

Charlevoix County Herald

Vol. 28

EAST JORDAN, MICHIGAN, FRIDAY, JANUARY 25, 1924.

No. 4

Traverse City No Match for The Locals

Local Villagers Slaughter Traverse City; Ed. LaLonde Stars.

When the local fans saw the Traverse City Indoor Ball team take the floor they hardly suspected that East Jordan would completely outclass them when it came to the real game, for Traverse City certainly showed their knowledge of the game and speed in their work-out. Van-Epps looked like a real pitcher. They did hold the locals for two or three innings to a low score and made it look like a real battle, but it wasn't long before the so-called villagers started to hammer Van-Epps.

To hear the Traverse City Sports writer, you would think that Traverse was some metropolis and that one of the reasons why most of the towns in northern Michigan array themselves against his town when questions of importance come forward. However, Traverse City played a snappy game, although the score was 12 to 0 favor of East Jordan in the five innings.

Although Traverse made a desperate struggle in the sixth inning for six runs it was out-classed and the game ended 24 to 7. It was true the locals have played four or five games and Traverse has only practiced a few times but they were the best that Traverse has in stock, notwithstanding any reports to the contrary from the Traverse City Sports Editor, for some of us know most all the ball players in Traverse.

According to the Traverse paper, Bundy was bringin a real ball team to East Jordan until the game was over, then we hear the usual alibi that Bundy Brief and his pick-ups were beaten. Although the men mentioned in the Traverse paper did good work, the real star from Traverse City was manager, Bundy Brief himself. He not only hit the ball but played a whirl wind of a game in the field, engineering a couple of plays and a couple of throws to the plate, but, furthermore, Bundy Brief is always a gentleman and he had a fine crowd of fellows with him. The East Jordan audience figured they had their money's worth watching Bundy alone.

A number of the men on the East Jordan lineup could be mentioned for their work in the field and at bat. Jack McKinnon's pitching was good, also the heavy hitting of Kamradt, Bechtold and others featured, but as Bundy Brief said, you would have to take your hat off to the catching of Ed. LaLonde. To quote Brief, "Look at there, here's the fifth inning and that boy hasn't missed a ball yet". We knew Ed. LaLonde was a good catcher but it seemed good to hear a real sport from outside who know say so.

The locals expect to go to Traverse City some time the first week in February. As there has been no baseball for the last week or two they will be out of practice and it may be Traverse will have a chance to turn the tables.

East Jordan	1	2	3	4	5	6	7	8	9
Traverse City	0	0	0	6	1	0	0	0	7

Batteries—Traverse City; VanEpps, Schulgen; East Jordan; McKinnon, LaLonde. Umpires—Gay, Bulow.

Lansing—New members added during the recent Red Cross roll call conducted by Ingham county chapter totaled 1,165. The total does not include those recruited in the county outside of Lansing, but includes new membership from the community chest fund.

Flint—Consideration of plans for submission to the taxpayers of Genesee County of a bond issue for \$1,000,000 with which to replace the courthouse destroyed by fire, and to combine the jail in the new building, was the principal business at the January session of the board of supervisors.

Alpena—Work was started last week on opening M-10, south from Alpena, in order that automobile traffic could be resumed. There was 10 miles of snow to be plowed in order to open the entire road. Fifty cars were stalled at various points between Alpena and Lincoln awaiting the opening of the road.

Saginaw—A two-foot snake, very much alive and wriggling and a butterfly with faintly tinted wings were added recently to the Saginaw list of hibernating of spring, which already had assumed sizeable proportions through the presence here of a dozen or more chubby, red breasted robins and several pairs of cardinals.

NORTHERN MICHIGAN CLUB ORGANIZED AT KALAMAZOO.

Arthur Spord has been elected president and Miss Eleanor McBride, treasurer of a Northern Michigan Club being organized at Kalamazoo Normal.

Two Petoskey students hold the other officers, Douglas Miller, Vice President and Donald Wade, Secretary. The membership of the Club comprises students from all 21 Northern Michigan Counties. Largely the upstate students are banding together to become better acquainted, but one of their chief aims is to aid new students who come to the Normal strangers to Kalamazoo and unfamiliar with college ways. With a large share of the Normal's 1,900 students registered from Northern Michigan the Club expects to have the largest membership of all campus societies.

Various social events are being planned by the club for the remainder of the school year.

THE CHILDRENS DELAY— ED CHRISTMAS PICTURE

"Fast Mail" which was to be shown at Christmas time but was postponed owing to an epidemic prevalent at that time has been set for the childrens free matinee at the Temple, Saturday afternoon at 1:30 standard time. Owing to the number of children that must be taken care of adults are requested to come at night at which time the same production will be shown at program prices.

Don't forget to have your children start off for the big show in time to see the beginning, special attendants will be on hand to look after the safety of your child.

Time 1:30 standard, Saturday, January 26.

REPUBLICAN STATE AND COUNTY CONVENTIONS.

The Republican State Central Committee have issued a call for a State Convention to be held at Grand Rapids on Wednesday, May 7th for the purpose of selecting seven delegates at large and seven alternates to the Republican National Convention to be held at Cleveland, Ohio, June 10, 1924; also for the purpose of selecting candidates for Electors of President and Vice President of the United States.

Under the call, Charlevoix County is entitled to six delegates; Antrim, five; Emmet, six.

COUNTY CONVENTION

Republican County Conventions for election of delegates to State and District Conventions shall be held on Wednesday, the 23rd day of April, throughout the State.

Muskegon—Muskegon has fewer minor workers than any other city in the state, in the opinion of Benjamin Peterson, public school attendance officer. This condition is the result, he says, of the recent decision of virtually all the industries of the city not to employ any minor who cannot produce a working permit.

Grand Rapids—George Hooper, formerly superintendent of the Victoria Copper Mining Co., in the Upper Peninsula, died here. He was a prominent Mason, being a member of Rockland Lodge, at Rockland, Mich. Francis M. Moore, Co. Commander of Marquette, Palestine Commandery of Houghton and Ahmed Temple of Marquette.

Kalamazoo—The state administrative board authorized the release of \$50,000 of a \$100,000 appropriation for a women's infirmary at the Kalamazoo state hospital. According to Superintendent of Public Instruction Thomas E. Johnson, the plans for the structure virtually are completed and it is planned to expend \$50,000 now and the rest later, perhaps next year.

Kalamazoo—One thousand three hundred and fifty-five births to 980 deaths is Kalamazoo's official record for 1923. This would indicate a population increase of 370. Three more were born than in 1922, while 25 more persons died in the last year than in the preceding one. Of the new arrivals, 703 were boys and 657 were girls. Records also show that 496 males and 484 females died.

Ann Arbor—A gift of \$2,000 has been made to the University of Michigan by Dr. William J. Mayo, head of Mayo Brothers Hospital at Rochester, Minn., to be known as the Mayo Lectureship in Surgery. With it, the university will bring prominent surgeons to address the medical students in the school of medicine, according to the terms of the gift agreement. Dr. Mayo graduated from the University of Michigan during the Eighties.

Crippled Pumps Peril Charlevoix

City Without Fire Protection For a Limited Time

Charlevoix, Jan. 22.—Early Tuesday morning the meter at the Charlevoix pumping station, which had frozen during the night, burst, flooding the station and putting the motors and pumps out of commission. This leaves Charlevoix without water supply for fire protection. Many householders during the early hours of the morning were busy trying to thaw out their supposedly frozen pipes, although the temperature had been above the danger point for at least six hours previous. Schools have been closed because water is not available for the heating plants.

The fire department has issued orders to use special care to guard against fire during the time the mains are out of commission. Supt. Bridge of the water works states the water is four feet deep on the pumping station floor and it will take some time to drain this off and get down to the broken meter, which is on the big main leading to the city water tower which supplies the city. It is believed the damage can be repaired within the next 24 hours.

Lansing—The state supreme court recently ruled that boards of education are virtually supreme in administering the affairs of the public schools.

Charlotte—The Baptist church was recently destroyed by fire of unknown origin causing a loss, according to trustees, of \$6,000. The structure will be rebuilt.

Ann Arbor—Thirty-three members of the scientific faculties of the University of Michigan have been elected to membership in the Junior Research society.

Alpena—In spite of the thinning ranks of the veterans of the Civil war, there were 50 members of the G. A. R. and W. R. C. at their annual meeting here recently.

Alpena—The Rev. H. A. Webster, of Manistiquie, has accepted a call to the Alpena Baptist Church. He takes the place of the Rev. I. M. Compton, resigned, who has gone to Wayne.

Marshall—Some farmers' wells near here have gone dry as the result of the construction of the Nottawa Creek drain which also lowered the level of several lakes. This drain cost \$237,445.

Battle Creek—The veteran bureau's \$2,300,000 psychiatric hospital now under construction at Camp Custer will be ready for occupancy by July 1, has been announced by Captain A. F. Dershimer, construction quartermaster.

Ann Arbor—Harry D. Hoey, of Youngstown, O., a senior literary student of the University of Michigan, has been appointed managing editor of the Michigan Daily, official student newspaper, by the board in control of student publications.

Lansing—Despite the fact that Michigan's geological history records the occurrence of numerous earthquakes in this state in the past, no alarm need be felt that any serious disturbance will take place in the future, according to R. A. Smith, state geologist.

Charlevoix—There are indications of considerable glass rock sand in certain localities in Ash Township, according to reports here that drillers operating for the Ford Motor Co. had struck 67 feet of pure white glass sand rock in a hole. During the drilling a steel casing is used.

Pontiac—Oakland County supervisors failed to adopt the ordinance prepared at the suggestion of the county road commission which designated State and county trunk highways as through streets and would have compelled all vehicles to stop or enter them. The vote on the measure was 13 to 10 and it required 18 votes, or a majority of the board to pass it.

Flint—Four Michigan veterans have accepted commissions in the officers' reserve corps, according to announcement by the war department. They are: Howard R. Coggins, Flint, second lieutenant, field artillery; Ray F. McDougall, Lansing, first lieutenant, quartermaster corps; Iva W. Swift, Lansing, second lieutenant, field artillery; James L. Parkhurst, Flint, second lieutenant, infantry.

Ann Arbor—The proposed Michigan Archaeological society, discussed in scientific circles for the last year, was organized at a meeting called recently at Lansing. The purpose of the society, according to professors of the University of Michigan, will be to study and preserve pioneer relics, as well as archaeological specimens left by the Indians and the prehistoric inhabitants of Michigan.

E. Jordan Club at Spring Lake

They Hold Banquet on Saturday January, 26th.

Below is the text of a card sent out to members of the Muskegon-Spring Lake East Jordan Club:

Come one, Come all
To the Banquet and Ball
Of the East Jordan Club,
At the Spring Lake Hall.

The East Jordan Club invites you and your family and any of your East Jordan friends to a Pow Wow, Saturday, January 26th, 1924, at the Spring Lake Masonic Temple.

Pow Wow 4:00 to 6:00
Chow Chow 6:00 to 7:00

7:00 to 7:30, Dancing, Cards,
Billiards and Mah Jong.

Committee has arranged for eats,
Just bring your appetite.

How many please? Notify S. J. Risk,
Sec'y-Treas., 401 Union Nat'l Bank
Bldg., Muskegon, Mich.

For any further information phone
2074 or 81962 Muskegon.

We have a Club of about 40 former
East Jordan families in and near here.

REPORT OF EAST JORDAN CEMETERY (SUNSET HILL) FOR YEAR OF 1923.

WORK COMPLETED

Trimmed 52 poplar Trees.
Removed front fence.

Built a tool house from boards left
from fence.

Raked entire cemetery once.

Hoed shrubbery 5 times and put in
fertilizer.

Filled in 10 graves.

Removed 5 curbs.

Trimmed hedge in front of cemetery
Pruned shrubbery once.

Sprayed shrubbery 4 times.

Straightened 5 tombstones.

Repaired 10 Lots for individuals.

Painted front tool house.

Made 8 flower beds.

Planted 1200 Gladioli Bulbs.

Filled out and mailed 500 statements
to Lot owners.

Cut the grass on entire Cemetery 20
times and kept water running according
to city rules.

Replotted east and west allies in 2nd
Addition into 50 Lots, worth \$750.00
for further use.

Completed records of entire ceme-
tery and placed on file, also blue prints
of every Lot.

ACCOUNT OF EXPENSES.

Extending Water Main	\$ 290.92
Garden hose, mds, lawn mower and fertilizer	225.83
Digging graves	190.00
Labor	746.73
Total	\$1453.58

RECEIPTS

Sale of Lots	\$ 255.50
Members who paid for care of Lots	188.50
Rec'd for digging graves	190.00
Total	\$ 634.00

Expenses—Labor and all acct. \$1453.58

Rec'd from all Sources \$ 634.00

Total \$ 819.58

On hand—50 Lots for future sale
worth \$750.00. 700 feet garden hose,
1 pipe wrench, 2 law mowers, 1 screw
driver, 3 shovels, 1 saw, 1 hammer,
1 grub hoe, 2 hoes, 1 sickle, 2 rakes, 12
sprays, 2 grave boards, 1 drag rake, 2
axes, 1 broom, 1400 Gladioli Bulbs, 1
nose.

We thank the people who pay and
help to support the Cemetery.

MRS. ALVERETTA ROY,
Commissioner.

Muskegon—The old spell-down is to become a regular feature of the work in the Muskegon grade schools. Miss Marjorie Kinnun, assistant superintendent of the schools, says she doubts that the children of today are as good spellers as their parents. She believes the way to correct the fault is by staging the spelling bees. "Spelling today in the schools is a mechanical process," says Miss Kinnun. The contests will be between teams from the various schools.

Marquette—What probably is a new record for winter motoring in the Upper Peninsula was completed recently when Frank Marlowe, of this city, completed a trip from Ironwood to Marquette, which required two days and a half. The distance is 157 miles. Marlowe encountered snow drifts as high as five feet, but managed to force the car through on its own power. He refused offers of assistance by drivers of horses along the road, but had to make good use of a shovel.

"ROUNDTABLE" HAVE ENJOYABLE MEET AT TRAVERSE CITY

The Northwestern Michigan Roundtable, which includes the Superintendents, Principals, Commissioners, and School men of northwestern Michigan, met at Traverse City, Friday night and Saturday, on Jan. 19th.

There were about thirty men in attendance. W. T. Henderson, of the University of Michigan, gave an exceptional talk on "Democracy," also Judge Farm Gilbert gave a short talk at the Roundtable Banquet in the Whiting Hotel.

Supt. Duncanson of East Jordan reports one or two items of interest for local people. A resolution was passed in favor of the bill to redistribute the primary money, which is also sponsored by the State Board of Education. The school men were unanimously in favor of this resolution and the opinion was generally expressed that this bill is going to pass, perhaps at the next legislature. It will mean a great deal to East Jordan and all northern Michigan as well as the rural districts all over the state. It will mean something like \$22,000 less taxes to this community alone.

RICHARD DAVIS MAGICIAN, MAKES FINE HIT

A good sized audience enjoyed the work of Richard Davis who appeared as the third number of the Lyceum Course. A good magician is always enjoyed by the majority of people, but Davis proved more than the ordinary magician. He not only did his magical work with unusual skill but his repartee was humorous. He did many things that had been done before, finding money in the pockets of some of the men in the audience, along with a large number of handkerchiefs and the American flag in Henry Clark's coat, as well as making Roy E. Webster cough up a few 50c pieces, besides making some playing cards dance around on the stage and numerous other magical stunts just as interesting.

He ended up his program by his trunk trick which was among the cleverest ever seen by a local audience allowing himself to be hand-cuffed and tying a rope around his neck, having it knotted five or six times and slipping into a very strong sort of mail sack and locking the trunk and strapping it both ways, and got out in five seconds, as well as to get back in and tying up in a similar position in about the same length of time. I think Dr. Ramsey, who did the locking of the trunk, etc., was as badly fooled as any of the others.

It was a real evening's entertainment and thoroughly enjoyed by a good sized audience.

The next number of the Lecture Course and the last one should be about the best. It is a musical number given by the Skibinsky-Reed Duo.

There will be Mr. Alexander Skibinsky and Myra Reed and will close the Course Monday Feb'y 4th, at 7:30 standard time. There are many people in this city who no doubt will enjoy this number above any so far given, for it is seldom we have a musician of the rating of Skibinsky in the smaller cities.

FARMERS MISS BET WITH HOME GARDEN.

Vegetable Production For Table Supply Often Neglected.

Michigan farmers frequently overlook opportunities for production of supplies of fresh vegetables in their home gardens, in the opinion of Prof. E. P. Lewis, of the horticultural department at the Michigan Agricultural College.

Careful planning and proper care of the farm garden will supply fresh vegetables throughout the entire growing season, an important consideration which many farmers are not giving attention, according to Lewis. "In order to obtain the best use of the land, and have a continuous supply of vegetables, it is essential that the garden be planned carefully in advance," says Lewis. "In this way the work of planting and caring for the garden may be greatly simplified.

"One of the first things to consider is the arrangement which will reduce the labor to a minimum. The vegetables should be grouped according to their cultural methods and the number of plantings made as small as is consistent with the temperature require-

Highway Cross- ing Accidents

Campaign Being Made To Re- duce The Number.

Preliminary to an intensive campaign to be inaugurated in an effort to bring about a reduction in the number of grade crossing accidents which annually cause thousands of casualties, the American Railway Association today announced plans for a nation wide contest, open to the general public, for the most expressive poster and slogan to be used throughout the nation in connection with the crusade to save lives at railroad crossings.

For the first prize, \$500 will be paid to the person submitting the best poster with \$200 for second prize and \$100 for third. In addition, \$100 will be paid in cash to the person submitting the best slogan for the campaign.

Selection of winners will be made by a special committee composed of persons of national prominence. The personnel of the Committee will be announced later.

The Contest will be conducted under the auspices of the Committee for the Prevention of Highway Crossing Accidents of the American Railway Ass'n. H. A. Rowle, 90 West Street, New York is Chairman of this Committee. The contest will close on February 11 at which time all persons must have their posters in the hands of the Committee.

The campaign to reduce the number of grade crossing fatalities is stimulated by the fact that in 1924, it is estimated that not less than 2500 persons or more than 200 a month, will lose their lives at railroad crossings due almost entirely to automobile accidents while approximately 6,000 persons will be injured, or about 500 a month. Another reason for conducting an intensive campaign is the fact that during the present year of 1924 it is estimated that there will be about fifteen million automobiles in use, an increase of approximately twenty per cent over the preceding year.

The railroads are annually doing everything possible to reduce the number of grade crossings. In order further to protect the lives of motorists and others at such places new improved safety devices are constantly being installed. To eliminate all grade crossings, however, would be not only a physical but a financial impossibility on the part of the rail carriers. Reports received by the Interstate Commerce Commission show that in 1922 there were 256,362 grade crossings and to do away with these would mean an expenditure of approximately five billion dollars more than the tentative valuation made by the Interstate Commerce Commission of all the railroad properties used by the carriers for transportation purposes. The railroads did in 1922, according to the Commission, eliminate 706 grade crossings at an estimated cost of approximately \$70,000,000.

ments of the various crops.

"One of the most important points in a well planned garden is the provision for continuous supply. This is accomplished in two ways: first, by making successive plantings of the same variety, and second, by planting early, intermediate, and late varieties at the same time.

"For example, plantings of Golden Bantam sweet corn may be made two weeks apart, for Mammoth White Cob, Golden Bantam and Evergreen may be planted at the same time. In the same way such crops as peas, lettuce, onions cabbage and beans may be made to cover the entire growing season.

"Another cause of failure in the home garden is the use of poor seed or the indiscriminate selection of varieties. In the well planned garden the choice of varieties is carefully made far in advance so that the seed may be secured from a reliable source before planting time."

To Whom It May Concern.

I will not be responsible for any bills contracted by my son—Ivan Harrington in my name.
adv. 9-3 ED. HARRINGTON.

ENJOYED A GOOD NIGHT'S SLEEP

"I wish to say that FOLEY PILLS worked O. K. on me in a couple of hours. I took a couple of them, went to bed and had a good night's sleep," writes Con Thiel, 115-E. Columbia St., Fort Wayne, Indiana. FOLEY PILLS are a diuretic stimulant for the kidneys. Hise's Drug Store. adv.

Local News

W. F. Porter is at Grand Rapids on business.
Fred Nelson was a Traverse City visitor, Thursday.
Miss Marjorie King went to Grand Rapids, Wednesday.
Pete Balow and Clarence Bowman were Charlevoix visitors, Thursday.
Mrs. Swayze Smith left Thursday to visit her daughter, Mrs. Ted Malpass at Cadillac.

Dancing at the E. P. Hall every Saturday night. Good music. Free admission. Dance Bill—\$1.00. adv.
All kinds of Furniture, Stoves and Ranges, etc., sold on easy payments at C. J. Malpass Hdwe. Co. adv. t. l.
Call Phone 24 for Expert Storage Battery and Electrical Service.—The Battery Shop, L. Miles. adv. 27ff.
Wanted—Four Foot Fuel Wood delivered to yards.—Michigan Iron and Chemical Co., Phone 38, East Jordan. adv. 3-3.
Mr. and Mrs. J. W. Foster and son, were at Bellaire this week called there by the death of her mother, Mrs. H. L. Richards.
Mrs. C. G. Mills returned to St. Louis, Mo., Thursday, after a month's visit with her parents, Mr. and Mrs. James R. Howard.
J. F. A. DeJordy, Chiropractor, Office hours from 10:00 to 3:00, fast time Monday, Wednesday, and Friday, regularly at the home of Mrs. C. Spring on Second Street. adv. 3x2

Reveals Big Counterfeit Plot.
Chicago—A \$100,000 counterfeit plot, linking Kansas City, Chicago and Denver was revealed by secret service operatives here recently. Ralph Oldham, former Chicago policeman, and Louis Kettler, alleged implicants, have been sent to Denver for trial, federal authorities stated.
Astronomer's Admit Teutons.
Utrecht, Holland—At the international meeting of the directors of meteorological institutions it was unanimously agreed to re-admit German and Austrian astronomers into the organization. Professor Hergesell, of the Berlin university, has been named as Germany's representative.
Woman Dead, Revived.
New York—Found unconscious in a gas-filled room recently, Mrs. Margaret Nolan, 100 years old, was pronounced dead by ambulance physicians. Five minutes later a gas company pulmotor crew arrived. In an hour Mrs. Nolan asked for a drink of water, and soon afterward proved to be in normal health.
Egypt's Flag Changed.
Cairo—The familiar red and white Egyptian flag disappeared last week, when the King issued a decree maintaining the design of a white crescent and three stars, but substituting for the former red ground green, which is the color entitled to be worn by those who have accomplished the pilgrimage to Mecca.
Has Many Coast Ports.
Ottawa—There are 300 ports and harbors on both the eastern and western coasts of Canada. Ten years ago there were 240 such ports. The majority of the 300 harbors are, of course, small affairs, the big ports not exceeding six. However, one of Canada's ports, Montreal, ranks sixth among the world-ports.
Floating Mines Peril Ships.
Christiania—Mines scattered over the North Sea during the war continue to be washed up along the Norwegian coast, and although they have been drifted for four or five years, most of them are active. One mine exploded recently near the Torbjornskjer lighthouse and threw a column of water 140 feet into the air, the explosion being heard for many miles.
Huerta's Funds Given His Wife.
Mexico City—The private funds of the rebel leader, Adolfo de la Huerta, which were held by the Monetary Commission, have been delivered to Señora de la Huerta, and she is en route to the United States under a guaranty of protection given by President Obregón. The order to give the rebel leader's funds to his wife also were issued by the president.
Child Leaves Italy.
Rome—The American ambassador, Richard Washburn Child, was received by the king in farewell audience last week. The sovereign was most cordial, saying he was extremely sorry that Mr. Child was leaving, and hoped that he would be able to carry to America influence that would contribute to continued understanding and co-operation between the United States and Italy.
Hurley Named on Finding Board.
Washington—Edward N. Hurley, Chicago business man and formerly chairman of the chipping board has been nominated by President Coolidge to the Democratic vacancy on the debt funding commission. The last congress amended the law to provide for three Democratic members, and shortly before the adjournment of congress last March Mr. Harding appointed Representative Crisp, of Georgia and former Representative Olney, of Massachusetts.

First Methodist Episcopal Church
Rev. Harry Hulme, Pastor.
Sunday, Jan'y 27, 1924.
 10:00 a. m.—Public Worship.
 11:15 a. m.—Sunday School.
 6:00 p. m.—Epworth League.
 7:00 p. m.—Gospel Service. Music by the Epworth Choir.
 8:00 p. m. Thursday—Epworth Choir practice.
Thursday 7:00 p. m.—Prayer Meeting
 A cordial welcome awaits everybody to attend the above services.

EAST JORDAN LUMBER Co.

A Few Coats

With Fur Collars

THAT WE WILL CLOSE OUT

At 1-2 Price

These Coats Were Bargains at the Regular Price, and Now They Are DOUBLE Bargains.

DON'T MISS THEM!

East Jordan Lumber Co

Wanted—Four Foot Fuel Wood delivered to yards.—Michigan Iron and Chemical Co., Phone 38, East Jordan. adv. 3-3.
Louis Peters of this city was taken to the Traverse City State Hospital for treatment, Tuesday. Dep'y Sheriff Cook accompanied him.
Mrs. Ray Markey was called to Detroit, Wednesday by the death of her brother's wife, Mrs. Dee Clifton, a former East Jordan resident.
Wanted—Teams to haul wood at East Jordan Michigan Iron & Chemical Co. Inquire of S. G. Sedgman, Wood Supt., Phone 216. adv. 4-3
A Girls' Basketball Game will be held at the High School Auditorium this Friday evening, Jan. 26th, between Marcelona H. S. girls and East Jordan H. S. girls. Game called at 7:00 o'clock.
Friends here are glad to learn that Miss Almee Doerr, a former East Jordan girl, who recently underwent a serious operation at a hospital in Berkeley, Calif., is rapidly improving. From the hospital, she went to the home of Mrs. F. G. Falls, a sister of Mrs. F. G. Falls, a sister of Mrs. C. A. Brabant of this city.
Ruby Hazel, infant daughter of Mr. and Mrs. Denzil Wilson, passed away at the home of her parents in Wilson township, at an early hour Sunday morning, Jan'y 20th. She was two months, nine days of age. Services were held from the M. E. Church in this city, Tuesday afternoon, conducted by the pastor, Rev. Hulme. Interment at Sunset Hill.
Duncan McMillan passed away at the home of his son, Dan McMillan, at Hulbert, Mich., Jan. 1st. Duncan McMillan was born near Toronto, Ont., in Dec., 1838. In 1861 he was united in marriage to Grace McKaye of that place. In 1872 they moved on a farm in Echo township where he lived until five years ago when he moved with his sons to the Upper Peninsula. Besides his wife, there are left to mourn his loss six sons and three daughters, viz.—Dan of Hulbert, Mich.; Dugal, Harry, John and Robert of Trout Lake; Duncan of Detroit; Mrs. Flora Papineau of Traverse City; Mrs. Thomas Nowland of Charlevoix; Mrs. Charlie Hodge of Garrison, N. Dakota. Deceased is also survived by thirty-two grand-children and twenty-five great-grand-children. Funeral services were conducted by Rev. Leonard of Marquette. Interment at Hulbert.

Presbyterian Ladies Aid will meet at the church parlors, Thursday, Feb'y 7. Plans for an apron sale are being made. Bring any patterns you may have and also goods. This is to help pay our pledge to the building fund. Mesdames Brabant and Gidley, hostesses.
After many requests for a return date of Harold Lloyds "Safety Last" owing to the many local people who were busy at the time same was previously shown. A double bill has been arranged at the Temple for Friday, February 1st, and will include "The Shock" starring Lon Chaney. adv.

Spotless Town Named.
Chicago—"Spotless Town" in America is St. Paul, Minn., according to a survey completed here by the National Association of Building Owners and Managers. The survey also revealed that Pittsburgh building managers have harder time keeping their buildings clean than any other.
American Ban: May Quit China.
Shanghai—Announcement of the Asia Banking Corporation's proposed withdrawal from the Orient has shaken confidence in the stability of American interests more than any other event in recent years, say high American officials in close touch with commercial conditions in China.

St. Joseph's Church.
D. M. Drinan Pastor.
FIRST SUNDAY OF MONTH
 St. John's Church—Low Mass at 8:00 a. m.
 St. Joseph's Church—High Mass at 10:30 a. m.
SECOND SUNDAY
 St. Joseph's Church—Low Mass at 8:00 a. m.
 St. John's Church—High Mass at 10:30 a. m.
THIRD SUNDAY
 St. John's Church—Low Mass at 8:00 a. m.
 St. Joseph's Church—High Mass at 10:30 a. m.
FOURTH SUNDAY
 St. Joseph's Church—Low Mass at 8:00 a. m.
 St. John's Church—High Mass at 10:30 a. m.
Mass on Holidays and Devotions as announced.
 The public is at all times heartily welcomed to these services.

Clipping from a newspaper, mailed to The Herald by Mrs. Shearer from Vancouver, B. C., gives the following account of the death of her father, Charles W. Bechtel, who was a former East Jordan resident.—"Charles W. Bechtel, aged 75 years, died Thursday, Nov. 1st, after an illness of about 11 days. He came here a few years ago from Canada. Besides his widow he is survived by one daughter. While here he made a large circle of friends. He was a member of St. Paul's M. E. Church, where the funeral was held at 11 o'clock last Sunday morning, conducted by the pastor, Rev. W. O. Bennett. Interment was made in Greensboro Cemetery.—[Note, the clipping is from a Maryland newspaper, town not named.]

Continued Spread of Alfalfa Pest in West
Damage by Weevil Cause of Apprehension.
 (Prepared by the United States Department of Agriculture.)
 Continued spread of the alfalfa weevil throughout the Great Basin states and the increasing damage which it is causing in some of these states, notably Idaho, have caused great apprehension, especially throughout the more newly infested regions. The insect, according to the United States Department of Agriculture, now occupies practically all the alfalfa-growing regions of Utah and Idaho, and is found in parts of Colorado, Wyoming and Nevada. It has also been discovered in eastern Oregon and more recently has been reported from Sierra county, Calif.
 An efficient means of control has been evolved by the bureau of entomology of the department in the use of an arsenate of lead spray which usually gives satisfactory control when applied once during the season. In southwestern Idaho, however, it was discovered that two sprayings are necessary in order to obtain satisfactory control, because of the fact that the weevil continues laying eggs throughout a longer period than elsewhere. The one thing apparently needed in the aid of artificial control of the pest, says the department, is some more efficient means of placing the available information on control before the alfalfa growers who are most vitally concerned.
 As an additional means of control, insect parasites of the alfalfa weevil will be introduced from Europe. An expert who was sent to France to complete arrangements for the introduction of these parasites has recently returned after accomplishing his mission, and shipments of parasitic material will begin to arrive in this country next spring. It is hoped by these means to supplement the good work of a parasite already introduced from France, and thus eventually to restore the balance of nature and secure natural control.

Charles T. Clifton, Pastor.
Hours of services:
 (Eastern Standard Time)
 Sunday School—11:00 a. m.
 Morning Services—12:00 a. m.
 Evening Services—7:30 p. m.
 Wed. Prayer Meeting—8:00 p. m.
 The public is cordially invited to attend these services.

CHARLEVOIX WINS BASKETBALL GAME FROM EAST JORDAN
 Charlevoix showed that they were one of the best teams in northern Michigan when they won from the locals last Friday night, 20 to 4.
 This seems like quite a top heavy score but Charlevoix presents a heavy, fast, veteran quintet and has already played three or four games. The locals do not mean to make any alibies but it is a well known fact that there is a great deal of difference in the Charlevoix court and the East Jordan gymnasium, especially the height.
 It will be a good game when Charlevoix comes to the local floor. However, it is said the game was a great deal better than the score would indicate. Both teams played a clean game and Charlevoix used them well. Aldred of Boyne City was a very satisfactory referee. Dagwell and Todd starred for Charlevoix.
 The week end scores for some of the Basket Ball games of interest to local fans were: Petoskey 19; Kalkaska 4; Manistee 10; Traverse City 6.
 Some local fans saw the Manistee- Traverse game and this score should be at least three to one in favor of Manistee, for Traverse was completely outclassed. Coach White has a fine Basketball team.
 One of Traverse City's star men, Mr. Copeland, was out of the game. Traverse does not reveal just why. It seems to be a dark secret that nobody in northern Michigan knows anything about. Some of us are rather suspicious. Traverse had the northern Michigan championship already in so this is a severe set back for Cub Spruit's team.

Temple Theatre Program

SATURDAY ONLY MATINEE and EVENING, Jan'y 26th
 Matinee, 1:30 o'clock Evening, 7:00 and 9:00
 Every child in the community will be here. See that yours gets away on time to be a guest of the City of East Jordan at the delayed Community Christmas.

FREE FREE TO THE CHILDREN FREE FREE

"FAST MAIL"

Starring Charles (Buck) Jones. Doors will be open at 1:30 p. m. Special Attendants will be on hand to look after the safety of your child. This production will be shown at regular admissions at night. Adults wishing to attend the matinee will be charged full admission.
 For your added pleasure, a Gang Comedy is booked for the occasion.

SUNDAY and MONDAY, Jan'y 27th and 28th

"DULCY"

Starring Constance Talmadge. Constance knows you love to laugh at the discomfort of others, so she made this to give you a treat. The laughs are on her, she admits. That is, all but the last laugh. And as Dulcy means dumbbell, you'll have to see it to understand.

TUESDAY NIGHT Only, Jan. 29th, FAMILY NIGHT

"RAILROADED"

Starring Herbert Rawlinson.
"Steel Trail" Starring William Duncan
 Two Admissions For The Price of One. Bring the whole family and save half the admission price.

WEDNESDAY and THURSDAY, Jan'y 30 and 31

SPECIAL Richard Barthelmess in SPECIAL

"FURY"

"Fury" was directed and created by the same author, star and director that made "Tol'able David" famous. Here's the drama of a limehouse slaver who did not believe all women bad. A thrilling sea story done in typical Barthelmess style.

FRIDAY ONLY, FEBRUARY 1st
BIG DOUBLE BILL at PROGRAM PRICES.

"THE SHOCK"

Starring Lon Chaney
 Owing to the many requests "SAFETY LAST" has been rebooked for this day only. "Safety Last" with Harold Lloyd starring holds all records for the world on the numbers of paid admissions.

Lansing—The State Administrative board granted a request for \$10,000 for a refrigerator plant at the Ionia reformatory, gave the Newberry state hospital \$16,000 for improving its dining hall and the Traverse City state hospital \$1,200, for improvements in its industrial building. A request from the state industrial school for boys for \$163,200 to complete its heating plant, on which \$98,000 already has been spent, was referred to a committee.
Lansing—The sale of \$3,000,000 worth of highway bonds, to meet payments on contracts awarded and work done in the 1923 building season was authorized by the state administrative board recently. Bids will be received on 4, 4 1-4 and 4 1-2 per cent basis. The board also ordered the transfer from the 1923 automobile license to the highway sinking fund of an amount sufficient to care for interest in 1924 and 1925 on the total outstanding bonded indebtedness.
Ann Arbor—Though it draws its students from every state in the Union and from practically every civilized nation in the world the University of Michigan remains, primarily, a "state university." Of the 11,809 students enrolled during the academic year of 1923-24, 7,159 were residents of the state, the remaining 4,641 non-resident undergraduates lending the cosmopolitan touch to the institution. Wayne, Washtenaw and Kent counties furnish the largest number of students.

FOLEY CATHARTIC TABLETS
 Get a bottle of FOLEY CATHARTIC TABLETS for constipation. Easy and pleasant to take; prompt and effective in results. "Foley CATHARTIC TABLETS have helped me a lot. I was constipated very bad but am fine now," writes Miss Mildred M. Keene, 442 Essex St., Bangor, Maine.—Hite's Drug Store. adv.

Worthless Filler Adds to Cost of Plant Food
 The farmer who wishes to buy plant food for his crops most economically will consider three things—filler, freight and fertilizer.
 This is a statement from the New York College of Agriculture at Ithaca. The soils men at the college point out that farmers who buy low-analysis fertilizers not only pay a good round price for the filler, which of course contains no plant food, but they also have to pay freight on this worthless material, thereby making it a double liability.
 The use of high-grade acid phosphate, where phosphate alone is needed, the purchase of high-composition chemicals for home mixing, and the use of high-analysis mixtures when factory mixed goods are used, will go far to eliminate freight and fillers and at the same time furnish the best of fertilizers.

Something to Think About

By J. A. WILSON

BROKEN PURPOSES

THAT very pleasant case with which many of us break our hearts and turn aside in favor of some other purpose in the pursuit of some elusive object, does not argue well for our future content or prosperity.

The gray hairs that fringe our temples and the hard lines about our mouths bear eloquent testimony to the pitiful job we have made in holding steadfast to a fixed course.

We humans, at least some millions of us, are fickle, impetuous and impatient, inclined upon the slightest provocation to change our minds over night, at a sudden veer of the golden weather-cock.

When we wake in the morning, we are not quite sure whether we are steering our craft toward the north star or heading it for the southern cross.

But we do know that the purpose of yesterday is gone. We have a new one which appeals directly to our lofty ambition, so much so, indeed, that we draw in our chin, puff out our breast and stride briskly down the street, forgetting in our elation to acknowledge the smiling nods and cheery good mornings of our friends.

By night our certitude has somewhat withered before the intense heat of cogitation, and we are filled with doubt.

For years and years we have gone around and around with the compass. But on this occasion everything is different. We cannot move.

Our great project, for which we have been husbanding our strength, is hidden somewhere in the mist, our sight is defective, our hands are unsteady and there is a tug at the heart that we cannot much longer endure.

Event has succeeded event, not as we expected, but as our solicitous friends have foretold. Our old smiling habit is gone. We are discouraged down in the depths.

The world goes on merrily. There is no tenderness in its heart. It cares not a whitling whether we sing or sigh, whether we are clothed in purple or in tatters and rags.

And some of the merriest are carrying a load in their souls, because they, too, have broken their purposes. But they refuse to yield to discouragement.

They have resolved to try again, and to keep on trying as fast as ever they fall, trusting not in themselves for sustaining strength, but in the higher power—being prodigals seeking their father's house!

MOTHER

By GRACE E. HALL

IT SEEMS we scarcely knew her. In her many years on earth, Nor realized 'til she had gone, Her wondrous woman's worth; To much she gave, too freely toiled For others, all the while, Too much we blindly let her give— Forgetting thanks or smile.

Now, looking back across the years, Our hearts are wrung with pain, Remembering the price she paid That we—her own—might gain; She placed no price upon her deeds, Love prompted every one; We simply knew she filled our needs— Until her work was done.

Those toll-worn hands had never meant So much to us, until Upon her quiet breast they lay, So white and cold and still; What service they had done for us We never paused to say, Until we missed their ministry— When she had gone away.

The thin gray hair upon her brow Was like a halo-light, But we had never known it— 'Till she went away that night; We longed to tell our love at last, And how we held her dear, But oh, the hour had glided past— Our words she could not hear!

Heart-breaking tears! At last we saw With vision clear and bright, The beauties of that noble soul Who went away that night; With aching hearts we knew, too late, There never was another So fine and true the whole way through.

As she whom we called—Mother.

TOO BRAVE

Waiter—What's the matter with the omelet?
Customer—The eggs didn't know when they were beaten.

Only a few months ago, handsome Jean Arthur, the "movie" star, was earning her way through a New York college. Today she shares feminine lead honors in a prominent production. Five feet three, of slender brunette loveliness, at the age of seventeen, Miss Arthur finds herself a person of importance. Starting as a model for fashion photographers, she soon attracted the attention of a prominent producer. Her rise from minor roles to leads quickly followed.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day, lucky jewel

RUTH

ONE of the loveliest names in the feminine category is Ruth. It comes to us shrouded in mystery and bearing the tragic sweetness of Biblical story. The origin of the name has never been satisfactorily determined. Some say that it comes from a Hebrew word meaning "trembling"; others that its origin lies in a word from the same language meaning "joined together," but all agree that it must have some connection with the word "reuth" signifying beauty.

As an English common noun, Ruth has come to mean sorrow, pity, compassion. That it receives this interpretation from the story of the gentle and faithful Ruth of Biblical history, is open to belief. Certainly the most famous Ruth of the ages was the lovely daughter-in-law of Naomi, who followed her into her own far country and gleaned the grain from the fields that they two might be fed. Artists have immortalized Ruth, the gleaner, standing in the fields, superb in her full-blown Hebrew beauty with the sheaves of grain clasped to her breast.

It was Ruth who voiced that exquisite promise which is synonymous with devotion in the world's famous utterances:

"Whither thou goest, I will go; and where thou lodgest, I will lodge; thy people shall be my people; and thy God my God."

According to the Biblical story, Ruth became the wife of Boaz. No nickname has ever been evolved for Ruth. The name preserved its dignity and pathetic sweetness throughout its history. It has been adopted, in a popular sense, only by the English language. In accordance with its significance, the pearl has been assigned Ruth as her talismanic stone. Though the pearl, in this instance, probably means tears, it will undoubtedly produce the opposite effect upon the wearer, just as the opal ceases to be unlucky for those whose birth month is October. Pearls, worn by Ruth, will counteract her heritage to sorrow.

Thomas Hood expresses the poet's ideal of Ruth:

She stands breast high among the corn, Clasped by the golden light of morn, Like the sweetheart of the sun Who many a glowing kiss has won.

Don't Kill the Turkey

Shoppers gathered after the dark had been put in a quantity followed by some few-ten minutes later, and the turkey was being prepared for the table. The turkey was prepared for the table. The turkey was prepared for the table.

Destroy Chinch Bugs by Burning Off Vegetation

Considerable damage was done by chinch bugs last year. This pest is carried through the winter in the mature state, hiding in fence rows and other places where they can find protection under grass and weeds through the winter season. They are now all congregating in places of that sort and the way to get rid of them is to burn off the vegetation. This will destroy many of them and those that are not killed in that way will find no protection and sooner or later will succumb to the cold.

Solve Wheat Problem by Feeding All Live Stock

Bread-saving habits formed in wartime and needlessly continued now are limiting the consumption of wheat in this country to the disadvantage to both producer and consumer, say officials of the Department of Agriculture. They assert that a return to pre-war food habits in the use of wheat by the public and the feeding of low-grade wheat to live stock would greatly help to solve the wheat problem.

Hen House Ventilation Is of Much Importance

Ten hens breathe off over a pint of water a day. Are you providing ventilation to get this out of the house.

Steam-Sterilizing Milk Cans Destroys Bacteria

That it pays to steam-sterilize milk cans has been shown conclusively by tests made by the United States Department of Agriculture. Unsteamed cans having a bacterial count of 154,000,000 contained 18,000,000,000 at the end of 24 hours, while steamed cans having a count of 3,400 immediately after steaming and left practically dry had 7,800 in the same time. The bacteria count on steamed cans left damp for 48 hours increased from 4,400 to nearly 6,000,000.

The Cost of a Car

is no measure of its value

These are the things to consider

THE cost of a car depends in large part on volume and efficiency. It is no criterion of value.

Studebaker builds 150,000 fine cars yearly. All of them are Sixes. The main costs are divided by that enormous output. Thus at prices of \$975 and up we offer the utmost in quality. We offer maximum values.

Don't judge these cars by prices. Under other conditions they might cost twice as much, yet offer less than these.

Some major costs

Quality cars require costly facilities. Studebaker has \$50,000,000 invested in modern plants and equipment. \$8,000,000 in drop forge plants alone. \$10,000,000 in body plants, to carry out the Studebaker standards.

There are 12,500 up-to-date machines employed to build these cars. Some are enormously expensive. Few outputs justify such facilities. Then parts must be bought outside, and profits paid to others.

Our Department of Research and Experiment employs 125 skilled men. It makes 500,000 tests per year to maintain our standards.

Our Bureau of Methods and Standards fixes the requirements for every part and detail. 12,000 inspections are necessary for each car to insure against flaws and mistakes. We employ 1,000 men to make them.

Cars like the Studebakers cannot be built without such facilities, such research, such care. Yet enormous output alone makes them possible at Studebaker prices.

The best we know

Studebakers represent the best we know. And with our army of engineers, with our wealth of experience, we probably know what is best.

We use 35 formulas for steels. Each is best suited to certain parts, as proved by years of tests. On some steels we pay the makers a bonus of 15% to get them exactly right. There is no room to excel us there.

We machine the entire surface of each crank shaft, as was done on Liberty Airplane Motors. That extra cost is heavy. But thus we get

ations, including 15 coats of paint and varnish.

Open cars have real leather cushions. They cost, over imitation leather, about \$25 per car.

No closed cars could be more luxurious. That lining of Chase Mohair is made from the soft fleece of Angora goats. A velour lining would save about two-thirds that cost—up to \$100 per car.

Note how every detail denotes infinite care. That, as you know, is expensive.

Note the completeness of our larger models. The nickel-plated bumpers, extra disc wheels with cord tires, a steel trunk, a courtesy light. These are rare extras, even on the costliest cars.

Nothing is stinted

Compare part by part with any rival car. Studebaker will show you some scores of advantages.

Then consider Studebaker history. For 72 years this name has stood for quality. When people rode in carriages, Studebaker built the best. Now those same traditions are applied to motor cars alone.

Consider Studebaker records. Mark how these cars in service have multiplied demand, until people last year paid \$200,000,000 for Studebaker cars.

Consider their service records. One Studebaker car, built in 1918, has run 475,000 miles. It is still in active service. It lately made a mid-winter trip from Los Angeles to New York. That means 80 years of average service, of 6,000 miles per year.

What more can you dream of in a motor car than the Studebakers offer?

Beauty—Luxury—Finish

The Studebaker coach work has been famous for decades. No one can excel it.

The finish is produced by 26 operations.

Just Go and See

Studebaker is today the leader in the fine-car field.

Studebaker builds more quality cars than any other concern in the world.

Buyers of fine cars last year spent over \$200,000,000 for Studebaker models.

The demand for Studebakers has almost tripled in three years—as people found them out.

Then go see them. Compare them with any car you will. Don't spend \$1,000 or over without knowing what Studebaker offers. You owe that to yourself.

**Drugs Excite
 the Kidneys,
 Drink Water**
 Take Salts at First Sign of
 Bladder Irritation or
 Backache

The American men and women must guard constantly against kidney trouble because we often eat too much rich food. Our blood is filled with acids which the kidneys strive to filter out; they weaken from overwork, become sluggish, the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead, your back hurts or the urine is cloudy, full of sediment, or you are obliged to seek relief two or three times during the night; if you suffer with sick headache, or dizzy, nervous spells, acid stomach, or if you have rheumatism when the weather is bad, begin drinking lots of good soft water and get from your pharmacist about four ounces of Jad Salts. Take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate clogged kidneys, to neutralize the acids in the system so they no longer are a source of irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive; can not injure, makes a delightful effervescent lithia-water drink and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time. By all means have your physician examine your kidneys at least twice a year.

MR. POSSUM'S ESCAPE

ONE night Mr. Possum was going through the woods trying to make up his mind whether he would go over to a farm he knew of some distance away or stay in the woods and hunt for something to eat nearer home.

While he was trying to decide this question he came to Mr. Fox's home, and as there was no light to be seen under the door or at the window Mr. Possum decided that Mr. Fox was not at home and that possibly he might find something to eat without going farther.

He tiptoed around to the back of the house to the pantry window and carefully raised it and slipped inside.

No, Mr. Fox was not at home, so Mr. Possum began to look along the pantry shelves for something to eat. But they were pretty bare; only a few bones and a piece of dry bread did he find.

He had about made up his mind to jump out of the window and go

Mr. Fox Was Dragging a Bag.

to the farm when he heard a noise that made him stand very still and listen.

It was someone opening the door to the kitchen, probably Mr. Fox himself. And what he would do to him if he caught him in his house Mr. Possum dreaded to find out.

Mr. Possum had come out of the pantry to the kitchen and was looking on the table hoping Mr. Fox had left something there. But it, too, was bare, like the pantry, and here he was caught and no food to pay for the risk.

There was no time to do-thinking now. The smoke was too thick and down dropped Mr. Possum among the ashes and soot and smoke.

Mr. Possum never expected to reach his home, for he was sure Mr. Fox was after him, but he did, and up to the tipper-most-top did he climb, and there he stayed until the next night.

Then he crept down the tree and went hunting for his supper. But not in the pantry of any of the wood folk. Mr. Possum wanted a good square meal and he did not wish to take the chance of finding bare shelves again.

He did not have long to think what to do and the chimney seemed to be the quickest way of escape, for he would have to pass the door which Mr. Fox was at that second opening to reach the pantry.

Up the chimney went Mr. Possum and bump went his head, for Mr. Fox had nailed a board over his chimney to keep out the snow, and robbers as well, for it was very easy to get down when he did not have a fire.

Poor Mr. Possum! He almost lost his hold and tumbled when his head struck the board. He would have if he had not been such an expert climber and clinger as well.

A piece of rough stone sticking out was all that saved him, and here he clung trembling while he listened to Mr. Fox shuffling into the room below.

Mr. Fox was dragging a bag, for he had been very lucky that evening. If it had not been for the bag scraping along the floor he would have heard Mr. Possum in the chimney. As it was, he did see the soot which Mr. Possum knocked loose in his efforts to save himself.

Mr. Fox pushed aside the soot and laid sticks and bark for his fire. Then he swung the long iron arm out from the chimney side and hung on the pot of water. Mr. Possum trembled harder.

Mr. Fox then lighted a match. Mr. Possum saw him light the dark and twigs, and shook. Up came the smoke in his face and eyes, and then down it went and came out in Mr. Fox's face and eyes.

Mr. Possum choked and coughed but Mr. Fox did not hear him, for at that second he remembered the board over the chimney top and he opened the door and ran out to get a ladder.

There was no time to do-thinking now. The smoke was too thick and down dropped Mr. Possum among the ashes and soot and smoke.

Mr. Possum never expected to reach his home, for he was sure Mr. Fox was after him, but he did, and up to the tipper-most-top did he climb, and there he stayed until the next night.

Then he crept down the tree and went hunting for his supper. But not in the pantry of any of the wood folk. Mr. Possum wanted a good square meal and he did not wish to take the chance of finding bare shelves again.

**The Why
 of
 Superstitions**

By H. IRVING KING
 YOUR ENEMY'S PICTURE

RESEARCHES of the American Folk-Lore society show that comparatively recently there have been cases where a person sought to injure his enemy by drawing that enemy's picture on a board and shooting at it with a rifle or pistol. It was believed that the one sought to be injured would feel great pain in that part of his person represented by the part of the picture pierced by the bullet and that no one but the person who did the shooting could give him relief.

Kindred superstitions are now and then met with in various sections of this country and in rural England they are most common.

Again we have merely a survival of sympathetic magic handed down from primitive man. Injure the man's picture and you injure the man. This sort of vicarious vengeance was practiced by all the ancients. Amid the ruins of Thebes was found a small clay figure of a man tied to a papyrus scroll "evidently to compass the destruction of the person denounced in the script." Just what process the clay figure had been subjected to in order to sympathetically affect the man it represented does not appear. The superstition has come down unaltered through the ages and is much more common today than most people have any idea of. If the stories of Catherine de Medici are true one of her favorite modes of "getting square" with her enemies was to have waxen figures made of them and set the figures to melt before a fire, or for a quicker result pierce the heart of the figure with a pin. This superstition, as Frazer puts it, is that "the man feels the injury done to his image as if it were done to his own body," and Elworthy adds: "The idea is as old as the hills and is practiced today." The reason we do not hear more about this particular superstition is because those who practice it naturally do so in secret and do not talk about it.

He almost lost his hold and tumbled when his head struck the board. He would have if he had not been such an expert climber and clinger as well.

A piece of rough stone sticking out was all that saved him, and here he clung trembling while he listened to Mr. Fox shuffling into the room below.

Mr. Fox was dragging a bag, for he had been very lucky that evening. If it had not been for the bag scraping along the floor he would have heard Mr. Possum in the chimney. As it was, he did see the soot which Mr. Possum knocked loose in his efforts to save himself.

Mr. Fox pushed aside the soot and laid sticks and bark for his fire. Then he swung the long iron arm out from the chimney side and hung on the pot of water. Mr. Possum trembled harder.

Mr. Fox then lighted a match. Mr. Possum saw him light the dark and twigs, and shook. Up came the smoke in his face and eyes, and then down it went and came out in Mr. Fox's face and eyes.

Mr. Possum choked and coughed but Mr. Fox did not hear him, for at that second he remembered the board over the chimney top and he opened the door and ran out to get a ladder.

There was no time to do-thinking now. The smoke was too thick and down dropped Mr. Possum among the ashes and soot and smoke.

Mr. Possum never expected to reach his home, for he was sure Mr. Fox was after him, but he did, and up to the tipper-most-top did he climb, and there he stayed until the next night.

Then he crept down the tree and went hunting for his supper. But not in the pantry of any of the wood folk. Mr. Possum wanted a good square meal and he did not wish to take the chance of finding bare shelves again.

He almost lost his hold and tumbled when his head struck the board. He would have if he had not been such an expert climber and clinger as well.

A piece of rough stone sticking out was all that saved him, and here he clung trembling while he listened to Mr. Fox shuffling into the room below.

Mr. Fox was dragging a bag, for he had been very lucky that evening. If it had not been for the bag scraping along the floor he would have heard Mr. Possum in the chimney. As it was, he did see the soot which Mr. Possum knocked loose in his efforts to save himself.

Mr. Fox pushed aside the soot and laid sticks and bark for his fire. Then he swung the long iron arm out from the chimney side and hung on the pot of water. Mr. Possum trembled harder.

Mr. Fox then lighted a match. Mr. Possum saw him light the dark and twigs, and shook. Up came the smoke in his face and eyes, and then down it went and came out in Mr. Fox's face and eyes.

Mr. Possum choked and coughed but Mr. Fox did not hear him, for at that second he remembered the board over the chimney top and he opened the door and ran out to get a ladder.

There was no time to do-thinking now. The smoke was too thick and down dropped Mr. Possum among the ashes and soot and smoke.

Mr. Possum never expected to reach his home, for he was sure Mr. Fox was after him, but he did, and up to the tipper-most-top did he climb, and there he stayed until the next night.

Then he crept down the tree and went hunting for his supper. But not in the pantry of any of the wood folk. Mr. Possum wanted a good square meal and he did not wish to take the chance of finding bare shelves again.

MEN YOU MAY MARRY

By E. R. PEYSER

Haa! a Galoot Like This Proposed to You!

Symptoms: Not a bit stylish—in fact he pooh-poohs the latest fashions as senseless. Knows the latest publications and books and is awfully high-brow. He likes the self-supporting woman only. Can't stand the girl who always must take her formal mamma to the show with them. He always keeps a well-paid job with growing prospects. Nothing worries him except wasting time at a bad play or with a poor book. He is a bit bookish, but not so bookish that the fond parents do not worry when he and daughters go out for an all-day picnic. Mothers fear but think him a catch. Daughters love, but cannot fathom him.

IN FACT

He is the most delightful mixture to himself.

Prescription for His Bride:

Get next to some good books—**R**—not for their bindings, but because of their inlides.

Absorb This:

He who reads,
 And works by day,
 Is just the man
 For whom maids pray.

Many Farmers Failed to Immunize Herds—Incorrect Diagnoses Made.

(Prepared by the United States Department of Agriculture.)

Reports received from various sections of the country by the United States Department of Agriculture indicate that hog cholera is becoming more prevalent than in any year since the decline of the last extensive outbreak, which reached its height in 1914.

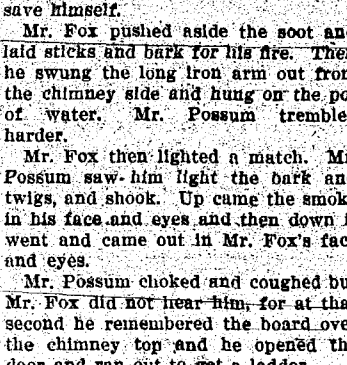

During the spring and early summer isolated outbreaks appeared here and there in various states. Owing to the comparative freedom of most states from cholera, the expense of procuring serum, virus and veterinary service, the high price of corn and the seemingly low price of hogs, many farmers failed to have their herds immunized last spring as a consequence there is in the country an unusually large proportion of susceptible animals. Reports show that cholera has appeared recently in communities which have been free of this disease for 25 years. In many localities it gained considerable headway before hog raisers realized the real nature of the trouble. In too many instances the disease was diagnosed as hemorrhagic septicaemia, influenza, indigestion or some other trouble than cholera.

Breeders Confused.

The large amount of advertising literature sent out by commercial concerns supplying hog remedies has had the effect of producing much doubt and confusion among swine growers in regard to the diseases of swine, and also considerable indecision among veterinary practitioners in some sections in regard to diagnosis. No doubt many herds in which "breaks" occurred this fall have been allowed to die from hog cholera because veterinary practitioners have been reluctant to diagnose cholera in herds which had previously received the simultaneous treatment. Bureau veterinarians who are co-operating with the state authorities and devoting their entire time to hog cholera work often have difficulty in convincing farmers that the disease from which their hogs are dying is hog cholera instead of worms, indigestion, hemorrhagic septicaemia, "mixed infection," or some other disease concerning which they had obtained information from advertising literature.

Continues Great Menace.

Notwithstanding all that has been said of other swine diseases, hog cholera continues to be the greatest menace to the swine industry of this country and both hog producers and veterinary practitioners should keep this in mind. The active virus of cholera is present in the country continuously and it is not safe when one or more hogs in a herd get sick to delay from day to day in seeking assistance in the hope that the condition may disappear. Most of the losses this fall were due to the neglect of farmers to call their veterinarians in time to administer the preventive treatment before the infection had had time to reach all of the swine in the herd. Remember that the serum treatment is a preventive and not a cure. Unless hog owners and veterinary practitioners are on the alert and act promptly, the losses will be unusually heavy this winter.

Mr. Fox Was Dragging a Bag.

to the farm when he heard a noise that made him stand very still and listen.

It was someone opening the door to the kitchen, probably Mr. Fox himself. And what he would do to him if he caught him in his house Mr. Possum dreaded to find out.

Mr. Possum had come out of the pantry to the kitchen and was looking on the table hoping Mr. Fox had left something there. But it, too, was bare, like the pantry, and here he was caught and no food to pay for the risk.

There was no time to do-thinking now. The smoke was too thick and down dropped Mr. Possum among the ashes and soot and smoke.

Mr. Possum never expected to reach his home, for he was sure Mr. Fox was after him, but he did, and up to the tipper-most-top did he climb, and there he stayed until the next night.

Then he crept down the tree and went hunting for his supper. But not in the pantry of any of the wood folk. Mr. Possum wanted a good square meal and he did not wish to take the chance of finding bare shelves again.

He almost lost his hold and tumbled when his head struck the board. He would have if he had not been such an expert climber and clinger as well.

A piece of rough stone sticking out was all that saved him, and here he clung trembling while he listened to Mr. Fox shuffling into the room below.

Mr. Fox was dragging a bag, for he had been very lucky that evening. If it had not been for the bag scraping along the floor he would have heard Mr. Possum in the chimney. As it was, he did see the soot which Mr. Possum knocked loose in his efforts to save himself.

Mr. Fox pushed aside the soot and laid sticks and bark for his fire. Then he swung the long iron arm out from the chimney side and hung on the pot of water. Mr. Possum trembled harder.

Mr. Fox then lighted a match. Mr. Possum saw him light the dark and twigs, and shook. Up came the smoke in his face and eyes, and then down it went and came out in Mr. Fox's face and eyes.

**Owners of Grade Herds
 Becoming Dissatisfied**

It is very gratifying to know that owners of grade dairy herds are becoming dissatisfied with the use of just ordinary service bulls. Not only are they getting rid of scrub sires, but they are insisting that the herd bull must come from a dam with a good record. This is sound business judgment, for the use of a good bull, even in a grade dairy, means a sure future increase in herd production and will pay for the added cost of a good registered sire many times over. Bulls coming from a line of proven ancestors should be able to increase the future production of any grade herd. Farmers generally realize this fact and are going in stronger every year for herd sires which are backed with records as well as pedigrees.

**Roofing Suggested for
 State Highways in Iowa**

A serio-comic purpose seems to have been behind a bill in Iowa which proposed to roof the state highways. The sponsor of the bill supported it in a speech in which it was argued that the sun and rains of the warm months and the snow and cold of the winter months subjected the highways to such changes as made it physically impossible for them to stand the strain. It was suggested that the cost of the roofing would be less than the rebuilding of the roads. Not enough legislators were impressed and the measure died.

**Immense Loss of Swine
 From Cholera Last Year**

Approximately 4 per cent of the hogs on farms in the United States died of hog cholera last year. This estimate is made by the United States Department of Agriculture for the fiscal year ending June 30. Losses were heaviest in Iowa, Nebraska, Indiana, Missouri, Illinois, Ohio, Georgia, Minnesota and South Dakota, in the order named. Each of these states lost more than 100,000 head of swine from the disease during the year.

Year's Progress in Better Stock

Figures Show Importance of Breeding and Selection—War on Tuberculosis.

(Prepared by the United States Department of Agriculture.)
The improvement of all kinds of farm live stock through breeding and selection, the development of better methods of feeding, the study of animal diseases and parasites, the protection of the industry from plagues which menace it from other countries, and the search for new facts concerning food values of animal products—in all these directions progress has been made during the last year, according to the annual report made to the secretary of agriculture by the bureau of animal industry. The large figures involved show the great importance of the work being done for the industry based upon the production of meat, milk, wool and wool.

Animals Inspected.
More animals were inspected by the department at various slaughtering establishments during this twelve-month period than during any similar period in the history of the live stock business in this country. The number of animals slaughtered under inspection was more than 78,000,000, which exceeded the previous record by 2,000,000 animals. This inspection protects the consuming public against unwholesome meats and in many cases serves to acquaint producers with the condition of herds on the farm.

The battle against cattle tuberculosis has been going forward rapidly, according to the report. At the close of the fiscal year there were more than 615,000 cattle in 28,526 herds officially accredited as free of the disease, a 76 per cent increase in the number of these herds over the preceding year. The plan of cleaning out the plague in entire counties at one time is becoming popular. Fifty additional counties were freed during the year, raising the total to 81. In the course of the year the tuberculin test was applied to nearly three and a half million cattle, most of these found diseased being slaughtered under inspection and the owners indemnified with federal, state and county funds. Areas in which practically all the tuberculous animals have been removed are now designated as "modified accredited areas," an arrangement which permits shipments of cattle from these areas without the usual restrictions.

Animal Diseases Watched.
There has been no foot-and-mouth disease in the United States for a number of years, but the danger of its introduction is great because of the presence of the highly contagious malarial in Jamaica. The department's quarantine forces have been on the alert and so far have prevented its entrance. Precautions have been taken, in case it should pass our borders, to have the defensive organization ready for immediate action. During the year, the report says, the dangerous disease known as surra was found in the blood of five dromedaries, offered for importation and inspected at one of the government's quarantine stations. Live stock improvement is being stimulated through movement, called the "Better Sires—Better Stock" campaign, in which farmers and breeders are induced to pledge themselves to use only pure bred male animals on their farms. At the end of the year there were nearly 12,000 live stock owners who had made this pledge. A questionnaire sent out to several hundred farmers brought out the most troublesome problems in the feeding of farm animals. As a result of the department's offer to assist, many special problems in animal nutrition have been sent in for solution or suggestions. A study was made of the meat yields of the different farm animals, the results showing that the types recognized as best by judges at the leading shows are much superior to poorly bred stock from the meat production standpoint.

The animal industry work has been brought to the attention of the public in various ways, including bulletins articles in newspapers and farm papers, through exhibits at shows and fairs, and by means of motion pictures.

Legume Crops Developed With Natural Limestone
Use of its natural limestone resources has greatly assisted St. Charles county, Missouri, in developing its legume crops, from a very small acreage to over 30,000 acres of clover, 1,000 acres of alfalfa, and extensive plantings of soy beans and cowpeas in 1922, according to reports to the United States Department of Agriculture. These are especially important crops to St. Charles farmers as dairying is one of their principal industries. No limestone was being used in the county and practically no clover or alfalfa grown when extension work had begun there in 1918. That year the agricultural extension agent secured the co-operation of about forty farmers in using lime on acid soil as a preparation for growing legumes.

Successful demonstrations of the benefits of lime have increased each year and community limestone crushers for utilizing local limestone have been installed to supply the lime. In three years' time four crushers had been established and this year 11 have been in use. Since 1920 over 3,000 tons of lime have been used in the county annually, and up to September 1 of this year, 8,000 tons have been applied, providing for a considerable increase in the legume acreage.

Probate Order
STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.
At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 8th day of January A. D. 1923.
Present: Hon. Servetus A. Correll, Judge of Probate.
In the Matter of the Estate of Joseph Maddock, Deceased.
Roland P. Maddock having filed his petition, praying that an instrument filed in said Court be admitted to Probate as the last will and testament of said deceased and that administration of said estate be granted to petitioner or some other suitable person.
It is ordered, that the 30th day of January A. D. 1923, at ten A. M., at said Probate Office, is hereby appointed for hearing said petition.
It is further ordered, That Public notice thereof be given by publication of a copy hereof for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said county.
SERVETUS A. CORRELL,
Judge of Probate.

After you have lived long enough to discover that hardly anything is serious and that those things which are not half as serious as they appear to be, you are getting ready to have some fun out of life.

The thought of leap year makes a bachelor jump.

Poor Soils Cause Clover Failures

One of the Serious Problems Confronting Farmers in Many Parts of Country.

Factors of Failure.
The farmer who is contemplating seeding a field to clover in the spring may well look to the suitability of that particular field for the growing of clover before sowing the seed. There are many factors, say the clover men of the United States Department of Agriculture, which are responsible for the failure of securing or maintaining a stand of clover, but these factors may be placed in five groups: Soil exhaustion; improper seeding methods, nurse crops, etc.; unit seed; disease; and improper treatment the first autumn.

Clover fails more often, according to the opinion of these men, because soils have become poor in lime, phosphorus, potash, or organic matter than for all other reasons. If lime is badly needed, there is no use wasting clover seed. If phosphorus is the limiting factor, the addition of lime alone, even if the land is "sour," will have slight effect. Manure will do good more often than anything else, but when lime is needed the results from manure will be much greater after this need has been supplied than before. By making the soil conditions such as favor the growth of clover failure can nearly always be turned to success.

Substitute Alsike.
Where red clover cannot be grown without the addition of lime or other soil amendments and where the application of these is for any reason impracticable alsike clover should first be substituted for red clover, or it may be possible to grow mammoth clover for soil improvement after common red clover will no longer thrive, and by turning under the mammoth clover the soil may be restored to a condition in which it will produce a stand of red clover.

Begin War on Chinch Bug by Burning Over Grass

Wherever the chinch bug was abundant during the past summer, 98 per cent of them will be found hibernating in the bunch grass and bluestem in meadows, pastures, ravines and along roadsides. The burning over of these places will result in the destruction of practically all of the bugs and when the community co-operates in such a campaign it eliminates the necessity of fighting the chinch bug the following year.

Night coughing

Doan's Kidney Pills have stood the test in East Jordan. No East Jordan resident who suffers backache, or annoying urinary ills can remain unconvinced by this twice-told testimony.

Mrs. Wm. Harrington, East Jordan, says: "I was troubled considerably with dull, nagging backaches and distressing pain through my kidneys. My kidneys were very irregular in action. I used Doan's Kidney Pills and they relieved the backache and corrected the action of my kidneys." (Statement given Aug. 3, 1909.)
On April 23, 1920, Mrs. Harrington added: "I haven't had occasion to use a kidney medicine since Doan's cured me years ago. The cure proved to be complete."
Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Harrington had. Foster-McBurn Co., Mfrs., Buffalo, N. Y.

Time is the test of truth. And Doan's Kidney Pills have stood the test in East Jordan. No East Jordan resident who suffers backache, or annoying urinary ills can remain unconvinced by this twice-told testimony.

Time is the test of truth. And Doan's Kidney Pills have stood the test in East Jordan. No East Jordan resident who suffers backache, or annoying urinary ills can remain unconvinced by this twice-told testimony.

Time is the test of truth. And Doan's Kidney Pills have stood the test in East Jordan. No East Jordan resident who suffers backache, or annoying urinary ills can remain unconvinced by this twice-told testimony.

ALBA

(Edited by Mrs. A. I. Ashbaugh)

Roy Anderson left for the Hospital at Grand Rapids last Wednesday.

Dr. Leighton went to Grand Rapids last Wednesday.

J. D. Ashbaugh left for Lansing Saturday to make his home with his sister Mrs. Lawrence E. Barner. He expects to be employed at the Olds.

R. Nichols and wife of Battle Creek are home on a visit.

While cutting ice at Lake Harold a team belonging to Clarence Olds broke through the ice. To save them the torture of drowning he shot them. All was a total loss, the sleigh sinking also.

Jay Sheldon and wife of Mackinaw City spent the week end with his mother, Mrs. C. E. Bird, returning home Monday.

Alba won a 2 to 1 decision in the debate at Boyne City Friday night. They have not lost a debate yet this year.

Miss Brady, daughter of John Brady who recently underwent an operation for appendicitis at the Reycraft hospital in Petoakey, returned here Tuesday, an abcess having formed shortly after she arrived home from the hospital.

Mrs. Ray Thumm was taken to the Reycraft Hospital in Petoakey Monday where she will have an operation for appendicitis.

Joe Hale, a former Alba boy now residing in Gaylord, writes his brother here that he had the misfortune to break his leg.

Successful Year for Boy and Girl Growers

(Prepared by the United States Department of Agriculture.)
The Junior Potato Growers' Association of Gariand County, Ark., is composed of 90 farm boys and eight farm girls, ranging in age from about fourteen to eighteen years. They are all members of the boys' and girls' potato clubs in which, under the guidance of the county agricultural extension agent, they are learning to practice the best-known methods of growing potatoes and preparing them for market.

These young farmers organized their own growers' association, according to reports to the United States Department of Agriculture, elected officers, appointed committees, including a buying and a marketing committee, and selected one variety of potato which all members agreed to grow.

They finished harvesting their 1923 crop and on October 18 rendered a businesslike account of their year's accomplishments to the Hot Springs Lions club, which has given the association support.

The members grew, the report states, 738 bushels of No. 1 grade potatoes and over 600 bushels of No. 2's, producing altogether 1,300 bushels. They marketed their crop co-operatively, receiving \$1,644 for it. The cost of production was \$658; the net profit \$986, about 74 cents per bushel. The member making the highest yield harvested 27.5 bushels from one-eighth acre plot. A number of the members, according to the report, have started bank accounts with their earnings and practically all expect to continue the work next year.

The report, signed by the president and secretary, is written on the printed letterheads of the association, which bears the names of the boys and girls who are officers and members of the buying and marketing committees.

Traverse City—The last official act of Judge Frederick W. Mayne, who retired at the end of last year in favor of Judge Parm C. Gilber: in the Thirteenth Judicial Circuit, was to render a decree establishing the water level of Lake Leelanau to be observed by the Leland Power Co., a case which was started in 1908 and which was dragged through numerous hearings and new trials since then. Judge Mayne fixed the maximum and minimum water level one foot and two inches apart.

Detroit—During the last 10 years, the public debt of Michigan, State, counties, and municipalities combined, has increased 503 per cent. It is set forth in figures issued by the Department of Commerce. In 1912, Michigan's total debt was \$59,996,825. In the following decade it increased to \$361,778,549. The per capita obligation jumped from \$20.43 to \$94.04. The Government figures show that expenditures of the counties were the chief factor in this increase. The counties piled up their debt burden 737 per cent.

GLYCERINE MIXTURE PREVENTS APPENDICITIS

Simple glycerine, buckthorn bark, etc., as mixed in Adlerika, helps any case gas on the stomach in TEN minutes. Most medicines act only on lower bowel but Adlerika acts on BOTH upper and lower bowel and removes all gasses and poisons. Brings out matter you never thought was in your system. Excellent for obstinate constipation. Guards against appendicitis.—GIDLEY & MAC, Druggists. adv.

ALL THE WAY

By DOUGLAS MALLON

LET us find our joy today,
Not wait tomorrow.
There is little, anyway,
In the joy we borrow.
There is joy around us here,
Very lovely, very near;
Looking far ahead, my boy,
You may miss a lot of joy.

Let us find our joy around,
Not on yonder mountains;
Near us now I hear the sound
Of the crystal fountains.
What the road a fellow goes,
You will always find a rose,
Ev'ry season, ev'ry hour,
Has its fruit or has its flow'r.

Let us find our joy—we can
Yesterday forgetting,
For we never find it, man,
Yesterday regretting.
What is done, my lad, is done,
But today another sun
Makes the sky as blue again
As the sky was ever then.

In the present, not the past,
Let us do our living;
Heaven we shall find at last
Giving and forgiving.
Not ahead and not behind
Let us look, and we shall find
Joy is always all today,
All around us all the way.

Something to Think About

By F. A. WALKER

OUT OF DARKNESS

TO THINK rightly is to sharpen perception and season judgment. He or she who is always blundering, getting in trouble with employers and friends, never remembers important events accurately, is in constant danger of failure.

As the mind directs so goes the body. The shambling, irresponsible creature, misgided by a rusty mind is much like a vessel at sea which has unshipped its rudder. He may be towed to port by a friendly bawser, or sent to the bottom by an opposing storm.

To make sure of your destination, keep your mind on the splendid things you would like to accomplish. Ponder them at every opportunity. The thoughts to which you cling hourly are transforming you into an earnest, useful person, or a man or woman of no account.

If you want friends, be friendly. Cultivate the right mental attitude towards others and all will be well. Take a contrary stand, let the rust accumulate, exhibit cowardice, distrust, disloyalty, irritability, habitual moroseness, and nothing can save you from wreckage.

Lay hold of the great, potential forces of the universe and move along with them. Resolve to become a part of them. Keep your mind bright by rubbing it against minds that are brighter, more capable, more alert than yours. Open the door to industry instead of idleness, to thinking instead of brooding, to faith instead of doubt, and you never will lack the energy with which to press forward and take your place among those who are making the world pleasanter and better.

Be frank, good natured and cheerful. Grip your load, whatever it may be, and pull with all your might. Have no fear of failure—no fear of anything or anybody but yourself.

Be patient and persevering. Put jealousy and hate in a weighted bag and throw them overboard. They will wreck the stoutest ship and blight the fondest ambition.

Be not disturbed about rivalry, except the rivalry existing between your good, and evil self. It is only the mortal who overcomes himself who has the power to uplift humanity and lead others from darkness to light; capable at all times to measure strength with the mental Goliaths, and equipped to hold his own in the sternest strife when storms beat hardest against him.
(© by McClure Newspaper Syndicate.)

QUITE EVIDENT.

I understand Miss Whisk is suing you for breach of promise. I didn't know she was in love with you. That's the trouble, she wasn't.

Use of Gas. There are in the United States 7,000,000 cooking appliances, 1,800,000 water heaters, 1,800,000 space or room heaters and 8,800,000 incandescent burners furnished with gas service.

Partly So. Quizzer—How did Flyter come through that airplane accident? Calm and collected, I presume. Whizzer—He's calm, all right, and they're collecting him now.

SCHOOL DAYS

THE SON DO MOVE

MEN YOU MAY MARRY

By E. R. PEYSER

Has a Man Like This Proposed to You?
Symptoms: Well bred, sweet smile when he occasionally turns it on. Very successful, gloomy, unenthusiastic. Has decided views, only has room for his own; he likes you only because you think he is always right. Doesn't like theaters, "they're too long," concerts he thinks are "for weaklings," he's "so sorry for the d--n fools who act or sing or play." "Movies are all right if there's no vaudeville or cheap music." He plays golf, but thinks it "an old man's game," good enough to get some outdoor air. Work is his passion. Good to his mother and family, no use for anybody else.

IN FACT
The only way to get his attention is to be part of his household.
Prescription for His Bride:
Forget your own pet points of view. Learn to amuse yourself.
Absorb This:
TWO OPINIONS IN ONE HOUSE OFTEN RESULT IN TWO ESTABLISHMENTS.

Something to Think About

By F. A. WALKER

SELF-CONTROL

THE simple process of practicing self-control is as beneficial as it is astonishing. In a little while those of us who succeed in obtaining mastery of our emotions, our glib tongue, our strutting pride and our indulgence, find ourselves in a new world.

We wonder at the agreeableness of our friends, the loveliness of the tender blossoms, and the thousands of beautiful things all about us which heretofore we have passed without notice.

At last we have succeeded in pulling an old mask from our face and we are able to smile. We have in some ways found a grain of faith—faith in ourselves and in our intimates.

We are changed and the whole world is changed with us. We soar on the wings of the dove. We have risen high above the bogs and quagmires.

We have come from a state between sleep and waking. Our vision is clear. Our mind is alert, appreciative, considerate and kindly disposed. Our thoughts fly straight to the mark, never diverted by ill-humor or a violent rush of hot blood.

In some indescribable manner a burden has slipped from our galled shoulders, and we are buoyant, happy, unconquerable.

The ruling forces of the universe have taken hold of us, while other and lower forces are losing ground. Affection, sentiment and compassion have become parts of our disposition. The control of impulse has grown perfect through the supremacy of our higher motives.

We are enslaved no more by the harpies of passion. The simple operation of self-control, the careful and continuous exertion of will-power has set us free.

Where formerly we moved about with dour faces we now go with beaming smiles; where in other days we were met with rebuffs we are given cheery receptions and encouragement.

The strong, sunny parts of nature which we have by supreme effort developed are ours, and we are keeping step with the victors, sure of victory for ourselves in the faith that illuminates our way.

Mother's Cook Book

The world is all dark, or the world is all bright. Just as we choose to make it. Our burden is heavy, our burden is light. Just as we happen to take it. And people who grumble and people who groan. At the world and at every proposal. Would grumble and groan if the world were their own. With sun, moon and stars at disposal.
—Harriet Swift.

FOOD FOR THE FAMILY

WHEN a quick dessert is needed and the larder seems rather empty try an
Orange Shortcake.
Prepare a rich biscuit dough, making a drop batter and bake in small gem pans. Bake and break open while hot; butter well and heap with orange which has been sliced and sweetened and allowed to stand. Serve with some orange juice for the sauce.

Baked Beets.
Wash the beets and put them to bake in a hot oven. When very tender, peel, slice and serve with butter melted and poured over them, seasoning with salt and pepper.

Candied Sweet Potatoes.
Boil three medium-sized potatoes until nearly tender. Peel and slice lengthwise. Lay in a shallow pan, preferably glass or earthenware, pour over them one to one and one-half cupsful of sirup from canned peaches. Dot with two tablespoonsful of butter and bake in a hot oven for half an hour. Raise the heat toward the last or brown under the gas flame.

Baked Onions.
Take one dozen medium-sized onions, cut into halves crosswise and place in a buttered casserole. Add two tablespoonsful of honey or brown sugar, the same of butter; one teaspoonful of salt, one eighth of a teaspoonful of cayenne or a mixture of white pepper and red and bake with no further moisture for one and one-half hours. Serve with strips of buttered toast and garnish with parsley dipped in vinegar.

Banana Salad With Popcorn.
Prepare the bananas, cut into halves lengthwise, roll in salad dressing, then in nice, well-seasoned popcorn. This is a salad that the children may eat.

The Young Lady Across the Way

The young lady across the way says she's having all her summer dresses made with skirts six inches above the ground, and she wonders how she's going to like it after the recent cotton shortage.

Peggy Shaw

This little "movie" star is a brilliant representative of the American girl of today—plucky, talented, ambitious. Several years ago Miss Shaw went to New York to study for the stage, and soon afterward became a Follies beauty. Her grace and charm attracted the attention of motion picture producers. She has been seen in a number of popular productions.

"What's in a Name?"

By MILDRED MARSHALL

Think about your name; its history; its meaning; whether it was derived; its affinity; your lucky day, lucky hour!

HILDA

OF SPLENDID old Norse lineage is Hilda. The chief of the Valkyrs was Hildur and the names of Hild and Hilda were given to other war maidens. Hilda is said to signify "battle" by a literal translation, which probably means "war-like spirit" under a broader interpretation.

The Teutonic world claims the name and insists that it means "support," giving it to one of their principal war maidens. The real origin seems difficult to settle upon, but it is generally conceded that Hilda and peace are not synonymous.

For a time Hilda was one of the commonest terminations to feminine names in the Teutonic world and gradually the word came to mean "maiden" and was used interchangeably. It was much used in the north of England also, where the Deiran princess, Hildur, became the holy abbess, Hilda of Whitby, succeeding St. Hegg and leaving a reputation for sanctity.

Though Clara de Clare could not see it, a vision of the holy abbess can be seen under certain conditions of light in the Whitby chapel today; the ammonites which are believed to have been serpents turned to stone at the prayer of the abbess are also there. Around Whitby, Hilda is still the most popular of feminine names, in honor of the holy woman who bore it.

The mother of Rolf Ganger was the Norwegian Hildur. Indeed the name has conformed itself largely to the peoples of the North. It suggests the splendid strength of the Valkyries; the romance of the land of the midnight sun; the haunting melancholy of the Gothic races. It is one of the few names without diminutives or derivatives.

Coral is the jewel assigned to those who bear the name of Hilda, if they would have health and prosperity. The deep pink stone shares the vitality of the wearer to such an extent that it is supposed to pale or grow more vivid, accordingly as its owner is possessed by weakness or good health. It is also used to stop the flow of blood from wounds. Safety for traveler is the promise of coral. Tuesday is the lucky day for its wearer and 3 the lucky number.

Get All It Was Worth.
"Now this picture," bawled the auctioneer, "is valued by the artist, who stands beside me, at \$5,000. And what am I offered? Thirty plunks."
But he got no other bid and knocked the picture down at that figure. A bystander ventured to condescend with the artist.
"Oh, well," said the latter, "I painted it in two hours. The paints cost me about 40 cents and the canvas a dollar. I made a fair profit."

A LINE 'O CHEER

By John Kendrick Bangs.

SHEER WASTE
OUR tears we waste on that which might have been, And in the midst of useless miseries Forget to seize the prize we may win.
If we but make the best of that which is,

STRIKE TIES UP BRITISH RAILS

TRAIN SERVICE CRIPPLED AS
PARLEY FAILS—SIXTY
THOUSAND OUT

ONLY MAIL TRAINS OPERATED

Trade Congress Not in Sympathy—
Retired Workers Called
On To Help

London—Eighty per cent of the engineers and firemen of the railways in England, Scotland and Wales have gone on strike. It was estimated that 60,000 men went out.

Eleventh hour conferences to avert a transportation tieup were fruitless, and since the last of these broke up there were no further efforts toward peace.

Passenger service has been affected seriously. Only a few mail and suburban trains were operated, and every energy has been concentrated on the movement of foodstuffs. The locomotives are manned by the remaining 20 per cent of Great Britain's engineers and firemen who are members on another union, and by volunteers from retired employes or men who have taken up other occupations.

This strike does not have the sympathy of the powerful trades union congress, which, as mediator, sought to settle the question on terms which would be acceptable to both its executive council and the railway managers.

These were that the award of the national wages board should go into effect and that the strike order should be called off, in return for which the railway managers should agree to an immediate meeting with the leaders of the dissatisfied engineers and firemen.

Any trains running after strike went into effect were hauled to the nearest siding by the engine crews and deserted.

In London the newspapers advanced the closing time for their various editions and printed as much of their circulation as possible before midnight. They have assembled large fleets of trucks to carry papers.

UNITED STATES WINS RUM PACT

Britain Accepts All U. S. Plans For
Blocking Booze Smugglers

Washington—British ratification of the proposed Anglo-American rum treaty probably will be forwarded to this government within the next two weeks, it was learned here.

The great length of time that has elapsed since this government sent a revised draft of the treaty to Great Britain was occasioned, according to officials here, by the fact that the matter was submitted to all the British dominions by the Foreign Secretary Curzon, and they have been dilatory in replying.

It is understood, however, that the draft of the treaty, as revised by Secretary Hughes, has been approved by the majority of the British dominions.

British government officials feel that when the treaty has been ratified and put into effect the greatest cause for all-feeling between the United States and Great Britain will have been removed, and they are anxious that the present government go down in history as having executed the compact.

Similar rum treaties just being negotiated by this government with the government of the Netherlands and other powers are described by state department officials as "progressing satisfactorily."

HERRIN KLAN WAR IS RENEWED

Kluxers Arrest Sixty And Seize
Stills in Surprise Raid

Marion, Ill.—Liquor raids in Williamson county were resumed by 500 members of the Ku Klux Klan, led by S. Glenn Young, dry worker, in which 60 alleged bootleggers were captured and seven stills were reported found. Shrouded in secrecy, the raids, which took 10 hours to complete, were over before Major Omar J. McMackin, recognition officer of the Illinois national guard and the county sheriff's office had learned of them.

Major McMackin had remained in the county when state troopers were withdrawn, following the announcement by Sheriff Galligan that conditions were again peaceful.

The raids were made at Weaver, a mining camp near Herrin and at Spillertown. Those arrested were taken to Benton where they were placed in jail, or gave bond.

Immigration Bars Approved

New Haven, Conn.—Numerical limitation and careful selection of immigrants, with a quota provision based upon the census of 1890, are advocated in the report of the Committee on Selective Immigration of the Eugenics Committee of the United States, made public by Prof. Irving Fisher, chairman of the eugenics committee. "Immigration is a long-time investment in family stocks rather than a short-time investment in productive labor," is the keynote of the report.

Washington, D. C.—William R. Green, of Council Bluffs, Iowa, who is the new chairman of the Ways and Means Committee of the House of Representatives, succeeds Rep. Fordney, who has retired from public life.

NEW YORK GETS CONVENTION

Democratic National Committee Declines on Eastern City.

Washington—A novelty in more than a half century of American politics—a national convention in New York City—is to be presented in the 1924 campaign.

Historic Madison Square Garden in New York will be the scene of this year's Democratic national convention. New York was chosen last week by the Democratic national committee after a spectacular contest with Chicago, San Francisco and St. Louis.

The convention will open June 24, probably a week after the Republican convention at Cleveland ends.

Not since 1868, a lapse of 56 years, has New York had a national political gathering.

It wins the Democratic conclave this year by dint of much effort and a contribution aggregating \$205,000 to the Democratic National Committee. An equal sum was offered by San Francisco, but the committee voted against repeating its 1920 trek to the Pacific coast.

The final vote giving the convention to New York after Chicago has been withdrawn, was: New York, 57; San Francisco, 40 and St. Louis, 6.

EXTRA SESSION HELD UNLIKELY

State Has Funds To Carry Out 500-Mile Road Plan.

Lansing—Another special session of the Legislature will be unnecessary for the State to carry through a record-breaking road building program in 1924. Gov. Alex J. Groesbeck announced recently.

"I am convinced, we will have ample funds," he declared, "to build 500 miles of concrete roads, as against the 280 odd miles of concrete that were laid in 1923."

"Rumors of a highway emergency to the contrary, we shall be able, with the help of prison labor, to put through the biggest program of modern hard roads in the history of the State, and at the same time keep on the credit side of the ledger without any additional tax legislation."

There are contracts outstanding amounting to \$7,831,211, all of which have been figured as liabilities by the State accountants working on the revised balance sheet that the Administration Board will use as a basis for determining what new roads will be built in 1924.

FARM PRODUCTS RAISED 7 PCT.

Crop Values Last Year Amounted to About Quarter Million.

Lansing—The total value of farm crops produced in Michigan in 1923, exclusive of livestock and livestock products, was \$242,472,000, an increase of about 13 per cent over 1922 value, according to a report released by Verne H. Church, federal statistician, and L. Whitney Watkins, state commissioner of agriculture. This compares with a value of \$214,842,000 in 1922 and \$13,685,000 in 1921.

The report indicates a seven per cent improvement in the farmers' financial condition.

"Notwithstanding this apparent improvement in the general agricultural situation Michigan farmers were compelled to pay, approximately 20 per cent higher wages, for their hired labor than in 1922," the reports says.

Find Gold Casket in Tut's Tomb

Luxor—The work of dismantling the series of Tutankhamen's golden shrines was continued after the usual weekly holiday. A casket of the outer casket having been gotten out of the way, Howard Carter, in charge of the excavation work, was able to hoist up and remove to the ante-chamber one of the two sections of the roof of the second shrine. The inside was found to be elaborately decorated with cartouches and figures of the King.

TAMPAICO PORT IS BOMBARDED

OREGON ANTI-MILITARY REPUBLICAN
SEA ATTACK ON CITY BY
REBEL NAVY

U. S. URGED TO SEND WARSHIP

Small Military Force of Federal
Army To Be Permitted To
Cross Three States.

Tampico—Rebel gunboats Tampico and Sarasona bombarded the city and port of Tampico.

The rebel gunboats fired four shots. The artillery stationed at the entrance to the port repelled and forced the rebel vessels to retire outside the range of the guns.

Then the rebel ships directed their fire against the suburb of Varadero, located to the left of the Panuco river, destroying several Chinese houses. How many of the occupants of these houses perished is not known. An airplane sent up to reconnoitre identified both the rebel boats. Immediately after the bombardment James B. Stewart, the American consul, informed the American embassy at Mexico City and the state department in Washington and requested instructions.

Some of the populace, fearful lest the rebels ships again fire on the town, have left Tampico. The port is well protected by artillery. Representatives of American oil companies having properties in the Tampico region are urging the Washington government, through the U. S. embassy, to send warships to Tampico and Tuxpam to prevent the three blockading ships of the rebels from seizing American tankers, it was learned here.

Washington—Pursuing further its policy of support of the Oregon government of Mexico in that government's desperate fight to maintain itself against widespread revolution the state department last week announced that it had approved the passage of Mexican federal troops through American territory.

It is explained that the federal forces are to be transported from the frontier town of Naco, Arizona, to an unnamed point in Texas where they will re-enter Mexico moving to a region "where American lives and interests are being threatened with grave danger by the forces in revolt against the Mexican government."

ATTACK ON AUTO TAXES MADE

Congress Told Car Owner Is Subjected To Numerous Levies.

Washington—An attack on the retention of the war taxes of five per cent on automobiles, trucks, tires, accessories, and repair parts was made before the ways and means committee of the house by representatives of the auto industry and automobile users.

The tax on autos is discriminatory because the owner of a car has to pay as many as seven taxes on it, if he lives in the city, with four possible additions if he lives out in the country.

Besides the four taxes levied on him when he buys a car, tires, accessory or spare part, he is also subject to seven local taxes.

These are: State license fees, city license fees, state gasoline tax, which is collected in 38 states, state personal property tax, city personal property tax, state or city's drivers' license, and the state title registration fee.

In some cases, the counties add three more taxes by duplicating the license, gas and personal taxes.

JUGOSLAVIA GETS SUB. FLEET

Flotilla Assembled Along the Coast
Of the Adriatic

Athens—A secret fleet of 15 submarines has just been acquired and assembled along the Adriatic by Yugoslavia.

For this reason and the fact that Yugoslavia is still maintaining an active army of 750,000 men, including police and gendarmes, Greek officials refuse to believe Belgrade reports that Italy and Yugoslavia have agreed either by alliance or guarantee to respect each other's territory.

The Italian government has constantly promised Yugoslavia its support against Greece if the Serbs looked toward Saloniki as an outlet.

The Yugoslav general staff is also planning to raise 2,500,000 men by a general mobilization, which includes all males between the ages of 16 and 60. The staff calculates that it could take Trieste, Venice and Pola without difficulty.

Claims "Oldest Couple" Title

Baltimore—A wedding cake large enough for the principals, six children, 13 grandchildren and 12 great grandchildren was cut recently when Mr. and Mrs. Rexin H. Armacost of Baltimore county, celebrated the seven tieth anniversary of their wedding. They enter claim to being the oldest married couple in the United States. Armacost is 94. He takes an active interest in the events of day, votes at every election, and is the owner of the prosperous farm.

SENATOR E. D. SMITH

Washington—Ellison D. Smith, of South Carolina, who has been elected by the senate as chairman of its interstate commerce committee, one of the ranking committees of congress.

URGED TO EXTEND FOREST LAND

Senate Committee's Recommendations
Are Submitted.

Washington—The immediate aim of the forest policy of the United States should be to increase as rapidly as possible, the rate at which timber is produced on land suited to this form of use, the Senate Restoration Committee said in its report submitted to the Senate.

The committee held that the main lines of attack in accomplishing this purpose should be:

To extend public forest ownership in areas where special public interests or responsibilities like the protection of navigable rivers; and also where the natural difficulties, costs and hazards attending reforestation make it impracticable or remote as a private undertaking.

To remove the risks and handicaps from private timber growing as far as practicable, in order to give the greatest possible incentive to commercial reforestation.

Completion of the Federal purchases of forest lands, contemplated by the Weeks Law for the protection of the Watersheds of navigable streams, also was recommended, together with legislation authorizing acceptance, under certain circumstances, of grants or bequests of forest lands from private owners.

Marquette—Shortening of the open season on partridge in the upper peninsula will be one of the questions to be considered at the spring meeting of the Northern Michigan Sportsmen's association. Delegates from the lower peninsula to the annual meeting of the Congress of Michigan Game associations, held in Marquette reported that only a few partridge are left in the lower part of the state and that unless a closed season in southern Michigan is ordered, there is a danger of the birds becoming extinct.

Learn What Chiropractic Is. Health Talk No. 1

Sick one, ailing friend, weak and discouraged being, have you not by this time heard of hundreds who are daily receiving great relief and being restored to good health and vigor through chiropractic? If not, then you have been living in a very slow corner of existence where good news travels very slowly.

It is a fact that many are slow to investigate and accept a new truth no matter in what realm of life and existence it may be. Others always with a broad open mind, look at once into new discoveries and inventions and readily accept the good and wholesome truths with the result that they are far ahead of the former class in every respect. To which class do you belong?

If you are sick and still have a back-bone there is some chance for you, but if your back-bone is gone there is no hope left.

Chiropractic works on the principal that every known condition has its cause. The cause is an obstruction hindering the flow of mental impulses or nerve energy. The only place where this can occur is at the point where the nerves leave the spine. The Chiropractor finds the point where the nerves are impinged (pinched) and by adjusting this cause he gives nature a chance to effect a cure.

Do you feel indisposed fifty per cent of the time? You are human like the rest of us, you want to be well, you know the value of health when you no longer have it. As long as you have the cause of that fifty per cent indisposition you cannot accomplish more than fifty per cent of your work, get more than fifty per cent of the joy of life or be paid more than fifty per cent of what you are worth when you are yourself. Give nature a chance to make you one hundred per cent well and one hundred per cent efficient.

J. W. Ellison, Chiropractor
Palmer School Graduate Over Bennett's Store

During Winter Is Good Time to Repair Harness

This is a good time to go over the harness, remove the surplus baling wire and rope, and make the permanent repairs necessary. Splice in the halter reins that have been broken out during the past season. Hang the extra halters in some place where the rats and mice will not eat them.

Practical Experiments With Glass Nest Eggs

Some interesting experiments at the Iowa State college proved that hens like to lay in a nest where there is a nest egg. China or glass eggs helped some, but were not so attractive to the hens as ordinary hens' eggs were. On the other hand, wooden and plaster of paris eggs were found better even than hens' eggs.

The experiment was worked out by putting a flock of 40 pullets in a large pen with 16 nests, and putting one of each kind of nest egg in each of four nests, shifting these around from day to day and keeping a record of the number of eggs laid in each nest. It was carried over a long period of time.

Smallpox Rages in China

Victoria, B. C.—A smallpox epidemic is raging in Hong Kong and Kowloon, China, and has claimed hundreds of victims according to advices received here from passengers on the Yokohama Maru's arrival.
