E. J. H. S. Girls Win 24 to 8

All-Round Team Work Triumphs Over Individual Efforts of the Ellsworth High.

Meeting for the first time this season last Saturday night the East Jordan High School sextet drew first blood in an exciting game with the Ellsworth high. Matched against the well coached and smooth working East Jordan team, the superb individual efforts of a chosen few on the Ellsworth six proved to no avail. It was simply a matter of individual ability pitted against far superior team play, and the battle ended only as such battles end. The East Jordan girls won because they were better drilled and better prepared.

At the end of the first half, with the score tied 6 to 6, everything pointed to a close and hard fought contest, and the spectators were kept on edge constantly.

At the beginning of the second half, the East Jordan girls took the aggressive and Malpass and Ekstrom began to chalk up counters for their team. Several times it appeared as though the Ellsworth girls would pull together and overcome the lead but the team lacked the stamina and reserve strength which is incidental only with finished team play. With the game rapidly drawing to an end and defeat a certainty, they assumed an attitude of stolidity, and prepared to take the inevitable as gracefully as possible, and when the time was up both aggregations gathered about in a small circle and shouted the customary cheer for the opposing team.

Saturday's game showed conclusively that individual play cannot be employed with success when opposed to a team that is well versed in the phases of basket ball. From every standpoint the winning team appeared to hold the upper hand and were masters of the situation from start to finish.

The excellent guarding of Captain Liskum, Miss Sweet and Miss Murray kept the Ellsworth forwards from scoring more than 8 points. "Stub" and Miss Kitsman kept the ball rolling to their forwards and one only needs to take a look at the score to know the good work our forwards did.

Come out this Friday and help our girls win another victory.

Albion—William L. Loder, 75 years old, a resident of Albion for 50 years, died recently following an operation.

Hillsdale—Hillsdale is to have a woman postmaster. Mrs. F. A. Lyon recently received word of her appointment here.

Lansing—Alexander Reid, of Detroit, has been appointed to the State Board of Pharmacy by Gov. Grosbeck. He succeeds Oscar Gorenflo, of Detroit.

Grand Rapids—Diplomas have been awarded by the Grand Rapids safety council to 80 members of the Industrial school of safety which has completed its course here.

Tustin—Arrangements have been completed to change the fire district of Deputy W. C. Kidder, of this village. Oceana county will be withdrawn and Manistee county added to his district.

Saginaw—Helpless because their motor engine was stuck in the snow, city firemen were unable to save the farm home of Sherman Sommerville last week and were obliged to watch it burn to the ground with a loss of \$10,000.

Saginaw—Elf Khurafah shrine, of Saginaw, conducted a class of 75 candidates over the "hot sands" here last week before an audience of 2,500 nobles from all sections of the local jurisdiction. Potentates were present from several shrines.

Menominee—Fire of unknown origin recently destroyed the Wilson-Henes company department store here in the heart of the business section of the city. The loss has been estimated at \$200,000. No one was in the building when the fire started.

Kalamazoo—Dr. William A. Stone, formerly identified with the Traverse City and Kalamazoo state hospital, and noted specialist in mental and nervous diseases, died at his home here recently. He was stricken with heart trouble at a football game here last fall and never recovered.

Marquette—Professor V. Vampa, director of Vampa's Italian band, one of the upper peninsula's leading musical organizations, has announced his intention of leaving Ishpeming to become director of a 45-piece Italian band in Chicago, where 20 of his former musicians now are located.

Joe Maddock Grid Coach For Oregon

Former East Jordan Boy Going To Top of College Athletics.

Through courtesy of Representative Rollie L. Lewis of Charlevoix, The Herald is in receipt of several clippings from an Oregon newspaper announcing the selection of Joe Maddock as University of Oregon Grid Coach for the coming three years.

Maddock is a graduate of East Jordan's Public Schools, and his many old-time friends here will be glad to learn of his continued advancement.

Following are some excerpts from the newspaper articles.

University of Oregon, Eugene, Feb. 8th. — Joseph ("Joe") H. Maddock, former All-Western tackle and one of the greatest players ever on a University of Michigan team, will be the next University of Oregon football coach. He was chosen by the executive council of the associated students last night to succeed "Shy" Huntington, resigned.

Virgil Earl, director of athletics, recommended the appointment of Maddock. Earl returned to the campus Tuesday after touring the country in search of a coach. He interviewed 22 applicants, and Maddock was his first choice.

The new coach is not only a product of "Hurry Up" Yost's coaching system, but he served under the great Ann Arbor gridiron mentor in 1920 and 1921 as assistant coach.

Walter Camp and several other leading critics selected Maddock on the 1904 All-Western team. He was named by several others on the All-American eleven. Camp said of him: "Maddock is powerful ground gainer, strong on defense, and in breaking up plays, and showed well in his final and important contests."

Maddock, before joining the Michigan staff, was director of athletics and physical education at the University of Utah for six years, coaching football, basketball, baseball and track. During this period, 1906 to 1912, Utah had championship teams.

During the last two football seasons, he coached the Idaho Falls high school team to a state championship. This he did gratuitously while engaged in his mercantile business, which comprises a chain of stores in Idaho.

Director Earl of Oregon says of Maddock: "He has a mighty fine record and personality. I recommend him unhesitatingly. He is a man of lots of drive and power, stands about 6 feet and weighs 215 pounds." Maddock began his athletic career with the Albion, Mich., college teams, and was a member of football, track, baseball and wrestling aggregations. He won the intercollegiate championship in wrestling for two years in the Michigan Intercollegiate Athletic association, which included seven colleges.

Maddock said he had heard all along the line in his journey to Eugene that Oregon teams were composed of fighters. This seemingly gave him more satisfaction than anything else. "Study the rules" was his precaution to the men who expect to be on the field March 1.

Emphasis will be placed upon the fundamentals of football in the pre-season work, Maddock announced. Attention will be centered upon blocking, tackling, punting and passing, following the system of Yost, under whom Maddock served.

BLACK WALNUT SEEDLINGS AT COST

Annual Distribution by Central Michigan Normal School.

The Agricultural Department of Central Mich. Normal School of Mt. Pleasant will send out by mail at cost Black Walnut seedlings to schools and citizens of the state.

For fourteen years the Normal has been distributing walnut trees, a total of over 40,000 trees having been sent out. The trees have been sent to all parts of Michigan.

Some have been sent to the upper peninsula, and do well under ordinary soil conditions in all parts of the state.

The trees are distributed about Arbor Day. The original plan was to furnish trees for the school children for spring planting. However, there has been such a demand for the trees that they have been sent to all sorts of organizations and to private individuals. The supply has never been equal to the demand and orders should be placed early. Inquiries should be made to Prof. Myron A. Cobb, Central State Normal, Mt. Pleasant.

Night School Well Received

Several Hundred Parents Present Last Wednesday.

On Wednesday night, February 28th, the East Jordan Public Schools had open house, and the parents came to inspect the place, to determine whether or not they could blame the teachers for all the little troubles of the year.

School had been dismissed on Wednesday noon to give the pupils a chance to prepare perfect lessons and to rest up a bit. At seven o'clock all were assembled and then began to arrive the strangest assembly that had visited the school this year. This strange assembly was very restless. It moved about from room to room, and from building to building. As some individual from this group entered a room, the eye of some pupil would brighten and immediately the teacher would sense the connection. Ma or Pa had just arrived.

If it had not been such a well organized and flexible piece of machinery there might have been considerable commotion, but the orderly way in which things moved, proved to more than one father and mother that the school was much better organized than their home. In the grade buildings the parents stood and looked in awe at the ease with which the teachers brought results out of a seeming confusion. One observer remarked, "I've often heard of teacher's pets, but I would not be able to teach twenty-four hours without having my pets. From now on I'll take off my hat to the teacher. How she can keep forty-five busy, is more than I can see. She handles them as easily as my wife handles one." Such comments as this were frequent and caused much conversation.

In the High School one found more mature students and hence less confusion, and a better semblance of order. Everyone moved to the touch of the bell. Someone suggested that perhaps they were on good behavior, but a well drilled army is always on good behavior. Everyone knew his business and went about it man orderly fashion. The bell would ring and classes would pass. When the hour was up the bell would ring again and always the order systematic.

The different departments well demonstrated their abilities. The Domestic Science Group showed very plainly, that their training in preparing hot lunches, had not been in vain. They served lunches to all who wished to eat. The manual training department proved to be an interesting corner in fact each department, English, Latin, and Business demonstrated that no fooling was tolerated but that work was the motto.

East Jordan has a fine system of schools. They have hired a competent group of teachers. This is a thriving and not a knocking community. We are for the schools. In the observation plan last Wednesday night, the teachers saw that the parents were interested and the parents saw that the teachers were not dwelling in a land of ease. Each seemed to sense the fact that in order to make our schools more successful, all must work together. From now on let us see what good we can find in the school. The teachers are doing their part. Are we the people of East Jordan doing ours? Lets boost the school. Shove ahead, don't drag.

Old Publisher Dies In West

George W. Perry, Elk Rapids Pioneer, Dies at Fresno, Calif.

Elk Rapids, Feb'y 29.—George W. Perry, 72 years of age, died at the home of his son, Neal C. Perry, at Fresno, Calif., Tuesday morning, according to word received at his old home here.

Mr. Perry was one of the veteran and well-known editors of northern Michigan, having published the Elk Rapids Progress for 18 years and, previous to that time, was publisher of the Bellevue Gazette and the Coldwater Times. He was best known, perhaps, for his fight against the liquor traffic. Long before this traffic became a political or moral issue, Mr. Perry was fighting it tooth and nail in his publications.

A little more than a year ago Mr. Perry sold the Elk Rapids Progress to Earl Loomis because of failing health. On October 23, with Mrs. Perry, he left for the west to spend the winter with his son.

Mr. Perry was born in New York State in 1851, and came to Michigan in the pioneer days, starting his career as a publisher. For four years, under President Hayes, he was in the federal revenue service.

Meg of Muckle Mouth.
It is said that Sir Gideon Murray of MIBANK, Scotland, took prisoner a young gentleman named "Scoto," whom he was about to hang, but his wife persuaded him to commute the sentence into marriage with their daughter, "Meg of the Muckle Mouth." The young man hesitated for some time but finally preferred marriage to death. Strangely enough the match turned out very happily.

The Jovial Man.
A "Jovial" character once meant the type supposed to belong to all persons who were born when the planet Jupiter was in the ascendant. They were supposed to possess more of the cheerful elements of character than others, and hence to partake of the benign qualities attributed to the father of the gods.

Under-Glass Plan for Young Plants

Protection That Speeds Up Growth and Produces Sturdy Sprouts.

Glass, even if it be only a fragment of a window pane with which to cover a small seed box, or an old tumbler to set over a cutting in a flower pot, is one of the essential materials of a plant grower in climates where there is frost.

French gardeners raise scores of plants under "cloches," or bell-shaped glasses of various sizes, which set over the individual plants to speed up growth. Wonderful lettuce is grown this way.

Glass keeps the heat in and the cold out, while letting in sunlight. This is the chief principle of the hotbed, which is an essential institution in a garden of any extent. The heat usually furnished by fermenting horse manure is conserved and fostered by

the blanket of nonconducting glass, which does not allow it to escape rapidly by radiation as would metal, or even wood.

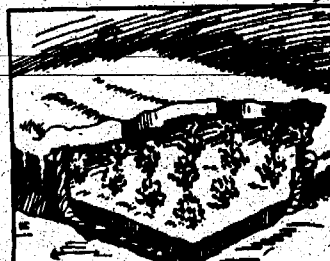

When a hotbed cannot be maintained conveniently because of the difficulty of securing a supply of fresh horse manure as its foundation, a difficulty that is becoming more real each year, a coldframe or heatless hotbed can be used as a substitute, although it cannot be utilized for a month or six weeks after the hotbed usually is at work.

Hotbeds may be artificially heated by steam or hot water pipes, but only a few gardeners will be able to afford such a luxury or will have a location to permit it being used conveniently.

The construction of a hotbed is not at all complicated. In fact, any frame built to accommodate a glass cover may be used, provided it is of sufficient extent to encourage fermentation of manure. While it is best to use the standard-sized hotbed sash sold by all dealers, which are 6 feet by 3 feet each, old window sash may be utilized for the purpose.

Knockdown frames to hold this sash are sometimes sold, but they can be manufactured by any carpenter or by the gardener himself if he is at all handy in the use of hammer, saw and nails. The usual unit is 6 feet 2 to 3 inches by 6 feet, accommodating two standard sashes. The extra inches are necessary to permit of the placing of a cross strip between the sashes upon which their inner edges may rest firmly. This crosspiece usually is grooved so that any moisture that may seep between the edges of the sash and the crosspiece would drain down the groove and not drip into the bed beneath.

If the bed is to be permanently located it is best to make the frame of heavy lumber, 2-inch stuff that may be bolted together with angle irons in the corners. If it is to be temporary, lighter lumber is available, and it is

SECTION OF COLD FRAME SHOWING PLANTS GROWING DURING WINTER MONTHS.

lighter to move and handle without knocking down the frame. The back of the sash should be 18 inches high, and the front 6 inches to 10 inches. Some types are 12 to 15 inches high at the back and 8 to 10 inches in the front. These, however, are only useful for seedlings and low growing plants. The taller type will keep the plants until they have attained considerable height and is also available for a coldframe in which plants from 6 to 10 inches may be wintered.

A frame should always face the south, with no houses, trees, or other objects to cast a shadow over it or cut off the sun. If sloping land can be secured for the frame it is an added advantage if the land slopes to the south, as it will give more direct rays of the sun upon the glass.—National Garden Bureau.

Need Little Room

Dwarf Varieties Are Giving Results, Says Department of Agriculture.

Since the cottage garden is usually quite limited in area, it is necessary to plant trees that will not occupy too much space. The dwarf apple and pear trees fill this need admirably and are giving good results in the small home fruit garden, suggests the United States Department of Agriculture. Dwarf apple trees are propagated on what are called Doucin roots, Doucin trees being dwarf in habit of growth, and when the ordinary varieties of apples are budded or grafted on Doucin roots the resulting trees are of medium size.

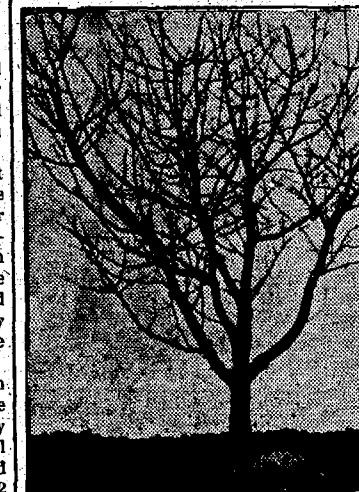

The advantage of using dwarf trees is that many different varieties of apples may be grown on a small piece of ground. The trees are small so they can be easily pruned and sprayed. Dwarf apple trees may be planted 14 feet apart each way, and should they make such vigorous growth that the limbs touch across this 14-foot space, they should be kept pruned back so as not to crowd.

Dwarf apple trees should be only one year old when planted, and should consist of a single shoot. The tree should be set in the ground about an inch deeper than it grew in the nursery. If set deeper than this, roots will start from above the point of budding or grafting and change the tree from a dwarf to a standard. In case it does happen that roots are sent out in this way and the trees make very vigorous growth, it becomes necessary to do root pruning. This is easily done by speeding around the tree and cutting off a few of the uppermost roots within about 3 feet of the tree trunk.

When planted the top of the tree should be cut off about 30 inches above the ground. This will cause it to form a low top. After the first year's growth the branches are cut back about one-half. After the second and third year's growth the new branches are cut back about one-third to one-half, and any crowding or crossing branches are cut out. After the third year's growth, very little pruning is necessary, except to cut out any crowding branches. About the fifth or sixth year from planting, the trees usually begin fruiting.

Dwarf pear trees are planted and handled the same as dwarf apple trees.

Peach, plum, cherry and other fruit trees, should be planted in the cottage garden in all sections where these

A Sturdy Dwarf Fruit Tree.

fruits will grow. They may be kept of dwarf size by pruning each year if necessary. Sour cherries usually grow slowly and do not need much cutting back until they are six or eight years old. Peaches should be cut back somewhat every year. Plums need cutting back to keep them from growing too large.

From one-half to a dozen dwarf apple trees of varieties covering the full season will furnish enough fruit for the ordinary family during most of the year. It is well to have at least one early and one late summer variety, one early and one late fall variety and two or more winter varieties. Unfortunately, not very many varieties of dwarf apple trees can be purchased from nurserymen, but that need not keep one from having varieties covering the whole season. The way to do is to graft to the desired varieties just before or right after the nursery trees are planted. To do this it is, of course, necessary to secure grafts of the varieties one wishes to grow and then do the grafting, or get someone else who understands grafting to do it. Nurserymen propagate quite a number of varieties of dwarf pears so there is no difficulty in getting trees of pear varieties to cover the whole season.

BLUE FLOWERS

If you like blue flowers or those with blue varieties, you may choose from cornflower and larkspur, growing 2 1/2 feet high; lupine and Japanese bell-flower, 2 feet; nemophila, ageratum, lobelia, verbena, and forget-me-not, one foot or less.

SPADING THE GARDEN

Spading up the garden soil is quite an art, the secret being to cut the soil in small, deep slices and thoroughly pulverize the clods with the edge of the spade or fork as each spadeful or forkful is turned over.

Don't Pay \$1,000 or More

for a car, without knowing what the leader offers in the fine-car field

WE made a canvass of many who bought rivals of Studebakers. We said, "Tell us why you liked your car the better." The majority said, "We did not even look at the Studebaker." Most of them bought new models of the car they owned before.

Yet Studebaker is a leader in the fine-car field today. Studebaker builds more quality cars than any other plant in the world.

Studebaker is the sensation of modern Motordom. Its amazing growth signifies a new situation in this field.

Last year, 145,167 fine-car buyers paid \$201,000,000 for Studebaker cars. Nearly three times as many as in 1920.

Is it fair to yourself—or fair to us—not to learn the reasons for this trend?

Facts to consider

Studebaker assets are \$90,000,000—all staked on satisfying, better than others, buyers of high-grade cars.

Over 23,000 men have their future at stake on giving you maximum values.

\$50,000,000 in modern plants and equipment, of which \$32,000,000 has been added during the past five years.

\$10,000,000 in body plants to give you superlative beauty. To give that final touch for which Studebakers have been famous for decades.

125 experts who devote their whole time to studying betterments. Who make 500,000 tests per year to maintain our supremacy.

Consider Studebaker history. For 72 years this concern has stood for high principles and policies.

For two generations, against all the world, it held first place in horse-drawn vehicles.

Now for years its name and fame have been committed to like attainments in fine motor cars.

If you only knew

There is no room here for details and comparisons. You will find them all in Studebaker showrooms. But let us cite some significant facts.

That lack of vibration, so conspicuous in Studebakers, costs us \$600,000 yearly in extra machining of crank shafts.

That matchless strength in vital

worked out to exactness for supreme services in its place.

We employ 1,200 inspectors to make 30,000 inspections of the material and workmanship in each Studebaker car—before it leaves the factory.

Consider how Studebaker has always led in the building of high-grade cars. We were first to use cord tires as standard equipment. We were the first quantity manufacturers to build bodies of the highest grade.

If you want beauty, fine upholstery, rich finish and equipment, consider that Studebaker has had more experience in fine coach building than any other motor car maker.

Our place no accident

The pedestal place which Studebaker holds in the fine-car field is not the result of accident. It comes from principles as old as this business—the ceaseless and determined ambition to excel.

Learn the result of these efforts. Compare detail by detail, part by part, with any car you wish. When you foot the advantages, you will find that they number scores.

These are facts you should know. They are inducing 150,000 per year to choose Studebaker cars.

Some sell at \$1,045. Some meet with every requirement in size and power and luxury. But the chassis are all alike, save in size. The same steels, the same standards throughout. Every important Studebaker part represents the best we know.

People have learned these facts—hundreds of thousands of them. The demand for Studebakers has almost trebled in three years. It has become overwhelming, even for our facilities.

Investigate the reasons. You will find them by the scores. Then, if you choose a rival car, we shall have nothing more to say.

See the Studebakers

Studebaker builds more fine cars than any other plant in the world.

Last year 145,167 wise motor car buyers paid \$201,000,000 for Studebakers.

The demand has almost trebled in the past three years. Studebaker now holds a leading place in the high-grade field.

Our modern plants and their equipment cost \$50,000,000. All to give you the maximum value at the minimum of cost.

It is folly to buy a car in this class without knowing what we give.

Value of Mastication.

A good way to form the habit of thorough mastication is to begin each meal with a small quantity of very dry food. In most cases mastication is a help to digestion. The only circumstances under which it is not advisable to prolong the mastication are where there is an excess of the digestive acids in the stomach or where there is pain after eating solid foods.

What My Neighbor Says

Is of Interest to East Jordan Folks.

When one has had the misfortune to suffer from backache, headache, dizziness, urinary disorders and other kidney ills—and has found relief from all this sickness and suffering, that person's advice is of untold value to friends and neighbors. The following case is only one of many thousands, but it is that of an East Jordan resident. Who could ask for a better example?

Albert Turk, East Jordan, says: "Morning my back felt lame and I found it hard to get up. My back got so weak and sore, I couldn't stoop over. I couldn't get seated and always felt tired and worn out. Dizzy spells came over me, too. My kidneys were irregular and I had to get up during the night. I used Doan's Pills and they cured me of the trouble."

The Evil Shepherd

By E. PHILLIPS OPPENHEIM

There is no false glamor about the people in an Oppenheim tale. Generally he presents the worst side of their character first. He shows how they drink and carry on [the scene is England not America] just as normal folks do in some countries; and then by slow degrees he begins to reveal their better sides. The final result is a pretty likable, clean lot of folks who are more devoted to outdoor sports and healthy living than they are to dissipation. And the author has the genius to fit these people into romantic, even heroic roles, without making them either peevish or immoral and without destroying their naturalness and reality. "The Evil Shepherd" is a lively, charming, thrilling tale.

TNT EXPLODES, KILLING MANY

NEW JERSEY VILLAGE WIPED OUT BY BLAST WHICH ROCKS LARGE AREA

CLOTHING BLOWN FROM BODIES

Buildings Levelled Within Radius of a Mile And A Half—Shook Feet 23 Miles Away

New Brunswick, N. J.—23 persons are dead and more than 100 injured as the result of an explosion last week in the TNT plant of the Nixon Nitration works, near here. Following the blast flames spread through 35 buildings of an adjoining celluloid factory, practically wiping out the Nixon industrial center.

The blast rocked the country for miles around and completely levelled buildings within a radius of a mile and a half.

It was distinctly felt as far away as City Hall, New York, a distance of 23 miles. It was first thought that an earthquake had occurred.

The cause of the explosion has not been determined. New Jersey state police are conducting a rigid investigation but the most tangible fact that they are able to establish is that the first explosion there were two coming in sharp succession—occurred in the plant of the Ammonia company, a short distance from the Nixon plant.

More than a million gallons of Ammonia nitrate in tanks, and 1,350,000 gallons of the same fluid in 15 tank railroad cars in a ramshackle warehouse blew up.

A strange looking procession stumbled from the burning buildings. The clothes of many of the employes had been blown from their bodies. Their faces were black and their eyes seemed to pop out of their heads. While some screamed and moaned others bore their part stoically.

Army surgeons from Camp Raritan took charge of the situation. They directed the caring of the wounded and the removal of the dead.

In the 35 smaller buildings in the immediate vicinity inflammable material such as celluloid, gun cotton and TNT, was being manufactured.

HIGHER POSTAL WAGE URGED

Temporary Increase Recommended by U. S. Chamber of Commerce

Washington—Measures to check the deterioration of the postal service in Detroit and other large cities, due to the inadequate pay of the postal employes, are proposed in the report, made public, submitted by the postal service committee to the board of directors of the Chamber of Commerce of the United States.

The committee finds that the policies of some of the past administrations, by emphasizing economy more than adequately and efficiency, have had a detrimental effect upon the postal service. Although the present administration has announced a definite policy, the committee holds that the effect of former policies remains in the form of inadequate facilities and uneconomic methods, causing delays and irregularities in all classes of mail.

To overcome the disparity between the salaries paid in the postal service and wages paid in private industry, the committee recommends that in those localities where the cost of living is exceptionally high, postal employes should be allowed a temporary salary supplement on a sliding scale, adjusted in accordance with the cost of living, until such time when a proper classification of postoffices and readjustment of wages can be effected to meet prevailing conditions.

DAUGHERTY PROBE IS VOTED

Senate Adopts Resolution Ordering Investigation by 66 to 1 Vote

Washington—The senate, by a vote of 66 to 1, has adopted the Wheeler resolution ordering a sweeping investigation into the official conduct of Attorney General Daugherty. The only vote against the resolution was cast by Senator Davis Elkins, West Virginia.

Even Senator Willis, Ohio, and his colleague, Senator Fess, the only two senators who defended the attorney general in the debate, cast their votes for the resolution after some of the strong language of the preamble condemning Daugherty had been eliminated.

The committee was named by vote of the senate as follows: Senator Brookhart, Iowa, chairman, Moses, New Hampshire; Jones, Washington; Ashurst, Montana, and Wheeler, Montana.

Asks Credit Banks To Help Farmers

Washington—Wider use of the immediate credit banks, backed by a special fund from the War Finance Corporation, as a means of relieving the agricultural and banking situation in the northwest, has been recommended by five senators from western agricultural states at a conference with President Coolidge, Managing Director Mayer, of the Finance Corporation, and Commissioner Lewis and Corey, of the farm loan board.

Alba high school, one of the flashiest teams of its class in northern Michigan, won its ninth straight victory Thursday night by easily defeating the Grayling five. The Alba boys toyed with their opponents and the substitute players soon were sent in for the fourth quarter. The final count was Alba 25, Grayling 12. At the end of the half the count was 12 to 4 and during the second and third periods Grayling was unable to get a point. Off the second string men Grayling rolled up 8 points. C. H. Lee, of Petoskey, was the referee.

Registration Notice

For All Elections, April 7, 1924

To the Qualified Electors of the Various Wards, of the City of East Jordan, State of Michigan.

Notice is hereby given that in conformity with Act 123, Public Acts of 1917, as amended, I, the undersigned City Clerk, will upon any day except Sunday and a legal holiday, or the day of any regular or special election, or official primary election, receive for registration the name of any legal voter in said City not already registered who may apply to me personally for such registration, or who may make application for registration by mail or messenger, as provided by Act 7, Public Acts of 1919, as amended, except that I can receive no names for registration during the time intervening between the Second Saturday before any general or special election or official primary election and the day of such election.

March 29, 1924—Last day for general registration by personal application.

March 12, 1924—Last day for registration by affidavit—see below.

Notice is further hereby given that I will be at my office under the Post-office on

March 15th and 22nd, 1924

from 8:00 o'clock a. m. until 8:00 o'clock p. m. on each said day for the purpose of reviewing the registration and registering such of the qualified electors in said City as shall properly apply therefor.

The name of no person but an Actual Resident of the precinct at the time of registration, and entitled under the constitution, if remaining such resident to vote at the next election shall be entered in the registration book.

REGISTRATION BY AFFIDAVIT—MAIL OR MESSENGER.

Under Act 7, Pub. Acts, 1919, as amended, the privilege of absent voters is extended to include registration. They can also register by Mail or Messenger whether absent or not but the affidavit must be received by the Clerk on or before the 10th Day preceding the Third Saturday before the election.

AFFIDAVIT FOR REGISTRATION STATE OF MICHIGAN, County of Charlevoix ss.

being duly sworn, depose and say that I am a citizen and a duly qualified elector of the Precinct of the City of East Jordan in said County of Charlevoix and State of Michigan; that my post-office address is _____ that I am not now registered as an elector therein and that I make this affidavit for the purpose of procuring my registration as an elector in accordance with the statute, and I solemnly swear or affirm to support the constitution of the United States of America and the Constitution of the State of Michigan, and to defend the same against all enemies foreign and domestic.

Taken, subscribed and sworn to before me this _____ day of _____ A. D. 1924 My Commission expires _____ 1924.

Signed _____ Notary Public in and for the County of Charlevoix, Michigan.

A blank form for Registering by Mail or Messenger can be obtained by addressing the City Clerk as given below:

REGISTRATION OF ABSENTEE BY OATH.

If any person whose name is not registered shall offer and claim the right to vote at any election, and shall, under Oath, state that he or she is a resident of such precinct and has resided in the Ward Twenty Days next preceding such election, designating particularly the place of his or her residence and that he or she possesses the other qualifications of an elector under the constitution; and that, owing to the sickness or bodily infirmity of himself or herself, or some member of his or her family or owing to his or her absence from the City on public business or his or her own business, and without intent to avoid or delay his or her registration, he or she was unable to make application for registration on the last day provided by law for the registering of electors preceding such election, then the name of such person shall be registered, and he or she shall then be permitted to vote at such election. If such applicant shall in said matter willfully make any false statement, or shall be deemed guilty of perjury, and upon conviction shall be subject to the pains and penalties thereof.

PROVISION IN CASE OF REMOVAL TO ANOTHER PRECINCT

Any registered and qualified voter who has removed from one Election Precinct of a City to another election precinct of the same City shall have the right, on any day previous to election day, on application to the City Clerk, to have his or her name transferred from the registration book of the precinct from which he or she has removed to the registration book of the precinct in which he or she then resides. Such elector shall have the right to have such transfer made on Election Day by obtaining from the Board of Inspectors of Election of the precinct from which he or she has removed a Certificate of Transfer and presenting the said certificate to the Board of Election Inspectors of the Precinct in which he or she then resides.

OTIS J. SMITH, City Clerk. Dated March 1st, 1924.

Battle of Thirty. The Battle of the Thirty was one in which 30 Britons and thirty Englishmen were pitted by Lord de Banmole and Pemborough. The fight is said to have taken place between the castles of Josselin and Ploermel in France, in 1351. The English were defeated.

CONGRESS VOTES AUTO TAX CUT

TWENTY-THREE MILLION REDUCTION ON SMALL TRUCKS AND WAGONS

WILL BE GREAT BOON TO FARMERS

Accessories, Tires and Parts Levy Reduced 50 Per Cent—No Record Vote.

Washington—The house of representatives have voted \$23,000,000 into the pockets of American motorists by abolishing the 3 per cent tax on small motor trucks and cutting by 50 per cent the present 5 per cent tax on automobile tires, repair parts and accessories.

There was no record vote, but it was virtually unanimous, as there were only a few scattered noes.

In particular the amendment to the tax bill reduces the 5 per cent excise tax on auto accessories, tires and parts to two and one-half per cent, and for exemption from all tax of auto trucks and automobile wagons, when the selling price of the chassis does not exceed \$1,000.

The tax bill, as it now stands, will exempt from federal taxation 90 per cent of the automobile trucks and automobile wagons used by the people.

The exemption of automobile trucks and cutting of tax on accessories, tires and parts, will be a boon to farmers and small merchants, and to the automobile users generally.

Trucks and wagons made by each one of these companies, the house was told, will be exempt from taxation because the selling price of the chassis used in their trucks and wagons sell for less than \$1,000.

The selling price of the chassis, regardless of how it may otherwise be equipped will determine the exemption.

A total of 370,000 auto trucks and auto wagons were manufactured in 1923. Of these, 262,500 used chassis selling for less than \$1,000.

The exemption of trucks in this class will mean a saving to motorist tax payers of nearly \$4,000,000 a year.

BROADER SCHOOL PLANS URGED

Educational Needs in U. S. Outlined At Session in Chicago.

Chicago—Declaring that "the destiny of the public schools is the destiny of the republic," the department of superintendence of the national education association adopted resolutions at the closing session of its convention calling for a broadened program of education to be offered the American boy and girl.

Increased educational costs must be expected by the American public if proper training is to be given the youth of the land, the resolutions state.

They outline at the same time the department's endorsement of American education week, its support for a plan to make the school system of Washington, D. C., a model for the nation, its backing of the Sterling Reed bill pending in congress, providing for a cabinet department of education, its support of plans to better rural education, to avoid war through education of youth, and to bring law observance through education.

"The nation of the future must pass through the school room, where the traditions of our free institutions are conserved and transmitted.

"What that future shall be rests with the American people," the resolutions say, in expressing the educators' position against any reduction in school costs that would hamper the training of American children.

TREATY BACKED BY STRESEMANN

German Chancellor Hopes Agreement With U. S. Will Be Ratified.

Berlin—Foreign Minister Stresemann has pointed to the commercial treaty with the United States as one of Germany's achievements when he spoke in defense of the government's policy during a debate in the reichstag on the special emergency ordinances which the Left parties have attacked.

He thought it likely the treaty soon would be ratified in Washington despite the opposition which centered on certain clauses which some Americans thought might hinder the development of their merchant marine.

As a whole, the treaty was satisfactory to Germany, he said, and had been welcomed as a hopeful sign that relations between the two countries would be resumed upon a sound and lasting basis.

He took it for granted the treaty would be ratified by the reichstag in proper time.

Radio Music Fund Planned.

New York—A more general appreciation of the best music, vocal and instrumental, will be attempted by radio, it has been announced by a committee named to raise a radio music fund to finance special programs. The committee, Felix M. Warburg, Clarence H. Mackay, Fred. A. Julliard and A. D. Witt, Jr., said the programs would be broadcast from station WEAJ. The fund is to be raised by popular subscription.

Adrian—The city commission has under consideration a plan to modernize Adrian's sewage disposal system and will submit to the voters at the presidential preference primary a bond issue of \$450,000. The plan calls for a disposal plant and an intercepting trunk line sewer along the Raisin river.

Lansing—The State Highway Department will make strenuous efforts this summer to control the dust clouds that follow traffic along the gravelled country roads, and will for that purpose, receive bids on 7,600 tons of calcium chloride, 150,000 gallons of light oil and 2,600,000 gallons of various surfacing materials.

Manistee—Nature's annual winter art exhibition has been opened along Lake Michigan at Manistee. One of the features is a Venetian bridge of snow and ice. An ice pillar, glazed and unyielding to the water, supports the bridge on one side while on the other it rests on the edge of the frozen slush cliff piled up by waves.

Detroit—Michigan's wealth increased 116.7 per cent in the 10-year period from Dec. 31, 1912, to Dec. 31, 1922, the Department of Commerce announced recently. In 1912, according to the announcement, Michigan's wealth was \$5,233,780,000, and in 1922 it had increased to \$11,340,150,000. The per capita wealth increased from \$1,806 in 1912 to \$2,883 in 1922, or 59.6 per cent.

Traverse City—No more sincere grief was felt in this city over the sudden death of Rev. Father MacDonald, of Traverse City, who died suddenly in Manistee recently, than that experienced by children of the parish. In recognition of this, Bishop Kelly, of Grand Rapids, ordered a funeral mass, exclusive for children, to be said two hours before the chief funeral sermon.

IF NOT, WHY?

HEALTH TALK NO. 7

What do you know about the Science of Chiropractic? Have you investigated it carefully? If not, why?

To be uninformed or to be misinformed is a sign of indifference. To be either is as dangerous as to have "a little knowledge." The people who "didn't know" are the people who fall all along Life's highway.

Don't be prejudiced; and if you know nothing about Chiropractic, don't say that you don't believe in it. Instead, let your common-sense and fair-mindedness bring you to INVESTIGATE it.

Investigation of Chiropractic will dispel the shadows of doubt, prejudice and ignorance, and the more you investigate, the more you will wonder why you put it off so long.

I shall be glad to give you a full and courteous explanation of Chiropractic and records showing proof of what is being accomplished all over the world by this Drugless Health Science. If you are sick of being sick and wish to get well and keep well, consult a competent chiropractor. Consultation and spinal analysis free.
