EAST JORDAN, MICHIGAN, FRIDAY, JANUARY 29, 1926.

No. 5

E. J. Masons Win at Boyne

Boyne City Lodge Entertain Their Brothers Royally.

The Boyne City and East Jordan Masonic lodges hooked up in a first class Indoor Baseball game Tuesday evening at Boyne City, in which the Jordanites emerged on the long end of the score.

We are glad to win the ball game but the social contact with our brother Masons and friends from Boyne City was far more important. In fact, the Boyne City Lodge made things so pleasant for the boys from East Jordan and their friends that the ball game seemed almost an incidental matter. A return game will be played in the near future and by the ability that Boyne showed the other evening, it will be another real game.

East Jordan won the game 15 to 9, seeming to have the edge on Boyne City largely because of more experience in the game the past few years, and East Jordan is not going over winning the next one from the same team. A good deal was heard in appreciation of the roads being open and twenty-five to thirty local Baseball enthusiasts followed the team to Boyne. All report a first class time.

The game was played before a large enthusiastic crowd of people representing many of the more prominent people of Boyne City as well as Senator W. J. Pearson, Herman Meyer, and others from Boyne Fall and neighboring towns. The game opened as though it would be a thriller from the first. Boyne City's pitcher looked very good, retiring the side in one two, three order, but East Jordan began to find him in the second inning. Sedgman pitched his usual good game and received some very good support in the field. Watson and Shay featured the fielding, while Seiler, Shny, Bechtold, and others mawled Mr. Baker rather severely as the game progressed. East Jordan seemed stronger with the stick, which proved the deciding factor. For Boyne City, Mellencamp at Short, Tooley at second, and Barden at first, played very good ball in the field. Mellencamp and Jersey did stellar work with the stick.

A contest like the one Tuesday night between rival towns creates a feeling of fellowship and cooperation that cannot be brought in any other way, and especially when they are held in the winter in a gymnasium where everybody gets near enough to exchange conversation. Right here we want to congratulate Boyne City on the magnificent recreational center they have. It is an ideal place for Indoor Baseball and surely is an asset to our neighboring city, and East Jordan is looking forward to more similar contests with Boyne, for they always seem to show the necessary pep to make contests interesting.

The following is the lineup and score:

East Jordan	Runs	Score
Watson R. S.	1	
Seiler R. F.	1	11
Shay C.	1	11
Bechtold 1-b.	1	11
Duncanson L. F.	1	1
Freiberg L. S.	1	1
Giles 2-b.	1	1
Cornell 3-b.		
Sedgman P.		
Total score	0 4 2 0 2 0 4 3 0	15
Boyne City	Runs	Score
Duguid L.S.	1	1
Beckley R. F.		1
Mellencamp R. S.	1	1
Jersey C.		
Baker P.	1	
Barden 1-b.

Scout Orders

Note: All buglers and drummers to bring their instruments to all Troop meetings unless otherwise ordered.

Wednesday Feb. 3rd, Troop meet at 6:30.

6:30-6:50 Drill and Setting-ups.

6:50-7:10 Radio Signalling, Semaphore Signalling, First Aid, Bugle band practice, Rope Lashings.

7:10-7:30 Patrol work, under patrol leaders.

7:30 Basket ball.

Our idea of a forward looking merchant is now advertising spring clothes.

Writes A Preface To Classic of Stevenson

Can an author take another writer's characters and make them live?

"Yes," is the answer of those who have read Arthur D. Howden Smith's "Porto Bello Gold." Howden Smith's novel is by way of being a preface to Robert Stevenson's great classic "Treasure Island." It relates the adventures which lead to the burying of the treasure on Dead Man's Chest, that lonely South Atlantic island, and critics are agreed that no apologies are necessary for the excellent story which has come from Howden Smith's ideas.

There is precedent for the author's bold action in plot construction. Several of Stevenson's unfinished stories, notably "St. Ives," were afterward completed by other writers. A few years ago Sir Harry Johnston started the literary world with "The Gray Dombey's" a continuation of Dickens' "Dombey and son," and several others have attempted to complete Dickens' unfinished work, "Edwin Drood."

"Porto Bello Gold" will be offered to readers of The Charlevoix County Herald, beginning with the next issue. It's a corking good story and one that shouldn't be missed.

Don't Forget Farmers Week

At Michigan State College, February 1st to 5th.

If you can possibly take a few days vacation from your farm, you can devote your time to no better advantage and value than to plan visiting your Michigan State College, Feb. 1st to 5th inclusive, and see for yourself just what the College is doing and how it is functioning for the benefit of the agricultural interests of the State.

This will be your best opportunity to visit the different departments and the facilities they offer at your service, the experimental farm and the information and its results for your benefit and the livestock housed therein, including their experiments conducted along all lines of livestock subjects.

During Farmers Week program Feb. 1st to 4th inclusive, emphasis will be placed upon three phases of agricultural interest. Tuesday of that week has been designated as "Livestock Day," Wednesday "State Fair Day," and Thursday, "Horticultural Day." On the last named day the new building will be dedicated, a building that is one of the best in the Country and a beautiful addition to the Campus.

A great array of prominent speakers are on the various programs, such as Grace Frysinger, Home Economics Extension Specialist of the U. S. D. A.; W. C. Coffe, Dean and Director of Agriculture at the University of Minnesota; Governor Groesbeck, L. Whitney Watkins, Secretary of State Department of Agriculture; L. H. Worthely, Bureau of Entomology, U. S. D. A.; J. D. Willard, Director of Extension Service, Massachusetts Agricultural College; Dr. L. H. Bailey, Cornell University; Dr. Butterfield, President of M. S. C.; Dean F. B. Mumford, University of Missouri; and F. A. Waugh, Prof. of Horticulture, Mass. Agricultural College and many others to numerous to mention.

In addition approximately thirty different agricultural association will have their annual meetings during the course of the week, probably the most important of which will be the annual meeting of the State Farm Bureau. And don't forget that banquets will be held by various state breeder associations and that among the entertainment features will be basketball games, wrestling matches, etc. all for visitors to Farmers Week.

With a lineup like this there will be something of interest to you at all hours of the day and night and is there any doubt that your time cannot be spent profitably and pleasurably.

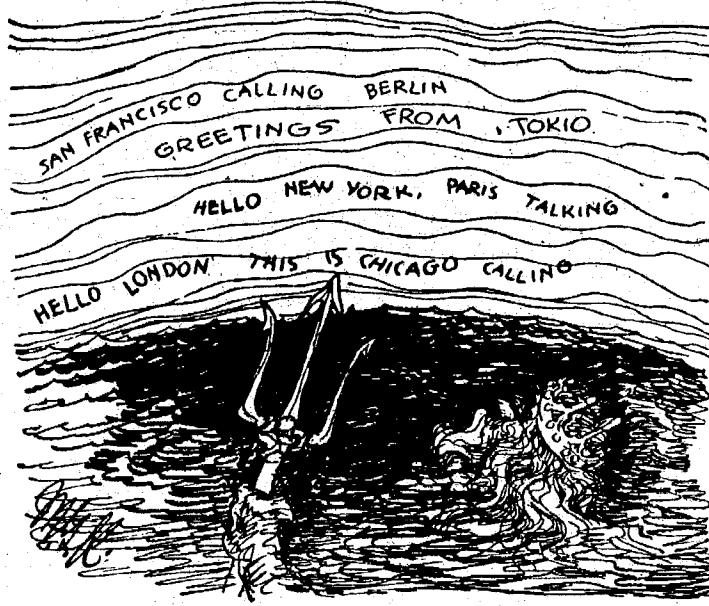

Have also notifications from Lansing that all railroads in the State will charge only one and one half fare round-trip ticket beginning Jan. 27th, and ending Feb. 4th, and the return ticket good until midnight of Feb. 6th. Make plans for attending and you will have spent the best five days of your life.

B. C. MELLENCAMP, Co. Agr'l Agent.

The modern flapper, in her war paint could make an aboriginal warrior look his honors.

About this time of the year Christmas cigars run out, and the old smoker hunts up his pipe.

Over His Head

Indoor Ball

Due to the fact that Capt. Bulow of the K. P. team has been down in bed with sore throat, the K. P.'s kind of lost heart and failed to appear on the battlefield Monday night for their scheduled game with the Holy Name, so they forfeited. In order to keep the Holy Name in practice, a pick up team was organized and a five inning game was played with the Holy Name coming out on the long end of the score. Green pitched good ball for the Holy Name having 12 strikeouts to his credit in the five innings. The Holy Name have a very strong looking lineup at present and should finish well up in the League at the end of the season.

In the second game of the evening the Methodists went down to defeat at the hands of the Presbyterians by the score of 9 to 4. The game was well played by both teams. There has been no game played in the League so far this year that has called for so many close decisions by the umpire and due to the rivalry between the two teams the game was hotly contested every minute. Both teams disputed the decision of the umpires in a number of cases but as a whole the umpires were not blamed as they did as well as anyone could have done and the decision on both sides were about of an even break.

The former king of Greece is to build a home in Florida, but even this handicap won't hurt the state.

It might be a good idea for Congress to adopt the split session idea. One month to introduce bills, another to consider them, and six months to get a vote would be the probable scheme. The other four months could be given over to investigations and muck raking.

Neeper--Worfel

A quiet wedding took place at the Free Methodist parsonage, Boyne City, last Saturday evening, Jan'y 23rd, when Miss Freda, daughter of Mr. and Mrs. Adam Neeper, was united in marriage to Roy, son of Mr. and Mrs. Alfred Worfel. The couple were united in marriage by the pastor, Rev. E. Melot. They were attended by Mr. and Mrs. Leonard Forsythe. They plan to make their home at Boyne City. The Neepers were former residents of East Jordan.

Helen Wills Is in France

Helen Wills, national singles tennis player, has arrived in France and it is expected she will meet Suzanne Lenglen in a match game before her departure.

After reading what rival auto manufacturers say about their cars we have decided that the only safe way to avoid buying the wrong car is to walk.

Making Landscape in Florida

Whenever a Florida real estate man needs more "landscape" for his "development" he just goes out and makes it. This picture shows how full-grown palm trees are taken up, transported and transplanted.

H. S. Band To Put On Show

Strongheart, Playing "White Fang," Jack London's Novel.

Friday, February 5th, the High School Band has the show at the Temple Theatre. The Band will sell tickets and get half of the proceeds for the show, featuring Strongheart as "White Fang" in Jack London's famous novel by that name.

Many people have already seen Strongheart take parts in plays where he exemplified almost human qualities. Strongheart has been one of the feature characters of movie shows in the larger theatres of the country. Movie patrons of East Jordan are fortunate to be able to see the above picture. It is true the High School Band is back of the show. That alone is a great big reason why everybody should patronize the show. On the other hand, everyone will more than get their moneys worth from the show itself. The two reasons given, an especially good cause and certainly a good show, ought to pack the Temple Theatre next Friday night.

So many other things took place the week of the High School Band concert a month ago that many have not had an opportunity to hear the High School Band since it has been playing real music. If TerWee's judgment of a Band can be taken, and I hardly think any of us would doubt his judgment, the music at the coming show will be well worth the price of admission for it is a great improvement even on the music furnished at the concert referred to. They will play the first thirty-five minutes and again at the opening of the second show.

Good wholesome movie pictures are hard to obtain and when one comes along you can absolutely bank on, it makes everyone feel that they want to attend.

Price of admission—10c and 35c.

Win From Central Lake

E. J. H. S. Basket Ball Team Score 27 to 14.

Last Friday evening the High School Basket Ball team defeated Central Lake High School by a score of 14 to 27. During the first quarter, the local boys ran up the score 11 points as against none for Central Lake. The Central Lake team, being accustomed to playing on a larger floor, were constantly fouled for hacking, holding, and charging. This constant fouling seemed to upset the team and, although they played a better game the second quarter, it was not until the second that they were able to score consistently.

The local team seemed to experience difficulty in getting under way and at no time during the game did they display the quality of basket ball of which they are capable. The snappy game which they have displayed on other occasions seemed to be entirely lacking. Johnson was the only man able to score at will. He made 18 out of the 27 points. Shedina played the most consistent game. Snyder and Taylor had more than they could do to guard little Joe Deolin. He stood a little over six foot six and could easily grasp a ball and hold it out of the reach of any of the East Jordan team. He was responsible for 10 of the 14 points scored by Central Lake.

This week Bellaire comes to East Jordan, and unless the East Jordan team is going in better shape than they did last Friday night the contest will be a very close one. Bellaire is being coached by Supt. Dumbrille. He is well onto his job.

So far this year there has not been very good support for the Basket Ball team. Come out Friday night and enjoy the game!

Lineup for the last game:

Central Lake	East Jordan
Aenis	R. F. Best
Dealin	L. F. Johnson
Cornett	C. Shedina
Washburn	R. G. Snyder
Wilson	L. G. Taylor

Referee—Waggoner

Substitutions for Central Lake: Boyce for Aenis, Aenis for Wilson. East Jordan: Rosa for Snyder.

The Chicago killer, caught in St. Louis with his bride of two weeks, says he'll soon be free. A little rope might help his prediction out a whole lot.

Bovine T. B. Eradication

Work Progressing Rapidly In Charlevoix County.

As a result of the action of the Board of Supervisors of Charlevoix County at their last session, plans are being formulated for furthering the Tuberculosis Work this year and will insure this County of continuing the high rating that it now holds for several more years. It is indeed gratifying that the appropriation was made with an unanimous vote, which is in accord with the popular sentiment and indicate the sincere efforts being made to make Charlevoix County one of the healthiest spots in all Michigan to live.

The first test made was conducted in the early part of 1923 and with results that exceeded our expectations, for out of some 10,000 head tested, it was found that our percentage of infection was only five tenths of one per cent, which enabled Charlevoix County to be declared a modified accredited area on July 23rd, 1923, upon its first test, which gives us the distinction of being one of the first four Counties in the entire State to be accredited all on the same date.

At that time we were declared accredited for a period of three years, which makes our time expire in July of this year. The action of the Board of Supervisors will make it possible to maintain a clean slate, and it is hoped that the Tuberculosis Eradication Work will have been completed by that time, so that no lapse of time will occur between the old and the new accreditation.

From the latest information from the State Veterinary at Lansing it will only be necessary to test 20 per cent of our cattle this year. Then if the results show less infection than the first test, no further testing need be done and we will be recommended as an accredited area for another short period of time. This 20 per cent must include all the herds having infection on the first test and no doubt the herds from which cattle in infected herds have been purchased, and then if the 20 per cent have not been tested, additional herds having had no reactors will be tested in various portions of the County to make the total necessary. With this plan, it can be easily seen that the expense will be less to the County and we can maintain a clean slate.

It is interesting to note the progress being made throughout the State in Tuberculosis Eradication. In 1921-44, 984 cattle were tested. 1922-158,457, in 1923-374,014, in 1924-393,217 and in 1925-404,573 were tested. In 1923 there were only 4 accredited Counties in the State, in 1924 only 7, while on Dec. 31, 1925 there were 19 accredited. On the same date work was in progress in 15 Counties and 32 Counties were included in the waiting list. Thus 56 out of 83 Michigan Counties had adopted the area plan of eradication bovine tuberculosis by the close of the year, leaving three upper peninsular Counties and twenty-four in the lower peninsular, in which no action had been taken. These 19 Counties now on the clean list, include 344,157 cattle or 21.1 per cent of the cattle population of the State.

Michigan is very fortunate in having a low rate of infection as compared with other States in the dairy belt, of the 404,573 cattle tested the past year, only 2 per cent were pronounced diseased and it is estimated that a test of all the cattle of the State would show not over 3 per cent infection. In the dairy districts in many sections of the East, 25-30 per cent of the cattle are infected. One County in New York is said to have 60 per cent tuberculosis cattle and Illinois authorities estimate that 70 per cent of the cattle of McHenry County in that State are infected.

As a result of our Tuberculosis work our export shipments of dairy and breeding cattle in 1925 were 1 1/2 times as great as the previous year. Upwards of 200 carloads have been sent out of Livingston County alone, while Ontonagon County in the Upper Peninsular has shipped 19 carloads since being accredited.

Petoskey Is Denied-Normal

Governor Refuses To Approve Site For New School.

Governor Groesbeck Tuesday refused to approve Petoskey as the site for a fifth state normal school, indicating that its location and the repair of Mt. Pleasant Normal will be laid before a special session of the legislature.

Fred B. Wells, speaker of the house, declared after a conference with the governor that the entire normal problem may be thrown into the extra session.

Vetoing the choice of Petoskey by the state board of education, as he was empowered by the last legislature, Groesbeck hinted the town was too much of a resort to be a good education center.

New normals in northeastern and northwestern Michigan may be asked in the coming session following out the administration policy of limiting the schools to 800 attendance and scattered through every section of the state.

Relocation of Mt. Pleasant Normal has been considered.—Lansing Capital News, Jan'y 26.

The average banker thinks he can farm better than the average farmer and the average farmer knows he can bank better than the average banker.

The world improves. For the first time in its history, it is said, the meeting of the New York Board of Aldermen are being opened with prayer.

PROBATE ORDER

STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 14th day of January A. D. 1926.

Present: Servetus A. Correll, Probate Judge.

In the Matter of the Estate of Bertron E. Waterman Deceased.

The above estate having been admitted to probate and Gertrude A. Waterman appointed administratrix with Will annexed thereof.

It is ordered that four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said court on Thursday, the 20th day of May A. D. 1926, at ten o'clock in the forenoon, at the probate office in the City of Charlevoix.

It is Further Ordered, That public notice thereof be given by publication of this order for three successive weeks previous to said day of hearing in the Charlevoix County Herald, a newspaper printed and circulated in this county.

SERVETUS A. CORRELL, Judge of Probate.

JARDINE GIVES HIS PLAN FOR FARM AID

Secretary of Agriculture Offers Platform of Eight Planks to Cure Ills.

Urbana, Ill.—Secretary of Agriculture Jardine, speaking before the annual meeting of the Illinois Agricultural association here, told the delegates what ails the farmers of the United States and what should and can be done about it.

In the platform he laid out and which he said would go a long way toward solving agricultural problems, Mr. Jardine mentioned eight planks which are:

1.—Equalization of property taxes and the perfection of their administration. Redistribution of the tax burden between state and local governments.

2.—A comprehensive classification of all the undeveloped land in the United States.

3.—Wider use of the federal intermediate credit system and the adaptation of that system so it can be more extensively used for the benefit of farmers.

4.—A readjustment of freight rates.

5.—A development of highways in keeping with the needs and resources of the various regions of the country.

6.—Use of navigable inland waterways as outlets for farm products.

7.—Encouragement of co-operative marketing to adjust production to demand, improvement of marketing methods and improvements of the bargaining power of the producers.

8.—The co-operation of public agencies in the working out of a sound, workable program looking to the solution of the troublesome surplus problem.

"I am opposed to price fixing. I am opposed to government handling of farm products," the secretary said.

"It has seemed to me, however, that something constructive could be done toward reducing the handicaps which surround certain phases of agricultural merchandising—the term merchandising being here used in its broadest sense. It has seemed that this could and should be done by some farmer-controlled agency.

"I want to make clear that, for the long pull, I am an optimist on farming conditions. Our agriculture may be distressed, but it is far from disabled. It is at bottom a sound, going business."

Warns Canada Against Tariff War With U. S.

Ottawa, Ont.—Thomas McMillan, Ontario, Liberal, warned the Canadian people in parliament that Arthur Meighen, Conservative party leader, proposed to start up a tariff war with the United States which would be hurtful to both nations.

"He will start a tariff war with our American neighbors," Mr. McMillan said, "just at a time when the troubles in New England, and all over the states, due to the effects of high protection, are crystallizing into the demand for a low tariff policy in that country, which may result in giving to all Canadian people, more particularly to the farmers, freer, if not free, access into the American market. The world's best market is right at our doors."

In picturing for Canadians what would be lost if Mr. Meighen's tariff war were instituted, Mr. McMillan named Chicago, in sight of the Canadian west, as the world's best cattle market.

Eleven Liners Raided; Agents Seize Liquor

New York.—Federal agents raided eleven ocean liners arriving in New York harbor, seized immense quantities of wines, ale and liquor and furnished Federal Attorney Buckner with evidence for the large batch of libel proceedings against foreign-owned ships he has yet started.

The ships raided included the Franconia and the Adriatic. More than 10,000 bottles of expensive liquor, variously estimated as being worth anywhere from \$50,000 to \$100,000, were confiscated. Writs for the destruction of the liquor were prepared at once by Buckner's assistants.

Would Return Alien Property

Washington.—Representative Newton of Missouri, in a bill which he introduced in the house, called for the return dollar for dollar of alien property seized by the United States during the war. "We had no right to seize this property, and every dollar which we retain in the treasury is confiscated money," Representative Newton declared.

Great Lakes Funds Voted

Washington.—The house has approved the section of the appropriation bill carrying \$245,000 for the naval training station at Great Lakes, Ill.

Home Inmate Leaves \$179,000

St. Joseph, Mo.—William Winslow, Sr., retired telegraph operator and Civil war veteran, who died a few days ago in the Soldiers' home at Leavenworth, Kan., left an estate of \$179,000.

Would Extend Compensation

Washington.—A bill to give veterans of all wars the same compensation status as those of the World war was introduced by Representative Lineberger, Republican, of California.

MILES DISTRICT

(Edited by Mrs. A. Miles.)

Some storm Saturday, the worst of the season.

Carl Mobio spent Sunday evening in East Jordan at the home of Lon Shaw.

John TerWee and H. H. Cummings of East Jordan were in our neighborhood on business Monday.

Carl Mobio is helping Albert Miles to cut logs, to be hauled to the Lidak mill.

We are all very sorry to hear of Mrs. Frank LaLonde being ill.

Two Ford cars went over the road Sunday to East Jordan, they did some shovelling and the little Fords rambled right along.

John Beebe of East Jordan took dinner at the Dett Evans home Monday.

"Bill" Rhinehart of East Jordan is cutting buzz poles for Dett Evans.

Fred Bancroft was a business caller in East Jordan Saturday.

Mr. Supley LaLonde was very pleasantly surprised when he received thru mail last Friday, a box of fruit, from his son, Will LaLonde, of Traverse City.

R. G. Short, the McNeess agent, from Bay Shore was in our neighborhood Monday.

The East Jordan Lumber Co. sent out their snow plow and cleaned out the Ellsworth-East Jordan road Tuesday.

Mrs. Supley LaLonde called on Mrs. Frank LaLonde in East Jordan Tuesday.

Robert Evans of Ranney Dist. is hauling baled hay for John TerWee, that he sold to H. H. Cummings of East Jordan.

The quarantine was lifted from the Donaldson home Monday.

The bible says the poor we shall have with us always. Not if they continue to jaywalk.

If you don't start "Porto Bello Gold" in the next issue of The Charlevoix County Herald you're bound to regret it.

All those surprised at the disagreement of the coal operators and the miners will please send in their names. Each will receive one Boob Coupon.

Special Session Looms

Rumors have been persistent of late that a special session of the legislature is likely to be called for some time in February. Surrender of the special charter of the D. G. H. & M. Ry., now owned and operated by the Grand Trunk, and matters pertaining to the Normal schools are things that will probably be set forth as demanding instant legislative attention. Many Michigan citizens, close to state affairs, believe that the calling of a special session to consider these matters will be just a cloak to cover plans to raise more revenues for the state, and which will be incorporated in the call for a special session by the Governor.

Many also believe that so far has the Administrative Board gone in usurping legislative functions that the calling of a special session to consider the above questions would be in the nature of the board revising its former attitude in order to present a way to bring the special session about. We do not believe that any situation extraordinary exists at the present time that would warrant a special session of the legislature, which would cost the taxpayers of the state at least \$20,000, and perhaps much more than that amount. We are of the opinion that the rebuilding the Central Normal at Mt. Pleasant, destroyed by fire a few weeks ago, the location of a site for a new normal authorized by the legislature, and the surrender of the Grand Trunk special charter can be satisfactorily taken care of until the regular session of next year.

What the people of the State of Michigan want most, is an economical administration of state affairs, not more opportunities for the spending of state funds. They believe that it is time we began living within our present income and not be forever casting about for new ways in which to raise more money by taxation. At the present time the state is expending \$18,000,000 raised from the general property tax; \$24,000,000 in gasoline and weight tax from automobiles; \$6,500,000 in corporation tax, and other taxable items that provide \$5,000,000 for state use.

The State, therefore, is raising in direct taxes upon the property of the State approximately \$58,000,000 per year. This is more than \$16.00 for each man, woman and child in the State of Michigan for the purpose of running the State alone. This does not include any of the costs for education in any of its phases, nor does it take in any of its phases, nor does it take in the cost of county, township and city government. Isn't it about time that we started exercising a little more economy in State affairs and gave the overburdened taxpayer a much needed rest?

Dollar-A-Week Slaves

Life in America has become a matter of a dollar down and a dollar a week, if we are to believe an analysis of business methods appearing in a recent issue of a retail clothing journal. "The country is going time payment mad," is the charge, which declares further that wage earners have signed away their wages for years to come procure the immediate use of both necessities.

Credit not only is the life of business, but it is the salvation of a modest home. But isn't there a possibility that business rivalry makes credit so easy to get that we are inclined to abuse it? Today we buy homes, insurance, automobiles, musical instruments, washing machines, magazines, furniture, clothing, gas and electric equipment, engagement rings, radio sets, in fact, about everything imaginable, on the payment plan, mortgaging our incomes for years.

It is a queer fact that there are 10,250,000 passenger automobiles registered in the United States, and yet last year there were only 4,000,000 persons in this country who filed income tax reports showing an income of more than \$2,000 a year. The inference is that there are five or six million persons in this country earning less than \$40 a week who have bought automobiles, and, presumably, are paying for them on the installment plan.

Discounting the future is, to a certain extent, an aid not only to our social, but to our economic life. It not only establishes our faith in tomorrow, but it heralds the fact that our financial transactions are honorable enough for us to obtain credit. But there is always the danger that overindulgence in this form of buying is going to make us dollar-a-week slaves. Lust for the comforts and pleasures of today should not lead us to place too big a mortgage on tomorrow.

January, you will recall, has been set aside as "learn-and-laugh" month. Calling a special session of the legislature ought to help the taxpayers to a couple extra smiles.

The Parent And The Teacher

A parent-teachers association appeals to us being a mighty good thing. The teachers and parents get together and talk things over.

One of the weaknesses of the public school system has been the lack of understanding which so many parents have of the problems of the teacher. You would normally think that the most sympathetic friend of the teacher would be the father or mother. Either parent knows of the problems of discipline and the dozen or more other problems that a child presents. Yet so many parents, doubly anxious to uphold their own discipline in the home, give the teacher little or no actual or sympathetic support in upholding the moral and discipline of the school. And we have also noted that some of the parents who are unreasonable in connection with school affairs, were themselves former teachers.

An important thing to do is to secure the greatest possible co-operation between the home and the school. There is nothing new about the desirability of such co-operation. It is an old, old problem, and will be not only an old, but a new, ever present problem for generations to come.

Railway Safety

How largely safety has been developed for passengers of the railroad lines in this country is shown by the reports for the year 1924, when, with 931,000,000 passengers carried, there were only 149 fatalities, or one life lost for each 6,314,000 passengers served. Railway managers and employees have reason for pride in the showing. It could not have been made without very great care in the planning and in operating the passenger trains.

The railway figures are far ahead of those shown in the automobile accidents for the same period, as the autos killed 19,000 people and inflicted injuries on about 459,000 others. The railway figures show the results where properties are placed only in safe hands, operated with the greatest care, under constant supervision. The auto toll of life shows the cost of permitting any person to operate a car, with no supervision, no training and no demonstrated fitness shown for the work. While the greater number of autos are in the hands of men and women who are careful in driving them, the few incompetent and reckless drivers do terrible damage to life and property.

PENINSULAR

(Edited by Mrs. E. Hayden)

R. G. Short, the Mc Ness medicine man from Bay Shore was making his regular round Friday.

Miss Eula Arnett, Maple Row farm, is again able to attend school after being ill for some days.

Martin Staley came Saturday from Petoskey, where he has been in a hospital for a few days and is stopping with his daughter, Mrs. Joel Bennett, at Honey Slope farm.

Mr. and Mrs. Alfred Deatz drove up on the ice from Charlevoix to Hope's dock with their car Sunday, and walked the rest of the way and spent the day with Mrs. Deatz parents, Mr. and Mrs. Duncan McDonald in Three Bells Dist.

The worst wind storm for a good many years visited this section Saturday afternoon and night.

There was no Sunday School at the Star of Hope Sunday School Sunday because of the severe storm Saturday afternoon and night.

Elmer Faust purchased a fine grade Holstein cow and two calves of W. C. Howe, of Overlook farm Monday.

Miss Dorothy Jarman of Knoll Krest returned home Monday evening from Boyne City where she had been visiting since Saturday.

Mrs. Ernest Loomis of Maple Lawn farm is spending the week in Boyne City with friends taking electric treatments.

Mr. and Mrs. Ira McKee are in receipt of a letter from their daughter, Mrs. Ezra Dean, stating they were all well and doing fine in their home in Denver Colorado.

Mrs. Wm. Bogart and son Clare of Boyne City, visited her parents, Mr. and Mrs. Joel Bennett at Honey Slope farm Saturday and Sunday.

Mrs. Mercy Woerful and two children of Gravel Hill visited her father, Geo. Jarman at Knoll Krest.

Miss Dorothy Jarman of Knoll Krest went to Boyne City Saturday to visit her aunt, Mrs. Laura Stauley.

During the wind storm Saturday afternoon the silo of F. D. Russell of Ridgeway farm and one of the large doors of the barn were blown down.

Our extra slice of pie for this week is awarded to the rich, but honest man.

Broadcasting stations in America have been silent for one hour each night this week in order to give European stations a chance to be heard. For the benefit of the curious we'll say that the static you heard was Scotland cheering Pussfoot Johnson.

Many a proud and loving father, who has visions of assassinating his offspring for wearing balloon trousers, ought to hark back to the day he marched proudly into the old homestead arrayed in one of those awallow-tail suits with black braid all around the edges.

MAY BE MINISTER

It is believed in Washington that Ira C. Copley, former congressman from Illinois, will be appointed American minister to Greece. He is very wealthy, controlling extensive gas, oil, electric light and railroad interests and owning newspapers in Aurora and Elgin, Ill.

NOTORIOUS BANDIT TAKEN IN ST. LOUIS

Martin Durkin, Chicago Murderer, Nabbed on Train.

Chicago.—Martin J. Durkin, famed as the most notorious of all Chicago bandits and highwaymen, and alleged murderer, was captured on a train as he and his youthful bride were arriving in St. Louis from California. Government agents who, with the aid of the St. Louis police, had captured him, turned him over to the jurisdiction of the state of Illinois, and he and his girl wife of seven weeks, the former Miss Irma Sullivan of Cornell, Ill., were brought here.

Durkin readily admitted to the state's attorney that he shot a government agent, the crime which caused the entire forces of the government to pursue him relentlessly until they seized him on a train from Texas. He is also charged with killing a Chicago policeman.

The state will demand a death penalty, it was announced. If they don't get it in the first trial they will try again in the next.

Durkin said he was assured he would have a defense fund of ample scope—mentioned \$50,000.

Bill Would Divorce U. S. Shipping Units

Washington.—The divorce of the Emergency Fleet corporation and the shipping board and the creation of a federal shipping council and regional advisory council, with authority to maintain and develop ocean trade routes, are proposed in a bill introduced in the house of representatives by Representative Robert L. Bacon of New York.

The measure follows recommendations made by the national merchant marine conference, held under auspices of the Chamber of Commerce of the United States, to the reports of which President Coolidge called attention in his annual message to congress.

The Bacon bill and a bill previously introduced by Representative Scott are supplementary and are intended to carry out administrative changes relating to the merchant marine. Other measures designated to put into effect the policy outlined by the national merchant marine conference will be introduced later.

The Bacon bill would reaffirm the purpose of the United States to provide such a merchant fleet as may be necessary to promote the foreign trade of the United States and provide for more comprehensive, sectional representation of agriculture, commercial, industrial and shipping interests of the country in the determination of shipping policies.

8,300 G. M. Employees Split Eleven Millions

New York.—Disbursement of \$11,200,000 in cash and common stock from the employees' saving fund to 8,300 employees was announced by the General Motors corporation. The disbursement represented \$2,043,405 in savings deposited by employees, plus 3 per cent interest compounded semi-annually over a period of five years, and 75,481 shares of common stock with a market value of \$9,157,720, added to the fund by the corporation.

Denver Bank Is Closed

Denver, Colo.—The Bank of Commerce, a state institution, is closed, the seventh Denver bank to close in the last four months.

Find Girl's Headless Body

Media, Pa.—The body of a young woman found near here was identified as that of Miss Anna May Dietrich of Norwood, Pa. The identification was made by her brother-in-law from descriptions of the clothing.

500 Americans to Holy Land

New York.—A party of 500 persons sailed on the steamer Republic for a visit to the Holy Land. Some had sold their farms to raise the necessary \$600.

Job for MacFarlane

The photograph shows Willie MacFarlane, national open golf champion, who this winter is the professional at the Hollywood Golf and Country club, near Miami, Fla., and is overseeing the construction of two new 18-hole golf links, to be among the finest in Florida.

Those old-fashioned dances will be alright so long as nobody suggests we return to wiskers and hoop skirts.

What has become of the old-fashioned soapstone they used to put in the bottom of the cutter on a cold day?

WINTER COLDS ARE DANGEROUS

The serious diseases that develop from simple coughs or colds make them dangerous and they should not be neglected. There is no better remedy for quick relief from coughs and colds than FOLEY'S HONEY AND TAR COMPOUND. "My grandchild could get no relief whatever from a bad croupy cough, until I gave him FOLEY'S HONEY AND TAR," writes Peter Landis, Meyersdale, Pa. Keep a bottle on hand for emergency.—Hite's Drug Store, adv.

PORTO BELLO GOLD

by **ARTHUR D. HOWDEN SMITH**

COPYRIGHT by ARTHUR D. HOWDEN SMITH

GOLD, Jewels, Fights, Buckets of—, well, it's a pirate story and undoubtedly the best one that has come out since Robert Louis Stevenson's "Treasure Island." And the odd fact is that it is founded on that masterpiece of adventure; for Arthur D. Howden Smith, the amazingly clever producer of thrilling romances in his eager moments and of costume novels in his quieter moods, hit upon the unique idea of taking some of Stevenson's characters at periods in their career before "R. L. S." became acquainted with them and of plotting the stirring events that led to the placing of the treasure on the island. The consensus of critical opinion is that "Porto Bello Gold" is a fit companion to the other great story.

Don't Fail to Read This Smashing Serial in

The Charlevoix County Herald

Mebbe a lot of the old boys who are taking up Henry Ford's idea believe it is cheaper to dance than have a monkey gland operation.

Our idea of a mean trick is the neighbor who hired the boy across the street to keep his walks clean while he was spending the winter in Florida.

Years ago they ust to shoot the villain. Now the sob sisters drown him in their tears.

The coal miners and operators ought to be more careful. The first thing they know they won't get the present strike settled in time to start that new one next fall.

Are You All Run Down?

Many East Jordan Folks Have Felt
That Way.

Feel all out of sorts?
Tired, achy, blue, irritable?
Back lame and stiff?
It may be the story of weak kid-
neys!

Of toxic poisons circulating about
Upsetting blood and nerves.
There's a way to feel right again.
Help your weakened kidneys with
Doan's Pills—a stimulant diuretic.
Doan's are recommended by many
East Jordan people:

Delbert Turk, East Jordan, says:
"I had a dull ache in my back and
when I bent over to lift anything,
sharp pains darted across my kid-
neys. I soon became run down, tired
and all out of sorts. My kidneys
were weak and I often had to get up
during the night to pass the secre-
tions. After using Doan's Pills from
the Hite Drug Co., the trouble left."

Bayer Aspirin
Proved Safe

Take without Fear as Told
in "Bayer" Package

Does not affect
the Heart

Unless you see the "Bayer Cross" on
package or on tablets you are not get-
ting the genuine Bayer Aspirin proved
safe by millions and prescribed by
physicians over twenty-five years for

- Colds
- Headache
- Neuritis
- Lumbago
- Toothache
- Rheumatism
- Neuralgia
- Pain, Pain

Each unbroken "Bayer" package con-
tains proven directions. Handy boxes of
twelve tablets cost few cents. Drug-
gists also sell bottles of 24 and 100.

**ROADS WILL FIGHT
WORKERS' DEMANDS**

Carrier's Spokesman Declares
Rights of All Must Be
Considered.

Cincinnati, Ohio.—At a meeting of
general chairmen of the Brotherhood
of Railway and Steamship Clerks,
Freight Handlers, Express and Station
Employees here, it was announced that
railroads will be asked to grant wage
increases running from six to ten
cents an hour to 250,000 railway clerks,
freight handlers and station em-
ployees. It was said that approxi-
mately one hundred railroads would be af-
fected.

Peoria, Ill.—The railroads of the
United States launched an offensive
against any excessive demands for in-
creased wages from their workers.

The alarm was sounded by Samuel
A. Dunn, editor of the Railway Age,
who declared that demands anticipated
from special classes may again make it
imperative that the public consider the
relative rights of railway employees
regarding wages as against patrons
and security owners of the roads. He
intimated that the carriers will oppose
the demands.

This is the first intimation of the
railroad attitude on the subject of
higher wages. Several of the unions
have been considering the matter and
although they have not formally pre-
sented their request, it has been gen-
erally expected that they will ask a
re-establishment of the post-war peak
level.

Although Mr. Dunn is not directly
connected with the railroads, as editor
of the Railway Age he has been con-
sidered the official mouthpiece for the
transportation companies. He spoke
here before the Transportation Club
of Peoria, following the winter meet-
ing of the midwest shippers' regional
advisory board.

"The railway situation in the coun-
try generally, in spite of the inade-
quate return being earned by the west-
ern lines, is now the best since the
war, but the leaders of the railway
labor unions are starting a new wage
movement which will soon make it
necessary for the public to consider
again the relative rights of railway
employees regarding wages, of rail-
way patrons regarding rates, and of
railway security owners regarding the
returns upon their investments," de-
clared Mr. Dunn.

"The facts seem to show," he con-
tinued, "in spite of reductions in
wages since 1920, that railway em-
ployees have since then prospered
relatively much more, and are pros-
pering relatively much more now, than
the railway companies. The employees
are entitled, however, to present their
claims and to have them fully and
fairly considered. Local changes in
wage scales here and there may well
be settled by agreement; but changes
in the wages of large groups of em-
ployees throughout the country, or of
all employees, are a wholly different
matter and should be determined only
by arbitration in which all the facts
and arguments will be publicly pre-
sented."

**Dictatorship Warning
Brings German Peace**

Berlin.—A threat by President von
Hindenburg that if the politicians did
not agree immediately on a cabinet,
a dictatorship would be set up, ended
the long controversy over the German
cabinet. Centrists, Democrats, the
German Peoples' party and the Ba-
varian Peoples' party will muster 170
votes behind Chancellor Luther.

To obtain a majority, the cabinet
must obtain allies from the right or
left factions, as the case may be, on
every decision.

The new cabinet's makeup, besides
Luther and Stresenmann, includes:
William Kuelz, Democrat, minister of
the interior; Peter Heinholt, Demo-
crat, finance minister; Julius Curtius,
German Peoples' party, minister of
economics; Dr. Wilhelm Marx, Cen-
trist, minister of justice; Karl Stingi,
Bavarian Peoples' party, minister of
posts and telegraph; Dr. Otto Gessler,
Democrat, minister of war; Dr. R.
Krohne, German Peoples' party, min-
ister of traffic; Dr. Heinrich Brauns,
Centrist, minister of labor.

Ex-Star of Yale Is Dead

New York.—John C. Greenway,
member of the same Yale football
team on which the late Frank High-
ley played, died after an operation
in Roosevelt hospital. Greenway, who
was fifty-three years old, also caught
for the Yale baseball team, having
been an All-American choice in 1894
and 1895.

\$165,000,000 Asked

Washington.—The Elliott bill to pro-
vide \$165,000,000 for the construction
of public buildings was approved by
the house public buildings committee.

Asks U. S. to Passport Parley

Geneva.—The United States has
been invited by the League of Nations
to attend the international confer-
ence to reduce passport and visa com-
plications to be held at Geneva May
12.

Indians Worth \$1,500,000,000

Washington.—Indians in the United
States own property worth \$1,500,-
000,000, the Interior department re-
ported. Forty-one Indians have bank
accounts of \$200,000 or more.

**Develop Better
Oat Varieties**

Crop Has Been Materially
Increased in West in the
Last Decade.

(Prepared by the United States Department
of Agriculture.)

The oat crop of Iowa and Illinois
and some other Corn Belt states has
been increased materially in the last
decade by the use of several new high-
yielding varieties developed by the
Iowa state experiment station in co-
operation with the United States De-
partment of Agriculture. Four of the
new varieties are discussed in Depart-
ment Bulletin 1343, just issued by the
United States Department of Agricul-
ture.

The four varieties are Albion (Iowa
No. 103), Richland (Iowa No. 105),
Iowar, and Iogren. Albion was devel-
oped from a single plant selected from
Kherson in 1906. Owing to the de-
mand for an early variety with white
kernels, even though Albion did not
show superiority in yield to Kherson,
its distribution was begun in 1913.
The variety immediately became popu-
lar, and it was estimated that nearly
1,500,000 acres were grown in the
Corn Belt in 1919, while in 1924 al-
most this acreage was grown in Iowa
alone.

Richland for Rich Soils

Richland, an early yellow oat, is a
companion strain of Albion and has
about the same history. It was se-
lected from Kherson in 1906, primarily
because of its short, stiff straw. It
was first distributed in 1914. In yield-
ing power it is superior to both Kherson
and Albion, and because of its short
straw it is especially recom-
mended for growing on rich soils
where taller varieties frequently
cause partial loss of the crop by lodg-
ing.

Iowar was selected in 1911 from
Kherson and differs from Albion in
having a taller culm and in being a
little later in maturity. It is superior
in yielding power to Kherson and Al-
bion. It was first distributed in 1919.
Iowar is the most promising of the
three early varieties here discussed
and already has attained a wide dis-
tribution in Iowa and adjoining states.
The variety probably will replace Al-
bion to a considerable extent because
of its higher yielding ability and its
taller straw.

Iogren is High Yielder.

Iogren, a selection from Green Rus-
sian, was increased from an original
plant selection made in 1910. The
variety was first distributed to farmers
in 1922. Iogren has been markedly
superior in yield to the parent, Green
Russian, and it is believed will ulti-
mately largely replace that variety in
northern Iowa. Of all the varieties
grown in the experiments at Ames,
Iogren has been the highest yielder.

Albion, Richland and Iowar have
been most promising in states other
than Iowa in those sections where the
parent sorts, Kherson and Sixty-Day
have been the leading varieties. Since
in such areas the selections usually
slightly outyield the parent varieties,
they may profitably be substituted
where Kherson or Sixty-Day is grown.
A copy of the bulletin may be ob-
tained as long as the supply lasts by
writing to the United States Depart-
ment of Agriculture, Washington, D. C.

**"Warble Fly" Expensive
Bug to Cattle Breeder**

American farmers pay \$50,000,000
each year in beef, milk and hides be-
cause of the "warble fly," according
to the United States Department of
Agriculture educational film "The Ox
Warble—a Fifty-Million Dollar Tune."

The warble as an adult is an inno-
cent-looking fly which alights on the
legs of cattle and lays its eggs. The
microscopic grubs that hatch from the
eggs burrow through the hide and
work their way to the animal's gullet
and thence to the back, where they be-
come full sized. They perforate the
hide and drop to the ground to go
through certain changes of form, then
emerge as adult flies and begin the
cycle all over again.

Often as many as 200 grub holes
will be found in a single hide, and the
total damage to hides alone is tremen-
dous. The presence of the grubs also
causes the animals to lose weight
and keep down milk production.

Actual photography and animated
drawings trace the life history of the
insect, and methods of controlling the
pest are emphasized in the Depart-
ment of Agriculture film.

**Soy Beans Satisfactory
for Egg-Producing Hens**

Soy beans proved a satisfactory sub-
stitute for meat scrap for laying hens
at the Missouri experiment station.
The basal mash consisted of equal
parts of bran, shorts and corn meal.
To this was added 30 per cent soy-bean
meal and 5 per cent mineral, the re-
maining 85 per cent consisting of the
original mash. The results of a two-
year period have been very satisfac-
tory.

When soy beans are used in the pou-
ltry mash, the mineral supplement is
very essential. In pens where no min-
eral was used, the production was only
70 eggs per hen per year. The mineral
is not expensive, being composed of
one pound of salt and four pounds of
ground bonemeal. All pens had access
to oyster shell and grit.

Because the soy beans are lower in
protein content than meat scrap, it is
considered necessary to substitute one
and a half pounds of soy-bean meal
for each one pound of meat scrap.

**Cause of Much
Loss of Swine**

Mange Prevalent in Some
Sections of Country, Ac-
cording to Reports.

Mange in swine appears to have be-
come prevalent again, according to in-
formation from several live stock
centers. Unfortunately for the in-
dustry, the parasite which causes this
disease is never quite absent from
American farms, but there are times
when it is more common than others.
Strictly, it is not a difficult pest to
control, but a few simple facts must
be grasped by farmers if the live
stock and meat industry is to avoid
the heavy losses that always follow
the marketing of mangy hogs.

Two Forms of Losses.

The losses really take two forms.
First, there is the well-known fact
that mangy hogs are always unthrifty
because of the restlessness which fol-
lows the irritation and unthriftiness
never really pay for the feed and labor
given them. Secondly, there is the
actual damage caused, not to the
meat, but in the loss of it, owing to
the necessity in the packing house of
cutting off the affected skin so deeply
that the salability of the meat cuts
is seriously reduced. As the mange
parasite always attacks hams and bel-
lies, it is seen that some of the most
valuable parts of the meat may be
spoiled by undesirable incisions.

Not Hard to Prevent.

Yet, in reality, the disease is not
considered difficult to control, or
rather to prevent. The Illinois College
of Agriculture, which has made a
study of the pest, states that it is
due to small parasites which first in-
vade the softer part of the skin,
around the eyes and ears and gradu-
ally extend to various parts of the
body. As the trouble progresses the
skin contracts into wrinkles and soon
becomes thick and scurvy-like, with,
very often, deep crevices. It is this
condition which causes the loss. The
meat itself is not generally affected
in quality, but these crevices and
wrinkles cause such an irregularity
and undesirable appearance in the
outer form that large parts may have
to be cut off, thus spoiling the con-
formation of cuts for the retail trade
and resulting in quite a drop in price.
In extreme cases the disease may re-
nder the whole animal unsuitable for
food purposes.

But it must be understood that
mange is a skin disease; hence it can
easily be cured or prevented by out-
side means.

**Close Watch Important
for Vegetables Stored**

Vegetables in storage for the winter
must be carefully guarded against
sudden changes in temperature, warns
C. H. Nissley, vegetable specialist of
the New Jersey extension service.

"Keep the ventilators open when-
ever the outside temperature is lower
than the inside temperature, unless
there is danger of freezing. Keep the
temperature as near 34 degrees to 38
degrees as possible, except for pota-
toes, pumpkins, and sweet pota-
toes, which need a warm room—55
degrees to 65 degrees. For apples
30 degrees to 32 degrees is desirable.
"The atmosphere in the storage
should be damp to prevent shriveling.
An earthen floor is best. Sprinkle
concrete floors every day or so, or
cover with a layer of earth or sawdust
which may be dampened occasionally.
Keep the storage room as dark as pos-
sible by shading the windows from the
outside in such a way that light
will not be admitted when they are
opened.

"As the weather continues to grow
colder, the root crops buried in the
outdoor pit should receive more pro-
tection by putting on another layer of
straw or hay and a layer of earth
thrown on top."

**Soy Beans Add Minerals
to the Poultry Ration**

Now that it has been proved that
the addition of minerals to the pou-
ltry ration makes vegetable protein al-
most as effective in the ration as
animal protein, poultry keepers are
using more and more of such feeds
as cottonseed meal, soy beans, etc.
In some sections, these are truly econom-
ical additions to the ration as substi-
tutes for meat scrap. Experiments
recently made at the poultry depart-
ment of the Missouri State university
at Columbia indicate that soy bean
meal can be successfully used up to
30 per cent of the mash mixture when
5 per cent of a good mineral mixture
is included. The mineral mixture
recommended by Professor Kempster
is one pound of bone meal. In addi-
tion the fowls, of course, have access
regularly to oyster shell and grit in
hoppers.

**Dairy Ration When Corn
Fodder Is Only Roughage**

The following ration has been found
very desirable for dairy cows when
corn fodder is the only roughage to be
had: Ground corn, 400 pounds; ground
oats, 200 pounds; wheat bran, 300
pounds. This mixture should be fed at
the rate of one pound per day for each
two to four pounds of milk produced.
If clover is available it would not be
necessary to purchase the bran and oil
meal for a mixture of 600 pounds
ground corn and 400 pounds ground
oats fed at the rate of one pound for
each two or three pounds of milk pro-
duced makes a very good ration with
clover hay.

**Marketing Aids
Used by Farmer**

Good Evidence That Better
Business Methods Are
Being Employed.

(Prepared by the United States Department
of Agriculture.)

There is every evidence that farm-
ers generally are using better business
methods in handling and marketing
their products, the bureau of agricul-
tural economics points out in its an-
nual report to the secretary of agri-
culture. "This is shown," says the re-
port, "in the manner in which farmers
have rebuilt their business from the
depression of five years ago. It is
shown, also, by the steadily increas-
ing call for information on standardiza-
tion and inspection of farm products,
farm management, credit facilities,
and both domestic and foreign market
news."

is a Service Bureau.

The bureau is organized to obtain
by research and investigation facts on
practically all phases of the economics
of agriculture from problems in farm
management to the final distribution
of agricultural products to consumers.
It is essentially a service bureau to
give farmers the best available infor-
mation on these subjects.

Federal standards are now in use for
82 leading fruits and vegetables, 8
grains, 7 varieties of hay, cotton, wool,
tobacco, butter and eggs, and for a
number of classes of live stock and
dressed meats. The American cotton
standards are now used throughout
the world, and the bureau is endeavor-
ing to effect similar uniform stand-
ards for wool.

Market news reports on shipments,
supplies and prices of farm products
in the leading market centers are used
by farmers everywhere, a nation-wide
service on collecting and disseminat-
ing this news by telegraph and radio
having been organized. The bureau
operates the largest government leased
wire circuit in the world in connec-
tion with this service.

Much Help to Farmer.

Facts provided farmers on the out-
look for specific farm crops, it is con-
sidered, have done much to enable
them to plan their operations. The
pig surveys by the bureau have been
used widely in an effort to reduce the
ups and downs in the hog industry.
"Special effort is made in the mar-
keting work of the bureau to deter-
mine the kinds, quality and quantity
of products which are and which
should be offered for sale. In the
process of distribution questions of
standardization, packing, assembling,
transporting, warehousing, financing,
and finally of retailing all call for spe-
cial studies and services.

"Without broad information in re-
gard to general economic conditions,
the farmer is not able to meet the
changing conditions in domestic and
world markets. Hence the need of
closely co-ordinating the facts of na-
tional and world production, move-
ments and prices for the purpose of
providing a basis upon which farmers
may plan their programs of work."

**Alfalfa Proven Success
as Protein for Cows**

Alfalfa is no longer an experiment;
it is a proven success. With alfalfa
the dairyman has good financial pos-
sibilities, but without it the future
holds but little hope. Few as yet
really appreciate alfalfa or they would
be growing a larger acreage of it. Al-
falfa yields twice the tonnage of other
hays and several times the amount of
protein. Rightly handled it does not
need to be seeded nearly as often. In
total feeding value it is surpassed
only in yield by corn silage and the
two should go hand in hand as one
balances the other. They are by far
our most profitable crops, although
sweet clover pasture and corn for
hacking are likewise profitable.

Alfalfa will do well on any good
corn soil that is well drained and sup-
plied with lime. Land manured for
corn the previous year is preferable.
Fall plowing insures a firmer seed
bed and is to be preferred for seeding
down. Rolling of spring plowing is
next best. In any case it will pay to
fit the soil well.

If the soil lacks lime, and a test
will show whether it does or not, the
lime can be applied any time after
plowing in the fall, winter or spring.
Later it should be disked in.

**Easiest and Humane Way
to Dehorn Young Calves**

The easiest and most humane way
to dehorn calves is by the use of stic-
caustic potash when they are but a
few days old.

When the calf is four to seven days
old the hair over and around the knobs
that later produce horns is clipped
close. The moistened end of a stick
of caustic potash is then rubbed over
the horn until a spot about the size of
a dime becomes raw.

Grease may be applied to the outer
edge of the spot to prevent spread of
the caustic and making the sore larger
than necessary.

The calf should be kept in the dry
for a few hours after the treatment.
Following the successful application
of the caustic a scab will form over
the knob and drop off in a few days.
Stick caustic potash can be procured
at a drug store for a few cents and
may be kept for some time in a tightly
stoppered bottle. While handling the
caustic it should be wrapped in paper
to prevent injury to the hands.

"The Bank With The Chime Clock."

It's here! The great novel of the Spanish main—"Porto Bello Gold" by Arthur D. Howden Smith. Watch for it in the next issue of the Charlevoix County Herald.

Even at that we'd rather see some folks do their kicking in a Charleston than the way they do now.

"Treasure Island" is the sequel to "Porto Bello Gold," only Stevenson wrote the sequel first and Arthur D. Howden Smith wrote the preface story last. It begins in the next issue of The Charlevoix County Herald.

YOUNG WIFE AFRAID TO EAT ANYTHING

"I was afraid to eat because I always had stomach trouble afterwards. Since taking Adlerika I can eat and feel fine" (signed) Mrs. A. Howard. One spoonful Adlerika removes GAS and often brings surprising relief to the stomach. Stops that full, bloated feeling. Removes old waste matter from intestines and makes you feel happy and hungry. Excellent for obstinate constipation. GIDLEY & MAC, Druggists. adv.

Spell "Michigan" Out In Licenses

Preparation for the manufacture of probably 1,200,000 sets of Michigan license plates for 1927 are being made by officials of the Michigan state prison, it was announced by Warden H. H. Jackson recently. Approximately 1,000,000 sets of 1926 plates have been made, he said, and additional orders are expected to swell the total past the million mark.

The 1927 plates will be of uniform size for both passenger and commercial vehicles, according to the warden, a new design prepared by prison draughtsmen having been accepted by the secretary of state. The name "Michigan" will be spelled out at the bottom of plate instead of appearing in an abbreviated form at the side leaving more room for the numerals. The legend on the plate will be black with the background orange.

New machinery installed in the prison stamping plant will reduce production costs materially, Warden Jackson stated.

Briefs of the Week

Russell Barnett is at Grand Rapids on business this week.

Edmund G. Bogart was at Detroit on business this week.

Mrs. Rose Gardner of Cadillac is here visiting friends.

Barney Milstein was at Traverse City on business this week.

Valentines are here 1 cent to 15 cents Eff an Dee Variety. adv.

Miss Keitha Barnett left Monday for a visit at Grand Rapids and Belding.

Percy LaLonde left Tuesday for Flint, where he will seek employment.

Mr. and Mrs. Harry Kleinhans of Boyne City visited friends here Tuesday.

Earl J. Hager returned home last week from Jackson, where he has been employed.

Born to Mr. and Mrs. Charles H. Dennis, a daughter—Jean Christine—Jan'y 23rd.

Be sure and read the large display "ad" of the Eff an Dee Variety in this issue. adv.

Mrs. L. A. Hoyt returned home Monday from a visit at Detroit, Chicago and other points.

Do you make Paper Flowers? All the materials for making at Eff an Dee Variety. adv.

Mrs. Mary Seymour of Charlevoix is here visiting at the home of Mr. and Mrs. Ed. Ager.

Mr. and Mrs. Dan Goodman are at Grand Rapids and other points on business this week.

Mrs. Isa Alward of Ellsworth was here this week visiting her mother, Mrs. Chas. Smith.

Mrs. Elias W. Giles and daughter, Miss Laura, are in Detroit this week visiting relatives.

Mrs. Wm. Carey of Central Lake is here this week visiting her daughter, Mrs. Russell Barnett.

Miss Rosabelle Danto has gone to Detroit, where she is teaching History in one of the High Schools there.

Miss Delia Lenosky, who is a nurse at the Charlevoix hospital, visited her parents here over the week end.

James Smith who has been employed at Muskegon for several months, returned to his home here, Monday.

Robert Gunsolus returned Tuesday from a two weeks visit with his daughter, Mrs. Frank Bird, at Charlevoix.

Mrs. Esther Bliss returned to Buffalo N. Y., Friday, after a visit here with her parents, Mr. and Mrs. W. P. Porter.

Wallace McPherson, son of Mr. and Mrs. Wm. McPherson of this city, was united in marriage to Miss Leona Benn of Onaway Dec. 12th.

Chas. A. Hudson returned Monday from Grand Rapids, where he has been the past few weeks taking treatment at the Burselon Sanitarium.

Born to Mr. and Mrs. Dewey Hosler, at 2708 Clay Ave., Detroit, a son—Clifford Raymond—Jan'y 19th. Mr. and Mrs. Hosler were former East Jordan residents.

Mr. and Mrs. Wm. McPherson with son, Wallace McPherson and wife, returned to their home here last week from Onaway, where the gentlemen have been employed.

Mrs. Herman A. Goodman, who was removed to a Petoskey hospital a fortnight ago, underwent an operation for goitre at that place last Friday, and is reported to be convalescing nicely.

Remember "Treasure Island?" Read "Porto Bello Gold" and learn of the thrilling events which took place before the action of Stevenson's classic starts. It begins in the next issue of The Charlevoix County Herald.

Carlton Bowen, Jasper Stallard and Virginia Pray are East Jordan students on the honor roll at the Mt. Pleasant Normal for the fall term. The roll includes the names of those students who earn eight or more honor points. Eight points mean a B average.

Clarence LaLonde of Detroit, Miss Beasie LaLonde of Grand Rapids, Miss Agnes of Flint, Mrs. Russell Dean of Flint, Mrs. A. W. Carr of Grand Rapids, and Albert LaLonde of Grand Rapids were called here first of the week by the serious illness of their mother, Mrs. Anna LaLonde.

Fire of undetermined origin Tuesday morning leveled the Hannah & Lay company grist mill, a Traverse City landmark situated on the Boardman river in the heart of the city. The loss was estimated at \$75,000, partly covered by insurance. Fed by the old-fashioned white pine, so plentiful in this section when the mill was erected in 1868, the flames shot one hundred feet in, endangering surrounding business blocks.

John Porter returned Monday from a business trip to Detroit.

"Fifteen men on a dead man's chest, Yo ho, and a bottle of rum."

Proponents of world peace should not get discouraged. Just look at Ireland.

What has become of the old-fashioned girl who was glad to get one afternoon off a week?

Everything for the Party. Place Cards, Tally Cards, Score Cards. Eff and Dee Variety. adv.

Mrs. John Whiteford returned home Wednesday from a three weeks' visit with relatives at Traverse City.

WANTED—A girl to assist with housework and care of child afternoons, either with or without board. MRS. JOHN PORTER. 5-2

Sometimes we wonder what a lot of folks are going to do if prohibition and modernism vs. fundamentalism should ever happen to get ironed out.

Mr. and Mrs. Frank Kiser and family returned home this week from Onaway where they have been located for several months, where Mr. Kaiser has been employed.

Dead men tell no tales. But Arthur D. Howden Smith tells a very live and startling one—"Porto Bello Gold," starting in the next issue of The Charlevoix County Herald.

Dennison's Flower Making Materials at Eff an Dee Variety. adv.

Read "Porto Bello Gold" for the blood-curdling romance of swash-buckling pirates written in many years. You'll eat up every word of it. See the next issue of The Charlevoix County Herald.

Somebody has figured out that the average married woman cooks fifty thousand meals during the course of her married life. The figures were taken from the years before the can-opener became so popular.

MARY PICKFORD in "TESS OF THE STORM COUNTRY"

Sunday-Monday, Jan. 31-Feb. 1.

Temple Theatre

TEMPLE THEATRE

Program for week beginning Saturday, Jan'y 30

SATURDAY, January 30th
WM. DESMOND in
"BIG TIMBER"
A Tremendous Story of Life in the Great Pine Country. Thrills, Laughter, Romance galore. A he man picture.
Comedy—"NOBODY'S SWEETHEART."
Admission—10c and 25c

SUNDAY and MONDAY January 31 and Feb'y 1
MARY PICKFORD in
"Tess of the Storm Country"
Mary, a girl again as the quaint and lovable Tess in rags and tatters and rubber boots, but always smiling her child smile. A picture so gripping that it hurts; so superb that it awes; so marvelous that it leaves one breathless. We cannot say enough for this picture. See it.
FOX NEWS REEL
Admission—10c and 25c

TUESDAY, Feb'y 2nd FAMILY NIGHT
2 ADMISSIONS FOR THE PRICE OF 1 WITH MERCHANT'S TICKETS
"APRIL SHOWERS"
Starring Colleen Moore and Kenneth Harlan
"April Showers" will tickle you pink. A drama with a big fight.
Starting "The Great Circus Mystery"
Featuring BONOMO (The world's strongest man) with Louise Lorraine.
Admission—10c and 25c

WEDNESDAY and THURSDAY, Feb'y 3rd-4th
RICHARD DIX in
"A MAN MUST LIVE"
Supported by JACQUALINE LOGAN, EDNA MURPHY
Richard Dix comes through like a million in this one. This is a real picture.
Western Comedy—"BASHFUL WHIRLWIND"
Admission—10c and 25c

FRIDAY Feb'y 5th
Band Concert by E. J. H. S. Band
Photoplay—"WHITE FANG"
Starring STRONGHEART the wonder dog.
Admission—10c and 25c

The Masons and Eastern Stars are giving a party at their hall, Tuesday evening, February 2nd, at 7:30 o'clock. Music, cards and eats. All members are urged to attend.

STATE NEWS IN BRIEF

Memore—The board of education has authorized Charles W. Crandell, superintendent of public schools, to install the Educational Thrift bank system of Ypsilanti in the local schools. Danard's bank will be used as a depository.

Lansing—The Iron Mountain Gas Co. will be permitted to issue \$100,000 in bonds to rebuild its plant and extend its service, members of the state public utilities commission indicated. The necessity for expansion was attributed to growth occasioned by the location of a Ford industry near Iron Mountain.

Wyandotte—An association of justices of Wayne county outside of Detroit will be organized at a meeting called for the purpose by Justice John R. Valois, River Rouge, to be held at Highland Park, January 27. The purpose of the association is to get acquainted in a business and social way and to discuss the various problems that may arise in the different portions of the county.

Lansing—The city of Onaway is threatened with one of the most tragic evacuations in Michigan history, according to state employes and others who have visited the town since its major industry, The American Wood Rim company, was destroyed by fire recently. Its population, which was well above 2,000, already has dwindled materially. Scores of families are packing their belongings preparatory to moving, it was said.

Jackson—Chairman H. L. Potter, of the Republican State Central committee, knows nothing of any move to oust Milton Carmichael of Detroit, as secretary of the committee, he said. A dispatch declaring that Potter will call a meeting of the commission for the purpose of removing Carmichael and restoring Dennis E. Alward of Lansing, secretary of the state senate, as state central committee secretary was not substantiated by the state chairman.

Lansing—The De Land-Rogers-Colgrove highway finance controversy continues unabated. DeLand, secretary of state, recently attacked Judge Colgrove, of Hastings, president of the Good Roads commission, for suggesting an increase of the gasoline tax with retention of the present weight tax scale, and assailed Rogers, highway commissioner, for wasteful spending of the state highway monies. DeLand declares that automobile owners are now burdened to the limit with highway taxes.

St. Joseph—St. Joseph took the first steps to carry out the State's wishes with reference to sewage disposal, when the city council authorized the city engineer, James Hampton, to make a preliminary survey and draw up estimates of the cost of a modern sewage disposal plant. The action followed a report by Ald. Dan T. Hadder, who represented the city at the sanitation conference in Lansing recently. Benton Harbor has not acted as yet and St. Joseph will go ahead independently of her sister city.

Ferndale—Officials of Royal Oak, Ferndale, Pleasant Ridge, and other towns and villages along Woodward avenue as far north as Pontiac, will hold a joint meeting in Ferndale soon with representatives of the Detroit Motorbus and Star Motorbus companies, to hear proposals for additional transportation between the cities and towns. The plans will be presented to the Michigan state public utilities commission in Lansing, January 28. The proposed line will run from the Windsor ferry to Pontiac.

Lansing—It appears probable that Governor Alex Groesbeck will call a special session of the legislature, possibly in February, to strengthen his political position in the state and provide a grand finale to his third term as another election draws near. It was announced in the attorney-general's department that action by the legislature will be necessary to consummate the deal with the Grand Trunk railroad whereby the road surrenders its right of way paralleling Woodward avenue. This will be used as an excuse for the call.

Royal Oak—James D. Newsom, 26 years old, 1118 Longfellow avenue, Royal Oak, has been appointed director of finance by the Royal Oak commission, for a term of one year. As director of finance, Newsom will take over duties which were assumed last year by the mayor and city treasurer and his first task will be to present a budget for 1926. Newsom was born in Olney, Ill., graduated from Detroit City College, is a World War veteran and at one time was purchasing agent for the Concrete Steel company, of Detroit.

Big Rapids—An improved water supply for Big Rapids and a modern method of sewage disposal, the latter costing \$200,000, are two problems before the city commission. The commissioners have been informed that Muskegon River water is unsafe for domestic use. They may go to Belding to inspect the water works system there. Independent sewers, which empty into Mitchell Creek and the Muskegon River, must be united by an intercepting sewer leading to a disposal plant if the city is to comply with State requirements.

Thinning Improves the Farm Woodlot

Winter Is Season to Get Out Defective Trees.

Nearly every farm woodlot can be improved by the removal of dead, dying and defective trees, and some of the less valuable kinds as well. The foresters at the New York State College of Agriculture at Ithaca make this statement and say that this work can best be done in the winter months when other work is slack. Winter is also the best season of the year at which to cut timber, since those species which sprout naturally from the stump will do so vigorously in the spring. The work of chopping and handling logs likewise is much easier in winter.

The way to go about making these cuttings follows: First, remove all dead and dying trees, or those which are suffering from disease or insect attack. Second, remove those which are crooked and defective, or which may be hindering the growth of others more valuable.

It should, of course, be kept in mind that the stand of trees is not opened up to such an extent that grass and weeds will grow where young trees should be growing. In other words, the "crown cover" should be kept so that about one-half shade will be provided. Nearly all species of trees will reproduce naturally without special effort, and a second crop should be obtained without any difficulty.

In the case of failure from this source, it is possible to plant young nursery trees to take the place of those cut.

If there is no local market for the material removed from the woodlot, it is always possible to convert it into firewood with a small portable buzz saw. Cordwood has been commanding a good price in nearly all parts of the country this year.

The college of agriculture will be glad to send bulletins describing in more detail the work of thinning.

Cream Layer on Bottled Milk Will Vary Much

Some conclusions regarding the effects of various factors on the creaming ability of market milk have been drawn by the United States Department of Agriculture and the Minnesota state board of health as a result of an experimental study of the different methods of pasteurizing, cooling, storing, and handling market milk. A discussion of the results of the study has been published in Department Bulletin No. 1344 which has just been issued and is now ready for distribution.

In the pasteurization of milk, some difficulty has been experienced with variations in the depth of the cream layer on bottled milk. A uniform and satisfactory cream layer is regarded as of great commercial importance because of the housewife's habit of judging the richness of milk almost wholly by the depth of the cream layer rather than by the butterfat content as determined by laboratory test. The study has indicated that the cream volume varies with various methods of processing, sometimes as much as 80 per cent.

A study of the results of the test conducted to show the effect of the various milk-plant practices on the cream volume should be of value to the plant operator in determining how he can best secure a satisfactory cream layer. A copy of the bulletin may be secured free of charge, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

Permanent Tame Pasture Returns Most Net Money

We have been finding out lately that permanent tame pastures return more net money than most of the acres that are cropped.

Alfalfa is the most permanent if the grasses are kept out. If one wants to treat it as a cash crop, it is good for around \$60 a year counting on three tons of \$20 hay.

The acreage of alfalfa in some sections has increased a thousand per cent in the last year. Some of the store-box gentry allow that in a year or two alfalfa hay won't be worth cutting. It was ever thus. One banker made a pretty apt reply to this objection when he said:

"Well, sir, maybe alfalfa will be cheap enough then so you can afford to feed it to your cows." Making long-time investments such as growing alfalfa is generally a mark of shrewdness.

FARM FACTS

The most effective method of riding cattle of lice is by dipping.

The wise farmer will keep his eyes on the wheat market of the world.

Help the valuable birds through the winter. They will repay for your kindness next summer.

If you are not receiving the benefits of a systematic rotation now is the time to plan one.

To adjust production to the demands of the market is the pertinent problem of farm management.

Scales have proven their value in the feed rooms, in the cow stables and many other places on the farm. Do you have them working for you?

Only Two Cases of Chicken Pest

Losses in All Instances Have Been Caused by Common Ailments.

(Prepared by the United States Department of Agriculture.)

Fear of recurrence of European fowl pest, which appeared in the United States for the first time about a year ago, has caused many poultrymen in the Central West to feel alarmed at any sign of sickness among their birds. Numerous investigations have been made by representatives of the United States Department of Agriculture during the past two months at the request of poultrymen in these states. In all instances the findings have been that the losses, which in a few shipments have been quite heavy, have been caused by some of the common ailments, such as roup, or by diet disturbances, apparently the result of hardships attending the transportation of birds, aggravated by improper feeding and confinement in insanitary quarters.

Only Two Outbreaks.

Only two outbreaks of fowl pest have occurred since last spring, one in New York and the other in Delaware. In the former state the disease made its appearance about July 1 in a flock of 900 chickens near East Hampton, on Long Island. In the latter state about 200 chickens on a farm near Dover were involved early in August. The usual slaughter and disinfection methods were employed in combating these outbreaks and there has been no subsequent spread.

While the department does not wish to minimize the importance of watchfulness for fowl pest by the poultry raiser, it is desirous of impressing on those engaged in concentrating and distributing poultry the importance of maintaining their plants and equipment in a sanitary condition and improving their feeding practices. Some progress has been made, says the department, but much remains to be done. Many of these common ailments which have worried the poultrymen might largely be avoided by exercising greater care to create sanitary conditions and to adopt approved methods of feeding.

Keep Close Watch.

Veterinary inspectors employed at the department's substations maintained for animal disease and meat inspection work in each of the chicken-raising states are keeping in close touch with the producers, distributors, and slaughterers of poultry. When any unusual losses are reported to the bureau of animal industry of the department, employees experienced in poultry disease work are detailed to investigate. The bureau is prepared to act quickly in the event there should be a recurrence of either fowl pest or infectious bronchitis.

Ration Largely of Corn Not Favored for Sows

Practical feeders and breeders have known for a number of years that brood sows, when fed on a ration composed largely of corn, have not produced thrifty, healthy litters. The young from such animals have been weak, unthrifty and very unsatisfactory in the breeding pen or fattening lot. This can be accounted for due to the fact that corn is rich in carbohydrates and fats and contains but a small quantity of protein and very little ash. On the other hand, brood sows that are fed on corn which was supplemented by high-protein feed stuffs such as tankage and alfalfa hay, farrow strong vigorous young. This is not due solely to the protein feed which is added, but is also due to the fact that these high-protein feeds carry a large percentage of mineral matter or ash. The better informed breeders realize that it is impossible to raise pigs profitably unless their corn ration is supplemented with these high-protein feeds, which provide more mineral matter than they get in their ordinary grain ration. Most swine feeders use mineral feeds with their fattening herd.

Winter Pasture for Sows Will Benefit Youngsters

Brood sows can make excellent use of pasture in the winter time. Perhaps the statement winter pasture sounds somewhat peculiar because we are in the habit of thinking of pastures as being useful in the summer time only, but rye, oats, wheat, barley or rye can be used to as good advantage as winter pasture. The cows can get out on warm, sunny days, will be able to obtain some green feed and take exercise which is very important.

A brood sow upon good pasture before she farrows will never have weak and hairless pigs. A brood sow should have from one to two pounds of grain for every one hundred pounds live weight, with good pasture or hay through the winter before the pigs are born.—B. W. Fairbanks, livestock specialist, Colorado Agricultural college.

Elements for Alfalfa

Since alfalfa when inoculated can gather its nitrogen from the air, a sound policy is to supply it with the other mineral elements in a commercial form rather than through manure, because the manure can usually be used more profitably on other fields which need nitrogen. Nevertheless it is very important to apply manure to alfalfa is seeded.

Money, Brains or Love?

By THOMAS ARKLE CLARK, Dean of Men, University of Illinois.

MARY CURTIS was acknowledged to be the prettiest girl in town, when I was a boy. I did not myself enjoy the privilege of urban life, living instead on a farm some distance out, and so viewing the town maiden with some degree of awe and admiration.

Mary was the popular citizen from the moment she entered high school. Her father was by no means affluent. He did, in fact, operate the village hardware store, but Mary was his only child and upon her he lavished the results of his limited gains from disposing of base burners and shingle mills, and garden tools. Mary had the clothes, and the curly locks, and the pleasant smile, and an eye out for the main chance. All the fellows were crazy about her.

She got through high school without any permanent emotional entanglements, and she was well on in college before she actually had to say yes or no to any matrimonial proposal. Whenever she had seen an offer of marriage coming her way she had always been able to duck or to sidestep the encounter. When she was a senior she had a dozen admirers at least, but there were three with whom she ultimately realized she would have to settle. They meant to have a decision.

Clayton was the brainiest man in college. If keenness of mind and an ability to solve a difficult problem when it presents itself count for anything, then Clayton would be heard from some day. But he was cold, he was self-centered, he was personally ambitious, and he had little more than future prospects. He was not an interesting lover.

Jordan loved her to distraction and unwisely let her know it. He was the most unselfish, the most popular, and the most likable man in college, but he was poor, desperately poor. Whoever married him would have to start humbly and be satisfied, at first at least, with hard work and love.

Martin was more or less of a non-entity, but he had money. He was uninteresting and stupid, but he dressed well, he sent her flowers and took her riding and she knew he could give her a beautiful home, good clothes, motor cars, and an easy, comfortable life.

Brains, money, love—which should she choose? She didn't hesitate long. Shortly after she got out of college she married Martin and he took her to the big ugly house which he had built for her.

I see her often, and I wonder some times if she ever regretted the choice she made. She has grown rather stout; the corners of her mouth droop; her face shows a rather dissatisfied, discontented mind. She's hard to get on with, the neighbors say. She has found Martin stupid, and she's discovered that money, after all, isn't everything. I wonder if she doesn't sometimes think regretfully of the day when Jordan told her that he loved her and when she refused him, for Jordan got on very well and he is said to have the happiest home in town.

DIPPING INTO SCIENCE

London Bridge

There have been many "London Bridges." Several wooden structures preceded the stone one erected in 1176 A. D. It was famous for 650 years. It had 18 solid stone piers within 900 feet. The present granite bridge was opened by William IV in 1871. It is 54 feet wide and 920 feet long.

Knowledge and Practice

A wise man not only knows when to keep still but does it.—Boston Transcript.

Off-the-Side Trims Continue in Favor

Ribbons, flowers and plumage continue to drop from the side of the hat shouldered. Because the milliner has an eye for lines of beauty, this style of trimming has been revived with renewed interest for this spring. Then, too, the big argument in favor of these side-drop trimming effects is, that they are very becoming.

Many of the lovely pastel-colored belting ribbon trims, which are a much-heralded vogue for this spring, feature the flattering off-the-side trim. The hats in this picture present charming versions of the graceful-to-the-shoulder side-trims. In the one instance the toque is satin with uncut velvet ribbon looped to charming grace. The other model is one of those smart crocheted straws. Its color is blond and the rosetted bow, with shash ends falling to the shoulder, are in a bright amber shade.

Gay colored felts with pendant trimmings of flowers in match shade, are greatly in evidence at southern resorts.

Efficiency Boss

Herbert D. Brown is chief of the government's bureau of efficiency and makes it his daily business to tune up government machinery so that it will operate more smoothly and economically. He spends an appropriation of \$150,000 a year and invites congress to cut off the money whenever he falls to save one hundred times that amount.

Lively Corpse

A woman, whose husband had just died, went to a village store to buy a burial shroud. The storekeeper showed her one, naming the price. "I can go to the next village and get one for half the price," protested the widow. "Yes," was the retort, "and the corpse will have his knees through in a week."

Ouch! Lumbago Pain! Rub Backache Away

Instant Relief with a small trial bottle of old "St. Jacobs Oil."

Kidneys cause Backache? Not They have no nerves, therefore can not cause pain. Listen! Your backache is caused by lumbago, sciatica or a strain, and the quickest relief is soothing, penetrating "St. Jacobs Oil." Rub it right on your painful back, and instantly the soreness, stiffness and lameness disappears. Don't stay crippled! Get a small trial bottle of "St. Jacobs Oil" from your druggist and lumber up. A moment after it is applied you'll wonder what became of the backache or lumbago pain. Rub old, honest "St. Jacobs Oil" whenever you have sciatica, neuralgia, rheumatism or sprains, as it is absolutely harmless and doesn't burn the skin.

PUT CREAM IN NOSE AND STOP CATARRH

Tells How To Open Clogged Nostrils and End Head-Colds.

You feel fine in a few moments. Your cold in head or catarrh will be gone. Your clogged nostrils will open. The air passages of your head will clear and you can breathe freely. No more dullness, headache, no yawning, sniffling, mucous discharges or dryness; no struggling for breath at night.

Tell your druggist you want a small bottle of Ely's Cream Balm. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, and relief comes instantly.

It is just what every cold and catarrh sufferer needs. Don't stay stuffed-up and miserable.

RED PEPPER FOR RHEUMATIC PAIN

Red Pepper Rub takes the "ouch" from sore, stiff, aching joints. It cannot hurt you, and it certainly stops that old rheumatism torture at once.

When you are suffering so you can hardly get around, just try Red Pepper Rub and you will have the quickest relief known. Nothing has such concentrated, penetrating heat as red peppers. Just as soon as you apply Red Pepper Rub you will feel the tingling heat. In three minutes it warms the sore spot through and through. Pain and soreness are gone.

Ask any good druggist for a jar of Rowles Red Pepper Rub. Be sure to get the genuine, with the name Rowles on each package.

Colds Fever Gripe Be Quick-Be Sure!

Get the right remedy—the best men know. So quick, so sure that millions now employ it. The utmost in a laxative. Bromide Quinine in ideal form. Colds stop in 24 hours, La Gripe in 3 days. The system is cleaned and toned. Nothing compares with Hill's.

Be Sure It's HILL'S Price 30c CASCARA QUININE Get Red Box with portrait

Separate Paths

The trouble seems to be that a man's soul mate isn't his sole mate.—Philadelphia Inquirer.

CUT THIS OUT—IT IS WORTH MONEY

Send this ad and ten cents to Foley & Co., 2836 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive a ten cent bottle of FOLEY'S HONEY AND TAR COMPOUND for coughs, colds and hoarseness also free sample packages of FOLEY PILLS, a diuretic stimulant for the kidneys, and FOLEY CATHARTIC TABLETS for constipation and biliousness. These wonderful remedies have helped millions of people. Try them! Hite's Drug Store. adv.
