St. James Man Badly Wounded

Was Shot Through the Abdomen Last Sunday Evening.

John Floyd, age thirty-five years and single, was shot through the lower abdomen just at dusk Sunday evening at St. James, Beaver Island, by Allie Ward, a St. James machinist. A high powered rifle was used in the shooting and the bullet tore a bad hole through Floyd's body, fracturing the top of one hip, and causing a dangerous wound. The man was given first aid by Father Jewel, there being no physician on the island, and was brought to Petoskey hospital. He suffered much pain Sunday night and Monday but later appears to be resting more and to have less pain. Ward, the man who did the shooting, was taken to Charlevoix Monday by Sheriff Weaver and is believed to be slightly "off." He is said to have stood on the sidewalk about twelve rods from his shop and fired three shots at Floyd, the last one hitting him in the abdomen. There were other people about at the time and one man was standing a few feet from Floyd, several children also being nearby. Floyd, it is said, was just starting his automobile, having visited the machine shop to secure a wrench. Seen at the hospital Mr. Floyd could give no reason for the shooting, and expressed the belief that Ward was crazy. Ward's home is said to be at Manistee but for some time he has been at St. James. Floyd is a fisherman. Cable trouble prevented St. James people getting news of the shooting to Charlevoix Sunday night and it was not until late Monday that word finally reached the mainland.

Should Look About Him

Australia, for the first time in her history, is to have a navy. It will include, according to the present program laid down by Admiral Sir John Jellicoe, 8 modern battle cruisers, 24 destroyers, 12 submarines, and the necessary supply ships. The program calls for completion in 1923 at a cost of \$25,000,000 annually. "The league of nations proposes to organize the nations of the world for peace whereas they have always heretofore been organized for war," declared Senator Hitchcock in his minority report on the peace treaty, in which he demanded ratification without reservation. "Australia is a small sample. Was ever such hypocrisy as the world is now witnessing? And we would be parties to it if we accepted the Wilson league. Consider the recommendations of Secretary Baker for a huge army, and of Secretary Daniels for a super-navy. England is building two warships where she built one before, and she is raising one million men for her standing army where she formerly had 100,000, and she is raising the million by conscription in time of peace! Organizing the nations of the world for peace?"

FORTUNE FADES QUICKLY

Man Squanders His Brother's Roll in 48 Hours.

Losing \$1,800 of his brother's money in a single session of a crap game, giving a little supper that cost \$125, buying a \$175 frock for a waitress, and making her a "little present" of \$750, are some of the ways in which Max Hess of Manhattan is alleged to have squandered a small fortune along the boardwalk of Atlantic City and in the cabarets in a little more than 48 hours.

Hess was arrested in Chicago in a nobby bathing suit, under telegraphic orders from the New York police, acting for his brother, Samuel Hess, a furrier. The latter says he left his brother, the festive Max, in charge of his establishment in Gotham while he went on a business trip, and found when he returned Max had sold out the greater part of the stock at bargain rates and left for Atlantic City in a limousine with a large roll.

Max, the repentant, was held in \$2,500 bail to await extradition. After buying new suits of clothes for bell-boys and blowing as high as \$50 a night on taxi rides, he was down to a few crumpled bills of small denomination when the bubble burst.

The reason dishonesty attracts so much more attention than honesty is because it is so much scarcer. You wouldn't look twice at a flock of blackbirds but you'd look a long time at a white blackbird.

SHERMAN-LEWIS WEDDING ANNOUNCED FOR NEXT FRIDAY

Reception To Their Friends Will Be Given From 8:30 to 9:30 p. m.

Announcement has been made of the approaching marriage of Mrs. Estella Elvora Sherman of this city to Mr. Richard Lewis of Charlevoix, to take place at the home of the bride, corner William and Second Streets, next Friday, Oct. 3rd.

A Reception will be held at the home on that evening from 8:30 to 9:30 and all friends of the contracting parties are invited to attend. Both Mrs. Sherman and Mr. Lewis have made many lasting friends in their years of residence in this vicinity and at Charlevoix who will be glad of the opportunity to extend congratulations to them on this most happy occasion.

FERTILIZER TESTS SHOW WHEAT PROFIT.

East Lansing, Sept. 22nd—An increase of more than fifty dollars an acre in the value of wheat crops has been secured by the use of lime and complete fertilizers in soil fertility tests made at the Michigan Agricultural College by M. M. McCool and G. M. Grantham of the college soils department. This increase was above the cost of applying the fertilizer.

The following report is sent out by Dr. McCool at the finish of his test:

"On untreated sandy soil we obtained \$10.55 per acre from the wheat crop. On soil where lime was used the acre value was \$25.11 above the cost of treatment. Where lime and complete fertilizers were added, the acre value was \$66.00 above the cost of the lime and fertilizer. The fertilizer consisted of one hundred pounds of nitrate of soda, one-half being applied at the time of seeding, and the remainder in the spring as a top dressing, two hundred and fifty pounds of acid phosphate and one hundred pounds of potash applied to the previous crop."

MRS. WILLIAM E. APPLETON

Mrs. William E. Appleton, an American who has lived in London 11 years, has just returned there for a six weeks' visit after 15 months in America. She says the English women's success in industry during war has not threatened home life.

"DRY" LAW CLOSES OLD INNS

Hostelries Where Washington and Lafayette Were Entertained Are Hit.

Philadelphia, Pa.—Inns in existence since colonial days are among those closed by the wartime prohibition law. One of the most noted is the Gen. Wayne inn, on the Montgomery pike outside of Philadelphia, which was opened in 1704 by Quaker settlers as the Wayside Inn. "Mad" Anthony Wayne used the inn as his headquarters during the Revolutionary war and it has been a polling place for more than 200 years.

Turk's Head Inn at West Chester has closed its doors. In Revolutionary times it was visited by General Washington, Lafayette, "Mad" Anthony Wayne, Colonel Taylor and many other officers of Washington's army.

When a man says, "Now you understand there's nothing in this for me," there is.

School Winners At County Fair

Every Exhibit in Educational Hall Worthy of Special Mention.

The Charlevoix County Fair Association feels justified in saying that it owns the largest county fair school display building in the state, and possibly in the United States. Handsomely constructed in the shape of a double cross, with the first cross sixty by sixty feet and the second cross seventy-by-seventy-two feet, it affords a fine opportunity for school work of every description and the exhibit was the largest in years.

The East Jordan exhibit covered over sixteen hundred square feet of wall space, and a floor area sixty by twenty. The manual arts and mechanical drawing attracted most attention, although the sewing and history note books were very popular. In the oral contests in the auditorium of the building, East Jordan won first place in experiments in physics and chemistry, in a baking contest, and in declamations and orations. The school agricultural exhibit was in the Charlevoix County Boy's and Girl's Club Building and in this also East Jordan won first place.

The Boyne City exhibit was unusually good in quality although much of the work that had been prepared had been lost through many changes in the teaching corps of the city. The work covered over eight hundred feet of wall space and filled a room twenty feet square. Their kindergarten, and first and second grades display won first place, and the sewing exhibit won first place. Boyne City had a very good school garden exhibit in the Club Building and carried off second honors in this department. Due to local difficulties they were unable this year to enter the oral contests.

The Charlevoix exhibit was the best in years. The grammar grade display was unusually good, commercial department a close rival with East Jordan, History, English, Science, and Latin first place in high school work. In size, Charlevoix's display was about the size of Boyne City's, but they lacked the manual arts, except in mechanical drawing, and brought with them no sewing display. They have no agricultural department and are usually handicapped in the number of departments which they will represent but this year they seem to have fully made up their minds that the ones they do have will speak for themselves. They were without competition in the little folk dance in which three of their little girls won first place.

The grand total of the score as turned in by the board of judges showed Boyne City third with 337 points, Charlevoix second with 551 points, and East Jordan first with 1147 points. Her neighboring cities had much to overcome during the past year, spirit is high and it is doubtful if East Jordan can do this again.

Ironton was the only two room school represented and won first place without competition but the exhibit was good and she would not need to have feared competitors.

Among the one room schools, Norwood was easily first, with a splendid exhibit, including both canning and vegetable exhibits in the club building, and contestants in the oral contests. Their score was 223 points. Horton Bay, excluding the club exhibit in which they had no entries, was the best shown. Horton Bay score was 175 points. The Knop school came third with a score of 131 points. Rock Elm, Johnson, and Wildwood had splendid exhibits in which many individual prizes were awarded.

Leslie Burns of Hopyard won first place in the county in rapid addition, giving the answers to thirty-six combinations in twenty-two seconds. Harriet Chaddock of the Chaddock school was second with a record of twenty-eight seconds.

In the third and fourth grade multiplication contest, Wilbur Seymour of Norwood gave thirty-six correct answers in seventeen seconds, and won first place in the county. Olga Schultz of the Knop school had a record of twenty-two seconds and Mary Chew of Chaddock school twenty-three seconds.

In the fifth and sixth grades a royal race was on. Anna Jones of Norwood gave thirty-six correct answers in multiplication in twelve seconds and Dale Cook of Miles school won a record of fourteen seconds. The same two then

entered the factoring contest. Anna factored fourteen numbers in twelve and one-half seconds, and Dale took only thirteen seconds for his fourteen numbers. Anna is champion of the county.

In the rural oratorical contests, the following were the winners:— In the sixth grade contest, Mildred Masters of Walloon Lake, first place, and Anna Jardine of the Mountain school second.

In the seventh grade contest, Consuela Gillespie of St. James, first place and Gladys Norton of Boyne Falls second.

In the eighth grade contest, Mildred Wangeman of Three Bells, first place, and Willow Morton of Boyne Falls second.

The building was fine—but the exhibits were better yet. The contests were splendid and expressed just what the superintendents wished to express, that our schools are the best in the land and growing better all the time. They want in the foreground the schools of Charlevoix County and the people in Charlevoix County are willing to work to earn and hold that place.

ASK ADAMLESS EDEN

Illinois Girls Want to Have Colony in Far West.

Suggest That Governor of Wyoming Procure for Them a "Bad Land" Tract as Soon as Possible.

Bloomington, Ill.—A group of Kane county girls plan to found an "Adamless Eden" in Wyoming or some other far western state.

Miss Nellie Grant is sponsor for the movement and has written to Gov. R. D. Carey for his assistance in starting a woman's colony far from the haunts of man. In making her unique request, Miss Grant stated that the party will be made up of twenty, of whom ten are employed in a watch factory, seven are housekeepers, two are nurses and one is a school teacher.

All are dissatisfied with their lot and assert that the future holds forth nothing that is sufficiently encouraging to warrant their remaining at home. They believe that they can make a success of farming and would like to obtain a section of land, 840 acres, in some unsettled region, far from a railroad and little frequented by man.

Miss Grant suggested to the Wyoming executive a tract in southwestern Wyoming known as the "Bad Lands," and which is really a desert. No man will be allowed about the premises.

Governor Carey admitted that it was the most unusual request that he had ever received. He turned the letter over to the immigration commissioner with a suggestion that he do everything in his power to find such a tract for the party from Illinois.

The young women are ready to pay for the tract, but have limited funds, and can only finance a section that has not yet felt the advancing tide of civilization in the way of price. Some members of the proposed colony object to Wyoming and believe that Montana or Idaho offer greater possibilities.

The decision, however, has been left with Miss Grant and the choice will follow the investigation of various sites now being made. In anticipation of the establishment of the colony, the various members are studying diligently the subject of farming and stock raising.

They are ambitious in their plans and propose to utilize tractors and trucks instead of horses, and will introduce other up-to-date methods on the western frontier. They are also studying irrigation. All of the young women are becoming familiar with a revolver and rifle and will be prepared to defend their colony against any unwelcome intruders.

An effort is being made to close the deal by fall so that the trip to the West can be made by the first of next year. It may be necessary to erect some buildings. The young women say that they will be prepared to do everything necessary in the way of constructing a domicile.

The old-timer who laughed when anybody suggested that some day this country would have woman suffrage and prohibition, now is willing to believe we will dry up the ocean or go visiting to the moon in the next ten years.

Gossips act like they are telling something rather remarkable when they say that some married pair "doesn't get along very well together," but they would be telling something much more remarkable if they'd point out some who always do get along very well together.

VIENNA'S AGED DYING ON FEET

Most Austrians Suffer From Ravages of the Many Wartime Maladies.

CHILDREN ARE EMACIATED

Scrawny, Limp, Listless From Malnutrition and Seldom Smile or Play — American Red Cross Is Helping.

London.—Dr. Ethel Williams, a New-castle doctor of 30 years' experience, recently has returned to England from Vienna. She attended the Women's International conference at Zurich, where she heard so much about the conditions of disease in Austria that she decided to see for herself what those conditions really were. She spent a week in Vienna, visiting the hospitals and the school kitchens, studying medical statistics, interviewing representative people, and seeing as much as she could of the city. Speaking to a Manchester Guardian representative, she said:

"What impressed me most was the appalling condition of every old person I saw, and of 85 per cent of the children. The old people were like walking death's heads. There are so many things that persons over sixty cannot digest. The mortality among the old has increased by 150 per cent.

"What struck me most when walking about the streets was that there were no toddlers. Children of three and even four years were carried by their mothers. The children did not run about, or shout, or quarrel. It was four days before I saw a child playing.

At least 95 per cent of the practically well children were painfully emaciated, with discolored circles around their sunken eyes and the tendons of their necks showing like those of old people. Even middle-class children have these scrawny necks, and when they run their cheeks flap like those of old people. But they seldom run. They are all limp and listless.

"The scene in the out-patients' department at the biggest state children's hospital was pitiful—no sound or attempt to play. The children sat quietly on their mothers' knees or against a wall.

"I saw several cases of osteomalacia, a disease so rare before the war that the only two cases I had ever seen had been shown to me as a curiosity. It seems to come from lack of fresh food, and there have been 256 cases in Vienna, and I heard of another epidemic in a German town.

"The bones soften and become distorted, the pelvis bones fold inward in early stages it is curable, but a bad case never will walk again, and a rather bad case always will have difficulty in walking.

"The cases were those of older children and adults. They told me that the hospitals were receiving about 11 cases a day, and those they had to turn away inevitably must become worse. I used to test the condition of the children I saw by feeling their fleshless arms. When I touched one child the father said: 'Don't touch him. He has this bad new disease, and it hurts him so much.' I realized that I had hurt him, but the child was too listless to shrink from the pain.

"The doctors could do practically nothing for the out-patients who could not be taken to the hospitals. The mothers were in despair. The doctors said the greatest want of all was for cod liver oil. Funds raised in England had sent a supply, but it only lasted two days. Practically every child under two is rickety.

"Suffer From Starvation.

"It is extraordinary how little Vienna has suffered from war epidemics such as typhus. The enormous increase in sickness is due to starvation disease. Almost all of its child population is stunted, starved, left without vitality, vigor or energy. An enormous number are tubercular and a considerable proportion of these will die. Another considerable proportion will for all their lives probably be stunted in mind and body, and all will be handicapped." The children of school age provided with one meal of soup and bread in the day by American Red Cross workers at a special kitchen she visited were watched lest they should take the bread home. "You must eat the bread," the workers told them. "All that we can do is to help you to keep well and strong." The American Red Cross is opening more of these kitchens, and hopes to feed 40,000 or more children, but that only means food for one section of the people, the children of school age—and even then only one meal in the day.

SEES GAME WITH TEACHER'S EYES

Blind Girl Is an Enthusiastic Rooter for New York Giants.

GETS ALL THE GOOD POINTS

Daughter of Famous Author and Composer Inherits Love of Sport From Father—Is Like Ray of Sunshine.

New York.—Everybody was humming or whistling "After the Ball" 25 years ago.

Charles K. Harris, author and composer of that popular song, was at that time a resident of Milwaukee and a frequent visitor to Chicago. He was an enthusiastic baseball fan.

The Harris home is now at 151 West Eighty-sixth street, this city, and Miss Mildred Harris, the nineteen-year-old daughter of the author-composer, has inherited a love of baseball from her father and, despite her total blindness, is able to "see" the game and enjoy it almost as keenly as if she had her sight. For the last seven years she has been a fan.

She sits in the grandstand wearing smoked glasses and is always on hand when the Giants are playing. She jumps up and down and cheers the players just like other excited spectators. Behind her unseeing eyes is a mind of extraordinary perception, swift to grasp what is going on about her. Some of the experts say she "sees" the game more intelligently than those who have all their senses.

Sees Through Father's Eyes.

Miss Mildred's escort is her father, and it is through his eyes that she is able to see baseball and understand all the nice points of the game, as she has been doing for the last seven years. He explains the game to her as it progresses by means of a conversational code.

"When I was twelve years old," she said, "the Giants were winning the pennant, and my father was tremendously excited about it. Of course I asked him to explain, and he took a piece of cardboard and drew a diamond on it, marking the bases. While he told me about the game I traced the diagram out with my fingers until I got the thing visualized in my mind. Then I went to the games with him and soon learned to understand them by means of our code, usually expressed in monosyllables, a word at a time. Soon I came to know the players and, like others present, to get all wrought up over team work and brilliant individual performances."

In this way the blind girl came to know the stars of the baseball world. She can tell you all about the wonderful feats of Christy Mathewson, Ty Cobb and those of more recent date, including Benny Kauff, Ross Young and others. She laughingly says she has the time of her life when she goes to a ball game. She is sure that she sees all that is going on just about as anyone else sees it.

Although Miss Harris was born blind, she carries a ray of sunshine with her wherever she goes, for she is cheerful and optimistic. She is fond of the outdoors and excels in walking, swimming and dancing. She is an accomplished pianist, speaks French fluently and during the war was a volunteer worker for the Y. W. C. A.

Rooter for the Giants.

It may be added that Miss Mildred this year is betting on the Giants, but the fact is she has always been a "rooter" for the Giants. More than once, however, she had lost money on them, but is hoping that she will be lucky enough to get some of it back this year. She feels it "in her bones" that nothing can head the Giants off this year.

The ball game is the one place she can go where she can throw aside formality and do just as she pleases, and for this reason it is her greatest recreation.

"You see," she explains, "you don't have to be subdued and self-repressed but can holler your head off if you want to, and nobody pays any attention. When the game is not going just right to suit everybody pandemonium reigns and the whole crowd is in a state of frenzy. It certainly is great sport."

Miss Harris modestly says she has been given credit for having converted many others into fans. She talks baseball enthusiastically to her friends and acquaintances and naturally they become interested and follow the crowd to witness the great American game.

Men rail at the vanities of women but you never notice them paying much attention to the kind that haven't any vanities.

Ex-President Receives 1,825 Mystery Notes

Long Beach, Cal.—Former President Taft every day for the last five years has received from some unknown person of this city a letter bearing a signature which resembles the tracks of a struggling fly escaping an ink bath. None of the writing is decipherable.

Postmaster Demond received a communication from the former chief executive asking relief from the correspondent and requesting that the local police investigate the situation.

In all, 1,825 letters from the mystery author have been received, the letter to the local postmaster states.

LYNCHED AS CHURCH LOOTER

Mexicans Slay Man Accused of Stealing Jewels Off Image in Village Edifice.

Mexico City.—Details of the lynching of Juan Galvan, a prominent resident of the village of Zaragoza, in the state of San Luis Potosi, have been received in the capital.

El Demmocrata, in publishing the story, declares that this is the first instance of lynching recorded in Mexico.

Galvan was publicly accused by the pastor of a church in Zaragoza of robbing the image of a virgin in one of the churches of gold and jewels valued at \$5,000. The curate inflamed his hearers, who dragged Galvan from his home, built a funeral pyre and tortured him until he died. The curate has been detained by the authorities.

The living the world owes you generally is not the kind you want.

A good-natured child is rather to be chosen than one that "speaks pieces."

If you have a good excuse for living, don't hesitate to mention it, for nobody else is likely to until you do.

But one good thing you can say for near beer is that generally it doesn't have as much foam on it as regular beer, and that while it contains no songs, neither does it contain any weeps.

SOME PERTINENT FACTS ABOUT THE NATIONAL DAIRY SHOW

Organized in 1905 in Chicago. Thirteenth annual show to be held this year in Chicago, its birthplace. In a non-profit organization, earnings from National Dairy Shows go into development work for good of entire dairy industry. Has grown from a comparatively small into a great national institution. In 1911, the entire show occupied less than 75,000 square feet of exhibition space; this year over 100,000 square feet will be given over to machinery and relative exhibits, 100,000 square feet for exhibition of cattle and 50,000 square feet and over for educational exhibits. The platform of the National Dairy Show is: To encourage the production of dairy cattle and milk products under the most modern sanitary methods, to develop improved methods for the manufacture of dairy products and bring about a standardization of the best dairy products on earth.

Cho-Cho Will Enliven National Dairy Show In Chicago This Year

The United States government thought enough of Cho-Cho to have him for an entire week, working and entertaining in the building of the department of the interior in Washington. Cho-Cho is a clown, but he is a man who is doing, perhaps as much as any single person, a great work in spread-

ing the gospel of good health and how to acquire it. He entertains and he teaches; his work is unique, but his results are big. He appears in typical clown regalia, does sleight-of-hand tricks and performs other antics, but all the time he is driving straight home the big lesson that comes of a healthy, vigorous body. Mrs. Ira Couch Wood, who is in charge of the women's activities, was able to secure the services of Cho-Cho for the National Dairy Show, which will be held this year in Chicago from October 6 to 12. Cho-Cho will be one of the big attractions at the show.

GOVERNOR OF LOUISIANA COMING TO DAIRY SHOW

Governor R. G. Pleasant of Louisiana will be a visitor at the National Dairy Show in Chicago this year and will be at the head of a large delegation of farmers, dairymen, educators and newspaper men from that state. In honor of the visitors from the South, who are coming to the show in large numbers this year from different states, Wednesday, October 8, will be "Southern Day" and Governor Pleasant will be one of the speakers. The South is forging to the front rapidly as a great dairying section. The southern visitors, it is expected, will be buyers of good dairy cattle in large numbers. They are interested in the show, too, from an education standpoint; they want to know how to improve their product according to the latest improved methods and devices.

Mrs. Ira Couch Wood Will Direct Activities of Women At the National Dairy Show

Mrs. Ira Couch Wood, director of the Elizabeth McCormick-Memorial Fund for Child Welfare and one of the country's most prominent workers in the cause of child welfare, will be in charge of all work for women and children at the National Dairy Show in Chicago this year from October 6 to 12. Mrs. Wood has consented to become identified with the Dairy Show because its aims are, in a large degree, identical with the organization of which she

Mrs. Ira Couch Wood.

is the directing head and because she believes there is a big opportunity at the Dairy Show for doing a work well worth while. Mrs. Wood has laid ambitious plans for the entertainment of women and children at the show. There will be examinations of babies and children, conferences and demonstrations in child care. Rural schools will have a place, as well as moving pictures and lectures by noted men and women. Afternoon tea for visiting women will be served each afternoon in the Stock Yards Inn, with prominent women of Chicago acting as hostesses. Mrs. Wood's department will be housed in a large room and will be one of the big attractions at the national show.

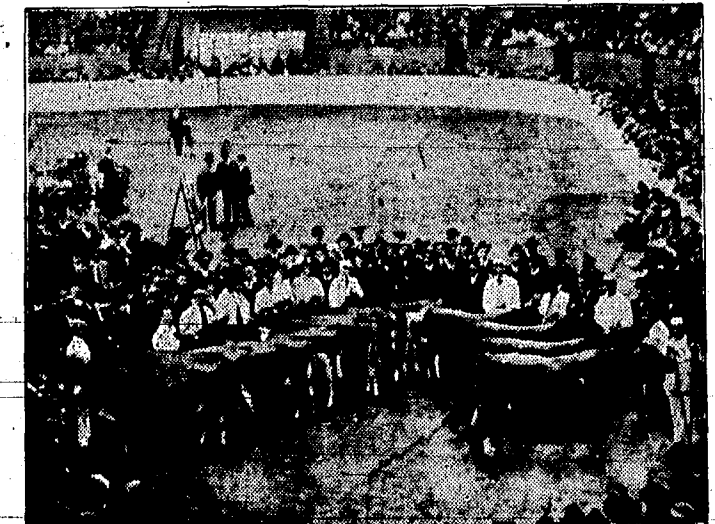

MOTHERS, BRING KIDDIES WITH YOU TO CHICAGO

It may be taken as a settled fact that every mother is interested in knowing how her children "stack up" as far as health, weight and general efficiency go. At the National Dairy Show in Chicago this year mothers will have the opportunity of finding these facts out from men and women who have made a deep study of the question. Children will be weighed, examined, tested and scored by these experts at the National Dairy Show, and cards showing just how the little ones score for each department will be presented to the mothers. It is hoped and believed that large numbers of mothers will take advantage of this unique and highly beneficial feature of the Dairy Show, and will bring the children with them to Chicago for examination.

FOREIGN NOTABLES WILL VISIT NATIONAL DAIRY SHOW

Already responses have been received from fifteen or more foreign governments that they will have official delegations at the National Dairy Show in Chicago in October. In transmitting this information to the management of the Dairy Show the state department at Washington says it expects that other governments will have delegations at the show. A formal invitation was extended by the state department to these foreign states to take official recognition of the Dairy Show and to send delegations and commissions to study the dairy industry as it will be presented in its entirety in Chicago and to get the United States government's post-war message on dairying conditions the world over.

BIG HORSE SHOW ADDED FEATURE OF GREAT NATIONAL DAIRY SHOW

Ring Group of Cattle at National Dairy Show.

An added feature of this year's National Dairy Show, which is to be held in the International Amphitheater, Union Stock Yards, Chicago, from October 6 to 12, will be a big Horse Show every night. Entries will comprise some of the best show horses in the United States and Canada. Both harness and saddle horses will be shown.

Jumpers with riders in hunt costume will be put over the bars every evening. Horse shows are spectacular, and there is an abiding love for the sprightly thoroughbred in the heart of almost everyone. The best can be seen at the National Dairy Show in Chicago this year.

IN MISERY FOR YEARS

Mrs. Courtney Tells How She Was Cured by Lydia E. Pinkham's Vegetable Compound.

Oskaloosa, Iowa.—"For years I was simply in misery from a weakness and nothing seemed to do me any good. A friend advised me to take Lydia E. Pinkham's Vegetable Compound. I did so and got relief right away. I can certainly recommend this valuable medicine to other women who suffer, for it has done such good work for me and I know it will help others if they will give it a fair trial." Mrs. LIZZIE COURTNEY, 108 8th Ave., West, Oskaloosa, Iowa.

Why will women drag along from day to day, year in and year out, suffering such misery as did Mrs. Courtney, when such letters as this are continually being published. Every woman who suffers from displacements, irregularities, inflammation, ulceration, backache, nervousness, or who is passing through the Change of Life should give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial. For special advice write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of its long experience is at your service.

DRINK HOT WATER BEFORE BREAKFAST
Says you really feel clean, sweet and fresh inside, and are seldom ill.

If you are accustomed to wake up with a coated tongue, foul breath or a dull, dizzy headache; or, if your meals sour and turn into gas and acids, you have a real surprise awaiting you.
To-morrow morning, immediately upon arising, drink a glass of hot water with a teaspoonful of limestone phosphate in it. This is intended to first neutralize and then wash out of your stomach, liver, kidneys and thirty feet of intestines all the indigestible waste, poisons, sour bile and toxins, thus cleansing, sweetening and purifying the entire alimentary canal.
Those subject to sick headaches, backache, bilious attacks, constipation or any form of stomach trouble, are urged to get a quarter pound of limestone phosphate from the drug store and begin enjoying this morning inside-bath. It is said that men and women who try this become enthusiastic and keep it up daily. It is a splendid health measure for it is more important to keep clean and pure on the inside than on the outside, because the skin pores do not absorb impurities into the blood, causing disease, while the bowel pores do.
The principle of bathing inside is not new, as millions of people practice it. Just as hot water and soap cleanse, purify and freshen the skin, so hot water and a teaspoonful of limestone phosphate act on the stomach, liver, kidneys and bowels. Limestone phosphate is an inexpensive white powder and almost tasteless.

GRENADES TO HELP INDUSTRIAL CONCERN EMPLOYES TO SAVE

Government Savings Societies to Be Formed in 100,000 Plants of District to Aid Uncle Sam's Finances.

A fairly generous proportion of the 15,000,000 hand grenades owned by the War Department of the United States when the armistice was signed are to pass into the hands of America's industrial army through the Government-Savings Societies of America's industrial organizations. They will be used as savings banks.

Already 20,000 of the country's industrial organizations, those in which Government Savings Societies already flourish, have been "lined up" for distribution. At least 100,000 will be included when the work is in full swing.

The hand grenades are the genuine articles, just the same hand grenades as those with which the Yanks did such deadly execution in Europe. The only difference, in outward appearance, is that a money slot has been cut through the shrapnel casing forming the body of the grenade. Inside, the explosive chamber has been cleared and a removable screw substituted for the base of the casting. In place of the high explosives so carefully developed by American army experts the grenades, as banks, hold one hundred dimes or one hundred pennies—the shrapnel of the United States treasury. Acquisition of a hand grenade bank will become possible to any United States worker by following the simple plan outlined by Harry Edwards Clay, manager of the Industrial Division of the War Loan Organization, Seventh Federal Reserve District, who has the distribution in charge.

The industrial worker, eager to possess one of these remarkable war souvenirs, has only to purchase, through the secretary of the War Savings Society of his particular plant, factory or organization, three War Savings Stamps at a single time or one-War Savings Stamp a month for three consecutive months. The grenade bank then will become his, being received through the Government Savings Society for the industrial organization of which he is a part. Thereafter it may be used for personal and private savings, as well as for money in course of accumulation for further War Savings Stamps purchase or as a beginning toward acquisition of one of the newer Treasury Savings Certificates now issued in denominations of \$100 and \$1,000.

NEW SAVINGS CERTIFICATES

\$100 and \$1,000 Government Securities Are Available in September for \$84 and \$840 Respectively.

Treasury Savings Certificates in denominations of \$100 and \$1,000 are being distributed throughout the five states of the Seventh Federal Reserve District. They may be bought during the month of September for \$84 and \$840 respectively. These new government securities are in reality discount bonds. They will mature January 1, 1924, and are issued only in registered form to insure them against theft or loss. The same rate of interest is paid as for War Savings stamps, namely 4 per cent compounded quarterly. War Savings Stamps of the 1919 issue may be exchanged for the Treasury certificates.

The Treasury Savings Certificates are offered to the public at any post office of the first or second-class and at incorporated banks and trust companies which are agents for the sale of 1919 War Savings Stamps. The name of each purchaser will be inscribed on every certificate, the registration records being kept at the Treasury department in Washington, D. C. Each month the new certificates will increase in price. They began in July at \$83 for the \$100 certificate and at \$836 for the one which will be worth \$1,000 when it matures. Thus the income increase is twenty cents a month for the smaller certificate and two dollars a month for the other. They are tax free except inheritance, surtaxes, war profits and excess profit taxes.

A SAFE STOCK FOR ALL

SING A SONG OF SAVINGS STAMPS
Sing a song of Savings stamps,
The cost of living's high.

Goodness only knows!

SAVINGS BODIES URGED TO HELP HIGH LIVING COST

Government Director Lewis Makes Appeal to Six Million Members—Seventh District Takes Action.

Active entry into the campaign to lower the cost of living is urged upon more than six million members of War Savings societies throughout the country by William Mather Lewis, director of the savings division of the treasury department. The message for Chicago and the rest of the seventh federal reserve district was sent by Mr. Lewis to W. B. Bosworth, executive secretary of the District War Savings organization. There are 160,000 active savings societies, chiefly in industrial concerns. In his appeal Mr. Lewis said:

"No solution of the high living costs can be reached until the country shakes off its present spending intoxication and settles down to demanding a dollar's worth of food or material measured by the labor or effort required to obtain that dollar. Millions of people are not spending from their earnings, but from their savings of the past two years.

"Liberty bonds and other securities accumulated by patriotic sacrifices during the war are being cashed at a loss to the purchaser to buy luxuries at prices exorbitant even for luxuries. It is not essential that we return to the extremes of economy and sacrifices of war times, but it is essential that we keep firm hold on the savings accumulated during the war, not only as a matter of personal benefit, but as a factor in bringing prices down.

"Enrolled in these government savings societies are more than six million people close to the very heart of American industrial life. It is in their power to increase the flow of production. It is in their power to check waste among themselves and those dependent upon them, as well as in the communities in which they live. This can be done by wise buying and treating what they buy with respect to the hours of labor its purchase cost them. It is in their power, through regular and consistent saving and safe and conservative investment in such securities as War Savings stamps and Treasury Savings certificates to add to the capital necessary for industrial expansion and increased production.

"The savings division of the treasury department, therefore appeals to this savings societies to re-enlist in this campaign. They can show the people of America how, and what to buy. They can teach how and when to save. They can assure a larger part of our national effort to production of necessities. They can aid to bring about increased employment and prevent the lowering of the general standard of living in America."

Harry Edwards Clay, manager of the War Savings stamp societies for the seventh district, lost no time sending out an appeal to the 1,500,000 members in Illinois, Michigan, Iowa, Indiana and Wisconsin backing up the plea from Washington.

"There is no more potent factor in the present campaign to cut the high living cost than the government savings society. The statement of Mr. Lewis gives another reason why men and women should join these societies, and why those who are members now should become active in the work. As Director Lewis says, they can show the people of the country how, when and what to buy, and they have it in their power to increase the flow of production and check waste among themselves and others in their community, as well as to assist in prosecuting cases of profiteering. This work will help each one individually. It will aid in bringing about better conditions."

KEEP UP THRIFT IN SCHOOLS

Pupils to Be Taught Principles of Saving With Experience in Buying, Selling and Account Keeping.

With the resumption of school this month many of the educational features of the Thrift and War Savings Stamps campaigns will be centered in the classrooms. The continuation of the Little Lessons in Thrift which were sent direct to all the school teachers in the five states of the Seventh District during the first six months of the year will be provided for. These lessons are designed for all grades, but pay particular attention to the younger classes, where it is desired to instill early the principles of thrift and saving.

In all eighth grade schools and in high schools it is planned to interest the pupils in personal accounts, a systematic and regularly conducted organization being formed in each school for that purpose. The system will include personal experiences in buying, selling and account keeping. Students in all colleges and universities will be enlisted in a campaign to popularize personal accounts and systematic savings. Domestic science teachers in public schools, normal schools and colleges, and agents of extension departments will be utilized to make this individual budgeting of students' incomes effective.

Evan C., 9 months-old son of Mr. and Mrs. Harry Hayes, passed away Tuesday, Sept. 23rd, at their home in Detroit. The remains were brought to this city, Wednesday and funeral services were held at the home of Mr. and Mrs. George Hayes, Thursday afternoon, conducted by Rev. M. E. Hoyt. Interment at East Jordan Cemetery.

Clark G. Schlieter passed away at a hospital at Rochelle, Ill., Monday forenoon last following the amputation of one of his legs. Mr. Schlieter was well-known in East Jordan having worked at Mackey's Garage most of the past summer. In August he went to above city and was handling road machinery. An accident occurred Sept. 12th in which one of his legs was caught in the machinery and broken in five places. Funeral services were held at Gladwin, Thursday, and the remains taken to Vanderbilt for interment.

Uncle George H. Van Pelt of most everywhere breezed into The Herald office for a few minutes chat Tuesday afternoon. Uncle George is bearing his seventy-nine years lightly, and has just finished a 4000-mile auto trip. One of the pioneer advocates of cement roads he accomplished results desired, and is now out for fire-proof hotels, good garages, and tourist's and traveling men's comforts and discomforts. We need a whole lot more Uncle Georges.

The Campbell Boot Shop at Charlevoix was entered by burglars late Thursday night or early Friday morning. The robbery was committed by Floyd Bradley and James Clab, both of Chicago. The men entered the building through a window in the back of the store from which they pulled off the iron bars that protected it. They then broke the lock on the back door and left this way. When the affair was discovered Friday morning on opening the store shoe boxes were piled on the floor and shoes scattered around the place. About seventy-five pairs of shoes were missing. The authorities were notified at once, which resulted in the capture of one of the men, a Floyd Bradley, who was employed at McCann's bakery. He was found in bed with a pair of ladies' shoes on. The other man, James Clab, was taken later on and both of them are now in the county jail. The shoes were all recovered, part of them being hidden in a grain sack in McCann's basement. Aside from the damage to the shoes, the loss only amounted to about ten dollars.

Ole Oleson returned to Detroit, Tuesday.

Everybody Welcome!

To an unreasonable man, all things are unreasonable.

If you can't be happy unless you are doing something exciting, it's a sure thing you are not very exciting.

A true gentleman is one who denounces as false something he knows is so if by doing it he can help another.

An habitual smoker who is out of tobacco is nervous, but did you ever notice a girl who had lost her powder puff?

Maxims are hardly ever true. For instance, the one about children and fools always telling the truth. Many children never tell the truth if they can avoid it and a fool lots of times will lie when the truth would serve him better.

When mother is in a hurry to go somewhere the children can always be relied upon to get all dirty just as she is ready to start.

There are many false standards of value, but what do you think of judging the wealth of a man by the price of his automobile?

DON'T NEGLECT YOURSELF

Lame back, shooting pains, torturing rheumatic aches, swollen joints, sore muscles, puffiness under eyes, floating specks, and an "always tired" feeling are indications that the kidneys and bladder are not working properly. THE HOW OF GETTING A NEW COAT

TO THE GOOD DRESSERS OF EAST JORDAN:

Let's get right down to brass tacks. Good Coats are scarce, especially in the new fabrics.

Oh! you can get ANY kind of a coat ANY time but—who wants THAT kind of a coat? You don't want a serge coat, nor do you want a Kersey coat.

But you do want one of Tinseltone, or Chamelon Cord, or, possibly, the rich new Peachbloom.

Well then, let's get busy and pick one out, now when we have them—when your size is there and your choice is there.

Don't wait until it gets so powerfully cold that you have to have a coat. Pick it out now; have it laid away, if you do not wish to pay for all of it, but get it. Then you are sure to be well dressed when you want to be well dressed.

NOW FOR THAT NEW FALL SUIT

Here is the "Suit of No Regrets"

and our simon pure opinion is that there is no prettier one in all our town.

You know when we go to buy suits, we try to get all of them beautiful—only some of them are more beautiful than others.

It has some mighty good-looking sisters to keep it company just now, and from what the manufacturers tell us, we're lucky to be so situated.

There's a wide range of prices. If you want a suit for \$35, we have it; if your taste is for one at \$100 we have that, too.

It's the old story of values—you get what you pay for at any good store.

SPECIAL—New ideas in blouses are shown in a shipment just opened which will be ready for display Monday morning.

DRESS FACTS FOR Your CONSIDERATION

Cable reports are that Straight Line Dresses will continue popular for Spring 1920. "Practical models, of design similar to those this Fall, being brought out for next year," reads this message, so the woman who captures one of these garments is going to get a lot of service from it and be always modishly dressed, too.

Beautiful Dresses, \$20 to \$65.

Let's See About These NEW FALL SKIRTS

Tartan Plaids, Murrayburn plaids and Bannockburn plaids have the call in the new Separate Skirts for Fall.

Illustrated are some of the becoming styles that are now being shown. Average width of separate skirt is 54 inches around the boom. Button trimmings and odd pocket effects feature them.

Some New Ideas in Skirts from 30 to 38 Waist Bands.

The larger woman who wants style in her separate skirt is pretty sure to get what she wants here.
