EAST JORDAN, MICHIGAN, FRIDAY, SEPTEMBER 21, 1917.

No. 38

THE FAIR'S THE THING

BIG EVENT SCHEDULED FOR THE COMING WEEK.

Excellent Exhibits Assured and Not An Idle Minute on the Program.

The 33rd annual Fair will be bigger and better than ever in every department. Patriotic Day, Wednesday Sept. 26th. Patriotic addresses by Congressman Frank D. Scott and Hon. William A. Norton, prominent Lansing Attorney. Gov. Sleeper will be present if duties will permit. Pole and flag raising after addresses. Patriotic band concert. Free attractions each day.

Dedos Comedy Circus introducing educated pony, educated dogs, trained monkeys, Dynamite, the bucking mule. A cash prize will be given anyone who can stay on Dynamite's back three minutes.

Dare Devil Oliver with diving dog. Dare Devil Oliver performs feats of fancy and spectacular diving into tank containing 52 inches of water. He is assisted in his act by diving dog. Dare Devil Oliver dives from a height of 150 feet, his dog from a height of 50 feet into this tank of water.

Races. A feature of the 1917 Fair will be a revival of the old fashioned county races. An excellent program of races has been arranged, including Chariot Races, Novelty Races, Running Races and Free for all Trot or Pace, limited to horses owned in Charlevoix County. Drivers will be out to win these races and keen competition is assured.

Night Entertainment. Wednesday evening, Sept. 26th, the Citizens of East Jordan have provided a band concert and spectacular fireworks display. Fireworks display includes huge "American Flag" waving in the breeze from a gold staff. "Star of the Union" and "European Battle Effect" and many other spectacular features.

On Thursday evening Sept. 27th a huge rollicking masquerade dance will take place on the pavement. Music to be furnished by an unusually good brass band. Don't miss this as it is the event of the year.

Farmers. Competent, Impartial Judges from out of the County for all departments have been secured. Bring in your exhibits and get the opinion of experts as to their merit. Freight one way will be paid on stock shipped in for exhibition from any point in Charlevoix, Emmet or Antrim Counties.

A prize of \$10.00 is offered to owner of cow producing largest number of pounds of butter fat during the four days of the Fair. Cows must be kept on the Fair grounds. Milking to be made at stated hours and under the supervision of Mr. Mather. Milk will be tested publicly on the Fair grounds at 10 o'clock each morning. Entry of cows for this premium does not bar their entry for other prizes.

Because of enormous crops in Charlevoix County and the desire of the farmers to show the Kaiser that Charlevoix County is doing its part to win the war, an unusually large number of exhibits are assured.

Our Fair Well Advertised.

At the meeting of the business men held in the City Council rooms, Sept. 14th, it was decided to call upon the auto owners in East Jordan to visit the various towns in Northern Michigan for the purpose of putting up advertising matter for the Charlevoix County Fair and the free entertainment to be furnished on the evenings of Sept. 26th and 27th by the business men.

Roscoe Mackey was appointed chairman of the committee and will have charge of laying out the route for the various autos and the securing of autos for this purpose. It is planned to have all autos start from the same place and at the same hour. Each will carry its supply of advertising to the various places as specified by the committee in charge. This is something new for East Jordan and insures that the Charlevoix County Fair and the free entertainment in the evenings will be well advertised.

In the average man's life the longest day is the one just before pay day.

A pessimist likes a thing he can't enjoy and an optimist enjoys a thing he can't like.

When you lose a friend by lending him a small sum of money you get the best of the bargain.

Patriotic Day a Big Event

Able Addresses, Fine Band Music; Flag Pole Raising, at the Fair Grounds.

Big Display of Fireworks and Band Concert in the Evening.

Wednesday, Sept. 26th will be Patriotic Day at the Charlevoix County Fair and an excellent Patriotic program has been arranged by the management. Patriotic addresses will be given by the Hon. Frank D. Scott, Congressman from this District and Hon. Will A. Norton, an Attorney, now practicing in Lansing, and formerly a resident of Charlevoix County. Gov. Sleeper has promised to come on that day if it is all possible for him to get away. At the present time he is out of Lansing on business connected with the war and on his return will let the Association know definitely whether he will be present. Another prominent state official has been invited to address the patrons of the Fair and may possibly be present but is unable to give a definite answer at this time.

The Patriotic exercises will consist of a Patriotic band concert, Patriotic addresses and a pole and flag raising. The pole will be one of the highest in this section of the country and will be raised at the conclusion of the addresses. A 12 1/2 by 25 foot flag has been purchased and will be flung to the breeze at the conclusion of the pole raising.

In the evening the business men of the City of East Jordan have provided a band concert and a spectacular display of fireworks. The fireworks include eight set pieces. Among these set pieces are four Patriotic designs, "Welcome Americans," "Star of the Union," "American Flag" and "Good-night Americans." "Star of the Union" has an actual fire frontage of 30 by 30 feet and shows a great star of fire outlined in red, white and blue fires with magnificent golden sunburst points extending 12 feet up from each point of the star. "American Flag" is a grand feature showing "Our Flag" flowing to the breeze and waving from a golden staff. The "Welcome Americans" and "Good-night Americans" designs have each letter outlined with fireworks in many colors.

The other set pieces consist of forest fires with a fire frontage of 35 by 35 feet, "Mystic Wheel," consisting of revolving wheels embellished with beautiful color, "Fox Trot," made up of rapidly revolving wheels and embellished with bands of color surrounded by battery effects of huge stars and the "European Battle Effect" being a veritable battle with a great candle bombardment with banked mines and filling the air with brilliant flashes and loud reports. This is an entirely new design and has never been shown in this section of the country. The balance of the fireworks display is made up of rockets, bombs, torches, golden fountains, European war mines, etc. The fireworks display will take place on the lake. This will be a new and interesting feature and the reflections in the water will undoubtedly enhance the beauty of the display.

Commission Proceedings.

Regular meeting of the City Commission held at the commission rooms, Monday evening, Sept. 17, 1917. Meeting was called to order by Mayor Cross. Present—Cross and Gidley. Absent—Crowell.

Minutes of the last meeting were read and approved.

On motion by Gidley, the following bills were allowed:

Ayers and France, reprg wells \$ 300.00
Argo Milling Co., cement 1614.01
Dan E. Goodman, mdse 11.03
Gregory, Mayer & Thom Co., account books 36.00
Chicago Flag & Dec. Co., flag 3.78
Joseph Zoulek, repair work 28.80
A. E. Cross, salary 50.00

On motion by Gidley, the chief of police was authorized and instructed to appoint the necessary special police officers for the maintenance of good order during the Charlevoix Co. Fair.

The following resolution was offered by Commissioner Gidley, who moved its adoption; seconded by Commissioner Cross:

Resolved, that the opening of Wilson street from Echo street to Lake street is a necessary public improvement, and that this commission intends to

make the same. Further

Resolved, That due notice of the opening of said street be given the M. C. R. R. Co., across whose right of way said road must pass, of the intention of this commission in making of said proposed improvement, and that said M. C. R. R. Co. be requested to co-operate with this commission in the making of the same, and that the clerk give such notice by the mailing of a copy of this resolution to said M. C. R. R.

Adopted by the City Commission of the City of East Jordan on the 17th day of September, A. D. 1917 by an aye and nay vote as follows:

Ayes—Cross and Gidley.
Nays—none.

On motion by Cross meeting was adjourned.

OTIS J. SMITH,
City Clerk.

SPECIAL FREE ENTERTAINMENT FOR FAIR VISITORS

At a large enthusiastic meeting of the East Jordan Board of Trade-Friday evening at the City Council rooms in East Jordan, to formulate plans for extensive special free outdoor entertainment of County Fair visitors on the street of East Jordan, during Fair week, after the soliciting committee reported an unusually large cash donation for this purpose, the following special features were decided upon.

On Wednesday, Sept. 26th free band concert and magnificent fireworks.

Thursday evening, Sept. 27th grand Masquerade dance on the City pavement, band to furnish music. Programs to commence at 7:30 p. m. The details of this splendid free entertainment will be supervised by the following committee chairman, who will select their assistants.

Music, D. L. Wilson; Fireworks, Charles Coykendall; Dance, Herbert F. Reid; Street Lighting, A. E. Cross; Decoration, F. G. Gruber, R. O. Bisbee and Noah French; Privileges, James Gidley; Advertising, Roscoe Mackey.

Attend our County Fair every day. That is both a privilege and a duty. Then round out your day of enjoyment on Wednesday by listening to delightful music, by witnessing a magnificent, pyrotechnic display, and on Thursday, by taking part in the grand masquerade dance on the city pavement. The business men of East Jordan invite you. You will not be disappointed. Come.

Left For Camp Custer

Charlevoix County Boys Ordered Out This Wednesday.

Below is a list of our drafted boys who were ordered into service this week, leaving for Camp Custer, Sept. 19th. The list is furnished The Herald by County Clerk Lewis:

Name	Address	Order No.
Leroy Merton Chew	Boyne City	55
Frank W. Drayton	"	79
Edward Erber	"	81
Don Sanborn	"	96
Carl Lester Agan	"	104
Orie Lowell Chance	"	114
Paul J. Crouterfield	"	122
Archie Adams	"	134
Ernie C. Herman	"	178
Arthur F. Speltz	"	207
Lewis Warren Tooley	"	224
Timothy Whitley	"	239
Edward Jacob Herman	"	279
Louis Eugene Gravelin	Charlevoix	210
Edward Eber Durance	"	158
Albert N. McClanathan	"	169
Spid Krulik	"	202
Daniel Cannon	"	219
Arthur D. Nettleton	"	221
Lawrence E. Terry	"	231
Joseph Brook	"	289
James Henry Mastin	East Jordan	127

GERMANY PLANS FIGHT TO CAPTURE TRADE AFTER WAR

Enemy Mobilizing Industrial Resources For World Commerce War.

BUILDS MERCHANT SHIPS

Going Over to Peace Commission Formed to Devise Means to Win Back Export Trade Lost Through Conflict of Arms.

Contrary to the general belief, Germany, during the past three years, has not confined her shipbuilding activities to the turning out of submarines and other war vessels. Since the outbreak of the war twenty-eight new freight steamers have been constructed in her shipyards. It is also worthy of note that German steamship offices throughout the neutral world are being kept open for the immediate resumption of business and that recently the clerical staffs in these offices have been restored to full from half pay.

To the American manufacturer and his employee there is a world of significance in these correlated statements of fact, indicating, as they do, the extent to which Germany is prepared for the campaign of industrial reconstruction and the wholesale conquest of world trade markets which she plans to undertake the moment peace has been restored. Germany is making ready for the economic war just as carefully as she prepared for the present conflict. Just as every man, automobile, horse and factory in the empire was indexed and given place in mobilization for actual war, so have certain men, industries and raw materials been indexed today and given their place in the mobilization for German export trade with the coming of peace.

Other Nations May Follow Suit. Nor is it to be supposed that the other big nations will be behindhand in bidding for world trade after the war to make up for the tremendous trade losses sustained through the conflict. Under pressure of national danger the governments in these countries have come into closer touch with their manufacturers and, having learned the principles of industrial mobilization, are in a position to aid those manufacturers in times of peace.

Germany's plans for the trade war may go astray just as some of the features of her military program did during the past three years, but a recital of the active steps she has taken toward economic and industrial reconstruction will serve to emphasize the need in this country for industrial economy and efficiency unhampered by strike between wage earners and wage payers and unwise business laws.

To begin with, Germany is not on the verge of bankruptcy. She has no huge floating international debt, and her war loans are secured several times over. She has not put such a pressure on her mines that they will be overworked when peace comes, nor has she exhausted her other resources. Unless conditions are very radically changed by the outcome of the war she will be in an excellent position to wage the fight for the recovery of the \$5,000,000,000 worth of world trade she lost through the war.

Plenty of Goods For Export. When the war ends, Germany will have plenty of goods in a few lines in which she enjoys a superabundance of raw materials to throw back upon the world markets, and she will be able to sell these goods at a very low price. There are factories in Elberfeld, Remscheid, Frankfurt-am-Main and Dusseldorf today turning out a steady flow, not for the purposes of war, but for peace.

Germany's preparations for the reconstruction period are characteristically thorough. The imperial government has appointed "The Friedensbergau Kommission," literally the going over to peace commission, which is headed by Senator Stahmer of the Hamburg parliament. Associated with the latter are the most prominent German captains of industry and bankers. The plans so far evolved by the Stahmer commission for the recapturing of Germany's \$5,000,000,000 worth of lost trade are based upon the principle that when peace comes Germany must export cargoes of goods that far exceed in value the class of goods she imports. That will enable her to establish a substantial trade balance.

In her export activities she will lay most stress on lines such as chemicals, dyestuffs, hardware, cutlery and "kitchenknacks," for her available raw materials favor the abundant production of these articles. They will have to import copper, nickel, cotton and animal fats and American machinery. On any other commodity it is almost a certainty that the Stahmer committee will recommend prohibitive import duties, especially on manufactured articles.

If Germany is to compete successfully for world trade, however, it is vital that essential that costs be kept down in the manufacture of the chosen articles of export. The imperial order has gone forth that the exporter's burden be lightened, and all sorts of concessions will be made him in the form of preferential railroad rates and cheap inland waterway tolls and ocean freight rates. — Industrial Conservation, New York.

BEAUTIFUL DRAPE.

Evening Gown of Best Distinction is This One.

FORMAL ELEGANCE.

Chantilly lace draped to give a winged sleeve effect here veils a foundation of coral colored satin, caught up in front with a rose which matches the one in the corsage.

STAIN REMOVERS.

How to Bring Ugly Marks Out of Pet Linens or Garments.

For black ink on any white goods, wet with hot oxalic acid (poison). You may need more than one application if the cloth has been washed with soap several times. This will also remove iron rust.

Perhaps you would like to know how to remove ink or iron spots on fast dried cottons or woollens. Citric acid, cautiously and repeatedly applied will remove them.

To remove mildew from any white cloth stir one ounce of chloride of lime into a quart of cold water. After it has settled two or three hours pour the clear liquid off into a bottle, and it will be ready for use. Dip the mildewed spots in the liquid and let dry. If one application does not remove the stain entirely, repeat the process. Rinse in clear water.

To clean grease from wool or silk apply a fluid made by dissolving two ounces of white soap and one-half ounce of borax in a quart of warm soft water, or rainwater is good. Pour a small quantity into a bowl, add the same amount of water and sponge the goods with it. After it is clean sponge with clear water and hang up to dry. Spots of paint, grease, pitch or oil may be removed from silk or linen by rubbing with purified benzine applied with a cloth or sponge. To destroy the odor of benzine add a little oil of lemon.

Fruit stains may be removed from clothing by pouring boiling water through them; ink spots by soaking in sour milk and afterward rubbing with a piece of lemon on which some salt has been sprinkled. Ink may also be removed from white linen by dipping the spots immediately into pure melted tallow; then wash out and the ink will have disappeared. The above is for fresh stains.

Remove tar spots by putting butter on them and then wash out the grease spots with soap and water.

To remove iron rust from clothing mix a teaspoonful of oxalic acid (poison) to three tablespoonfuls of hot water and apply repeatedly.

Freckle Lotion.

Lemon juice is good for removing freckles on the hands or face. It is a mild bleach and will not harm the skin. Buttermilk is also good. Try the buttermilk or lemon juice for about a month, applying daily, and then if the freckles are stubborn and will not come off try the following: One-fourth ounce of carbonate of potash, one-eighth ounce of chloride of soda, eight ounces of rosewater and two ounces of orange flower water. If you freckle easily never go out in the sun and wind without protecting your face.

Current Ice Cream.

Few housekeepers realize that an excellent ice cream can be made with currants. Mash one scant quart of cherry currants, heat to the boiling point, cook for three minutes and add sufficient sugar to make quite thick. Simmer for five minutes, then strain as for jelly. Have in readiness one pint of boiled custard, also sweetened. When the fruit liquid is cold beat into the custard gradually with half a pint of stiffly whipped cream. Turn into a chilled freezer and freeze slowly as for ordinary ice cream.

A Cooking Trick.

When preparing scalloped corn, oysters, etc., roll cracker crumbs fine and stir in a pinch of baking powder before using.

HOW A DESTROYER EVADES U BOATS

Speed and Skillful Handling Keep Submarines Wary.

REPORTER SEES ATTACK

Torpedo Missed Its Mark by a Scant Six Feet Swarm of Fast Patrols Making It Increasingly Perilous For Germans to Show Themselves Above the Surface.

Just how a British destroyer acts when attacked by a submarine was unexpectedly demonstrated to a correspondent while traveling on one of the modern oil driven torpedo boat destroyers from England to France.

The correspondent had been taken aboard the destroyer for the purpose of observing British methods of combating the submarine menace, when the boat was suddenly attacked by a U-boat, a torpedo missing it by a scant six feet, thanks to the vigilance and quick action of the crew.

The destroyer was one of a certain number which were conveying in the usual manner some large transports carrying British troops to France. The group of ships was halfway across the channel when suddenly one of the look-outs spied a pair of periscopes rise for a moment a few inches out of the water a half mile away. They were gone the next instant, but almost before they had gone came the shout, "Submarine on port bow!" accompanied by a shrill call of warning from the destroyer's whistle and the fluttering out of the flag which notified every other ship in the convoy of the enemy's presence.

Guns Brought to Bear.

On every ship things began to happen more quickly than the telling. Guns were swung in the direction from which the periscope had been seen, ready to speak if the periscope appeared again. Torpedo tubes likewise were swung into line, and the numerous anti-submarine devices along deck were in the hands of their skilled expert crews.

But even while this was being done came the torpedo, plainly visible from the deck, its gleaming brass body glistening in the bright sunlight, its propellers pushing it at express train speed straight toward the destroyer. Something was wrong with the mechanism of this particular torpedo, for it should have traveled twelve or fifteen feet below the surface. Instead, it came bounding along in plain sight, now and then leaping out of the water, like a flat stone made to skip over the surface.

Even thus it might have found its target but for the presence of mind of the sixty-year-old coxswain. He had been first to sight the periscopes and had rushed immediately to an emergency lever, whereby he instantly stopped the port engine, thus swinging the ship with a lurch to the left. The torpedo whizzed through the water six feet behind the stern of the destroyer, its gradually lessening speed as it sank into the swirl of the engine indicating that its possibilities for mischief were nearly done.

Except for the coxswain's action in twisting the ship from its course, the missile would apparently have made a square hit in the stern magazine. Meanwhile the wireless was at work notifying the hundreds of patrols in all directions that the enemy was near. "We sighted a submarine on the port bow, just off blank buoy, 2:08 p. m. Torpedo passed just behind our stern, missing us. We are proceeding with our convoy," said the captain's message.

Many Vessels Quickly in Pursuit.

It was caught simultaneously, ashore and afloat, by a hundred vigilant wireless operators. The destroyer's captain, according to his orders, must not leave his convoy to seek out and attack the U boat. Others would attend to that. Already they were gathering for the chase—trawlers, chasers, drifters, destroyers. Even a dirigible airship far off on the horizon had caught the wireless call and with the quick turn of a seagull was swooping down to the pursuit.

The transports and destroyers, although fairly confident that the U boat would scarcely dare show herself again, even for a pot shot, were nevertheless taking every precaution. Every ship was at full speed, oil burning destroyers constantly protecting their charges.

The whole attack occupied bare seconds. Convoy and charges were out of range in a few minutes at the most. Nowhere had there been the slightest panic or flurry, but movements of men and ships made with almost automatic precision and speed. The efficiency of the British naval man is the efficiency of clockwork. Every cog knows its place. There is no meddling, no clashing, no interference, but a confident rapid efficiency which somehow demands the use of the adjective "deadly."

Twenty minutes later the transports were safe in their port of destination, and the destroyer convoy was off again, thirty miles an hour, down the coast to its next appointment.

Meanwhile the business of seeking out the enemy was going on in the fleet of submarine hunters which had gathered around "Blank buoy." Just how the work was done and just what was the result it is not permitted to tell.

Tone Quality in Music.

Tone quality is a great factor in music. Vibrations in their multiples and relations determine tone. Various instruments vary in tone quality just as does the human voice. A bell, once cast, remains the same in tone, somber or clear, to the end of its usefulness. A violin is more than a bell, and on fine violins the most subtle nuances of tone quality can be produced. The higher the harmonics, or overtones, the higher the multiples, and the more elaborate and delicate the combinations the more exquisite the tone quality of the instrument.

The human voice is greatest in tone quality, excelling the instrument, because the singer's harmonics are based not alone upon physical proportions, but also upon the heart and soul of the individual.—Exchange.

Coveted Feathers.

Mamo is the name of a beautiful bird of the Hawaiian Islands, now believed to be extinct, having been destroyed for the sake of its golden yellow feathers, used in former days to decorate the state robes of chiefs.

The coveted feathers of the mamo bird were a small tuft about an inch long beneath each wing. The royal cloak of the Hawaiian King Kamehameha I., made of these rare feathers, was four feet long and eleven and a half feet wide at the bottom. This cloak of mamo tufts is said to have been buried with one of the later Hawaiian kings. The plumage of the mamo was generally black, excepting the lower back and parts of the wings, which were yellow.

Tropical Rains.

Tropical rains are of relatively short duration by reason of the small number of cyclonic storms in the tropics, and this duration is fairly uniform throughout the year.

The heaviest general rainfalls in Porto Rico are associated with West Indian hurricanes. The historic hurricane of Aug. 8, 1899, precipitated rainfall equivalent to 1,118 tons per acre.

Dorothy Dodd SHOES

You will not be at all conscious of your feet if they are encased in Dorothys.

Try them and see for yourself. This model is one of the very best sport shoes we have ever sold. It's rather exclusive, too.

CHAS. A. HUDSON

This Monster Does Exist.

The dingonek is a huge, unclassified aquatic monster. It resembles in many of its characteristics the extinct dinosaur, a huge reptile of the Mesozoic period, fossils of which have been discovered by paleontologists in the sandstone strata both of the African and American continents.

It lives in Lake Victoria Nyanza and its numerous tributaries; and there is no record of the monster having been seen in any other part of the world. Whether it is a descendant of one of the huge prehistoric saurians that has by a process of adaptation—living as it does in impenetrable regions far away from the encroachments of civilized man—continued with but slight modifications through prodigious ages to the present time, or whether it is an unclassified reptile or amphibian, it is equally impossible to say, as no specimen exists either of its bones or of its skin. That this monster does exist, however, there can be no particle of doubt, as the testimony of authoritative eyewitnesses cannot be reasonably discredited.—Wide World.

Do and Think.

If you wish to be or do anything great in this world you will find every hour and every day an opportunity in some way. If nothing else the lull in routine is opportunity to study up for future reference and use.

If your mind is full of plans and ideas for carrying them out you can make almost any situation or circumstance work in to help you.

It is not so much how you go at a thing as to get at it.

Begin by doing something. Do and think at the same time. That think will help in the next do, and by always doing what you know how to do, first, you will find the next step easier.

It is not the talkers and the arguers who accomplish the most in this world.

A Touch of Nature.

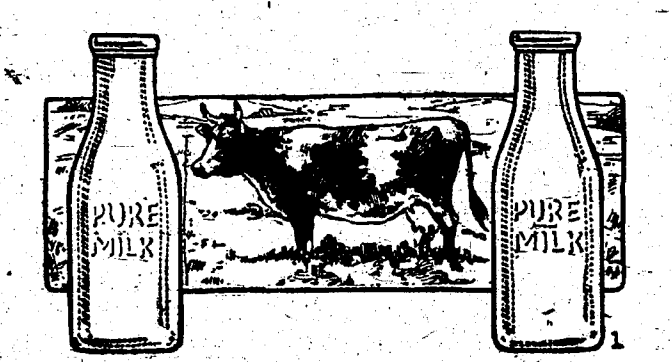

Just a dirty little yellow cur! I called him homeless until I heard a dirtier little urchin yelling, "A w. gowan home!" and pelting him with stones.

The youngster swore, and I felt sorry for the dog. I wanted to wring the urchin's neck and save the dog. Just as I was about to put my thought into action a big black limousine came swerving down the street. The child darted before it, grabbed the little yellow cur to his heart, and the two came rolling from beneath the whirling wheels. As I helped them from the gutter the boy was moaning.

"Where are you hurt, boy?" I asked excitedly, turning him around on his sturdy bare legs.

"Dey didn't hurt me—but—dey dern near got my dog!" wailed the urchin between dry sobs.—Columbus (O) Dispatch.

A good action is never lost. It is a treasure laid up and guarded for the doer's need.—Calderon.

For Your Health's Sake Drink More Milk

Beginning today order twice as much milk as you have been getting. In no other way can you buy more health and at the same time save money.

The average family must cut down the food bills. Why not, then, buy milk at a low price rather than some other foods at exorbitant prices?

One quart of milk equals:—

- 8 eggs
- 3 lbs. fresh codfish
- 3-5 lb. of ham
- 2 lbs. of chicken
- 3-4 lb. of round steak
- 4-5 lb. of pork chops

When people come to properly understand the real food values in milk there will be much more of it used.

We want to impress upon you especially that our milk is good milk. It has that perfect flavor that makes milk-drinking a pleasure. It is produced and delivered to you under absolutely sanitary conditions.

McCOOL & MATHER

PHONE 29

THIS BIG BABY BOY PUZZLE TO DOCTORS

Not Yet Three Years Old, He Weighs 100 Pounds.

Philadelphia.—A 100 pound baby, two years and nine months old, who as a pastime moves furniture with the ease of a piano mover and who eats as much as two adults at each meal is baffling science.

Doctors from near and far have studied him. He has been X rayed and examined. They cannot find anything abnormal about him except his weight. They cannot explain his growth. His enormous weight is not due primarily to fat, because his bones are as large as those of an adult five feet eight inches tall and weighing 154 pounds.

The baby is Billy McCarthy, son of Mr. and Mrs. W. E. McCarthy. When he was born, Aug. 23, 1914, in New York city he weighed nine pounds and twelve ounces.

He immediately began to gain at such a phenomenal rate that when he left the hospital with his mother twenty-one days later he weighed thirty-six pounds. A three-weeks-old baby weighing thirty-six pounds was an unheard of thing even in New York city. He kept right on gaining until at nine months he weighed eighty-nine pounds, and now, although he will not be three years old until Aug. 23, he stands three feet six inches in his stocking feet and weighs 100 pounds.

RUSSIA'S GREAT NEED TODAY IS LOCOMOTIVES

Expert With Muscovite Mission
Says 1,000 Are Necessary
to Move Idle Cars.

Washington.—"Locomotives, locomotives and still more locomotives," are the fundamental needs of Russia, according to Professor Lomonosoff, railroad plenipotentiary with the Russian mission. "Quite frankly I can say to you, our American friends," he said, "give us locomotives and we shall give you military success."

Russia needs at once 1,000 ten-wheel American locomotives to keep the present idle cars in operation, another thousand, with a proportionate number of cars, to free the congested freight terminals, and another 850 annually to meet the deficit between Russia's manufacture and her needs for renewal and new construction. The United States, the professor said, is Russia's hope in this huge program, and negotiations are now in progress which are most promising.

"I must frankly tell you," Professor Lomonosoff said, "painful as it may be for me to make such admissions, that the Russian railways are now in a most critical state. Heroism can do nothing when there is a lack of munitions and food. And only a sufficient number of locomotives can guarantee our armies transport facilities for such supplies."

The Siberian railroad, he said, is in splendid shape for the immense task put upon it. Coal is available and adequate sidings have now been completed.

Turning to the main issue, Professor Lomonosoff said:

"Present conditions on railways in Russia are nothing but an inheritance from our shortsighted old government. Two-thirds of all our railways are owned by the state, and to justify itself from the true reproaches of the duma that our railways are uneconomically managed the old government decided to raise their revenues."

GIRL GETS EDUCATION.

Though Confined at Home, She Studies and Succeeds.

Yates Center, Kan.—Pluck and determination are making an education possible for Margaret Collins of the Plum Creek district under conditions that would have discouraged most children.

More than a year ago Margaret fell on the ice and has not been able to attend school since the accident. The teacher in this district, Fred Bayer, boarded at her home. Margaret studied during the day and recited at night. She passed all of the examinations, received a county diploma and is planning to go on with her education.

Eagle Stole First Papers.

Greeley, Neb.—Lawrence Maer is searching over Greeley county for his naturalization papers. An eagle took the document from his coat while Maer was working in a field. Maer has petitioned the naturalization department at Washington to grant the clerk of the district court here permission to reissue the papers.

+ UNIQUE MATCH FOR
+ RED CROSS BENEFIT +

Philadelphia.—Orville Smith of Lewistown, Pa., captured a three-foot blacksnake the other day. He carried his prize to town about the same moment that "Red" Jacobson came along with a six-foot blacksnake. Orville christened his reptile Jess Willard, while "Red" came back with the moniker of Jack Johnson for his. Naturally this suggested belligerency, and they agreed to match their captives for the benefit of the Red Cross.

CITIES THAT NOURISH INDUSTRIES THRIVE

Citizens Should Take Interest in Politics to Insure Encouragement of Manufacturing Enterprises.

"The thriving industrial cities of today are those that seek to do the best for their industries," says a prominent Milwaukee manufacturer. "Even the practice of giving factory sites free to manufacturers as an incentive to locate in the smaller communities is still in vogue.

"There are many towns well located with respect to railroad facilities and waterways, and also convenient to good labor markets, that are seeking industries, yet, despite this competition for industries, there are many cities that are actually hostile to them. Some are unwittingly driving away the support of the populace. It can only result in industries leaving, and if industries continue to leave what is going to become of the population?

"In my opinion, it rests with the people. The people themselves should take a greater interest in their town councils, in their state legislatures and in their national government. Then much of the unfair, unreasonable class legislation could be prevented. As it is, the professional politicians often have full sway."—Industrial Conservation, New York.

BRITISH INDUSTRIAL ALLIANCE

Employers and Employees Form Novel Co-operative Body.

What is known as the National Alliance of Employers and Employed has been organized in England. The object as expressed in the constitution adopted at a meeting held at 64 Victoria street, London, E. W., on May 22, is "to secure the active co-operation of employers and employed in the discussion and treatment of questions affecting labor and employment, with the special object of securing that these should be dealt with before they have reached the stage of acute controversy." A resolution was passed urging the government to abstain in future from action affecting the conditions of manufacture and employment until the joint advice of employers and employed has been obtained and from interference in industrial disputes until every form of direct negotiation has been exhausted.

Besides labor representatives the following were among those present: Sir K. Crossley, Crossley Brothers, Limited; Sir V. Caillard, Vickers, Limited; Sir A. Firth, Firth & Sons, Limited; F. Gilbertson, Pontardawe Steel, Tinplate and Galvanizing works, and Sir Robert Halford, Halford, Limited.—Industrial Conservation, New York.

REST PERIODS CONSERVE ENERGY OF WORKERS

Permitting Laborers to Become Fatigued Cuts Down Production.

Employers of labor have found that output may be increased, not by working a man when he is tired, but by giving him an opportunity to rest. An hour's rest for the workers may literally be worth far more to the employer than the same time spent in labor.

At a large munitions factory men engaged in the heavy work of molding are required by the management to rest fifteen minutes in every hour of work. The manager was satisfied that this was an arrangement good for the men and for the output. But the men objected to this long spell of rest in each hour because the work was piecework and they thought the production would be lessened by it. The manager accordingly found it necessary to set a foreman to watch and to make the hourly rest compulsory. When this was done the output per hour was found to be actually increased.

Proper attention to rest will prevent a large part of diminished capacity from industrial fatigue and prevent waste due to imperfect work.—Industrial Conservation, New York.

BRIDGING THE CHASM.

Human Note in Industry Bringing Employer and Employee Together.

Labor and capital are naturally partners, not enemies. Friction between these two important elements in industry is unnatural, but the personal relation in industry, entered into in the right spirit, gives the greatest promise of bridging the yawning chasm which has opened up between employer and employee.—Industrial Conservation, New York.

Industry's Big Gain.

Value of manufactures in the United States was \$24,846,338,000 in 1914, the United States census bureau reports in announcing its preliminary statement of general results of the latest census of manufactures. In the five year period from 1909, the date of the previous census, manufactures increased \$3,574,271,000 in value, or 17.8 per cent. In the period since the 1914 census manufactures have made rapid increases, but no estimate of their value for this year has been made by the census bureau.—Industrial Conservation, New York.

Came to Aid of Government.

A very large part of the credit for the success of the \$2,000,000,000 Liberty bond issue is due to the manufacturers of the country, who not only subscribed liberally themselves, but in many cases made it possible for employees to subscribe without any strain.—Industrial Conservation, New York.

FALL TIPS.

Collars Are Veering Over Into Tailored Effects Now.

Have you noticed the collar changes on dresses and suits? They are decidedly different from the big sailor and capuchin effects that have finished gowns, fashionable and otherwise, for the past three or four seasons—that is, when the collar has been permitted to exist at all.

Those collars that have timidly made their way back are narrow, trig and mannish when a component of the frock or tailleur. As the garment becomes more conspicuous it fattens out, assumes greater breadth and inclines to the ornate.

Up to the present moment there seems no place in the revised scheme of fashion for the half-way collar. It must be small, after the manner of the alpaca or tuxedo collar, or large, like the main neckpieces featured in the portraits of women painted by Rembrandt, Frans Hals or Rubens.

Those that follow the Dutch lead may be of satin, linen or cloth, preferably the first named, with here and there an exception in favor of dimity lace.

It may be that there is some relation, speaking in a tailored sense, between the neat tuxedo collar on the little frock of satin or serge and the mannish sailor hat of pineapple straw with its band of polka dot or striped silk.

Or the adoption of khaki uniforms by women in government employ may have its influence in shaping the neck finish of new gowns and suits. However this may be, it is certain that the present is a transition period in style accessories as they have to do with collars.

It is something of a relief to see the narrow collar. It is a part of the low cut, crossover front of dresses of serge or satin, and, according to the depth of the opening, there may be introduced the plastron of satin or linen cut either high or low. Usually narrow cuffs accompany such a collar.

REAL STYLE.

Isn't This Turban the Jauntiest One You've Seen?

A wine colored chip built like a boat is crowned by a mass of wine colored asters to give this smart, dressy

NEWEST MODEL.

turban so useful for many occasions. Banding it is black velvet ribbon tied in a saucy bow exactly in front.

CLEAR SOUP.

The Way to Make it Like a French Chef.

Four pounds of shin of beef, two pounds of knuckle of veal. Cut the meat off the bones in pieces about a quarter of a pound each and break the bones in four or five pieces. Have ready your stock pot, put into it one ounce of butter, let it just warm, then place the meat at the bottom of the pot with the bones. Let this fry very slowly for one and one-half hours, turning the meat two or three times till it is nicely browned. It must not be allowed to burn, and the pot must be kept covered. The bottom of the pot should be covered by a rich, thick gravy. Now add to it five quarts of boiling water, let it boil, then throw in a teacupful of cold water to accelerate the rising of the scum. If this operation is repeated three times it should make a clear consommé.

Have ready two carrots, two turnips, two onions stuck with two cloves, one head of celery, two teaks, one ounce of salt, a fagot of herbs weighing about one ounce, consisting of parsley, thyme, marjoram and tarragon. Put these all in the soup and allow it to simmer four or five hours. Strain and leave to cool for use. When cold, carefully remove all fat. The meat from this stock will bear another addition of water, about three quarts, and will boil again for common soup.

Bean Soup.

One and one-half cupfuls cooked navy beans, two teaspoonfuls chopped onions, six-cupfuls water, one-teaspoonful celery salt, two teaspoonfuls lemon juice, salt and pepper.

Mash the beans and put with the onion, celery salt, seasoning and water in a saucepan. Simmer for thirty minutes. Strain if desired. Add lemon juice immediately before serving.

If you like a rather thin bean soup you will enjoy this one. Do not forget the lemon juice. It adds much. The soup costs only a few cents per serving when made with canned baked beans.

HIGH PRICES AND SICKNESS

"Nobody can afford to be sick with the cost of living at the present high mark. It is cheaper and more sensible to prevent sickness than to pay doctor bills. Take Foley's Honey and Tar in time to check colds, stop coughs and relieve croup before serious illness attacks a weakened constitution.—Hite's Drug Store.

SALTS IF KIDNEYS OR BLADDER BOTHER

Harmless to Stomach, Kidneys and Neutral in Irritating Acids—Splendid for Women.

Kidney and Bladder weakness result from uric acid, says a noted authority. The kidneys filter this acid from the blood and pass it on to the bladder, where it often remains to irritate and inflame, causing a burning, scalding sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread, the water passes sometimes with a scalding sensation and is very profuse; a sin, there is difficulty in voiding it.

Bladder weakness, most folks call it, because they can't control urination. While it is extremely annoying and sometimes very painful, this is really one of the most simple ailments to overcome. Get about four ounces of Jad Salts from your pharmacist and take a table-spoonful in a glass of water before breakfast, continue this for two or three days. This will neutralize the acids in the urine so no longer is a source of irritation to the bladder and urinary organs which then act normally again.

Jad Salts is inexpensive, harmless, and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folks who are subject to urinary disorders caused by uric acid irritation. Jad Salts is splendid for kidneys and causes no bad effects whatever.

Here you have a pleasant effervescent lithia-water drink, which quickly relieves bladder trouble.

GRAY HAIR BECOMES DARK AND BEAUTIFUL

Try Grandmother's Old Favorite
Recipe of Sage Tea and Sulphur.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome.

Nowadays we simply ask at any drug store for "Wyeth's Sage and Sulphur Compound." You will get a large bottle of this old time recipe improved by the addition of other ingredients for about 50 cents. Everybody uses this preparation now, because no one can possibly tell that you darkened your hair, as it does it so naturally and gently. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, thick and glossy and you look years younger. Wyeth's Sage and Sulphur Compound is a delightful toilet requisite. It is not intended for the cure, mitigation or prevention of disease.

HEAD STUFFED FROM CATARRH OR A COLD

Says Cream Applied in Nostrils
Opens Air Passages Right Up.

Instant relief—no waiting. Your clogged nostrils open right up; the air passages of your head clear and you can breathe freely. No more hawking, sniffling, blowing, headache, dryness. No struggling for breath at night; your cold or catarrh disappears.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream in your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's just fine. Don't stay stuffed-up with a cold or nasty catarrh.

Drafted Men Eager to Learn Science of War Without Delay

Army Will Be Shy of Junior Officers, and It Is These Coveted Positions Many Are Seeking.

If any one is obsessed of the idea that because a man has been drafted for the army he is an unfortunate and a glum loser in Uncle Sam's big lottery he'd better hit him to Governors Island, New York, and watch the conscripts at work. Every day on the big parade ground almost 1,000 men are strenuously endeavoring to learn the rudiments of a military education, and many, having the rudiments, are seeking to skill themselves further in the science of war.

The drillers are all volunteers. They can come when they please, and most of them give every moment they can spare to the work. The majority of the men are conscripts—ambitious conscripts, who, when they are summoned to the colors, hope to have the jump on the less ambitious of the drafted chaps. These men, who are giving their off hours and even sacrificing valued business hours, hope to qualify as noncommissioned officers and even as commissioned officers in the big national army.

Every one of these drafted lads at Governors Island is glad that his num-

Eager to Learn Without Delay

Over 2,000 Have Availed Themselves of Two Drills Each Afternoon at Governors Island, New York.

afternoon, the first beginning at 4 o'clock and the second at 6 o'clock. Many of the military enthusiasts remain throughout both drills.

Once "Noncom," Advancement Easy
The chap who has never had any military training finds himself placed in the awkward squad, where he is taught the rudiments of the science of marching. As he improves he is sent to other squads or companies, and finally he finds himself carrying a genuine rifle and then being chosen to drill other newcomers. Captain Boyce has many volunteer drillmasters—chaps who have been to Plattsburg or have had previous army service. Then, besides these, he draws upon the non-commissioned officers of the post for his assistants.

Inasmuch as there are not sufficient rifles for all the drillers, many, after being taught the facings and marchings, are provided with wooden guns and made acquainted with the manual of arms. It is amazing the speed with which these volunteer soldiers acquire military education. There is not the

with men from every conceivable walk in life, but it is striking the number of actors who are seeking a military education. The Players' club has responded wonderfully well. Captain Boyce says the actors make good soldiers, and, having mastered the drill, they make good drillmasters, having the presence and the voice so necessary to good leadership. One of the most efficient drillmasters is a moving picture player.

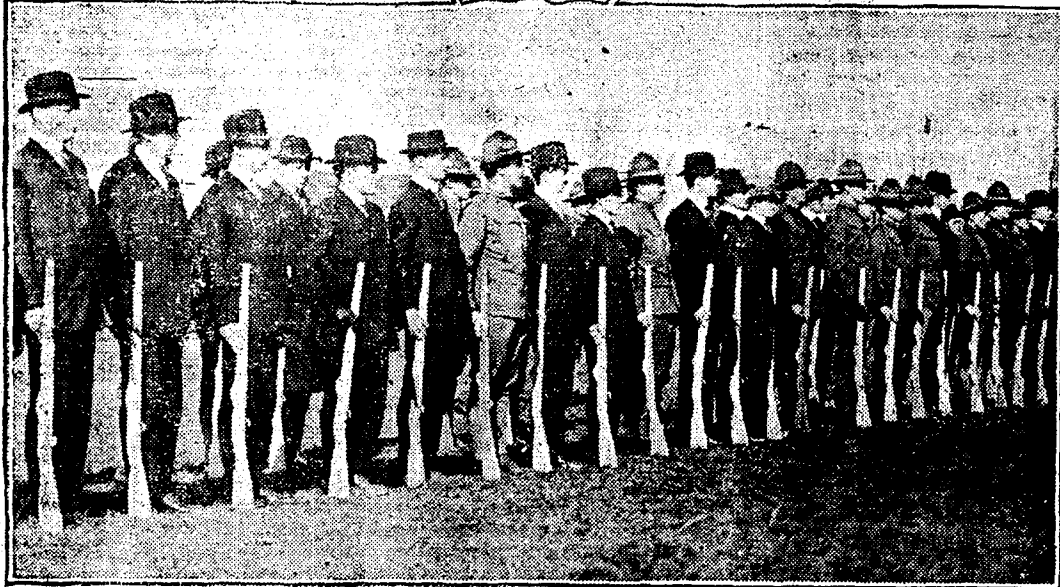

Making of a Fine Army.

What is going on at Governors Island is going on at conscription camps all over the country. Army men say that there is the making of a fine army in these raw recruits. While in European countries it takes a long time to get the troops to the point of efficiency, Americans are said to be particularly apt, and, while there is no claim that the first American army will equal the best of the troops abroad, it is agreed that all will give a splendid account of themselves on the firing line.

Washington is besieged with applications of men who, while not afraid of the draft, are seeking officers' commands. When it was first announced that the second draft would be called soon after the first there was a deluge of applications for officers' commissions. It is understood to be the intention of the authorities at Washington to make officers out of the men now in the conscription camps—that is to say, these men who have been drafted and have shown proficiency in training.

Candidates For Commissions.

At reveille in Plattsburg, N. Y., recently 3,000 new candidates for commissions in the officers' reserve corps started their three months' course of intensive training, which will continue until late November. Hardly had

Photos by American Press Association.

DRAFTED MEN LEARNING SCIENCE OF WAR—UPPER, AWKWARD SQUAD AT DRILL—LOWER, AT DRILL WITH WOODEN GUNS.

ber was chosen in the drawing. They know there will be a scarcity of non-commissioned officers to handle the raw recruits at the other draft camps, and they also know that the army will be a bit shy of junior officers. And it is these coveted positions they seek.

Learn Science of War.

Every afternoon the ferry to the island is jammed with these enthusiastic young soldiers. The majority drill in civilian attire, but many have purchased uniforms, seeking to be as military as possible. There are no preliminaries necessary to joining the various companies and squads for the afternoon drills. Any man is welcome to go to the island, whip off his coat and get busy. It need not matter whether he knows his left foot from his right. There are plenty of lusty lunged drillmasters to make him acquainted with them.

Scores of men, long since past the military age, are availing themselves of the big open air training school to keep themselves in shape. Hundreds of men who never knew how to carry themselves are now returning to their home to startle the "folks" with their near West Point carriage.

The inspiration back of the big school for soldiers is Captain Adolph L. Boyce, U. S. R. Captain Boyce is a Plattsburg graduate and so chock full of the military spirit that he just gets sick when he cannot inspire others with his enthusiasm. Captain Boyce found that there were scores of young men chosen for the army who were anxious to begin their military education before being sent to the big government cantonments, so the drills at Governor's Island were inaugurated.

Over 2,000 men have enrolled themselves for the drills. It is impossible for them all to be in daily attendance, but they give every possible minute to the work. There are two drills each

slightest doubt in the mind of Captain Boyce that a large proportion of the draft men now drilling at the island will be selected as noncommissioned officers in the big camps. Once a man has become a "noncom" his opportunities for a commission are bright.

Any man who goes to Governors Island and comes under the spell of Captain Boyce will work like a terrier, and get to the drills every time one is held. Captain Boyce has a personality that makes him an ideal commander of such a drill regiment as is working daily on the island. No man can remain discouraged in that optimistic command.

Makes Rookie Optimists.

A squad of wet and muscle sore young conscripts were laboring to learn the facings. At the command "right face" some would turn to the left and others completely around. It seemed as though they would never master the drill. Captain Boyce crossed the parade ground and halted the youngsters.

"What's your line of work?" inquired the smiling captain of No. 1 man in the front rank.

"I'm a paint manufacturer," replied the dejected conscript.

"Well, I'm glad to have a paint manufacturer in the service," said the captain. "The quartermaster's corps is ever needing paint. You are a necessity, and you've got to make good, and I know you are going to."

Down the line went the captain, speaking to each man, showing him how to stand up properly and pointing out that a man can add ten years to his life by improving his carriage. When Captain Boyce left the squad and the drill was resumed it was a happy, ambitious lot of chaps, every one of whom is now set on nothing less than a commission.

The ranks of the conscripts are filled

the regular army bugler taken his brass bugle from his lips than there was an outpouring of khaki clad students in every company street, the men evidently being so anxious to start their work that all were up and dressed before the prescribed time.

Inoculation for typhoid started when companies of the New England provisional regiment were marched to the post hospital to take the treatment. The New York men faced the regular army surgeons' needles as soon as the New Englanders were through.

The men were separated into the infantry and the field artillery branches, the latter men not having to take a month of infantry training, as was the rule in the last camp. They started in immediately working with the field pieces loaned by the First New York field artillery.

A notice has been posted which cautions many of the camp members to smile. It is from the adjutant general's office and says that the secretary of war directs that students attending camps shall not be permitted to bring automobiles, horses or valets to the camps or keep them in the vicinity of the camps. Those having automobiles here did not smile.

Not a few automobiles were brought out by the men in the camp, and just what disposition they will make of them is of much interest to the natives. The taxi drivers are happy.

Has "Mental Rupture"—Can't Fight.
Ever hear of a "mental rupture?" It's a new one, but a drafted man in New York ascribed it as a reason why Uncle Sam should not require him to shoulder a musket. His was only one of a great number of new and rare diseases described to the exemption board, of which Charles E. Hughes is chairman. But the man with the mental rupture, along with a bunch of his fellow sufferers, found it didn't work.

Chesterfield CIGARETTES

of IMPORTED and DOMESTIC tobaccos—Blended

African Elephants.
Nearly every one has seen an elephant, and nearly every one imagines he knows what one looks like. But this popular impression and most of the beliefs about the elephant are erroneous.

In the first place, the elephants we see here in America are Indian elephants. They are undersized, even the largest of them.

A full grown African elephant is nearly three times the size of Jumbo, which was the largest elephant ever brought to America. "I have," said a hunter, "shot several specimens which stood over thirteen feet and which weighed at least twice as much as Jumbo."

"Next to the monkey, the elephant is the wisest and most intelligent of all animals. I am not saying this of the domesticated Indian elephant, but of the African elephant in his native state. And the African elephant is always a huge, wild beast. He is never domesticated."

A Distinction.
"The world is divided into two classes," said the village oracle oracularly, "those who borrow and those who lend."

"No, it ain't," contradicted a member of the corner grocery audience. "It order be, but it ain't."

"Indeed! And how do you think it is divided?"

"Inter two classes—them that wants ter borrow an' them that won't lend."—Cleveland Plain Dealer.

Travel.
All travel has its advantages—if the passenger visits better countries he may learn to improve his own, and if fortune carries him to worse he may learn to enjoy his own.—Johnson.

Sensitive.
Dentist—We must kill the nerve of that tooth. Patient—Then I will go out of the room. I'm too tender hearted to witness it.

Clear, Peachy Skin Awaits Anyone Who Drinks Hot Water

Says an inside bath, before breakfast helps us look and feel clean, sweet, fresh.

Sparkling and vivacious—merry, bright, alert—a good, clear skin and a natural, rosy, healthy complexion are assured only by pure blood. If only every man and woman could be induced to adopt the morning inside bath, what a gratifying change would take place. Instead of the thousands of sickly, anaemic-looking men, women and girls, with pasty or muddy complexions; instead of the multitudes of "nerve wrecks," "rundowns," "brain fags" and pessimists we should see a virile, optimistic throng of rosy-cheeked people everywhere.

An inside bath is had by drinking each morning, before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour fermentations and poisons, thus cleansing, sweetening, and freshening the entire alimentary canal before putting more food into the stomach.

Those subject to sick headaches, biliousness, nasty breath, rheumatism, colds; and particularly those who have a pallid, sallow complexion and who are constipated very often, are urged to obtain a quarter pound of limestone phosphate at the drug store which will cost but a trifle, but is sufficient to demonstrate the quick and remarkable change in both health and appearance, awaiting those who practice internal sanitation. We must remember that inside cleanliness is more important than outside, because the skin does not absorb impurities to contaminate the blood while the pores in the thirty feet of bowels do.

Briefs of the Week

Wilbur King is home from Flint. Moses Weisman left last Friday for New York.

Dalton Gay of Detroit is here for a visit with his family.

Mrs. Frank Porter left Wednesday for a few days at Lansing.

LOST—Auto crank. Will pay one dollar for its return to Atty E. N. Clink.

Mrs. Leo Lalonde returned home Monday from a visit with relatives at Detroit.

Arthur Alstrom of Pontiac was guest of his sister, Miss Rena, latter part of last week.

Mrs. J. L. Weisman and daughter, Phyllis were Boyne City visitors first of the week.

Mr. and Mrs. Harry Kling and children left Saturday for a visit with relatives at Bay City.

Mrs. C. H. Whittington returned home Thursday from a visit with relatives at Pentwater.

Miss Clara Rusterholtz of Sturgis, is spending a few days with her cousin, Mrs. George Chapman.

The Electa Club were entertained at the home of Mrs. John O'Connor at Boyne Falls, Thursday.

Frank Heinzelman of Gaylord reopened the Roller Skating Rink in our city last Friday evening.

Miss Emily Malpass, who has been at Boyne Falls on professional business, returned home last week.

Jack Kenny and Chas. Coykendall are attending the West Michigan Fair at Grand Rapids this week.

Mr. and Mrs. John Robb of Chicago are guests at the home of the former's mother, Mrs. Henry Sheldon.

Mr. and Mrs. John Hockstad were called to Traverse City, Thursday by the death of the latter's father.

Mr. and Mrs. Roy Sherman, Mrs. O. Soehner and Mrs. W. F. Squire were Traverse City visitors, Thursday.

Mrs. T. J. Wood returned home Wednesday from Harbor Springs, where she has been visiting her brother.

Mrs. Judson Wing returned Monday from Lansing, where she has been visiting her daughter, Mrs. A. Miles.

Mrs. Alfred Rochelau returned to her home at West Branch last Friday, after visiting her sister, Mrs. C. Hipp.

Mrs. Perry Suook and children came Wednesday from Manistique for a visit with her parents, Mr. and Mrs. Walter Hunsberger.

Miss Hicks, chemist for the Mancelona Iron Co., is assisting at the East Jordan Furnace during the absence of Mr. McGowan.

For lack of room, J. LEAHY, the optometrist, will have his office at the Russell House when he comes again—Oct. 2nd and 3rd.

The Pythian Sisters gave a party at their hall, Tuesday evening in honor of Mrs. J. L. Weisman. She was presented with a spoon.

Mr. and Mrs. Irwin McGowan, Walter Johnson and sister, Miss Norma left Wednesday morning to attend the West Michigan Fair at Grand Rapids.

Regular services will be held at the Methodist Church next Sunday, conducted by Rev. John Clemens. The new Pastor, Rev. Myron Hoyt of Lake City will probably be here this coming week.

Rev. and Mrs. R. S. Sidebotham and Mr. and Mrs. G. J. Zerwekh attended a meeting of the Petoskey Presbytery at Boyne City, Wednesday. Rev. George W. White was installed as pastor, Rev. Sidebotham delivering the installation sermon.

A slight change in train service is effective on the East Jordan & Southern R. R., commencing next Sunday, Sept. 23. The noon out-bound train will leave at 12:30 instead of 12:00 as at present. No other changes. This is to conform with the fall schedule of the P. M. R. R.

The Presbyterian Missionary Society gave a farewell party Tuesday evening at the home of Mrs. C. J. Malpass in honor of Mrs. John Jamison. Mrs. Jamison and daughter, Miss Anna leave this week for Pittsburgh, Pa., where Miss Anna and Esther Porter will attend school.

A pleasant surprise party was tendered Mr. and Mrs. M. H. Robertson by a number of friends and neighbors last Saturday evening. The occasion was in the nature of a farewell, as they plan to leave this week for Cleveland, Ohio, and from there go to the western coast for the winter.

Mrs. Will Hawkins returned home last Friday from Detroit.

A. Danto and family were Petoskey visitors Monday and Tuesday.

H. Rosenthal and family were at Traverse City first of the week.

W. R. Carter of Toronto, Ont., visited friends in our city this week.

Mr. and Mrs. R. N. Spence of Alba visited friends in the city over Sunday.

Mr. and Mrs. John Benser of Boyne City visited relatives in our city over Sunday.

Mrs. Harry Harcourt of Toronto, Ont. is guest at the home of Dr. and Mrs. W. H. Parks.

Miss Emma Zoulek is home from Chicago for a visit with her parents, Mr. and Mrs. Jos. Zoulek.

Mr. and Mrs. Fred Dye returned to Detroit, Monday, after visiting their parents, Mr. and Mrs. John Monroe.

R. A. Brintnall, mail-carrier on R. 1, is now taking a two week's vacation. Leo LaCroix is substituting in his place.

Rev. J. W. Ruehle and family who have been visiting relatives at Ithaca and other points returned home this week.

George Ramsey who has been visiting friends at Battie Creek, Grand Rapids and other points, returned home Saturday.

Mr. and Mrs. F. G. Griffith, accompanied by Miss Francis Morrison of Harbor Springs were guests at the E. L. Burdick first of the week.

Rev. T. Porter Bennett of Hartford was greeting friends in the city Saturday and Sunday. He was in attendance at the M. E. Conference at Traverse City last week. Mr. Bennett will return to Hartford for the coming year.

Carl Whiteford is home from Grayling this week.

Earl Sheeha is home from Muskegon for a visit with his parents.

Red Cross Dance at the Armory next Wednesday and Thursday nights.

Mr. and Mrs. Walter Davis and child spent Sunday with friends at Boyne City.

Miss Alba Nowland who has been visiting her sister, Mrs. Fred Lauway, returned to Charlevoix Saturday.

Mrs. Jas. Gidley is expected home Saturday from Saginaw, where she was called by the death of her sister, Mrs. Wm. Moore.

Mrs. Rosella Cdon passed away at her home on the West Side, Monday afternoon, aged 69 years. Funeral services were held Tuesday afternoon conducted by Rev. Sidebotham.

Alex Bush was taken serious ill at his home in Charlevoix, Thursday night. Mrs. C. A. Hudson and Mrs. A. J. Malone, daughters of Mr. Bush, went to Charlevoix this morning.

Mrs. Wm. Moore passed away at her home in Saginaw last Friday. Deceased was formerly Miss Violet Grigsby, a well-known and esteemed resident of this city. Mrs. James Gidley, a sister of the deceased, left Saturday to attend the funeral.

Smoke White Holly—5c Cigar.

For Rent—A two-story house, equipped with hot and cold water, a cooking range and also a barn. Inquire of ALDRICH TOWNSEND.

Red Cross Notes

Red Cross Dance at the Armory next Wednesday and Thursday evenings.

Everyone plan on spending a whole day at the Fair and get your dinner at the Dining Hall. The Red Cross will serve cafeteria dinner each day of the Fair. Boyne City serves Thursday. East Jordan serves Wednesday and Friday.

There will be no business meeting next Thursday, on account of the Fair. It is hoped that there may be a good attendance on Thursday, Oct. 4th, as there will be important business to discuss.

Everyone is urged to visit the Red Cross booth in the Agricultural Hall at the Fair and see the samples of work. It will be interesting and instructive.

A nice menu is planned for the meals at the dining hall at the Fair. By eating there you will not only be sure of good things to eat, but your money will help buy necessities for the soldiers.

If you knit for the soldiers you will always have some pleasant work on hand to pick up at odd moments. We can't do too much for those who are fighting for us and the knitted articles are badly needed now.

The itemized receipts from the Pole Raising are as follows:

Lemonade.....\$ 3.25
Booth..... 8.60
Dance..... 20.45
Sequenota..... 50.00
Cafeteria..... 90.13
Total 172.43

We extend our heartfelt thanks to Sequenota for the above donation of \$50.00.

A banquet for the Good Roads Delegation was given by the ladies of the Red Cross, Monday evening at the Red Cross Headquarters. Receipts will be announced later.

The amount netted us from the supper Friday evening was \$27.43.

Punishment.
Caller—Here are some verses I wrote. What ought I to get for them? Editor (after glancing over lines)—I am an editor, not a magistrate.—Boston Transcript.

Man sinks beneath his load when fear rises in his heart; drive away his fear and you will divide his load.

Just How to Can Peaches.
Blanch from one to two minutes, cold dip and pack either whole or in pieces into the hot jars. Hot sirup, previously prepared, should be poured over the fruit at once. Before packing a second jar place rubbers and caps in position, not tight. If using tin cans seal completely. Sterilize for the length of time given below for the particular type of outfit used:

Minutes.
Water bath, homemade or commercial..... 20
Water seal, 24 degrees..... 25
Five pounds steam pressure..... 15
Ten pounds steam pressure..... 10
Remove from canner, tighten covers, invert to cool and test joints. Wrap in paper to prevent bleaching and store.
Boiling water may be added instead of hot sirup, but the time of sterilization must be as follows:

Minutes.
Hot water bath, homemade or commercial..... 20
Water seal, 24 degrees..... 25
Five pounds steam pressure..... 15
Ten pounds steam pressure..... 10

Presbyterian Church Notes
Robert S. Sidebotham, Pastor.

Sunday, Sept. 23, 1917.

10:30 a. m.—The Heart of Jesus Teaching.
12:00 m.—Sunday School.

2:30 p. m.—Preaching services at the Mt. Bliss School House.

6:30 p. m.—Christian Endeavor.

7:30 p. m.—The evening service this Sunday will not be held, but we shall join in the farewell service of the Rev. John Clemens in the M. E. Church.

We hope and pray that as Mr. Clemens leaves East Jordan for his new field of work, he may have great success in the work of God's Kingdom. He will be accompanied with the best wishes of the members of the Presbyterian Congregation.

Thursday 7:30 p. m.—Prayer Meeting. The third study in the Meaning of Prayer, "God's Care for the Individual."

CLARION NOTES.

Clyde Kent is threshing this week.

Clarion school opened Monday, having new teachers for both rooms. Miss Bardwell of Walloon as teacher of the lower room and Miss Weldy of East Jordan as teacher of the larger room.

Early Monday morning, Joe Echer's house burned down. He had built a fire in the stove and left it and it set the house on fire.

Thos. Belding, operator at Clarion is teaching Miss Marie Older, daughter of the track foreman how to telegraph.

Several people from Clarion attended the Emmet County Fair at Petoskey last week.

We have a new operator now as our old one, Mr. Fitzgerald had a promotion and has gone to Ashton. Mr. Belding being our operator now.

PROBATE ORDER

State of Michigan, the Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the city of Charlevoix in said County, on the 4th day of September A. D. 1917.

Present: Hon. Servetus A. Correll Judge of Probate. In the Matter of the Estate of Olivia Glenn, deceased. Newton C. McCollough having filed in said court his petition praying that the administration of said estate be granted to William P. Porter or to some other suitable person.

It is Ordered, That the 25th day of September A. D. 1917, at ten o'clock in forenoon, at said probate office, be and is hereby appointed for hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, once each week for three successive weeks previous to said day of hearing, in The Charlevoix County Herald, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
Judge of Probate.

A true copy
Servetus A. Correll,
Judge of Probate.

Rev. Timothy Kroboth.

Sunday, Sept. 23.

8:00 a. m. Mass. Holy Communion for the Sodality and children of Mary.

10:30 a. m. Mass.
7:30 p. m. Devotions, Benediction.

When the wife wants pin money her husband has to come up to the scratch.

The man who loves a woman as much as she wants to be loved has no time for outside flirtations.

Widows frequently lead bachelors to the marriage altar; they have been there before and know the way.

Kissing as a theory is far less satisfying than a practical example.

Don't talk too much; a stiff lower jaw is as useful as a stiff upper lip.

Minding one's own business is a good method of developing the brain.

NEVER BOTHERED SINCE

After suffering with terrible pains in his back for eight years, and after having tried doctors and medicines, Alvis Souers, Ade, Ind., writes: "Foley Kidney Pills were recommended to me and the first bottle removed the pain. After taking three bottles the bloating was all gone and has never bothered me since."—Hite's Drug Store.

Prescription Insurance

HAVING
A prescription compounded in this store means prescription insurance in the very highest sense of the term. It means that you are going to get

just exactly what your physician ordered.

When a doctor writes the name of a drug or medicine, together with the correct proportion, there is only one way that the prescription should be filled. When you bring your prescription here you may rest assured that just what the doctor calls for you will receive. That's prescription insurance worth-while.

School Commissioner's Notes

May L. Stewart, Commissioner

Notice of the opening of the school were this week received from Ruth Chaney No. 5 Boyne Valley, Arla Hawkins No. 4 Chandler, Ada Bardwell No. 5 Evangeline, Ethel Brotherton No. 6 Hayes, Alta Vogg No. 2 Bay, and from Etta Thayer No. 2 Melrose. The programs on the backs of these reports indicate busy times.

Mabel Dunlop, Olivia Underhill, Eva Latham, Ada Bardwell, Florence Meggison, Muriel Kerry, and Etta Thayer this week asked for Home Work supplies in order that they might start this system in their schools.

The St. James high school has added the twelfth grade for which they were working last spring. A new teacher, Florentine Hessman, teaches the 11th and 12th grades, and the principal of last year's grammar grades, Mabel McDonald, teaches the 8th, 9th and 10th grades. There are three teachers to handle the first seven grades and they are busy, competent teachers.

We note the touch of pride in the Walker school notes of last week, and we agree with the correspondent that the improvements made on the school-house bring it way above the ordinary requirements for a standard school. When we remember that there are but seven standard schools in the county well may we proud of the districts that raise their school buildings above all ordinary demands. There is keen competition among the schools of Eveline township and nearly every school is in the race.

A business trip through the county brought the chance information that scarcity of labor had not thwarted the ambition of a district school board in far away Chandler township. Every member of the board has little children in school and they have been working together to bring the school up to a better school class and give their children just as good as could be had. Last year it was new seats, new toilets, new entryway. This year new windows, all but one on the left hand side of the pupils. The school had nothing practically to begin with, but now it lacks only the ventilating system. With this three-piece installment plan it is bound to come. It is a splendid thing to work with an aim in view and to keep on working year by year. It is the only way that some schools would ever afford to do the repairing which time

has made necessary. There is only one danger in this slower method and that is the danger of losing interest, or the change of plans if different officers come to the control of things. But in Chandler No. 6, in Forest Hill, the district is working together, the officers are as a unit, nothing has held them back, while the love of their children, and the reasons back of every move, have impelled them to their task.

The Rock Elm and Ranney schools report that the furnaces are complete and school has opened.

Miss Hansen of Marquette Normal accepted the position made vacant by the sudden resignation of Miss Hazel Richardson in the Rock Elm school.

Fair tickets will be sent each teacher to present to the students who were neither absent or tardy for the last three months of school last spring. They will be sent directly from the office of the Secretary of the Fair, D. L. Wilson, East Jordan.

SAFE REMEDY FOR CHILDREN

Chas. Baker, Brownsville, Tex., writes: "For years I have used Foley's Honey and Tar and found it especially efficient for bad coughs of my children. I recommend it to my friends as a safe remedy for children as it contains no opiates. It is certain to bring quick and lasting relief." Stops coughs.

Good Roads Everywhere

Illinois Highway Ass'n Pull That State Out of the Mud.

Chicago, Sept. 5th, 1917

George H. Van Pelt, Charlevoix, Mich.

Dear Sir:

You are quite right in your statement that concrete roads need no foundation other than the thoroughly compacted natural soil upon which they are habitually laid. To place a crushed stone or cinder base under them, as has sometimes been suggested, permits the rich cement mortar in the concrete to run down into said foundation, thus depriving the concrete itself of this mortar without which a dense concrete cannot be made. Such a base retards the ease of movement of the concrete slab in expansion and contraction, and tends to set up internal stresses in the concrete which produce more cracks than would otherwise occur.

The best modern engineering practice is to roll the ground on which the concrete is to be placed with a good-sized roller, making sure there are no soft spots left. The side forms are then staked to the proper grade on this rolled surface and the concrete poured between them.

Attempts have been made from time to time to utilize in the concrete old macadam which has been sacrificed from the road surface preparatory to laying a concrete road. Such fragments of stone, however, are usually so permeated with dust and dirt, and sometimes oil and tar, that it is highly hazardous to use them in concrete. This material however, can be used to advantage as shoulders in a concrete road and often is so utilized.

We hope that these few observations will assist you in your most commendable activity in support of permanent highways for Charlevoix County.

Yours very truly,
R. F. Hall.

WILL BE REPAID FOR THEIR WORK

Women everywhere suffer from kidney trouble—backache, rheumatic pains, swollen and tender muscles, stiff joints. Mrs. C. J. Ellis, 505 8th Ave., Sioux Falls, S. D., writes: "I feel sure if anyone bothered as I was will give Foley Kidney Pills a fair trial they will be repaid for their work."

—Hite's Drug Store.

Why Barns Burn.

Sweating hay is the most important cause of barn fire loss, for it may produce spontaneous combustion and also may draw lightning.

Why does hay become heated and sweat?

The cells in hay continue to live and breathe for sometime after it is cut and they alone, in a close, unventilated mow, heat the hay to a temperature of 132 degrees F. Added to this is the heat from the microscopic spores of fungi which continue to grow in the blades of hay during its fermentation, the heat created by the development of the hay-seeds, and the heat of the sun upon the roof.

Those three causes acting together may heat hay that is well packed in a close mow where there is no circulation of air to carry off the heat, to a temperature of 212 degrees F., at which water boils. Then the hay begins to char; the charcoal so formed absorbs oxygen and the mass grows still hotter. The heat perhaps reaches 265 degrees F., and then the mass blazes. Bran, grain and silage also may ignite spontaneously if placed under similar conditions. Many such barn fires are thus reported: "Cause unknown; the whole barn seemed ablaze at once."

Sweating hay draws lightning thus: Water is a good conductor of electricity. The moisture from sweating hay rises rapidly because it is heated—more rapidly than the moisture from the fields which rises and forms clouds. So, over the barn is a funnel-shaped shaft of vapor reaching up to the thunder-cloud, and it constitutes a fairly good conductor. Unfortunately this is grounded in the hay. Unless a better conductor—or in other words, a lightning-rod—is run from moist earth along the barn's comb and down again, with proper points above it, electricity may fire the hay.

Realization without hope loses half its charm.

A good memory test is to remember the poor.

Dry sermons are most endurable on wet Sabbaths.

Ice cream melts more feminine hearts than hot words do.

When the wife wants pin money her husband has to come up to the scratch.

The man who loves a woman as much as she wants to be loved has no time for outside flirtations.

Widows frequently lead bachelors to the marriage altar; they have been there before and know the way.

WOMAN SICK TWO YEARS

Could Do No Work. Now Strong as a Man.

Chicago, Ill.—"For about two years I suffered from a female trouble so I was unable to walk or do any of my own work. I read about Lydia E. Pinkham's Vegetable Compound in the newspapers and determined to try it. It brought almost immediate relief. My weakness has entirely disappeared and I never had better health. I weigh 165 pounds and am as strong as a man. I think money is well spent which purchases Lydia E. Pinkham's Vegetable Compound."—Mrs. J. O. BRYAN, 1755 Newport Ave., Chicago, Ill.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, and nervous prostration. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

HARDEST WORKED NEED HELP FIRST

Through all the years the kidneys are at work filtering out impurities that poison the blood if permitted to remain. Is it any wonder that they are overworked and in need of help? Foley Kidney Pills are tonic and strengthening in action. Get rid of backache, rheumatic pains, stiff joints, sore muscles.—Hite's Drug Store.

Clothes do not make the man, yet a man may owe a great deal to his tailor.

If a word to the wise is sufficient, lawyers must consider jurors blooming idiots.

A VALUABLE HEALTH HINT

Foley Cathartic Tablets, keep the bowels open and regular, the liver active and the stomach sweet. They cause no pain, nausea nor griping. They relieve indigestion, sick headache, biliousness, sour stomach and like indispositions. Stout persons enjoy them as they are so comforting and helpful.—Hite's Drug Store.

THE CHARLEVOIX COUNTY FAIR

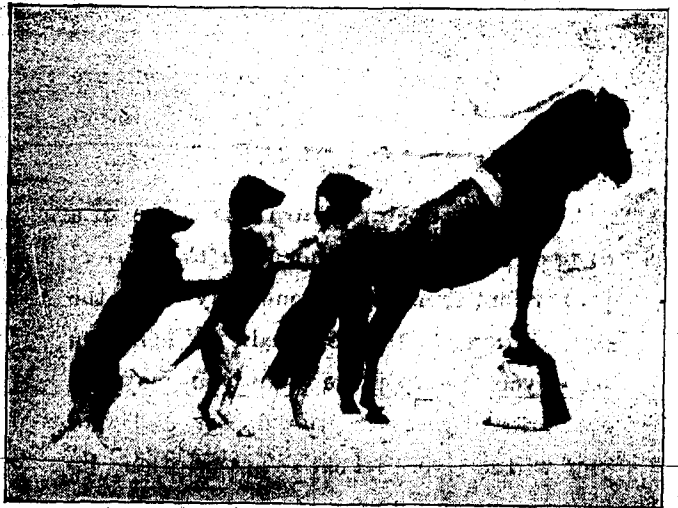

HELD AT EAST JORDAN, MICH.,
SEPT. 25TH - 28TH

The 33rd Annual Fair Will Be Bigger and Better Than Ever, in Every Department. Plan to Attend.

SOMETHING DOING EVERY MINUTE

Free Attractions will be Features of the Big 1917 Fair

Dedos Comedy Circus, introducing educated pony and dogs, trained monkeys, "Dynamite" the bucking mule. A cash-prize will be given anyone who can stay on "Dynamite's" back three minutes.

PATRIOTIC DAY—Wednesday, September 26th, has been designated as Patriotic Day and on that day several Speakers of National importance will deliver Patriotic addresses. Demonstrate your loyalty to the U. S. of America by your attendance on this day.

BALL GAMES, Nail driving contest by women and other athletic contests are being arranged. Meals served at the Dining Hall by the Charlevoix County Red Cross Society.

DARE DEVIL OLIVER WITH DIVING DOG—Dare Devil Oliver performs feats of fancy and spectacular diving into a tank containing 52 inches of water. He is assisted in his act by Diving Dog. Dare Devil Oliver dives from a height of 150 feet, his dog from a height of 50 feet into a tank of water.

RACES—A feature of the 1917 Fair will be a revival of the old fashioned country races. An excellent program of races has been arranged, including Chariot Races, Novelty Races, Running Races and Free for all Trot or Pace, limited to horses owned in Charlevoix County. Races to be run in three minutes or better or no pay. Drivers will be out to win these races and keen competition is assured.

FARMERS—Competent, Impartial Judges from out of the County for all departments have been secured. Bring in your exhibits and get the opinion of experts as to their merit. Freight one way will be paid on stock shipped in for exhibition from any point in Charlevoix, Emmet or Antrim Counties.

A first prize of \$25.00, Second prize of \$15.00 and Third prize of \$10.00 is offered to owner of cow producing largest number of pounds of butter fat during the four days of the Fair. Cows must be kept on the Fair grounds. Milking to be made at stated hours and under the supervision of Mr. Mather. Milk will be tested publicly on the Fair grounds at 10 o'clock each morning. Entry of cows for this premium does not bar their entry for other prizes.

BECAUSE OF ENORMOUS CROPS IN CHARLEVOIX COUNTY AND THE DESIRE OF THE FARMERS TO SHOW THE KAISER THAT CHARLEVOIX COUNTY IS DOING ITS PART TO WIN THE WAR. AN UNUSUALLY LARGE NUMBER OF EXHIBITS ARE ASSURED.
