sea, where they were driven by a gale clear across that body of water, and finally landed, half dead, in a little village in Sweden, traveling altogether more than five hundred miles. The story of their flight is one of the most thrilling in the history of ballooning in Europe.

### UNABLE TO MAKE DESCENT.

The two balloonists, caught in the gale in the upper air, were blown at terrific speed for three days, unable to make a descent without being dashed to death.

As the wind seemed to slacken, the balloonists opened their valve, preparing to descend. What was their horror upon seeing as they dropped from the clouds that the open sea was beneath them. They tried to shut the valve, but were only partly successful.

When within a few hundred feet of the water, the valve was closed by Wolf, who climbed up to the cordage surrounding the gas bag to do it. But the balloon still dropped nearer the sea. Finally desperate, the balloonists climbed into the balloon's rigging and cut the basket from under them.

Clinging to the cordage about the balloon, the two men hung between hope and fear for a few moments as the bag seemed to hover uncertainly. The thought came into their minds simultaneously that one must drop off and lighten the weight to save his comrade; otherwise both must drown. But slowly the bag began to rise once more.

### CLUNG TO CORDAGE FOR HOURS.

After clinging for hours to the cordage, thousands of feet in the air over the sea, the two soldiers made out the land. As soon as it was safe, the valve was opened again, and the balloon was allowed to descend slowly. The two men landed in a snow bank within a few miles of a little Swedish village. They had to walk two miles, almost exhausted, through the snow, and collapsed just as they reached the first cabin.

"That tree, Mirandy, reminds me amazingly of a jay-bird."  
"Look-a-here, Si, yew're gettin' dippy. Haow on airth kin a tree-fallen across th' road put yew in mind uv a jay-bird?"  
"Beuz, Mirandy, it hez blew dawns Giddap, Nance."

## THE STATE OF SEQUOIA.

**The Name of the Originator of the Cherokee Indian Alphabet to be Honored.**

The decision of the convention, which recently met at Muskogee, Indian Territory, upon a name for the new state to be added to the Union brings a total of thirty-three states which have adopted Indian titles for state names. The convention, after some little discussion, decided that the new state should be known as Sequoia, as a tribute to the great Cherokee leader, and is a fitting honor which America owes to one of the really great red men of this continent. The Cherokee Indian alphabet was originated by George Gist, a half-breed, known to the tribe as Sequoia. He was a statesman and a peaceable leader among the tribe. He was an illiterate man but the idea of an alphabet for the Cherokee tribe was conceived from the brands he saw on cattle. He carved eighty-six characters with his hunting knife out of pine bark, then he called the wise men together, and explained the characters. The tribal council adopted that, and in later years one of the tribe translated the Bible into the Cherokee language, through which medium

THE HALF-BREED SEQUOIA.

Christianity was first taught among the Cherokees. It is to Sequoia that the Cherokee nation owes its splendid system of schools.

While in search of a lost band of Cherokee Indians in 1845, Sequoia lost his life.

California has already honored him by naming the "Big Tree" of that state "Sequoia gigantea" after him. England knows this tree as the "Wellingtonia."

Thirty-two of the states of the union have adopted Indian titles, but they are usually place-names; no state commemorates in its title any original American citizen. True we have Delaware named for Lord De la Warr, Pennsylvania for the Quaker, William Penn, and one for George Washington, but none to commemorate an Indian.

MISS CLARA BARTON AND MRS. JOHN A. LOGAN.

sonary work, was born in Oxford, Mass., in 1820. During the Civil War she did relief work on the battlefields and organized the search for missing men for which Congress appropriated the sum of \$15,000. After the close of that conflict she went abroad and carried on the Red Cross activities of the Franco-Prussian war, following which she did heroic work at the Johnston flood, distributed relief in the Russian famine in 1892, and the Armenian massacre of 1895, at the request of the President of the United States carried relief to Cuba in 1898, and conducted the Red Cross relief at the Galveston flood.

America's most interesting representative in the world's group of grand old women has been loaded with honors by all nations, and her home is filled with valuable tokens of esteem. Chief among the treasures cherished by this idol of conquering armies are the jewels and decorations tendered her by the royalty of many nations, and constituting unquestionably the greatest collection ever bestowed upon any citizen of the United States.

### GIFTS FROM ALL SOVEREIGNS.

Conspicuous in the glittering array are the amethyst cut in the form of a pansy, an inch and one-half square, the gift of Miss Barton's personal friend, the Grand Duchess of Baden; the Serbian Red Cross decoration presented by Queen Natalie, the Gold Cross of Remembrance bestowed by the Grand Duke and Duchess of Baden, a medal presented by the Queen of Italy, an English decoration pinned on Miss Barton's dress by Queen Victoria; the Iron Cross of Germany presented by the Emperor and Empress, the decoration of the Order of Melusine presented by the Prince of Jerusalem, Cyprus and Armenia, and the brooch and pendant of diamonds, the gift of the people of Johnston, in recognition of the great service rendered by Miss Barton after the famous flood.

Miss Barton's father was in boyhood one of the soldiers of "Mad Anthony" Wayne, and Clarissa Harlowe Barton, as her name is inscribed in the family Bible, came to the Bay State home as a human Christmas present. Like many

engaged in literary work, and has resided in the city of Washington, making her home in a quaint old house filled with mementoes of her hero husband. This residence is on a most attractive little estate of about one-half acre in extent, located on the brow of a hill overlooking the nation's capitol.

### COLONEL HENDERSON'S POEM.

Several years ago the late Col. D. B. Henderson wrote a poem entitled "Yes or No?" which slumbered until the other day, when it was read in Des Moines at a meeting held in the famous town's memory. The poem runs:

Is there a woe stronger and good than always indicates the road  
Where we should go,  
That tells us with unerring voice  
Which of the words should be our choice—  
"The Yes or No?"

We have the bibles of the earth,  
With all their holy power and worth,  
And yet we know  
The world is wild with disputation  
As to the "true road to salvation"—  
"The Yes or No?"

When seeking virtue's truest path  
And all the purest gems she hath,  
Is there no woe?  
Is there no doubt in noblest mind  
Who in the word from heaven would  
Find  
The Yes or No?

Our hearts will whisper: "This is right;  
Here live and love and drink delight  
Nor dream of woe."  
When reason suddenly cries out  
In tones that fill the heart with doubt  
And thunders: "No!"  
And ever thus we rise and fall,  
We hope and fear and tremble all  
Until we go.  
Then we shall have a sweet repose,  
There is a light that melts our woes,  
Lost is the No.

### SQUIBS

Recent events in Zion City make it apparent that Elijah the third has gone up almost as effectually as did the original.

A Kansas woman was kicked by a mule, causing her to bite off her tongue. She realizes now it is bad business to talk back to a mule.

It is hard for Russell Sage to understand why people want to travel in air-ships when walking is so much cheaper.

Miss Ottilie Guenther, who was recently given a private audience by Pope Pius X. in a Chicago girl and a daughter of Otto Guenther of the firm of Guenther, Braden & Co. This is the first time she has been honored by the head of her faith. Leo XIII. having granted her a special audience a year before his death. Miss Guenther has been taking a law course in the University of Berlin. She has done much philanthropic work among the poor Italians of Chicago and will resume this when she returns there next month. She will be graduated from Northwestern University Law School in 1907.

The waves passed over our heads, the air in our streets, the air in our houses, trembled from the volcanic impulse. The very oxygen supplying our lungs was responding also to the supreme convulsion which took place 10,000 miles away. It is needless to object that this could not have taken place because we did not feel it. Self-registering barometers have enabled these waves to be followed unmistakably all over the globe.

Such was the energy with which these vibrations were initiated at Krakatoa, that even when the waves thus arising had converged to the point diametrically opposite in South America their vigor was not yet ex-

## Secure Your Future

To earn more money—to secure your future—to succeed in life—cut out, fill in and mail to the International Correspondence Schools the above coupon. They will show you how you can fit yourself easily and quickly in your spare time to get more money in your present position, or change to a more congenial and better paying occupation.

Mind, the sending of this coupon does not obligate you to pay one cent. It simply gives the I. C. S. the opportunity of proving how easy it is for you to improve your condition right at home without neglecting your present work.

### No risk to run. No books to buy.

The I. C. S. is an institution with an invested capital of over \$5,000,000, and a reputation of 14 years' successful work. It has taken a day laborer and qualified him as an electrician with a salary of \$300 a year. It has taken a bricklayer and qualified him to become a building contractor with a business of his own of \$200,000 annually. It has taken a sailor and qualified him to establish his own yearly business of \$50,000. It has taken tens of thousands of men and women of every age and in every walk of life and in a few months qualified them to double, triple, quadruple their salary. To learn who they are; how it was done; how you can do the same, fill in the coupon and mail it to-day.

## Succeed In Life

**ENGLISH LANDSCAPE.**

**Their Roads and Bridges are Substantial, Enduring and Picturesque.**

**In Comparison With American Rural Improvements They Convey The Idea That We Think But Little Of Posterity.**

There is an old story which will bear telling again as it illustrates so well the disadvantages to be overcome in a new country. It is of an American traveling in England who, when out walking one day stopped in front of an old English mansion to admire it and its surroundings. What particularly impressed him was the magnificent sweep of velvet lawn which extended without a flaw or blemish from the hedge along the roadway up to the very steps of the house. An old gardener was at work on the place and at that particular time was pushing a lawn mower across

ENGLISH COUNTRY ROAD AND BRIDGE, CROSSING RAILROAD TRACK.

the sward. The American hailed him and with the usual freedom and inquisitiveness of his nationality asked many questions as to the conduct of affairs in such an establishment "as the gardener was connected with."

"Tell me," he said to the gardener, "how do you make a lawn like this. I have a place in America and I am trying to make a lawn around the house, but it doesn't seem to do well." The old gardener again spoke doubtfully, but finally gave it as his opinion that if his directions were followed for anywhere from fifty to a hundred years the results would be all that could be desired.

This same idea might also apply to the roads and bridges throughout England, for much of their excellence is due to the fact that their foundations were laid scores of years ago and generation after generation of workers has been tinkering at them ever since. In fact, the roads built by the Romans now serve as the foundations for some of the best known English highways, and to the south of London, east and west through the beautiful county of Surrey there is a road now greatly patronized by the owners of motor cars which in its beginning was the highway beaten hard by the sandaled feet of the early Britons as they toiled to the east coast from Wales with their back-breaking burdens of tin. This same road was afterwards improved in its texture and grades because of its being the highway for the pilgrims of western England en route to Canterbury. It is still shaded in places by the yew trees planted perhaps a thousand years ago to furnish bows for the sturdy British archers.

**ENGLISH ROADS VERY NARROW.**

In the first place the English road is generally narrow, so narrow, in fact, that it is only in certain places that one team can pass another without considerable maneuvering. If all the labor expended upon an American country road were to be concentrated upon a narrow track only wide enough for a farmer's wagon, great improvement in results would be noted, for it is of course much cheaper to lay the foundations, build up the body, and surface a road fourteen feet wide than to put into shape a highway which, at its narrowest point the ambitious Americans have extended to forty feet. This, in itself, is a point which if intelligently adopted would in many places solve the question of a practicable roadway upon which in all kinds of weather and at all times of the year a single team of horses could haul a profitable load to market.

The English farmer uses a cart upon which a single horse draws anywhere from one to two tons of dead weight. The tires of the wheels are from four to eight inches in breadth, thereby cutting no ruts and each passing vehicle adds to the solidity and smoothness of the road in that its wheels serve as effective rollers.

fact, that it is only in certain places that one team can pass another without considerable maneuvering. If all the labor expended upon an American country road were to be concentrated upon a narrow track only wide enough for a farmer's wagon, great improvement in results would be noted, for it is of course much cheaper to lay the foundations, build up the body, and surface a road fourteen feet wide than to put into shape a highway which, at its narrowest point the ambitious Americans have extended to forty feet. This, in itself, is a point which if intelligently adopted would in many places solve the question of a practicable roadway upon which in all kinds of weather and at all times of the year a single team of horses could haul a profitable load to market.

The English farmer uses a cart upon which a single horse draws anywhere from one to two tons of dead weight. The tires of the wheels are from four to eight inches in breadth, thereby cutting no ruts and each passing vehicle adds to the solidity and smoothness of the road in that its wheels serve as effective rollers.

It is not due to any peculiar advantage of soil, and certainly not to any advantages of climate that English roads are better than American roads, for if one leaves the highway in the English country, the lanes will be found, by a traveling American, to have a most homelike appearance in their rutted condition, and a very great contrast in the matter of holes, bogs and boulders to the highway left behind. No climate could be more threatening to the solidity of a road way than the moist and changeable weather of the British Isles.

**STURDY APPEARANCE OF THE BRIDGES.**

In the matter of bridges, solidity seems to be the purpose in view. The arches and retaining walls are built of stone, approaches are gradual, and when once the finishing touch is put upon one of these structures, it will last even to many generations the men whose handwork it is. The solid masonry arch, the heavy stone-capped wall, and the gradual rise of the roadway to the centre of the bridge are strikingly utilitarian in the minds of the builders, but they possess a certain sturdy character of their own which is a form of beauty welcomed by the eye. The softens the colors, joy creeps over the stones and, in a short space, even if newly built, one of these English country road bridges takes a permanent place in the landscape giving the impression of always having been there and of intending always to remain.

**THEIR VALUE TO THE TEAMSTER.**

Aside from the beauty, strength and durability of these macadam roads and stone bridges, they possess an economic value which plays a large part in the conduct of an English farm where the margins of profit are small, and there is no reason to believe but that the American farmer, especially in regions where the cultivation of the land is more or less intensive, would find similar roads and bridges of enormous value through an appreciable increase in his ability to reach his market in the shortest time at the minimum expense and with the least motive power.

**BAD FOR COUNTERFEITERS.**

**Secret Service is Hard Pushing This Dangerous Class of Criminals.**

**Detectives Kept on Alert to Cope With Clever and Brainy Schemes for Passing Illegal Money—The King of Counterfeiters.**

This has been a bad year for criminals. This statement is based on data brought out at the convention of the Police Chiefs Association of New York State, an address delivered by the president of the International Association of Police Chiefs and by the operations of the various police bureaus of the United States government. The secret service division of the Treasury alone caused the arrest of 532 persons charged with serious crimes. Of those taken into custody forty-one were arrested for counterfeiting the currency, fifty-two for making alterations in the currency, 344 for counterfeiting coin and the remainder for various violations of the United States statutes. Of the 532 alleged offenders, 392 were native Americans, forty-two were Italians (some of whom were naturalized) and thirteen were Austrians. The largest number of arrests were made in Pennsylvania where those apprehended numbered ninety-four. New York followed with seventy-seven arrests, Ohio with thirty-five, California with twenty-nine, Missouri with twenty-three and in the remaining instances every state and territory with the exception of Alaska was represented.

As compared with last year there was a decrease in the amount of counterfeit currency seized by government officers and an increase in the amount of counterfeit coin confiscated. The total face value of the notes seized was \$36,834, against \$44,350 the preceding year, and of the spurious coin, \$24,110 as against \$16,419 the year before. The number of plates for printing counterfeit bills captured by the government was 165 and the number of dies and molds for casting and stamping counterfeit coins was 454. Nearly all this stuff was seized by the Government before it had been placed in circulation. Nine classes of counterfeit notes were placed in circulation and of these, in the opinion of the Treasury officers only four were cleverly enough executed to be called dangerous.

**RAISING SMALL BILLS.**

The feature of the work of makers of false money this year was in raising the denomination of bills. There was rather a remarkable increase in this illicit industry and the raisers were particularly busy in circulating these altered obligations in Ohio, Indiana, Illinois and other states of the middle west. It is believed by the officers of the secret service that the leading offenders in this division of criminal work were captured, though there is no doubt that many altered bills are still passing from hand to hand in the channels of trade. Counterfeiters in the United States do not restrict their operations to the manufacture of American money, and one of the skillful pieces of work done by the secret service men was the apprehension of three groups of counterfeiters who were issuing fraudulent obligations of the Austro-Hungarian government.

BROCKWAY THE "KING OF" COUNTERFEITERS.

Because of the comparative isolation of Hawaii, its large foreign population and the amount of silver in circulation, it seems that the coinage industry has been active there. Chief Wilkie of the Secret Service has announced that arrangements have been made for the establishment of a branch of the service at Honolulu "where indications have pointed to the development of coinage enterprises and it is hoped that the contemplated measures of suppression might be effective." Another reason why the past year has been a difficult one with criminals is that there has been an increase of co-operation between the police department of the various cities, and general improvement in criminal identification and police work. As Richard Sylvester, major and superintendent of the police department of Washington, D. C., and president of the International Association of Police Chiefs recently said: "If the police forces of the country today adhered to the methods and practices of ten years ago they would not be prepared to contend with the criminal and disorderly classes. It should not be forgotten that in this period those agents of the people who are chosen to combat crime must more than ever before have a higher intelligence, more accurate training, greater courage, both moral and physical, in order to cope with educated, clever, unsuspected professionals who have succeeded the goldbrick man of days gone by. In time the bank burglar with his can of powder and drill has given way to the yeggman who uses nitro-glycerine; the faker who delighted the citizens with cheap gold rings has given place to the "gentleman" who sells cheap gold mines and three-card monte has gone over the divide and "bucket-shops" and "sure things" prevail. The charms of rapid life have produced embezzlers, check-raisers and forgers."

**Laughable, interesting and exciting scenes from every land—A set of views of absorbing interest and a beautiful aluminum, Crystal lens stereoscope for ALMOST NOTHING**

Hundreds of people are daily taking advantage of our very liberal and decidedly interesting offer.

Magnificently finished and exquisitely colored photo views in place of the antiquated old-timers. A most pleasant and interesting way to spend an hour journeying around the globe, viewing places of greatest interest, most beautiful scenery and incidents and sights of travel. Fun, interest and instruction combined. Every view an actual photograph in natural colors, an effect never before attained excepting at many times the cost. These views illustrate some of the most noted places in the world—mountain scenery, waterfalls and other famous natural phenomena—some of the world's most famous buildings, places of historical interest and places famous for beautiful architecture and places that we all should know about.

**Among the beautiful scenes from every land, are the following:**

- Yellowstone Park; Swiss Alps; On Board a Russian Man-of-War; A Klondyke Camp; Famous Ferry Depot, San Francisco; Cathedral, Rotterdam; Moulin Rouge, Paris; Street Scene, Mexico City; Emperor William II; Inspecting a Regiment; Chickamauga Park; Cotton Plantation; On the Pike at the World's Fair; Holiday Street Parade in Havana, Cuba; Public Well, Peking, China; Lookout Mountain; Steamboat Scene on the Mississippi; Garden of Gethsemane, Palestine; The National Capitol at Washington; The Pantheon at Rome; Lava Island at Niagara Falls; David's Judgment Seat, Jerusalem; Interior of President Diaz's Palace, Mexico; Ostrich Farm, Egypt; Royal Gardens, Dresden (very beautiful); Palm Garden, Frankfurt; Morro Castle, Havana; Tomb of Gen. Grant, New York; Street Scene, Cairo, Egypt; Street Scene in Venice, Italy; Japanese Royal Garden; Ice Cave at Niagara Falls, etc., etc. besides comic, sentimental and interesting views of every nature. These are genuine Old-Stereoscopic Views, executed in a most artistic manner, being a combination process, giving a magnificent depth of detail and splendid color reproduction true to life.

**Hundreds of Thousands** of people have spent many pleasant hours with the stereoscope, but heretofore they were compelled to pay enormous prices for views as high as 50c. each, for colored pictures. By a special arrangement with the manufacturers we are able to offer the ENTIRE OUTFIT OF STEREOSCOPE AND TWENTY-FOUR BEAUTIFUL COLORED VIEWS at the former cost of a single view. And mind, these views are in every respect the equal of those formerly sold at 50 cents each and stereoscope at \$2.00.

Now we come to our great special offer. Read our plan carefully as it describes the stereoscope and tells how to secure the scope and views at almost no cost to you.

**First the Stereoscope.** The Stereoscope is our world-famous "Aluminum Crystal Lens" Stereoscope, aluminum, with patent folding handle. The lenses are extra fine quality, selected for clearness and brilliancy, 1 1/4 inches in diameter, ground from best quality glass and carefully adjusted.

**How to get it.** We are not in the business of selling stereoscopes and photo views. We are publishers of OPPORTUNITY, and we GIVE this beautiful crystal lens, aluminum stereoscope and 24 photo-views in natural colors only, as a premium for getting subscribers; and boys and girls are simply falling over themselves to secure the premium. OPPORTUNITY is the handsomest and best 50-cent magazine in America. Beautifully printed, on fine paper, profusely illustrated in half-tones, telling of the remarkable development going on in all parts of the country, especially of the West, under irrigation, and the wonderful opportunities in agricultural, industrial and commercial lines awaiting the first comers, containing sketches and portraits of successful men and women, delightful stories, entertaining and useful home reading, fashions, etc., for all the family. It is a magazine that will readily find a welcome and prove a blessing in any home. It is published monthly at 50c. a year.

**Our Offer.** We will send this beautiful Stereoscope and 24 colored views, as premium, all charges paid, to any one who will secure and send us actual 3 new subscriptions at 50c. each, and 10c. for postage—\$1.60 in all, or 2 new subscriptions at 50c. each and 35c. additional—\$1.35 in all. 1 new subscription at 50c. and 50c. additional—\$1.00 in all. Each subscription must be that of some one other than the person sending the order. A FEW YEARS AGO AN OUTFIT AS GOOD AS THIS COULD NOT HAVE BEEN BOUGHT FOR A CENT LESS THAN TEN DOLLARS. You don't even need a sample copy to get these subscriptions, but if you want one write and we will send it by mail. By our liberal offer every family can possess one of these outfits, and when you get it we will tell you how you can get more views, of which we have thousands of subjects to select from.

Send money any safe way, but DON'T send checks on your local bank.

**ERUPTION OF KRAKATOA.**

(Continued from preceding page.)

haunted. The waves were then, strange to say, reflected back from their point of convergence to retrace their steps to Krakatoa. Starting from Central America, they again described a series of enlarging circles, until they embraced the whole earth. Then, advancing into the opposite hemisphere, they gradually contracted until they had regained the Straits of Sunda, from which they had set forth about thirty-six hours previously. Here was, indeed, a unique experience. The air waves had twice gone from end to end of the globe. Even then the atmosphere did not subside until after some more oscillations of gradually fading intensity, at last they became evanescent.

But, besides these phenomenal undulations, this mighty incident at Krakatoa has taught us other lessons on the constitution of our atmosphere. We previously knew little, or I might almost say nothing, as to the conditions prevailing above the height of ten-miles overhead. We were almost altogether ignorant of what the wind might be at an altitude of, say, twenty miles. Krakatoa drove into those winds prodigious quantities of dust. Hundreds of cubic miles of air were thus deprived of that invisibility which they had hitherto maintained. With eyes full of astonishment, men watched those vast volumes of Krakatoa dust start on a tremendous jour-

**ERUPTION OF KRAKATOA.**

(Continued from preceding page.)

ney. Westward the dust of Krakatoa took its way. Before the occurrence of that eruption no one had the slightest suspicion that far up aloft, twenty miles over our heads, a mighty tempest is incessantly hurrying with a speed much greater than that of the awful hurricane which once laid so large a part of Calcutta on the ground and slew so many of its inhabitants. Fortunately for humanity, this new "trade-wind" does not come within less than twenty miles of the earth's surface. We are thus preserved from the fearful destruction that its unmitigated blasts would produce—blasts against which no tree could stand and which would, in ten minutes, do as much damage to a city as would the most violent earthquake. When this great wind had become charged with the dust of Krakatoa, then, for the first and I may add, for the only time, it stood revealed to human vision. Then it was seen that this wind circled round the earth in the vicinity of the equator and completed its circuit in about thirteen days.

In some violin experiments in a menagerie the influence of the instrument was greatest on the puma, which became much excited when lively music was played, but was soothed by slower melodies. Wolves showed an appreciative interest, lions and hyenas were terrified, leopards were unconcerned, while monkeys stared in wonder at the performer.

**ONLY \$1.00. SPECIAL 60 DAY OFFER TO INTRODUCE OUR NEW EXCELSIOR SOLAR TELESCOPE. THE WONDER OF THE AGE.**

**OVER 3 1/2 FEET LONG**

**JUST WHAT YOU WANT ON SEA, FARM, RANCH OR IN THE SCHOOL.**

This is a large powerful astronomical Telescope for Terrestrial and Celestial use. This Telescope is provided with an adjustable Solar Eye-piece. With this wonderful Eye-piece you look the sun square in the face, on the brightest and hottest day, and study its face as you do the moon at night. Every student, male or female, needs this Telescope to study the sun in fullness, also the mysterious sun spots and sun spots which appear and disappear at intervals, and move about in different locations of the sun. You will regret it if you neglect to secure this Telescope. Beware of cheap telescopes which are sold at a low price before the season. These Telescopes are made by one of the largest manufacturers of Europe, and are of the finest quality. They are five feet long, and 3 1/2 inches in diameter. They are made of brass, and have a beautiful finish. They are provided with a powerful lens, and are perfectly adjusted. Guaranteed by the Maker, Kirtland Bros. & Co., New York, N. Y.

Every telescope in the country or at seaside resorts should certainly secure one of these instruments, and no farmer should be without one. Observe wisely and promptly to view with astonishing clearness. Sent by express safely packed, for only \$1.00. Sent by mail prepaid for \$1.10. Our new catalogue of Glass, etc. sent with each order. This is a great offer and you should not miss it. We want each Telescope just as represented or money refunded.

WANTS ANOTHER. Gentleman—Please send another Telescope. Money enclosed. Other was a bargain, good astronomical compass. B. C. ALLEN, BEARDY, VA.

SUPERIOR TO A \$15 GLASS. Fred. Walsh, of Hovey Island, Ontario, Canada, says: "Gentlemen—I have just received your Telescope, and must say it surpasses all expectations. It is far superior to one which we have had, which cost \$15.00 some years ago. Just a few nights I have seen with it what more than double what it cost me."

COULD DISCERN BOATS FROM FIVE TO TEN MILES. Mr. C. M. Medley, of Duluth, Minn., who purchased one of these Telescopes, says they are superior to anything he expected; that with it he could discern boats on the Great Lakes at a distance of 10 miles, and in clear weather he could read the names of steamers and other craft at a distance of one-half mile away.

Thousands of others are saying good things about these Telescopes. It is marvelous. It will repay its cost a hundred times over. Get one and try it.

**SECURE THIS TELESCOPE AND TAKE A LOOK AT OLD SOL.**

Never before sold on any Telescope for less than \$5.00 or \$10.00. Now is a chance to secure one for \$1.00.

This Eye-piece alone is worth more than we charge for the entire telescope, so all who wish to behold the Sun in its Tranquil Beauty. Remove the Solar Eye-piece lens and you have a good, practical telescope for land observations. Address

**KIRTLAND BROS & CO., Dept. A. M. G. CHAMBERS STREET, N. Y.**

Order, or Bank Draft payable to our order. If you desire Telescope by mail we will send you our new catalogue of Glass, etc. sent with each order. Interesting Booklet, entitled "Telescope Talk," FREE with each order.

### FENCES AND GATE POSTS.

GUY ELLIOTT MITCHELL

The depletion of the timber lot and the gradual decrease in the supply of lumber, with the consequent increase in the cost of wood, make the erection of fences on the farm a matter of concern. For the landholder heretofore has looked upon wood as a proper material for the construction of an effective fence. Metal—that is, fence wire—has almost entirely replaced the rails which at one time were considered necessary to make a fence stock-proof. We still find, however, that timber is, in most localities, the cheapest material for fence posts, though the supply available is becoming scarcer each year, and it is possible that in the future it may be necessary in every section

is possible to obtain from them fences constructed entirely of metal at small cost. While the unprogressive farmer is content to have a few bars to let down in order to admit of the passage of teams or wagons, no fence is complete without an entrance, and therefore without a gate, for at best bars are only makeshifts and a loss of both time and temper. It is surprising how common they are when excellent and serviceable light gates can now be purchased very cheaply and even where the lack of money is an obstacle to this a handy man can, with the aid of an axe, a hammer and some nails build and hang a strong useful gate with no

It will be better and a saving of time if the timber after being cut up for the gates is given a couple of coats of paint before being put together. After the gate is completed and hung, it can be given a final coat. The first or priming coat should be very thin; in fact, may be nearly all raw linseed oil. The second and last coats will, of course, be a little thicker, and in order to dry hard, and with a little gloss, should contain a small quantity of turpentine and boiled oil. While tastes may differ as to colors, results have shown that white seems to give the most satisfaction, while the iron work painted black will make a slight contrast, adding to the improved appearance of the gateway.

A SUBSTANTIAL ROAD GATE.

of the country to use posts made of iron or concrete, even as is now done in many places.

An essential feature of a rail fence is a comparatively short post, but now that wire is, in the majority of cases, taking the place of the rail, it is questionable whether as many posts are necessary as was the case when rail was used. Recent tests were made at an English experiment station to determine upon the best method of constructing a fence. One point considered was whether a fence constructed with a dropper is as efficient and durable as one constructed entirely with posts. A second point under consideration was the minimum number of posts required in the construction of an efficient and durable fence when droppers are used and the character of the dropper required for best results. The dropper is a thin vertical brace used to strengthen the stretch of wire between posts. As metal is admittedly more durable than wood, an endeavor was made to obtain a suitable rigid metal dropper, but without success.

**NOTCH THE CORNER POSTS LOW.**  
An error that farmers sometimes make in erecting a fence is that they place the corner supports or struts too near the top of the post, and consequently at too great an angle with the line of the fence, so that when the wires are stretched tightly the post is pulled out of the ground, notwithstanding that huge bowlders are piled against the post or lying on it, in an endeavor to keep it in the ground. One fence which has been found to prove very satisfactory consists of square posts and top rail with three or four rows of plain wire fastened on the outside edges of the post, instead of through holes bored in the uprights. If these wires are fastened ordinary poultry netting with, say, an inch and a half or two-inch mesh. This netting may be strained very tight and will lie as flat as a board, the appearance of the fence being thereby greatly improved.

While the use of barb-wire in the construction of fences is regretted, owing to the injury which it sometimes inflicts upon the live stock, there is no doubt that its employment under certain conditions prolongs the life of a fence, deterring stock from rubbing against it and unduly straining the plain wires. It has been argued that stock soon get to understand how dan-

gerous barb-wire is, and when in a quiet condition are rarely injured by it; but once excited by panic or play they forget its danger and often suffer in consequence. While there may be some styles of woven fence which will enable the farmer to discontinue barb-wire, the new material must have sufficient elasticity to recover from occasional very severe and unusual strains and also sufficient to respond to our varied conditions of heat and cold, and so require no straining after its erection. The American fence manufacturers seem to be ahead of the Europeans in the production of wire fences, for it

is possible to obtain from them fences constructed entirely of metal at small cost. While the unprogressive farmer is content to have a few bars to let down in order to admit of the passage of teams or wagons, no fence is complete without an entrance, and therefore without a gate, for at best bars are only makeshifts and a loss of both time and temper. It is surprising how common they are when excellent and serviceable light gates can now be purchased very cheaply and even where the lack of money is an obstacle to this a handy man can, with the aid of an axe, a hammer and some nails build and hang a strong useful gate with no

farm implements from one field to another. Where some fields are planted with small green crops from which the farmer desires to keep his poultry it is thought best that the bottom rail of this gate should be within an inch of the ground so that the poultry cannot crawl under. The gate posts should be

A PLEASING FENCE OF TIMBER AND POULTRY WIRE.

quite separate and distinct from any posts used in the construction of the fence, as a better effect is obtained without additional trouble if they are slightly higher than the uprights in the gate and higher than the fence posts adjoining the gateway. The main entrance to the farm and also the gateways around the dwelling may be still further improved if a little additional trouble is taken to square the gate posts and round off the tops.

No gate can be said to be finished until it is painted, for not only does painting aid in giving a tidy appearance, but prolongs the life of the wood

but, and who make it, of course, with a hand churn. Some of these farmers might make more butter than they would require for their own use; and the surplus they would sell, as they would their surplus eggs, to the country store.

And you find larger farmers, too, farmers perhaps keeping many cows and selling the bulk of their milk to a creamery, still continuing to make the butter that they need for themselves and making it, as they have always done, in a hand churn.

Such churns are sold to people living in suburban or country homes and keeping cows, who make their own butter because they prefer to anyway, and they are bought by various people everywhere who want sweet or unsalted butter and who make it for themselves in hand churns.

### TO TACKLE HAZERS.

The hazing trials at Annapolis, followed by the long discussion of the subject in and out of Congress, have served to widely advertise the Academy, and as a result, there has been an unusual rush of applications from ambitious young men, who aspire to become admirals. Many of the applicants breathe defiance to all hazers and cite instances of their physical powers to demonstrate their fitness for appointment. One of the letters recently received at the Navy Department ran as follows:

"I play football, have been captain of the basketball team these last two years. I am also an expert with boxing gloves, and would like to have some of the Annapolis fellows try my hazing tricks on me. I imagine they would have to get real busy if they tried to stand me on my head and make me eat soap."

### CONSOLIDATED SCHOOLS.

Assistant Secretary Hays Points Out Necessity for More Thorough Farm Education. Is in Effect a Country High School.

The consolidated school question is a feature of the country school education problem which is rapidly coming to the fore, especially in the northwest, and it promises much for better farm education. The proposition is that six or seven or ten of the cross-roads schools in any rural district shall be combined into one larger school and were it not for the question of transportation of the scholars to and from the central school, it would undoubtedly meet with universal favor. From an educational point of view the advantages of the consolidated school plan are very great. Assistant Secretary of Agriculture Hays is an enthusiastic advocate of the plan and states that where the plan has been put into operation the beneficial results have been manifold. The question has been agitated to a considerable extent in his own State of Minnesota, due largely to his own efforts. Professor Hays is thoroughly alive to the fact that a better scheme of education is needed for the farm boy if he is to keep his foremost position among the world's agriculturists.

### FOR BETTER FARM EDUCATION.

The time, Professor Hays says, has gone by when an "ordinary" school education will serve for the farm boy. The three R's are not sufficient to enable him to succeed in life. He must have special education for farming just as the young man or woman who is to enter professional life has special instruction along the lines he expects to follow. And so the consolidated school comes in, with its better educational facilities.

Canada has taken an advanced stand on this question and is consolidating her country schools. In a word the farmer's children are being given the advantages of a high school education.

As President Creelman, of the Ontario Agricultural College has pointed out, the system undoubtedly is, from a standpoint of dollars and cents, more expensive, for the first few years at least; but the rural ratepayer has it to decide for himself whether he would rather pay five dollars more per year and secure for his boy or girl such increased benefits as the consolidated school can give or leave them in the hands of an inexperienced girl teacher who perhaps does her best in a little one-roomed school, without facilities of demonstration of any kind.

### PRACTICAL FARM SCIENCE.

One of the most important features of these schools is the school garden, where practical farm science is taught in a practical way. Such gardens are not, however, confined to the consolidated schools, but are now being kept in connection with a number of the more progressive district schools in various parts of the country. They are usually from two to three acres in area, divided into experimental and individual plots for each of the pupils, ranging in size from six feet square to six, by ten or even twenty.

The general plan of laying out each garden involves (1) a belt of native trees and shrubs surrounding the grounds; (2) a half-acre playfield for the boys; (3) a lawn bordered with shade trees for the girls; (4) a shaded walk each for boys and girls, about a hundred yards long; (5) an attractive approach to the school, consisting chiefly of a piece of open lawn, with shrubs and flowers on either side; (6) a suitable reservation for individuals and class plots; (7) an orchard plot or border; (8) a forest plot in which the chief native trees are grown from the seed.

### PLANTS GROWN BY PUPILS.

The ordinary range of vegetables and a selection of flowering plants are grown in these gardens, the pupils themselves furnishing the necessary work. In the large schools two hours each week are found sufficient for the garden work, and one hour in the smaller work, and one hour in the supervision of the teacher or a special instructor. The school garden serves a double purpose, since it not only provides the most practical form of nature study but acts as a valuable incentive in the general school work. It is so uncommon a sight during the summer season to see a public school in session, but of doors, not with slate and pencil but with hoe and shovel. The pupils thoroughly enjoy it. They are allowed the proceeds of their plots as their own property, and in addition over from thinning out. The class plots are reserved as a source of revenue for the school and as a supply, in some cases, for the school lunches.

Former Iron Master Andrew Carnegie has endorsed the idea of phonetic spelling—making the words sound as they read, or read as they sound—either way.

Deer Andrew— I trade your way of spelling many years ago since when I have used no other. Ten years ago also I used Berg's, and you're the rest.

## "I Grow Hair" Package

Free \$1.00 Package

No Longer Any Excuse For Dandruff, Falling Hair or Baldness.

Before and After Using This Magic Compound.

Photo actually grows hair, stops hair falling out, removes dandruff and quickly restores luxuriant growth to itching scalps, eyebrows and eyelashes, and quickly restores gray or faded hair to its natural color. I don't ask you to take my word for it; let me send you a full \$1.00 package free. Write to-day.

### FREE \$1.00 PACKAGE COUPON

Fill out the blank lines below, cut out the coupon and mail to J. L. Rice, Mfg. Co., 1271 B'way, N. Y., N. Y. Enclose ten cents in stamps or silver as an evidence of good faith and to help cover postage, etc., and the \$1.00 package will be sent you at once by mail free of charge.

### JOE, THE INDIAN DOG.

From Sunset.

"Did he ever make friends with the battery boys?"

"No," said Sergeant Wright, "he never did. I understand dogs, and I know that our dog Joe died of a broken heart at Fort Stevens, at the mouth of the Columbia, and we gave him a sort of informal military funeral and buried him where the moaning of the bar is always heard."

There had been a battle near the Yellowstone, and the Nez Perces had gradually had to give way and retreat as the dusk drew down to hide the damage of the day. But all the warriors did not go. Among the rocks up the cañon, nine of them lay in one heap, seven in another, at rest at last. Four dogs were there doing the Casablanca act, and a soldier lay beside one of them in form and color like a fox, and brought him into camp.

Joe was the name given him, and day after day he was led by some member of the company until the long fifteen-hundred-mile march was ended. He tolerated the portion of the rations handed him, but never smiled in return, and merely ate to live. He conformed to constituted authority as a matter of common sense, and on the long steamboat trip down the Missouri to Omaha, across by rail to the Pacific and up the coast to Oregon, he was the same dignified dog, always with an ear askance, anticipating the footsteps of his Indian comrade.

But it never came. No soldier had learned to love him, but all respected him for fidelity to his dead master.

### IMMIGRATION LEGISLATION.

The Committee on Immigration of the House of Representatives has reported a bill raising the head tax on aliens from \$2 to \$5, requiring each male adult to possess not less than \$25 and each female \$15; providing that every immigrant over 16 years shall be able to read and write in some language, and placing in the excluded class imbeciles, the weak-minded and manual laborers of poor physique. The Department of Commerce and Labor is given discretion to admit or exclude immigrants under 16 years of age coming to this country alone. The proposed law, it is stated, would sift out a good many undesirable persons.

## Don't Die That Way

Millions Die Every Year from Mere Ignorance of Nature's Laws of Health

Ask yourself the question: "Is Life Worth Living?" And the answer will be: "It depends on your health."

Then why not have good health? If you are sick it is because some simple, natural law of health has been violated.

Nature is a Stern and Inexorable Judge, and Grants No Pardons When Her Laws are Broken.

Better Learn These Laws. You can't learn them too soon. You can't learn them all at once. Begin right now, and Learn a little every month.

Send a dime or five two-cent stamps to 1405 Fisher Building, Chicago, for one whole year's subscription for Maxwell's Home-Maker Magazine, and read the Department of Health and Right Living. Read it every month—year in and year out—and learn all about Nature's Laws of Health, and save Doctors' Bills and Drug Bills, and you will enjoy many years of Life and good health after you otherwise would have been dead and buried or maybe cremated. Whether you are buried or cremated doesn't so much matter. It is the dying part that counts. Train "Good Health" as your faithful body-guard to keep old " Grim Death" from Maxwell's Home-Maker Magazine.

NOTE—If you do not wish to cut the coupon out of your paper, you can send in your subscription on a separate piece of paper.

### ONE YEAR FOR 10 CENTS

Subscription Price to Chicago and Foreign Addresses, 25c. Per Year. Cut out this subscription blank, write name and address on lines below, and send us 10 cents (silver or stamps) and we will mail you Maxwell's Home-Maker Magazine every month for twelve months. Don't delay, but send at once.

Name \_\_\_\_\_  
Box or Street No. \_\_\_\_\_  
Postoffice \_\_\_\_\_  
Enclosed find \_\_\_\_\_ for \_\_\_\_\_ years' subscription. State whether a new or old subscriber.

You can subscribe for one, two, three or five years at 10 cents for each year. Better send 50 cents and have five years' good reading coming to you. This is the BEST MAGAZINE for the money ever published. Address in full

Subscription Dept. MAXWELL'S HOME-MAKER MAGAZINE, 1405 Fisher Building, CHICAGO, ILL. If you wish to have THE HOME-MAKER MAGAZINE sent to friends, use a separate piece of paper for name and address, and enclose 10 cents for each yearly subscription.

TO THE LAME  
These are only two of the conditions we guarantee both. Others include our 100-day money-back guarantee. Write to O'Connor's Latex, 1284 W. 12th St., Chicago, Ill. 1908. "O'CONNOR'S LATEX" wear ready-made shoes, slippers or Oxford shoes. Selection—open back, no lacing—no exertion to walk—perfect ankle and instep! Cut this out and send to us and we will tell you how to get one free. Give shortage.

### PAINT WITHOUT OIL.

Remarkable Discovery That Cuts Down the Cost of Paint Seventy-Five Per Cent.

Free Trial Package and Big Book Telling All About Paints and Paint-Making Arts Mailed Free to Everyone Who Writes.

A. L. Rice, a prominent manufacturer of Adams, N. Y., has discovered a process of making a new kind of paint without the use of oil. He calls it Powderpaint. It comes to you a dry powder, and all that is required is cold water to make a paint weather-proof, fire-proof and as durable as oil paint. For many purposes it is much better than oil paint, and is indispensable to every property owner. It adheres to any surface, wood, stone, or brick, green and looks like oil paint, yet costs only one-fourth as much. Write to Mr. A. L. Rice, Manufacturer, 806 North St., Adams, N. Y., and you will send you a free trial package, together with color card and his valuable book on painting, all free. This book is necessary to all who use paint. It tells you how to mix your own paint, making, exposes fake paints, tells you how to get the best results from paint for different purposes, and shows you how you can save and make a good many dollars. Write to-day, and the book, free trial of paint, etc., will be sent you without any cost by return mail.

### FREE BASEBALL OUTFIT!!

YOUR EXACT SIZE

## Briefs of the Week

Strawberries.  
Death and taxes sure.  
"What women will do."  
Farmers on the hen trot.  
The gate bluffs clean as mud.  
"Under the Laurel" this Friday evening.

A grafter is a reformer who is in. A reformer is a grafter who is out. Memorial Day services at the M. E. Church week from next Sunday, May 27th.

Epworth League Supper at Palmer's Studio this Friday evening. Don't forget.

The May apportionment of the Primary School Money for Charlevoix County amounts to \$5,353.

W. P. Squier has purchased the building lot between E. J. Crossman's and George Frost's in Second-st and begun the erection of a dwelling.

For benefit of the Dady Macabees the Peninsula Dramatic Club will present "Under the Laurels" at Loveday Opera House this Friday evening, May 18th.

Lightning did some damage during the storm of Wednesday evening. It put some of the phones out of order, and smashed the chimney on P. K. Winter's residence.

On complaint of Miss Martha Walker of Charlevoix, Wm. Petoskey was arrested this week, charged with illegal partridge. He was bound over to Circuit Court for trial. Petoskey is a well-to-do farmer residing near Petoskey.

The Fifteenth Annual Convention of Charlevoix County W. C. T. U. is to be held at Norwood next Tuesday and Wednesday, May 22 and 23. District President, Mrs. P. J. Howard of Petoskey will give the annual address. The Silver Medal Contest will take place Wednesday evening.

Mrs. Hugh Mumia is quite ill.  
Black bass season opens next Monday.

Ladies' Fine Wearing Apparel at A. Danto's.

A new cash register is the latest convenience at Fred M. Boosinger's General Store.

For Sale, Cheap—A lot of anthracite coal stored for a strike. Apply G. F. Baer & Co.

This Friday evening "Under the Laurels"—Loveday Opera House. Get your ticket now.

The Cooperage was shut down for a few days owing to the cylinderhead of their big engine blowing out.

In the absence of the pastor, the pulpit of the Presbyterian Church will be occupied by Rev. J. L. Donovan, Sunday morning.

Samuel Hayden of Central Lake has decided to remove to East Jordan next month and occupy his residence recently vacated by James Quinlan.

The steam loader at Ward's Camp 10 was in a smashup last Saturday. A heavy tree fell across the loader, going through the first deck and narrowly missing the engineer, Thomas Corneil. It was repaired and put in service again Monday morning.

The Annual Meeting of the stock holders of the Detroit & Charlevoix Railroad Company was held at the General Offices of the Company in East Jordan, Tuesday last, May 15th. There were present Vice President Franklin B. Ward of Bay City and Robert M. Chamberlain, General Counsel, of Detroit. The old Board of Directors was re-elected; no other business of importance coming before the meeting.

Children's pretty new Caps—50c.—Boosinger's.

Miss Susie Sheldon is quite ill.  
Alabastine to finish house cleaning.  
Fine line fishing tackle at Stroebel Bros.

Jacob Rogers, at Charlevoix first of the week.  
Erie Crossman, home from a trip down-east.

Free Soap at Sherman's. See adv on this page.

B. A. Dole was a Bellaire visitor Saturday last.

Soupe talk of reviving the Antrim County Agricultural Society.

Mrs. J. A. McKee with children is guest of her parents at Alqua.

Miss Lena Stoehner was here from Deward first of the week, visiting friends.

Mrs. A. K. Hill entertained her mother, Mrs. A. Watkins of Bellaire, over Sunday.

After a week's visit with friends, Rev. C. E. Thomas returned to Lansing Monday.

Try San Marto and also a fresh line of J. M. Baur's celebrated Coffee's at Bowen & Kenney's.

Tessie Clawson of Manton is here guest of her sisters Mrs. Jesse Allen and Mrs. Al Tindale.

Mrs. G. L. Lorraine stepped on a rusty nail recently and the injury is proving quite painful.

Elections and marriages are just alike. There is nothing the candidate will not promise beforehand.

The genial countenance of W. H. Sheldon of the Capitol Building & Loan Association is again in evidence.

The East Jordan Cemetery Association request that the briars be cut from the lots in the Cemetery before Decoration Day.

James Quinlan was here from Grand Rapids this week and moved his household goods to that city. He's working for Harry S. Price at Ludington.

The Opera House manager is trying to arrange an early date with a very fine dramatic attraction—"What Women Will Do." Watch the bill boards.

The interior of Wm. Richardson's State-st Grocery has been remodelled the past week and looks quite tasty. A large-sized refrigerator was also added.

The Str. Gordon is now making two trips daily between Charlevoix and East Jordan. Leaving Charlevoix at 7:00 a. m. and 1:30 p. m. and East Jordan at 10:00 a. m. and 4:00 p. m.

Have you pains in the back, inflammation of any kind, rheumatism, fainting spells, indigestion or constipation. Hollister's Rocky Mountain Tea makes you well, keeps you well. 35 cents at Warne's Pharmacy.

A snake closely wound around the sprocket wheel of a bicycle was shown to The Herald man one day recently. The wheel was being run through the grass when the snake rose, struck at the wheel and became tangled in the spokes with above result.

Those who attended the K. O. T. M. Rally at Boyne City May 1st will be pleased to learn that the arrangements have arranged for a similar event at Charlevoix on next Friday evening May 25th. The steamer Hum has been chartered and arrangements will be made to give every one a good time.

Through courtesy of the faculty The Herald is in receipt of the 1905-1906 Calendar of the University of Michigan. In the Department of Engineering we find the names of two East Jordan boys, John Jamison Porter and Frederick George Whittington. The University contains an enrollment of 4,571 Students.

It is interesting and quite acceptable information, received from official sources, that the railroads of Michigan have greatly increased their earnings thus far this year as compared with last year. An increase of more than one hundred thousand dollars is reported for the month of March alone, and an increase of more than eleven percent is reported for the first three months of this year. The recent rather steep increase in railroad taxes will make an increase in Michigan railroad earnings quite welcome, and there will be a general satisfaction over conditions that provide for such a result.

The Missionary Society met with Mrs. E. J. Crossman Friday, May 11th, Mrs. Clark Haire entertaining them. Devotional exercises was led by the President, Mrs. J. Jameson. Invocation, Mrs. W. Haire. Singing by the audience, Mrs. W. A. Loveday accompanied. Reports of the convention at Mackinaw, Mesdames W. Haire and Jameson. Mrs. Wm. Stone vocal solo. The Perfect Life, Mrs. A. J. Saffern pianist. Mrs. W. J. Smith recited, "The Law of Equity," for prologue read the first eleven verses of the eighth chapter of Gospel of St. John. Violin and piano duet, Misses Emily Malpass and Verschel Lorraine. After which refreshments were served.

The suggestion made at a recent democrat semi-official gathering that a declaration for one-cent railroad passenger rates should be included in the next democrat state platform, vividly illustrates the cheap demagoguery of the leaders of that organization are willing to descend. It would seem that a declaration favoring immediate consolidation of all railroad property and imprisonment of railroad employes and managers would better meet the purpose in view and would be just as sensible and effective as democrat campaign material.

Douglas Shoes at Danto's.  
Choice corn seed at Stroebel Bros.  
Liberty Bell Crackers at E. A. Lewis'.

Mrs. M. A. McHale was Charlevoix visitor recently.

Early Seed Potatoes on sale at Supernaw Bros. Warehouse.

Elegant Laces and Embroideries on display at A. Danto's.

Mrs. George Potter was a Bellaire visitor first of the week.

White Hose for Misses and Children, 25c and 35c.—Boosinger's.

Mr. and Mrs. W. A. Stroebel are entertaining Mrs. Samuel Dopp of Saginaw.

The Tennis Court on the West Side has been re-modelled and fixed-up the past week.

Mr. and Mrs. John Light are receiving a visit from Mrs. Lulu Humphrey of Boyne City.

A full sized 10c cake of Palmolive with every 25c worth of Galvanic Soap at Sherman's.

The Harness stock recently sold by Harry S. Price to Stroebel Bros. has been removed to their Hardware Store.

Dr. and Mrs. C. A. Sweet are receiving a visit from the former's sisters, Mesdames Charles Hinkle and Jennie Davis, of Oklahoma.

When you want Fresh Baked Goods of the reliable sort call at Mrs. Newson's. They're "The Kind That Mother Used to Make."

FOR SALE—House and Lot on West Side on road to Ironton. House in good condition; good well. For particulars inquire of Wm. Brandt.

OFFICE ROOMS TO RENT—A Suite of Office Rooms to be rented, either separately or as a whole. Well lighted. Electric Lights. Inquire at Warne's Pharmacy.

Through application of Carl Stroebel 250,000 wall-eyed pike fry were received from the Michigan Fish Commission this week and planted in the South Arm of Pine Lake.

After the first baby comes, a man can count on his fingers for the rest of his life how many times his wife tells him she loves him, and never have to touch the thumbs.

W. G. Fortune was down street on crutches Friday—the first time since his unfortunate accident last December, when he fell from the Presbyterian church roof badly smashing a leg.

An East Jordan woman says if she goes down town with old clothes on, the street seems crowded but when one of her friends takes her down town in an automobile, the streets seem empty.

Have you weakness of any kind—stomach, back, or any part of the body? Don't dose yourself with ordinary medicine. Hollister's Rocky Mountain Tea is the supreme curative power. 35 cents, Tea or Tablets at Warne's Pharmacy.

A very sad accident happened at Charlevoix, about 10 o'clock Sunday morning, when Anton Nordrum, the ten year old son of Capt. John Nordrum met his death by drowning. The little lad started to run across the logs to board his father's boat which was a short distance from shore and in some way fell through them into the water and drowned before help could get to him. The funeral was held Monday afternoon, Rev. J. W. Vickers, of the Methodist church, officiating. Capt. Nordrum is the youngest brother of Olaf Nordrum of this place.

Don't fight everything you don't agree with. If a man makes a statement that you regard as ridiculous or untrue, don't neglect your work to "argue" with him. If he is mistaken, time will convince him of it; but if you "argue" with him, you will only make him stubborn and persistent. Take care of yourself, and if other men do not look after their interests, you can buy their horses at sheriff's sale. The theory that you must convince erring men of their folly, has been greatly overworked; much of the interference with other men's affairs is plain impudence. Some men are worried so much over the dangers that threaten the country, that they can't decently attend to their own work. If you attend to your own affairs, the country will always get along pretty well.

STATE OF OHIO, CITY OF TOLEDO, LUCAS COUNTY, 1888.  
FRANK J. CHENEY makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.  
FRANK J. CHENEY.  
Sworn to before me and subscribed in my presence this 6th day of December, A. D. 1888.  
(SEAL) A. W. GLEASON, Notary Public.  
Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials free.  
F. J. CHENEY & CO., Toledo, O.  
Sold by all Druggists. 75c.  
Take Hall's Family Pills for constipation.

Ernest O. Coy is still doing business at his Ogar Stand, in spite of rumors to the contrary. He expects to make a deal to close out his stock this coming week to local parties but in case that fails through he will close out the stock to his brother at Alden. Mr. Coy has accepted a position at Ayre town.

All members of the Post are requested to meet at the G. A. R. Hall on Sunday, May 27, 1906, at 9:30 a. m., to attend Memorial Services, to be held at the M. E. Church. The W. R. C. is also invited. Also all old soldiers are requested to meet at the G. A. R. Hall on May 30th, 1906, at 9:00 a. m., to take part with the W. R. C. in their exercises, to attend the exercises at the Opera House at two o'clock p. m., and then go to the cemetery.

Meeting of the Alimnt. Association Saturday evening, May 18th, at the home of Orin, Bartlett. The last meeting (Monday eve) was so well attended (five present including host) that we decided to have another. If the attendance increases we will hold our future ones at the Opera House. All should attend these meetings excepting YOU. Should any where we can call you when we wish your opinion. We need your presence. PEEX.

A full line of Fancy Walts at The Boston Store.

At the Methodist Episcopal Church on Sunday next, May 20th, the Rev. George Allan will discourse on the following topics: 10:30 a. m., "Paul's Idea as to the Duty of the Minister, and Work of the Church." Evening, "An Old Commandment as Seen by Modern Eyes." Also on Thursday evening, May 24th, a sermon will be preached on "Duties of Members and Friends of the Church." To all of these services the people are invited.

Quite a number went on the D. & C. excursion Sunday last, some going fishing, some arbutus hunting, and quite a number to witness the ball game at Deward between a team of that town and the Echo boys. In this game the Bennett team had pretty much their own way, winning out by a score of 14 to 7. The fishermen seemed to fare pretty well, a number making good sized catches. Through courtesy of W. P. Squier (of the D. & C. General Offices) The Herald man and a party of friends were given one of the best one-day outings they ever had. A ride on the locomotive, dinner at Ward's Camp ten, a hand car ride to Deward—gathering arbutus along the way—were the principal features. At Camp ten there are some 200 men employed under Foreman Cleary and all the work seems to be thoroughly systemized.

The suggestion made at a recent democrat semi-official gathering that a declaration for one-cent railroad passenger rates should be included in the next democrat state platform, vividly illustrates the cheap demagoguery of the leaders of that organization are willing to descend. It would seem that a declaration favoring immediate consolidation of all railroad property and imprisonment of railroad employes and managers would better meet the purpose in view and would be just as sensible and effective as democrat campaign material.

# Rags FROM OLD CARPETS

## REVIVO RESTORES VITALITY

Made a Well Man of Me. THE GREAT FRENCH REMEDY produces the above results in 30 days. It acts powerfully and quickly. Cures when all others fail. Young men will regain their lost manhood, and old men will recover their youthful vigor by using REVIVO. It quickly and surely restores Nervousness, Loss of Vitality, Impotency, Nightly Emissions, Loss of Power, Falling Memory, Wasting Diseases, and all effects of self-abuse or excess and indiscretion, which unite one for steady business or marriage. It not only cures by starting at the seat of disease, but it draws nerve tonic and blood builder, bringing back the pink glow to pale cheeks and restoring the fire of youth. It is made of French and Canadian herbs. Write for REVIVO, no other. It can be carried in vest pocket. \$1.00 per package, or six for \$5.00, with a post paid written guarantee to cure or refund the money. Box and advice free. Address: ROYAL MEDICINE CO., Marine Building, CHICAGO, ILL.

For sale in East Jordan by C. MADISON, DRUGGIST

## The June Delineator.

The June Delineator is a most attractive number, containing the usual array of the latest styles, with the interesting fashion chronicles of Helen Berkeley-Lord and Edouard La Fontaine, and literary features of the greatest excellence. Burton E. Stevenson contributes the first part of "The Rose of Sharon," a mystery tale that will tax the ingenuity of its readers to solve, and there are short stories by Kathryn Jarboe and Wolf Von Schlerbrand, the former a story of the new Japan, and the latter a Russian narrative. "The President of Quex" is continued. Under the title, "The Revival of an Old Assembly," Peter Frequent describes the ball at the Astor House, New York, which called forth national comment at the time it was held, in April. Gustav Kobbe, interestingly tells the story of "Home, Sweet Home," and there is a variety of excellent verses. For children, there are "Stories and Pastimes," among them one of Alice Brown's "Gradual Fairy Tales," and for the woman of the home, many articles of housewifely interest, including a chapter on "Dirt and Danger in the Markets," in "The Delineator's Campaign for Safe Foods."

### EVELINE.

Fine weather at present. Elder Ferril called on friends in Eveline recently. Mrs. James McKee called on friends in Eveline recently. Mrs. F. J. Tuttle called on Mrs. Ben Healey recently. The family of Mrs. Benson visited at David Gaunt's, Sunday. George Staley has gone to the southern part of the state. Ernest Frazier is spending a few days with friends in Eveline. Mrs. Duncan McDonald called on Mrs. James Johnston last week.

Wilbert Sandel spent Sunday with his parents, Mr. and Mrs. Lew Sandel. Misses Emma and Ceila Healey called on Ducaan McDonald's, Sunday last. Miss Nina Healey is working at Wood's Restaurant in Boyne City at present.

Mrs. Frank Healey is spending a few days with her parents, Mr. and Mrs. Mede Benson. Miss Elsie Hott is spending a few days with her grandmother, Mrs. Garberison in East Jordan at present.

Miss Ruth Emery has closed her eight months of school in the Three Bells School. She celebrated the last day by having ice cream and cake.

Referring to the charges and criticisms directed against the republican candidate for governor throughout the last state campaign, the Muskegon Chronicle thus well sums up the situation. "But now with Governor Warner in office almost a year and a half, the people can judge how baseless are these charges. Any intelligent man who has followed Governor Warner's record must admit that he has shown the strength and force required in the chief executive of the state, and that he has given to his official work much more of his personal time and efforts than has been the rule with governors in recent years. He has mingled freely with the people and kept constantly in close touch with the interests of the state and the people. He has looked carefully after the state's business which is apparently being transacted with more than ordinary care and energy. Governor Warner has made some mistakes, it is true, but who is there of past governors who has made fewer errors or less serious ones? The record of the last year and a half should strengthen Governor Warner with the people."

For bloating, belching, indigestion, etc., eat a Ring's Dyspepsia Tablet after meals. Sold by Warne's Pharmacy.

The gums and resins obtained from pine trees have long been recognized as highly beneficial in the treatment of backache, kidney and bladder.

WANTED:—Traveling Salesman. Must furnish references and invest \$1,000.00 in first class per cent Bonds. Salary and Expenses paid. Experience not required. We teach business at our Mills. The Wheeling Roofing & Cornice Company, Wheeling, W. Va.

Good looks bring happiness. Friend care more for us when we meet them with a clean, smiling face, bright eyes sparkling with health, which comes by taking Hollister's Rocky Mountain Tea. 35 cents. At Warne's Pharmacy.

A dose of Pine-ules at bed time will usually relieve backache, before morning. These beautiful little globules are soft gelatine coated, and when moistened and placed in the mouth you can't keep from swallowing them. Pine-ules contain neither sugar nor alcohol—just gums and resins obtained from our own native pine forests, combined with other well known bladder, kidney, blood and backache.

For headache, constipation, etc., Dade's Little Liver Pills are best. They cleanse and tonic the liver, and by Warne's Pharmacy.

## DRIFTING TOWARDS BRIGHT'S DISEASE

Many people who are neglecting symptoms of kidney trouble, hoping "it will wear away," are drifting towards Bright's Disease, which is kidney trouble in one of its worst forms.

# FOLEY'S KIDNEY CURE

stops irregularities, strengthens the urinary organs and builds up the worn-out tissues of the kidneys so they will perform their functions properly. Healthy kidneys strain out the impurities from the blood as it passes through them. Diseased kidneys do not, and the poisonous waste matter is carried by the circulation to every part of the body, causing dizziness, backache, stomach trouble, sluggish liver, irregular heart action, etc.

If you have any signs of Kidney or Bladder Trouble commence taking FOLEY'S KIDNEY CURE at once, as it will cure a slight disorder in a few days and prevent a fatal malady. It is pleasant to take and benefits the whole system.

**How to Find Out.**

You can easily determine if your kidneys are out of order by setting aside for 24 hours a bottle of the urine passed upon arising. If upon examination it is cloudy or milky or has a brick-dust sediment or small particles float about in it, your kidneys are diseased, and FOLEY'S KIDNEY CURE should be taken at once.

**G. B. Burhans Testifies After Four Years.**

G. B. Burhans of Carlisle Center, N. Y., writes: "About four years ago I wrote you stating that I had been entirely cured of a severe kidney trouble by taking less than two bottles of Foley's Kidney Cure. It entirely stopped the brick-dust sediment and pain and symptoms of kidney disease disappeared. I am glad to say that I have never had a return of any of those symptoms during the four years that have elapsed, and I am evidently cured to stay cured, and heartily recommend Foley's Kidney Cure to any one suffering from kidney or bladder trouble."

**Two Sizes, 50 Cents and \$1.00.**

**SOLD AND RECOMMENDED BY WARNE'S PHARMACY**

## FOLEY'S HONEY AND TAR

for children, safe, sure. No opiates.
