No. 28

County Tour Next Monday

Charlevoix Co. Cow-Testing Association To Visit Five Herds.

The members of the Charlevoix Cow-Testing Association will hold their annual tour of the County on Monday the 14th of July. It is hoped that every member will be on hand to visit and inspect the several herds where stops will be made. This tour is not only for the members but for all dairymen in the County who are interested in better and more profitable cows.

The Charlevoix Cow-Testing Association completes its year the first of August and will re-organize and continue the work another year. As a result of this work the members have been able to weed out their unprofitable cows, to feed more economically, and to secure larger returns from their herds.

The following is the program for the day:—

First stop at Arthur Shepard's at nine o'clock fast time; located four miles north of East Jordan on West side of lake. Mr. Shepard's Grade Holsteins will lead the Association this year.

Second stop at Breezy Point Farm at eleven o'clock, located at Ironton Ferry. This herd consists of Pure-bred Holsteins.

Third stop at Orchard Bay Farm at twelve o'clock located two miles north and east of Charlevoix on Boyne City road. A herd of thirty cows will be visited here. There will be a basket dinner, after which a practical judging demonstration will be put on.

Fourth stop at Wm. Withers at 2:45, located four miles South of Charlevoix. A feature of this visit will be the inspection of Mr. Withers' well-planned stables and sanitary methods of handling milk.

Fifth stop at George Meggison's at four o'clock, located six miles south of Charlevoix. Mr. Meggison's herd consists of Pure-bred and Grade Jerseys and includes several exceptional animals.

We are very fortunate to have with us for this tour Mr. J. G. Hayes, Dairy Extension Specialist of our College, who will discuss dairy problems at these several visits. Mr. Hayes is well qualified to talk along dairy lines as he has had worlds of experience from a practical standpoint.

Crank up your old Lizzie and meet us at Arthur Shepard's at nine o'clock fast time next Monday the 14th. Bring your family and friends as well as a well-filled dinner basket. Observe and learn. Your time will be well spent.

B. C. MELLENCAMP
County Agent

HON. J. M. HARRIS CANDIDATE FOR STATE REPRESENTATIVE

Elsewhere in this issue will be found an announcement of the candidacy of Atty J. M. Harris of Boyne City for the office of State Representative from Charlevoix County.

"Mac" Harris as his many friends in this county call him, is without question one of the ablest attorneys-at-law in Northern Michigan. His interests in Charlevoix County are "blood of his blood and bone of bone." He has been identified with Charlevoix County's interests for nearly half a century. Some forty-two years ago he taught school in what is known as the Chaddock district, north of East Jordan. By diligent study of law, he was admitted to the Charlevoix County Bar and has since served this county as Prosecuting Attorney and as Judge of Probate—way back in the days when the auto was unheard of, and when two days where necessary to make a trip between any of our county's three cities and transact business.

Atty Harris in those days proved himself of value to the County, and has since risen to the height of his profession.

Mac Harris has a mighty good number of friends up in the region of the South Arm, and this will be shown in the tally of votes cast for State Representative at the Republican Primary, Sept. 9th.

CITY TAX NOTICE

City Taxes for the City of East Jordan for the year 1924 are due and payable at my office during the month of July without penalty.

G. E. BOSWELL,
City Treasurer.

Band Concerts Bring Crowds

Wednesday Evening, July 16th Next Program Offered.

The East Jordan Concert Band's fortnightly concerts are becoming an institution and the Wednesday night's crowds become larger with each number. A collapsible band stand has been placed in East Jordan's G. A. R. Park—opposite the City Library—and this was used for the first time at the last concert.

For the next concert—Wednesday evening, July 16th—a fine program has been arranged by Director Ter Wee, and a musical treat is offered those attending.

THE PROGRAM

1. March, F. O. B.
2. Serenade, Sweet Dreams.
3. Overture, The Gem.
4. Fox Trot, Linger A While.
5. A Day in the Cotton Field.
6. Characteristic, A Darkies Hop.
7. Sacred Melodies.
8. March, Student Spirit.
9. Wals Song, Land of my Dreams.
10. Fox Trot, It ain't a gonna rain no more.

Final:—Home Sweet Home, Star Spangle Banner.

WIFE OF A. I. CO.

EX-EMPLOYEE GETS \$1,000 INSURANCE

(Mancelona Herald, June 26)

Mrs. Ed. Touchstone formerly of this place and who is now living on a small farm near East Jordan, received a check of \$1,000 from the Antrim Iron Company, Friday.

It is a rule of that Company to insure all of their employees who have been in their service over one year. This is for the purpose of encouraging continuous service. When an employee leaves and works for another company his insurance is cancelled and it would be necessary for him to work for the Company another full year, the same as a new man, in order to be reinstated.

Mr. Touchstone left the Company's service over four years ago and moved on the farm near East Jordan and soon after died. The Company not being informed of the condition of affairs and supposing him to be employed elsewhere cancelled the insurance. Recently from outside sources they learned of Mr. Touchstone's illness and death, and, as a result, the policy was renewed and the check for \$1,000 issued.

F. L. Knapp took the check over to Mrs. Touchstone, Friday. It was a complete surprise to her and a very agreeable one too, as she had found it very hard to make a living for herself and three small children. This check will enable Mrs. Touchstone to pay off the indebtedness on her home and also to lay aside a goodly sum for her future needs.

Political Announcement

I hereby announce my candidacy for the Republican nomination for the office of County Clerk at the September primary. Your consideration will be appreciated.

East Jordan 17 Boyne City 2

East Jordan defeated Boyne City July 4th at Boyne City, score 17 to 2. DeLoof pitched the first seven innings and held Boyne City to six hits. He had the game safely in hand at all times and made the feature fielding play of the game in the sixth when he made a great stop of Saffron's grounder, diving towards first base and spearing the ball with one hand. He also started two fast double plays.

Tolles pitched the last two innings and while Boyne City had a runner on first each inning neither one could reach second. Tolles shows considerable promise as a pitcher and will pitch some games later in the season.

Every player on the East Jordan team made one or more hits. Sam Kamradt made 4 singles, Covey a triple (with the bases full), a double and a single, DeLoof a double and two singles, Gunderson a double and a single, Rigley a double and a single, Morgan and Deitrick 2 singles, H. Kamradt a double and a single, Ward a double, LaLonde a single.

Boyne City scored the first run of the game in the first inning. Cody singled to right and took second on a passed ball. Coblenz flied to LaLonde. Melencamp singled scoring Cody, Manglos hit into a double play DeLoof to Deitrick to Gunderson.

East Jordan took the lead in the second. Sam Kamradt singled and went to third on Gunderson's single. Gunderson stole second, DeLoof waited out a base on balls filling the bases, Covey tripled to center scoring all three, Rigley struck out but LaLonde put Covey across the plate with a single.

A base on balls to Sam Kamradt, Gunderson's sacrifice, DeLoof's single and stolen base and Covey's single scored two runs in the third.

In the fourth singles by Deitrick and Sam Kamradt, and Hank Kamradt's double added two more scores. Doubles by Covey and Ward and a single by Rigley scored two in the fifth.

Sam Kamradt's single, a base on balls to Gunderson, DeLoof's double and Morgan's single was responsible for two in the sixth.

In the seventh East Jordan scored four runs on singles by H. Kamradt, S. Kamradt and DeLoof and doubles by Gunderson and Rigley.

Coblenz dropped Sam Kamradt's fly to start the ninth. Sam stole second, took third on DeLoof's fly and scored on Morgan's single.

Boyne City scored their second run in the third. Krueger was hit by a pitched ball and was advanced to third, and scored on Cody's slow grounder. With Bradley running on first in the sixth DeLoof made a great stop of Saffron's grounder and threw him out at first.

Tolles went to the box at the start of the eighth inning. Deitrick made a nice running catch of Melencamp's fly. Manglos struck out, Bradley singled; Saffron flied to Ward. In the ninth McDonald hit a single. Krueger hit into a double play, DeLoof to Ward to Gunderson. McNally was out on a liner to DeLoof.

Bases on balls off DeLoof 1, off Saffron 3, off Coblenz 1. Hit by pitcher by DeLoof 1, by Coblenz 1. Hits off DeLoof 6 in 7 innings, off Tolles 2 in 2 innings, off Saffron 12 in 4-3 innings, off Coblenz 10 in 4-1-3 innings. Sacrifice hits Gunderson, Ward. Sacrifice fly DeLoof. Double play DeLoof to Deitrick to Gunderson, DeLoof to Ward to Gunderson, McDonald unassisted. Left on bases East Jordan 8, Boyne City 7. Winning pitcher DeLoof, losing pitcher Saffron. Umpires Green and Gothro.

Political Announcement

To the Electors of Charlevoix County: I am a candidate for nomination at the September primary for the office of County Treasurer and as such will fully appreciate the support of the Republican electors of the county.

My place of residence for nearly thirty years has been in Eveline township, following an occupation of an agriculturist. During my residence I have held the office of Township Clerk, and have such knowledge of business affairs and what is due to the public as an official as warrants my seeking your support in my candidacy.

JOSEPH WM. FLANDERS

28 t.f.

Political Announcement

I am a candidate for the Republican nomination for member of the House of Representatives for Charlevoix County at the coming Primary election to be held on September 9th 1924.

I have had for many years more than usual interest in State Legislation and if nominated and elected will give the State and this District diligent effort and attention.

I will appreciate the support of the electors for the nomination.

Dated Boyne City, July 9th 1924.

J. M. HARRIS

Political Announcement

I respectfully submit to the Republican Electors of Charlevoix County that I am a Candidate for nomination at the September Primary for the office of Register of Deeds.

25 t.f. DARWIN F. MEECH.

Nobody so dearly loves the common people as one who makes his living by it. The man who says he is not susceptible to flattery is waiting for you to flatter him by saying he isn't.

East Jordan Still Holds First Place

Defeats Charlevoix, Sunday Last By Score of 4 to 1

East Jordan retained first place in the Northern Michigan Resort League by defeating Charlevoix 4 to 1 last Sunday at Charlevoix.

Gunderson pitched great ball keeping Charlevoix's nine hits well scattered and would have had a shutout if Rigley had held Sam Kamradt's throw to the plate in the ninth, Charlevoix had two men on bases in the first and had the bases full in the seventh but each time Gunderson kept them from scoring. Jack also drove in enough runs to win his own game when he hit a home run in the eighth scoring Sam Kamradt (who had tripled) ahead of him.

DeLoof again made a great fielding play when he made a diving catch of Davidson's fly.

In the eighth inning after two men were out a double by Hank Kamradt, a triple by Sam Kamradt and Gunderson's home run gave East Jordan three runs.

Deitrick waited out a base on balls in the first inning but was thrown out trying to steal second as Ward struck out. With two out in the second DeLoof was passed and stole second but was left there when Covey flied to Christy. Rigley opened the third with a single, went to second on a passed ball and scored on Deitrick's single. In the fifth Sam Kamradt doubled and took third on a passed ball but none of the next three batters could score him.

East Jordan cinched the game in the eighth after two were out Hank Kamradt doubled to left and scored on Sam Kamradt's triple to left center. Gunderson drove the ball over the right field fence for a home run scoring Sam Kamradt ahead of him. DeLoof singled and stole second. Covey flied to Shields ending the inning.

Charlevoix had two men on bases in the first inning but Gunderson fanned Valley for the third out. In the second DeLoof made the greatest fielding play of the game when he made a wonderful diving catch of Davidson's short fly.

Plank opened the seventh with a single and was sacrificed to second by Davidson. Deitrick threw out Shields, Plank going to third. Eber was passed Lennox was hit by a pitched ball filling the bases. Christy flied to Ward for the third out.

With two out in the ninth Eber doubled, Lennox singled to left and Eber scored when Rigley dropped Saff Kamradt's throw to the plate. Deitrick threw out Christy for the third out.

Not So Good.

East Jordan was defeated at Cheboygan, Tuesday 7 to 2. Cheboygan made nine hits to East Jordan's six. Ed. LaLonde featured in the field with a great catch of Burnett's fly in the sixth. Cheboygan scored two runs in the

first inning on a base on balls to Wagner, Mack's sacrifice, Lane's double and an error by Rigley.

East Jordan tied the score in the second on Gunderson's single, DeLoof's double and singles by Covey and Rigley.

Covey singled in the fifth and was sacrificed to, second by LaLonde. Deitrick was out on a grounder to Goada ending the inning.

Cheboygan made two runs in the sixth. Lane singled and Zobel hit a home run. Four hits and an error scored three runs for Cheboygan in the eighth.

Notice to Water Users.

Sprinkling hours are fixed by ordinance from 6:00 to 8:00 o'clock a. m., and from 6:00 to 8:00 o'clock p. m. Those violating this rule are subject to having city water shut off from their premises.

LAFOLLETTE THIRD PARTY CONVENES

PROGRESSIVE POLITICAL ACTION IS GUIDING AIM OF CONVENTION.

TRY TO MAINTAIN "BLOC" SYSTEM

One of Leading Planks Would Nullify Power of Supreme Court Over Acts of Congress.

Cleveland—The national conference of La Follette's third party, convened here on July fourth for "progressive" political action, and definitely injected the party into the approaching presidential campaign.

In the same public auditorium where Henry Allen Cooper, spokesman for La Follette and his platform, was hissed and booed in the Republican national convention three weeks ago, the political left wing of the nation, as strange a medley as ever assembled under one roof, received the La Follette statement that he would enlist with them, with much demonstration.

La Follette made it plain he does not want his candidacy to interfere in the slightest degree with the "bloc" system which has made him an effective force in congress and therefore is opposed to a complete "third party." His position was the one point of antagonism in the convention.

Socialist and farmer-labor representatives demanded that the political identities they would be called upon to surrender in merging their forces into the La Follette campaign be not jeopardized in case he is defeated.

Outstanding platform planks will declare nullifying the power of the United States supreme court to void acts of congress and to restrain the injunction granting power of the courts. Repeal of the Esch-Cummins act will be urged, the right of labor and farm interests to organize will be affirmed and a child labor law will be demanded; co-operative farm markets backed up by the government, retention of surtaxes on large incomes, restoration of the excess profits tax, and the repeal of tariff and nuisance taxes also will be insisted upon.

Drastic curtailment of outlays for military and naval preparedness will be urged, federal control and conservation of water power and reconstruction of the federal reserve to permit co-operative banking will be called for.

PACKERS MUST PRODUCE BOOKS

United States Judge in Chicago Issues Mandamus Order.

Chicago—The Big Five packers lost a bitter legal battle here recently when United States District Judge Adam C. Cliffe issued a writ of mandamus, ordering them to produce their books and records for examination by the United States department of agriculture. The packers had contended that the examination would reveal trade secrets.

An injunction was procured last November by the packers, but this was nullified by the recent order. Judge Cliffe, in issuing the order, upheld the contention of Assistant District Attorney C. L. Swanson that the Federal Packers and Traders Act of 1919 and the Packers and Stock Yards Act of 1922 gave the department authority to require packers to submit their books for examination at any time.

Attorneys for the packers filed notice of an appeal.

JAP STATESMAN TAKEN BY DEATH

Twice Reported Dead Previously Prince Matsukata Has Relapse.

Tokio—Prince Masayoshi Matsukata, one of the two genro or elder statesmen of the Japanese empire, died recently. He was 89 years old. Matsukata returned to Tokio about two months ago, much recovered from the serious illness which caused his death to be reported last March. At that time, after the physicians had pronounced him dead, and the nation had gone into mourning, the former premier slowly revived. He previously had been reported dead in the earthquake of last September.

Though greatly weakened, the elder statesman hung on to life grimly, and once more approached normal health. The steady impairment of his faculties, due to his advanced age, increased, however, preventing him from taking an active part in the change in cabinets early in June. His death came as the result of a relapse from his former illness.

New Immigrants as New Quota Starts

New York—The start of the new immigration quota allotment for 1924-1925 witnessed no such rush of immigrants as there was last year, when 14 passenger lines raced into port. Twelve big liners came in, but the number of immigrants was small because American consuls abroad had not been equipped with the certificates necessary for immigrants' transportation. No considerable influx of aliens is expected until the latter part of July.

GEORGE E. MARTIN

Justice George E. Martin of the Court of Customs Appeals who was appointed by President Coolidge to be chief justice of the United States Court of Appeals for the District of Columbia, succeeding the late Justice Constantine J. Smyth.

DRY LAW SURE TO BE ON BALLOT

Wets File Petitions Bearing 50,000 More Names.

Lansing—Filing of 50,000 additional signatures with the secretary of state here recently makes it certain that Michigan voters will ballot on an amendment to the state constitution which would modify state prohibition laws in conformity with the Volstead act.

The petitions were filed by Robert D. Wardell, state representative from Detroit. Petitions containing a total of 70,000 signatures have been filed here.

Wolverine dry laws are now the strictest in the union. The petitions were circulated by the Association Against the Prohibition Amendment.

This amendment will be one of several upon which voters will pass at the November election, including one which would abolish all parochial and private schools.

SIX KILLED IN TRAIN WRECK

Michigan College Head Among Those Who Lost Their Life.

Chicago—Six persons, including Dr. Fred W. McNair, president of the Michigan College of Mines, lost their lives and sixteen others were injured when a fast mail train of the Chicago, Burlington & Quincy railroad crashed into the rear of the Burlington's Denver to Chicago passenger train No. 2, near Buda, Ill.

Train No. 2, a through passenger, run from Denver to Chicago, was running 40 minutes late, followed by the sold mail train, No. 8, which was eight minutes behind its schedule. The passenger had stopped at the coal chutes at Buda.

The block signal system is used and apparently the engineer of the main train failed to observe the signal against him, according to a statement issued from the railroad office.

ARMY WORMS CUT ILLINOIS CORN

Farmers Battle Frantically as One-fourth of State Is Involved.

Chicago—More than one-fourth of the counties in Illinois have been invaded by the army worm. A big percentage of the young corn has been cut down level with the ground in many parts of the state.

The worms feed on the young corn, practically consuming all of the leaves, leaving nothing but the central rib. They are moving in great armies, as they did 10 years ago.

Farmers have been working day and night to control the pest. Trenches have been dug ahead of the advancing masses, trapping the worms, which are saturated with kerosene and burned.

AMERICAN SLAIN BY CHINESE

U. S. Consul Goes from Hong Kong To Probe Missionary's Death.

Pekin, China—Chinese outlaws murdered George Douglas Byers, an American missionary stationed at Kacheh on the Island of Hainan, in the China sea, southwest of Hong Kong, according to advices here.

American Consul Chamberlain has proceeded aboard the U. S. S. Sacramento from Hong Kong to Hainan Island to investigate the killing which took place June 24.

Byers was a member of the Presbyterian mission, North, with headquarters on Fifth avenue, New York.

Singer Forgets Day He Was To Go

Paris—Because of the forgetfulness of Feodor Chalapin, the Russian singer, the Paris-Boulogne express had to stop on its way the other day. Thinking it was his day to leave Paris for his concert in London, the singer packed and hurried to the station. When 45 minutes out of Paris, he looked at his appointment book and discovered he had left a day too soon. The conductor stopped the train to permit the singer to get the next train back.

MARKET REPORT

PUBLISHED BY U. S. BUREAU OF MARKETS, WASHINGTON, D. C.

Live Stock and Meats
Chicago—Live stock prices ranged from 5 to 150 higher than a week ago, closing at \$7.30 for the top and \$6.00 for the bulk. Medium and good beef steers 35c to 50c higher, at \$7.75@10.75; butcher cows and heifers 35c to 50c up at \$5.50@9.50; feeder steers 35c lower at \$5.00; veal calves \$1 to \$1.25 higher at \$1.75@2.75; fat lambs \$1.25 to \$1.75@1.75; yearling lambs steady at \$10.50@11; yearlings \$1 higher at \$9.75@11.75 and ewes 35c higher at \$8.75@10.25.

Fruits and Vegetables
North Carolina Irish cobbler potatoes declined in most markets, closed at \$3 to \$4 per bbl. East Shore Va. stock 25c to 30c higher at \$1.50@1.75; leading cities, 85c to 90c lower at shipping points at \$3 to \$3.15. Miss. tomatoes continue firm to stronger at \$1.15@1.75 per 4-basket carrier in a few markets, best \$1.50; Florida, \$1.25 to \$1.50; New York and Philadelphia, North Carolina Green-borers \$3.25@4.45. Florida and Georgia Tom Watson watermelons, 40c to 45c; generally better at \$3.10@3.25 bulk per car in leading markets, \$8@200 f. o. b. Valdestock. California cantaloupes, salmon, similar standard \$1.50@1.75; New York at \$1.50@1.75, weaker at \$1.25@2.50 in midwestern markets \$1.15@1.50 f. o. b.

Hay
Hay market continues seasonal dullness. Good and best quality hay account light receipts of these grades. Lower grade weak and drabby. Lower grades driving better cotton. Quoted: No. 1 timothy, Hoston \$32; New York \$30; Pittsburgh \$25.50; Cincinnati \$23; St. Louis \$22.50; Memphis \$22; Chicago \$22.50; Atlanta \$22. No. 2 timothy, Kansas City \$18.50; Memphis \$25; Omaha \$18.50. No. 1 Prairie, Kansas City \$12; Omaha \$13.50; St. Louis \$17; Chicago \$17.

Feed
Somewhat easier tendency in millfeed market. Flour mills operating actively causing some pressure. Spot offerings both in southwestern and northwestern markets more liberal. Corn, oats and prices unchanged to slightly lower. Cotton crop report tended to free offerings of cottonseed meal and cake. Mill corn trade in fairly good demand. Prices firm in sympathy with corn.

Dairy
Butter markets featured by quiet trading and a heavy demand. Prices held throughout the week, although the tone at the close was firm. Production very heavy and an active into-storage movement continued.

Closing wholesale prices on 92 score butter: New York 41-1-2c; Philadelphia 42c; Chicago 35c; Boston 41-1-2c. Cheese markets firm under fairly active trading. Storage situation holds center of attention. Production running heavy and bid fair to exceed previous records. Wholesale prices in primary markets: Flats 18-3-4c; single daisies 15c; twins 18-1-2c; double daisies 18-3-4c; longhorns 18-3-4c; square prints 19c.

Grain
Grain market rose at end of week. Wheat and corn futures lose large part of week's gains. Wheat finished fractionally higher than last week's close. Corn and oats higher. Prices generally sharp decline, closing 2-3-4c below last week. Cash grain market less active. Quoted: No. 1 dark northern spring wheat \$1.17-1/2@1.18; No. 2 dark northern spring wheat \$1.16-1/2@1.17; No. 3 dark northern spring wheat \$1.15-1/2@1.16; No. 1 yellow corn, Chicago 90c@91c; Minneapolis 91-1-2c. Looking Through the Fence

By THOMAS ARKLE CLARK, Dean of Men, University of Illinois.

IT WAS an interesting crowd at the game, but those who fitted the bleachers to the topmost row and followed the cheer leader in wild shouts were not more interesting than were those outside the field trying to see the game without paying the customary tribute to the gatekeeper.

There were delivery boys perched on top of their wagons, middle-aged men on stepladders, out-of-town sight-seers standing on their cars, and scores of the local riffraff swarming in the trees or looking through the fence in an endeavor to see the game without paying for it. Occasionally, more's the pity, one could detect a stray student, impecunious, or frugal, or imprudent, whose face lighted up as Jack caught a difficult foul, and once I caught sight of a high-browed instructor, stoop-shouldered from the heavy books he was carrying, crane his neck as he paused to satisfy his curiosity as to why Phil Armour was jumping into the air and waving his arms so frantically.

It was a popular sport, this trying to get something for nothing, but it has its dangers. A young chap who was balancing himself on the top of a motorcycle, unable to restrain his enthusiasm when the "ump" pronounced "Slip" safe on second, lost his equilibrium and in falling pulled the stepladder from under one of the middle-aged gentlemen—and they both fell in the dirt.

It has its dangers, I say, it does not always win one respect, whether it be the man looking through the fence at a ball game or the student getting a passing grade by copying from the neighbor's paper.

There are various ways of looking through the fence. The man who is always broke when it is his turn to pay, the fellow who borrows and forgets to return the amount, the man who accepts an office or an honor without assuming the accompanying responsibilities, the employee who loafs on his job, are all watching the game through the fence.

"It is easy for the man to talk," you say, "who has the money to get into the game; but how about the fellow who is broke?" An old neighbor of mine never saw a baseball game nor held office, yet he lived an honorable happy life and died respected. One can walk to Savoy or stay at home and read O. Henry or work in the garden. It is more honorable not to see any of these games of life at all than to see them through the fence.

A GIFT FOR EACH BOY AND GIRL

"Little Lady" Harmonica, Perfect Musical Instrument to be Given to Junior Chautauquans

The smallest perfect musical instrument in the world, the "Little Lady" harmonica, made by the famous M. Hohner Co., will be given to each boy and girl between the ages of 8 and 14 who attends the afternoon session on the second day. On this little instrument tunes such as "Home, Sweet Home," "Old Black Joe," "Suwanee River" and other familiar airs can be played perfectly. These instruments can be bought at the stores but they cost as much or more than the single admission to this program. Every boy and girl can learn to play one of these in just a little while. The Junior Playday and the Chautauqua Tent Man will show you how to play this wonderful little instrument.

Tell all your friends about this and let's have the tent filled with boys and girls on the second afternoon.

Cat Knocks on Door
An English artist owns a cat which will not enter the house by the back door. It always walks up to the front door, which has a knocker at a convenient height, gives one or two knocks and then waits for the door to be opened. If there is not an immediate answer it knocks again until it gains admittance.

WE SOMEHOW KNOW

By DOUGLAS MALLOCH

SO MANY times, so many nights, When locked the door, and out the lights,

My mother comes and looks at me While I am sleeping, just to see If I'm tucked in, and haven't thrown The covers off, as I am known: To do sometimes; if I am warm, And safe from harm and fright and storm.

I'm sound asleep, of course, and so I cannot see, and yet I know.

So many times my mother stands And smooths the pillows with her hands

And sees the quilt is folded right. Yes, in the middle of the night She comes and stands beside my bed And holds her light above my head To see if everything is well. Perhaps you wonder how I tell? She steps so gently, walks so slow, I cannot hear, and yet I know.

So many times our mothers creep To where the little children sleep And watch our breathing. Many a time

We know the stairs our mothers climb, For so our mothers keep on guard All day and all night afterward.

Of course we cannot hear nor see; We're sound asleep as we can be; They gently come, and softly go; And yet, some way, we somehow know. (© by McClure Newspaper Syndicate.)

Hobart Bosworth

Hobart Van Zandt Bosworth, popular in the "movies," was born in Marietta, Ohio, in 1867. As a boy he was of the Huck Finn type. Bosworth served in the navy, having graduated from Annapolis. He makes his home in Los Angeles. He was long on the stage before entering motion pictures. He is six feet, one inch tall, weighs 200 pounds, has blue eyes, white hair and fair complexion.

Hogs Profitable on Dairy Farms

No Matter What Type of Farming Is Followed Pork Production Is Requisite.

Dairy farming may be of two types; the intensive type where dairying is the major project on the farm, or the diversified type where dairying is of equal importance along with several other projects. No matter which type of farming is followed pork production is an essential part of either.

Porkers Are Essential.

On many dairy farms the amount of land is limited. Of all meat producing animals the hog is best adapted to diversified and intensified farming where a large income is desired from a small acreage. Dairy farming cannot be conducted along the most efficient and profitable lines without a sufficient number of hogs to utilize the skim milk and buttermilk or whey which may be available for feeding and the undigested grain in the droppings of the cows. It is rather doubtful whether any system of farming can satisfy all the principles of good farm management as does a properly conducted dairy business, which depends on the output of cream or butter and pork for its principal revenue.

Simple Equipment.

For raising hogs, equipment need not be extensive or expensive. Hogs can be handled with less equipment than any other class of farm animals. Shelter suitable for early farrowing should be provided, but it need not be elaborate or of a kind which would in any way mean a burdensome overhead expense. Hogs are affected by extreme heat more than any of the other farm animals, but suitable shade costs little more than than the time spent in providing it.

Hogs fit in well with the labor plan of the dairy farm. Since the bulk of the work with cows comes at milking time there is, as a rule, slack time throughout the day which could be profitably spent in feeding and caring for the hogs.—H. H. Smith, Colorado Agricultural College.

Longevity Recipe

The Cardinal de Solis, archbishop of Seville, in Spain, was one hundred ten years old when he died. He used to tell his friends, when asked what regimen he observed to enable him to live to such a great age, "By being old when I was young, I am able to be young when I am old. I led a sober, studious, contemplative, but not lazy or sedentary life."

USE SULPHUR TO HEAL YOUR SKIN

Broken Out Skin and Itching Eczema Helped Over Night

For unsightly skin eruptions, rash or blotches on face, neck, arms or body, you do not have to wait for relief from torture or embarrassment, declares a noted skin specialist. Apply a little Mentho-Sulphur and improvement shows next day.

Because of its germ destroying properties, nothing has ever been found to take the place of this sulphur preparation. The moment you apply it healing begins. Only those who have had unsightly skin troubles can know the delight this Mentho-Sulphur brings. Even fiery, itching eczema is dried right up.

Get a small jar of Rowley Mentho-Sulphur from any good druggist and use it like cold cream.

RESULTS THAT LAST!

Proven by East Jordan People.

Thousands of kidney sufferers have tried remedy after remedy with only temporary benefit. That's mighty discouraging! But one kidney remedy has earned a reputation for lasting results and there's plenty of proof right here in East Jordan.

Read the experience of one who used Doan's Pills years ago and now makes his endorsement even stronger: H. H. Cummings, prop. feed and grain business, Main St., East Jordan, says: "My kidneys were not acting right and I had a dull ache in the small of my back just over my kidneys. Doan's Pills corrected my kidneys and rid me of the backache and pains."

ABOUT TEN YEARS LATER, Mr. Cummings added: "I haven't needed a kidney medicine since Doan's rid me of the trouble."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Pills—the same that Mr. Cummings had. Foster-McLburn Co., Mfrs., Buffalo, N. Y.

Reflections of a Bachelor Girl

By HELEN ROWLAND

NOBODY is quite so blasé and sophisticated as a flapper, who is just recovering from a baby-grande passion.

If a man is looking for an innocent, simple, unsophisticated wife, with a sweet childlike faith in men, he should pick out a widow of over thirty-five, in these days.

When a brave, beautiful young girl goes into the world prepared to resist its temptations, it is an awful disappointment to her, to discover that a "temptation" is as hard to find in the average business office as a pet fly in a candy shop.

Oh, yes, every woman needs a husband, if only as an instrument of self-discipline to keep her from EVER growing vain and self-satisfied.

The only perfect husbands are widows' husbands. To recall tenderly "a voice that is stilled" is no feat, beside listening patiently to a voice that is continually wondering why dinner isn't ready, where you keep the matches, and what you paid for those "fool shoes."

Heaven deliver us from the man with a new motor-horn, the woman with a new phonograph, the boy with a new whistle, and the neurotic with a new complex!

The foolish woman says "yes," and robs love of its uncertainty; the tactless woman says "no," and robs it of hope; but the wise woman says nothing—and keeps it simmering at just the right temperature.

The task of a modern girl's life is to keep her mother away from the sort of movies that no woman over thirty should see.

Why will a man worry more intensely over throwing away an old tomato can that "might have been used for bait," than over losing his watch, burning holes in the real lace curtains, or spilling the glue on the Persian rugs? (© by Helen Rowland.)

Have You This Habit?

By Margaret Morison

ROBERTA HOOD

ROBERTA HOOD had lived all her life up to eighteen on her father's old farm at Pleasant Valley. So when it came time for her to begin to think of her own financial future, she naturally turned to the city. And in two months she was one of five girls working in the pressing room of the big garment factory that supplied up-town shops with children's fine dresses. From eight to five she ironed dainty ruffles and tucks and plaits. The other workers rarely spoke to her; all went about their business in a dull, determined way; at intervals the manager looked in; and once in two weeks she drew her pay envelope. She became so used to the four mustard-colored walls that she was no longer conscious of anything beyond her ironing board and the shelf above.

Then one week she went home for Sunday. It was April and the woods were full of violets. Roberta Hood picked a big box of violets and moss to take to the city with her. When she left for her work on Monday morning the blossoms were so fragrant that she took a few with her in a glass and put them on the shelf above her ironing board. All that day as she looked up at intervals they seemed something living amid the mechanical routine of her motions. The head of the room came over to take a sniff and said that he came from the country, too. On her next visit home Roberta brought back some ivy, and the five workers took turns watering it and washing down the glossy leaves. Through this common interest they began to eat lunch together. Then they started a window box, and finally they achieved curtains, and a table where they spread their sandwiches and bottles of milk.

The pressing room had become a matter of interest in the factory. Finally, one day, the president of the company strolled in. He was a progressive man and he appreciated the business value of the esprit de corps of this little group. The upshot was a clubroom for the workers of the factory—a room of their own—freshly painted, with geraniums, and a disreputable yellow cat that they had adopted as their mascot.

To open the new club they had a party. The head man in Roberta's room sat next to her.

"This is your doings!" said he.

"Aw, go on!" laughed Roberta. But the next spring, when they were married, Roberta put extra effort into "fixing up" their rooms. She had learned the value of the habit of bringing beauty into everyday life.

A LINE O' CHEER

By John Kendrick Bangs.

JULY FOURTH

UPON this day was I made free From every tinsel'd sovereignty, And made a ruling monarch of A vast domain of human love— A king whose privilege it is To serve mankind's necessities; And in his quest for mortal pelt To be forgetful of himself; And on his brow with pride to bear The crown of service true kings wear. (© by McClure Newspaper Syndicate.)

Various Cover Crops in Orchard Are Beneficial

Some of our readers talk about a cover crop for the orchard, but they seem to have the wrong idea of just what this means. The real cover crop means both cultivation and cropping, says the Rural New Yorker. For instance, the ground is plowed early in the spring and kept well stirred up through the summer with some kind of cultivator. Then, about the middle of June or a little later a crop is seeded to hold the ground during the rest of the summer and the fall. All sorts of crops are suggested for this purpose. Some growers use a combination rye and clover. Others find buckwheat and clover very satisfactory. The object is to have some crop growing through the late summer and fall, so as to give organic matter which may be plowed into the soil the following year. A cover crop holds the ground and prevents washing in case of late rains. It also causes the trees to ripen their wood earlier, and usually gives a little better color and quicker ripening to the fruit. Another advantage is, with such a crop growing in late summer. It prevents the loss of nitrates from the soil. The use of early oats, barley or clover seed in the early spring would not be as satisfactory, as it would not be possible with such a crop to give the early culture which most of our orchards require. Early plowing and cultivation up to the middle of June, and then the cover crop, is a standard plan for handling an orchard.

Dipping Cows Does Not Decrease Flow of Milk

"Dipping cows for the eradication of cattle fever ticks when properly done does not interfere with the milk flow," asserts Dr. J. G. Du Puis, president of the Dutch Belted Cattle Association of America.

Doctor Du Puis, who operates a high-class farm near Miami, Fla., bases his conclusion on experience of the most convincing nature. In his statement to the United States Department of Agriculture he says his farm became infested with ticks in 1920 and 1921 through the carelessness of railroad employees. He adopted the practice of dipping his cattle every 14 days.

Production records kept on the herd during the dipping treatment made a satisfying revelation. One of the cows, "Ferdell" No. 1961, had produced 13,477.9 pounds of milk and 584.614 pounds of butter, two milkings daily. This record won the state championship for all breeds in Florida and the world's championship for the Dutch Belted breed.

Better Sires Campaign

"Better sires and better feeding" is one of the things that we will make progress on in Kentucky this year." This statement in a letter from Wayland Rhoads, field agent in animal husbandry of the University of Kentucky, to the United States Department of Agriculture, was accompanied, with 270 applications for membership in the "Better Sires—Better Stock" campaign. Each of the 270 persons had signed a pledge that the would use pure bred sires exclusively for all kinds of live stock raised. Eighteen counties were represented.

HAS HAD PART IN MORE THAN 1,100 CONCERTS

WALDEMAR GELTCH

WITH a record of having played more than 1,100 concerts, Waldemar Geltch, violinist, is one of the foremost of present day violinists.

He is on the program on the fourth day of the Chautauqua in an artists' recital with Alexius Baas, eminent baritone.

Mr. Geltch has frequently been referred to as "the violinist with a message," and he has made appearances in all but three states of the Union. His playing is convincing, distinctive and attractive. He creates atmosphere and moods and has a personality that is magnetic.

Persistent effort has placed him in the front rank of the country's violinists.

His is the sort that all persons who love music will understand. He does not attempt to surround himself with an air of mystery or diffidence. He is a musician because he loves his art. It is through such artists as Geltch that the best in music is being preserved.

The fourth day has been selected as one on which the best in music will be given. There are very few persons who do not appreciate the classics. Especially is this true when they are rendered by such artists as Mr. Geltch and Mr. Baas. They will delight all who hear them.

Miss Catherine Moore, an accomplished pianist, is the accompanist.

At East Jordan, July 20th-24th, inclusive.

If Kidneys Act Bad Take Salts
Says Backache Often Means You Have Not Been Drinking Enough Water

When you wake up with backache and dull misery in the kidney region it may mean you have been eating foods which create acids, says a well-known authority. An excess of such acids overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and loggy. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels, removing all the body's urinous waste, else you have backache, sick headache, dizzy spells, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys, also to neutralize acids in the system, so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink. Drink lots of soft water. By all means have your physician examine your kidneys at least twice a year.

The Young Lady Across the Way

The young lady across the way says she'd never feel she was married unless she had a church wedding, but she supposes it would be just as legal to go to a justice of the peace and have a common law marriage.

A L B A

(Edited by Mrs. A. I. Ashbaugh)

C. E. Osterow and son Chas. were at Walloon Lake Wednesday, where two boys had purchased a motor launch which they had taken to Idlewild where they are spending the summer.

Miss Mary Stevens visited her sister, Mrs. J. D. Ashbaugh, several days last week.

Mrs. Clyde Baldwin and daughter, Viola returned from Sarnia, Canada, Wednesday last.

Frank Kidder and sister, Mrs. Clarence Shoup and family spent the fourth at Muskegon with Ase Kidder and family.

Claude Hyslop and family spent the fourth at Thompsonville.

Mrs. A. V. Lamb, L. E. Barner and wife and Miss Gladys Norton spent several days last week with A. Ashbaugh and family, returning home Sunday. Mrs. Lamb remained for a visit.

Mrs. Lewis of Frederic visited her daughter, Mrs. Sandy Harvey several days last week.

Louie Cornell is visiting friends in Alba this week.

Miss Edna Holmes of Three Rivers is visiting her parents and sister at this place.

Alfred Post of Battle Creek visited his son Elmer of this place and is now visiting his brother Frank at Sidnaw.

Among those from outside for the fourth were Ward Primrose and wife of Cadillac, D. Cross and family, A. Ashbaugh and wife, J. D. Ashbaugh and family, Miss Gladys Norton, Mrs. A. V. Lamb and L. E. Barner and wife spent the fourth at Intermediate lake.

C. E. Bennett was at Petoskey Monday where his daughter is at work in a restaurant, and where his son is also working.

Mr. and Mrs. Will Norton and son Marvan and friend Mr. Ladd of West Virginia spent Sunday with the Ashbaugh family.

PENINSULAR

(Edited by Mrs. E. Hayden)

Mr. Marvin the Rawley man was on the Peninsula Thursday.

Mrs. Ira McKee and daughter Miss Florence McKee of Star Dist. and Mrs. McKee's little grand son, Kar, Weaver of Boyne City started by auto July 4th for Ontonagon, they were accompanied by Mr. Leo McCanna, they expect to arrive at Ontonagon by Wednesday at which place will occur the wedding of Miss Florence and Mr. McCanna, after spending a few days the guests of Mr. McCanna's parents the happy couple will proceed by auto to Milwaukee where they will make their home. Mrs. McKee will return by train.

Mr. and Mrs. Geo. Weaver and family of Boyne City are spending some time at the Ira McKee farm in Star Dist. keeping house while Mrs. Weaver's mother, Mrs. McKee is taking a vacation in Ontonagon.

Little Clare Bogart who is staying with his grand parents, Mr. and Mrs. Joel Bennett, Star Dist. while his mother, Mrs. Susie Bogart is attending summer school, had the misfortune July 3 to step on a nail in a board with one foot and in the act of jerking the foot up he placed the other foot on another nail in the same board with sufficient force to force the nail almost through the other foot. The little fellow was entirely laid up the 4th, but is getting along nicely now.

Several hundred took advantage of the perfect day to spend in the heart of nature at Whiting Park picnicking and bathing and just resting July 4th.

Mrs. Bessie Newson and son George, Mr. White, Mrs. Varnum and son Monty, Mr. and Mrs. Davis and two sons, Mr. and Mrs. John Cabley and Derby Hayden, making three car loads motor ed east July 4 and after inspecting the fire tower joined the picnic party in honor of her father, Geo. Jarman who's 57 birthday anniversary occurred that day. The out of town guests were Mr. and Mrs. Elton of Traverse City, Mr. and Mrs. Frank Conyer and Miss Dorothy Jarman of Lansing. Thirty four were seated at the beautifully loaded table and all did ample justice to the goodly goods.

Lyle Jones, who spent several years with his aunt Mrs. Geo. Staley, but who has been employed in Detroit for two years came up Thursday and spent the 4th with her and his sister, little Gladys Jones who lives with her aunt Mrs. Staley. She returned to Detroit Sunday.

A. Reich of Bunker Hill S. S. had to lay off from his job of excavating for an engine at the East Jordan Chemical until sewer can be laid to drain the water out.

Mr. and Mrs. A. B. Nicloy and family and Mrs. Clara Nicloy attended the Free Methodist quarterly meeting at Central Lake Saturday and Sunday.

Oats are beginning to head and promise a splendid crop.

Mr. and Mrs. Herbert Gould of Boyne City were Sunday guests of Mr. and Mrs. Geo. Staley of Star Dist. Sunday.

Mrs. Elizabeth Simmerman and daughter Mary, formerly of Three Bells Dist. but now of Muskegon Heights were supper guests of Mr. and Mrs. Geo. Staley Saturday.

Mr. and Mrs. Willitt Simmerman and two children of Muskegon Heights visited here Saturday night and Sunday.

Mr. and Mrs. Roy Vader and three children of Petoskey and Mrs. Clara Nicloy of Sunny Slope Farm Advance Dist. spent the 4th with W. D. McDonald family in Three Bells Dist.

Mr. and Mrs. Thomas Rice of Kalkaska and Mr. and Mrs. Peter of Muskegon and Mr. and Mrs. Walter Rice of Niles were guests of the W. D. McDonald family Sunday.

A much needed rain visited us Monday.

Work on the Co. road is progressing very nicely.

The Fire Tower at Whiting Park still attracts much attention and several hundred of both sex have climbed to the lookout.

Haying is the order of the day.

Ray Loomis is making hay for W. D. McDonald, while both W. D. and Godfrey McDonald are working their teams on the Co. road.

Mr. and Mrs. Frank Conyer and Miss Dorothy Jarman returned to Lansing Saturday after spending a few days at the home of the ladies' father, Geo. Jarman at Knoll Krest Mountain Dist. They were accompanied as far as Traverse City by Mr. and Mrs. Elton Jarman who also had visited at Knoll Krest for several days.

Mrs. Mercy Woerfl and daughter Phyllis of Knoll Krest motored with the Rebecca to Mackinac Wednesday where they were met by Mr. and Mrs. Wm. Gerlack and the funeral for Chas. Woerfl was held, they returned the same evening.

Little Alberta June Tibbit who has been very ill with pneumonia and whooping cough is some what improved at this writing.

Mr. and Mrs. Chas. Crane arrived from Detroit Monday to spend the summer at Cedar Lodge. They are accompanied by their daughter Mrs. Gladys Little. Mr. Little will join them later. Mrs. Crane is a teacher in the boy's industrial school at Lansing.

Mrs. Edith Tibbit of Cherry Hill went to Central Lake Thursday evening to attend the Free Methodist quarterly meeting. The rest of the family, Mr. and Mrs. Douglas Tibbit and children went Sunday, all returning Sunday evening.

Cherries are beginning to ripen and are a splendid crop.

Straw berries seem to be past their best, there seems to be an immense crop in this section.

The annual meeting of the Pine Lake Telephone Co. was held at the Star school house July 7, the regular routine of business was transacted.

Grand Rapids—Clifford Hotchkiss, 24 years old, of Sarniac, died here recently from burns received when a farm tractor gasoline tank exploded.

Monroe—By a vote of 12 to 8, the Monroe county board of supervisors here decided to retain the services of a county school nurse the coming year.

Ludington—Mason County supervisors are to be penalized hereafter for coming late to sessions, according to a resolution adopted unanimously. Members who are half an hour late will be marked absent and lose one-half day's pay.

Lansing—The State will collect between \$75,000 and \$100,000 in delinquent corporation franchise fees, through a check of the returns made for corporations by the accountant firm of Seldman & Seldman, of Grand Rapids, H. V. Chilson, deputy secretary of state, has estimated.

Allegan—The Allegan county board of supervisors has voted to pay Mrs. Lillian Mayhood \$500 for injuries suffered when her horse became frightened at a county road scraper and ran away, throwing her from the buggy. Mrs. Mayhood had intimated she would institute a suit for damages.

Manistee—A reduction of \$2,720,173 in the valuation of Manistee county's real estate was adopted by the board of supervisors as recommended by the equalization committee. This brings the total valuation of both real estate and personal property down to \$14,793,144, as against \$17,725,072 last year.

Lansing—Over 200 streams flow into Lake Superior and 800 more flow into the other Great Lakes. These lakes contain over half of the area of fresh water on the earth. The water surface of the Great Lakes, with the land draining into it, presents a total drainage basin of 270,000 square miles.

Westphalia—While wading, Edward Wohlschied, 18 years old, stepped into deep water and was drowned in Grand River near here. His brother, Marlon, 12, narrowly escaped when he also stepped off a shelf into deep water. Although neither of the boys could swim, Marlon struggled back to shore. The older boy's body was recovered.

Lansing—In its campaign to get out a big vote at municipal, state and national elections, the board of directors of the Lansing Chamber of Commerce has adopted a resolution urging the enactment of a compulsory voting law. It has announced. The board would disfranchise and fine all legal voters who failed to register and vote.

Lansing—Dr. R. M. Olin, state health commissioner, has announced the smallpox quarantine imposed on circuses, carnivals and street fairs lifted. According to Dr. Olin, between 1,500,000 and 2,000,000 persons have been vaccinated in Michigan since the campaign for 100 per cent vaccination started, and conditions are vastly improved.

Iron Mountain—Only a heavy rain will prevent the almost total loss of this year's hay crop in Dickinson County, according to Arthur Lonsdorf, county agriculturist. The crop in the sandy sections already has been cut in two and that of the loam and clay sections, hit hard by the late spring, will suffer heavily if rain does not come. Farmers have been advised to plant emergency crops.

Detroit—The appointment of 82 additional letter carriers has been announced by Postmaster John W. Smith. This brings the total of carrier appointments since Smith assumed control of the office up to 278. In the same period 13 supervisors and 280 postoffice clerks have been appointed, making a total of 571 new employes engaged during the last two years. The entire postal force now numbers around 2,800.

Fennville—The Montmorency cherries, the most extensively cultivated variety in this section and the variety figured on largely to provide work in the field and at the cannery is now known to be not more than a 50 per cent crop. The limbs are still laden with the cherries, about a pea size, but they are turning white, are withering and at the slightest touch they loosen and drop. It is conservatively estimated that half of this extensive variety will drop. The early sweet cherries are holding much better.

Lansing—Representatives of the Michigan Electric Railway company appeared before the state public-utilities commission recently to protest the valuations fixed on the company's various properties by the last appraisal. They claim that values, when the appraisal was made were unusually low in comparison to the present worth of the property. An increase in the valuation probably would not affect rates, as the later urban areas are now collecting the maximum fares under the Glaspele interurban rate act.

Lansing—A quarter of a century ago Michigan was one of the greatest timber producing states of the nation, but in 1922 'Michigan people' paid \$15,000,000 in freight on timber imported into the state, Edward Lockrun, secretary of the state conservation commission, declared in an address here. The state conservation department, in co-operation with federal authorities, is planting trees in approximately 5,000 acres of cutover land. If legislative appropriation can be secured, the plan is to double the planting acreage every two years.

COUNCIL PROCEEDINGS

Regular meeting of the common council of the City of East Jordan held at the council rooms, Monday evening, July 7, 1924.

Meeting was called to order by the Mayor. Present: Mayor Porter, Aldermen Farmer, Procter, Kowalske, Watson and Aldrich. Absent: Alderman Sedgman.

EAST JORDAN LUMBER CO.

HAVE SNAPPY MUSICAL COMEDY PROGRAM

THE BLACK AND WHITE MALE CHORUS AND MINSTRELS
THE Black and White Male Chorus and Minstrels, dispensers of music and mirth, coming to Chautauqua on the last day, is one of the greatest organizations ever assembled for purposes of entertainment. The eight young men who comprise its membership will have charge of the program afternoon and night, and will bring to a brilliant close the best assembly ever held in this community. A big double program will be given at night, the finale being a regulation minstrel show with members in costume and end men in black face. Two changes of costume are necessary for the performances. In the first part the men will be attired in navy ensign coats, with white trousers and white shoes. Minstrel costumes are worn in the second section. The programs include ballads, popular and semi-classical music, both vocal and instrumental. There is snap and go and the organization is easily the most original glee club on the Chautauqua platform this season.

SUCH IS LIFE

By Dan Zelm

BUDDY'S A GREAT GO-GETTER.

MEANING— "GEE, I WISH I COULD HAVE THAT SLIDE ALL TO MYSELF."

WHY PERCUVAL, WHY ARE YOU SITTING UNDER THERE ALL THE TIME? — DON'T YOU LIKE TO SLIDE?

YES, BUT BUDDY SAID I'D HAVE MUCH MORE FUN IF I SAT UNDER HERE & PRETENDED I WAS THE MAN WHO LISTENED TO THE NOISE

Briefs of the Week

Born to Mr. and Mrs. Dan E. Jones, a son, July 6th.

Born to Mr. and Mrs. Delbert Turk, a son—Delbert, June 26th.

Born to Mr. and Mrs. Edward Ager, a daughter—Alice June, June 29th.

Born to Atty and Mrs. F. R. Williams at Elk Rapids, June 27, a son—Malcolm Morrison.

Miss Lydia Blount who has been teaching in Porto Rico, is home for the summer vacation.

Mrs. Morgan Lewis and children of Akron, Ohio are guests of her parents, Mr. and Mrs. W. F. Porter.

Mr. and Mrs. H. Rosenthal and children left by auto first of the week for a visit with relatives at Chicago.

Some nice furniture, stoves and ranges for sale on easy payments at C. J. Malpass Hdwe. Co. adv.

Shoe Week at the East Jordan Lumber Co. Store next week. Note the bargains advertised elsewhere. adv.

Mr. and Mrs. T. H. Ploughman returned to Belding this week after visiting her parents Mr. and Mrs. W. R. Barnette. Cuthbert Barnette accompanied them home for a visit.

Through courtesy of Mrs. E. L. Burdick, a former East Jordan resident now residing at Walnut Creek, Calif., the Herald is in receipt of a recent Sunday issue of the Oakland-Tribune and the Contra Costa Courier—the latter published in her home town.

The Courier contains an interesting account of a meeting of the Calendar Club of the Walnut Creek M. E. Church at the home of Mrs. Burdick. The main features of the entertainment was a mock wedding, Mrs. Burdick being author of the skit and taking a leading character.

Repairs for all makes of mowers, binders and rakes at C. J. Malpass Hdwe. Co. adv.

The best vacation is found in reading the vacation guide-books.

Love is something that makes two people believe they can live as cheaply as one, when both of them know they can't.

The pessimist can't see the daylight because the sun dazzles his eyes.

When you get out of pepper you're not worth your salt.

Some persons in their anxiety to make you "feel at home," make you uncomfortable, but maybe that's the way you feel at home.

A "good sport" seldom is good for much else.

The world isn't any bigger than your eyes.

Live in a worry, die in a hurry.

Nature is kind. The beautiful and dumb never know they are dumb.

Modern children do not venerate their modern parents, but they regard them as good friends.

You can't convince a boy who has failed in arithmetic that "there is safety in numbers."

The grouch who dislikes children does so because he knows that they can see through him.

Many a European child wishes he could live an American dog's life.

A "good hater" is a second-rater.

It's all right to take a joke and keep it. It's trying to tell it that will make you unpopular.

The object of the radicals is to make big business feel small.

Sheep Sold Unborn

In the wool-growing states of the West it is a common occurrence for thousands of sheep to be sold before they are born. In Wyoming recently a deal was put through for the sale of 50,000 lambs at \$7 per head, not one of which was yet alive.

Fighting Mosquitoes

Paris-green dust scattered in a malarial mosquito swamp near Mound, La., proved very successful. Airplanes flew over swamps otherwise inaccessible and scattered the dust heavily diluted with Tripoli earth.

News of the Week

Norwegian Lutheran Church.

There will again be an English evening service at the church at 7:30 p. m. standard time. Rev. Opitz of Petoskey will deliver an important message.

Presbyterian Church Notes

Rev. C. W. Sidebotham, Pastor.

FARM FACTS

A bushel of sudan grass seed weighs 40 pounds.

One row well hoed is worth many rows full of weeds.

Make a sowing of wrinkled peas to follow the earliest crops.

Be sure your dealer understands where the cloverseed he is trying to sell you, comes from.

Good fencing not only keeps live stock at home, but it also keeps profit from getting away.

Rebuilding isn't always necessary to make farm homes attractive. Paint and shrubbery will work wonders.

Acid phosphate, one of the most valuable sources of plant food, is now close to the pre-war price.

A good farm has a good garden. A good farmer raises most of his own living.

Leaf lettuce and radishes with spinach are the first crops to be used up in the early garden.

The inoculation of the common garden pea is only good for Canadian field peas, garden peas and vetches.

Seed potatoes should be treated for the prevention of rhizoctonia and scab.

String beans, either the bush or pole varieties, are the most planted of the staple garden vegetables.

A man sometimes marries for a home only to find he has started a private boarding house.

Excellent Company In Snappy Comedy

SCENE FROM "TWO BLOCKS AWAY"

"TWO BLOCKS AWAY," famous comedy-drama will be presented on the third night of the Chautauqua course.

Since its first production on Broadway by George M. Cohan it has been successfully presented in all the larger cities of the country.

It is one of those comedies that has punch, is clean, but laughable and enduring. Members of the company who will offer it here, have been playing their different roles for many

weeks, having spent almost the entire winter in the comedy.

"Two Blocks Away" tells humorously and thrillingly of incidents in the life of an old shoemaker who was always contentedly pegging away, until—plop, right into his lap was thrown a great fortune.

There's a twist to the plot that comes as a surprise—so unexpected, in fact that when the climax is reached there is a tenseness that is scarcely relieved until the curtain falls on the last act.

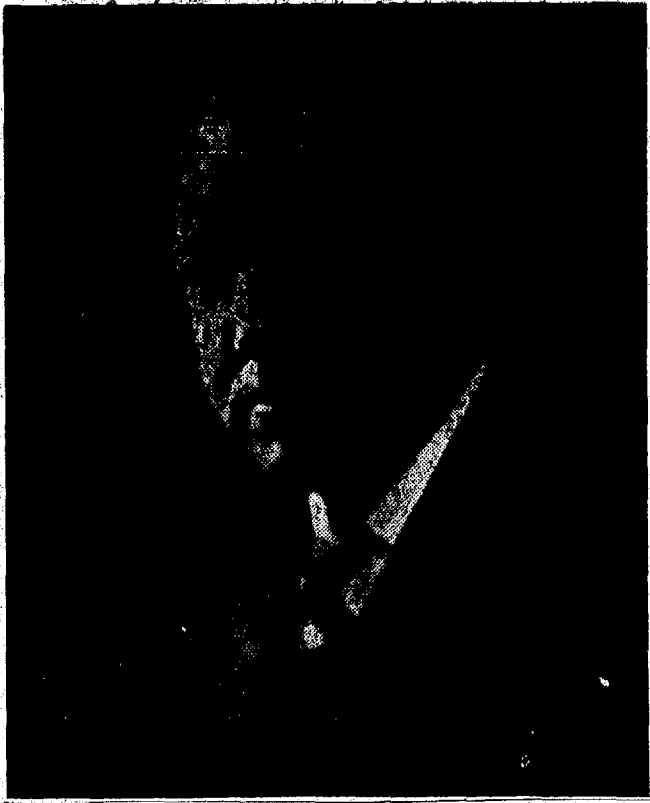

At East Jordan, July 20th-24th, inclusive.

The Beauty and Economy of GRASS RUGS and OLD HICKORY FURNITURE

In so many ways will you find Grass Rugs and Old Hickory Furniture superior to the heavier furnishings for summer use, that the change will add much comfort to your family and yourself during the warm weather.

R. G. WATSON
DEPENDABLE FURNITURE
EAST JORDAN, MICHIGAN

Distinguished American Baritone

ALEXIUS BAAS

BORN of a family musically gifted, Alexius Baas, who will be heard during Chautauqua, is one of the best known baritones on the concert stage.

With Waldemar Gelitch, violinist, Mr. Baas will give two recitals on the fourth day.

He is known throughout America for his fine bass-baritone voice. He has been connected with church and concert work in the Middle Western states for several seasons.

He has also spent three years in

concert tours in other sections. For three years, he was director of the vocal and dramatic departments of the Wisconsin School of Music. He has had other prominent connections as an instructor.

Mr. Baas is an actor as well as a singer. He was for four seasons with the Ben Greet Players and is favorably known in all the cities visited by the company during that period.

His program will include a number of dramatic readings which will set forth in a remarkable way his amazing ability as a dramatic interpreter.

At East Jordan, July 20th-24th, inclusive.

Principal Crops Used for Forage

Domestic Animals Consume Three-Fourths of Product of Improved Land.

(Prepared by the United States Department of Agriculture.)
Seven-tenths of the 835,000,000 acres of land occupied by crops harvested in the census year 1919 were used to produce forage, that is, concentrates and roughage for live stock, says the Department of Agriculture in a review of forage resources based on census data and other material. The area used to produce forage in 1919 was approximately 237,000,000 acres. This compares with 70,000,000 acres, or about two-tenths of the total crop area, used for producing food for human consumption, and 32,000,000 acres, or about one-tenth of the crop area, used for other purposes, principally to grow cotton, tobacco and flax.

As used by the department, the term forage means all vegetable nutriment, fresh or cured, which is consumed by domestic animals. It includes pasturage, browse, mast, green feed, hay, straw, silage and grain. Besides the forage harvested from these 237,000,000 acres, live stock consumed the product of about 60,000,000 acres of humid improved pasture, of probably 171,000,000 acres of humid unimproved grassland pasture over half of which was in farms, and of about 237,000,000 acres of forest and cut-over pasture land in farms or under other private ownership and in national forests. Live stock also grazed over perhaps 587,000,000 acres of arid or semiarid grass land in the West.

Hay and Forage.

These facts are held to warrant the conclusion that live stock consumed about three-fourths of the product of the improved land in the country and practically all the product of unimproved pastures and grazing land. In this connection it is pointed out that the census classification "Hay and Forage" does not include many crops usually used for forage. It does not include corn (except fodder), and corn is the most important of all crops used for forage. Thus the census report presents a very incomplete picture of our forage resources, when the word forage is used in its broadest sense.

The 257,000,000 acres producing crops for feed yielded slightly more sustenance than the 1,055,000 acres used for pasture. More than one-fourth of the pasture land is in the arid western range, and nearly one-fourth more is forest and cut-over land, having low capacity for carrying live stock.

In the cotton belt in 1919 about 53 per cent of the crop land was devoted to the production of feed for live stock, mostly corn, cowpeas, velvet beans and peanuts. About 37 per cent of the land in this region was in cotton, tobacco and other crops not used as feed for live stock or as food for man, except incidentally. Less than 10 per cent was devoted to the production of food consumed directly by man.

In the corn and winter wheat region nearly three-fourths of the crop land in 1919 produced forage for live stock. The remaining fourth produced food except on 2 per cent of the area, which was devoted to tobacco. In the corn belt, where all the hay and nearly all the corn and oats are fed to live stock, about 84 per cent of the crop land produced forage for farm animals, and only 16 per cent produced food for man. Only one-fifth of 1 per cent of the crop area in the corn belt was used for other than feed or food crops.

Hay is Dominant Crop.

Hay is the dominant crop in the hay and dairying regions to the North and East. It occupies about 33 per cent of the crop land, and corn for fodder and silage occupies nearly 6 per cent more. More than 30 per cent of the crop land in this area is used to grow oats, barley, corn and other crops for feed. About 30 per cent is devoted to crops used for human food.

In the humid eastern half of the United States, considered as a whole, one-fourth of the crop land is used to grow corn for grain, another fourth for hay, fodder and silage, and a fifth for oats and other feed crops. The remaining 30 per cent produces most of the food used directly for human consumption in the United States and over half of the cotton-fiber of the world. More than three-fifths of the crop area in the western half of the United States is used for the production of forage. This territory, of course, is largely semiarid or arid, and is mostly in pasture or range land. Nevertheless, the proportion of western crop land devoted to producing feed for live stock is smaller than it is in the East, owing largely to the fact that wheat is one of the best crops that can be grown on semiarid land. Wheat occupied nearly one-third of the harvested crop land in the western half of the United States in 1919. Fruit is also relatively more important in the West than in the East.

Forage crops, however, do not bulk so large in value as in area occupied. Although it took about seven-tenths of the total crop area to produce our harvested forage in 1919, the value of this forage was only a little over half of the farm value of all crops. The average value of crops used for forage in that year was \$30.87 an acre, compared with \$30.33 for food crops (wheat, fruits, vegetables, etc.), and \$38.62 for the fiber and other crops.

Windbreaks Give Farm Protection

Tend to Prevent Soil From Drying Out and From Injury by the Wind.

(Prepared by the United States Department of Agriculture.)
Windbreaks are, in more ways than one, a farm asset and every farm should have its windbreak. They tend to prevent the soil from drying out quickly and they protect grain and orchards from mechanical injury by the wind. A belt of trees by the farm buildings protects them from extreme winter cold and summer heat, and makes the farm a pleasanter place in which to live. The windbreaks may also be a source of wood supply for use on the farm or for sale.

Effect of Windbreak.

The effect of a windbreak may not always be beneficial to a crop nearby, depending upon the crop. Whether the total effect of a windbreak is good or bad, however, depends upon whether the benefits derived from its influence on wind movement, temperature and evaporation are greater or less than the injury resulting from the sapping and shading of the ground nearby. To determine the total effect, crop measurements have been made by the United States Department of Agriculture in Nebraska, Kansas, Iowa and Minnesota. Average rather than exceptional conditions were measured, the object being to discover the effect of those influences which are continuous and affect every annual crop grown.

Measurements made in fields of small grain indicate that the crop gain in the protected zone is sufficient to offset fully the effects of shading and sapping. In a wheat field protected by a dense windbreak the gain amounted to about ten bushels per acre where the protection was complete, and gradually grew less as the distance from the windbreak increased. The total gain was about equal to the amount of grain which could have been grown on the shaded ground near the trees.

Corn Crop is Helped.

The corn crops showed more consistent and marked benefits from protection than any other. Height measurements on one field showed the plants to be 4 1/2 feet high in the first 18 rows next to the windbreak, while beyond this protected zone the height was 2 1/2 feet. The field showed a production of 59 bushels per acre in the protected zone and only 51 bushels in the exposed part.

With ordinary field crops the farmer may count on a benefit from windbreak protection which will make the loss of the area occupied by the trees negligible. Under Middle Western conditions a windbreak whose width does not exceed two or three times its height will more than pay for itself regardless of the timber which may be produced.

Gooseberry Worthy More Attention Than Given

The gooseberry is worthy of more attention than is usually given it. If a person plants gooseberry bushes with the expectation of growing good crops without further care it is best not to plant at all, since they will be only barren breeding pieces for the currant worm and will not bear fruit. If well cared for they will bear heavy crops of berries that will usually find a ready market at good prices.

The currant worm appears pretty soon after the leaves put out in the spring, and if they are not looked after the worm will soon strip the bushes of their foliage and destroy the crop of berries entirely. When the worms first appear the bushes should be sprayed with bordeaux mixture in which a little paris green, arsenate of lead or some other insect poison is mixed. The worms are not hard to poison and one or two sprayings will settle the worm question without injury to the fruit. The spray will also prevent mildew on gooseberry bushes.

Number of Breeding Sows on Farms Has Decreased

The number of breeding sows on farms on April 1 is estimated by the United States Department of Agriculture to have been 11,751,000, or 80.2 per cent of the number on farms at the same time last year. The decline is greatest in the corn belt. Breeding sows in Kansas were 80 per cent of the number of the preceding year on April 1; Missouri 85 per cent; Indiana 88 per cent, and in each of the states of Ohio, Illinois, Iowa and Nebraska, 88 per cent. Increase in the number of breeding sows on farms in North Dakota was 10 per cent, and smaller increases in five states of the Far West. Along the Atlantic seaboard, and in the southern states, declines were less than in the corn belt and less than the average for the United States.

Parsnips Planted Early Will Give Best Results

It is best to plant parsnip seeds early to give them plenty of time to fully mature. If the seeds are planted late there is a smaller percentage of germination, the plants are weaker and do not develop so readily as the plants from seed sown quite early.

Prepare the soil as early as the weather will permit, and sow the seeds in rows wide enough to permit cultivation, for the weeds must be kept out if the parsnips are expected to grow. Use plenty of seed, as they seldom all grow, and should they be too thick they can be thinned to the proper distance apart in the rows.

Girl Who Beat Helen Wills

Miss McKane, England's premier woman tennis player, who defeated Helen Wills, American national champion, when they met in the London tennis championships prior to the Wimbledon tournament.

His Fate a Mystery

The fate of Maseazel, who in 308 reclaimed Africa for the Roman empire, is one of the world's greatest mysteries. The generally accepted story is that he was drowned on his return to Italy, by Stilicho's orders.

Notice to Destroy Noxious Weeds

To owners, occupiers or possessors of lands, or any person or persons, firm or corporation having charge of any lands in this state:

Notice is hereby given that it shall be the duty of every owner, possessor or occupier of land or of every person or persons, firm or corporation having charge of any lands in this state to cut or cause to be cut down and destroyed all Canada thistles, milkweed (asclepias cornutus), wild carrots, ox-eye daisies, or other noxious weeds growing thereon, at least once in each year, before the 15th day of July, 1924, and as much oftener as may be necessary to prevent them going to seed, and if any owner, possessor or occupier of land, or any person or persons, firm or corporation having charge of any lands in this state shall, knowingly, suffer any Canada thistle, milkweed, wild carrots or other noxious weeds to grow thereon or shall suffer the seeds to ripen, so as to cause or endanger the spread thereof, he or they shall, on conviction in any court of competent jurisdiction be liable to a fine of ten dollars, together with costs of prosecution for every such offense and he or they shall pay the cost of cutting and destroying such weeds.

Failure to comply with notice on or before the date mentioned or within ten days thereafter shall make the parties so failing liable for the costs of cutting same to be levied and collected against the property in the same manner as other taxes are levied and collected.
Dated this 30th day of June, 1924.
ELMER JENSEN
Commissioner of Highways of the Township of South Arm, County of Charlevoix, State of Michigan. 27-2

Notice to Destroy Noxious Weeds

To owners, occupiers or possessors of lands, or any person or persons, firm or corporation having charge of any lands in this state:

Notice is hereby given that it shall be the duty of every owner, possessor or occupier of land or of every person or persons, firm or corporation having charge of any lands in this state to cut or cause to be cut down and destroyed all Canada thistle, milkweed (asclepias cornutus), wild carrots, ox-eye daisies, or other noxious weeds growing thereon, at least once in each year, before the 15th day of July, 1924, and as much oftener as may be necessary to prevent them going to seed, and if any owner, possessor or occupier of land, or any person or persons, firm or corporation having charge of any lands in this state shall, knowingly, suffer any Canada thistles, milkweed, wild carrots or other noxious weeds to grow thereon or shall suffer the seeds to ripen, so as to cause or endanger the spread thereof, he or they shall, on conviction in any court of competent jurisdiction be liable to a fine of ten dollars, together with costs of prosecution for every such offense and he or they shall pay the cost of destroying such weeds.

Failure to comply with notice on or before the date mentioned or within ten days thereafter shall make the parties so failing liable for the costs of cutting same to be levied and collected against the property in the same manner as other taxes are levied and collected.
Dated the 30th day of June, 1924.
HENRY W. COOK
Chief of Police of the City of East Jordan, Michigan 27-2

MORTGAGE SALE

Default having been made in the conditions of a mortgage, made and executed by Frank M. and Edna E. House, husband and wife, to Harriet A. E. Dodd as a lien upon the east half of the south east quarter of Section thirty-six, Township thirty-three, North, Range five west, dated October 7, 1912, recorded in office of Register of Deeds of Charlevoix County, Michigan, October 15, 1912, in Liber 47 of mortgages, on Page 439, duly assigned by the administratrix of the Estate of said mortgagee by assignment dated May 10, 1917, recorded in Liber 49, on Page 636 to Gertrude T. Willison. The said mortgage will be foreclosed by a sale of the above described premises, at front door of the Court House, in the City of Charlevoix, Michigan, at two o'clock p. m., September 20, 1924, for Two Hundred Twenty-four Dollars, the amount claimed to be due at this date, together with nineteen and 7-100 dollars for taxes paid on said premises and interest thereon, with interest on the whole amount from this date at seven per cent per annum, and including the costs and expenses allowed by law.
Dated June 1, D. 1924.
GERTRUDE T. WILLISON,
Mortgagee.

GUY M. WILSON,
Attorney for Mortgagee,
Flint, Mich.

MORTGAGE SALE

By a mortgage dated the 28th day of December A. D. 1917, and recorded in the office of the Register of Deeds for the County of Charlevoix and State of Michigan, on the 31st day of December A. D. 1917, in Liber 40 of Mortgages, on Page 201, Albert Beckman and wife, Lillian Beckman, of the Township of South Arm, Charlevoix County, Michigan; did duly mortgage to Albert Wesselink and Hermelina Wesselink, of Reeman, Michigan, the lands, premises and property situated in the Township of South Arm, County of Charlevoix and State of Michigan, described as follows, to-wit:

The southeast quarter (SE 1/4) of the northeast quarter (NE 1/4), and lot number two (2), all of Township thirty-two (32) north, Range seven (7) west, containing 90.68 acres, more or less, according to Government Survey thereof, Default having occurred in the conditions of said mortgage by which the power of sale therein contained has become operative, and no suit or proceedings at law or in equity having been instituted to recover the moneys secured by said mortgage, or any part thereof:

Notice is hereby given that said mortgage will be foreclosed by a sale of said mortgaged premises, or so much thereof as may be necessary, to pay the amount due on said mortgage with interest at the rate of six per cent (6 per cent) per annum and all other legal costs, including an attorney fee of thirty-five and no-100 Dollars as provided by said mortgage, at public vendue to the highest bidder on the 23rd day of August, A. D. 1924 at ten o'clock in the forenoon of that day, at the front door of the Court House in the City of Charlevoix, County of Charlevoix and State of Michigan, said Court House being the place of holding the circuit court for said county.

The amount claimed to be due on said mortgage at the date of this notice is the sum of Fourteen Hundred Twenty-five and 40-100 Dollars (\$1425.40)

Dated April 28, A. D. 1924.
ALBERT WESSELINK and
HARMEINA WESSELINK,
Mortgagees.

WHITE & REBER,
Attorneys for the Mortgagee.
Business Address, Fremont, Michigan.

MORTGAGE SALE.

By a mortgage dated the sixth day of August A. D. 1921, and recorded in the office of the Register of Deeds for the County of Charlevoix and State of Michigan, on the 10th day of August A. D. 1921, in Liber 40 of Mortgages, on Page 427, Albert Beckman and Lillian Beckman, his wife, of East Jordan, Michigan, did duly mortgage to Albert Wesselink of Reeman, Michigan, the lands, premises and property situated in the Township of South Arm, County of Charlevoix and State of Michigan, described as follows, to-wit: The west half (W 1/2) of the northeast quarter (NE 1/4) of Section twenty (20), of Township thirty-two (32) north, Range seven (7) west, except a part of the southwest quarter (SW 1/4) of the northeast quarter (NE 1/4), and part of the northwest quarter (NW 1/4) of the northeast quarter (NE 1/4) of said section twenty (20), being a strip of land four (4) rods wide lying two (2) rods on either side of center line, commencing at a point on the north boundary of said section twenty (20), six hundred seven and nine tenths (607.9) feet east of the quarter post on the north side of said section, running thence on a twelve degree curve to right (E. ward) four hundred forty-five (445) feet to a point tangent; thence south thirty-five degrees forty minutes east (magnetic course) on tangent four hundred thirty-four and two tenths (434.2) feet to a point curve, thence on thirty-eight degree two minute curve to left (E. ward) eighty-seven (87) feet to a point on the east eighth line five hundred ninety-five and eight tenths (595.8) feet south of the section line embracing 1,330 acres of land, as nearly as may be, in said section twenty (20).

Default having occurred in the conditions of said mortgage by which the power of sale therein contained has become operative, and no suit or proceedings at law or in equity having been instituted to recover the moneys secured by said mortgage, or any part thereof:

Notice is hereby given that said mortgage will be foreclosed by a sale of said mortgaged premises, or so much thereof as may be necessary, to pay the amount due on said mortgage with interest at the rate of six per cent (6 per cent) per annum and all other legal costs, including an attorney fee of twenty-five and no-100 Dollars as provided by said mortgage, at public vendue to the highest bidder on the 23rd day of August, A. D. 1924 at ten o'clock in the forenoon of that day, at the front door of the Court House in the City of Charlevoix, County of Charlevoix and State of Michigan, said Court House being the place of holding the circuit court for said county.

The amount claimed to be due on said mortgage at the date of this notice is the sum of Thirty-four Hundred Twenty-four and 50-100 Dollars (\$3424.50)

Dated, April 26, A. D. 1924.
ALBERT WESSELINK,
Mortgagee.

WHITE & REBER,
Attorneys for the Mortgagee.
Business Address, Fremont, Michigan.

PROBATE ORDER

STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.

It is a session of said Court, held at the Probate Office in the City of Charlevoix, in said County; on the 24th day of June, A. D. 1924.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Franklin L. Smith, Deceased.

Olin D. Smith, having filed in said court his petition praying that said court adjudicate and determine who were at the time of his death the legal heirs of said deceased and entitled to inherit the real estate of which said deceased died seized,

It is ordered, that the 17th day of July A. D. 1924, at ten o'clock in the forenoon, at said Probate Office, be and is hereby appointed for hearing said petition.

It is Further Ordered, That Public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
Judge of Probate.

Test Qualities of Many Grains

Milling and Baking Laboratory Set Up by Agricultural Department.

(Prepared by the United States Department of Agriculture.)
Tests of the milling and baking qualities of wheat, rye and other grains are being made by the bureau of agricultural economics, United States Department of Agriculture, at Washington in a milling and baking laboratory specially set up for that purpose. The work has played an important part in fixing federal wheat standards, and in determining the milling and baking qualities of new varieties of wheat.

Determine Value of Wheat.
The value of wheat almost entirely depends on its milling and baking quality, which can be accurately determined only through actual milling and baking tests, the department says. The milling is done on an experimental mill composed of four single stands of rolls of 8 by 6 inches in size, and including a small box sifter. The system of milling used, although not altogether comparable with that used in commercial milling, gives results that indicate as truly the relative milling value of different wheats as tests made on commercial mills. Each sample is analyzed for grading factors before being milled, the size of the samples being about four pounds each.

The samples are prepared for milling on small cleaning and scouring machines patterned after those used in commercial mills, the system of milling employed differing from that of commercial mills mainly in that there is no continuous or automatic flow of stock from one machine to another. The system includes five breaks and eight reductions, as made possible in some instances by using the same machine for two or more operations.

Electric Equipment.
The baking equipment includes an electrically heated proofing cabinet, electric baking oven, dough mixer, and loaf volume measuring device. The sponge method of baking is used, all samples of flour being baked in duplicate, the average of the two tests representing the baking data. The same formula is used in baking all samples, regardless of the class of wheat, with the exception of the quantity of water added and the length of time used in proofing the dough. All factors such as temperature of the oven, are constant so that any differences shown in the bread will be due to the flour and not to variations in manipulation of the formula and methods.

The bread is judged for color and texture of crumb one or two days after baking. These factors considered in connection with the water absorption of flour, the loaf volume, and the weight of loaf determine the baking quality of the sample. Full details of the milling and baking methods and apparatus have just been published in Department Bulletin 1187, entitled "Experimental Milling and Baking." Copies of the bulletin may be obtained free upon request to the Department of Agriculture, Washington, D. C.

Legume Roughages Are Most Weighty Factors

When alfalfa hay is worth \$15 a ton, timothy hay is worth only 96 cents a ton for dairy cows. This low value is due to its low protein content, high percentage of fiber, low percentage of ash and lack of palatability. Whenever it is possible to do so, it pays to sell timothy and buy alfalfa in its place.

Legume roughages are one of the most important factors in an economical dairy ration. They are palatable and their high protein content makes it possible to balance a ration without the use of so much high-priced concentrates. They are also high in mineral content. Alfalfa, red clover, soy beans and cowpeas rank in palatability in the order named. When the greater portion of the leaves are saved in harvesting, soy beans and cowpeas rank above the others in protein, and mineral content. Alfalfa is generally placed at the head of the list of roughages for dairy cows. Its value in the ration is often underestimated. If you were short of legume hay last winter, it is time to plan the rotation so as to increase the supply this year.

Guard Against Sore Necks

Regardless of how well harness may fit, there is always danger of sores starting on the shoulders, neck and back. Once a sore starts, it is extremely difficult to heal so long as the horse must work every day. A few minutes spent each half day cleaning collars and back pads will save time later. When lifting the collar to remove locks of mane, a glance will show if sweat and short hair is collecting on the leather. Lifting the collar also cools the neck and shoulders.

Keep Vermin Away

One of the best methods to keep poultry free from lice is to provide a "dust bath." This may be made of a box large enough to accommodate several fowls at a time and partly filled with road dust, tobacco dust and sulphur according to the following proportion: Road dust, 6 parts; tobacco, 1 part; sulphur, 2 handfuls. Dipping chickens in a 2 per cent solution of chloroform is also recommended for the control of lice.

OGRE AND MERMAIDS

ONCE upon a time there was an Ogre who lived in a castle by the sea and many times he had seen the beautiful mermaids come up to sun themselves on the rocks, but he had never been able to get near enough to speak to them.

While the Ogre possessed some magic power, he was not able to change his form, so he went to a wood-witch and asked to be given power to change into a dolphin when he chose. For the Ogre had fallen in

"A Big Dolphin Came Swimming Along."

love with the mermaids and wished to ask one of them to become his wife.

If he could get close enough he would be able, he thought, to ask the one he would choose and tell her he lived in the beautiful castle on the high rocks and could change himself into another form.

This the old witch did, and one morning when the pretty mermaids came to the rocks a big dolphin came swimming along, but before he could speak to them two mermaids leaped to his back and drove him through the water.

Then back to the rocks the mermaids guided him with some seaweed reins they made him take in his mouth, and two more mermaids leaped

upon his back and again the poor dolphin was driven through the water.

All day back and forth he traveled, the pretty mermaids laughing with glee at the frolic they were having, and when they at last released him the dolphin was too tired to speak, and flopping itself up on the shore it fell asleep.

When the dolphin awoke it wished itself an ogre at once, and away to the woods he ran to the witch that had given him power to change shape.

"Rid me of this power to change to a dolphin," he said to the witch. "I have no wish to win a mermaid for my wife. Such thoughtless creatures as they are would not be the sort of wife for me, and I wish to be sure I shall never again be a dolphin, for if once they caught me I might never escape but always be their slave."

The old witch laughed. "I thought you would not care for those water nymphs," she said. "You can't change the nature of those creatures. They are used to having all the sea creatures for their slaves."

The Ogre began to tremble. "Are you sure I will never become a dolphin again?" he asked. "No," replied the witch, "there is only one way in which you are sure never to take on that form again, and that is to be changed into a rock or a high mountain, but if you remain an ogre you may some day, when near the sea, take on the form of the dolphin."

"Change me into a mountain and make it a high one, where those mermaids can never climb," said the Ogre.

So the witch changed him into a mountain and there, looking down on the sea below, where the mermaids sport in the sun, the Ogre is safe from their spell, and the mermaids sometimes, when they catch a poor dolphin and drive him through the water all day, think they hear a roll of thunder sounding along the mountain top; but it is the mountain who was once the Ogre, laughing to think of what he has escaped.

The Why of Superstitions

By H. IRDING KING

NOSEBLEED AND A KEY

IN MANY parts of the country it is believed that a key worn on a chain around the neck will prevent or cure nosebleed. The same superstition is found in many parts of Europe and in Asia. There are superstitions with regard to the key which are of analogous nature. These superstitions would appear to be compounded of two elements; the idea of the ancients with regard to iron as being both a "bane and antidote" in witchcraft and the idea of sympathetic magic. In Asia the iron idea is stressed; in Europe and America the sympathetic magic idea. But in all three regions the mixture is apparent.

In the superstition under consideration the key derives its principal power from the fact that a key is used to lock up things. Therefore, by sympathetic magic a key worn around the neck locks up the nosebleed and stops it.

An analogy is found in the manner in which the Balkan Slavs in times of epidemic keep the disease from their village. Two women go outside the village, one with a lock and key and one with a kettle of water. The woman with the kettle says: "What do you come for?" to which the woman with the key replies, "I come to lock the village from mishaps." And having turned the key in the lock she throws it into the kettle. This is repeated three times at three different places outside the village and the villagers have greater faith in the efficacy of the ceremony than in all the health boards in existence. For that matter, many an American girl has more confidence in the power of the key around her neck (some say it should be hung down the back) to cure her nosebleed than in the skill of the doctor.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day, lucky jewel

ARABELLA

ARABELLA, which is bestowed in all good faith by fond parents, only to be cut down directly to the more convenient Bella, is a name of great power and dignity. It comes from the "eagle" series of Icelandic names, which is responsible for many of the appellatives popular in English speaking countries.

Arabella signifies "eagle heroine". The first lady to bear the name was the granddaughter of William the Lion of Scotland, who married Robert de Quin. Another Arabella was she, who, with her husband John de Montpyncon, held the manor of Magdalen Laver in the reign of Henry III.

The Normans, who made radical changes in all names that did not sound like French, cut Arabella down to Arbell. "My Lady of Arbell" was the title of the unfortunate Arabella Stuart, whose history is familiar to all of us. It is chiefly due to this poor lady that Arabella gained such vogue and had such widespread usage in England.

Arabella's talismanic gem is the diamond. It promises her fearlessness, success, and, if set in gold and worn on the left hand, true and abiding love. Thursday is her lucky day and 6 her lucky number. The violet is her flower.

YOUR HAND

How to read your characteristics and tendencies—the capabilities or weaknesses that make for success or failure as shown in your palm.

CARRIAGE AND MOTIONS OF THE HANDS

WHEN a person carries the hands in front of the body, or slightly at the side, and moves them continually, or always, waving them about as though to keep them from touching anything, or to keep anything from touching them, it is a sign of a nature that is suspicious, looking about for traps, etc. In some subjects, to be judged by other characteristics, this is, of course, a good sign, since it denotes carefulness, watchfulness and a desire to investigate matters before passing judgment upon them.

We sometimes encounter the subject who keeps the hands clasped in front, with the palms together. In very many cases it is a woman who carries the hands thus. She is calm and placid in temper, looking at life through the philosopher's spectacles. Such a person will let the hand be read in a quiet, unhurried manner, and is a good "subject." Of course other types will betray their mental and moral characteristics—to some extent, at least—in the manner in which they submit their hands to reading.

Saving Home-Grown Seed Advantageous

Big Help to Gardener and Also His Neighbors.

(Prepared by the United States Department of Agriculture.)

That there are advantages to the home gardener in saving seed where it is grown, both for marketing to his neighbors and for his own use is generally recognized. These advantages, according to Farmers' Bulletin 1300, "Vegetable Seeds for the Home and Market Garden," just published by the United States Department of Agriculture, are twofold: The selection which the gardener gives his seed plants, while not greater than that which the seed grower gives his seed stock, is often better than can be given to seed that is placed on the market, and the plants selected will be the ones which succeed best under local environment.

The suggestions in this bulletin are directed to methods of seed selection, rather than of seed selection, as few persons engaged in any branch of gardening have the insight, patience, perseverance and enthusiasm required for the development of valuable new varieties of vegetables.

Copies of the bulletin may be secured, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

Young Cocklebur Most Dangerous to Porkers

Fields infested with cockleburs should not be used for grazing pigs in the spring when cockleburs are sprouting, advises A. L. Ward, swine husbandman extension service A. & M. college of Texas.

The most dangerous time is just as the cocklebur plant pushes up through the surface of the soil. The pigs like these young sprouts, which contain a poisonous substance which results fatally if eaten in sufficient quantities. Experiments have proved that 12 ounces of these sprouts contain sufficient poison to kill a 50-pound shoat. Death usually results quickly, somewhat like sorghum poisoning of cattle.

When pigs are first affected the entire bunch should be removed to a dry lot for a short time, where they should be given whole milk, grease or lard. The surest preventive is to keep pigs from fields infested with burrs until the plants reach a height of four to six inches. The plants at this stage lose the poisonous properties.

Determine Profit From Sow by Size of Litter

The profit from the sow is determined by the number of pigs she raises. If it costs \$30 to feed a sow and litter of ten pigs from breeding to weaning time, the cost per pig is only \$3, and if there are only six pigs, the cost will be \$5 per pig. Of course there are many things that may cause the loss of pigs before weaning, but ordinarily the sow that farrows the good litter is the sow that raises the most pigs and makes the most profit. The number of pigs a sow farrows is determined by the number of ova, or eggs, she deposits at breeding time. It is generally admitted that sows that are gaining in weight and are in fair condition deposit more ova and farrow larger, stronger litters. However, it is not necessary or desirable to have the sow fat, because excessive fat hinders the proper functioning of the sow's regenerative organs.

Soy Beans Superior as Substitute for Tankage

At the Purdue (Ind.) experiment station soy beans have been substituted for tankage with very good results. However, when soy beans are fed, a mineral mixture should be fed. Several may be used. The one which was used at Purdue was 10 parts wood ashes, 10 parts acid phosphate, one part salt.

Other good mineral mixtures are equal parts of wood ashes and salt, equal parts of limestone, salt and bonemeal or rock phosphate.

Soy beans contain about one-half the amount of protein which tankage does, so should be fed in about twice the amount of tankage, perhaps three-fourths to a pound per head per day. The wheat does not need to be ground so finely provided it is soaked for a few hours. Soy beans are worth about two-thirds per ton as much as tankage.

FARM FACTS

Plan to sow what you think you can sell.

The best crop of all is one of healthy and sound boys and girls.

There is no point in giving the farm a name if it is not worth one.

Alfalfa produces a valuable crop and at the same time adds nitrogen to the soil.

Grafting isn't a sinister word when it's used in the orchard. Bridge grafting may save many a good tree.

That neglected woodlot, if cleared of crooked, defective and weary trees may sometime return a good profit.

Ten pure bred cows averaging 8,000 pounds of milk each, return as great a profit as will 60 scrubbers averaging 4,000 pounds, Connecticut investigators found.

Red Crown

Is Its Own Best Salesman

The High Grade Gasoline

THE proof of Red Crown's more and better mileage is in the fact that "once a Red Crown user, always a Red Crown customer."

Red Crown extra mileage is dependable. Wherever you get Red Crown the quality is the same. The extra miles come from complete combustion.

Every drop of Red Crown is converted into power, because the chain of boiling point fractions is unbroken and combustion is perfect. There is no waste to Red Crown.

The perfect combustibility of Red Crown not only produces an unbroken flow of smooth, rhythmic power and extra mileage, but it gives added flexibility. That's why the engine responds to the throttle with superlative smoothness and zest with Red Crown in the tank.

In fact, Red Crown sums up the service ideals of the Standard Oil Company (Indiana). It is as reliable in bad weather as in good; on a grade as on the level; in mud as on a boulevard; and you can get it every few blocks in the city and every few miles in the country—everywhere, throughout the Middle West.

At the following Standard Oil Service Station:
State & Second Streets

And at the following Filling Stations and Garages:
East Jordan Auto Sales Co.
E. E. Goodman, Main St.
E. M. Valentine, Chestonia, Mich.

Standard Oil Company, East Jordan, Mich. (Indiana)

OUR IMPRINT ON A JOB OF PRINTING IS JUST LIKE THE STERLING MARK ON SILVER—IT MEANS YOUR GITTIN' 'EM BEST! AHEM!

CHARLES SCHEPPE

Lions in Cold Region

The lions of Mount Atlas are far the largest of their species and capable of enduring extreme cold, frequently traveling long distances through deep snow.

SAGE TEA DANDY TO DARKEN HAIR

It's Grandmother's Recipe to Bring Back Color and Lustre to Hair

You can turn gray, faded hair beautifully dark and lustrous almost overnight if you'll get a bottle of "Wyeth's Sage and Sulphur Compound" at any drug store. Millions of bottles of this old famous Sage Tea Recipe, improved by the addition of other ingredients, are sold annually, say well-known druggists here, because it darkens the hair so naturally and evenly that no one can tell it has been applied.

Those whose hair is turning gray or becoming faded have a surprise awaiting them, because after one or two applications the gray hair vanishes and your locks become luxuriantly dark and beautiful.

This is the age of youth. Gray-haired, unattractive folks aren't wanted around, so get busy with Wyeth's Sage and Sulphur Compound to-night and you'll be delighted with your dark, handsome hair and your youthful appearance within a few days.

REPORT OF THE CONDITION OF THE

at East Jordan, Michigan, at the close of business June 30th, 1924, as called for by the Commissioner of the Banking Department.

Items Of Interest in World's News

Arkansas Ratifies Child Labor Law.
Little Rock, Ark.—The Arkansas house of representatives has gone on record as the first legislative body to ratify the proposed child labor amendment to the constitution of the United States. The vote was 45 to 40.

Bug Files in Eye, Lost Nine Hours.
Clearfield, Pa.—Because a bug flew in her eye while she was gathering wild flowers, Miss Essie Lydick lost her way and for nine hours wandered in the wilderness near Rockton. Finally she came upon a railroad which led to a station.

France Signs U. S. Rum Ban Treaty.
Washington—A treaty designed to prevent rum smuggling into the United States, similar to that negotiated between the United States and Great Britain, was recently signed by Secretary Hughes and Ambassador Jusserand, representing France.

Morgan Trust's Income \$4,614,961.
New York—The seven trust funds aggregating \$10,300,000 created by the will of the late J. Pierpont Morgan produced from January 1, 1916, to January 1, 1924, an income of \$4,614,961, or an average of more than 5 per cent a year, according to accounts filed in surrogate court by the trustees.

Court Throws Out Bonus Contest.
Washington—The suit to test the constitutionality of the bonus has been thrown out of the court here. Justice Stafford of the District of Columbia supreme court ruled that Joseph Whelan, New York, who asked for an injunction, because he was a taxpayer, had not sufficiently direct interests involved.

Wages Cut, Coke Workers Stage Strike.
Uniontown, Pa.—One thousand coke workers, employed at the Allison No. 1 and 2 plants of the W. J. Rainey company, refused to go to work when the company announced a wage reduction of 33 1-3 per cent. The Rainey company was the last of the independents in the region to announce the cut. Four other Rainey plants are operating.

Designs Boat to Navigate Under Ice.
Washington—Simon Lake, the inventor, has been granted a patent by the government for a submersible cargo vessel designed to navigate under northern ice-covered waters. It consists of a boat with a super-structure by which its navigator may dive under ice and rise again, breaking open a path for continued surface navigation.

English Art Gems Draw Yankee Gold.
London—Americans are pouring millions into London for art treasures, according to auctioneers here. They have spent more than \$50,000,000 for pictures since the war and the total for the first half of 1924 is \$2,148,045 against \$10,000,000 for all 1923. Americans promise to be keen bidders for some of the Princess Royal's 50 old masters, which are to be sold at auction July 18.

Cotton Crop Defies Boll Weevil.
Harrington, Tex.—Notwithstanding the fact that it was in the Lower Rio Grande valley that the cotton boll weevil entered the United States from Mexico many years ago, the growing of the staple in this region is being done on a more extensive scale this year than ever before. The area planted to cotton is about 200,000 acres, which is an increase of approximately 40,000 acres.

Steel Co. Buys Cast Iron Pipe Plant.
Easton, Pa.—The Republic Steel interests have taken an option on the stock of the Warren Foundry & Machine Co., of Phillipsburg, N. J., the largest individual manufacturers of cast iron pipe in the northern section of the country, it has become known here. The price agreed on is \$400 a share and the aggregate amount involved is \$4,000,000. The property probably will be taken over the last week in August.

U. S. Doubles Exports to Brazil.
Buenos Aires—The statistics of Santos, Brazil's greatest port, and gateway to the thriving industrial state of Sao Paulo, show that the value of American imports for the first three months of 1924 doubled the same period of 1923. In the same period the United States exceeded the rest of the world in purchase of Brazilian products, importing \$138,000,000 worth of raw materials out of a total exported of \$245,000,000.

Factory Pays Help With Shoes.
Pirmasens, Germany—When pay day came around in this shoe manufacturing town recently, the factory owners were up against it for cash. Instead of paying the men off in marks, they gave them each a pair of shoes as part payment of their wages. An hour later virtually the whole shoe working population had been transformed into a sales aggregation. From store to store wandered heads of families, trying to dispose of shoes in return for cash.

STATE NEWS IN BRIEF

Holland—Prof. A. A. Haan, for nearly 30 years professor of Dutch language and literature at Hope college, has tendered his resignation. He has not announced his intentions.

Owosso—The co-operation here of all city health forces during the last year has resulted in reducing communicable disease 45 per cent, according to Dr. R. C. Mahaney, health officer.

Albion—Albion's postoffice is now first class, having been advanced from second class because of big recent increases in the volume of business. Postmaster E. J. Mallory's salary was increased as a result of the change.

Grand Rapids—Severe injuries, including fractures of the legs, were suffered by John Stap, 19 years old, and his brother, Allen, 23, when a motorcycle on which they were riding collided with a street car during a storm.

Detroit—Submission to a vote of the people at the primary September 9 for a \$1,000,000 issue for another bridge over the River Rouge has been ordered by the board of supervisors. The proposed bridge will span the Rouge at Dix avenue.

Fennville—While it is reported that virtually the entire peach crop of Berrien and Van Buren counties was winter-killed, a survey of orchards in this section of Allegan county shows that there will be at least 65 per cent of an average crop of the fruit.

Adrian—The mill operated by Martin and Charles Coy, in the village of Jasper, was recently destroyed by fire of unknown origin. The loss is estimated at \$18,000, including a new engine valued at \$4,500. Two carloads of feed also were destroyed.

Lansing—The construction of a central heating plant, to serve both the Kalamazoo State Hospital and the Western Michigan Normal School, has been authorized by the State Administrative Board. It will cost about \$276,000 and will be located at the hospital.

Owosso—Matthew Bush, judge of probate of Shiawassee County, now serving his thirty-sixth consecutive year, has announced his candidacy for another term of four years. Only one other probate judge in Michigan has served longer than Judge Bush. He is Judge Edgar O. Durfee, of Detroit, now serving his forty-sixth year.

Detroit—The first electric locomotive for the Detroit, Toledo & Ironton Railroad will be assembled in the River Rouge, Mich., shops beginning July 15. This will be the first step in the electrification of the road, which has been watched with interest by industry in general since its purchase several years ago by Henry Ford.

Dowagiac—Mrs. Martha Jane Rife, 58 years old, is dead, as the result of being burned while building a fire at her home north of this city. The explosion of kerosene threw her under a table. She was seized by her son, Edward, who carried her to a water tank in the yard and extinguished the flames, but she died without regaining consciousness.

Schoolcraft—Noticing that one of the passenger coaches of the Grand Trunk Train No. 9 was on fire as the train was leaving the station, the agent signaled the engineer, and the burning coach was uncoupled. The Schoolcraft fire department extinguished the fire after the roof of the coach was partly destroyed. The train was delayed 45 minutes.

Ypsilanti—Albert Bologna, 21 years old, Detroit, was killed instantly three miles east of here when he stepped in front of an interurban car operated by Charles Willets, of this city. Bologna was bringing a load of fruit to Ypsilanti when his truck developed motor trouble. He stopped close to the interurban track and stepped from the truck directly in front of the Limited car.

Lansing—State receipts on June 30 were the greatest for a single day in the history of the state, Auditor General Fuller has reported to the administration. They totaled \$8,210,000. A large share of the money was from state tax payments. The board gave the Southern Michigan Telephone company three months grace to pay about \$85,000 taxes. The company is in financial difficulties.

Detroit—Frank Cody was retained as superintendent of Detroit schools and his salary increased from \$12,000 to \$35,000 a year at the annual meeting of the board of education. The salaries of two of Cody's assistants also were increased, despite the objection of Inspector Edward D. Devine that the present time was not appropriate for the spending of more money than was absolutely necessary.

Detroit—Though the salary of carriers was not increased, postmaster John W. Smith's salary has been increased from \$8,000 to \$8,500. Assistant Postmaster Peter Wiggle from \$4,000 to \$4,300. Superintendent of Mails Charles C. Kellogg from \$3,800 to \$4,000. Cashier A. G. Calkin from \$3,500 to \$3,700, and Money Order Cashier William A. Corbett from \$3,300 to \$3,500. All station superintendents receive a raise of from \$100 to \$200. Detroit is now seventh in the list of American cities for mail business done.

Advance Millinery Shows an Era of High Crowns

Coming crowns cast their tallness before. It is the crown which foretells the millinery trend. If it is high, mannish and "different" from that which we have been accustomed to see in the little cloche, then be assured it is a French model, just arrived. Its brim is quite sure to be narrow according to authentic forecasts, just as you see in this smart model fashioned of quality-kind black georgette crepe. Simple ribbon band with buckle in a directive is part of the millinery trim scheme outlined for the picture. A collar of sheer malines like that pictured, with a bit of graceful coque plumeage, counteracts any undue severity of line.

Elephants Easily Trained
Wild elephants can be trained to work in six months after being caught.

Respect for Books

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

I RAN across grandmother's geography this morning, "The Village Elementary Geography," standing primly beside Bob's "First Year Latin Lessons." Bob is my nephew. Grandmother's book is yellowed with age, but, save for a few thumb prints, the pages are clean and without dog-ears. It is still covered with the bright calico which her grandmother sewed on for her to keep the book from being soiled or injured when the little girl carried it to school.
Grandmother's name and the date are on the fly leaf written in a cramped childish hand, for grandmother was only eight when she got the book, and the date is near the beginning of the last century. They had respects for books in those days.
Roberts' book presents a somewhat different appearance. It was bought only a few months ago, but the cover is torn and battered and hangs by a thread. Inside pages are mutilated or missing and pen sketches and hieroglyphics are scrawled across the text, making it almost unreadable. As I turn through I find dignified Cicero wearing sombrero and smoking a pipe, and Caesar with a beard done in Indian ink. The book has suffered every insult and indignity possible to be thought of by a child of fourteen. Robert knows more than grandmother did at his age, but neither he nor the children with whom he associates have much love or respect for books.
As for me, I should as soon see a dear friend abused as a book I have worked with and come to know and to understand. I do not mind the ordinary wear of use and age any more than I am annoyed by wrinkles in the face of my friends who are growing old, but intentional indignities hurt me.
Is it because books are so plentiful or so cheap that we care so little for them? Is it because they cost us now no sacrifice, no struggle, no tender thought or anxious anticipation that we think of them so lightly and toss them about so carelessly? I have heard grandmother tell how happy she was and how proud when her father first put the little geography into her hands. Neither children nor college students often feel so today.
We give courses in the appreciation of poetry and music and art; we have made rapid advancement in teaching children since grandmother's time. Why do we not still teach them to love and respect their books?

Really Not Her Fault
A lady in great demand socially was duly summoned as a witness in some court proceedings. As she failed to appear a deputy marshal was sent to act as escort. Then the judge explained to her that she was in contempt of court and asked what she had to say. She was manifestly astonished at all this. "I meant no contempt," stated she. "I would have attended the trial gladly, only I had a previous engagement."

Real Overcrowding

"Another case of shameful overcrowding," grumbled Mr. Blumfeld, reading from his paper. "There are over 8,000,000 bacilli in a cubic inch of milk."—London Tit-Bits.

Primitive Race

Primitive people, living in holes in the ground and believed to be descendants of a race antedating the Arabs in north Africa, were found by a fellow of the Royal Geographical Society a few hundred miles south of the Mediterranean coast in Africa. Here dwell more than 12,000, without tents or houses, living in subterranean homes which are entered through sloping tunnels. They are Moslems and extremely fanatical.

An Odd Reason

Little Dorothy always laughs when any catchy music is playing in her hearing. When asked the reason she replied: "I just can't help it. It tickles my teeth."—Boston Transcript.

Time to Cut Wood

The forest products laboratory says that the time of cutting wood has very little effect upon its durability if the timber is properly cared for afterward. Late fall or winter cutting is simplest, as the wood seasons more slowly and with less checking, and by warm weather it is seasoned enough to be less susceptible to borers and fungi. There is, however, practically no difference in moisture content of green wood in winter and summer.
