E. Jordan De-feats Boyne City

E. J. H. S. Quintette Trim Visitors To Tune of 21 to 10.

Last Friday night, the High School trimmed the Boyne City Quintette to the tune of 21 to 10. The team has just begun to show the old form displayed last year.

At times they played so fast that Boyne City was dizzy and unable to follow the ball.

Walker at center controlled the tip off at will and did some fine floor work. Kiling capered in his old style at forward and kept the Boyne City guards puzzled as to his position on the floor. His possessive and defensive work was also very good.

Palmer and Streeter at guards could not be beat. They recovered the ball every time from the back stop. One never saw better guards in action.

Swafford was by far the star of the game. He dropped them into the basket from every place on the floor.

Boyne City tried to offer several alibies for losing the game, but all the fans present know that they never could have won. We hope the boys will keep up their record.

The Ellsworth girls will be here Saturday night, March 1st; Charlevoix boys team and Boyne City girls will be here for games Friday, March 7. The Boys and Girls teams of Bellaire will close the home games Friday, March 14.

The Control Of Cancer

The medical world is this week observing "Cancer Control Week" by urging people early seek medical aid in determining if any trouble that may develop may be cancer or caused by cancer.

About ten years ago a few men and women organized themselves into a society in order to put an idea which they had into practical application. The idea was as simple as it was beneficent. It was to teach the plain facts about cancer; for it was clear that many cases of this disease could be cured, if the ignorance and indifference with which it was commonly regarded in its early stages, could be dispelled.

The American Society for the Control of Cancer which began in a small way is now one of the largest and most influential public health agencies in the world.

The society urges that the warning signs of cancer be learned and heeded by everybody; that capable medical skill be employed to deal with this malady in its earliest recognizable stages, that the reluctance which sometimes prevents people from promptly seeking medical advice be overcome and that the false claims of quacks and charlatans, who advertise to cure this disease, be allowed to fall upon deaf ears.

Lansing—The steady downward trend of the State's ad valorem tax on real and personal property and the contrasting upward trend of the tax levied by cities, counties and school districts on the same classes of property was shown again here by a series of tax totals and significant percentages made public by George Lord, state tax commissioner. Mr. Lord's totals disclose that the \$50,714,816 raised by Michigan cities for municipal purposes in 1922, rose to \$57,494,532 in 1923.

East Lansing—A second "ton litter contest" will be staged by Michigan swine breeders during the coming season, according to announcement by Verne A. Freeman, leader of the state Ton Litter Club and extension specialist in animal husbandry at the Michigan Agricultural College. Valuable results along educational and demonstrational lines were obtained in the contest which was held last year, which was won by a litter weighing a total of 2,840 pounds at the end of the 130-day period.

Ann Arbor—Faculty members of the literary college of the University of Michigan have approved the establishment of a combined curriculum in letters and business administration upon the same basis and under the same regulations as the other combined curriculum. Students expecting to enter the new school must complete three years of work in the literary college and include courses prescribed for admission to the school. The faculty also decided in favor of a general renumbering of all courses in the literary college.

JAMES A. SHEPARD DIED SUDDENLY AT FLINT, MICH.

James A., eighteen-year-old son of Mr. and Mrs. Stephen Shepard of this city, passed away at Flint at an early hour Thursday morning, Feb'y 28th, from influenza and pneumonia.

The young man left here last fall for Flint where he had employment. He was home for the Christmas holidays. The remains will be brought to his late home here for burial. No funeral arrangements have as yet been made.

MRS. RANSOM JONES, SR. PASSES AWAY MONDAY, FEB'Y 25

Mrs. Ransom Jones passed away at her home on the West Side, East Jordan, Monday last from dropsy and leakage of the heart.

Mary A. McLean was born in Canada May 4th, 1863, her parents being Mr. and Mrs. John McLean. When about three years of age she accompanied her parents to Atwood (Banks Twp.) and has since made this region her home. In 1883 she was united in marriage to John L. Crawford. Three children were born to this union who survive viz:—Verne H. Crawford of Muskegon, Mrs. Earl Gould and Wm. Crawford of East Jordan. The husband and father passed away Aug. 27, 1909, at East Jordan.

In November, 1911, she was united in marriage to Ransom Jones, Sr., who, together with the following brothers and sisters, survive the deceased:—Mrs. John F. Kenny and John McLean of East Jordan; Will McLean of Paso Robles, Calif.; and Mrs. Martha Williams of Los Angeles, Calif.

Funeral services were held Thursday afternoon from the Presbyterian Church conducted by the pastor, Rev. Sidebotham. The remains were laid to rest at Sunset Hill.

Monroe—Because many of the city ordinances were out of date, the city commission authorized the city attorney to have them revised. They were last revised in 1901.

Lansing—Mrs. Sophronia Bowerman, prominent Y. W. C. A. and W. C. T. U. worker, died at her home here. She organized the Ingham County Temperance Union.

Detroit—Delos G. Smith has received his official appointment as district attorney of the United States court. The appointment was signed by President Coolidge and Harry M. Daugherty. The new district attorney was sworn in last week.

Kalamazoo—Masonic delegations from all parts of the state were in attendance at the grand commandery funeral service last week for Edmund S. Rankin, past grand commander of Michigan, and one of Kalamazoo's three thirty-third-degree Masons.

Charlotte—Hayes E. Wells, the clerk of Eaton county, announces that no more suppressed marriage licenses will be issued from his office. Couples who wish to get married must expect to see their names in print, and if they do not want publicity, all they have to do is to remain single.

Alpena—Never in the history of this city, has winter fishing been carried on to the extent that it has been this year. Five tugs have been fishing from Rockport and Presque Isle harbors and record catches have been reported. Five tons of trout were shipped from Alpena in one day recently.

Ann Arbor—Members of the Cosmopolitan Club of the University of Michigan, an organization composed of foreign students, will make a trip through the state during the spring vacation, beginning April 14. Stops will be made in Battle Creek, Kalamazoo, Grand Rapids, Flint and Lansing.

Grand Haven—The Grand Haven Farm Bureau, at its annual meeting here, declared an eight per cent dividend on all stock issued prior to Dec. 31, 1923. The bureau went on record in favor of the gasoline tax, a graduated income tax and sufficient funds to carry on the bovine tuberculosis work in the state.

Mt. Pleasant—Beet growers of this section were made jubilant because of the receipt of checks from the Columbia Sugar Co., representing the bonus on the 1923 crop. A total of \$98,000 has been distributed in the district surrounding Mt. Pleasant. The bonus represents an extra payment to beet growers of \$2.25 a ton.

Grand Rapids—Veterans of the Civil, Spanish-American and World wars, aided by other patriotic organizations, have organized a committee for a joint observation of Memorial day here, May 30. In all, 19 organizations are represented in the Memorial day federation, of which Major Stephen W. Collins is president.

H. S. Play "The Jonah"

Auditorium, March 10—E. J. H. S. Athletic Association.

On Monday evening, March 10th, the Athletic Ass'n of the East Jordan High School will present "The Jonah," in the High School Auditorium. Prices 25c and 35 cents, no reserve seats.

In selecting the play and cast of characters a great deal of care has been exercised so that the Association feels confident that they can assure you your moneys worth. The play is under the direction of Miss Victoria Smythe, who has had excellent dramatic training and well knows how to make a production real.

"The Jonah" is a three act play, lasting about two hours. It contains many a laugh and thrill. There will be clever music between acts. We guarantee you two hours of solid fun. Let us amuse you on that night. The entertainment is excellent, the time 8:00 o'clock, the place is at the High School Auditorium, the price is right, 25 and 35 cents, and the date is Monday March 10th.

Saginaw—The Michigan Sugar Beet Growers' association has gone on record opposed to the "45-55" contract starting at \$7 a ton, which the Michigan Sugar company proposed to offer this year. The association cites the contract of the Owosso Sugar company, which offers a 50-50 split and has also a \$7 a ton basis to start.

Lansing—Dr. J. D. Munson, of the Traverse City state hospital, has tendered his resignation effective next July 1, has been announced at the governor's office. Dr. Munson was made superintendent when the institution was established and has been at its head about 35 years. He had the record of being one of the most efficient institutional heads in the state service.

WITH THE COUNTY AGENT

By B. O. Hagerman

TO THE FARMERS OF CHARLEVOIX COUNTY

Preparatory to a campaign for more alfalfa, which will go hand in hand with the campaign for better dairy cows, I believe the following information regarding alfalfa, will be very interesting as well as instructive.

1. Introduced into the Americas by Pizarro and Almagro at the time of the Spanish invasion in Peru, spreading from thence to Chili and from there to what is now Argentina. Seed was brought from Chili to California in 1854.

2. Alfalfa is a Spanish word having its origin in the Arabic "Alfacaah," meaning "the best feed."

3. Alfalfa is adapted to a wide range of conditions being grown from sea level to altitudes reaching 7500 feet in dry regions as well as those of copious rainfall and in tropical climates and those with very cold winters.

4. As a soiling crop it is unequaled among the legumes, conserves moisture, fixes free nitrogen from the air, and furnishes a large quantity of organic matter.

5. As a dairy ration it is almost naturally balanced. It contains the protein and minerals necessary for a large milk flow and the health of the dairy cow. From a dairy feeding standpoint when timothy hay is worth \$7.00 per ton, clover hay would be worth about \$20 and alfalfa hay about \$30.

6. When combined with corn, barley, or speltz it will put the quickest and cheapest gain on hogs besides cutting the cost of concentrates in half. Horses, swine, dairy stock, and beef cattle thrive on it well, and well preserved alfalfa will furnish green feed for poultry in winter, enlarging the profits of egg production.

Alfalfa seed must be adapted to this climate if it is to be profitable in Charlevoix County. Northern grown certified Grimm, Hardigan, Montana Common (when it has a history of 10 or 15 years behind it) and the Lebeau (Michigan grown) furnish the best bets for Charlevoix growers. Do not take Southern grown seed as a gift. Make your dealer show where your seed comes from, and see that a proper guarantee accompanies it.

8. Alfalfa needs a FIRM seed bed. Fall plowing helps a lot to get it. The Cultipacker is a very desirable tool. The spring tooth drag if put over the ground enough times will do the trick. One of our most successful growers says "I drag my ground until I can always see my horses shoes."

9. With a sweet fertile soil, a firm seed bed and adapted seed of high germination and purity, failure with alfalfa is practically unknown. Under these conditions it can be seeded alone or with oats or barley any time from spring until the middle of August when weather conditions are favorable with assurance of success.

The cultural practices herein suggested and the feeding and soiling values apply to sweet clover as well as alfalfa. Sweet clover will stand under and furnish more pasture than alfalfa.

11. Upon the successful cultivation and use of alfalfa and sweet clover depends the building of any successful agricultural program in Charlevoix County. Our dairying, potato raising, corn and grain crop returns all depend on proper rotation with legumes and these are the two legumes which stand the best show for successful performances.

Therefore it behooves every farmer to make a close study of these plants, their life history, habits and requirements; also to strain every nerve to do the thing right because slipshod methods will not bring home the bacon.

Yours very sincerely,

B. O. HAGERMAN
Co. Agr'l Agent.

NOTICE

The State Law requires that election ballots shall be on file with the Clerk at least twelve days prior to an election; therefore, all nominating petitions for the city primary should be filed with me not later than March 10th.

OTIS J. SMITH, City Clerk.

Why Words Were Invented. Because our intentions cannot be made out if we be silent, words have been invented, not to be a curb but to point them out.

Ex-Service Men

A cordial invitation is extended all ex-service men of this region to attend an oyster supper and smoker to be given at K. P. Hall next Monday night, March 3rd, commencing at 7:30. Following the supper we are to be guests of the Temple Theatre management to a special motion picture show. This is a get-together meeting and there will be no charge.

Yes, Why Not?
If there are to be concrete country roads, why not a two-foot sidewalk? Motorists want them as earnestly as pedestrians.

Pits Instead of Silos.
The Royal Agricultural Society of England is conducting experiments with pits dug in the ground for the storage of fodder as a substitute for the more expensive tower silos.

FOLEY PILLS BROUGHT RELIEF

John R. Gordan, Danville, Ill., writes "I suffered with kidney trouble; could not sleep and was always tired. I got some FOLEY PILLS and after a few treatments I felt better." FOLEY PILLS are a diuretic stimulant for the kidneys; aid in flushing and keeping them active.—Hite's Drug Store, adv.

REVIVAL MEETINGS BEING HELD AT CHURCH OF GOD.

A series of revival meetings commenced at the Church of God Chapel Wednesday evening and will be continued indefinitely.

Everybody is cordially invited to attend any and all our services. Chas. T. Clifton, Pastor.

Origin of "Blue Blood."
Blue blood is a translation of the Spanish "sangre azul," attributed to some of the oldest and proudest families of Castile, who claimed never to have been contaminated by Moorish, Jewish or other foreign admixture. The expression probably originated in the blueness of the veins of people of fair complexions as compared with those of dark skin.

A Rare Amulet.

A jade amulet discovered at the San Juan de Teotihuacan pyramids, near Mexico City, had the following engraved Chinese inscription: "The golden fish that passes by the Dragon's gate is converted into a dragon." The Chinese legend readily interpreted the inscription, which is a quotation from a very old Chinese lyric.

THE hard-boiled reader of mystery and romance stories may tire of others, but he never grows weary of Oppenheim. He knows that he can always count upon new thrills and some surprises. He also chuckles over the way in which the author leads him to think that plot and characters are going to develop along certain lines when in reality they are bound for entirely different paths. In "The Evil Shepherd" there are thrills galore and some entirely unexpected developments, but we are not going to spoil the pleasure of your reading by telling you what they are. We shall reveal only the fact that it is not a detective story. It is something more real, logical and enjoyable; in fact, the author seems to be laughing at detectives, both professional and amateurs and you will laugh with him. Generally to get an Oppenheim story, you have to buy the book.

German Anthem Interfered With. Berlin—Whenever "Deutschland Ueber Alles" is broadcast by radio in Germany "some one, somewhere butts in," according to German newspaper paragraphers. The Germans play the martial air some two or three times a day over the radio, the paragraphers say. But, whenever the tune is started, there is a great hullabaloo in the air over Europe, and there is a growing suspicion that the interfering waves "come from the direction of Paris."

In three minutes it warms the sore spot through and through. Frees the blood circulation, breaks up the congestion—and the old rheumatism torture is gone.

Rowles Red Pepper Rub, made from red peppers, costs little at any drug store. Get a jar at once. Use it for lumbago; neuritis, backache, stiff neck, sore muscles, colds in chest. Almost instant relief awaits you. Be sure to get the genuine, with the name Rowles on each package.

FEW FOLKS HAVE GRAY HAIR NOW

Druggist Says Ladies Are Using Recipe of Sage Tea and Sulphur

Hair that loses its color and lustre, or when it fades, turns gray, dull and lifeless, is caused by a lack of sulphur in the hair. Our grandmother made up a mixture of Sage Tea and Sulphur to keep her locks dark and beautiful, and thousands of women and men who value that even color, that beautiful dark shade of hair which is so attractive, use only this old-time recipe.

Nowadays we get this famous mixture improved by the addition of other ingredients by asking at any drug store for a bottle of "Wyeth's Sage and Sulphur Compound," which darkens the hair so naturally, so evenly, that nobody can possibly tell it has been applied. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning the gray hair disappears; but what delights the ladies with Wyeth's Sage and Sulphur Compound is that, besides beautifully darkening the hair after a few applications, it also brings back the gloss and lustre and gives it an appearance of abundance.

MR. BEAR WAKES UP

MR. BEAR awoke from his nap one winter, and peeping out of his window saw the sun shining so brightly he thought it must be spring.

"Somehow I do not feel like getting up," said he, "but if the spring is here I must get up and set my house in order."

When Mr. Bear got outside he found it was not at all springlike, but cold, and his raggy fur coat blew about him, making him shiver and shake.

"Hello, Mr. Bear," called out Reddy Fox, who was skidding through the woods. "What are you doing out this time of the year? Going to our toboggan party?"

Mr. Bear had no idea at all what a toboggan party might be, but he asked, "Where is it?" just as if that were the very thing he got up for.

"Over the other side of the woods," replied Reddy Fox. "You had better hurry, for everybody wants to get the first ride."

Mr. Bear said he guessed he would trot right along with Reddy Fox, because things looked so strange all covered with snow. "If I had known there was snow on the ground I would have stayed in bed," he said. "I thought it was springtime. The sun shone through the trees and there was no snow around my house."

"Oh, you miss a lot of things sleeping so much," Reddy told him. "You will get up every winter after this, I am certain, when you find out how much fun it is to slide down hill." By

It Took the Whole Party to Wait on Him.

the time Mr. Bear got to the top of the hill with Reddy Fox he knew all about a toboggan party and he was so anxious to get a ride on the long sled that he nudged and pushed everybody to get a seat.

"Let him sit in front," said Mr. Squirrel. "He is good and strong and can steer. 'Til sit on his shoulder and keep a lookout ahead for bumpers."

Mr. Coon was there looking very comfortable in his winter furs, and he said he did not mind at all sitting on the end. "If anything happens," he thought, "I can jump off."

Mr. Possum said he would sit anywhere, he wasn't fussy. But Mr. Fox was not so willing to have the front seat taken by Mr. Bear. "He never

saw a snow-covered hill before," he argued. "What does he know about steering or tobogganing?"

But Mr. Bear wanted the front seat and so he told Mr. Fox that if he would let him sit there he would take charge all over to his house after the party and make hot chicken soup. He had some canned which he thought would taste very good on such a cold day.

That settled it for Mr. Fox. "The worst he can do is to tumble us off in the snow," he said to himself, "and chicken soup is worth that much."

So Mr. Bear took his seat and was told how to steer. "Now hold on to the rope with both paws and don't let go of it for anything, no matter what happens. Hold on to that rope and do not pull on one side more than the other."

"Huh, that is easy enough to do," replied Mr. Bear, catching hold of the rope.

"Are you ready?" called Mr. Coon, who was to start the toboggan.

"Let 'er go!" answered Mr. Bear, and off they went.

Now, Mr. Squirrel sat on Mr. Bear's shoulder, the wind blowing his tail around so that it tickled Mr. Bear's nose. He did not know what it was. In fact, he forgot it was winter. He thought of flies and bees and other bothersome bugs.

Mr. Bear forgot he was steering, too. He let go with one paw to brush away the thing that was tickling his nose, and away went the toboggan, riders and all, into the snow.

Some rolled down the hill and bumped into the stone wall at the bottom. Mr. Bear was one of these. "Why didn't you tell me there was a bumper ahead," he scolded Mr. Squirrel.

"Bumper? There was no bumper. You let go one side of the rope," said Mr. Squirrel.

"Well, a bee or something kept tickling my nose," weakly argued Mr. Bear. "Anyway, my feet are cold and I am going home. I don't see any fun in staying awake all winter."

"We wouldn't, either, if we had you to steer us," said Mr. Fox. "But don't forget that chicken soup, Mr. Bear. You owe us something for dumping us off, you know."

By the time Mr. Bear reached home his feet were so cold and sore that he jumped right into bed and groaned for the hot water bottle to be brought to him, and it took the whole party to wait on him before they could get him quiet.

"Don't see how you can say there is any fun in the winter time," he groaned.

"There's wouldn't be," replied Reddy Fox, "if you were around. Now don't you get out of that bed until spring."

As soon as Mr. Bear made a sleepy sound Mr. Fox went into the pantry and found the chicken soup and soon everybody forgot and forgave Mr. Bear for tumbling them into the snow. "He is a good cook," said Reddy Fox, "but a poor steerer. But it was your tail, Mr. Squirrel, that really caused the trouble. You ought to shave it."

THE ROMANCE OF WORDS

FRANK

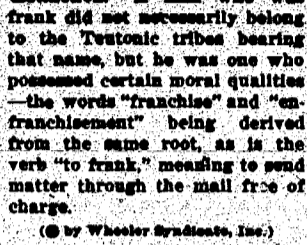

WHEN we say that a person is "frank" we are understood to mean that he is open, plain, to his manner and straightforward in his conduct.

The word "frank" is a metaphorical name, going back to the powerful German tribe of the Franks, the word meaning "free" or "unconquered."

The Franks were the ruling people, honorably distinguished from the Gauls and the degenerate Romans of their time by their independence, their love of freedom and their scorn of duplicity. In short, they possessed the virtues which belong to a conquering and dominant race in the midst of an inferior and conquered one. It was for this reason that the word "frank" came by degrees to mean not merely a national but a moral distinction. A man who was frank did not necessarily belong to the Teutonic tribes bearing that name, but he was one who possessed certain moral qualities—the words "franchise" and "franchisement" being derived from the same root, as is the verb "to frank," meaning to send matter through the mail free of charge.

IF SKIN BREAKS OUT AND ITCHES APPLY SULPHUR

Just the moment you apply Mentho-Sulphur to an itching, burning or broken out skin, the itching stops and healing begins, says a noted skin specialist. This sulphur preparation, made into a pleasant cold cream, gives such a quick relief, even to fiery eczema, that nothing has ever been found to take its place.

Because of its germ-destroying properties, it quickly subdues the itching, cools the irritation and heals the eczema right up, leaving a clear, smooth skin in place of ugly eruptions, rash, pimples or roughness.

You do not have to wait for improvement. It quickly shows. You can get a little jar of Rowles Mentho-Sulphur at any drug store.

RELIEVED COLDS OF FATHER AND SON

Mr. G. E. Kuhler, 1104 Mulberry St., Louisville, Ky., writes: "I, and my son also, used FOLEY'S HONEY and TAR COMPOUND for severe colds and must credit the relief to FOLEY'S HONEY and TAR COMPOUND." Excellent for the relief of coughs, colds, and hoarseness.—Hite's Drug Store. adv.

YOUR HAND

How to read your characteristics and tendencies—the capabilities or weaknesses that make for success or failure as shown in your palm.

THE HAND OF A SUCCESSFUL ACTOR.

THE successful comedian or comedienne should be possessed of short fingers, crooked and supple. As success in comedy is often associated with music, it is well if the fingers bend in a semi-circle toward each other, to indicate a great love of music.

The mount of Luna, or mount of the moon, near the wrist, being strong and well-developed, it is a sign of intuition and quickness of perception.

When the line of the head, the lower of the two principal lines crossing the palm, turns up at its end as if to seek the mount of Mercury, which lies at the base of the little finger, we may read therein a sign of lively wit, so essential to a comedian of either sex. Of course the comedian must have plenty of self-confidence to meet situations as they arise constantly on the stage, and this desirable trait is seen in a well-marked division between the line of life and the line of the head.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; influences over lucky day, lucky jewel

MURIEL

THE quality demure Muriel is one of the oldest and most beloved of English names. Its earliest form, Meriel, is still in common usage abroad. It signifies "myrrh," the precious perfume of early Biblical days, and a special reverence attaches to the name, since myrrh was one of the gifts brought by the Wise Men to the newborn Babe in the manger at Bethlehem.

Seldom in the history of etymology has a name preserved its original identity so faithfully as Muriel. It has suffered no change, since Meriel was first taken from the Greek word meaning myrrh. Nor did it leave its native heath to undergo transformation by another language. No other country has an equivalent; even America transported it intact.

The moonstone is Muriel's talismanic gem. According to an old legend, it will endow her with the purity and beauty of the moonbeams which the ancients believed were imprisoned in the stone. It is likewise said to give her the gift of prophetic vision whereby she may read the future. Sunday is her lucky day and 2 her lucky number. The cornflower is her special bloom.

Remarkable Island. One of the most remarkable islands in the world is Patmos, where St. John wrote the Book of Revelation. It was always the destination of thousands of pilgrims, and in the old days the rich man who wished to expiate his sins usually did so by building a church. The result is that this tiny island contains the ruins of no fewer than 300 churches.

Just the moment you apply Mentho-Sulphur to an itching, burning or broken out skin, the itching stops and healing begins, says a noted skin specialist. This sulphur preparation, made into a pleasant cold cream, gives such a quick relief, even to fiery eczema, that nothing has ever been found to take its place.

Because of its germ-destroying properties, it quickly subdues the itching, cools the irritation and heals the eczema right up, leaving a clear, smooth skin in place of ugly eruptions, rash, pimples or roughness.

You do not have to wait for improvement. It quickly shows. You can get a little jar of Rowles Mentho-Sulphur at any drug store.

TURNS IN THE ROAD

WHATEVER may be your affluence or influence, your station on this sphere, your power of conquest or good-fortune, there is in the natural progression of things a probability that you may some day come to a turn in the road.

At every swing of the pendulum time is working wondrous changes. Overnight the topography of a country may be so scarred by an earthquake or scoured by a flood that it is unrecognizable.

An empire may crumble; wealth may be swept away; pride subdued and humility exalted. At the dawning of the morning we are amazed at the sudden transformation.

We are in a flash brought face to face with a turn-in the road over which we have for years been traveling complacently in fine company and fancied security.

We have given no thought to the future, having been too deeply engrossed in our worship of gold. In the hasty pursuit of wealth we have grown blind to the beautiful things around us and unmindful of others.

We have forgotten that we are but travelers on our way to an enduring country beyond the limits of earth, and where there are no turns in the road.

We have seen others lose their way and given them no attention. We have seen them shudder, sink and give up hope.

We have turned our backs, stopped our ears and walked on confident of our strength and sure of our step.

But when we ourselves come to the turn in the road all is different. We fall then into that state in which by some subtle transformation we become other things.

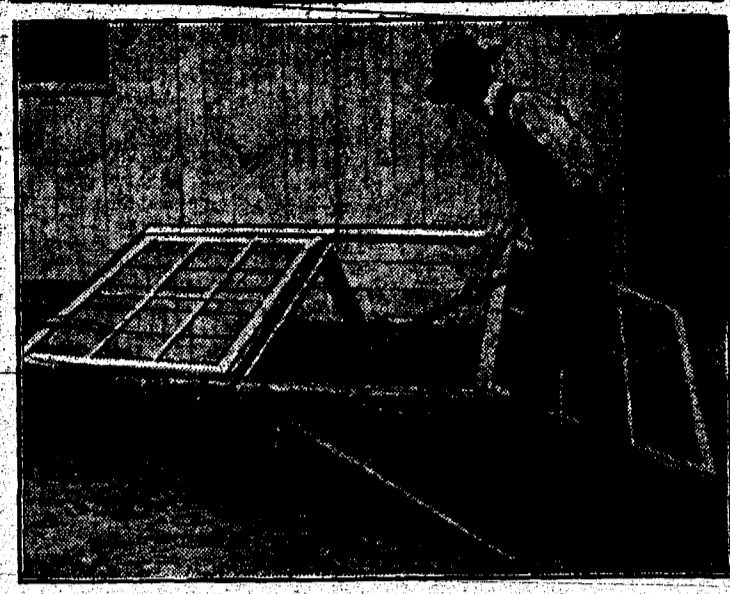

We see with new eyes, speak in a trembling voice, controlled by strange and terrible emotions.

For the first time in our lives we realize that we are but sojourners, tossed about like chips upon the sea, at the mercy of the tides and winds.

By some miscalculation we have lost our way. We are swept with tremendous force in a new direction, overwhelmed and awed, just as have been millions of others who have gone before us, and if we lack the faith, we turn sick as we face the vast nothingness and drop out of the running.

The Cottage Gardener

Preparing the Hotbed is Regarded by the Practical Cottage Gardener as One of His Most Important Duties—for He Must Have His Own Supply of Plants if He Wishes to Have Early Vegetables and Flowers

Good Seed Bed Is Always Necessary

Soil Should Be Carefully Sifted Before Placed in Containers.

A sponge's capacity to take up water is largely dependent upon the size of the holes in it. A coarse sponge with holes as wide in diameter as the finger and many of them, will not hold as much moisture in suspension as will a sponge of the same size with fine pores and smaller orifices.

The soil acts as a sponge, holding moisture for the plants, and the finer the soil the more readily it holds moisture and the more moisture will it contain. Finely sifted and close packed, the tiny rootlet of the seedling comes in contact with its nourishment at once and starts rapid growth. If the soil is lumpy, with large interstices, a seed may send its first sprout

Do Not Overcrowd Your Young Plants

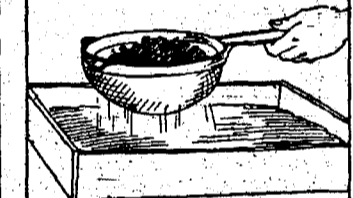

Transplant From Flats to Larger Boxes or Roomy Flower Pots.

Overcrowding, perhaps, is the greatest fault of the average gardener. Because the plants are small when they first appear above ground, he will not space them properly, because they look lonesome with an expanse of bare soil between them. However, they will grow fast, and at maturity will use all the space allowed them, and usually are growing into and over each other.

This fault should be corrected when the transplanting is done, or if the seeds are sown in the open ground, by judicious thinning. Follow directions, which are always contained on seed packets as to proper distances, to the letter. Work with a tape measure or yardstick. The crop of many vegetables will be in proportion to the chance they have to develop. The bush lima bean is an excellent object lesson. Many gardeners have given up the bush lima as not being productive enough to justify its space. But give the individual bushes 18 inches apart, so they will have a chance, and there will be a bountiful crop with ordinarily good soil and moisture conditions.

The rule to follow in transplanting seedlings is to move them as soon as the leaves touch. The first transplanting should be done when the first pair of true leaves appear. If they are not placed at sufficient distance, and often it is not convenient to do so at this time, because of lack of space indoors or in the hotbed, be prepared to move them when the developing leaves touch. If you do not, they will begin to spindly in the struggle to reach the sunlight.

The percentage of loss is greater as the plants attain size, but early transplantings go a long way to ob-

out into space until it can reach more closely packed earth. The fine soil draws moisture from the bottom upward by capillary attraction, and the finer it is the more readily the moisture is drawn through the surface and the soil evenly moistened. In coarse, lumpy soil the water is not drawn up regularly from below.

For this reason it is necessary to take extra care to sift the soil for seed boxes, and for the top layer of the hotbed or coldframe. In order to prevent too rapid drying out, it is necessary to pack the fine soil firmly over the seeds.

The coarse screenings from the soil are useful to spread over the bottom of the seed box to provide drainage. Over this the fine soil should be spread evenly and firmed down. The finer the soil and the more fertile it is the better the germination and quicker the growth of the little plants.

A great deal of seed is wasted, and many attempts at sowing seeds indoors prove failures at the very start, because the soil is not properly prepared. Next to this is the failure to provide suitable drainage. The seed box must be built so that the soil will retain moisture, but will not remain water soaked and sour. Overwatering promotes a fungous disease known as "damping off" which causes the seedlings to rot off at the surface of the soil. This fungus often will ruin a box of seedlings before the grower knows what is happening. It can be obviated by providing drainage at the start.—National Garden Bureau.

PLANTS MUST BE FED

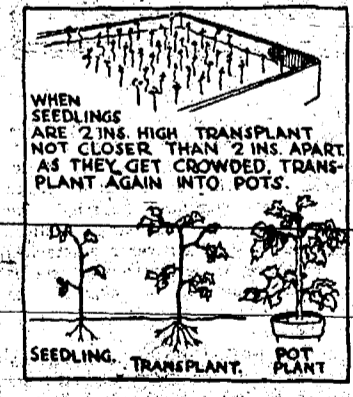

Plants, like animals, must be fed. Their diet consists of organic matter derived from manure or decaying vegetation and from chemical fertilizers, especially nitrogen, phosphoric acid and potash.

MOTHER NATURE GETS BUSY

Old Mother Nature wakens her children early in the spring and the wise home gardener works in co-operation with Mother Nature.

SWISS CHARD

A few hills of swiss chard started in a window seed box will give early greens.

via this loss by developing strong fibrous root systems, especially in the case of plants which, undisturbed, form tap roots; or a long root that goes straight down some distance before giving off branches. When this long root has developed for the plant receives a severe check in being transplanted, from which it takes a long time to recover.—National Garden Bureau.

SPRAYING TREES

Spray fruit trees with arsenate of lead and bordeaux mixture first, as the buds swell; second, when the blossoms show their characteristic color; and third, as the last of the petals are falling.

GARDEN TOOLS

The first cost of garden tools is of minor consideration. The care they are given and the years of usefulness is the all important factor.

PLANT SWEET PEAS EARLY

Early and deep-planted sweet peas are likely to prove most satisfactory.

Drink Water If Back or Kidneys Hurt

Begin Taking Salts if You Feel Backachy or Have Bladder Weakness

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders.

By all means, drink lots of good water every day. Have your physician examine your kidneys at least twice a year.

Author of Seventy Novels

E. Phillips Oppenheim

Although he is an Englishman and makes his home exclusively in his own country, he may be styled an international novelist, for he undoubtedly has as many readers in America as across the sea; in fact, his popularity is about as great in this country as that of any one of our native writers.

If the average British novelist were as wise as Oppenheim in the tastes of his public and did not fill his books with so much about tea, tennis and domestic infidelities, he might also be as popular at home and abroad. Oppenheim is modern enough, especially when treating of the modern girl, but he sticks mostly to the old standards of love, romance, adventure and mystery; and as a proof that it pays, may be cited the fact that he is author of seventy novels, probably an unequalled record.

ALL OUT OF SORTS?

So Was This Good Woman Who Tells Her Experience.

All too often women accept their aches and pains as natural to their sex. They fail to realize that weak kidneys are often to blame for that backache, those headaches, dizzy spells and that tired, depressed, feeling. Thousands have found new health and strength by helping the weakened kidneys with Doan's Pills—a stimulant diuretic. This case is one of many in this locality.

Mrs. Wallace Weather, 173 Main St., Mancelona, Mich., says: "I felt pretty badly with backache and I was hardly able to be around. It was difficult to attend to my housework. Every time I stooped, I was miserable in straightening up. I was restless nights, couldn't sleep, and it seemed I was always tired and depressed. Doan's Pills rid me of the trouble." Price 60c. at all dealers. Don't simply ask for a kidney remedy, get Doan's Pills—the same that Mrs. Weather had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Ohio's Senate Has Woman Ruler.
Columbus, Ohio.—Mrs. Nettie B. Loughhead, of Cincinnati, Ohio, has the distinction of being the first woman to preside over the Ohio state senate. As a state senator she is said to be the first woman to preside over any state senate. Mrs. Loughhead in an interview during her recent visit to Washington, said that women lawmakers have made good in office.

Canada's Apple Crop Large.
Halifax, N. S.—Government statistics estimate the apple crop of Canada for 1923 at 10,800,000 boxes, which, at an estimated average of \$2 per box, makes the value a little over \$21,600,000. By provinces the estimated production was as follows: Nova Scotia, 5,250,000 boxes; British Columbia, 3,124,000; Ontario, 2,275,000; Quebec, 110,000, and New Brunswick, 35,000.

Butler Reduces Liquor Deaths.
Philadelphia.—Deaths from alcoholism in Philadelphia decreased more than 85 per cent in the first six weeks of 1924, in comparison with a similar period last year, Frank Paul, chief investigator of the coroner's office, said. Mr. Paul attributed the reduction to Director of Public Safety Butler's campaign against law breakers. Reports showed 150 deaths due to alcohol during the first six weeks of 1923, as compared to 27 this year.

New Motor Fuel May Replace Gas.
Paris.—M. The new fuel is derived from common charcoal, and replaces petrol gas by a gas composed of 30 per cent oxide of carbon, 2 per cent hydrogen, 2 per cent methane, and the remainder azote (nitrogen) through admixture with air.

The Evil Shepherd

By E. PHILLIPS OPPENHEIM

There is no false glamor about the people in an Oppenheim tale. Generally he presents the worst side of their character first. He shows how they drink and carry on [the scene is England not America] just as normal folks do in some countries; and then by slow degrees he begins to reveal their better sides. The final result is a pretty likable, clean lot of folks who are more devoted to outdoors sports and healthy living than they are to dissipation. And the author has the genius to fit these people into romantic, even heroic roles, without making them either priggish or immoral and without destroying their naturalness and reality. "The Evil Shepherd" is a lively, charming, thrilling tale.

AMBASSADOR TO MEXICO NAMED

PRESIDENT COOLIDGE APPOINTS
CHARLES B. WARREN OF
DETROIT.

SENATE CONFIRMATION ASKED
Former Envoy to Japan Negotiated
Recognition Pact Between
the Nations.

Washington.—Charles B. Warren, of Detroit, has been nominated by President Coolidge as ambassador to Mexico. The nomination has been sent to the senate for confirmation. As both Michigan senators are understood to have expressed their approval of the appointment, it is expected that favorable action will be quickly taken and that Warren will proceed shortly on his new mission.

It is understood that Warren was reluctant to return to diplomatic service and when the administration urged upon him his sense of a duty on his part to return to the scene of his successful mission of last summer he asked that some other title be given him.

After much study, the department experts found that this would not be feasible, it is said, as Mexicans would not understand the reasons for sending anyone lower than an ambassador to their country, and the standing of the American representative, himself, in the diplomatic corps of Mexico City would also be affected.

Mr. Warren's previous experience in the diplomatic service includes a partial term in Tokio as ambassador, and his mission to Mexico last summer when, with John Barton Payne he laid the basis for American recognition of the Obregon administration.

Treaties were negotiated by the commission providing means of adjusting claims of Americans against the government of Mexico.

In Japan, Ambassador Warren negotiated several agreements for better understanding between the American and Japanese peoples and was effective in co-operation with the Washington arms conference in helping to remove reasons for friction.

FEAR FRANC MAY HIT MARK LEVEL

Newspaper Places Query Bluntly
Before People.

Paris.—"Can the franc fall like the mark" is the query in large type heading the first article in "La Liberté" recently, being the first time that such a possibility has been placed bluntly before the public by a newspaper outside of the communist organs.

The article hastens to say that such a question is a scandalous and impious utterance, but is one which every body is asking himself. The franc, it says, now is about where the German mark was in October, 1919, when the pound sterling was worth about 100 marks.

In less than a year, the pound was worth 200 marks, ten months after that 300 marks, and then in three months later it went to 1,000 because of unlimited inflation.

"La Liberté" declares if the slightest inflation is admitted, the franc is doomed to follow the mark, adding that it is not enough to increase the country's receipts, as there is a limit to such an increase, but the outlay must be reduced and Mussolini's example of stopping waste and parliamentary demagoguery must be followed.

RUHR RAIL GRIP MAINTAINED

Expert's Plan for German Control
Objected To By France.

Paris.—The French high military command opposes the abandonment of the Ruhr railroads to Germany as is provided for in the plan of the expert committees. The French government has been advised that military occupation could not continue with security unless the Franco-Belgian civilian control of communication is maintained.

The government therefore is examining the conclusions of the experts from two points of view, the first economic and the second that of military security.

It is understood the French government sees no objection under given economic conditions to the withdrawal of their civilian administration of the customs and coal tax, supervision of the mines, and every other form of supervision, but not of the Franco-Belgian railway control which has been set up in the face of many obstacles and after much thought, energy, engineering talent and expense.

Moving Libraries in Russia.

Bolgrade.—"The Russian people are reading today as they never have read before," said H. M. Lydenberg, of the New York Public Library, on his recent return to this city in observing existing library systems. Whatever the Soviet government is or is not doing for the Russian people, it is making it possible for them to read books. And the Russian people are availing themselves of the new opportunities placed in their hands by Bolshevik government.

YOUR HEALTH IS WITHIN YOU

HEALTH TALK NO. 6

All the health you will ever have is dwelling within your body now, your problem is to find the true way to release that health.

The miner knows where his ore is, his problem is to bring it to the surface. The driller knows where his oil is, his problem is to start it gushing.

The wise individual knows that this is likewise true of health. When all individuals become wise they will cease to believe that they must search outside of themselves to find some magic potion or enchantment that will preserve their health and give them safe conduct to old age.

GET OUT OF THE RUT

Your health is going to be O. K. as long as there is complete and uninterrupted connection between the brain and all the rest of the body. But the situation is this: There are 31 pairs of nerve cables, each containing thousands of nerves, which branch off from the spinal cord (the main cable from the brain) carrying the life-giving force that controls every function of every cell in your body. These nerve cables pass out through openings between the vertebrae (bones of the spine) and when one or more vertebrae gets out of alignment, pressure is obtained on some nerve cables, thus the connection between the brain and the bodily parts supplied by these nerves that leave the spine at this point is not complete; these parts do not get their full quota of life force, so the result is disease.

The Chiropractor locates these offending vertebrae and by a series of adjustments the pressure is removed from these nerves thus restoring the full quota of life force to the diseased parts of the body, the result is you regain your health.
