JORDAN, MICHIGAN, SATURDAY, DECEMBER 20, 1913.

No. 51

OPERATIONS COMPLETED AT THE HOSE HOUSE

Efficiency of Our Fire Department Increased

The work of altering the interior of the City Hose House has been in progress for several weeks and is now complete. Stalls have been built in the basement, with a run-way for the horses leading up on the inside to the main floor where the wagon and apparatus is kept. A room has also been constructed for the driver.

"Ren" Bingham, who has driven for the department in the past, is in charge and several ideas have been worked out that tend to facilitate the "get away" to a fire call. At times in the past, considerable difficulty has been encountered in getting a team to respond promptly, but under the new system the team will be hitched to the wagon and ready to start as soon as the firemen arrive.

Program by St. Joseph's School.

The pupils of St. Joseph's School will render the following program in the High School room on Tuesday afternoon at 2.00.

Address-of-Welcome, Mary Green, Christmas Song, Little Tots, Pantomime, Junior Pupils, Recitation, Margaret Kenny, Little Fairy Waltz, Grace Weldy, Joe's Christmas, Lawrence Lavolette, Recitation, Vera Suprenant, Violin Solo, Lawrence LaLonde, Recitation, Clement Kenny, Instrumental Solo, Wallace Merchant, Reading, Kate Phillips, Violin Solo, Leslie Lemieux, A Boys Complaints, Francis Bashaw, Reading, Catherine LaLonde, Christmas Greetings and Santa's Welcome, Glenn Suprenant, Christmas tree! Santa Claus! Gifts!

All parents as well as all friends and patrons of the school are welcome.

HOW TO TAKE GOOD CARE OF YOUR HAIR.

Nothing spoils your good looks so much as homely hair—stringy, dull-colored, harsh. Nothing adds to good looks so much as beautiful hair—soft, silky, wavy and glossy. No matter how beautiful your hair is now, you can improve its good looks by using Harmony Hair Beautifier. If your hair is homely and ugly now, Harmony Hair Beautifier will make it softer, silkier, glossier, more beautiful in every way. It also makes it easier to put up and helps it to "stay put." Its rich rose odor hides the unpleasant, oily smell of the hair. Harmony Hair Beautifier is rightly named; it beautifies the hair.

Very easy to apply—simply sprinkle a little on your hair each time before brushing it. It contains no oil, and will not change the color of the hair, nor darken gray hair.

To keep your hair and scalp dandruff free and clean, use Harmony Shampoo. This pure liquid shampoo gives an instantaneous rich lather that immediately penetrates to every part of hair and scalp, insuring a quick and thorough cleansing. Washed off just as quickly, the entire operation takes only a few moments. Contains nothing that can harm the hair; leaves no harshness or stickiness—just a sweet smelling cleanliness.

Both preparations come in odd-shaped very ornamental bottles, with sprinkler tops. Harmony Hair Beautifier, \$1.00. Harmony Shampoo, 50c. Both guaranteed to satisfy you in every way or your money back. Sold in this community only at our store—The Rexall Store—one of the more than 7,000 leading drug stores of the United States, Canada and Great Britain, which own the big Harmony laboratories in Boston, where the many celebrated Harmony Perfumes and Toilet Preparations are made.—W. C. Spring Drug Co., East Jordan, Mich.

EMPEY BROS.

...and under good... night the wind... west and rose to a... gale with a blinding snow. Their only recourse was to beach the boat, which they did, working her to a position which they considered safe. Up the beach to the south they found a fisherman's shanty, which they occupied. On their return to the boat they found her adrift and well out in the combers and pounding hard. They again succeeded in getting her out of the heavy seas.

Monday morning the same thing occurred, but this time they secured her safely, but her condition was mighty close to a wreck. All her ribs on one side and three strakes of planking were stove in, and her interior in a badly demoralized condition.

They at once set about patching her up. They had some tools aboard, but the only material they had was what they could pick up on the beach, and the boards from the floor of the boat. Provisions were running low, but with the knowledge that their situation must surely be known at St. James, they waited patiently for relief. Saturday night found them with but the small portion of a ham and three rabbits. Luckily they had a gun and twenty shot cartridges. But the heavy weather continued.

Saturday the tug Margaret McCann came out to lift her nets in that locality and found the party, which preferred to remain with the boat until they could get here. Saturday evening the McCann returned to St. James, and Capt. McCann cabled the particulars. At nine o'clock that night, Roy Ranger and a good crew left this port for Fox Island in the gasoline boat Rhine in fairly good weather. The Lucie A. was slid into the water and taken in tow by the Rhine for her home port.

The crippled boat leaked badly, and in the passage of four hours across the crew worked every minute at the pump and it was only with heroic and exhaustive effort that the boat was kept afloat. When they passed through the bridge the boat was in a sinking condition, and was beached in a safe place. The Rhine had taken with her a good supply of food, which was sorely needed.

But it is all in the work of a fisherman, and the crew of the Lucie A. only speak of it as an incident, and they say they had a good time.—Charlevoix Sentinel.

Death of Mrs. Louis Sandel.

Mrs. Mary Dane Sandel was born in Alma, New York State in 1858 and departed this life at the residence of her son, Edward on State street, East Jordan, Mich., Sunday December 14th, 1913; being past fifty-five years of age. Thirty-five years ago she was united in marriage to Louis Sandel. To this union was born eight children, Edward of East Jordan, Mrs. Julia Lane of East Jordan, Albert of Boyne City, Arthur of Grand Rapids, Walter of Factoria, Wash., Wilbert of Grand Rapids, Clifton of Boyne City and Ernest of East Jordan. Also two sisters, Mrs. Anna Heller of Boyne City, Mrs. Rickey St. John of East Jordan, and one brother, Herman Dane of Otsego, who with the husband and a large circle of friends are left to mourn the loss of a good mother, a loving sister, a devoted wife and a true friend. There are also twelve grand children who will mourn her loss.

She has been a resident of East Jordan for thirty years and during that time has won the love and respect of all, by being a good neighbor and one that had become to be recognized as a "Mother of Israel."

The funeral took place on Wednesday afternoon and the sermon was preached by Rev. T. Porter Beckett at the Methodist Episcopal Church. Interment took place at East Jordan.

Empty-headed men can get full in no time.

Get the blunt man to come right to the point.

...about started north... the alarm... that the... greater... wind was... are filled... it was un... The planing... were... heavy wind, however, carried burning embers from the fire for over half a mile, and several times buildings were ignited. Mill A. received several of the embers and a crew was kept busy guarding that property. Several fell on Main Street. The Argo Flouring Mill was only a short distance from the fire and in direct path of the sparks and flames. That it did not burn is remarkable, a good fire-proof roof was responsible for its being intact.

During the fore part of the fire a locomotive was kept busy saving a number of cars and rolling stock. The fire was under control in about four hours from the time it started.

Will Re-build at Once

Plans are already under way for the re-building of the burned mill, and the cost of this will probably run over \$20,000. We understand the boilers are intact and it is thought the big engine is still usable. This is indeed good news as the plant employs something over forty men and its permanent loss would be a serious matter for our city at this time.

Plans are being made to get Mill A, which is now being operated during the day—in a working condition that will warrant a continuous run of day and night during the remainder of the winter months. If this can be brought about, the men made idle by the fire will have steady employment.

MILITARY BAND'S ANNUAL MEETING.

The East Jordan Military Band held their annual business meeting, Tuesday evening. Several important matters were discussed. It was decided to affiliate with the American Federation of Musicians and a committee was appointed to take up the matter with the state organization. The members also decided to purchase new uniforms at once. Officers elected for ensuing year are: Roy E. Webster, President; Fenton Bulow, Business Manager; Nelson Crandall, Secretary; W. E. Palmiter, Treasurer. Under Director Irvin Hiatt the Band has made remarkable progress as an organization and now stands among the best bands in Northern Michigan. Following the business meeting the band members proceeded to the Russell House where Mrs. E. Newson, the proprietor, served a fine banquet.

NOTICE TO TAX PAYERS

All persons liable for taxes in the City of East Jordan are hereby notified that the tax roll for the State, County, County Road, and School District taxes for 1913 is now in my hands for collection, and the tax can be paid at my store in said city on or after December 10, 1913. If paid before January 10, 1914 there is no additional penalty, but on January 10, 1914 four percent penalty will be added to all unpaid taxes. Dated December 5, 1913. C. C. MACK, City Treasurer.

W. C. SPRING DRUG COMPANY

CHRISTMAS

is almost here and we appreciate how difficult it is for you to know what to select.

Let Us Help You!

We have the finest assortment of Goods we have ever shown and at prices will surprise you. Call and let us help you decide what to give.

See our genuine Persian Ivory Brushes, Combs, Military Sets, Manicure Sets, Mirrors, etc. Also a full line of Silver and Ebony Goods.

STATIONERY, from 15c to \$3 per box.

BOOKS! All kinds, all prices, from the juveniles at 5c each to the finest binding at \$3.00 each. Look over our Books before buying; you will not be disappointed.

BOX CANDY. One of the finest assortments ever shown in East Jordan and every package absolutely fresh.

PICTURES; all prices from 10c up.

Package and bulk PERFUME—the very best of everything. Conklin Self-Filler Fountain Pens; every one guaranteed.

Shaving Mirrors, Jewel Cases, Games, Post Card and Photo Albums, Calendars, Shaving Mugs, Case Pipes, Candle Sticks; in fact we have something for every one.

Agricultural Education

By Prof. M. E. Duckles, Elk Rapids, Mich.

Learn Community Pride

With Agricultural Education

THIRD ARTICLE.

Agricultural education has centered about the desire to get greater yields of farm produce. The problem of increasing and maintaining the fertility of the soil and of developing better grades of fruits, vegetables, and grains, has been taking its share of attention somewhat at the expense of other things upon which the value of the farm largely depends.

Most boys who are taking courses in agriculture are doing so with the thought of some day owning farms themselves. It is most probable, too, that their chief motive is the idea of money-making, as it is with those who enter other professions, for it is to separate the thought of success from that of making money. If true, there is one phase of success that should not be neglected, though there is more than the mere gratification of this ambition. If it is left out after school days are over, never become an operator in education.

It pertains to what we mean by community pride, as it shows why farmers co-operate in a good standard of appearance and decency. Good soil may be estimated by the value of the condition of the care shown in the and implements of the general good of the farm is supplemented by the adjoining farms receive a favorable worth of the popular district—an always carried of every individual in its boundaries. Manufacturers of cantables vie with being attractive objects? Imagine shelves filled with each can bearing the name in black contents: Peaches, berries, and the contents might be added as any to the store, yet how do you would sell in common if the latter bore lithographed and the eye? If, then, the

manufacturers and tradesmen take such pains to please this aesthetic sense of their patrons, why should not the farmer, in a measure at least, try to follow their example?

Professor Warren, in his Elements of Agriculture, speaks of two farm communities lying not far apart that were practical illustrations of this very thing we have in mind. In one community the young men, and older ones, too, we presume, were bent on horse-racing and the gambling that usually accompanies such sport, liquor drinking, Sabbath breaking, and similar pursuits of an unlawful nature; in the other community these things were conspicuously absent, an air of decency prevailed that showed itself in the character of the schools and churches and in the neat appearance of the fields and homes along the way. The difference was striking. But the most remarkable thing about it was that though an expert could hardly see any difference between the two in the general character of the soil, yet the farms of the latter community had an appraisement value of fifty dollars more per acre.

Some one says that a good farm is where a good farmer lives. True; and a good farmer is hardly satisfied unless the farm gives evidence of its value in its outward appearance. Of two farms essentially similar in every respect and lying side by side, the one that has its buildings neatly painted will, in far the majority of cases, sell for the most money. And if both farms present an outward appearance of thrift and good taste the sale value of each is correspondingly increased.

The community pride that shows itself in those things of taste that make for an appreciation of dignity and decency in our mode of living should be taught in all our schools. It is the starting point, the foundation upon which the structure of better rural conditions can be most surely and securely built. It is a form of pride that "classes itself" under the head of common self-respect, which Theodore Roosevelt declares is the greatest of all lessons to be learned. Where self-respect is wanting there is always lacking much else that makes life enjoyable and really worth living. What an opportunity every farmer has, with all the help of nature at his command, to delight himself in the work of the world and add to its common welfare and enjoyment.

is not in every instance fully changed. A gentle disposition in a cow illustrates the remark of some educator who declared that the way to train a child was to begin with his grandfather, for while kindness to the individual cow from its calfhood up may and does do wonders, yet it is not possible to entirely overcome the disposition of the cow herself.

This question is one that should not be lost sight of in deciding whether to buy or raise cows. If we buy them we have to put up with whatever sort of disposition they happen to have, but if we raise our own cows for two or three generations, it is possible to have those possessing a good disposition to start with as calves and then with proper training they will make far better cows than we are apt to get when we buy them.

Raise the Feed on the Farm.

We have often heard farmers give as a reason for their not going into the dairy business further, the statement that they didn't want to buy bran and oil meal in addition to feeding the cows a good share of the grain they were able to raise. They depend upon selling about so many bushels of grain when fall comes and they can't afford to let the cows eat it up. They seem to think that they must raise less grain in order to have time to take care of the cows and that the cows are going to eat up what little grain they can raise. Then too, they have visions of buying load after load of bran and oil meal.

In the first place it is not necessary to let a reasonable number of cows prevent one from raising just as much grain as before. It is reasonable, however, to expect that more grain will be raised on the same number of acres. Then too, by having the cows drop their calves late in the fall it is possible to do the heavy part of the year's dairy work at a season when no work can be done in the fields. When the work of harvesting and handling the grain products is heaviest, the work of looking after the cows can be made lightest.

Then again it is possible to raise such a variety of farm-grown products that it is unnecessary to buy any mill feed at all. Clover or alfalfa for part of the rough feed will allow the feeding of farm grown grains such as corn, oats and barley, with excellent results. An ordinary good cow will return \$2 worth of milk for every \$1 worth of grain she eats and the market is right on the farm. Instead of hauling the grain to town it can be ground and fed to the good dairy cow and the cream can be hauled to town in the top buggy or automobile and shipped with less trouble and greater profit to the farmer. Of course the number of cows to be kept depends upon how much available help there is on the farm, but we believe it is safe to say that the majority of farmers who are now giving little thought to the production of cream could keep more cows than they are keeping with greater profit and with little more work.

GRADES OF HAY

Adopted by the National Hay Association.

Choice Timothy Hay—Shall be Timothy not mixed with over one-twentieth other grasses, properly cured, bright, natural color, sound and well baled.

No. 1 Timothy Hay—Shall be Timothy with not more than one-eighth mixed with clover or other tame grasses, properly cured, good color, sound and well baled.

No. 2 Timothy Hay—Shall be Timothy not good enough for No. 1, not over one-fourth mixed with clover or other tame grasses, fair color, sound and well baled.

No. 3 Timothy Hay—Shall include all hay not good enough for other grades, sound and well baled.

Light Clover Mixed Hay—Shall be Timothy mixed with clover. The clover mixture not over one-fourth, properly cured, sound, good color and well baled.

No. 1 Clover Mixed Hay—Shall be Timothy and clover mixed with at least one-half Timothy, good color, sound and well baled.

No. 2 Clover Mixed Hay—Shall be Timothy and clover mixed, with at least one-third Timothy, reasonably sound and well baled.

No. 1 Clover Hay—Shall be medium clover not over one-twentieth other grasses, properly cured, sound and well baled.

No. 2 Clover Hay—Shall be clover, sound, well baled, not good enough for No. 1.

Choice Prairie Hay—Shall be upland hay, of bright natural color, well cured, sweet, sound, and may contain 3 per cent weeds.

No. 1 Prairie Hay—Shall be upland and may contain one-quarter midland both of good color, well cured, sweet, sound and may contain 8 per cent of weeds.

No. 2 Prairie Hay—Shall be upland of fair color, and may contain one-half midland, both of good color, well cured, sweet, sound and may contain 12 1/2 per cent weeds.

No. 3 Prairie Hay—Shall include hay not good enough for other grades and not caked.

No. 1 Midland Hay—Shall be hay of good color, well cured, sweet, sound, and may contain 3 per cent weeds.

No. 2 Midland Hay—Shall be fair color or slough hay of good color and may contain 12 1/2 per cent weeds.

Packing Hay—Shall include all wild hay not good enough for other grades and not caked.

No. 1 Grade Prairie Hay—Shall include all hay not good enough for other grades.

NEW University

By JOHN

Residence Hall for University Girls

With provision already made for two residence halls for girls, and campaign well under way for a third, the girls' rooming problem will be solved at the University of Michigan. The first hall will be completed when college opens next fall.

The two halls were gifts to the university. One is provided for by a nation of \$75,000 by former secretary of the navy, Truman H. Newberry, his brother John F., and his sister Mrs. Henry B. Joy, of Detroit, in memory of their mother, Mrs. H. Handy Newberry. The second was made by a man who requests that neither his name nor the amount of his contribution be made public.

The third hall will be provided by the Detroit Association of Michigan Alumnae, which is co-operating with local committee on residence halls for women. The undergraduate girls are being solicited for funds and many pledges are being secured throughout the state of Michigan and neighboring states. Voluntary contributions have been received from persons who recognize the need for better rooming facilities at the university, and it is but a question of time before this third hall will be made possible to Michigan.

The Michigan Union.

The Michigan Union, with its present membership of 2,751, is the largest student union in the country. It is estimated that 32,000 persons were entertained at the 400 luncheons, dinners, "gettogethers," "loungers," etc. last year.

The Union Club House was formally opened on November 17, 1907. The first year's membership list contained 655 names. In 1912 a dance hall was added and was first used as a dining room during the seventy-fifth anniversary celebration. Since the erection of this hall, more than 30,000 people have danced in it.

Besides affording a common meeting place for students and members of the faculty, the Union presents the annual student opera, has charge of the annual football smoker, supports employment bureaus, provides rooms for class and society dinners, and fosters traditions and institutions that belong to the student body as a whole. It has outgrown its present quarters, however, and is devoting its every energy to the raising of funds with which to build and equip a new club house.

The thirty-third annual freshman spread was given by the sophomore girls last Saturday night. Senior and junior girls served as escorts for the first year students. This institution is the oldest among Michigan women.

The University of Michigan, although 77 years old, has more living alumni than any other institution of learning in the country. There are 22,000 living men and women who hold degrees from Michigan. In the total number of degrees granted, Michigan holds second place with 31,000. Up to the class of 1912, the Michigan alumni register contained 29,144 names, the last two classes increasing the enrollment to 31,000. Of this number, 622 reside in foreign countries, while 192 are found in national dependencies. The number of persons who have attended the University for at least one semester, but were never graduated, is more than 20,000. More than 46,000 persons have attended the University of Michigan.

Two hundred eighty-seven students have enrolled with the appointment committee as candidates for teaching positions for next year, 201 women and 86 men. Fifteen men and eighteen women have qualified for the positions as athletic coaches.

Professor Henry Hurwitz, of Harvard, president of the Intercollegiate Menorah Association, addressed the Michigan branch of the society Sunday evening. President Hutchins, Professors Wanley and Sadler also gave addresses.

A plan to establish in Ann Arbor a stove factory, and sales offices, for the purpose of employing student labor was presented to the board of regents by Mr. L. D. Smith, owner of the Detroit Fireless Stove Company. This proposal came as the result of the activity of the Ann Arbor Civic Association in the interests of working students. If the plan is carried out, students will be allowed to arrange a schedule of working hours that can be adapted in individual cases to the class room program. Two local concerns have submitted plans to the Working Students' Committee with the same purpose in view. It is believed that these projects will prove highly beneficial to self-supporting students.

Mr. Bernard Noel Langdon-Davies, of London, England, lectured before the student body Tuesday on "International Peace."

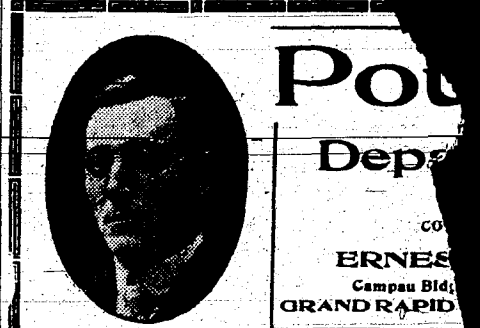

SAYS 10,000 DEER

KILLED THIS FALL.

WARDEN FAVORS "BUCK" LAW.

State Official Declares Such an Act Would Reduce Number of Accidents and Conserve This Splendid Game.

State Game and Fish Warden Oates estimates that 10,000 deer were killed in Michigan during the hunting season or considerable less than a year ago. However, about 60 per cent of the

HOW TO KILL AND DRESS

The most common way of killing turkeys is to hang them up by their legs and stick them with a knife in the mouth, making one or two cuts diagonally across the roof of the mouth, while moving the point of the knife forward from the edge of the skull.

After sticking, the birds are brained by running the point of the knife under the eye or into the roof of the mouth in such a way as to strike the inside of the skull directly between the eyes. The knife may be slightly twisted when the point reaches the brain, the bird giving a characteristic quiver when properly brained, after which the feathers pick easily.

The feathers are usually picked in the following order: Flights, main tail, back, sides, breast, legs, and thighs. Turkeys are usually dry picked and shipped undrawn to market. The long wing feathers bring a good price on the market. The methods of killing and dressing turkeys and chickens are practically the same.

Market poultry is divided into several classes, which vary in different markets. In general there is a class called "chickens," which covers all chickens up to the age when the roosters get tough or "staggy," which is told by the growth of their spurs, which first appear as buttons, and the lack of flexibility of the end of their breastbone or keel. After this age cockerels are usually classed as stags or old cocks. Pullets may be classed on the market as fowls after they begin to lay, but are frequently classed as chickens until they are 1 year old.

Chickens are usually divided into broilers, weighing under 2 1/2 pounds; springs, weighing from 2 1/2 to 3 1/2 pounds; and roasters, 3 1/2 pounds and over. Capons are unsexed males, which are not usually sold until they are over 6 months of age. In picking capons the feathers are usually left on the upper part of the neck and the last two joints of the wing, including the long wing feathers (flights), tail feathers, and 2 1/2 to 3 inches from the tail on the back and a few feathers around the hock joint of the legs. The breast and lower part of the body are picked clean. The comb is small and undeveloped in a capon. In dressing ducks, geese, and turkeys all the feathers are removed, except in the latter two the wing feathers are sometimes allowed to remain.

Selecting Live Poultry.

The bird should be healthy as shown especially by its head points, such as a bright red comb and wattles and a clear, bright eye. A dark-colored comb and wattles; a dull, lusterless eye, and any mucous discharge from or swelling about the eyes or mouth show disease or poor condition. Poultry which are covered with pin feathers, especially if dark colored, are hard to dress neatly. In addition to health and condition, the bird should be well fleshed, which is best told by the amount of flesh on the back, the breast, and pelvic bones of the fowl. The flexibility of the rear end of the breastbone is the best indication of age in the fowl. This should be very soft and pliable in a young bird, and slightly stiffer and easily bent in a rooster or pullet, after which age this bone hardens and becomes large and blunt, according to the age of the fowl. The legs of young birds are smooth and become rougher and scallier as the bird grows older.

Selecting Dressed Poultry.

The points used in selecting live poultry apply to dressed poultry, such as health and a well-fleshed condition. The appearance of the head is a good way to judge the health, age and sex of a chicken. A mature fowl's comb is heavier and thicker than that of a

young bird and on a female of the same breed males are invariably plumper. The best dressed poultry are young and tender, as judged by the flexibility of the rear end of the breastbone. The breast is deep, long, straight and well fleshed. The body is well fleshed over the back and pelvic bones, evenly colored, free from a reddish cast or red spots denoting poor bleeding, and neatly dressed. The flesh should feel soft and springy to the tips of the fingers. Poultry should be starved 12 to 18 hours before being killed so that the crop will be empty.

Fruit Blossoms and Spraying.
Nearly every spring we get a nice little flow of honey from the blossoms of the fruit trees, and this honey is (when we are able to get it in its purity), as fine a honey as there is. The trouble is we very seldom get enough of it that we can get any of it deposited in the surplus apartments. For years after orchardists began to spray their trees though, a great deal of trouble was experienced from bees becoming poisoned by the poisonous liquids used in spraying. Thousands of colonies of bees were destroyed in this way before they found out what the trouble was, and then many fruit growers were unwilling to stop spraying while the trees were in bloom and for a while it seemed that this was to become a serious menace to the business. Then somebody began to spread the news that except for these same bees which they were so ruthlessly destroying the fruit growers would be unable to raise any fruit at all, and then they commenced to sit up and take notice. But it was not until the different states began to pass laws to prohibit them from spraying while the trees were in

bloom that there was any great gain made in this direction. It might be of interest to know about some of the experiments that have been made along this line of the benefit the bees are to fruit blossoms. Of course you know that the agency the bees have in helping the fruit is in fertilizing it by carrying pollen from one blossom to the other. This is done automatically as the bees fitting from one blossom to another soon become covered with this fine pollen dust and it is thus carried from blossom to blossom, which is practically the only way they can become fertilized. Did you ever notice that in years when there was a strong wind from any one direction through the fruit bloom that there usually not be much fruit on the side of the tree next to where the wind came from? The reason of this is plain for bees will always work on the side of the tree where they are protected from the wind most and if the winds hang pretty nearly all the time in one direction and strong enough to bother the bees the blossoms on that side will not be very well fertilized.

(Continued Next Week.)

Dairymen

CONDUCTED BY

E. K. SLATER
234-242 Lyon Street
GRAND RAPIDS, MICH.

With the Blue Valley Creamery Company in charge of the Dairy Information Service

THE DISPOSITION OF THE COW

One of the things to which there is too little attention paid is the disposition and training of the dairy cow. The cow with a good disposition is not only worth more, by reason of the convenience in handling her, but also by reason of the fact that such a cow will be a better milker. Be-

fore being domesticated the cow looked upon man as her enemy, something that was to be feared as was the tiger or other destroying animals and one of the results of her domestication was to change this fear into a trust although we fear that truth would compel the statement that it

was a relative of the owner and not distinctively an employe such as we now him in the factory, and, third, was almost invariably a man who worked on "shares" and thus could not be considered an employe. Net result: Not nearly so many farm hands injured as might be thought; those who were injured were transients; those who were not transients were relatives or tenants or worked on shares. Net conclusion: No necessity at this time for including the pure farm laborer in the provisions of the law. The information which led to the conclusion of the commission was secured by the investigators from the county clerk's records from the files of the newspapers published in the locality, and from physicians in the neighborhood, the latter being in a better position to know than any other class of persons in a community.

"To sum it all up, the compensation law is here to stay. This is no idle thought, as it is substantially evidenced by the fact that over 10,000 employes in Michigan have accepted its provisions, and 18 states already have such a law on their statute books and some six or seven have commissions similar to the one which drew the Michigan act now working on the problem. It is also a safe guess to say that sooner or later the farmer will be brought under the protecting folds. In Europe it seems to have been the custom to first pass the law leaving the farmer without the pale and a year or two later amend the act so that this important branch of our economic life would be brought under its provisions. In fact everywhere in Europe not only have they included the farmer, but they have also brought in the domestic household servant, which worker, while very necessary in the community, is considered as pursuing a non-hazardous vocation.

"The most gratifying experience under the Michigan act has been the intense interest aroused in the safety movement relating to industrial accidents. This interest has been so widespread and the movement for safety so universal that accident reports received in the offices of the industrial accident board have diminished 50 per cent during the 14 months which have passed since the inception of the law. If the same results can be obtained in the agricultural field this feature alone would seem to justify the legislature in bringing the provisions of the act."

Cup of Bouillon Made from a Commercial Bouillon Cube.

Water	97.78%
Salt	1.48%
Plant extract	1.04%
Meat extract	.60%
Fat	A trace

Cup of Home-Made Broth.

Water	95.42%
Fat	1.72%
Meat and meat extractives	1.21%
Salt	1.07%
Undetermined	.57%

Although the cost of making the beef broth, using expensive meat, is about 4-13 cents per cup, the broth contains all the fat of the meat which is a valuable food and which is practically eliminated from ordinary commercial meat extract. Also, the meat, after the soup is made is available for the preparation of hash. The cost would be greatly reduced if the meats are purchased at lower priced markets or if less expensive cuts are used and the home-made broth would still have much greater food value than the bouillon.

A Recipe for Meat and Vegetable Soup.
The bulletin recommends a wholesome meat and vegetable soup which

Petoskey—Mrs. Louis Starmer, aged 70, pioneer of Emmet county, is dead in Resort township of pneumonia. Her husband and five children survive.

Battle Creek—Battle Creek is about to establish a public market where farmers can sell the public buy foodstuffs, avoiding the middleman's profit.

Marshall—Attorney Harry Lewis of Battle Creek was engaged by the county auditing board to audit the books of every justice of Calhoun county for the past six years.

Sandusky—Charles McCullen has returned to his home in this city, acquired by a court of having stolen intoxicating liquors from the Pere Marquette depot at this point.

Bay City—Walter J. Reisy, who operates a barber shop, restaurant and billiard room at Arn, was arrested, charged with running a blind pig.

Albion—A railroad man for years and a prominent Odd Fellows member, Benson E. Manchester, aged 71, at his home here, following a stroke. He leaves a wife, Charles, of Battle Creek.

EVER HIS STATEMENT?

Did you ever hear a friend say: "I have cut it out" after he had recovered from a spree? How many times have you heard that same friend say the same thing, and yet after a while "cut in" again? Your friend was sincere when he "cut it out." He intended to exercise his WILL POWER and QUIT drinking liquor. His "will power" was as strong as yours. But will power cannot replace an amputated leg, or remove malaria from the system. Neither can it repair or readjust the functional disturbances which take place in the cell tissues of the brain and body from the use of alcoholic poison, such as whiskey, rum, brandy, wine, beer, etc.

Your friend was a sick man, suffering from a disease that needed treatment, his "cutting out" and "cutting in" were but manifestations of a diseased condition of the nerve centers and symptoms of that class of inebriety which should be at once treated in the Keeley Institute at Grand Rapids, Michigan, if the victim wishes to escape a drunkard's grave.

For further information address The Keeley Institute, 733-35 Ottawa Ave., Grand Rapids, Mich.

SHOPPING FOR CHRISTMAS.

The time has come when every shop sets forth in smart array All kinds of wares that make us stop And loiter on our way. And as we gaze we think we ought To buy our presents now, And not to wait until we're caught. When time will not allow.

All other years we've waited till The latest minute, and Our slender purses then we'd fill, And rush to beat the band. We never found what we desired; We took what we could get, And wended home all cross and tired— But not this year, you bet.

No surging, pushing, striving through We'll have to struggle in, But leisurely we'll stroll along, The while we spend our tin We'll take our time and make our choice, Select judiciously, And those who get them will rejoice. When they their presents see.

But, after all, there's no great rush, There's yet a week or more, Before there's any awful crush; Oh, yes, there's time galore, Today is—what? Well, never mind, It doesn't matter, I'm For shopping not just now inclined— And then, there's lots of time.

BOUILLON CUBES NOT CONCENTRATED MEAT ESSENCE

Home-Made Broth More Nutritious and Economical Than the Commercial Meat Extracts.
Washington, D. C.—The belief of many people that bouillon cubes are concentrated meat essence—and of high nutritive value, has been shattered by a recently issued bulletin of the department of agriculture which says, that while they are valuable stimulants or flavoring agents they have little or no real food value and are relatively expensive in comparison with home-made broths and soups. This bulletin (No. 27), compares the contents and food value of bouillon cubes with meat extracts and home-made preparations of meat.

The ordinary commercial bouillon cubes, according to this bulletin, consist of from 1-2 to 3-4 table salt. As they range in price from 10 to 20 cents an ounce, purchasers of these cubes are buying salt at a high price. The cubes do contain a small amount of protein (muscle-building material) in addition to their stimulating properties, and the makers of most of the cubes make no advertised claim that they are concentrated beef broth or essence. However, many housewives believe that they are and that they possess high nutritive value, especially for invalids. This is not the case. The fact that the cubes sell for from 1 to 2 cents each, and each cube makes a cup of broth, misleads the housewife into believing that she is securing meat extract cheaply when really she is buying it in an expensive form.

According to analyses of these cubes, besides the common salt which constitutes from 49 to 72 per cent of the total weight, the amount of meat extract ranges from 8 per cent in the poorest brands to 28 per cent in the very best. The third important ingredient is plant or vegetable extract, which constitutes from 3 to 30 per cent. This plant extract is useful because of its flavoring properties but has slight, if any nutritive value. The following table shows exact analyses of ten different bouillon cubes offered on the market.

Cube No.	Source of Manufacture	Water and Salt	Approximate Amount of Meat Present	Approximate Amount of Plant Extract
1—United States	62	5.25	28	4.76
2—Germany	65	9	23	5
3—United States	65	9	23	5
4—United States	67.5	7	17.8	9.7
5—United States	59.2	7	17.8	16
6—United States	49.25	6.75	15.35	25.8
7—United States	53	4.1	14.6	28.3
8—Germany	72	5.5	14	8.5
9—United States	72.5	8.5	8.33	10.92
10—United States	72	8.5	8.17	11.33

Cubes arranged in table in order of content of meat extract.

Substance	Extract Obtained Ounces of Meat for 10 cents.
Best grade bouillon cubes	1/4
Cheapest grade bouillon cubes	1-12
Best grade semi-solid meat extract	1/4
Cheapest grade semi-solid meat extract	1-3
Best grade fluid meat extract	1-5
Cheapest grade fluid meat extract	1-5
Commercial meat juice	1-5
Home-made beef broth	1-10
Home-made meat and vegetable soup	1-6
Home-made meat and vegetable soup	1-2

DUCHESSE APPLE TREES.

A variety of apples that is an early bearer is are thousands of these in Western Michigan and enjoying incomes that range from \$100 to \$750. G. W. Haight of Shelby, Oceana County, reports a latter named amount. The above scene is in the Gustoff, Northport, Leelanau County. There is a between the trees.

will furnish enough for a family of five, at a cost of approximately 16 cents. This may be made according to the following recipe:
Ingredients and Approximate Cost. (Price actually paid by Department Chemist.)
One soup bone, weighing about 24 ounces (1-3 meat)..... 10 cents
After being washed it should be placed in a large kettle with three pints of cold water and heated for three hours when the bone and meat should be removed.
One-quarter of a small head of cabbage, one onion, one carrot, one large potato, two small tomatoes, a little flour seasoning..... 6 cents
Chop these vegetables and add to the soup. Boil the mixture for one hour, thicken slightly with a little flour and season with salt and pepper.

The home-made soup made according to the above recipe contains in addition to meat extractives, gelatin from the bone, some of the food elements in the vegetables, and a large proportion of the fat and meat of the bone.

While the purchaser of semi-solid meat extracts obtains two to three times the amount of meat extract that he does by spending the same money for bouillon cubes, these extracts also are not concentrated beef according to the analyses made by the department's chemist. They contain from 45 to 65 per cent meat extract, 15 to 25 per cent water, 5 to 20 per cent salt, and 10 to 20 per cent of ash other than salt. The cost of meat extracts at retail is 45-cents for two ounces or more.

Fluid extracts of meat are even more expensive than the semi-solid meat extracts, consisting of at least one-half water but selling at about the same price, volume for volume, as the semi-solid extract which contains more than 25 per cent of water.

Commercial meat juice preparations cost from 50 to 75 cents for two ounces of liquid and are frequently merely dilute solutions of the semi-solid meat extracts. When the amount of food actually present in them is considered they are expensive articles of diet. In making them the protein (muscle-building material), which is pressed out of meat and is present in freshly made meat juice is entirely removed by the manufacturer in order to make a product which may be kept a long time without spoiling. Therefore, the most valuable food elements of the meat juice usually do not reach the consumer in these commercial products.

SHORT STATE STORIES

Bay City—D. J. Parrell, a state dairy and food inspector, has made complaint against Dehn Brothers, local butchers, charging them with selling hamburger steak colored with one of the preparations under the ban of the department.

Petoskey—At a meeting of the representative business men of the city it was decided to form a credit bureau as a side issue of the Petoskey Business Men's association. Edward Gross, who has been making a study of credit bureaus throughout the state will be secretary.

First Methodist Episcopal Church

Rev. T. Porter Bennett, Pastor.
10:30 Christmas Sermon will be delivered by the pastor. You are invited to worship with us at this service.
11:45 Sunday School. Let every scholar be present upon this day the Sunday before Christmas.
6:15 Epworth League, Mrs. Agusta Waterman, Leader.
7:00 Special sermon by the pastor. Do not fail to miss this service. The pastor expects to receive at least fifty into the church. If you have not seen the pastor be sure and be present next Sunday night. Good singing. You cannot help but realize that this is a "Home-like Church."
The Revivals closed last Sunday night. The meetings were very successful. The interest was good up to the very last service. There were over sixty persons professed conversion. Last Sunday night service was a platform meeting, when nine men, eight of whom were converted lately gave short addresses relating what led up to their conversion. The Anthem sung by the men in the choir was appreciated by all. The congregation was the largest ever seen in the Methodist church, in a regular service. The pastor Rev. T. Porter Bennett preached every night for three weeks during which time he had the hearty co-operation of his people.
See our line of Fobs, Coat Chains, and Vest Chains. They will please you.

Clark, Wednesday, Mr. and Mrs. Clark invited a number of neighbors and friends to spend the evening to further the acquaintance of our new Minister. Various games were enjoyed until a very late hour when refreshments were served and music rendered by Mr. E. Clark. There were about thirty-one present. Christmas Gifts at Mack's. It would be well to have the balances ready, for there is going to be a lot of late Christmas shopping in village.

South Lake Lodge No. 180 and the East Jordan Military Band to the number of about sixty-five journeyed by special train to Bellaire last Friday evening, where the degree team of the East Jordan Lodge conferred the several ranks of Knighthood, and helped organize the new lodge there. Following the business session, a banquet was served at the Bellaire House. The local delegation returned home about 4:00 a. m.

Marriage licenses were issued this week to Ralph W. Bellows, age 51, of Mt. Pleasant, and Jennie Manke age 42 of Boyne City; T. Leo Carey, age 21, and Marion C. Emrey, age 20, both of Charlevoix; Pardo Light, age 19, of Springvale, and Louise Gleason age 22, of East Jordan; Orval A. Richmond, age 27, of Hartford, Michigan, and Pearl Youlek, age 22, of East Jordan; Alfred Sand, 36, and Blanche Bromley, 38, both of Boyne City.

Harry Peihl, a Lake street barber, was arrested Saturday charged with malicious destruction of property and taken before Judge Hammond, where he was tried, found guilty and after paying the penalty, including damage to the property and costs of trial, was discharged. Some time ago Mr. Peihl purchased on contract considerable goods from B. J. Quick, household furnishings, and after several unsuccessful efforts to collect for same, Mr. Quick finally attempted to take possession of his property. Peihl became angry, used some very forcible language and with an axe began breaking and damaging the goods. At this point furniture dealer called for the interference of the law and the arrest of Peihl was made by Deputy Sheriff George Houghton.—Boyne City Journal.

THE JEWELER.

Cottage Cheese Sandwiches.

Wash good cottage cheese, add high rich cream or butter to make spread easily. Add salt and lemon to taste. Add one-fourth cup of olives or a done-fourth cup of nuts or pecans chopped fine to a cup of cheese. Spread it on good sliced thin and buttered.

DO YOU KNOW THIS?

By turning a cauliflower head inward it cooks more quickly and saves in flavor.

Wash with butter the saucepan in which the rice is cooked; the rice will not stick to the sides and bottom. Books bound in leather may be

shened by using equal quantities of egg and water beaten together. Apply this with a soft flannel cloth and polish when dry.

Wash made into little balls, rolled in egg and cracker crumbs, dropped in hot fat and fried to a deep golden brown is a different way of serving it that appeals to the palate by way of the eye.

Not to salt meat that is to be grilled, as it hardens the fibers of the meat and tends to extract the juices. Salt on the platter just before sending to the table. No meat should be salted uncooked, but after the surface has been seared and the meat partly cooked.

That an easy way to crumb bread is to put it into a muslin bag—an empty salt sack, for instance and then, unless it is too hard and dry, it can be squeezed between the fingers and quickly crumbed without any waste.

ple, and the garment is easy to make. The sleeve may be finished in wrist or shorter length. Ladies waist pattern 9738 cut in six sizes 34, 36, 38, 40, 42 and 44 inches bust measure, and ladies' skirt 9721 cut in five sizes: 22, 24, 26, 28 and 30 inches waist measure, supply the models. Bedford cord, velvet, corduroy, serge, broad cloth, satin, charmeuse, panama or voile may also be used for this model. It requires 7 1/2 yards of 44-inch material for a 36-inch size.

To help another with his burden that was too heavy, to go out of his way to seek another's good, to miss a train that he might right a wrong so common that no one else thought of it, or thought of it only as one that could not be helped, and to do it so unpretentiously and so courteously that better proof could be required than that he was a true Christian gentleman.—Extension.

How to Make Starch From Potato Culls.

The potato clubs which the Department of Agriculture has been organizing to teach the young people of America to grow potatoes were primarily intended for boys. Certain girls, however, became interested, enrolled, and have done particularly well, not only in management of crop but in manufacturing home-made potato starch out of the unmarketable culls of the vegetable.

Each girl when she enrolls in this club work, which now is being taken up by 18,000 young people, is given a recipe for making home-made potato starch. The office of farm management's specialist who is in charge of the potato-club work supplies each new girl member with a printed card which reads as follows:

Equipment Needed—Two cleanvanized tubs, large dish pan, cylindrical grater, and plow-water and wiping cloths.

Take five bushels of potato. Wash them thoroughly by plenty of water and a small brush.

Use one tub for cleaning the other for the grating yourself in a convenient position between the two tubs, with grater in your lap.

Without removing the clean potatoes from the tub into the dish pan, grate them until well-cleaned tub to water. This operation until water into tub upon tubs until nearly full, to saturate every part.

Remove all peeling material from top of tub to stand overnight, settle to bottom, and potato skin will rise to water.

Remove all water from tub in the morning. Dark formation at bottom of the layer of starch.

Pour a fresh starch again; stir all particles of starch stand for about eight hours.

Remove water from layer of pulp, etc. Careful not to waste time.

Continue this process of cleanings and careful st it stand each time—until it is necessary to effect a clarification of starch from the liquid, and sediment of the pulp will usually take four or five days.

Potato starch is a healthful and can be used in at least a dozen different ways for food purposes—making puddings, salads, milk dishes, etc. It is both an easy and economical method of providing a valuable food product for the average home.

The potato water and wastes incident to the process can be easily utilized on the farm for hogs, poultry and stock.

How Aluminum Utensils Are Made.

The processes used in manufacturing utensils and novelties from aluminum do not differ essentially from those used in working up other soft metals. They are casting, spinning and stamping. The first of these is carried out without any special difficulty, except that the heat must be carefully watched to avoid burning the metal. Aluminum fills the molds well, and gives sharp castings. The articles made by casting are those in which considerable thickness is required, and include inkstands, ice-cream dishes, lemon squeezers, spoons for coffee and teapots, spoons, forks, letters and numbers for signs.

Numerous utensils are already on the market in aluminum ware. Funnels, beakers, pitchers, lemon squeezers, shakers and strainers for egg drinks, ice pails, a great variety of receptacles for all sorts of medicinal preparations, toilet accessories, bathroom attachments, and much chemical apparatus formerly made of brass, are to be had. Some alloys of aluminum have also acquired considerable importance, notably the aluminum bronzes, which contain copper, and magnalium an alloy with magnesium. The latter is now used in many balance beams, where it gives excellent service on account of its rigidity, lightness and resistance to atmospheric influences. Aluminum, by itself is very resistant toward most chemicals and solutions. It dissolves easily in both inorganic acids and alkalis, with the exception of nitric acid, which does not attack it when either concentrated or dilute. But organic acids have very little effect on the metal, and any salts formed are harmless.

For cleaning aluminum ware some good polishing powder which contains very little free alkali should be used. The luster and white color can be restored to old aluminum by buffing. If alkalis are used, the color changes to a bluish gray, and the luster vanishes.—The Pharmaceutical Era.

Mark Twain on Advertising.

When Mark Twain in his early days was editor of a Missouri paper a superstitious subscriber wrote to him saying that he had found a spider in his paper and asked if it was a sign of good or bad luck.—The humorist wrote his answer and printed it: "Old Subscriber—Finding a spider in your paper is neither good nor bad luck. The spider was merely looking over your paper to see which merchant is not advertising, so he will know where the other spiders have got their webs up."—Good Advertising.

Emergency Aid for the Sick Room

which is beyond general use. Mend it fairly well, have it washed and ironed and lay it away in a trunk. Nightclothes that are too much worn for constant use may also be added. A roll of paper napkins, soap, absorbent cotton, boracic-acid powder, disinfectants, some contrivance, either gas or electric, upon which water may be heated in the room, and anything else the mother may regard as necessary for an emergency or a continued illness, may all be put in the trunk and forgotten until wanted.

The mended underwear and linen may be burned after use, and a new collection be started. Naturally, we always hope there will be no "next time," but a mother who recommends this granite trunk tells me she has had occasion to use hers twice, and appreciated her previous work at an hour when she was too busy with a sick child to stop to collect the many useful things.

True and Tried Recipes
Fancy Work and Cooking for the Season

CHRISTMAS CANDIES

Chocolate Creams.

Add a teaspoonful of sugar to the white of an egg and beat till the egg is light. Then add a teaspoonful of vanilla and enough confectioner's sugar to make a mixture which can be rolled into balls. Beat the whole until it is very smooth. Make into balls about the size of marble. Spread them in a pan to get stiff and then cover with a chocolate coating.

Maple Nut Candy.

While a quart of maple sugar mixed with a cup of water is slowly cooking on a slow fire butter a shallow tin and cover the bottom with any sort of nut meats. The sugar and water should cook till the usual test is made in water. When the mixture is cooked pour it over the nut meats. Before it hardens mark it into squares.

Cream Peppermint Candy.

Use three cupfuls of granulated sugar and three-fourths of a cupful of cold water. Put both over the fire and boil without stirring until it will form a ball when dropped into cold water. Add a fourth of a teaspoonful of cream of tartar and then remove the mixture from the fire. Let it stand about five minutes before adding about eight drops of oil of peppermint. Beat until a smooth cream is formed. Supposing it were to become hard add a little hot water. Mold into balls and lay on waxed paper to harden.

Currant Drops.

Moisten a quantity of sugar with currant juice. Put into a pan to heat, stirring all the while. Don't let it boil. Add a little more sugar and let it warm with the rest. Drop on paper with a smooth stick.

Vinegar Candy.

If you have two cups of sugar, half a cupful of vinegar and about two tablespoonfuls of butter you can make vinegar candy. Melt the butter and then add the sugar and vinegar. This should be boiled until a little dropped in cold water becomes brittle. Turn on a platter.

Lettuce Salad with Cheese Balls.

Secure head lettuce if possible. Separate the leaves, rejecting all imperfect ones, and inspect carefully for insects; wash in an abundance of water, shaking the leaves up and down to remove the sand, wrap in a cheese

cloth, wring out of cold water and lay on ice till ready to serve; then put it on a soft clean towel, press gently with another, but do not crush. Arrange two leaves on a salad plate and put three cheese balls in the center, pour over all a French dressing. For the dressing use six tablespoonfuls of olive oil, two tablespoonfuls of lemon juice, one-half teaspoon of salt, a pinch of paprika or cayenne. Put all the ingredients in a bottle or small jar that may be tightly covered and shake until thoroughly mixed. Or if preferred put the oil in a bowl, add the salt and pepper, mix well, then add the lemon juice and beat well.

For the cheese balls use cottage, American or any soft cheese. Mash well and season with salt, cayenne, chopped parsley and moisten with cream or melted butter. Mix well and mold into balls the size of marbles, roll in chopped parsley and serve.

A Delicious Cream of Tomato Soup. One quart of canned or fresh tomatoes, one onion, one quart of good meat stock, two tablespoonfuls sliced carrot, four sprigs of fresh parsley, one-half teaspoon fresh or powdered thyme, a small piece of red pepper pod, one tablespoon sugar, two tablespoonfuls of corn starch, two cloves, two grain allspice.

Use good pulpy fresh or canned tomatoes; if canned, air in a flat earthenware bowl for at least an hour before using.

Put the tomatoes, soup stock, vegetables and seasonings in a smooth saucepan and simmer gently for half an hour, then strain and bring to the boiling point; add the corn starch mixed to a paste with a little cold water, simmer for 15 minutes, skim carefully, add salt to taste. Serve in bouillon cups with a teaspoonful of whipped cream or a few grains of fresh popped corn or puffed rice or wheat. Croutons may be served with this soup.

Croutons.

For croutons use bread at least 24 hours old. Cut the bread in half inch slices, then in inch squares. Line a biscuit pan with kitchen paper and lay the bread in it. Put the pan in a moderately hot oven till the bread is well dried, then brown under the gas flame (or in the top of a wood oven). When one side is browned, stir and let the other brown. A golden brown with no burned edges is the proper color for croutons. The inside should be crisp.

Parsley Sandwiches.

Select a fine grained loaf of white bread, slice thin and butter with fresh butter that has been slightly warmed to soften it (not melted), cover with tender parsley, chopped fine, and sprinkled with a little lemon juice, add salt if the butter is not well salted. These sandwiches are very appetizing and are very suitable with chocolate.

CHRISTMAS BELLS

Ring out in joy, O chiming bells!
For in your melody there dwells
The music glad of Christmas-tide,
On every hearthstone far and wide,
And rosy lips, with laughter sweet,
The happy songs of life repeat—
Ring out in joy!

Ring out in hope, O chiming bells!
For your clear voice of patience tells
To waiting hearts who promise yields
No golden fruit of harvest fields,
Whose garnered grain of toiling hand
Lies heaped upon a barren land—
Ring out in hope!

Ring out in grief, O chiming bells!
For in your trembling echo dwells
To saddened hearts a thought of old,
A picture framed in memory's gold,
A vanished face beneath the snow,
A dream of life's sweet long ago—
Ring out in grief!

Ring out in cheer, O chiming bells!
For in your peals a promise dwells
To listening hearts that strive to hear
The future's voice of hope and cheer;
For love and joy will have their birth
As snowdrops spring from icy earth—
Ring out in cheer!

Ring out in peace, O chiming bells!
For Christmas-tide a message tells
To eager souls that bravely wait
And loyal hearts too spring for fate
To crush to earth—oh, listen, then:
'Tis "Peace on earth, good will to men"—
Ring out in peace!

—Clara Lee Puckette, in Washington Post

Our Fashion Department

9764. A Dainty Set of Aprons and Work Bag.

Silk, satin, cloth, cretonne or lawn may be used for the bag, while lawn, mull, linen or silk is suitable for the aprons. Dotted Swiss with "val" insertion, for the Heart Apron, tan linen with a border of cross stitching in colors for the Bretelle Apron, and cretonne in a rose pattern for the bag would develop this set effectively. The Patterns are cut in one size—medium. It requires 7-8 of 27-inch material for the Heart Apron, 2 1/2 yards for Bretelle Apron and 1 yard for Bag of 36-inch material.

9742. A Natty Coat Style for Mother's Girl. Brown broadcloth, with trimmings of green velvet and fancy buttons

was used for this design. Dark green velveteen with collar and cuffs of tan colored ratine would also be effective, or tan and gray reversible coating with gray for trimming. The rolling collar is cut low in front, and the coat is double breasted and sack shaped. The two-piece sleeve is finished with a neat cuff. The pattern is cut in four sizes: 6, 8, 10 and 12 years. It requires 3 1/2 yards of 44-inch material for a 10-year size.

9738-9721. A Simple But Attractive Gown in Russian Style.

Brown serge, with satin messaline for trimming was employed for this design. Green velveteen with burnt orange color messaline for trimming would be equally effective. The waist could be made without the peplum and finished with an oriental girdle of orange messaline. The lines are sim-

business or shopping. Percale, lawn, gingham, chambray, seersucker, galatea, cashmere, flannel or flannellette, may be used for this design. It may be finished with raised or normal waistline, and being cut on simple lines will be an ideal model for the home dressmaker. The gored skirt with habit back is particularly desirable. The right waist front is shaped over the left and the waist is finished with a square collar. The sleeve may be made with a band cuff in wrist length, or with a shaped cuff in elbow length. The pattern is cut in six sizes: 32, 34, 36, 38, 40 and 42 inches bust measure. It requires 5 1/2 yards of 44-inch material for a 36-inch size. A pattern of this illustration mailed to any address on receipt of 10c. in silver or stamps.

Catalogue Notice. Send 10 cents in silver or stamps for our Up-to-date 1913-1914 Fall and Winter Catalogue, containing over 400 Designs of Ladies, Misses and Children's Patterns; also a Concise and Comprehensive Article on Dressmaking, giving valuable hints to the home dressmaker.

The Man He Was

An eminent man had passed away and the whole community seemed moved with grief. During his life he had been a lawyer and a judge, and his brother attorneys passed resolutions of respect; the church to which he had belonged fittingly expressed its sorrow; everyone was saying what a good Christian gentleman he had been. At the funeral there were many; the mourners gathered in groups, discussing incidents and passages of his life. Among them stood a young laboring man, discussing with others, and this was his story: "When I first came to this town I got a job on an ice wagon. It was heavy work, and I was not as strong then as I am now, but I got along all right. One morning I came to deliver ice at the judge's house just as he was leaving the house to catch his train. He hurried past me with a nod. He did not know me, but it was his custom to be courteous to everyone. I was carrying one hundred and fifty pounds of ice, and it was a pretty heavy load. As he passed me he noticed it and turned. "See here, young man," he said, "I can't allow this. Set that down." "I got it down and he took hold of the other handle of the tongs and helped me carry it. 'Now,' said he, 'don't undertake such a load again.' "He had missed his train, and then went over to the ice company's office and told them that the work was too heavy for a boy. His protest resulted in the obtaining of two men on a wagon that carried ice to be delivered in large cakes. I always thought this showed the kind of man he was." "The incident seemed trivial compared with others that were told, some of which were about large enterprises, and conspicuous public services, but there was something about it that made a lasting impression. "I am not sure," said one man, "but that incident best displays his character."

"FAGGED-OUT" WOMEN

Will Find Help in This Letter

Overworked, run down, "fagged out" women who feel as though they could hardly drag about, should profit by Mrs. Brill's experience.

She says: "I was in a very weak, run-down condition. Life was not worth living. I could not sleep, was very nervous, stomach bad, and was not able to work.

"I consulted with one or two physicians, without benefit. I read of Vinol helping some one in a similar condition so I began to take it, and it simply did wonders for me. I gained in weight and I am now in better health and stronger than ever. I can not find words enough to praise Vinol."—Mrs. W. H. Brill, Racine, Wis.

Thousands of women and men who were formerly weak and sickly owe their present rugged health to the wonderful strength-creating effects of Vinol. We guarantee Vinol to build you up and make you strong. If it does not we give back your money.

S. For rough, scaly skin, try Sazo Salva. We guarantee it.

SCHOOL NOTES.

School closed yesterday for a two weeks vacation. The teachers living out of town left this morning to pass the holidays at their homes.

The Christmas exercises which were held by nearly all the grades yesterday were appropriate and filled the children with the true Christian spirit.

Supt. and Mrs. Ganiard entertained the teachers Thursday evening at a six o'clock dinner.

The Board of Education has purchased several new slate boards. These will be put in the rooms during the vacation.

The pupils of the various grades have been doing considerable hard work during the past few weeks. Booklets, pillow covers, baskets, sewing, etc have been completed for Christmas.

The attendance in the high school has been exceptionally regular for the past week or two and tardiness has been materially reduced.

The Eighth Grade had an exhibit of drawing, sewing, and basketing, Thursday.

Radical Price Reduction on Wooltex suits and

Many of these garments came to us late in the season and represent most advanced ideas.

They are so far in advance of the earlier season's styles that they are sure to be the new style when the season opens next fall!

Wooltex garments at these prices are not only the greatest values ever offered, but are the most desirable garments you can buy in this city at any price at this time.

East Jordan, Mich.
No. 196.

County Normal Notes

On Wednesday afternoon of last week Mr. Ball visited the normal room and gave a very interesting talk about the life in the country. The farmers are so busy on their farms that they do not take the time to teach their children how to train their souls. Mr. Ball says the majority of the farmers are in too great a hurry to become prosperous. They would have a better crop of boys and girls if they would take the time to train them.

Com. J. H. Milford visited the normal room for a few minutes Tuesday forenoon.

The manual training students are making charts to use in their schools for their chart classes.

The students have been making book marks and booklets in the drawing class.

The class has been studying beneficial insects in agriculture. Among those that are beneficial are the lady bug or lady beetle, silk worm, honey bees, bumble bees and dragon flies or damming needles. Toads and birds are also found to be beneficial.

The editors for the week are Esther Walker and Willard Howe. Lila Howe is attending to the ventilation and Velma LaCount is the housekeeper.

Rhoda Cliff spent Sunday with Hattie Hamlin at the latter's home, this past week.

The class has been reviewing the work in psychology. An examination was given Thursday and Friday during the period for this class.

Young Women: Number Surprising

The number of young women who suffer with weak back, dizzy and nervous spells, dull headache and weariness is surprising. Kidney and bladder ills cause these troubles, but if Foley Kidney Pills are taken as directed relief follows promptly, and the ills disappear. Contain no habit forming drugs. Hites Drug Store.

Christian Science Church Notes.

Christian Science Society hold services in their room over the postoffice Sunday morning at 10:30; Subject of lesson "Is the Universe, including Man Evolved by Atomic Force?" Sunday School at 12:00 m. Wednesday evening meeting at 7:30. Reading room in the same place open every Tuesday and Thursday afternoons from 2 to 4.

All are cordially invited to attend the services and visit the reading room.

DRAY LINE FOR SALE.

Price Only \$225.

A complete One Horse Draying outfit. Horse and Harness, Dray-wagon and Sleighs; stable and storm Blankets, one good Halter. A good list of patron to buyer. Will sell horse separately if desired. See J. A. NICKLESS, Drayman, East Jordan.

Travel broadens some, but others can remain at home and get fat.

Stage struck girls should think, twice before they try to act.

It isn't half as far from virtue to vice as it is from vice to virtue.

Every man thinks he knows a lot about women until he marries one.

There are just as good compliments floating around as ever were fished for.

Not Beyond Help at 87

Sleep-disturbing bladder, weakness, stiffness in joints, weak, inactive kidney action and rheumatic pains, are all evidence of kidney trouble. Mrs. Mary A. Dean 47 E. Walnut St., Taunton, Mass., writes: "I have passed my 37th birthday, and thought I was beyond the reach of medicine, but Foley Kidney Pills have proved most beneficial in my case." Hites Drug Store.

Wm. Tate
East Jordan, R. F. D. 4

One of the most effective ways for local merchants to oppose encroachments of the mail order houses is to advertise liberally in the local paper. Too many merchants sleep on their oars while the catalogue house comes in and takes a large portion of their trade. They demur at undertaking anything like a thorough system of advertising, contending that the drift to the mail order houses is bound to come; and yet make free complaint over the inroad of the mail order houses into their particular trade. The fact of the matter is, the trade belongs rightfully to them and would come to them if they were progressive enough in inviting it with good live advertising.—Michigan-Tradesman.

Faint heart seldom escapes fair widow.

And some magazine poems are all gas and no meter.

If you would save money, never bet on a sure thing.

Any man who shaves himself is apt to cut his best friend.

Guarding Against Croup
The best safeguard against croup is a bottle of Foley's Honey and Tar Compound in the house. P. H. Ginn, Middleton, Ga., writes: "My children are very susceptible to croup, easily catch cold. I give them Foley's-Honey and Tar Compound and in every instance they get prompt relief and are soon cured. We keep it at home and prevent croup." Hites Drug Store.

Work might be more to our liking if we didn't have to do it.
