## Next Week

### Our Schools Hold Commencement Exercises

Supt. Fuller and all connected with our Public Schools have been busy for some time past, preparing for the Graduation Exercises this coming week and the program is now pretty thoroughly arranged.

Tomorrow (Sunday) evening Rev. George Allan delivers the Baccalaureate Address at M. E. church his subject being "After School and College, What".

Class Day exercises are to be held at the Presbyterian church Tuesday evening and program for same is given below. Thursday evening is Senior's Reception at the home of Mr. and Mrs. L. A. Hoyt. There is a slight misunderstanding about the invitations sent out and Supt. Fuller wishes The Herald to state that those who receive Class Day Invitations are also invited to the reception—only the one set of invitations being sent out.

The graduating class this year consists of five, viz:—Clio McKee, Eva Mackey, Mildred Gilbert, Nell S. Mad-daugh and Howard P. Porter. Their Class Colors are yellow and blue; Class Flower, yellow rose; and Class Motto, "Be Your Ais-Set".

The High School Faculty are; Supt. H. H. Fuller, Science and Mathematics; Miss Lucie Smith, Principal, English; and Miss Grace Osborne, Latin and German.

Our School Board consists of the following gentlemen: Pres., W. E. Malpass; secretary, W. P. Porter; treasurer, L. A. Hoyt; A. M. Murphy and S. E. Rogers.

 Invocation.....  
 Address.....Judge Sterling  
 of Benton Harbor.  
 Vocal Duet.....  
 Miss Robertson and Mr. Dole  
 Presentation of Diplomas.....  
 W. E. Malpass  
 To the Graduates.....  
 Supt. H. H. Fuller  
 Selection.....Orchestra

### Notice of Early Closing

On and after June 1st 1906 our store will be closed at 7 p. m. standard time excepting Tuesday and Saturday evening.

F. E. Boosinger,  
 East Jordan, Mich., May 22nd, 1906.

Our citizens deserve credit for the pride they take in our schools. We venture the assertion that not a student ever went forth from our little city, but went away with the best wishes of our people; they gave him encouragement during school life and when he departed took him by the hand and said, "God speed thee." Not one who has finished the course in our schools, wherever he may now be, but wishes our town and her people well, for it was among our Christian people, surrounded by an influence that was elevating and noble, animated by the splendid example of our citizens that he received the foundation that makes him today the upright citizen in any community in which he may live.

## Memorial Day.

### To Be Fittingly Observed Next Wednesday.

The annual commemoration of the sufferings and brave deeds of our patriotic dead is again at hand and the recollection of all it has cost to keep our starry banner floating over a land of free homes and schools makes our hearts tender and grateful while we pause in our busy life to straw blossoms over "the low green tent whose curtain never outward swings."

The lessons of the day inculcate a deeper love and reverence for the Union, a broader, more practical altruism. The teachings of Memorial Day should reach deeper than to merely remind us of the debt of gratitude we owe the men who died for the Union. Patriotism is an assembly of affluities making us discern beyond the life of the family a grand and broad common life in which we have a part.

Let us then loyally and lovingly join in paying a merited tribute of gratitude to our soldiers, both living and dead, remembering that the time has come when the ranks of our veterans are so depleted by advancing

age, as also by many ill-fated from the privations and exposure of army life, that their halting tread and feeble cheers need to be supplemented in these public demonstrations by the hosts of vigorous youths who are to furish the armies of the future, if ever again it becomes necessary to defend the flag of our country.

### Memorial Day Program.

#### FORENOON EXERCISES AT BRIDGE PROGRAM.

The W. R. C. and G. A. R. and Schools will meet at the Town Hall at 9:00 a. m. The East Jordan Military Band will lead procession to the water's edge where the following program takes place:

 Officer of Parade, P. K. Winters.  
 Officer of the Day, Elias Hammond.  
 Post Commander, J. H. Kocher.  
 Ushers, Curtis Finney, Aldrich Townsend, J. M. Davis.

## "What Women Will Do"

### At Loveday Opera House Tuesday Evening Next.

Is the title of Harry Jackson's latest and greatest play—presented by the Holden Brothers Company. In speaking of the play the critics throughout the country acknowledge that Mr. Jackson has succeeded in getting much of the color of Charles Dickens' great story, David Copperfield, upon the stage. The play is not a direct dramatization of that novel, but founded on the principal incidents. The action being placed about James Steerforth, Rosa Dottle, Emily, Micawber, Peggotty, and Uriah Heep and Hammond Peggotty, the rough young Bohemian, in love with Emily, the innocent young woman who forsakes him for the promises of Steerforth, later to be cast aside. The punishment of Steerforth, when he is drowned in a hand to hand fight in a storm with Hammond Peggotty, with a few other scenes in which Mr. Jackson has deserted Dickens, gives the play a true melodramatic flavor. The comedy element is supplied by the Micawber family. The scenic effects are excellent, the parts are well played, and the success of the play is demonstrated by the applause and hearty laughter at each performance. "What Women Will Do" will be seen at the Loveday Opera House on next Tuesday night.

## FOR BOTH

One disease of thinness in children is scrofula; in adults, consumption. Both have poor blood; both need more fat. These diseases thrive on leanness. Fat is the best means of overcoming them; cod liver oil makes the best and healthiest fat and

## SCOTT'S EMULSION

is the easiest and most effective form of cod liver oil. Here's a natural order of things that shows why Scott's Emulsion is so much value in all cases of scrofula and consumption. More fat, more weight, more nourishment, that's why.

Send for free sample.

## Profanity

### A Modern and Greatly Improved Cause.

An East Jordanite has become a motor enthusiast and his exuberance is fully expressed in the following lines:—

How lovely is an auto trip, o'er rural hill and glade;  
 How sweet to pause beside the brook, in Nature's thickest shade;  
 How nice it is to listen to the silence everywhere!  
 And everything's so lovely! You forget you have a care.

But there comes a rude awakening, and you're brought up with a jerk,  
 If you find, instead of starting, that your motor will not work.

"Fleekleness, thy name is woman," but woman is out classed by far.  
 By the fickle little engine that propels the motor car.

Oh! the joy it gives its patrons, when it purrs along the rail!  
 The steam car isn't in it if you want to simply sail!

But it is not quite so pleasant, as you can prove by me,  
 To "count the trees" and push it from Green River to the Sea.

When you are out a boating, with your sweetheart by your side,  
 It may be very pleasant—a "drifting with the tide;"

In fact it might be pleasant if you didn't move at all,  
 And you wouldn't care a tinker if you stayed there all the fall!

But with some it might be different—they'd much prefer to go—  
 And they soon get weary for the tide to ebb and flow;

It must be something fearful, just when you're "going some,"  
 And you're swelled up with a feeling that you might outsail the Hum,

To have the pesky motor, all at once begin to balk,  
 And you have to ask your passengers to please get out and walk.

### CHORUS

(All Hands Round)  
 O, the sparkler will not spark, or the battery will not batter,  
 And the engineer he wonders "What in Charlevoix's the matter!"

As we sit and wait and sympathize, and see what he must bear,  
 We wish, and wish, O how we wish, that we could help him swear.

(Softly, but Very Earnestly)  
 Now, it always has been taught us, not to use profanities,  
 But we'll pass this resolution by a large majority,

Be it motor-mobile, motor car, or little motor boat,  
 O damn—yes DAMN—a motor that you cannot get to moté.

—OVER JORDAN.

## Mail Order Cream-Separator

### Spavined Horses Sell Cheap.

If you have been misled, if you have thoughtlessly bought one of these cheap, money-losing affairs advertised by mail order houses, as cream-separators, don't let your neighbors know it; don't give them a chance to "roast" you; don't let them question your intelligence; don't tell them how easy you were. Everybody makes mistakes; but it don't pay to tell about them. Just keep still and don't make the same mistake twice. Get right; correct your mistakes; buy a Tubular and take pride in showing it to your friends.

Call at our warehouse and let us show you one of the Sharples Tubular Cream Separator, or drop us a postal card and ask us to bring one to your house and let you try it, we are always willing to do that so you can see for yourself just why the Tubular is the easy way to make Sweet Butter.

Quality First of All, Our Motto.

## FRED E. BOOSINGER

Entered at the postoffice at East Jordan, Michigan, as second class mail matter.

**WILSON.**

Mrs. James St. John is much improved in health at present.  
Thos. Shepard was on the sick list first of this week.  
Price & Graff's saw mill was moved away from Wilson last week.  
A young daughter came to the home of Charles St. John last week Monday.  
Another dance will be held at the Grange Hall on Saturday evening June 2.  
Charles Burch and Jasper Warden have their new barns completed.  
Miss Ruby Shepard is spending a few weeks at the home of Wm. Burley in Lakewood.

Dr. Warne with his new auto has been seen in Wilson several times recently.

Mrs. Wm. Nowland of Charlevoix spent last week visiting friends and relatives in this vicinity.

Mrs. George Bowen of East Jordan visited her niece Mrs. Fred Holstad and family on Friday last.

Miss Pearl Shepard who has been stopping in East Jordan for some time, spent the past week at her home in this place.

Mrs. Baker is stopping at Fred Farmer's at present caring for that 10lb boy that came to their home May 13th.

A carpet rag social will be held in Afton on Thursday evening May 21st for the benefit of Elder Allan. Ladies will serve refreshments during the evening. A cordial invitation is extended to all.

**EVELINE.**

Miss Ada Crowell is working in Boyne City at present.

Mr. and Mrs. David Gaunt called on George Zimmerman Sunday.

Miss Lottie Coslov is stopping at East Jordan.

Miss Elsie Holt and Celia Healey visited Francis Staley Sunday.

Miss Annie Gaunt called on Mrs. N. L. Cash Sunday.

Mr. David Gaunt lost a nice yearling steer last week it was found dead.

Mr. and Mrs. Spence and family called on Aime Towsley Sunday.

George Zimmerman's boys caught a nice string of perch at Afton Sunday.

Elder Ferrit preached at the Three Bells Sunday.

What we want is a good rate bill, no matter who has changed opinions or for what reason.

Mr. Bran does not care to run for the presidency again, "unless the circumstances seem to demand it," and at the proper time he will make a careful inspection of the circumstances himself.

The Sultan would feel slighted if the postman did not bring him a few ultimatum in every mail.

The "you're another" title of argument now prevailing in Washington, must greatly perturb the shades of Truthful George.

Doubtless there are cases where innocent motorists are punished along with the guilty ones, but usually the guilty ones are guilty enough for both.

Only wind is needed to spread rumors but for reliable news you must read your home paper.

Guaranteed garden hose.  
Stroebe Bros.

Holden Bros., who control nearly a dozen different plays, will present their master piece, "What Women Will Do," at the Loveday Opera House on Tuesday night. The play will be given a full scenic production, the same as seen in all the great cities last season. This production is under the personal direction of Mr. H. M. Holden. Seats on sale to-day Saturday, at Mack's Jewelry Store.

The cleansing, antiseptic and healing properties of Pinesalve make it superior to family salves. Sold by Warne's Pharmacy.

In some counties it appears not to be fully understood that county conventions are to be held as usual for the election of delegates to the republican state convention. Republican county conventions will be held in every county in the state on the same day, Monday, June 18. Delegates to these county conventions are to be selected in the various towns and precincts by the enrolled republican voters of the election districts, and therein is the only change from past procedure so far as delegates to the state convention are concerned. The election of delegates to the county conventions takes place Tuesday, June 12, on the same day in every county.

For bloating, belching, sour stomach, bad breath, malassimilation of food, and all symptoms of indigestion, Ring's Dyspepsia Tablets are a prompt and efficient corrective. Sold by Warne's Pharmacy.

**Too Many For Oral.**

I wish to announce that the Alumni Association will not give the customary banquet for the Seniors this year.

There have been four meetings, (two in March and two this month) with all the way from one to five in attendance. Four meetings are all that are necessary to do all the business preparatory to a banquet, yet at only one meeting has there been enough present to appoint two committees of three each. One committee of two was appointed to see members in town and write those out of town. Some were willing to donate but were never present at the meetings. At this time we needed them worse than their money. I suppose this announcement is unnecessary but I wish people to know that myself and a few others have tried.

With apologies to the Seniors for this shabby treatment I wish to announce my resignation as president of the Association.

EX PRES. O. MOENAR  
P. S. (1.) The reason I did not resign at one of the meetings was because there were not enough present to accept the resignation.

P. S. (2.) As far as I am concerned the next meeting of the Association will be "on that beautiful shore."

**NOTICE BOARD OF REVIEW**

The board of Review for the village of East Jordan, Charlevoix County, Michigan, will meet at the village clerk's office Tuesday and Wednesday, May 29th and 30th, 1906, and will be in session from 9:00 a. m. to 4:00 p. m. each day for the purpose of reviewing the Assessment Roll for the year 1906.

Dated, this 21st day of May, 1906.  
Wm. A. Pickard  
Assessor of the Village of East Jordan.

When applied and covered with a hot cloth Pinesalve acts like a poultice. Best for burns, bruises, boils, eczema, skin diseases, etc. Sold by Warne's Pharmacy.

Chicago began to clean house yesterday, and the rest of the world may expect a famine in scrubbing brushes.

Eat one of Ring's Dyspepsia Tablets after each meal and you will not suffer from indigestion. Sold by Warne's Pharmacy.

It pours the oil of life into your system. It warms you up and starts the life blood circulating. That's what Hollister's Rocky Mountain does. 35 cents. Tea or Tablets at Warne's Pharmacy.

## Charlevoix County Herald.

### CHAMPIONED PAUL JONES.

#### MRS. DONALD McLEAN FOUGHT FOR BURIAL OF NAVAL HERO AT ANNAPOLIS.

As President-General of Patriotic Daughters of the American Revolution She was Invited Guest of Honor at Ceremony.

When the annual convention of the Daughters of the American Revolution was in session in Washington a few weeks ago the meetings were presided over by Mrs. Donald McLean. She enjoyed the unique distinction of being the first presiding officer of the congress who was not the wife of some man prominent in official circles. She had been a candidate for this high woman's office for several years, and the opposition to her election was plainly stated because she could not bring to the office high "national" prestige, which the Daughters of the American Revolution felt was necessary to the varied traditions of the society.

#### FROM LONG LINE OF PATRIOTS.

Mrs. McLean has half a yard or so of ancestral bars on her revolutionary ribbon, and half back to some very distinguished citizens, both men and women. She was born in Prospect Hall, Frederick, Md., the city made famous by Whittier's poem, "Barbara Fritchie." The ancestral hall is a big, beautiful

come a finished expert in thrust and parry in parliamentary tactics.

At the Fourteenth Continental Congress of the Daughters of the American Revolution, when Mrs. McLean was Regent of the New York Chapter, she assisted in introducing a resolution looking to the burial of Paul Jones in Annapolis, Md., that being her native State. Besides having a local pride, she thought the first naval hero of the nation should be buried near to the great naval school.

There was tremendous opposition to the proposition, and the congress voted to "lay the resolution on the table," an expression used in parliamentary proceedings to defer action on the subject. Later it was taken up, but the congress voted against taking the body of the naval hero to Annapolis and favored bringing it to Washington for burial in Arlington. Mrs. McLean has now, however, seen one of her dearest wishes carried out, and, as head of one of the greatest societies of patriotic women in the world, she was a guest of honor at the recent burial ceremonies of Admiral Paul Jones at Annapolis.

#### Made a Good Speech.

Senator Morgan the venerable statesman from Alabama, has that valuable sense of humor which enables the possessor to enjoy a joke when the laugh is on himself. The other evening, as he tells about it, he picked up an old copy of the Congressional Record while at home, and opening it at random began to read. "Very soon," says the

### STANFORD UNIVERSITY.

#### ALMOST COMPLETE DESTRUCTION OF THE PICTURESQUE CALIFORNIA COLLEGE.

Built in Spanish Architecture and Cost of Buildings Alone was Thirty Million Dollars—Will Probably be Rebuilt.

One of the most serious results of the Pacific coast earthquake disaster is the destruction of Stanford University, near Palo Alto. More than \$30,000,000 had been expended on the buildings alone, and the damage has been so severe that it will mean practically an entire loss. This group of buildings was planned and built on a prearranged scheme and has been accounted the finest group of structures for educational purposes on this continent, if not in the entire world. The buildings were all in the picturesque Spanish mission style, with the arch as the principal architectural feature. This fact, which was so much a source of beauty, has probably been the largest source of destruction, because, while the arch undisturbed is one of the most secure of building forms, when thrown out of plumb it must fall.

#### IRREPARABLE ART LOSS.

The main buildings are built around an inner quadrangle, which contains the offices of administration and some class rooms. These buildings are all one story in height. The outer quadrangle, which comprises the principal architectural features of the university, has as main points of interest the memorial arch, with its wonderful frieze, by St. Gaudens, representing the progress of civilization in America, and directly opposite this, through the inner quadrangle, the Stanford Memorial Church, with its mosaic front depicting the "Sermon on the Mount." This building cost, in construction alone, \$1,000,000, exclusive of the mosaics and carvings inside and out, and its marble statues and art treasures from Europe.

Perhaps it may be said that the loss of the buildings and equipment, in spite of their great value, is the least part of the disaster, because since the university was started on Senator Stanford's Palo Alto ranch it has been a marvelous incentive toward higher education on the Pacific coast. Not only has it gone ahead with great strides on its own account, but it has carried the State University at Berkeley along with it in healthy rivalry, until the two gave an equipment for higher education in California that was not rivaled by that of any other State.

#### MRS. STANFORD'S GENEROSITY.

If it were not for the indomitable spirit which seems to have enabled the university to triumph over many difficulties it might be said that its career has been particularly ill-starred. For in spite of its great endowment, said to exceed that of any other institution of learning in the country, it has been unfortunate from the beginning. Vexatious litigation arose at the time of Senator Stanford's death, in 1894, and the claims put forward by those who had received personal bequests, to have them settled first, seriously impaired the finances of the university because it was impossible to realize upon its property. After that the Pacific railroad suits tied up the university money for a couple of years, until the Supreme Court decided in favor of the Stanford estate. But Mrs. Stanford, with wonderful courage and singleness of purpose, unselfishly turned all of her property over to the university, saw it through its crises until her recent tragic death in Honolulu, when the Leland Stanford University was again thrown in despair. Its present destruction by the earthquake seems to come as a culminating disaster, yet it is probable that it will rise again superior to the conditions which seem in league against it, though it has practically been set back to an absolutely new beginning.

It is already understood that plans have been considered for the rebuilding of the university, as the statement has been made by President David Starr Jordan to the students of the university, asking them to remain and

that he might live again.

To her husband, Senator Stanford, she said: "It was his wish and desire that indigent young men should have an equal advantage in obtaining education. For his sake let us erect a university where all shall have an equal chance." From that day the Senator and Mrs. Stanford devoted their entire energies toward planning the Leland Stanford, Junior, University.

#### Government Positions.

As "distance lends enchantment," so perhaps are many people affected who, living in the remote States, are desirous of holding an appointive office under Uncle Sam at Washington. Lured by the short hours, light work, and comparatively large salaries,

### FIRE VERSUS DYNAMITE.

#### TONS OF THE EXPLOSIVE USED AT SAN FRANCISCO TO FIGHT FLAMES.

Three Men of Navy at Risk of Their Lives Place Compound in Teeth of Oncoming Fire—Whole Blocks Razed to Prevent Disaster.

Through the destructive agency of dynamite the section of San Francisco still standing was saved at a cost of more than a million dollars. This powerful compound was scientifically welded by three men of the U. S. Navy, sent by Admiral McCalla from Mare Island with orders to check the conflagration.

icious tantrum of nature reversed the direction of the west wind the whole populous district to the west, blocked with fleeing refugees and unilluminated except by the disastrous glare on the water front, seemed safe by 9 o'clock.

Van Ness avenue is flat as the earth on the east side. Every pound of gun cotton did its work, and, though the ruins burned, it was but feebly. From Golden Gate avenue on the north the fire crossed the wide street in but one place—the Claus Spreckels' residence, on the corner of California street. There the flames were writhing up the walls before the dynamites could reach it; yet they made their way to the foundations, carrying their explosives despite the furnace-like heat. The charge had to be placed so swiftly and the fuse lit in such a hurry that the explosion was not quite successful from the trained viewpoint of the gunners. But though the walls still stood, it was only an empty victory for the fire, as bare brick and smoking ruins are poor food for flames.

#### EFFECTIVE WORK OF WEEK.

Capt. MacBride's dynamiting squad realized that a stand was hopeless, except on Van Ness avenue. They could have forced their explosives further into the burning section, but not a pound of the terrible gun cotton could be or was wasted. The ruined block that met the wide thoroughfare formed a trench through the clustered structures—that the conflagration, wild as it was, could not leap. Engines pumping brine through Fort Madison from the bay completed the little work that the gun cotton had left, but for three days the haggard-eyed firemen guarded the flickering ruins.

The desolate waste straight through the heart of the city is a mute witness to the most heroic and effective work of the whole calamity. Three men did this—three, simply, because they would not trust their work to others—and when their work was over and what stood of the city for the first time rested quietly, they departed as modestly as they had come. They were ordered to save San Francisco; they obeyed orders, and Capt. MacBride and his two gunners made history on that dreadful night.

#### Elephants Going Up.

"A five-foot elephant costs this spring," an importer of animals is stated to have remarked, "\$1,400, as against \$1,200" for which such elephants could be bought two years ago. "Elephants, like all other wild animals, are growing scarcer with the settlement of the globe, and their prices tend upward. More small elephants than big ones are imported because they cost less to begin with and because they are easier and safer to transport, and showmen like them, too, for the reason that young elephants are more tractable and easier to train. And small elephants are attractive anyway.

"Then, the elephant is a hardy animal in captivity and he is naturally long lived, and the young elephant increases in value with his growth. So that even with their prices tending upward, young elephants are good property, though even they are rather large for family pets."

MRS. DONALD McLEAN, President-General of Daughters of the Revolution.

old place of colonial architecture, and it is only a few years since Mrs. Ritchie, mother of Mrs. McLean, died. She also had been prominent in B. A. R. matters ever since the organization of the society. Judge John Ritchie, father of Mrs. McLean, served in Congress and was subsequently elevated to the bench of the Court of Appeals of Maryland. He was an orator of renown, and Mrs. McLean seems to have inherited this attribute of her father.

Mrs. McLean's grandfather was Judge William P. Mautsly, and her grandmother, Emily Nelson, for whom she was named, was the daughter of Gen. Roger Nelson, who was a boy of sixteen in college when the Declaration of Independence was signed. He ran away and joined the revolutionary forces. He rose in rank to Brigadier-General for conspicuous bravery on the field of battle. He was left for dead on the battlefield of Cowpens, and a British officer in passing his body wantonly struck his hand with the flat of his saber, breaking the bones of every finger. To his dying day, which occurred many years later, Gen. Nelson carried a stiffened hand. He became a member of Congress and later was made a Justice of the Supreme Court of the State.

#### DATES BACK OF REVOLUTION.

Mrs. McLean's ancestry began back of the revolutionary period, however. Judges Lynn and Beattie, two of those twelve Judges known as "The Twelve Immortals," who first signed a protest against the British stamp act in 1765, ten years before the battle of Lexington, have in Mrs. McLean a descendant who is not unworthy of the illustrious example of fearlessness of spirit set by them. Lieut. James Lackland was also an ancestor of Mrs. McLean, as was also Deputy Governor Burgess, of colonial Maryland history.

Mrs. McLean was educated at what was at the time known as the Woman's College. She was graduated at the age of fourteen, receiving a diploma which is one of her proud possessions to-day. She continued her studies in history, music and the languages until her marriage, in 1883, to Donald McLean, a man of a long line of revolutionary ancestors like herself and a brilliant lawyer in New York city.

Mrs. McLean has made a practical study of parliamentary law, and in the long years of battling for chapter rights on the floor of the Continental Congress and her own big chapter has be-

come a finished expert in thrust and parry in parliamentary tactics. At the Fourteenth Continental Congress of the Daughters of the American Revolution, when Mrs. McLean was Regent of the New York Chapter, she assisted in introducing a resolution looking to the burial of Paul Jones in Annapolis, Md., that being her native State. Besides having a local pride, she thought the first naval hero of the nation should be buried near to the great naval school. There was tremendous opposition to the proposition, and the congress voted to "lay the resolution on the table," an expression used in parliamentary proceedings to defer action on the subject. Later it was taken up, but the congress voted against taking the body of the naval hero to Annapolis and favored bringing it to Washington for burial in Arlington. Mrs. McLean has now, however, seen one of her dearest wishes carried out, and, as head of one of the greatest societies of patriotic women in the world, she was a guest of honor at the recent burial ceremonies of Admiral Paul Jones at Annapolis.

#### A Bad Memory.

Senator Knox's physician advised him to give up smoking a few days ago and put him in the same class with Senator Spooner, also smokeless, after forty years of it. The next morning Senator Knox's physician happened up

MAIN FACADE, STANFORD UNIVERSITY, MEMORIAL ARCH IN CENTER.

at the Capitol and went into the Senator's committee room to pass the time of day. He found Knox smoking a cigar.

"Here, Senator," he said, "I thought I told you to quit that."

"Quit what?" asked Knox, in mild surprise.

#### Sun Movements.

Standing on the seashore at a well-known Atlantic Coast resort, watching a beautiful sunset, with its rays piercing the clouds, were two Jews.

"Look!" said one of the followers of Moses, "see the sun rays."

"No," replied the other, "dere is where de sun sets."

QUADRANGLE WITH STANFORD MEMORIAL CHURCH IN DISTANCE. MEMORIAL ARCH AND STANFORD GROUP.

the young man or woman is likely to look upon department service as a beautiful life of "Do Little and Draw Your Pay" and watch the passing show. But it has its seamy side and carries both advantages and disadvantages in its train.

There is the danger of fossilization; of becoming a leat in the sea; with energies gone and aspiration dead. This danger is great and seems almost inevitable to him who has many years of service in the departments. Though all will not agree with the Hon. Champ Clark in a recent article in the Saturday Evening Post when he says "Over the doorways of the Departments should be inscribed in letters so large that he who runs may read: 'All Hope Abandon Ye Who Enter Here.'"

Yet to the young man and woman who would keep the fires of their ambition burning, government service should be entered only as a stepping stone to a more strenuous life of higher and better things.

gration—at any cost of life or property. With them they brought a ton and a half of gun cotton, the terrific power of which was equal to the mammoth determination of the fire.

Capt. MacBride was in command of the squad, Chief Gunner Adamson placed the charges, and the third gunner set them off. The thunderous detonations to which the terrified city listened all that dreadful Friday night meant the salvation of many lives. A million dollars' worth of property, noble residences and worthless shacks alike, were blown to drifting dust, but that destruction broke the spirit of the fire and sent the raging flames cringing back over their own charred path.

#### DYNAMITE A BLOCK DEEP.

The whole east side of Van Ness avenue, from Golden Gate to Greenwich, was dynamited a block deep, though most of the structures stood untouched by flame or shinder. Not one c-arge failed; no one building stood upon its foundations. Unless some second ma-

## 42-PIECE MONOGRAM DINNER SET

**FREE**  
Each Dish  
Decorated With  
Your Initial.

**FREE**  
Wild Rose Design  
In Colors and  
Edges Traced in  
Gold.

This is the finest dinner set ever offered as a premium. 42 complete pieces. Every dish (except cups and saucers) decorated with the owner's initial. Any lady sending us her name will be sent 24 of our handsome facsimile framed art pictures to sell for 25 cents each or two for 50 cents. When sold send us the \$6.00 collected and this elegant 42-Piece Monogram Dinner Set will be shipped to you at once for your trouble. You only need to sell 24 pictures (no more) to earn this premium. It WOULD COST YOU CONSIDERABLE MONEY, but want to introduce our house at once. Our pictures are large size, 16 inches by 20 inches, in many beautiful colors and finished with lithograph scroll and gold frame, ready for wall, just as received from us. We guarantee our pictures to be quick sellers, if they are found not to be, they can be returned at our expense. We run all the risk, pay all postage, trust you with the pictures, take back any not sold and pay you liberally for what you do sell. Order the 24 pictures TODAY and earn this elegant Monogram Dinner Set. We are an old established house, incorporated under the laws of Illinois for \$10,000 and can furnish 1000 references. Address: **W. L. REYNOLDS, Manager, 63 Washington Street, Dept. 766, Chicago.**

Best Dressed Man in the World.

The majority of men believe that the best and most fashionable in men's clothes comes from London...

An American who spends a great part of his time in London, and is rather a stickler for the correct thing, was recently hailed on Broadway by a friend with the remark, "So that's what they're wearing in London, eh?"

the public press as to which system was better; the American custom which ordained the sack suit in business and a change of raiment for laborers after hours; or the English custom which set the frock coat up as the emblem of respectability among tradesmen...

In London the Tuxedo is still a lounge coat, something to be slipped on during the early evening and discarded for the formal "swallow tail" before starting for any entertainment.

NEW FRENCH MOTOR RAILROAD TRUCK.

coat that gives you a cared-in chest when it's buttoned up and a decidedly open front when it's unbuttoned."

Yet some West End tailoring establishments in London depend for their very existence on American trade, not alone the trade of Americans traveling abroad, but a mail order business which entails making on measurements and forwarding by express, likewise payment of duty.

One traveler from a firm in London making a specialty of cable orders recently visited New York and looked over to the amount of six thousand pounds sterling. But this class of business is all in "semi-ready" clothing, a system which has been adopted from American tailors.

When he needs a suit he dashes into one of those immense haberdasheries that dot both sides of Broadway from the Battery to the Bronx, where thousands of "ready for service" suits and overcoats are piled on long tables in stacks that rise above a man's head.

The New Yorker must look prosperous. It is part of his stock in trade. His clothes must not appear old any more than his face. This demand for youth and freshness is what makes it possible for some firms to sell as high as 7,000 suits in a day.

Last winter a leading London daily gave a column every morning to the discussion of "The Fetish of the Black Coat." Every clerk and salesman in London wears a frock, or Prince Albert, during his work, and like the English artisan, he wears the costume of his trade after hours.

of the white tie and pearl studs that must be worn with the tailed coat. The American speaks of his Tuxedo suit and his dress suit. The Englishman talks of his evening clothes, and would as soon think of changing his trousers to match his smoking jacket, as of changing his studs and tie to accord with his Tuxedo.

While the vast majority of men buy their clothes "ready" or "semi-ready" made, most men regard with envy the one who has time and money to have his clothes made and fitted. The Englishman of means considers it his duty to have his clothes made by the very best tailors and to wear them as badly as possible.

As a matter of fact, the best dressed man in the world is neither the New Yorker nor the Londoner, but the man who gets his frock coat, cutaway and evening clothes from the Bond Street tailors, who have made these styles of masculine dress for centuries, and his sack suits and overcoats from Fifth Avenue, where one might say they were invented.

New Clothes for Easter. The flowers with which many churches are ornamented on Easter Day are most probably emblems of the Resurrection. There are people today who think that unless something new is worn on Easter Day no good fortune will come to them during the year.

Last Easter I put on my blue frock coat, the very time, very new; With yellow buttons and 'o' brass; That glittered in the sun like glass; Bekalze, 'twixt Easter Sunday.

Elderly Spinster: You know, Doctor, I'm always thinking of a man is following me. Do you think I suffer from hallucinations? Doctor: Absolutely certain you do, madam. (Pencil Sketch.)

ANIMAL HEROES.

The Thrilling Story of "Snap" the Bull Terrier.

Ernest Thompson Seton's last book, "Animal Heroes" is, if possible, more than ever up to the standard of his intensely interesting wild-animal tales. To the animal lover this new collection will be read with assiduous attention. Seton has been subjected to considerable criticism by other naturalists, notably John Burroughs, for endowing his animal characters with unusual intelligence and powers, with, it is charged, not being possessed by any dumb creatures. Very likely, as a class, but as Mr. Seton himself admits in his preface to "Animal Heroes," these histories, while in each case founded on the actual life-history of a real animal, are more or less composite. What novelist, indeed, does not combine the most striking characteristics of several individuals to construct his human hero, who shall appear to the reader as an exceptionally fine character? So has Mr. Seton taken the record of a number of wood or other animals and embodied their most striking "life" qualities in the life of one sagacious, brave and gigantic specimen. Like all of his books, "Animal Heroes" is delightfully illustrated by some two-hundred drawings, sketched from his own and his wife's pencils. Interest is stimulated by a constant succession of marginal drawings, liberally interspersed with full page plates. The story is told in a simple, direct, and forceful manner, with a fatal closing in—sometimes to the pursued, sometimes to the pursuer—is told by an eye-witness, and the reader is kept in suspense until the end.

Nothing is discussed has ever been written which is better worth the reading, and will add to its value than the account in the volume of the little dog, "Snap." This "Snap" is a bull-terrier, which was sent the author as a sort of "halloo" on a joke—he was so vicious and unapproachable that he was called "Snap" on the table most of the night, where he smoked cigars until his pocket-supply ran out and then shivered. However, he finally made friends with his little pup—a rough, scruffy little fellow, who, a year later, the two found themselves near Mendoza, North Dakota where the wolves had been playing havoc with the live-stock, and the ranchers and traps and—actually, scorning the attempts of the ranchers and the wolves to exterminate them. The following is a recital of the hunt in which "Snap" figured most gloriously. "I was on a high point, I caught sight of a moving speck of gray. A moving white speck stands for Antelope, a red speck for Fox, a gray speck for either Gray Wolf or Coyote, and which of these is determined by its tail. If a Coyote, if up, it is the hated Gray Wolf.

We got a momentary view of the pursued. A Gray Wolf it surely was, loping away ahead of the Dogs. Somehow I so fast as they had after the Coyote. But you know the finish of the hunt; the Dogs came back to us one by one, and we saw no more of that Wolf.

Sarcastic remarks and recrimination were now freely indulged in by the hunters. "Paid snarl, dumb snarl," was the father's disgusted comment on the pack. "They could catch up easy enough, but when he turned on them, they lighted out for home—right?" "Where's that that unsurpassable, fearless, scarier-than-Tarrier asked Hilton, scornfully. "I don't know," I said. "I am inclined to think he never saw the wolf; but if he ever does, I'll bet he sails in for death or glory."

That night several Cows were killed.

"THE DESPERADO IN THE MIDDLE FACED THIS WAY AND THAT."

close to the ranch, and we were spurred on to another hunt.

It opened much like the last. Late in the afternoon I sighted a gray wolf, who fell up, not half an mile off. As we rose to the upland and sighted the chase half a mile off, Dander, the greyhound, came up with the Wolf and snapped at his hind leg. The Gray Wolf turned round to fight, and we had a fine view. The Dogs came up by two and three, barking at him in a ring. I'll bet, Snap, the little white one rushed up. He wasted no time barking, but rushed straight at the Wolf's throat and missed it, yet seemed to get him by the nose; then the Wolf closed in, and in two minutes the wolf was dead. Snap had lived up to my promises for him.

Now it was my turn to crow, and I did not lose the chance. Snap had shown them what he could do, but the Mendoza pack had killed a Gray-Wolf without help from the men.

There were two things to mar the victory somewhat; first, the Mendoza Wolf, a mere Cub; second, Snap was wounded—the Wolf had given him a bad cut in the shoulder.

As we rode in proud procession home, I saw he limped a little. "Here," I cried, "come up, Snap." He tried once or twice to jump to the saddle, but could not. I held him up to me.

"Thank you, but let your hands rest on rattlesnakes," was the reply, for my own new that it was not safe to meddle with his person. "Here," Snap, take hold. I held him up to me. "Here," I seized it, and by that I lifted him to the front of my saddle and so carried him home. He had shown those Cattle-men how to treat the wolf in their packs; the Foxhounds may be good and the Greyhounds swift and the Russians and

Dances fighters, but they are no use at all without the crowing moral force of grit. The crowd supplied the moral force of the bull-terrier. On that day the Cattle-men learned how to manage the Wolf question.

Next day was Halloween, the anniversary of Snap's advent. The weather was clear, bright, not too cold, and there was no snow on the ground. The men usually celebrated the day with a "burn of some sort, and now, of course, Wolves were the one object. To the disappointment of all, Snap was in bad shape with his wound. He slept, as usual, at my feet, and his bloody status now marked the place. He was not in condition to fight, but we were bound to have a Wolf-hunt, so he was healed to an outdoor and checked out with a sense of impending disaster. I knew we should fall without my Dog, but I did not realize how bad a failure it was to be.

At among the buttes of Skull Creek we had roamed, when a white bull appeared bounding through the sage-brush, and in a minute more Snap came, growling and starting, up to my horse's side. I could not send him back; he would take no such orders, not even from me. His wound was looking bad, so I called him to my saddle, and he jumped up to my saddle. "There," I thought, "I'll keep you safe till we get home." Yes, I thought; but I reckoned not with Snap. The white bull, I had sighted a Wolf. Dander and Riley, his rival, both sprang to the point of observation, with the result that they closed and fell together, sprawling in the sage. But Snap, gazing hard, had sighted the Wolf, not so very far off, and before I knew it, he leaped from the saddle and bounded zig-zag, high in and under the sage straight for the enemy, leading the whole pack for a few minutes. Not far of course. The great Greyhound sighted the moving speck, and the small procession strung out on the plain. I promised to be a fine hunt, for the Wolf had less than half a mile start and all the Dogs were fully interested. "Cried Garvin. "This way, and we can lead them off."

We galloped to the top of Cedar Ridge and wide down, where Hilton shouted, "By George, here he is! We're right on him." A great Gray-wolf came lumbering across an open plain toward us. His head was low, his tail was level, and fifty yards behind him Dander, sitting like a Hawk over the ground, going twice as fast as the Wolf. In a minute the sound was alone on the Wolf turned on him. In a few seconds the small procession strung out on the plain. Each came up and fell together, sprawling in the sage. Right in and tear the Gray-Wolf to pieces; but each in turn swerved aside, and leaped and barked around at a safe distance after a minute or so the hunting appeared—fine big Dogs they were. Their distant intention no doubt was to dash at the old Wolf, but his fearless front, his shrewd frame and death-dealing jaws, saved them from such a fate. They were all in a ring, ready for any or all.

Now the Wolves came up, huge-headed creatures, any one of them as heavy as the Wolf. I heard their heavy breathing, their snarling, and their snarling, as they closed in on the Wolf. They were all in a ring, ready for any or all. "I heard their heavy breathing, their snarling, and their snarling, as they closed in on the Wolf. They were all in a ring, ready for any or all."

They knew perfectly well that the first Dog to

hurt for twenty steers." I lifted him in my arms, called to him and stroked his head. He snarled a little, a farewell as it proved, for he licked my hand as he did so, then never snarled again.

That was a sad ride home for me. There was the skin of a monstrous Wolf, but no other hint of triumph. We buried the fearless one on a butte back of the ranch-house. Penrose, as he stood by, was heard to mutter, "By George, that was a critter or grit! Ye can't raise Cattle without grit!"

THE FIGHTING INSTINCT.

Story of a Desperate Hand to Hand Encounter Against Heavy Odds.

Now and then among the brutalities and crimes that form the chief subjects of daily Journalism in this country, there comes an item that not only appeals to our morbid nature, but gets in close to the primal love of fight which springs eternal in the human animal. Most of us have no feeling except of loathing, in the case of the secret assassination of six Italians in Minneapolis, because their modes of fight are Latin in a country of Anglo-Saxon prejudices. But just a week before, the press dispatches from Bristol, Tennessee, told of the sudden demise of seven Italians who with others had conspired to murder their section foreman, because he was a "hard boss." Doubtless, he was! Nevertheless, the old fighting blood tingles at the bare account of the battle that the foreman, Haverly, whose name suggests his nationality, waged single-handed against the body of laborers that "rushed" him. Had he been armed with a revolver, he would have no sympathy, but he depended on the first weapon at hand—a crowbar. Backed against an embankment, he withstood the combined attack of the entire gang of laborers, all bent on his murder, and armed, against him, with picks, axes, and spades, in addition to their knives. Repugnant as the idea of killing may be, one can scarcely help a thrill at the thought of the foreman, Haverly, at bay like a Knight of former days, fighting for his life, and so sturdily and valiantly laying about him, weapon for weapon, steel against steel, until he stretched seven of his assailants dead before him and routed the rest. Haverly may be a brute and a bully; he may have deserved what the laborers, rising like desperate slaves against a tyrant, had in store for him. Yet, somehow, that is hard to believe, because the innate love for combat in our nature challenges admiration for a man who displays desperate courage and physical prowess.

Little Cannibals.

Every one in a while we hear of breeders complaining of the cannibalistic habits among growing fowls, especially among these still in the days of their early babyhood. This pernicious habit, when once the young birds become thoroughly addicted to it, is rather difficult to control and suppress. Usually it finds its chief expression in flocks confined to close quarters, where the ground is bare and the feed is wanting in animal matter. Bird life under natural conditions finds opportunity for work and play in the hunting of insects for food and in the careful selection of such vegetable matter as its system may demand. Young chicks, when confined, are obviously deprived of these opportunities, for a healthful exercise; the result is that they become idle, which engenders vicious habits and a craving for something to do as well as for animal food. When in this condition if a member of the little flock shows a wound or effects of blood, the chances are that one or two will at once commence to peck at it, which leads the others on, and soon the whole flock will be rending the little one into shreds, devouring it before one has opportunity to relieve its misery or to isolate it from the flock. The remedy, of course, is obvious, namely, afford the young chicks a wider range and be more careful in your feeding by making it a point to keep them busy by throwing the food into litter or suspending a head of lettuce or cabbage where they can peck at it; also supply in one form or another animal food. A good way to do this is to take the underground scratching chick feeds, which of themselves are a balanced ration, and scatter the same in a litter of chopped straw or hay about one and one-half or two inches deep. In fact, anything that will make a litter may be considered available.

A Sudden Change.

Two commercial travelers, one from London and one from New York, were discussing the weather in their respective countries. The Englishman said that English weather had one great fault—its sudden changes. "A person may take a walk one day," he said, "attired in a light summer suit, and still feel quite warm. Next day he needs an overcoat."

"That's nothing," said the American. "My two friends, Johnson and Jones, were once having an argument. There were eight or nine inches of snow on the ground. The argument got heated, and Johnson picked up a snowball and threw it at Jones from a distance of not more than five yards. During the transit of that snowball, sir, believe me or not, as you like, the weather suddenly changed and became hot and summer-like, and Jones, instead of being hit with a snowball, was resealed with hot water!"

PERILS IN COLD STORAGE.

Frozen Bacteria Agitate Government to Make Experiments.

The Agricultural Department is following up a line of scientific investigation of the effect upon perishable goods in cold storage for an unlimited time, and Dr. Wiley believes that he will develop the fact that legislation is needed fixing the period for which such articles as meats and milks may be stored.

In one of the Philadelphia cold storage houses space has been set aside for the experiments and a like arrangement has been made in Washington for storing birds and milk.

The stored articles will be taken out from time to time and examined to ascertain whether or not deterioration has begun, and at what period the point has been reached when the articles can be no longer stored and remain good food.

It already has been demonstrated, Dr. Wiley says, that the bacteria that occasion decay remain in the meat while frozen, and that they actually carry on their work, although at a greatly reduced rate.

In one of the cold storage plants in Cleveland some meat was, recently found which had been mislaid and forgotten for a period of eleven years. It was sent to the department and a portion thawed out and examined.

Decay had gone on to such an extent that the meat was entirely unfit for use. The greater portion of it was again placed in storage and the observation will be continued. The fact that the meat, having been frozen for eleven years, was in a condition of decay is held to conclusively prove that the bacteria can work in the meat while frozen. The object of the investigation is to ascertain at what point the decay has progressed to such an extent as to injure the food value of the article stored.

There is at present no law prohibiting the storage of any article for any length of time. The only law upon the subject is one that requires fowls to be drawn before they are placed in storage.

The Oregon's Big Pennant.

When the Oregon left Hongkong recently, after her long period of service on the Asiatic station, she was flying a homeward-bound pennant over 500 feet in length. It was necessary to support this long streamer by two small balloons tied to the end to keep it out of the water. The pennant was made of silk thread and attracted much attention in the Asiatic port.

In the old days it was the custom to have a foot of pennant for every day of the cruise. That of the Oregon is probably one of the longest displayed on the mast of a home-coming ship, although it is on record that the old Brooklyn, on one occasion upon her arrival in New York, displayed a pennant 700 feet long.

Drunkards Cured Secretly

Any Lady Can Do It at Home—Costs Nothing to Try.

THE OUTCOME OF A DRUNKEN SPREE.

The Great Haines Cure for the Liqueur Habit Would Have Saved Him From This Awful Fate.

A new tasteless and odorless discovery which can be given in tea, coffee or food. Heavily endorsed by all temperance workers. It does its work so silently and surely that while the devoted wife, sister or daughter looks on, the drunkard is reclaimed even against his will and without his knowledge.

FREE TRIAL COUPON

A free trial package of the Wonderful Golden Specific will be sent you by mail, in plain wrapper, if you will fill in your name and address on blank lines below, cut out the coupon and mail it at once to Dr. J. W. Haines, 675 Glenn Building, Chicago, Ohio.

You can then prove to yourself how secretly and easily it can be used, and what a God-send it will be to you.

ONLY \$1.00. SPECIAL 60 DAY OFFER TO INTRODUCE OUR NEW EXCELSIOR SOLAR TELESCOPE. THE WONDER OF THE AGE.

OVER 3 1/2 FEET LONG

JUST WHAT YOU WANT ON SEA, FARM, RANCH OR IN THE SCHOOL.

This is a large powerful achromatic telescope for terrestrial and celestial use. It is provided with an adjustable Solar Eye-piece. With this wonderful Eye-piece you look the sun square in the face, on the brightest and hottest day, and study his face as you do the moon at night. Every student, male or female, needs this telescope to study the sun in the face, also the mysterious recurrent sun spots which appear and disappear at intervals, and move about in different locations of the sun. You will regret it if you neglect to secure this telescope. Positively such a good telescope was never sold for this price before. These telescopes are made by one of the largest manufacturers of Europe, measure 3 1/2 feet in length and open 2 1/2 feet in lens sections, and 2 1/4 inches in circumference. They are made of brass, and are finished with a beautiful black lacquer. They are provided with powerful lenses, scientifically ground and adjusted. Guaranteed by the makers. Telescopes of this size have been sold for \$20.00 to \$10.00. Every school in the country or at seaside resorts should certainly secure one of these instruments; and no farmer should be without one. Observe the sun's progress for view with astonishing clearness. Sent by express safely packed, for only \$1.00. Sent by mail prepaid for \$1.10. Our new catalogue of maps, etc. sent with each order. This is a grand offer and you should not miss it. We warrant each telescope just as represented or money refunded.

WANTS ANOTHER. Gentlemen—Please send another Telescope. Money enclosed. Other was a bargain, good as instrument in cost—long many times the money. SUPERIOR TO A \$16 GLASS. Fred. Walsh, of How's Island, Ontario, Canada, says: Gentlemen—Have just received your Telescope, and must say it surpasses all expectations. It is far superior to any I have ever used. Just a few nights, I have seen more than double what it cost me. COULD DISCERN BOATS FROM FIVE TO TEN MILES. Mr. C. M. Hodley, of Duluth, Minn., who purchased one of these telescopes, says they are superior to anything he has ever used. He saw the boats from a distance of five to ten miles, and in clear weather he could read the names of steamers and other craft at a distance of one-half mile away. WORTH MANY TIMES THE PRICE. The Saxon, New York, Nov. 4, 1905.

A Telescope brings new brain cells into play, opens up new avenues of thought and broadens the scope of the mind. It is a great thing. It is a value to you on this occasion many times greater than the entire outlay for the Telescope. Yours truly, H. H. HENRY.

Thousands of others are saying good things about these telescopes. In numerous ways it will repay its cost a hundred times over. Get one and try it.

SECURE THIS TELESCOPE AND TAKE A LOOK AT OLD SOL. Never before sold on any Telescope for less than \$3.00 or \$10.00. Now is a chance to secure one for \$1.00. This telescope alone is worth more than we charge for the entire telescope, to all who wish to behold the Sun in its true face. Remove the Solar Eye-piece lens and you have a good, practical telescope for land observations. Address: KIRTLAND BROS. & CO., Dept. A. M. 90 CHAMBERS STREET, N. Y.

Order, or Bank Draft payable to our order. If you desire Telescope by mail add 10 cents postage. Interesting Booklet, entitled "Telescope Talk," FREE with each order, or sent on request. This booklet tells all about the care of Telescopes, and about Eclipses of the Sun and Moon the evening and morning for year, where visible, etc.

# The Conflict

FROM NOTES AND OBSERVATIONS  
Compiled by Wm. Mackinn.

## SYNOPSIS OF PRECEDING CHAPTERS.

James Adams, West Point graduate, is in Paris at the opening of the French-German war. In a balloon reconnaissance for the French he is almost captured by the Germans. The balloon is wrecked at the Chateau Lagunay. Rescued, Adams falls in love with Aimee, daughter of the Count Lagunay. The Germans invade France. A German Colonel, Griesman, insults Aimee and is attacked by Adams, who is in turn overpowered by the Kaiser. He joins the German army under a friend, Lord Berg, engages in an ambush of a French column, and returning to camp learns that Griesman has charged Aimee with treason and has imprisoned her. Adams pursues Griesman in an automobile, kills him in a single combat, and takes Aimee to a cousin at Bethel. In the terrific land battle two days later Loebenber is killed in the capture of Montpelier. The French drive the Germans back with glycolite, a terrible explosive sprinkled from dirigibles. One of the ships is blown in the night to Montpelier, where Adams is camped. Its crew is thrown out. Adams blunders into it and is swept away in the gale.

When one took note of their enormous turret guns—twenty-inch, without doubt, capable of hurling a ton or more of metal every five minutes, counted ten battleships, five or six torpedo-boat destroyers (recognized by their quadruplicate funnels) and several cruisers. Two huge coal-barges were being towed several miles to the rear. This much was visible to the naked eye. Looking through my glasses I could see a swarm of torpedo boats, only their conning towers showing above the water, hovering around the flanks and leading the advance.

The fleet was proceeding very slowly in a great curve to the north, evidently not desiring to advance nearer the coast. By late afternoon it had turned and was heading west at the same pace.

As the sun drew near the horizon and the wind freshened I turned the nose of my dirigible to the east and prepared to spend the night aloft. I had been sailing leisurely back and forth over the area of perhaps fifty miles, in hope of seeing the German fleet. Except for the many passenger steamers coming and going there was nothing to be seen, and I had a glimpse of a white face looking down upon me. I sped up the motor and rising as I advanced soon drew up alongside my fellow traveler. Then ensued a brief conversation.

"Where are you going?" I shouted. "He was not more than a hundred yards away."

"I don't know. My steering fans won't work, and I cannot turn. I suppose I shall have to consider myself bound for America."

"Drop to the sea, then, and I will pick you up. My ship steers perfectly." We were now far beyond the fleet. I descended by degrees. The other tipped his planes slightly and started down on a long slant, like a boy coasting down a hill. When within twenty feet or less of the water he tipped the planes sharply in the other direction, and his ship stopped with a shudder, hovered for a time like a brooding gull, and settled slowly into the sea. I was close behind him with a small rope-ladder, and a minute later, dripping wet, but cheerful, he clambered into my car. Then we rose again to the two-thousand-foot level and with just enough headway on to overcome the wind, lay as in a calm.

I found that my guest was none other than Emil LeFevre, son of the great inventor of submarines and explosives. When he had disarmed and hung his wet clothes to dry in front of the radiators, swathing himself in a rug meanwhile, he gave me a brief account of his journey. The world was ringing with the news of the great battle on the Catalunian front, in which the French had been all but whipped when their fleet of airships, belated by some mismanagement, came upon the scene with the new explosive, glycolite, and sent the Germans back upon their camp, killing and maiming thousands. There had been no movement on land since that. All eyes were now turned toward the sea, where the fleets were watching

pounds of Calnite, a new explosive whose force operated always downward. The bomb contained also a magnet and chut-breaker so tuned as to be responsive to electrical vibrations set up in a powerful electrical instrument on the discharging ship. By the use of a unique range-finding apparatus the bomb was kept in sight during its whole flight, and upon reaching the desired point it was exploded by the mere pressure of a button on the ship from which it had been fired. Tests with this bomb had shown wonderful accuracy and most deadly effects.

Another offensive device was an aerial illuminator—a small, balloon-like affair, arranged to float at a considerable elevation, and carrying a powerful chemical light, backed by strong reflectors. A shoal of these illuminators would be sent toward the enemy's fleet, lighting up the sea and the vessels and making easy targets for the German guns. These devices had been prepared an aerial bomb to discharge a heavy and deadly gas, and to sprinkle acids or explosives upon the ships of the enemy. They were also provided with aluminum armor, so thick and tough that an ordinary projectile would hardly be able to pierce them, and held fast without being able to get through. Around their ships and under water they hung large electro-magnets, exerting, by peculiar wiring, a repelling influence on approaching torpedoes at a distance of a hundred yards, invariably turning them away. Their mainstay, however, was a new centrifugal submarine torpedo-boat, which needed not to come to the surface, remaining down for days at a time, yet observing operations on the surface, and doing its work with deadly accuracy. LeFevre could not give me the details of this strange machine. Its terrible effectiveness, however, was apparent the next day.

I had no apprehension whatever as to the stability of L'Almece, and we lay down and went to sleep that night without the least apprehension. Stanch and cozy as she even as my own sweet betrothed. It was still dark when I was awakened with a start by the sound of heavy detonations below us. I leaped to my feet and looked over the side of the car. LeFevre joined me the next moment.

The Germans had evidently planned a night attack by the use of their illuminators. Below us the sea was alight in great spots, and dimly we could make out the vessels over which shone the strong, blue-white lights. Far off in the darkness we could see the ocean's horizon, and the German fleet was sending home great shells loaded with explosives. Their aerial bombs could not be followed at night. The French were replying, but their fire was more or less blind. The roar of the guns came up to us plainly. It shook the heavens. Suddenly there was a flash that lit up the whole sky, and a terrific explosion sounded from below. A German shell had found its mark. One of the French battleships had gone to her long home.

During the rest of the night there was no intermission in the heavy firing. Fearful explosions sounded now and then, and we could but guess the destruction that was being wrought. I had no wish to see either side win at the expense of the other. At dawn we were able to note the situation clearly. Six or eight miles away to the northeast lay the German fleet. Almost beneath us the French were gathered in loose order. Both sides were playing their great guns. On both sides burning ships were drifting away under a heavy rain of shells. Half-filled with water, and now, with the coming of daylight, the combatants resorted to their deadliest appliances. As we watched one of the French battleships there was a dull explosion. The great hull opened, split in twain like a can, and went skidding to the bottom. We could see it deep in the clear water, its hundreds of seaman swarming around like so many ants in a bowl.

It was remarkable to note the submarine-hunting nets, and there under water. From our height we could see clear to the bottom, and every boat was visible by a bright streak as it swept through the water. Suddenly LeFevre clutched my arm and pointed.

"The Centrifugal," he said, "is just ahead of us on its way, advancing in a bright whirl of bubbles. It was making its way toward the German ships left, both sadly disabled. The German squadron was in fine shape. The Centrifugal needed not to observe the confusion on board the Centrifugal, nor on the others that were scattered about. LeFevre noticed the great ships settling low in the water, and spoke of it to me. There was something terrible about this destroyer. Inside of fifteen minutes every vessel in that fleet had been stung, as it were, by this great hornet of the sea, and every one was sinking. The sea was thick with the bodies of the German boats were putting out; rafts were flung into the sea. Presently the Centrifugal finished her work and we saw her whirling away, stopping here and there to smell a submarine and to kiss it or to sting it as it happened to be near. Twenty miles away, the German ships were putting out to sea to eternal silence. One after another they vanished. The torpedo boats came to the surface, saw what had happened, and put out for home and neutral ports. The Centrifugal, the great battle was over. And neither side could be said to have won. It was practical annihilation for both. Two magnificent fleets of modern war vessels gone, absolutely gone; a quarter of a billion dollars in battleships and thousands of brave fellows dead, only to satisfy the bickerings of diplomats—sacrifices to foolish notions of honor.

To LeFevre the operations of the Centrifugal were a triumph for France, and he was enthusiastic in his delight. But I cared little one way or the other. I was tired of it all. Life had been too strenuous for me. I wanted quiet for a while, and naturally my thoughts turned to Aimee, my sweetheart. Was she safe?

LeFevre insisted that I come with him to his home, but I refused. Turning to the east we made our way rapidly to the French coast. Here we settled to earth in the open country, and after bidding LeFevre adieu I rose again and made my way east. I had but one thought, now that the battle was over, and that though I was putting into a temporary refuge, only to satisfy my own objective was Bethel, where I knew my love awaited me.

But had I known what else awaited me at Bethel I should perchance have gone in another direction.

ships left, both sadly disabled. The German squadron was in fine shape. The Centrifugal needed not to observe the confusion on board the Centrifugal, nor on the others that were scattered about. LeFevre noticed the great ships settling low in the water, and spoke of it to me. There was something terrible about this destroyer. Inside of fifteen minutes every vessel in that fleet had been stung, as it were, by this great hornet of the sea, and every one was sinking. The sea was thick with the bodies of the German boats were putting out; rafts were flung into the sea. Presently the Centrifugal finished her work and we saw her whirling away, stopping here and there to smell a submarine and to kiss it or to sting it as it happened to be near. Twenty miles away, the German ships were putting out to sea to eternal silence. One after another they vanished. The torpedo boats came to the surface, saw what had happened, and put out for home and neutral ports. The Centrifugal, the great battle was over. And neither side could be said to have won. It was practical annihilation for both. Two magnificent fleets of modern war vessels gone, absolutely gone; a quarter of a billion dollars in battleships and thousands of brave fellows dead, only to satisfy the bickerings of diplomats—sacrifices to foolish notions of honor.

To LeFevre the operations of the Centrifugal were a triumph for France, and he was enthusiastic in his delight. But I cared little one way or the other. I was tired of it all. Life had been too strenuous for me. I wanted quiet for a while, and naturally my thoughts turned to Aimee, my sweetheart. Was she safe?

LeFevre insisted that I come with him to his home, but I refused. Turning to the east we made our way rapidly to the French coast. Here we settled to earth in the open country, and after bidding LeFevre adieu I rose again and made my way east. I had but one thought, now that the battle was over, and that though I was putting into a temporary refuge, only to satisfy my own objective was Bethel, where I knew my love awaited me.

But had I known what else awaited me at Bethel I should perchance have gone in another direction.

(To be concluded next week.)

Maxine Elliott.

Maxine Elliott, who has taken a house in London and will leave the stage for a time to enjoy social life, is famous as an actress and also for her beauty. Miss Elliott, who, upon the stage, retains her maiden name, under which she became famous, is the wife of Nat C. Goodwin, to whom she was married in 1895. She was born in Rockland, Me., and was but 16 when she first appeared on the stage. Her serious work, however, did not begin until 1890, when she became associated with E. S. Willard. Subsequently she became a member of Daly's stock company and rapidly won distinction, which has been enhanced by her performance in her husband's company. Dramatically and socially she is a great favorite in both the United States and England.

**Copper in Water Kills Germs.**  
In looking to the purification of the water supply, either the local farm supply or the water for a great city, remarkable results are announced from the application of a new method of destroying micro-organisms in water, which was discovered about a year ago by Drs. Moore and Kellerman, of the Bureau of Plant Industry at Washington. It consists simply in dissolving a certain quantity of copper sulphate in the water to be purified. Fortunately the dilution can be made so large that no deleterious effects are produced upon the water intended for drinking purposes. One part of copper sulphate to eight million parts of water is the proportion generally used, and it is pointed out that, in order to obtain any effect of copper from such a mixture a man would have to drink forty gallons of the water.

During the latter part of 1904 more than fifty sources of water supply in the United States were treated by this method with gratifying success. Not only are dangerous bacteria thus destroyed but the green growths that frequently choke up small ponds are also eliminated. Most important of all is the promise that by this treatment the germs of typhoid fever may be entirely removed from any source of water supply.

In the case of a lake or pond the chemical is applied by suspending bags filled with copper sulphate over the side of a boat while the boat is rowed about. In two or three days the copper is entirely precipitated from the water, but the beneficial effects of the treatment last for weeks or months. It has been suggested that this discovery may raise the question whether, after all, our mothers were not right, although they did not understand the scientific aspects of the matter—in preferring copper kettles for preparing many kinds of food.

A Chicago gamblers stole a dollar and went to the workhouse for a year. On the same day a gambler who had been given away with \$200 was also given a year. Truly, the law is no respecter of persons.

A Chilean post has declared for war against the United States. Prepare for the bum-bardment.

### SENT ON APPROVAL

#### STRAIGHT-LEGS

Our stylish and easy forms give the legs perfect shape. The trousers hang straight and trim. Put on or off in a moment. Impossible to detect, fastenings, durable, give style, finish and comfort. We send them on trial. Write for photo! Illustrated book and proofs mailed free and sealed.

ALISON CO., Dept. EG, Buffalo, N. Y.

### SUCCEED IN LIFE

#### GET MORE MONEY

You can get from \$3,000 to \$5,000 a year in the Real Estate Business, without investing any money. Our co-operative methods insure larger and steadier profits than ever before. We will teach you the Real Estate, General Brokerage and Insurance Business by mail, appoint you special representative of the largest and most successful real estate company, send you lists of choice salable real estate, and investments and co-operate with and help you make a large steady income.

Every business man should have our Commercial Law Course which is given free to every Real Estate student. Our free book is valuable and interesting and will show you can succeed.

Address: H. W. CROSS, President, THE CROSS COMPANY, 181 Reaper Block, Chicago.

### FREE TO ASTHMA SUFFERERS

A Home Cure that Anyone can Use Without Loss of Time or Attention from Business.

We want every sufferer from Asthma to write us today for a free trial of our wonderful New Method for curing Asthma. We especially desire those cases of long standing which have tried all the various kinds of inhalers, douches and patent smokes without number and without relief. We know we can cure them. We want to and are willing to prove it absolutely free of cost. Many thousands have accepted this opportunity and are now cured. There is no reason why anyone, old or young, rich or poor, should continue to suffer from Asthma after reading this marvelous offer.

Our Method is not merely a temporary relief, but a cure that is founded upon the right principles, a cure that cures by removing the cause. Don't put this off until you have another attack, but sit right down to-day and write for the Method. It is free and we send it with all charges prepaid. Address: Frontier Asthma Co., Room 181, 109 Delaware Ave., Buffalo, N. Y.

### PALISADE PATTERNS.

#### A TRIM GOWN FOR A MISS.

For a young girl's gown there is no smarter model than the one sketched here. Every feature of the dress serves a purpose, and the result is a graceful and becoming whole. The yoke lends breadth to shoulders which need it, while the tucks extending a short distance below, supply a becoming richness for the figure. The pleated front, continued in effect by the front pleat of the skirt, suggests height and slenderness. The skirt is pleated all around to make up the delicate figure. The upper portion of the figure. Royal lace, tulle, or cashmere might develop this design. The least experienced dressmaker can fashion the gown without difficulty, for which 6 1/2 yards of material, 36 inches wide are needed in the medium size. Two Patterns—4019, sizes 12 to 16 years. 4020, sizes same.

The price of these patterns is 20c, but either will be sent upon receipt of 10c.

PALISADE PATTERN CO., 47 Battery Place, New York City.

For 10 cents enclosed please send pattern No. 4019, or No. 4020 to the following address:

NAME.....  
ADDRESS.....

# Secure Your Future

To earn more money—to secure your future—to succeed in life—cut out, fill in and mail to the International Correspondence Schools the above coupon. They will show you how you can fit yourself easily and quickly in your spare time to get more money in your present position, or change to a more congenial and better paying occupation.

Mind, the sending of this coupon does not obligate you to pay one cent. It simply gives the I. C. S. the opportunity of proving how easy it is for you to improve your condition right at home without neglecting your present work.

No risk to run. No books to buy.

The I. C. S. is an institution with an invested capital of over \$5,000,000, and a reputation of 13 years' successful work. It has taken a day laborer and qualified him as an electrician with a salary of \$500 a year. It has taken a bricklayer and qualified him to become a building contractor with a business of his own of \$200,000 annually. It has taken a sailor and qualified him to establish his own yearly business of \$50,000. It has taken tens of thousands of men and women of every age and in every walk of life and in a few months qualified them to double, triple, quadruple their salary. To learn who they are; how it was done; how you can do the same, fill in the coupon and mail it to-day.

# Succeed in Life

"SUDDENLY LE FEVRE CLUTCHED MY ARM."

the stiff wind and flashing back the rays of the morning sun. Eagerly I swept the whole range of visible ocean. Here and there appeared the black smoke of a distant liner and to the northeast I made out a low, dark line that might be either haze or land. But this was not all. Directly beneath me I perceived a series of dark objects, all spouting black smoke. They were of various sizes, and by the formation I could conclude only one thing—that they were the ships of a fleet, a naval squadron. Then I recalled the words of the Kaiser that moonlight night at the Chateau Lagunay.

"There will be two great battles. One on the land, is before us; the other, on the sea, will occur within a fortnight."

I confess to a feeling of elation that I was here, in the air, in position to witness the greatest naval battle of years, although I regretted the necessity for this test of arms. I observed that the fleet was headed northeast, and that a closer view I ran ahead a mile or more and descended, until I had a fair sight. The ships were French, by their flags. Beautiful and stately were the great vessels; grimly beautiful, too,

for an opening. LeFevre had been so confident of his ability to manage his aeroplane that he had set out in spite of the head wind that kept back all the less venturesome aeronauts. He was determined to witness the battle. Just before he saw me he had attempted to turn and found the steering gears jammed. Had I not rescued him he would have probably found a watery grave.

It was now dark. The air was damp and cold, so I drew the roof over part of my car. LeFevre's light clothing was dry enough to put on, and we sat down to eat supper, followed by a cigar. I learned then many things about the impending battle. LeFevre being familiar with the explosives and apparatus in use on both sides.

The Germans were depending largely upon their late invention, the Calnite aerial bomb. This projectile was to be fired by compressed air from a mortar-like gun, and being fitted with a gyroscope would maintain its elevation for a distance of eight miles. The bomb was two feet in diameter and about three feet long, and moved so slowly as to be visible during its whole course. It contained a charge of two hundred

feet, and thither we followed.

But whatever work awaited this terror must be done quickly. The Germans were working with accurate whistling Calnite aerial bombs. Ship after ship quivered, split open and sank like a broken teacup. The force of the Calnite was so great that it operated for a distance of a hundred yards on every side, more than once sinking several of the smaller ships at one explosion. LeFevre groaned as, looking back, he saw one of the largest battleships collapse, fairly smashed into fragments. He shook his fist at the Centrifugal. "On, on!" he shouted. "Do thy work, jagard!"

The Centrifugal moved swiftly. At intervals it came up with a submarine, raised a moment to ascertain whether German or French, and acted accordingly. If French, it passed on; if German it darted at the victim, touched it, and as quickly darted away. What terrible power it exerted I could not understand, but at that fatal touch the enemy sank. It seemed to be a silent, swift, and silent messenger of death was in the thick of the German fleet. Looking back I saw that there were but two of the French

**FOOD ADULTERATIONS—WATERFOWLS.**

GUY ELLIOTT MITCHELL.

In these days of so much talk about pure foods, and with the protective legislation by Congress on the subject, the bulletin of the Bureau of Chemistry, Department of Agriculture, on "Some Forms of Food Adulterations and Simple Methods for Their Detection" is very timely.

Since the middle of the last century the subject of food adulteration has attracted a constantly increasing amount of attention. In this country, however, very little was done in this line until about 1880. In 1881 the Division of Chemistry began the study of food adulteration, and since then has given a great deal of time to the subject. Since 1898 the origin and place of manufacture of the foods studied by the Bureau have been carefully noted and special attention also given to imported foods.

In 1893 the first practicable food-inspection law in the United States was

enacted in Massachusetts. Since that time other States have enacted and enforced food laws, until at the present time twenty-five States are seriously attempting to regulate the character and quality of the foods sold in their markets. In three additional States laws relating to the purity of dairy products are enforced, and in several others a beginning has been made.

Food legislation has received much attention abroad and the more advanced foreign countries have effective food laws and enforce them rigidly. The subject of the purity of foods is more widely studied in the United States now than at any previous time. The people as a whole are better informed on the subject than ever before, and there is a constantly increasing demand for definite information. In response to a very large number of inquiries regarding the matter the bulletin of the Bureau of Chemistry has been prepared as a popular statement regarding the nature and extent of food adulteration, and includes simple tests by which the housekeeper or retail dealer may determine some of the more prevalent forms of adulteration practiced.

The demand for information on this subject is now very general, and, as is often the case when public interest is deeply aroused, there is an unfortunate tendency toward exaggeration which frequently amounts to sensationalism. Such an attitude is of course to be deplored, and unless it is checked must sooner or later react unfavorably. It is not unusual to speak of some of our typical foods as poisoned, and of the manufacturers as poisoners. Such characterizations are frequently exaggerations to the point of untruth. Deleterious substances are in many cases added to foods. At the same time the word "poison" has a very strong and distinct significance and should not be applied to any one of the substances ordinarily added to foods, except in the sense that they are harmful. The word "poisoner" signifies a person who intentionally and deliberately administers an article intended to result fatally, or at least very disastrously to health.

**Water-Fowl in New England.**  
Broiler ducks are grown by the thousands in several localities of Pennsylvania, New Jersey and Long Island, as well as elsewhere, the greatest number, however, coming from the first named sections. One farm alone during the year just passed marketed 37,000 broiler ducks from its plant. But New England is the home or breeding grounds of the best quality of market geese sold in this country. The most careful, the most determined and the most successful breeders and handlers of high quality market geese are scattered from Rhode Island to the end of Massachusetts.

The old-time common or gray goose has been largely displaced by the stately Embden, Toulouse, African, and China species. The Embden and the Toulouse are the result of a union of the efforts of the French and the English. The African, the Hong Kong and the China geese came, perhaps, from the Asiatic countries.

Recently, at the Boston Poultry Show, was exhibited the finest lot of geese that have been shown in this country for all time. One pair of Embden (pure white geese) reached the enormous weight of 53 pounds and the Toulouse (gray market geese) almost equaled them in size. Next to these in quality is the African, so much valued for the rearing of what are known as the mongrel geese.

The white Embden, said to have originated from the visit of a swan to some of the commoner flocks of a town of the same name on the Continent, have been carefully bred and selected until they are very large, handsome white geese, which seem to be valued first as a true-bred variety for the producing of feathers and market poultry. The Toulouse that came from France are fully their equal in every way, except that the feathers are gray or mixed with gray instead of pure white.

What is known as the wild or Canada goose, mated with an African, produces the mongrel geese, so highly valued in the Eastern markets from Thanksgiving through Christmas times. When the Canada gander and the African goose become properly mated they will be constant one to the other to the end of their existence, growing each year one or two broods of mongrel geese that are ready for market during Thanksgiving and Christmas times and dress to a weight at this age heavier than either of the parent pair. The quality of the meat is excellent, the price obtained ranging from \$2.75 to \$4 each, according to the season and the quality and finish of the individual specimens themselves.

These, with the Embden, the Toulouse and the China geese furnish the high-priced geese for the winter markets. No one of these of the better qualities is ever sold for less than 28 to 30 cents per pound, and there is a ready sale for all of them offered at these prices. In addition to these, thousands of geese are gathered from as far north as Nova Scotia, down through all the States of the Western part of the coun-

A WINNING PAIR OF BROWN CHINESE GEESSE.  
FIRST PRIZE TOULOUSE GOOSE, Fort Wayne, Ind., Dec., 1905.  
GROUP OF BROWN CHINESE GEESSE AT St. Louis Exposition.

try, into New England, where large fattening yards are conducted. These yards are large plants with lots, something like the stock yards of the large cities, only smaller in size. The geese are placed in the enclosures and fed for heavyweight and fine finish to be dressed for market. As many as 10,000 geese are gathered at one or two points in Massachusetts, and fed in this way for the winter markets. It takes several weeks to properly finish them and new supplies are constantly coming in to replace those that are sold off. The profitable demand for geese of this kind extends over a period of from nine to twelve weeks, beginning just before Thanksgiving and ending in January.

No attempt has yet been made in this country for the excessive fattening of geese, such as is carried on in Germany. Those so fattened with us being only prepared to a finish for roasting, nor has fattening or feeding for the excessive size of the livers ever gained any consideration here. The major part of all the geese brought into the markets for general consumption are sold and the demand for them

WHITE EMBDEN GEESSE.

the ordinary beverages and foods used in ordinary consumption, and also simple means of detecting the presence of the foreign matter contained in them. The pamphlet should occupy a prominent place in every household library, and can be obtained upon application to the Division of Publications, Department of Agriculture.

**Feeds Fowls Automatically.**

A farmer in Oregon, who owns a small poultry farm, has devised a novel method of feeding his chickens during his absence. In each yard he has erected troughs to hold food for the hens, and these are connected by wire with an alarm clock in the farmhouse. When the owner leaves home in the morning he sets the alarm clock at the hour of feeding the chickens, and by an ingenious arrangement, when the time arrives, the alarm goes off, the connecting wire releases the troughs, and the food is spread before the hungry fowls.

The area of the new state of Oklahoma will be over 70,000 square miles.

**Union Comfort Guaranteed  
No Pay if we Fail**

FREE TRIAL FOR TEN DAYS

To every thousand population in this country there are just 2 dozen people troubled with bunions. The torture they suffer is unnecessary, for there is a device that is absolutely guaranteed to remove the pain the moment it is applied. This device is available to try for the mere asking.

You desire to keep the protector you will remit to us 50 cents for the one you have and 50 cents for one for the other foot if you need it, if you are one of the 84 per cent.

The Fischer self-adjusting Bunion Protector is a neat soft leather device, so pliable that it conforms to the shape of the foot from the instant it is applied and yet so firm that it prevents pressure upon the sore spot.

We can afford to make this offer because we did it successfully last year in 122,000 cases and we lost less than 1 per cent of all the goods we shipped through our mail-order department. 84 per cent of all bunion sufferers are troubled on both feet.

It is worn over the stocking, fills out the hollow places in the foot and acts as a bridging. In this way the shoe is absolutely prevented from coming in contact with the sore spot. The swelling is removed, it strengthens the shoe, gives the foot a natural form and Retains the Perfect Shape and Correct Lines of the Shoe. A larger shoe in not required than is necessary to wear for comfort.

If no dealer in your city has our goods in stock, we send, **Free on ten days Trial one Fischer Bunion Protector** and you take absolutely no risk. You need not even send postage. We assume every expense. If at the end of the trial period you are not relieved you return the protector to us. That ends the transaction. But if

An absolutely proper fit can be obtained by the use of the protector. Remember we absolutely guarantee that the protector will hold the large toe joint in its natural position, will prevent all friction, irritation or pressure from the bunion, will form a firm wall all around the bunion and will give instant relief and lasting comfort. It is self adjusting, will always hold its place and requires no buckling or strapping. All you have to do is to put it on and forget it's there. Any shoe dealer or druggist can obtain the Fischer Bunion Protector for you. If his jobber does not handle it, show him this advertisement and tell him to write to us direct. If he will not obtain the protector on trial for you, write us telling us the foot on which you wish to give the protector a trial and the size shoe you wear and we will send the protector immediately. Inquire of your dealer today or write to us.

**THE FISCHER MFG. CO., MILWAUKEE WIS., 436 SCOTT ST.**

State.....

Fill in this Coupon stating which foot your name, address etc., and we will send the protector at once. If you do not care to send Coupon write us a letter containing the same information asked here.

**PERFECTLY DEVELOPED WOMEN**  
BEAUTIFUL WOMEN! YOUR FORM AND FIGURE MADE PERFECT.

I give the greatest beauty secret on earth free to all women. I will show you the way, it is very simple. My perfected, natural method of treatment will actually and permanently develop and enlarge the bust from 2 to 6 inches and give that swelling and rounded firm projection of nature that is so attractive to all. This cheeks, back and arms made plump and beautiful. From 3 feet, 6 inches from around the eyes and through are scientifically removed. Do not depend on amount of skin. Beauty of complexion and clearness of the skin, free from wrinkles, and freshness of youth always follow the use of my perfected, natural treatment.

Whatever you may lack in the way of perfect form of figure, Nature will generously supply for you if you use my treatment, as it vigorously and positively stimulates the development of Nature and makes plumper, beautiful the flat and sunken places and creates the most fascinating and beautiful curves. My scientific method must not be confused with the many quick dress and remodeling, or creams, because it has a purely scientific basis in direct accordance with physiological and anatomical principles. It causes fat, fresh skin, rosy cheeks, beautiful shoulders, an ideal figure, even in the most hopeless cases. I absolutely guarantee satisfaction. My new book containing "Detailed and illustrated facts, and information how to develop yourself at home with least cost and free and prepaid, address confidentially, Department 68, THE DELMAR ASSOCIATION, Delmar Building, 24 East 24th St., New York City.

ceases by the middle of January. Following this, comes the sale of the capods and the virgin cockerels, so highly prized in New England.

The scientific part of the handling of geese is growing them to a condition

PAIR OF GRAY AFRICAN GEESSE.

where the feathers are just right to be plucked from the carcass without having the bad appearance that of necessity must be present if there is a large amount of down or short feathers showing. Geese, to be properly marketed at their best, should be plucked at the right time, then fed and cared for so as to be ready for killing just as the new growth of plumage is full and complete and ready to be stripped clean and clear from the body at killing time. This is the scientific part, next to the experience in the handling, feeding and caring for, which bring such large numbers to the finest finish and most desirable condition for selling in the market.

It is a sight one would never forget to see eight or ten thousand of these geese confined in lots or runways being fed and cared for by attendants to bring them to that perfection of market poultry not usually seen outside of New England and New York City.

T. F. McGrew.

**Selling Chicks a Day Old.**  
The hatching of chicks in quantities and then selling them direct to poultry breeders and fanciers is a business that is developing all over the country, largely doing away with the bother of sitting hens and the detail and attention entailed by operating an incubator. The plan is simplicity itself. Experienced incubator operators put in substantial hatching plants solely for the production and immediate disposition of chicks direct to poultry people, both amateur and professional. For the most part the new method possesses some range in its application. It has been found that day-old chicks will bear shipment to a considerable distance, and that a car ride of from ten to fifteen and twenty hours is not considered extra hazardous. Prices for day-old chicks are a matter of barter between seller and buyer, something depending on the breeds and strains, but usually ranging \$1.50 and up per dozen.

There are several establishments in this country which make this an extensive business, and enjoy a hatching capacity of from 1,000 to 6,000 eggs at a time. All report a healthy demand for their living product at remunerative prices.

**YOU Can Save a Lot of Work! Can Save a Lot of Money! Can Increase Your Comfort! Can Increase Your Profits!**

If you are interested in these things we'd like to show you our new book about

**ELECTRIC STEEL WHEELS**  
and the **ELECTRIC Handy Wagon**

More than a million and a quarter of them are in use and several hundred thousand farmers say that they are the best investment they ever made. They'll save you more money, more work, give better service and greater satisfaction than any other metal wheel made—because they're made better, they're stronger, they're more durable, they're more comfortable to ride on, they're more reliable, they're more economical. Don't buy wheels nor wagon until you read our book. It may save you many dollars and add to your profits.

**ELECTRIC WHEEL CO.,**  
Box 265, Quincy, Ill.

**THIS BOOK FREE**  
How to select a good furnace. No. 45  
Lester Steel Furnace costs only freight paid. Other sizes, Write, Lester Steel Furnace Co., 744 Tacoma Bldg., Chicago.

**TO THE LAME**  
There are only two Frigidities—our patented boots. Others imitate our 1884 style—we make it correctly at \$10. With "O'Connor's Latest" you wear really made shoes, ready made alteration—open back, Oxford ties, without to walk—perfect angle and instep! Cut this out and all into the street if he calls ahead of time. Get your "pointers on training" you how to get one. Give postage.

**E. L. O'Connor Mfg. Co., 1271 B'way, N. Y.**

**Don't Die That Way**

Millions Die Every Year from Mere Ignorance of Nature's Laws of Health

Ask yourself the question: "Is Life Worth Living?" And the answer will be: "It depends on your health." Then why not have good health? If you are sick it is because some simple, natural law of health has been violated.

**Nature is a Stern and Inexorable Judge, and Grants No Pardons When Her Laws are Broken**

Better Learn Those Laws.  
You can't learn them too soon.  
You can't learn them all at once.  
Begin right now, and  
Learn a little every month.

Send a dime or five two-cent stamps to 1405 Fisher Building, Chicago, for one whole year's subscription for Maxwell's Homemaker Magazine, and read the Department "Health, Wealth and Good Living" by Right Thought and Right Living."

Send it every month—year in and year out—and learn all about Nature's Laws of Health, and save Doctors' Bills and Drug Bills, and you will enjoy many years of Life and good health after you otherwise would have been dead and buried—or maybe cremated. Whether you are buried or cremated doesn't so much matter. It's the dying part that counts. "Train for Good Health" is your faithful body-guard to kick old "Grim Death" out of the street and all into the street if he calls ahead of time. Get your "pointers on training" from Maxwell's Homemaker Magazine.

**ONE YEAR FOR 10 CENTS**  
Subscription Price to Chicago and Foreign Addresses, 25c. Per Year  
Cut out this subscription blank, write name and address on lines below, and send me 10 cents (silver or stamps) and we will mail you Maxwell's Homemaker Magazine every month for twelve months. Don't delay, but send at once.

If you wish to have THE HOMEMAKER MAGAZINE sent to friends, use a separate piece of paper for name and address, and enclose 10 cents for each yearly subscription.

## Briefs of the Week

Circuit Court at Charlevoix next week.

Salvation Army—open air meeting next Thursday evening.

Rev. Donovan occupies the Presbyterian pulpit, tomorrow.

The annual Sabbath Memorial Services will be held tomorrow morning at the M. E. Church.

"Dad" Spicer, well known in baseball circles here, is captain and catcher for the Cadillac team this season.

Northern Michigan Interscholastic Field Meet at Charlevoix this Saturday. East Jordan has a team entered.

A special meeting of the O. E. S. is to be held this Saturday evening, May 26th at 7:30 standard. All members earnestly requested to attend.

A team of colts, belonging to Anthony Kenny, ran away Sunday, smashing the buggy and breaking the harness. Mr. Kenny escaped injury as did the horses.

The South Arm Township Board of Review met at Supervisor Graff's Tuesday last and went over the assessment roll, completing the work in one day. They meet again next Monday and Tuesday at the Town Hall and will be in open session from 9:00 a. m. to 4:00 p. m., as provided by statute.

"What Women Will Do" contains many roaring comedy situations, several scenic effects, and a number of specialties as strong as any seen on our best vaudeville stages. The full scenic production of this great play will be seen at the Loveday Opera House on next Tuesday night. Seats on sale Saturday.

There will be an excursion in on the D. & C. R. R. and the Charlevoix Band will bring a crowd up from Charlevoix on the Beaver. The Band has promised to render a few selections on the street before the show begins.

George Glenn is a Pennsylvania visitor.

Sohram and Morris Chairs at Whittington's.

Five blue refrigerators and oil stoves at Stroebel Bros.

Grace Keenholts home from Boyne Falls over Sunday.

Mrs. E. C. Plank is at Petoskey, guest of friends.

Perfection oil 12 cents per gallon at W. E. Malpass Hardware Co.

Miss Mattie O'Brien was here from Charlevoix this week, visiting friends.

The frost of Sunday morning seriously injured early cherries and strawberries.

Co. Com'r of Schools J. H. Milford was at the Beavers this week, on work pertaining to his office.

Mrs. Daniel Siminaw is here from Charlevoix this week, guest of her parents, Mr. and Mrs. Samuel Whiteford.

Miss Harriett Hoyt left recently to attend Commencement Exercises of Syracuse University, Syracuse, N. Y.

The ladies of the W. E. C. are desirous of obtaining a good supply of flowers for Memorial Day and request those who have same to kindly leave them at the Town Hall the morning of that day.

Owing to the School exercises at the Presbyterian Church on Tuesday evening the curtain at Loveday Opera House will be held until 9 o'clock as "What Women Will Do" is too good for anyone to miss.

Fred G. Fallis returned Monday evening from his western trip. Mr. Fallis was gone three weeks and during that time traveled some 6,000 miles. He visited Los Angeles, San Francisco, and other western places and likes the country very much.

A new buggy at cost. Stroebel Bros.

Stroebel Bros. makes harness to order.

Free Socks at Sherman's. See adv. on this page.

Choice home grown seed corn at Stroebel Bros.

E. J. Crossman is a Milwaukee business visitor.

Mrs. Dewitt Keenholts was a Belaire visitor, recently.

Miss Cassie Winters, here from Walloon Lake, Saturday.

Perfection oil 12 cents per gallon at W. E. Malpass Hardware Co.

Born to Mr. and Mrs. John Hanson of Hitchcock, Sunday, a son.

E. C. Plank is attending a meeting of the F. & A. M. Grand Lodge at Grand Rapids.

Mr. and Mrs. G. L. Sherman were Elk Rapids' visitors over Sunday, guest of friends.

Try San Marto and also a fresh line of J. M. Baur's celebrated Coffee's at Bowen & Kenny's.

O. H. Moyer, Painter and Paper Hanger. All work guaranteed. Leave orders at Residence on North Main St.

Miss Leona Faught returned latter part of last week from an extended visit with her grandparents at Kingsley.

FARM FOR SALE—40 acres, 14 miles west of East Jordan. For particulars enquire of George L. Allen, East Jordan. 21-4

The Salvation Army Corps at Charlevoix will run an Excursion to East Jordan next Thursday evening and conduct an open air meeting on our streets.

The Herald's Magazine Section for next week will contain an interesting article for the ladies, entitled, "Summer Styles in Women's Raiment," by Martha Dean.

"Have you pains in the back, inflammation of any kind, rheumatism, fainting spells, indigestion or constipation. Hollister's Rocky Mountain Tea makes you well, keeps you well. 35 cents at Warne's Pharmacy.

The more pleasing and pleasant our government can make farm life the better it is for the government. Our cities are over-crowded with worthless loafers that might be honorable and respectable farmers. The rural route is one of the things that has been provided to make farm life more desirable and attractive, and as we have to live off the farmer nothing should be left undone that could be done to make the farm inviting.

"We have had men clamoring for primary reform in our democrat conventions and praying in their closets that we would never get it. Let us be done with these hypocrites and compromisers." The above statement and the declaration which follows it, was made by one of the speakers at the recent Muskegon dollar banquet, and the speaker's statement was not attacked or denied. The confession is all right, but it is more than a little tardy and it isn't as far-reaching as it should have been. What about the democrat local leaders in every county and town and villages who were clamoring for primary reform as a campaign issue, but who refused to make a single move to get it when it was offered them? They were just as insincere and hypocritical as the democrat convention pretenders.

Liberty Bell Crackers at E. A. Lewis'.

Ball-bearing lawn mowers. Stroebel Bros.

San Marto Coffee at Bowen & Kenny's.

Mr. and Mrs. Bert Scott were Boyne City visitors, Sunday.

Early Seed Potatoes on sale at Supernaw Bros. Warehouse.

Hammocks, HAMMOCKS, HAMMOCKS at Whittington's.

Perfection oil 12 cents per gallon at W. E. Malpass Hardware Co.

The finest line of couches in town will be found at Whittington's.

Mrs. Park Vincent of Boyne City is visiting East Jordan friends this week.

A full sized 10c cake of Palmolive with every 25c worth of Galvanic Soap at Sherman's.

Capt. Covell was here from Charlevoix, Thursday, in the interest of the Salvation Army.

When you want Fresh Baked Goods of the reliable sort call at Mrs. Newson's. They're "The Kind That Mother Used to Make."

FOR SALE—House and Lot on West Side on road to Ironton. House in good condition; good well. For particulars inquire of Wm. Brant.

Married, last evening by the Rev. L. B. Bissell, John Burney and Miss Cora Lorraine, both of East Jordan. After a few days' stay here they will return to East Jordan where they will reside.—Traverse Record.

Have you weakness of any kind—stomach, back, or any part of the body? Don't dope yourself with ordinary medicine. Hollister's Rocky Mountain Tea is the supreme curative power. 35 cents, Tea or Tablets at Warne's Pharmacy.

Hon. John Nicholls and Mrs. Nicholls left Tuesday afternoon for New York, where they will take a steamer for "Merrill England," to visit their son "Dr. Jack," and other relatives. They will be away six weeks or two months.—Charlevoix Sentinel.

The great La Grange Minstrel Show has selected, after carefully considering all the hits of 1906, the beautiful Two-Step Intermezzo, "Azaleas," by J. C. Hawthorne, as the piece de resistance of their production. The number is published by LYON & HEALY, Chicago, and is the prettiest thing composed for a long time. Every piano will be decorated with a copy soon.

10 bars of Laundry Soap for 25 cents.—E. A. Lewis.

Go to Supernaw's for your Early Seed Potatoes.

Get in line and have an old Hickory Chair.

C. H. Whittington

STATE OF OHIO, CITY OF TOLEDO, 1888.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure. FRANK J. CHENEY.

Sworn to before me and subscribed in my presence this 6th day of December, A. D. 1888.

A. W. GLEASON, NOTARY PUBLIC.

Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials free.

F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c.

Take Hall's Family Pills for constipation.

We can't afford to continue this offer long. Take advantage of it at once. The following dealer will supply you:

G. L. SHERMAN & SON.

## The Successful Sailor

—the one you would employ to make your wedding clothes—cuts the coat according to the cloth. To be a success you also must cut your coat according to your cloth—that is, you must suit your expenditures to your income. As your income grows your expenditures increase. Often we hear a man say, "If I had a salary like Smith I could save something." At the same time you know his neighbor Jones, who has only one-half of Smith's salary, and he manages to save something every year.

Men and women grow rich, not because they earn large sums, but because they form the habit of saving small sums and depositing them in the bank for safe keeping.

## State Bank of East Jordan

CAPITAL, \$20,000.00. SURPLUS, \$2,500.00.

About three o'clock Thursday morning fire broke out in Frank Clymer's barber shop in Alba and before the flames could be controlled the barber shop, the building occupied as a saloon by A. W. Torrey, and the shoe store of J. A. Torrey were entirely destroyed. Clymer's loss upon building and household goods \$2000.00; insurance \$500.00. Other losses approximately \$1500.00 with no insurance. The rooms over the barber shop were occupied by Mr. Clymer's family, consisting of himself, wife, two children, and Mrs. Clymer's mother, Mrs. Maxam. When the family awakened they found the stairway leading to their rooms all in a blaze and they were obliged to jump from the second story window to escape the flames. Mrs. Maxam was very seriously injured and will hardly recover. The origin of the fire is unknown.

As a result of a quarrel over some cattle straying, John Hamilton, of Charlevoix, was killed by John Maitland of the same place, last Thursday. The murder was witnessed by the men and two women. It seems that Maitland had gone over to Hamilton's to complain about the cattle and the men got into a quarrel that finally became a fight. A little later Maitland began throwing stones at Hamilton, one hitting him back of the left ear, fracturing the skull. The quarrel began about 12:30 p. m. and Hamilton lived until 6 o'clock. The men who witnessed the affair say they were unable to help Hamilton as Maitland stoned them away and they were unable to get near him. Hamilton leaves a family of several children but Maitland is unmarried. A strong sentiment is reported against Maitland and it is said to be quarrelsome although never convicted of any crime. He was charged with murder in the first degree. Hamilton was 72 years old and Maitland 40 years.

"What Women Will Do," contains many novel and striking scenic effects such as "the vision of home," "the ark on the sands," and "the churchyard in winter." In the latter, one of the most dramatic scenes ever written for two women are introduced. The wreck of the good ship "Rosa" is both beautiful and sensational. This great play will be seen at the Loveday Opera House on Tuesday night.

The marriage of John M. Burney to Miss Cora Lorraine took place at Traverse City Wednesday of this week. Both are popular young people of our city and a host of friends wish them "luck." During the past week a number of "showers" were given—Miss Lorraine. One Saturday evening given by Misses Mina Hite and Pearl Crowell, at the latter's home. A second, Monday evening, by Mesdames E. C. Plank and G. L. Sherman at the former's home. On the evening of the "first shower" a supper was also given in honor of Miss Lorraine by Misses Emma and Cassie Winters.

Friends of Hon. Wm. Mears are urging his election as department commander of the G. A. R. and a fine write-up of him appeared in the Reed City Weekly Clarion last week. Mr. Mears enlisted in Co. D., 25th Mich. Infantry on Sept. 11, 1862, and was sent at once to Louisville, Ky. From there he was sent to Green River. He was in a battle at Leeb's Bend, Ky., and July 4, 1863, was with the five companies who fought John Morgan's brigade. He was in the siege of Knoxville and also in several other battles. He was discharged April 1, 1865. After leaving the army, he engaged in farming in southern Michigan, moving later to Boyne Falls where he has held the office of justice of the peace for 12 years, supervisor 11 years. In 1892, he was elected senator of the 27th senatorial district and has been chairman of the republican county committee for four years.—Petoskey Record.

For sale in East Jordan by  
C. MADISON, DRUGGIST

# FOLEY'S HONEY AND TAR

For children: safe, sure. No opiates.

## Shot At Random.

Printers ink marks the path to riches and fame. Try it.

It is said that the best way to preserve apples in winter is to wrap them in newspapers so as to exclude the air. The exception is made, however, that the newspaper must be one on which the subscription has been paid, else the dampness resulting from what is "dew" may result in spoiling the fruit. We still have one or two men in this community who stand round on the street corners and from morning until night complain about the town, their neighbors, their taxes and the weather. Such men are mighty common clay and it is fortunate we have so few of them. Such men are no use to the town, their families or their God. They seem to live but no one can tell how. Like mosquitoes and flies, they are not fatal but disagreeable to have about.

While doing some shopping in one of our grocery stores last evening we chanced to hear a little boy ask his father who that man was buying the flour. "That is our editor," said the father. "What do editors live on," said the inquisitive little archer. "Why do you ask that question," said the indulgent father. "Because I heard you say you had taken our home paper for three years and had never paid a cent for it." To save the father embarrassment we left the store, but it is safe to predict that the child got spaked when the father got him home.

There are but few editors in our state who have not made a vigorous and continuous fight against the city mail order house. This has been done in the interest of the home merchant, and without money and without price. If the editors of the land had received regular advertising rates for all they have said against the enemies of the country merchant they could now be wearing diamonds. Now the department store man appreciates advertising space and is willing to take all the average country editor has for sale, and at a good price. What other business or professional men would refuse business to help their friends, especially as many of said friends never seem disposed to return the compliment or even appreciate it.

There should be no "factions" in this little city of ours. Every improvement made enhances the value of all the property in and surrounding our town. We should live as one big family, and we believe few towns can show up a more progressive or intellectual family. We have as few "black sheep" in our place as any flock in the state. When there is discord in the family there is little progress. When there is a united pull there is little we cannot accomplish. Envy, jealousy and hatred pull us all down. Envy is a canker that gnaws at the heart and makes one sour, disgruntled and unhappy. Jealousy makes one unfair in passing judgment; hatred does not pay even from a sordid point of view. Let us all be friends and pull together and show our neighbors what a large and harmonious family can accomplish in building up a town.

We are not given to boasting but we are proud of the farmer boys of this vicinity. They are, with rare exceptions, a healthy, intelligent, happy class of young men. We feel like taking our hat clear off when we meet them upon our streets, and no class is more welcomed to our office. Too many boys leave the farm where they would have made substantial and good citizens, and go to the city where only one in a thousand succeed in life's battle. There are farmers who fairly drive their boys away. There is no excuse for this. The farmer boy is entitled to his vacations, to several relaxations, his visits to the city, good books, magazines and his home paper. To the observing one it is plain to be seen that the old farm is the best place in the world for the average young man and never fails to bring a happier and more useful life than the city. Young men, you who till the soil and earn your bread by the sweat of your brow, we are proud of you; our latchstring is always out to you and you will always have a friend in this paper.

You can see the poison Pine-ules clears out of the kidneys and bladder. A single dose at bedtime will show you more poison upon rising next morning than can be expelled from the system in any other way. Pine-ules dissolve the impurities, lubricate the kidneys, cleanse the bladder, relieve pain and do away with back-ache speedily, pleasantly, permanently. Sold by Warne's Pharmacy.

WANTED:—Traveling Salesman. Must furnish references and invest \$1,000.00 in first class 6 per cent Bonds. Salary and Expenses paid. Experience not required. We teach business at our Mills. The Wheeling Roofing & Corning Company, Wheeling, W. Va.

A hundred years ago the best physician would give you a medicine for your heart without stopping to consider what effect it might have on the liver. Even in this good day cough and cold medicines invariably bind the bowels. This is wrong. Bee's Laxative Cough Syrup with Honey and Tar acts on the bowels—drives out the cold—clears the head, relieves all coughs, cleanses the mucous membranes of the throat, chest, lungs and bronchial tubes. Sold by Warne's Pharmacy.

## "What Women Will Do"

An interesting event in local theatrical history will be the initial representation in this city next Tuesday night at the Lovejoy Opera House of the new play with the significant title "What Women Will Do". The play deals with the idyllic rural life during the first and last acts, but the other acts are laid in Paris, and depicts the every phase of modern life. The play teaches a beautiful moral lesson and shows the inevitable triumph of virtue over vice. The piece is full of novelty and happy surprises and brings laughter and pathos in a natural and human manner. The excellent cast, special scenery, electrical effects and a number of musical specialties, are some of the varied features of Holden Bros. big production.

### List of Advertiser Letters.

Following is a list of the letters remaining uncalled for in the East Jordan postoffice for the week ending May 19th, 1906:

Frank Matthews  
Mr. Hue Tumeth  
FRANK A. KRYNEN, P. M.

The old time method of purging the system with Cathartics that lead, grip, grind and break down the walls of the stomach and intestines is superseded by Dade's Little Liver Pills. They cleanse the liver and instead of weakening, build up and strengthen the whole system. Relieve headache, biliousness, constipation, etc. Sold by Warne's Pharmacy.

WANTED: By Chicago wholesale and mail order house, assistant manager (man or woman) for this county and adjoining territory. Salary \$20 and expenses paid weekly. Expense money advanced. Work pleasant. position permanent. No investment or experience required. Spare time valuable. Write at once for full particulars and enclose self-addressed envelope. SUPERINTENDENT, 132 Lake St., Chicago, Ill.

Every form of distressing ailment known as Piles, originates internally. The real cause of the trouble is inside. Manzan is put up in collapsible tubes with nozzle, so the medicine can be applied where it will do the most good, and do it quickly. If you are suffering with piles you owe yourself the duty of trying Manzan. Sold by Warne's Pharmacy.

# DRIFTING TOWARDS BRIGHT'S DISEASE

Many people who are neglecting symptoms of kidney trouble, hoping "it will wear away," are drifting towards Bright's Disease, which is kidney trouble in one of its worst forms.

# FOLEY'S KIDNEY CURE

stops irregularities, strengthens the urinary organs and builds up the worn-out tissues of the kidneys so they will perform their functions properly. Healthy kidneys strain out the impurities from the blood as it passes through them. Diseased kidneys do not, and the poisonous waste matter is carried by the circulation to every part of the body, causing dizziness, backache, stomach trouble, sluggish liver, irregular heart action, etc. If you have any signs of Kidney or Bladder Trouble commence taking FOLEY'S KIDNEY CURE at once, as it will cure a slight disorder in a few days and prevent a fatal malady. It is pleasant to take and benefits the whole system.

**How to Find Out.**  
You can easily determine if your kidneys are out of order by setting aside for 24 hours a bottle of the urine passed upon arising. If upon examination it is cloudy or milky or has a brick-dust sediment or small particles float about in it, your kidneys are diseased, and FOLEY'S KIDNEY CURE should be taken at once.

**G. B. Burhans Testifies After Four Years.**  
G. B. Burhans of Carlisle Center, N. Y., writes: "About four years ago I wrote you stating that I had been entirely cured of a severe kidney trouble by taking less than two bottles of Foley's Kidney Cure. It entirely stopped the brick-dust sediment and pain and symptoms of kidney disease disappeared. I am glad to say that I have never had a return of any of those symptoms during the four years that have elapsed, and I am evidently cured to stay cured, and heartily recommend Foley's Kidney Cure to any one suffering from kidney or bladder trouble."

Two Sizes, 50 Cents and \$1.00.
