VOLUME 31

EAST JORDAN, MICHIGAN, FRIDAY, MARCH 25, 1927.

NUMBER 12

## Third Meeting of Business Men

CONSIDERABLE BUSINESS ENACTED. STANDING COMMITTEES APPOINTED.

The regular meeting of the East Jordan Business Men's Club was held at the Russell Hotel last Friday evening. Following supper, several matters of business were taken up and discussed. Dr. F. A. Poole of the U. of M. was present and, upon invitation, gave an interesting and instructive talk on "Keeping Physically Fit."

Considerable fun was enjoyed when it was voted that no member address another by his surname. Arthur Hill was the first to be assessed ten cents and Chairman Roscoe Mackey, not to be outdone, contributed about fifty cents for the good of the cause.

Following are the minutes of the meeting as recorded by Secretary Walter G. Cornell.

Minutes of the last regular meeting were read and approved.

W. A. Stroebel as chairman reported the progress of the Road Committee, and G. W. Bechtold as chairman reported the progress of the Park Committee. L. G. Balch as chairman reported the progress of the Ferry Committee and was requested to make a further report at the next regular meeting.

Motion was made and supported that we suspend the regular order of business and listen to a talk from Dr. Poole of the University of Michigan.

Motion was made and supported that the first order of business be roll call. The motion was not carried.

Motion was made and supported that we incorporate in our by-laws that the regular meetings be held only twice monthly instead of every alternative week.

Motion was made and supported that the rules be suspended and the meeting be held for a longer time than the stipulated one and one-half hours by vote of two-thirds of the members present. The motion was carried.

Motion made and supported that no member address another member by his surname without being subject to a penalty of 10 cents for each offense. Carried.

Motion was made and supported that our regular meetings be held on the first and third Wednesday of each month. Carried.

Motion was made and supported that Hugh Dieken, Jr. be elected to membership in the Club. Carried.

Motion was made and supported that the Secretary be and is hereby instructed to notify each member before each regular meeting. Carried.

Motion was made and supported that the printers who are members of the Club be and are hereby instructed to print a poster with the names of the members of the club to be posted in a conspicuous place wherever the meetings are held.

The letter from A. J. Sufferin was read and a motion made and supported that he be accepted as a member and that we accept his first deposit for dues.

Motion was made and supported that the Executive Board select the place and date for our next regular meeting. Carried.

Motion to adjourn.  
Fines collected, \$ .60.

East Jordan Business Men's Club appoints the following committees:

**STANDING COMMITTEES**

Reception—H. W. Dicken, Chairman, R. G. Watson, L. G. Balch.

Membership—E. J. Beuker, Chairman, Glenn Bulow, W. A. Stroebel.

Publicity—A. J. Duncanson, Chairman, B. L. Lorraine, Glenn Thomas.

By-Laws—C. W. Sidebotham, Chairman, E. N. Clink, D. M. Drinan.

Finance—Dr. G. W. Bechtold, Chairman, H. W. Dicken, John Porter.

Entertainment and Refreshment—R. C. Supernaw, Chairman, C. F. Snellenberger, John P. Seiler.

Road—W. A. Stroebel, Chairman, Roscoe Mackey, John J. Porter.

Ferry—L. G. Balch, Chairman, S. E. Rogers, E. N. Clink.

Tourist Park—Dr. G. W. Bechtold, Chairman, Roscoe Mackey, H. P. Porter, H. W. Dicken, R. G. Watson.

Aggricultural—R. C. Supernaw, Chairman, L. G. Balch.

Game and Fish—L. G. Balch, W. G. CORNELL, Secretary.

W. G. CORNELL, Secretary.

W. G. CORNELL, Secretary.

W. G. CORNELL, Secretary.

## Health Paramount Says Dr. Poole

Dr. F. A. Poole, coming as the second number of the University Extension course, gave a very valuable and interesting talk to the Business Men's Club Friday night, on the question of retaining their health, the most important asset in their possession, comparing the human body to an automobile, describing how we take the auto to the best mechanic obtainable to keep it running in first rate order, while our own body is left to run as long as it will run and the body mechanic never has an opportunity until the machine is almost stopping and sadly out of repair.

He made the point to the Business Men that the average person is at his prime for but twelve years, when it should be nearer thirty-five or forty. Dr. Poole, a man weighing over 200, and 6 feet, one or two inches tall, looking not a day over forty-four of forty-five, yet past 50, is a pretty good sample of what a man should be physically.

From the Business Men's dinner, he went to the high school, where he gave a talk to about one hundred ten school patrons and children interested in health questions. He gave many interesting statistics on the percentage of boys and girls that need the attention of the doctor, the dentist, and the optician. A very large percentage of children are affected with three distinct ailments before they are five. From this, a guess can be made of the number of children that should have medical experts' attention during their school years, for, as Dr. Poole said, if left until they are ten or twelve years of age many of the children's future health is already impaired beyond repair.

The attendance at the lecture at the high school was cut down considerably by other things demanding people's attention, including the Basketball Tournament and the like. We hope that if we have a chance to get the Extension Course another year that people in greater numbers will attend these valuable lectures.

Dr. Poole is in charge of a department of the Michigan State Board of Health, and is a State authority on antitoxins for diphtheria, scarlet fever and other diseases, having spent 18 years in this work. Anyone wishing to consult Dr. Poole on any health question, may reach him by writing to Dr. F. A. Poole, Michigan State Board of Health, Lansing, Michigan.

Another interesting development in the field of advertising in country weeklies comes from Alfred P. Sloan, Jr., President of General Motors Corporation, who has originated a campaign for country newspapers, which will advertise the products of his corporation, automobiles, lighting plants and electric refrigerators. This is the first time that this corporation has gone into the county weeklies on a general advertising campaign. Mr. Sloan, in a letter to a number of Editors, says:

"I believe that no printed matter in the United States is more thoroughly read, or has more influence than the pages of these home town papers."

The HERALD calls the attention of East Jordan advertisers to the decisions of these large corporations. The fact that both of them have unlimited financial resources and are therefore able to select the best mediums regardless of expense, should mean something. They are beginning to realize that the home town newspaper is best for advertising.

## State Bankers Form Vigilantes

TO COMBAT INCREASING ACTIVITIES OF BANK ROBBERS.

Bankers of Michigan are organizing themselves into groups of vigilantes to combat the ever increasing activities of bank robbers throughout the State. H. M. Brown of Detroit, secretary of the Michigan Bankers' Association, announced recently.

Joseph Rylands of Chicago, organizer of the Indiana vigilantes programme, has been secured by Michigan bankers, and is proceeding to organize every group of bankers in the State, Brown said.

The vigilantes will be organized around the various sheriffs in the State, and meetings are being held in each county seat in Michigan. Bankers and their employees used in the organization will be appointed deputy sheriffs and will assist the sheriff in hunting bank robbers in their vicinity.

"In Indiana it was found that during the first year of operation under the vigilante plan the number of bank robberies in that State was reduced 84 per cent, while the amount of money stolen was reduced 79 per cent," Brown said.

"This inauguration of the vigilante plan is a big step in the right direction and, by lining up shoulder to shoulder with the bankers' associations of our sister States, we hope to put an end to the forays and attacks of these predatory murderers and thugs. The plan is perfectly legal and feasible," Brown concluded.

## Get Leases For Oil Wells

DRILLING TO START NEAR HORTON'S BAY SOMETIME NEXT SUMMER.

It was announced at Boyne City recently that leases for quite a number of farms and other lands in the Horton's Bay region had been secured by the Northwestern Michigan Oil Development, in which several Petoskey men are reported to have invested, and that drilling for oil will be started before July 1st.

It is understood that money subscribed for the work is held by business men acting as trustees. R. A. Smith, a State Geologist is declared by the oil men to have told them there are signs of gas and oil in the Horton's Bay region, probably at a depth of about 8,500 feet.

First wells to be put down will be test wells.—Petoskey News.

## Local Representatives For C. M. T. Camps

Dr. F. H. Wilkinson of Charlevoix has received formal notification from Brigadier General Michael J. Lenihan, commanding the Sixth Corps Area, of his appointment to represent the War Department in Charlevoix County as chairman of the committee in charge of the 1927 enrollment for the Citizens' Military Training Camps.

The appointment follows his election to chairmanship of the Military Training Camps Association county committee recently and brings all activities in behalf of the summer camps throughout the county under his direct supervision.

Plans for this summer's camps, which Dr. Wilkinson has received from General Lenihan, provide for the apportionment of separate quotas to each county to obtain an equitable allotment of vacancies to all parts of the Sixth Corps Area, which comprises the States of Illinois, Michigan and Wisconsin. This, Dr. Wilkinson said, will give every young man in Charlevoix County, who can meet the requirements of the camp, an opportunity to attend.

Despite the fact that more camps will be held this year than ever before the response to the Government's offer of thirty days outdoor training without personal expense is expected to exceed the number of vacancies allotted. Only those who obtain complete enrollment at an early date can be assured of the trip. Complete enrollment, Dr. Wilkinson explained, includes the proper filling out of the application blank, certificate of character from a reputable citizen, physical examination and inoculation.

Application blanks may be secured from Dr. Hugh W. Dicken, who is the East Jordan representative.

Our idea of a foolish question: "What is my bank balance today?"

## Clean-Up Date Set By Green

GOVERNOR URGES DRIVE TO HALT HEAVY LOSS FROM FIRES.

A proclamation naming the week of May 16-21 as "Clean-up Week" for the State of Michigan was issued last week by Governor Fred W. Green.

The Governor said: "Statistics from the records of the state fire marshal show that 75% of the fires are due to carelessness. Last year there was property loss of \$17,538,503.26 accounting for 18,309 fires. There were 73 schools, 70 churches, 23 hospitals, 28 theatres, 137 hotels, and two children's homes damaged by fire and in addition there were 339 fatalities.

"The people of Michigan have to pay this tremendous fire loss of \$17,538,503.26. By their earnest co-operation the citizens of this State can obtain far-reaching results along fire prevention."

## Agri'lural News

SOIL-TEX. OUTFITS

Why not buy one of these outfits and some one of these days test samples of soil from each of your fields for soil acidity. These outfits can be purchased for only 35c and have solution and test papers sufficient to test every field in your community.

If your soil needs lime from this test by all means plan to use either lime or marl this year, the sooner you sweeten your soil the sooner you derive the maximum returns for your investment and labor. When lime is necessary the application of lime or marl should be your first step in improving the soil fertility.

Drop a line to Co. Agent Mellencamp and he will save one for you, or no doubt when you see him ask for one and he will have a supply with him.

HOME NUTRITION PROJECT

We are pleased to announce that a course in Home Nutrition will be available for the ladies of the County this spring. It will be conducted along similar lines as the Clothing Project of last year and through leaders selected by the various interested communities, who will receive the instruction from the Specialist in charge, then passing on the information received to classes organized in the local communities. The success of this project depends entirely with the communities who desire this work and their organizing and selecting leaders.

With the early spring, the project will probably start about the middle of April. If you wish more information in regard to the project and would like to have your community organized, phone or write to County Agent Mellencamp at Boyne City and he will lend his assistance.

CLUB WORK.

Now is the time of year to be thinking of Club Work for your boy or girl. Any boys or girls between the ages of 10 and 20 are eligible to enroll and be a part of this great educational movement.

Five members are necessary to form a club, also some interested person to act as leader, and the co-operation of the community.

For the girls we have canning club work which is mighty instructive and of great practical benefit to the members.

For the boys and girls we have: Calf Club Work; Sheep clubs, Pig clubs, and crop clubs, such as potatoes, beans, corn, etc. If your boys and girls are interested in any of these different clubs, please inform your agent of their desires, and efforts will be made to organize as many clubs as possible. Our goal is to have 175 club members for 1927. Over 100 members now, can we do it? Sure!

B. C. MELLENCAMP,  
Co. Agr'l Agent.

## Coming April Fifth

Tuesday, April 5th is the date when Dr. J. Leahy, the Optometrist will again visit East Jordan. Office at the Russell Hotel, Headache, dizziness, nervousness, crossed eyes and all other symptoms of eye strain corrected. Difficult cases solicited. adv. 12-2

Any pessimist can be cured by reading the reports that come from the spring training camps.

Some people get very excited when the fire bell rings; wonder what they'll do when they die!

## The Junior Play Was Well Received

The annual Junior play, "Step On It Stan" was given in the high school Auditorium last Wednesday evening, March 16. The play was so unusual, the acting so good, that it thoroughly impressed everyone who was present. Each member of the cast displayed a fitness for his part, acted it, lived it, until the audience forgot its surroundings and sat for over two hours, absorbed in the play. They were sorry for Stan, yet proud when he made his comeback, thrilled by the loyal and ardent Peggy, disgusted with the traitor Sibley and her accomplice, Cryder, charmed by the grace and independence of Hazel, and her ardent admirer, Charlie Norris—and who would not be amused at Sid and Sarah and Prudence?

There seemed to be a few signs that the audience was sorry for Sid too because of his uncomfortable popularity with the ladies.

Nothing but hard work, intelligent application of talent, and excellent supervision could have produced a play that was such an overwhelming success. From the first time the curtain was drawn until the last, every member of the cast held his own. Not once was it necessary for any one to be prompted. Congratulations from everyone are extended to the cast, the class, and their advisor, Mr. Keeter, who selected and directed the play. The cast was as follows:—

Stan Gray—Ira Weaver, Town's leading failure.

Peggy Brooks—Isabel Kitsman, Inspires Stan to "step on it."

Hazel Wilton—Dorothy McKinnon, Object of Charlie's affections.

Charlie Norris—Vernal LaPeer, Town's leading Romeo.

Sibley Shepard—Fredrica Shaw, Town's most wealthy girl.

Ray Cryder—Robert Pray, Town's leading citizen.

Sarah Boggs—Dorothy Hager, Just in from the country.

Prudence Quimby—Margaret Staley, Town's leading old maid.

And last but not least "Sid"—Presley—Bill Barnette, Town's leading loafer.

Dorothy Clarke—Business manager of the play.

Between the first and second acts, the audience was entertained by the Freshman Male Quartet, who masqueraded as Dutch Sweethearts and sang, "Katrina," and "Drifting and Dreaming." Leo Beyer, Bruce Lintner, Arthur Arntson and Charles McKinnon, comprised this quartet. Ralph Josifek entertained with selections on the violin. Both performances were very much enjoyed by the audience.

Furnishings were by Watson's.

## Corn Borer Drive Starts In State

East Lansing, March 21—With word from Washington that the ten million dollar corn borer fund was at last available, State and federal agencies in Michigan have started the great fight to be made this spring against the imported pest.

Three different organizations: the federal department of agriculture, the Michigan State department of agriculture, and the Michigan State College, will all have a definite part in the campaign work. Actual control and clean-up work will be under the supervision of the State department, working in close harmony with the federal staff. Educational and demonstrational work will be handled by the extension forces of the College again in co-operation with the different U. S. department bureaus.

H. C. Rather, crops specialist on the M. S. C. staff, has been named assistant extension director for Michigan in charge of the educational side of the corn borer campaign. He will be assisted by several specialists and by the county agricultural agents in the 23 counties in the corn borer area. Demonstrations on how best to follow up clean-up practices will be held throughout the area, in order to acquaint farmers with the necessary steps in the work.

"Farmers who do a complete and satisfactory job of cleaning up their fields and yards, burning, destroying or plowing under all corn refuse and stalks in which the corn borer might be hiding, will be reimbursed for the extra labor by the U. S. Government," says Rather.

"The major part of the ten million dollars recently appropriated will go to the farmers in the infested area of five States: Michigan, Ohio, Indiana, Pennsylvania and New York. The farmers of these States, who already have this dangerous pest to deal with, are not being asked to make the battle alone. The whole country, recognizing the corn borer

## County Game Warden Busy

WORK OF PLANTING STREAMS HAS ALREADY STARTED.

Attention Called to Brush Fire Law. Permits Must Be Obtained To Start Fires.

With the ice fast disappearing in the lakes, County Game Wardens will have less trouble with set-line fishermen. Wm. Lemieux, who lives about a mile and a half northwest of East Jordan on the Charlevoix-East Jordan road, found this occupation very unprofitable last Sunday when Game Warden, Henry Fike happened along and found him using three set lines in South Arm. He was taken into court and fined.

Under the direction of County Conservation officers, the work of planting feeders to rivers and streams in the county with trout fry has already begun. In the neighborhood of 190,000 brook trout fry were planted last week in the feeders of Boyne, Jordan and Bear rivers by our county game wardens. Although it is very early in the spring to start this work, the hatchery at Oden had a large surplus of trout fry which were in danger of dying if not planted at once. The remainder of the large hatch of trout will be distributed throughout the district when they reach the fingerling stage. By this time they are large enough to take care of themselves and a bigger percent reach maturity. Applications for fry have been sent out by Clarence Wood, chairman of the Commercial Association game and fish committee, and answers have already been received assuring him of a generous response from the conservation department.

With the snow gone and dry season about to set in, another important matter is called to the attention of the public, especially farmers clearing up land or cleaning up brush after the winter's wood cut. Anyone desiring to burn brush must first get a permit from the supervisor of their respective township or from the county fire warden. A request for such a permit addressed to Ed. Denel of Boyne City, will be given prompt attention. Many disastrous fires start from this source and the law concerning such will be enforced to the letter.—Charlevoix Courier.

# Community Building

## Consider the Future in Making Home Plans

Many a man, says Building Economy, makes the mistake of building his home to meet his immediate needs. He does not take into consideration the fact that conditions may change with him as they are constantly changing with other things. A home builder should have imagination.

Houses built 10 or 15 years ago generally are lacking in many things that today are deemed positively essential, little conveniences that were in practice in the building of that day, but which these particular builders possibly deemed luxuries.

They were nothing of the kind. They simply were the potential necessities of 10 years to come.

Ideas change in houses and in the requirements of every-day convenience and comfort. And it is the housewife, rather than the architect, nine times out of ten, who are responsible. They must be suited.

Before you engage your architect take a run out to some neighborhood where building is brisk. Look through the houses. Note what is new, even novel, in the way of conveniences. Arrange to have them.

You will find they were a mighty good investment when you come to sell your house some time in the future. For this more conveniences, along with substantial construction, the easier the sale.

And, above all, build your house fire safe.

## School Grounds Show Spirit of Community

Beautification of school grounds is important from several standpoints. Primarily, to the average citizen the neighborhood schoolhouse represents organized government. It is the one outstanding example to him that his tax dollar is being spent in part at least for his benefit. A beautiful building, well equipped and placed in artistic surroundings, makes him feel that his taxes have been expended wisely. If the building or grounds are not up to par, however, he cannot help but begrudge the tax assessment.

Furthermore, aside from the health standpoint, it is important that the child, attending school during the years in which character is being formed, be surrounded to as great a degree as possible with beauty. Squalidness of any sort invariably leaves an evil effect. Beautiful school grounds on the other hand, not only influence the development of an esthetic sense, but also reap their own reward in increased interest in the school.

## Garage Important

An automobile and a house are more closely related today than ever before. Statistics from all over the country indicate that wherever there is a settlement of homes, particularly in the outlying sections beyond our cities, a correspondingly large number of automobile owners will be found. When a man builds a home in a location that is not in line with transportation facilities, he turns to an automobile for his transportation.

An actual survey reveals that nearly every house now erected boasts of a garage. In many cases the garage is an essential that determines the purchase of a house. Were it not for automobiles the various outlying communities would be drawn more closely to the boundary lines of our cities, and they would follow only the main arteries of transportation. The automobile, therefore, is responsible for the many beautiful developments that may be found miles beyond the centers of population.

## Get the Best in Home

Few persons build a home more than once in a lifetime. When they build they ought to secure the very best that they can afford in design, materials and workmanship.

In this way they get a home that will be admired by everyone and one that can be sold if necessary.

Begin right now on building a home of your own. Consult the builder and building material man. They will help you realize that American ideal—owning a home of your own.

## Preserving Trees

Trees need not be destroyed or seriously damaged by the erection of passing electric light or power lines. Many power companies give their line crews instruction in careful tree trimming and now Syracuse university, co-operating with the power and light companies of New York state, is offering a week's special training in the subject for linemen.

## Here's the Right Spirit

You'll have to go further than a thousand miles and then some to find even anything to compare with this beautiful city and section, and even then you'll have to return here to find the best offered in life.—Huntsville Daily Times.

## Recipe for Progress

Progressive measures come to a community that has the right spirit. When a body of people are ready to pay the cost it is easy enough to make rapid progress.—Troy Messenger.

# The Sandman Story

By Martha Martin

## THE DUCK'S PARADE

"QUACK, quack," said Mrs. Duck. "Quack, quack," said Miss Duck.

"Quack, quack," said Mrs. Indian Runner Duck. "Quack, quack," said Miss Indian Runner Duck.

And all the little ducklings said: "Quack, quack, quack, quack." Then Mrs. Duck said:

"Quack, quack, we are going to give a party. I am giving it in honor of my young daughter, Daisy Duck. She is such a perfect duck! Such a perfect duck! And I want to give her a party."

"It will be a swimming party." "Quack, quack, oh dear," said Mrs. Indian Runner Duck.

"Quack, quack, oh dear," said Miss Indian Runner Duck.

"You know I'm not very fond of the water," said Mrs. Indian Runner Duck.

The Ducks Sang as They Marched Along.

"In fact," she added, "I don't like the water. And I don't believe I'll enjoy your party. In fact, I'm not sure but that I have another invitation on that day and wouldn't be able to accept your very kind thought of me."

Mrs. Indian Runner Duck felt that perhaps she had not been very polite and tried to make the last of her speech sound better than the first.

"Oh, said Mrs. Duck, 'I really hadn't finished explaining about my party.'

"It will be a swimming party at first for all those who care about swimming but after that it will be a barnyard party."

"We will have all sorts of fun and we will finish off with a splendid dinner."

"I plan to have many different kinds of games played and I thought we'd have a parade which would be a great deal of fun."

"Parades are always amusing. Our parade could be called the Duck's Wedding Parade and we could sing or quack as we marched along."

"I made up a marching song to sing as we waddled along. I suppose most would say we couldn't sing, but no matter, in our quacking way it is singing."

"And besides lots only make a noise who call it singing. So why should not the ducks do the same?"

And all the ducks quacked. "The truth, quack, quack, the truth. Lots only make a noise and they call their noise singing, so why should not the ducks do the same? Why not, indeed? There is no reason why we should not. So we will. Quack, quack, we will."

And Mrs. Duck said: "Quack, quack, I am so glad that all of you agree with me."

"Let us hear the song," they all called. So Mrs. Duck recited the marching song and this was it:

Quack, quack, quack, Behind each other's back. Let us march, march, march! Quack, quack, quack.

And then she took a breath and began to recite the second verse of the marching song which went like this:

Quack, quack, quack, Even if grace we lack. Let us march, march, march! Quack, quack, quack.

The ducks all liked that verse and they quack-quacked for all they were worth.

This encouraged, Mrs. Duck went on:

Quack, quack, quack! For wading, at least we've a knack. So let us march, march, march. Quack, quack, quack!

And yet again Mrs. Duck paused and then began once more to let them hear another verse:

Quack, quack, quack! Let no one step on a tack. As we march, march, march. Quack, quack, quack!

They all thought this was excellent advice and all said they would be careful not to do anything of this sort.

And then Mrs. Duck made them all practice their kind of singing and quack-quacking, and told them more about the coming party and all decided it would be a splendid affair.

And indeed it was beyond even their high hopes.

## For Meditation

By LEONARD A. BARRETT

### THE HUMAN ELEMENT IN INDUSTRY

IN THE average manufacturing industry about 80 per cent of the cost of production is charged to raw material, the remaining 20 per cent to labor. The successful purchase of raw material at the lowest possible market price is only one factor in anticipating profits. The most important element is not material but labor, not stock but men, not things but personality. Ethical values are as indispensable to success in business as are material values. The ratio of importance would seem to be as seventy is to thirty.

Labor refuses to be reduced to an automaton. Employment of men and women as machines creates reactions disturbing to industry and lessens profits. Labor is human and will not be dehumanized, without disastrous results. The human element in industry claims that its most valuable asset is not cotton, lumber or wool, but the capacities of men to create, produce and serve. The most important thing is not machinery, materials or markets, but men, and that the biggest thing in men is mind and heart. The mobilization of the human element in industry is the most important undeveloped resource in the business world today.

Success in modern industry argues that right is superior to might, that the competition which destroys must give way to the competition which builds up. The surest way to the realization of profit is to safeguard production at its source. Inhuman treatment of labor either by unsanitary conditions, destructive environments or by wage which make impossible wholesome living conditions spells failure.

(© 1927, Western Newspaper Union.)

### Double Shift of Penitence

At a club a man who had applied in vain for membership was being discussed. "I have heard that he is unscrupulous to an unusual degree," said one member.

"Unscrupulous?" returned another. "If that fellow were to reform, he would have to put in overtime feeling remorse."—Boston Transcript.

## How It Started

By JEAN NEWTON

### THE "MANSARD" ROOF

WE ARE all familiar with the mansard roof, which is constructed with a break in the steep sides of the ordinary A-shaped roof so that each side has two planes, which makes the rooms underneath habitable and eliminates the useless garret found under the other style of roof. Some of us have used the name "mansard" roof without knowing the origin of the term.

The "mansard" roof is named after Nicholas Francois Mansart, a famous French architect, who lived from 1698 to 1768. At the height of his influence Mansart designed most of the important public buildings erected at the time in Paris, as well as the famous chateau of Malson-sur-Seine for Louis XIV. His work is noted for its classical refinement and purity of detail. And one detail of his origination which has familiarized his name these many years to people who have no interest in the history of architecture is the now popular, though misspelled, mansard roof!

(Copyright.)

# POULTRY

## POULTRY SUFFER FROM DISEASES

Poultry suffer from colds and associated troubles in winter just as do human beings, but a little care and doctoring will help to keep down the heavy annual toll that these diseases exact from poultrymen. According to Dr. B. F. Kaupp, head of the poultry department at the North Carolina State college, the birds suffer most from diseases of the respiratory tract in cold weather.

Common colds result from the birds becoming wet or chilled because of poor housing, quick changes in weather or cracks in the house permitting a draft to blow on the birds. One of the signs of this disease is a discharge from the nose. Any bird so affected should be immediately removed from the flock, states Doctor Kaupp, because the discharge will contaminate the drinking water and give the disease to the other birds. In the case of colds, the nose should be cleared out by syringing with a 10 per cent solution of argyrol or a purple solution of permanganate of potash. In the case of roup where there is a stinking discharge, pure iodine should be used in the syringe and the bird treated morning and night until cured.

Weak pullets come from crowding in the summer and they must have proper feed and care in the laying pens. Most of them will develop sore head even in a new house. These pimples should be greased with carbollized grease.

Sore eyes is another familiar winter-time trouble. The eyes need to be swabbed out, states Doctor Kaupp, and a drop of a 10 per cent solution of argyrol or a 1 per cent solution of sulphate of zinc placed in the eye twice each day.

Canker or diphtheritis is a winter disease which attacks the mouth. It forms a spot where the sore is covered with a cheesy material. Scrape this off, states Doctor Kaupp, and use on it a canker pencil, pure iodine or powdered chlorate of potash. Repeat once each day until the sore has been cured.

## Early Hatched Pullets

### Produce Eggs in Winter

The results of laying tests at the Massachusetts experiment station show that early-hatched chicks of the heavier breeds make the best winter layers. Rhode Island Red pullets which were hatched in March gave a winter egg production of 42.85 eggs. April-hatched pullets gave a winter production of 35.40 eggs and May pullets gave a production of 22.50 eggs.

The profit in producing eggs comes largely from producing them at a season of the year when they are highest in price. This means that we must plan to produce eggs during the winter months. The Massachusetts experiment station shows that, with the general-purpose breeds, the early-hatched chicks are the ones which mature in time to start laying in the latter part of October and continue throughout the winter.

## Poultry Hints

Call out the hen that is persistently broody.

Isn't it funny? Almost everybody's hens start to lay like fun when the price drops.

The incubator should be located, preferably in a cellar, having good ventilation. If no such location can be had, a room facing the north is the next best place.

Gaslings dress easier in warm weather than they do in cold, as the feathers do not set so tightly, and in picking them the flesh is not so likely to be torn.

Many of the old, unfit poultry houses now found on farms could be remodeled at little expense and trouble in such a way that they would provide a comfortable home for the flock.

Plan to get chicks out on the ground in the sunlight as soon as possible, or for a short while each day.

It will soon be the season for gape worms, and all yards not sown to green feed should be spaded or plowed up. If the worms are thick, scatter lime about the yard before plowing.

Brood coops for the crop of growing young fowls need strong wooden floors and the openings in front should be closed tight each night to keep down the losses from rats and weasels.

When the eggs begin to hatch, the hen should be confined and not disturbed until the hatching is complete.

Hens in the breeding flock should be allowed out of doors in direct sunlight during the winter and encouraged to take plenty of exercise.

The little chicks are not one bit better off where you insist on feeding them before they are 48 hours old. In fact, their chances for developing into useful birds are much enhanced by such delay.

# These Cars are DOUBLY guaranteed!

YOU RECOGNIZE the emblems shown below. But do you know what General Motors has done to make each car the outstanding value in its price class? How it is using its great resources to provide each with a finer engine—a stouter chassis—a more beautiful, more lasting body—a finish that defies wear and weather—quality materials in those hidden places where quality is most needed? You'll save money on your new car by clipping the coupon below. Mail it TODAY.

7 models—\$325 to \$745. The quality car of the low-priced field. 3-speed transmission. Dry-disc clutch. Smooth, powerful engine. Fisher Bodies. Duco finish. Fully equipped. CHEVROLET TRUCK CHASSIS: 1/2-ton, \$395; 1-ton, \$495.

5 models—\$775 to \$975. Has largest 6-cylinder engine in its price class. Fisher Bodies. Duco finish. Beautiful, stylish lines. Value proved by unprecedented sales.

11 models—\$875 to \$1,190. Gratifies your finer taste. Satisfies every need. Fisher Bodies. Duco finish. 6-cylinder motor. Harmonic balancer, 4-wheel brakes and other new features.

7 models—\$1,095 to \$1,395. The "star" that is winning and holding goodwill everywhere. Fisher Bodies. Duco finish. Rubber aligned chassis and other tested improvements. 4-wheel brakes.

18 models—\$1,195 to \$1,995. Everybody knows Buick's worth. Now finer than ever. New models vibrationless beyond belief. 6-cylinder valve-in-head engine. Fisher bodies. Duco finish.

### LaSalle

6 models—\$2,495 to \$2,685. The new and beautiful car designed and built as a companion car to Cadillac. Has V-type 8-cylinder engine. Bodies by Fisher. Duco finish. Now on display.

50 body styles and types—\$2,995 to \$9,000. The pioneer in the 8-cylinder field. Standard of the world. Duco finish. Bodies by Fisher and Fleetwood. 500 different color and upholstery combinations.

(ALL PRICES F. O. B. FACTORIES)

## Community Building

### Attraction Found in Really Pretty Home

One beautiful home of assured permanence attracts others of the same type and hereby increases its own value as well as the real estate values of the community.

This attraction is made stronger when the construction is of a type which increases the fire-safety of the locality. The better residence sections of most communities recognize this in their building restrictions. Furthermore, the wise home builder looks forward to the possible time when he may want to sell his house. Will it depreciate heavily with the passing years, or will it show increased value? The homes covered with cement stucco will, as a rule, increase in value as the years go by, because they are permanent in construction and their appearance improves with age.

Old but well-built houses may be rejuvenated and their appearance changed at a minimum cost with stucco. Excellent examples of such work are found in almost every community.

An exterior envelope of stucco, a new porch, a sun parlor, perhaps new windows, will bring about a complete transformation. —Chicago Post.

### Brick Gives Richness of Color to Building

Color is one of the most important features about the home. It governs to a surprisingly large degree not only appearance but temperament. It makes not only for beauty but for good or ill nature as well. Certain colors are just as depressing as others are inspiring.

Women are just as particular, ordinarily, about the coloring of the paper on the walls of their homes as they are about the color of their clothing. Men are less responsive, perhaps, and pay less attention to their environment, yet unconsciously for all that they are affected more or less.

The same thing applies in the materials of which your home is constructed. Instinctively you turn away from the house that has a drab and dreary appearance. Just as quickly you admire the one with a rich, warm coloring in the walls.

Brick houses, particularly, have this quality, made permanent in the burning of the bricks. In most other wall materials it must be artificially produced and frequently renewed. —Boston Herald.

### City Zoning

City zoning is valid under the United States Constitution. There is no violation of the Fourteenth amendment, which forbids the depriving of citizens of liberty and property without due process of law. So municipalities may go ahead, unless state constitutions should prevent, with the establishment of specific boundaries for industrial, business and residence districts. This is the ruling made by the Supreme court, with three of the nine members dissenting, but not filing their views in written form. It is a far-reaching decision, of significance to every urban community. The consensus will be that it is a salutary development. Zoning, if not a social necessity, has become a great social advantage. The Supreme court decision will make for well-arranged cities.

### Best Material Cheapest

About the best advice anyone could give an inexperienced homeseeker would be "go to a building-material dealer."

He knows all building materials and their uses. He sells all worthy materials, so he is prejudiced in favor of none.

His interest is to see you use the right materials and enough of them to build a house that will be comfortable and long lasting. His advice is worth while.

No one need build or buy a home now without this information and protection. Material dealers, good builders and wise homeseekers are co-operating in this movement for better and safer home building.

### Civic Pride

Pride in the home is a very beautiful and withal a very common virtue in American life, but civic pride is one that sets the high standards both for the individual and for the community. And when civic pride has succeeded in beautifying the community a very forward step has been taken toward beautifying the lives of those who dwell in that community. —Rocky Mountain News.

### Up to the Citizens

Any community is just as prosperous as a majority of its citizens can plan to carry on a successful business, whether it be farming, manufacturing, or what not. A field for any business must be developed, and the better business man you are the faster will your business and the community advance. —Fayette Banner.

### Plan City Beautiful

In connection with a scheme to beautify the roads of Huntington county, Indiana, W. E. Rogers, county highway superintendent, has announced lower beds and trees will be planted along Bryant and State streets in Huntington.

## POULTRY FACTS

### WATCH DETAILS TO OBTAIN EGGS

Attention to a few details is often the deciding factor in making profits in the poultry business.

"For instance," continues L. M. Black, New Jersey extension specialist in poultry, "if good results in egg production are to be expected during cold weather, it is quite important that the pullets be confined to the laying houses. Cold wintry blasts and frozen ground are not conducive to high egg yields."

"Allow each bird four square feet of floor space in a well-ventilated house, and furnish a good ration containing plenty of green feed. The birds will respond by filling the egg basket with a high-priced product."

"Another detail is the buying of baby chicks for next spring's delivery. 'Do it early' is a good slogan, and its observance may save a disappointment. Many a poultryman has been forced to accept chicks hatched later than he desired just because he did not place his order with his hatchery man at an early date."

"The thoughtful poultrymen also determine now whether or not their incubators and brooder stoves are in readiness for the coming hatching season. Now is the time to inspect this equipment carefully and order any necessary parts that will increase the possibilities of a successful season. Thermometers and control wafers should be tested to see that they record varying temperatures accurately. It may even be advisable to set up the machines and brooders and run a short test on them. Above all, do not neglect them until the last moment and awake to find yourself unprepared to start off at the opening of the hatching season."

### Success in Incubating

#### Duck and Turkey Eggs

To get the best possible success in incubating duck and turkey eggs, secure a hygrometer. Keep it in the egg chamber during the entire hatch, the same as you do with the thermometer. By examining the eggs occasionally to determine the size of the air cell you will be able to know whether or not the moisture content is running about the right degree. If the eggs dry down too fast, it is an indication that too much moisture is being evaporated from the egg content. On the other hand, if the air cell remains small without much of a detectable change such often indicates too much moisture. A hygrometer can be purchased from most any incubator manufacturer or poultry supply house.

### Egg-Laying Period May

#### Be Profitably Prolonged

The fact that hens lay heavily in March and April as a result of nature's urge, causes many poultrymen to overlook giving the hens the sort of food and care that will prolong the laying period. Nature has been preparing the hen for laying in the spring, and her body has a store of protein—the scarcest egg-making element. But a hen that lays five eggs a week will lay eggs in two months to equal one-half her own weight, and unless her feed has replaced this protein, she will lay little after May 15 or June 1. To avoid the slump, feed her heavily with rich protein feed at this time, and she will have the necessary egg elements to go right ahead during the summer.

### Mothers for Guinea Chicks

Ordinary hens make the best mothers for guinea chicks. Given warm, dry weather, and plenty of range, turkey and guinea hens can be used successfully, but should a rain or heavy dew occur the mother turkey or guinea hen is apt to drag the chicks through the wet grass, and many are lost from becoming wet and chilled. Neither turkey nor guinea hens can be induced to seek the shelter of the coop at night and during storms, but will remain out in the fields to hover their broods.

### Potatoes for Ducks

Boiled potatoes are good for ducks and should be mashed and mixed in the damp mash to make about 25 per cent of the total. The rest of the mash should remain the same as if the potatoes were not used. It is best to put the roofing on the outside of the building, both on the sides and roof, because it then keeps the moisture out. On a single wall house we would put two or three thicknesses of tar paper between the boards and the roofing.

### Reduce Winter Mortality

One of the best ways to reduce the per cent of mortality in a poultry flock is to cull out all underized late-hatched pullets. They are the type of birds most subject to colds and roup, and will seldom lay many eggs until the late winter production begins to reduce the prices. The remedy is to buy enough chicks, or hatch enough at home, so the pullet flock can be thoroughly culled, and yet leave enough to fill the capacity of the plant.

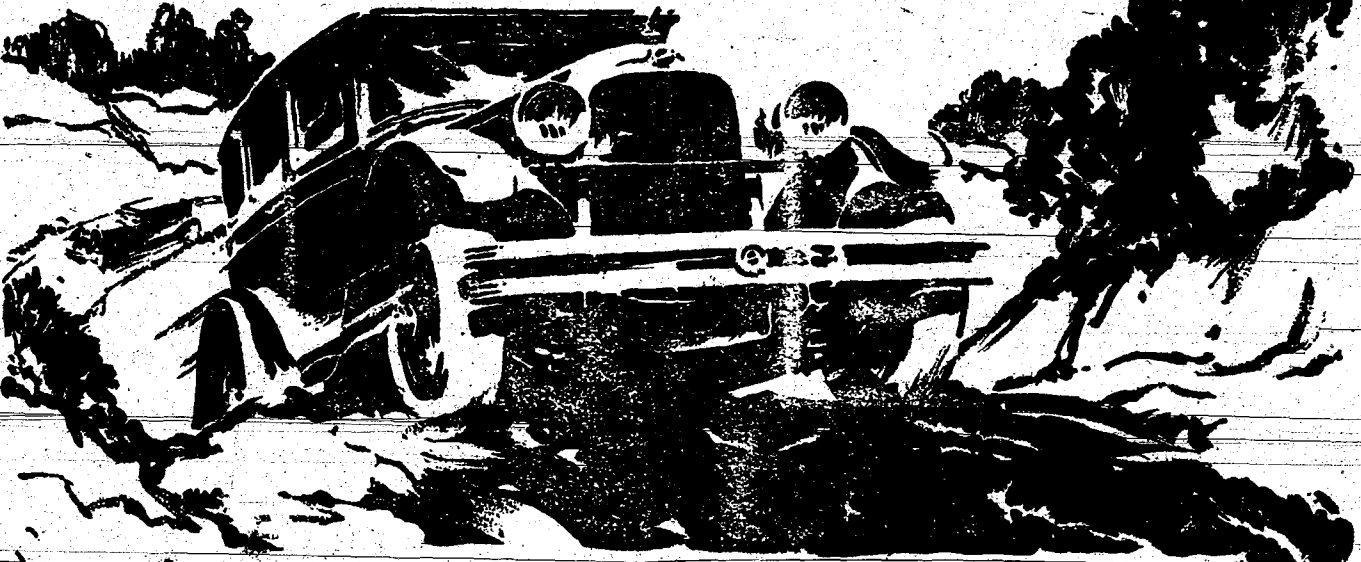

## Proved on Studebaker's Million Dollar Proving Ground

- 70 actual miles per hour!  
- 5 to 40 miles in 18 1/2 seconds!!

# THE COMMANDER

Studebaker's Big Six Brougham

NOW \$1585 *f.o.b. factory*

STUDEBAKER engineers satisfied themselves by Proving Ground tests that The Commander would out-speed, out-climb and out-live any other car—six or eight—selling for less than \$2500.

But the ultimate proof of performance is on the road—with yourself behind the wheel! And on the road, as on the Proving Ground, you will thrill to the flashing pick-up, the silky smoothness of speed and the ease of handling that The Commander places at your command.

Only seven American cars—costing two to five times more—equal The Commander in rated power, which is one reason why the Big Six is today the world's fastest selling high-powered car.

You will marvel at the brilliant performance of The Commander—admire its beauty of custom line and fittings—appreciate the safety of its low-slung, full-vision steel body—and be completely convinced that it is the most remarkable automobile value in history, at its new One-Price price—\$1585.

New Studebaker Prices, Effective February 16th	Old Price	New Price	Saving
Sport Roadster	\$1250	\$1195	\$ 55
Custom Victoria	\$1335	\$1325	\$ 10
Custom Sedan	\$1385	\$1335	\$ 50
The Chancellor (Big Six Victoria)	\$1735	\$1645	\$ 90
The Commander (Big Six Brougham)	\$1785	\$1585	\$200
The Sheriff (Big Six Victoria)	\$1610	\$1445	\$165
Big Six Sport Roadster (for 4)	\$1680	\$1495	\$185

Prices f.o.b. factory. Bumpers front and rear included, of course. Four-wheel brake and disc wheels regular equipment.

The Erskine Six, Studebaker's 2 1/2 litre car, is now on display. It offers a new standard of comfort, performance and economy. See it in our showroom.

### Man and Mystery

The wonderful thing about man is the way he builds his life on mystery. He draws his inspirations out of mystery, hopes where he does not know, dreams where he does not see and believes where he cannot prove. Knowledge is no more than an island here and there, which lifts itself a little way above the waves while the great ocean of mystery round about laps all the shores of thought. —Philadelphia Public Ledger.

### Was Originally Gosport

The Norfolk navy yard was founded under the name Gosport in 1682 by the British. The name of Gosport was taken from the Gosport navy yard, Portsmouth, England, which was one of the most important shipyards of the time.

### Give Us the Old Way

Another reminder that things is not always progress is an entirely new way to make turkey stuffing. —Columbus (Ohio) State Journal.

### Picturesque Pottery

Ancient inhabitants of Peru often made pottery jars in the shape of vegetables, such as ears of corn, squash, potatoes and beans.

### Not So Difficult

The average man's erudite needs are simple, according to a Detroit librarian. "Fully 50 per cent of our queries can be answered by using the dictionary of the World Almanac," she said. "If you include an encyclopedia of your reference shelf, the percentage will jump to at least 75."

### But It's Worth Having

A bad reputation can be acquired in a day, but it usually takes a lifetime to acquire a good one. —Boston Transcript.

### BRONCHITIS—"FOLEY'S" GIVES SURE RELIEF.

Foley's Honey and Tar Compound relieves at once distressing, alarming bronchial symptoms. It loosens the harsh cough, raises phlegm, soothes the irritated mucous membrane, sages the disagreeable tightness that grows worse toward night-fall. From Mr. L. M. Charleston, W. Va.: "I am glad to say that Foley's Honey and Tar helped me over a bad attack of bronchitis." It is a reliable medicine, safe and effective for coughs and colds in children and grown persons. Your druggist sells and recommends it. Ask or phone for it. —Hite's Drug Store, adv.

### Short Story

There was once a man who had a mania for traveling, and to such an extent that he could not agree with anyone else. One day he went on a trip to the South Sea, and was shipwrecked off an unknown coast. He fell in with a group of cannibals—and he agreed with them. —Kansas City Times.

### Immune to These Germs

A thoughtful Tuscan reminded me the other day that the millions of germs on money and kisses never made a man refuse either. —Tuscan-made Times.

### \$1,000,000 To end Colds The 24-hour way

There's a way to end colds so efficient, so complete that we paid \$1,000,000 for it. That way is HILL'S. It stops colds in 24 hours, checks fever, opens the bowels, tones the entire system. The millions who know it always rely on it. Go start it now.

HILL'S Cough-Preventive-Quinine. Be sure you get HILL'S in the red box with purple. At all druggists—See.

### SULPHUR CLEARS A PIMPLY SKIN

Apply Sulphur as Told When Your Skin Breaks Out

Any breaking out of the skin on face, neck, arms or body is overcome quickly by applying Mentho-Sulphur. The pimples seem to dry right up and go away, declares a noted skin specialist. Nothing has ever been found to take the place of sulphur as a pimple remover. It is harmless and inexpensive. Just ask any druggist for a small jar of Rowles Mentho-Sulphur and use it like cold cream.

### Has All Forms of Cactus

On the Twin Buttes road between Tucson and Centennial, Ariz., oculist declares there is every known variety of cactus to be found in the world.

### Only Semi-Precious Stone

A moonstone is a semi-precious stone, a variety of feldspar which exhibits a delicate, pearly, opalescent play of color.

**WILSON**  
(Edited by Mrs. O. D. Smith)

Poor sugar weather.

The three oldest children of Mr. and Mrs. Roy Hardy entered the Afton school last week.

Miss Esther Shepard who has been on the sick list, is able to be out again. Mr. Bushaw, living on the Todd hill is working for Mrs. Henry Timmer at present.

About four inches of sugar snow fell on Monday, just to remind us that it was the beginning of spring.

Roy Hardy and family are now settled in their new home on the Aaron Ensign place. Mr. Hardy still retains his office in East Jordan, driving back and forth with his car.

Bert Lumley of Deer Lake has been buzzing wood for the farmers along the state road the past week.

Ed. Wood and family of East Jordan were visitors at E. E. Pearsall's in this place last Sunday.

One of Mrs. Timmer's thoroughbred Lincoln ewes gave birth to triplet lambs recently. All alive and doing well.

Lem Henderson was taken ill last Monday with appendicitis and was removed that same night to the Petoskey hospital for an operation.

Wm. Vrondran and family moved back to their own home last week, after spending the winter with his father, John Vrondran.

Mrs. James Alwin who has been spending several weeks with her sister, Mrs. Henry Timmer, and son, Robert, in Afton, returned to Detroit last Tuesday.

**MILES DISTRICT**  
(Edited by Mrs. A. Miles)

Doyle Black of Ellsworth and Mr. E. A. Dean were callers at the A. Miles home Saturday.

Mr. and Mrs. Eugene Miles took dinner with Mr. and Mrs. C. L. Strong Sunday in East Jordan.

Mr. and Mrs. Fred Stenke and son Paul and daughter, Cora called on A. Miles, Sunday.

Felix Detlaff was a visitor at the Dett Evans home, Sunday.

Mrs. Almira Pearl of Charlevoix, who is visiting at the A. Miles home, spent the week end in East Jordan with friends.

Mrs. Frank Kiser of East Jordan was a caller at the Dett Evans home, Tuesday.

Frank Kiser of East Jordan and Louis Kowalske were callers at the Dett Evans home, Sunday.

Mr. and Mrs. John Weiland of Ellsworth and Miss Minnie Cincush of East Jordan were dinner guests at the G. Steinhagen home Sunday.

Mr. and Mrs. Fred Bancroft were Sunday dinner guests of her parents, Mr. and Mrs. Dett Evans.

Jerry Moblo received word that his step-mother, Mrs. Gilbert Moblo had died of cancer at the home of her daughter, Mrs. John Pasley, of Canada. Mrs. Moblo was at one time a resident of Charlevoix and Antrim Counties.

Miss Sarah McDonald returned to her home at Detroit, after a week's visit at the home of her brother, Louis McDonald.

Mrs. Louis McDonald is able to be about the house after her recent illness.

Peter Anderson of Ironton was a caller at the A. Miles home, Friday.

Louis Kowalske and Dett Evans were business callers in Charlevoix, Monday.

**PLEASANT HILL**  
(Edited by Anson Hayward)

Sunday School is discontinued for a time at present.

Farmers are getting wood cut, and making syrup too, not a very good year so far.

John Schroeder has moved back on his father's old home again, he lived on his other place one-half mile west all winter. His wife has discontinued her school for the rest of her term on account of ill health from going.

Mrs. Gladys is filling the vacancy until they can secure another teacher.

Rev. Henry VanDeventer and family called on Mr. and Mrs. Anson Hayward Sunday afternoon, they drove through with their car, roads are pretty good at present.

If the weather permits there will be a series of meetings for 10 days. Rev. Henry VanDeventer will conduct them. He would like to see all the farmers present. Beginning on the 22nd of March and will continue until April 1st.

Bennett's Sunday School will begin the 27th of March. All come who can, there will be preaching after Sunday School.

There will be meetings at Pleasant Valley, beginning the 3rd of April and lasting until the 7th. After their will be quarterly meeting, Brother Dean and Brother Avery will be present. Everybody come that can.

Verlie Carney is absent from school on account of sickness.

**DEER CREEK DISTRICT**  
(Edited by Mrs. Tom Kiser)

Many of the neighbors attended the Junior play Mar. 18, and all have said it was very good and all enjoyed it very much.

Isabel Murray has returned from her visit with her sister, Mrs. Jack Carney.

Ellen Murray is now working at Pat Ulvunds.

Roy Parks has been shoveling the sand away from the cement wall at the Dam so there would not be so much pressure on it.

Joe Etcher, who has been working for John Seaman this winter, is now home.

Willard King, Bruce Lintner and Billy Kitsman visited Robt. Carson's sugar bush Sunday.

Mrs. Ralph Walker who has been here on a visit with relatives and friends, returned to her home in Detroit, Tuesday.

Ira Olney and family, Lance Kemp and family and Archie Olney motored to Bellaire from Traverse City Saturday night, leaving Mrs. Kemp and children there to visit her mother, Mrs. C. C. Boggs. The others came on to East Jordan, and visited Joe Kemp and family and Tom Kiser and family. They motored back Sunday evening.

Mrs. Dalton Gay and Mrs. Tom Kiser visited friends and relatives in town Friday.

Albert Trojanek and son, Dan are home from their visit at Detroit.

Leona Smith spent Monday evening with Ellen and Isabel Murray.

Joe Etcher and Reuben Wingstone were visitors at the John Seaman home Sunday.

**NOWLAND HILL**  
(Edited by Mrs. C. M. Nowland)

Mr. and Mrs. Ray Nowland of Mud Lake, Miss Edith Papineau of Boyne City, Merrit Shaw, Mr. and Mrs. Hiley Ensign, Mr. and Mrs. Chas. Nowland of East Jordan were Sunday visitors of Mr. and Mrs. E. L. Nowland and grandchildren, Miss Lila and Percy Batterbee.

Mrs. James Simmons, recently of Detroit spent a few days at their farm last week, returning to Petoskey, Friday.

Roy Zinck of Boyne City spent Sunday at the home of his sister and brother-in-law, Mr. and Mrs. Eugene Kurchinski. His wife and children motored on to East Jordan and spent the day with her father, George Jaquays and family.

Miss Laura Derby hiked out from Boyne City Sunday and spent the day with Alice Nowland, both riding in with the Zinck family in the evening.

A family by the name of Dodd of Boyne City have moved over Mrs. Lismier farm in Pleasant Valley.

Walter Kent took a load of household goods to their new home near Bellaire, Monday.

Mr. and Mrs. Chester Shepard of East Jordan were Sunday visitors of Mr. and Mrs. Albert Nowland.

E. G. Kurchinski purchased a new milch cow of Roy Nowland last week.

Mrs. Darius Shaw is spending a few days with her parents, Mr. and Mrs. A. R. Nowland.

Our mail carrier, Theo Ecker, R. 1, Boyne City started to drive his Maxwell car, Thursday to deliver mail. He didn't miss a day on his job this winter.

**THE WEST SIDE NEWS**  
(Edited by Mrs. F. Kiser.)

Wild geese are seen flying north, the earliest in years.

Archie Olney of Traverse City was a visitor at the F. Kiser home Sunday.

Mr. and Mrs. Elmer Reed called on Mr. and Mrs. John Addis Sunday.

Dalton Gay called on Frank Kiser Sunday.

Mrs. Peter Bustard called on Mrs. John Addis Tuesday.

**PENINSULA**  
(Edited by Mrs. E. Hayden)

Ed. Stollard of Pleasant View farm is the first one to start the plow Mar. 15th.

A goodly number of Peninsularites attended the Oil and Gas meeting at the Peninsula Grange Hall March 16. G. W. Cornell of East Jordan and W. Sanderson of Northwood farm and C. H. Tooley were chosen trustees to represent Eveline Twp.

R. G. Short, the Mc Ness man from Bay Shore was on the Peninsula Mar. 16, making the return trip home with a borrowed wagon, sleighing having given out at Ellsworth.

Mrs. Nellie Evans who has been employed in East Jordan the past several months, came to the home of her parents, Mr. and Mrs. Joel Bennett at Honey Slope farm Thursday, where she will remain for a few days.

Frogs were heard for the first time this spring March 16, but were frozen up again Friday for at least a few days.

Ernest Loomis who has spent the winter with relatives in Detroit, arrived at the home of his son, Ray Loomis at Gravel Hill, north side, Thursday, where he will visit for some time.

Patron's Day was observed at the Star school Friday, March 18. A bountiful pot luck dinner was served, at which every family but two in the Dist. was represented. There never

was such a spread of which 51 took a fill to be remembered. Co. Agent, B. C. Meilencamp was the principal speaker, and spoke very interestingly.

The school gave a very amusing program. Mr. and Mrs. James Arnott of Lone Ash farm sang the old, old song, "The Silver Dagger"; Ray Loomis sang "The Ship That Never Returned" and Geo. Staley sang the old college song, which has been resurrected by the Radio, "Micity Nocity Now, Now, Now." That simply brought down the house. Everyone laughed and clapped until they were glad Patron's Day did not come oftener.

Mrs. Joel Bennett and Mrs. Nellie Evans and son, J. F., went to Boyne City Sunday for a few days' visit with Mrs. Wm. Bogart and family.

Mr. and Mrs. Will Gaunt and family of East Jordan visited Mr. and Mrs. David Gaunt in Three Bells Dist. several days last week.

Ralph Gaunt and Bob Myers are huzzing up the wood which they have been putting up on shares for W. C. Howe of Overlook farm.

A. Reich, who is employed in East Jordan spent Saturday night with his family at Lone Ash farm, returning to his work Sunday morning.

There were 23 in attendance at the Star-of-Hope Sunday School Mar. 20th. They are beginning to think about an Easter program.

Geo. Jarman and family of Knoll Krest were Sunday dinner guests of Mr. and Mrs. Ray Loomis at Gravel Hill, north side.

Mrs. F. K. Hayden and daughter, Arlene, returned to their home at Orchard Hill, Monday evening, after a week's visit in East Jordan with her parents, Mr. and Mrs. T. J. Hitchcock.

Albert and Ernest Staley of Mountain Dist., who have been preparing to enter the Hardware business in Charlevoix, had their opening Saturday, March 19, and report a good crowd all day.

The Ferry was ready for traffic, March 19, the ice having been removed from the channel.

L. E. Phillips of Boyne City visited his farm on the Peninsula, Sunday.

Mr. and Mrs. Charles Healey and son, Clayton were Sunday dinner guests of Mr. and Mrs. James Arnott at Maple Row farm.

Mrs. Fred Wurn and Mrs. F. D. Russell of Ridgeway farm were elected Community Leaders for Star Dist. for the ensuing year.

The fish shanties have been removed from the ice.

Elmer Faust of Mountain Ash farm is King Fisher this year, having captured seventy nice ones, besides a large number of suckers.

The sweet young things never give up hope; they know that they will win some day.

Somebody said the other day that the girls of East Jordan are better looking than ever. Well, we do see more of 'em.

**Briefs of the Week**

Roscoe Mackey was at Chicago on business this week.

Mike Barnett went to Muskegon, Thursday to seek work.

Thomas Brennan was home a few days last week from Detroit.

Charles Novak was here from Charlevoix on business, Wednesday.

Dr. W. H. Parks was here from Petoskey on business, Tuesday.

Mrs. Frank Habel returned home Tuesday from a week's visit at Detroit.

Mrs. Margaret Gehls of Mackinaw City is visiting her sister, Mrs. Enoch Giles.

Wellington Baker who has been home for a short visit, returned to Flint, Tuesday.

Mr. and Mrs. Robert Atkinson left recently for Muskegon and Flint to seek employment.

Mrs. G. A. Lisk entered the Charlevoix hospital, Thursday, to undergo an operation for goitre.

Born to Mr. and Mrs. Hiram G. Hipp, a daughter—Mary Kathleen—Tuesday, March 22nd.

Bert Scott and Hollie Bayliss left Monday for Muskegon where they will seek employment.

Dr. J. Leaby, the Optometrist will again visit East Jordan, Tuesday, April fifth, one day only. adv. 12-2

Editor A. J. Usher of the Charlevoix Courier underwent an operation for goitre at the hospital in that city, recently.

Born to Mr. and Mrs. Ingwald Olson, a daughter, Tuesday, Mar. 22. Mrs. Olson was formerly Miss Mabel Maddock.

Mr. and Mrs. Claude Beals of Waterford, Mich., were called here this week by the death of his mother, Mrs. Orleans Beals.

Mrs. R. J. Holman returned to Grand Rapids, Saturday, after a two weeks' visit here with her parents, Mr. and Mrs. G. A. Bell.

Mr. and Mrs. Thomas Shepard returned home last Saturday from an extended visit with relatives at Grand Rapids, Muskegon and Lansing.

Farmers wanting to grow String Beans for the Canning Factory, can get contract at the East Jordan Co-operative Ass'n. adv. 11-2

Mrs. E. C. Sherwood of Cedar Springs was called here Thursday by the death of her mother, Mrs. Beals, who died at the home of her daughter, Mrs. Clyde Bigelow.

Jay Walling and sister, Mrs. Mae Ward, left Thursday for a visit with relatives at St. Johns, Mich. Mr. Walling expects to remain there where he has employment.

Charlevoix County Bankers met at Boyne City last week, Wednesday. East Jordan banks were represented by W. G. Cornell, Robert Campbell, Vernon D. Barnett, Hugh C. Dicken.

In an auto accident near the St. John hill, Wednesday, Adolph Cincush received a fractured left wrist and his auto was badly wrecked. Mr. Cincush was enroute home from Boyne City when he lost control of the car—just how, he does not know.

The Detroit Sunday News for the coming issue—March 27th, contains in its sports section, a write-up with illustrations of winter fishing on the South Arm of Lake Charlevoix—near East Jordan. Copies of this issue may be obtained at Bulow Bros. News Stand.

Co-eds at Western State Normal at Kalamazoo are playing an inter-class volley ball series for the campus championship under supervision of the women's physical education faculty. Among the students taking part are Lucille Bartlett, Eva McBride and Esther Omland of East Jordan.

Mrs. Orleans Beals, aged 78 years, passed away Wednesday evening, March 23rd at the home of her daughter, Mrs. Clyde Bigelow, of this city, following a lingering illness. The remains will be taken to her former home at Fife Lake, Saturday, where funeral services and interment will take place.

If the harbor at Petoskey, Mich., is put in proper shape the Detroit & Cleveland Navigation Company will route boats by way of Petoskey and permit a lay-over of half an hour, A. A. Schantz, president of the Company announced Monday. The statement of Schantz followed a request from John L. A. Galster, heading a group of business men, that Petoskey be made a port of call.—Detroit Times.

Northern fruit growers say the return of winter weather or early spring cold, just as one wishes to name it, is a good thing for the fruit trees. Too early warm weather opens the buds so rapidly that they are usually caught by the late spring frosts and the fruit crops are ruined. Late spring usually means good fruit if the remaining part of the season is filled with reasonable weather.

Mr. and Mrs. James Sloan of Grand Rapids are here for a visit.

Leon Telgenhoff left this week for Flint to seek employment.

Mrs. Ralph Walker who has been here for a visit, returned to Detroit, Tuesday.

Mr. and Mrs. Robert Campbell were guests of Mancelona friends, Wednesday.

Mrs. Maurice Gorman went to the Grayling hospital, Tuesday, where she will undergo an operation.

Don Parmeter of this city has been awarded the contract of carrying mail between the local postoffice and depots.

Mrs. Irvin McGowan of Sparta was called here the past week by the serious illness of her mother, Mrs. Robert Webster.

Advertisers will find The Herald a good medium by which to reach the public. Our subscribers include the people who have money to buy.

Mrs. R. C. Supernaw went to Grayling, Thursday to visit her daughter, Miss Julia, who is teaching school in that city. They return this Friday, the latter to spend the spring-vacation at home.

This is the time of the year that we doubt the advent of spring.

Reading history is all right if you realize that every writer has his side to exploit.

When you pay your subscription to this journal of freedom the editor feels that you are an A-1 citizen.

Spring gardening fever is raging all over the country. This is caused by microbes, alias seed catalogs.

This is about the time of the year that average men begin to think that they will take up fishing this summer.

**SAVING ONESELF**  
By THOMAS ARKLE CLARK  
Dean of Men, University of Illinois

"IT WOULD be interesting to figure out," Heywood Brown says, "just how many foot-pounds of energy we have saved ourselves, since the creation of the world, by keeping up the pretense—that a special knack is required for washing dishes and for dusting, and that the knack is wholly feminine."

The principal may be applied to other things as well, and women some way are not always averse to the flattery that comes from the admission that they can do certain things better than their husbands can do them.

Now Mrs. Crowder always attend to the furnace in the Crowder house. Crowder used to do it, but when he came back from a trip out of town for a few days one winter, he some way got it into Mrs. Crowder's head that she did not push the furnace as heavily as he did. She had a way of throwing in the coal that kept the thing from gasping as it often did after Crowder had stuffed it to its full capacity. She kept the house more evenly heated, he told her, and did so with less fuel than he himself used.

"I'll fix the furnace, dear," she always says, whenever he makes a move to go down into the basement. "I don't mind doing it, and I think I do it better than you do."

So Crowder keeps his easy chair and reads his paper, gets out of a job that he really never was crazy over and at the same time flatters his wife.

Edwards earned his board when he was in college by waiting tables and washing dishes. It took less time than other work would have done, and the time he spent in doing these things would probably not have been very profitably employed on his studies had he not worked during these hours. When Edwards was leaving college one of his kind-hearted professors said to him:

"When you marry, George, I shouldn't tell my wife, if I were you, how I earned my living as an undergraduate."

"Oh, I am not ashamed of it," George answered.

"It isn't that," the professor replied. "It's just this way. If you let her know how skillfully you can manage things in the kitchen and what an expert waitress you are, she will keep you at it all your life."

He had evidently told, you see. Holbrook had earned a reputation in his youth as a cook. We always liked to spend an evening with him, for before we got away he had served us some toothsome lunch, the memory of which lingered on our palates for days. He married near middle life, and not long ago I called on him.

His wife was praising his skill in various arts, and then expressed her surprise at his ignorance in one direction.

"The one thing that Will can't do," she said, "is cook."

Holbrook looked at me in an appealing way, and I understood and said nothing. He had evidently never told her, but had let her think that only women have consummate skill in the art of cooking.

TOWNSHIP—One Supervisor; one Township Clerk; one Township Treasurer; one Highway Commissioner; one Justice of the Peace, full term; Justice of the Peace, to fill vacancy; one Member Board of Review, full term; Member Board of Review, to fill vacancy; Overseer of Highways; Four Constables. Relative to Opening and Closing of the Polls  
Act 351—Part IV—Chapter VIII, Public Acts of 1925.  
Sec. 1. On the day of any election the polls shall be opened at seven o'clock in the forenoon, or as soon thereafter as may be, and shall be continued open until five o'clock in the afternoon and no longer. PROVIDED, That in townships the board of inspectors of election may, in its discretion, adjourn the polls at twelve o'clock noon, for one hour, and that the township board in townships and the legislative body in cities and villages may, by resolution adopted fifteen days prior to the election and published with the notice of the election, provide that the polls shall be opened at six o'clock in the forenoon, and may also provide that the polls shall be kept open not later than eight o'clock in the evening of the same day.  
THE POLLS, of said election will be open at 7 o'clock a. m., and will remain open until 5 o'clock p. m., of said day of election, unless the Board of Election Inspectors shall, in their discretion, adjourn the Polls at 12 o'clock noon, for one hour.  
Dated March 1, 1927.  
EDD. NEMECSEK,  
Clerk of said Township.

**Queen of the Waves**

Miss Phyllis Stroud in her regal robes after being acclaimed queen of the surf at Sydney, Australia. The carnival and attendant contest was held for the benefit of Sydney hospital.

**Varying Diets**  
Under a liquid diet come milk, broths, beef tea, albumen drinks, gruels, eggnog, cream soups and beverages. Light diet: Cream soups, soft-cooked egg, milk toast, cereals, soft oatmeal, junket, creamed chicken, soups, gelatin dishes. Convalescent diet: Soups, broiled tender meats and fish, baked or creamed potatoes, some light vegetables, simple salads, cooked fruits, baked custard, light desserts.

**Effect of Christianity**  
With Christianity came a new civilization and a new order of ideas. Tastes were cultivated, manners refined, views broadened, and natures spiritualized.—Aparias.

**CUT THIS OUT—IT IS WORTH MONEY.**

Send this ad and ten cents to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive a trial bottle of Foley's Honey and Tar Compound, for coughs, colds, croup (spasmodic) and tickling throat; also a trial packet each of Foley Pills, a diuretic stimulant for the kidneys, and Foley Cathartic Tablets for constipation, biliousness, and sick headaches. These wonderful remedies have helped millions of people. Send for them.—Hite's Drug Store.

**Orchard Information**

**ORIENTAL PEACH MOTHS DISCUSSED**

(Prepared by the United States Department of Agriculture.)  
The oriental peach moth, which attacks chiefly young growing twigs and ripening fruit, is a new and serious pest of peaches, quinces, and other fruits, says the United States Department of Agriculture. As yet no one cultural practice or insecticide has been found which will control this insect.  
Nicotine sulphate sprays, while killing some of the eggs, are not a satisfactory remedy. Certain other measures employed likewise give only partial relief. Investigators in the bureau of entomology of the department and at several state agricultural experiment stations are endeavoring to find a satisfactory method of controlling the pest. The oriental peach moth is attacked by many parasites, and in their use lies a strong possibility of successful control.  
The rapid and extensive spread of the insect is attributed chiefly to shipments of infested fruit and nursery trees bearing overwintering larvae in cocoons. The pest is thought to have been introduced into this country from Japan about 1913, but its original home is not known.  
In some localities in Connecticut, New Jersey, Pennsylvania, Maryland, Delaware, Virginia and the District of Columbia, late peaches and quinces have for several years had infestations running as high as 75 to 100 per cent wormy fruit.  
Department Circular 365-C, "The Oriental Peach Moth," contains a description of the insect and also considerable information relative to its distribution, injury to fruit trees, as well as other data. A copy of the new publication may be obtained free, as long as the supply lasts, upon application to the Department of Agriculture, Washington, D. C.

**Spreaders Do Not Help Efficiency of Sprays**

Glue, calcium caseinate and soaps of various kinds—used as "spreaders" in common spray mixtures employed against the insect pests and diseases of apples failed to give any appreciable increase in the killing efficiency of the sprays in tests carried on by the entomologists at the New York State Experiment station at Geneva. This statement is made by the station entomologist in a report on the work of the station for the past year. The report is available for free distribution to all those interested.  
"No appreciable improvement in the killing efficiency of common spray mixtures was derived from the incorporation of such materials," says the station entomologist with reference to "spreaders." "Theoretical considerations suggest the desirability of adding calcium caseinate to the lime-sulphur and lead arsenate spray as a means of avoiding certain undesirable chemical reactions. The casein material also serves a very useful purpose in the preparation of such sprays as sulphur suspensions and lubricating oil emulsions."

The report also touches on many other lines of work having to do with the control of insect pests of fruit and vegetables, and on the numerous other activities of the station research workers.

**More and Better Grapes**

Severe pruning seems best for grapes. The Michigan Agricultural college, which has been trying this method out, says that it makes heavier yields, larger and tighter clusters, larger berries of better color, and that the grapes ripen earlier than when pruned lightly. But the crop is likely to be smaller the first year that the vines are severely cut back.

**Horticultural Hints**

Set peach, apple, and other fruit trees.  
Watch the young fruit trees for rabbit injury. It is safer to protect them with a collar of paper.  
Manure will not cure a sick plant when it is sick from fungus or insect pests. It must have insecticides or fungicides, arsenic and nicotine preparations, and bordeaux mixture.  
The variety of peaches which seem to be taking the lead in commercial peach orchards are Elberta and Hale, with the latter bringing the better prices in the market. Some Heath Glings are being grown, but they bring less in the market.

The green gage plum is named after Sir William Gage, who popularized its cultivation early in the Eighteenth century.

Planting raspberries 2 feet apart in rows 6 feet apart will require 3,600 plants to the acre. At 2 by 8, 2,722 will be needed.

Raspberries, blackberries, currants and gooseberries are all adapted to January pruning. And by removing dead wood—burning it—you will get rid of a good deal of fungus disease.

**Colleen Moore**

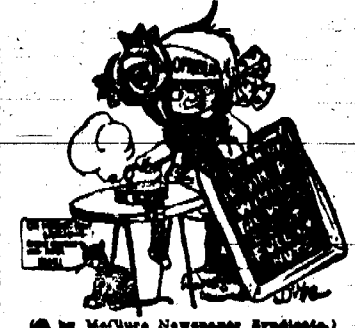

Colleen Moore, the "movie" star, sat on an "extra" bench for six months and then got a job acting only three days. Finally her chance came in "Flaming Youth." Her success continued to grow with "So Big," "Sally" and "Irene." "Twinkletoes" and "Orchids and Ermine." Miss Moore was born in Port Huron, Mich.

**WHAT THE GRACIOUS HOSTESS SAYS:**

By DELLA THOMPSON LUCAS

**INVITING GUESTS**

NEVER invite too many people to an informal dinner.  
"Crowd not your table; let your number be  
Not more than seven, and never less than three."  
To ask too many guests to this form of entertainment is to rob-it-of-its-intimacy and the opportunity to enjoy general conversation, which is the charm of such a meal.  
Much of the enjoyment of the guests who are invited to an affair of the table—luncheon, dinner or supper—depends on the appearance of the table itself. The table and its appointments, as the guests come through from other rooms, is a picture. The room is its frame. It should be arranged to please the eye. The linen should be immaculate. It does not matter whether there is a cloth of exquisite and expensive damask, or simple runners of unbleached muslin. Whatever cloth is on the table should be perfectly laundered, spotless. For dinner a long white cloth over a "husher" is the proper covering. In a bungalow, a small town or country house, however, the coarser and perhaps more "artistic" cloths, with heavy drawwork, may be used. Never, however, do they show color when used for dinner. The "husher" may be a homemade one of double-faced cotton flannel, or one bought in sections to fit the table. These latter are more satisfactory.  
The flowers and the lighting play a large part in the beauty and adornment of the table. A low arrangement of flowers is best. Tall bouquets keep the guests dodging to see one another's faces.  
As for lighting—well, for me, one candle makes a party. If I walk into a dining room where candles are burning on the table—immediately I am Cinderella. I don't care what happens at twelve o'clock. Now I am at the ball.  
Two candelabra at either end of the table, or four candlesticks set rather wide apart, light the small table well and lend that soft mellow glow which loosens the tongue and makes all women beautiful.  
Among the many attractive candlesticks are those of plain clear glass with a square, solid base. Silver candlesticks are especially desirable, and bronze are equally good though rather heavy in appearance for the table. The little flickering glow is very lovely, and is preferred to the shaded light. The candles and stick must be tall enough to bring the flame above the level of the eye.  
Candle shades, if used, should harmonize with other decorations. They may be made at home and most inexpensively. One can have a dozen sets at the cost of the frames only. And the frames may be bought at the tent store.  
(Copyright by The Eastman Kodak Co.)

**The DAIRY**  
DAIRYMAN MUST BE GOOD FARMER

Successful dairymen need to be just as good farmers as they are dairymen. It is pointed out by W. J. Fraser, dairy farming authority of the college of agriculture, University of Illinois. This is true because to make a profit under modern conditions dairymen must make their farms supply the feeds for their dairy herds, he explained. It does them no good to know how to feed profitably if they do not have the feed he added.  
"The dairyman's rotation plan must dovetail into his dairy plans before he can get the greatest possible return from his farm. The rotation for a dairy farm must be planned from three standpoints: (1) Feed. The dairy farm rotation must supply proper quality and quantity of feed the year around at the least expense to the dairy herd. (2) Land. The rotation must use land to the fullest advantage through the use of the most profitable crops, the growing of enough legumes to maintain and increase soil humus and nitrogen in order to maintain soil fertility and through diversifying crop returns so as to minimize failure of any one crop. (3) Labor. The rotation must provide for labor distribution to prevent burdensome peak loads and to utilize labor available throughout the year. This is especially important to the dairy farmer because he has so much work with his dairy herd.  
Demands for the dairy herd for legume feeds, demands of soil for nitrogen supply, and the need for the most profitable use of land and labor dovetail together so that legumes are the basis of a good dairy rotation.  
On most soils limestone is an absolute necessity before legumes can be grown, yet is a minor item of cost compared to returns. Dairymen often buy alfalfa at \$25 a ton while \$5 to \$8 an acre in limestone would allow them to produce it at about \$10. Freight, baling and handling make purchased feed expensive.  
The rotation is a definite business plan, providing as sure a return as possible year after year, and thereby reducing the gambling element in farming. It must be planned for a definite number of animals so that enough feed will be on hand every day in the year to keep every cow fed to the limit of her productive capacity. Fields must be of the same size so that about the same amount of feed is produced each year. Good legume hay, alfalfa preferred, and corn silage, are the foundation upon which the winter feed supply is based. One and one-half tons of alfalfa hay and four tons silage should be allowed per cow per year for the larger breeds.  
Pasture must be provided each year. On tillable land three-fourths of an acre of sweet clover a cow is a good standard. Where untillable blue grass is available then the rotation must be planned in reference to it. Often it can be limed and sown to sweet clover. No one rotation fits every farm, but some one rotation can be worked out for each and every farm.

**Young Calves Thrive on Skim Milk, Hay and Grain**

Young calves will usually begin to nibble at grain and hay when they are between thirty and forty days old. These feeds should be placed available to calves at this age. As long as the calves are getting a liberal supply of skim milk and have access to good quality legume hay, the grain mixture may be composed of equal parts of whole corn and oats, or barley may be included. At forty days of age calves will be eating about one-half pound each of grain and hay daily. This amount should gradually be increased to where they are getting about four pounds of grain and three pounds of hay at one hundred eighty days of age in addition to which they should get from sixteen to eighteen pounds of skim milk daily.

**Cows Need Protection During Winter Weather**

Dairy cows need protection in the way of good housing and sleeping quarters during cold winter weather, says L. P. McCann, associate professor in animal husbandry, Colorado Agricultural college.  
"Exposure to cold weather and storms means that the cows are consuming an extra amount of feed to overcome such exposure. Dairy cows do not have a thick coat of fat to protect them against the elements as do beef, cattle and hogs, hence their need of more protection. Cows kept in comfortable quarters consume slightly less feed and produce a trifle more milk than those allowed to run in the open during the winter months."

**Using Dusty Feeds**

One reason for a lot of trouble from high bacteria as well as dirt in milk comes from the practice of feeding dusty hay or fodder before milking. Bacteria and germs travel in the air, and even small particles of dust carry many thousands of bacteria. When such feeds are given to the cows before milking, a large amount of the dust and dirt will get into the milk. This will not only cause milk to spoil more quickly, but will be objectionable from the standpoint of sediment.

**Keep Fit!**

Good Health Requires Good Elimination  
To be well, you must keep the blood stream free from impurities. If the kidneys lag, allowing body poisons to accumulate, a toxic condition is created. One is apt to feel dull, languid, tired and achy. A nagging backache is sometimes a symptom, with drowsy headaches and dizzy spells. That the kidneys are not functioning properly is often shown by burning or scanty passage of secretions. If you have reason to suspect improper kidney functioning, try Doan's Pills—a tested stimulant diuretic. Users praise them throughout the United States. Ask your neighbor!

**DOAN'S PILLS**  
60c  
Stimulant Diuretic to the Kidneys  
Foster-McLurich Co., Mfg. Chem., Buffalo, N. Y.

**Constantly Tired? Lack Energy? Sleep Poorly? The chances are it's your kidneys take Foley Pills**  
(diuretic)  
and feel again the urge of a healthy ache-free body, an alert mind, a good appetite, sound sleep.  
A reliable, valuable medicine, in constant use over 25 years. Contents plainly printed on package. Sold every where. Ask for Foley Pills diuretic.  
HITE'S DRUG STORE

**Ah! Backache Gone Rub Lumbago Away**  
Rub Pain from back with small trial bottle of old "St. Jacobs Oil!"

**Ah! Pain is gone!**  
Quickly?—Yes. Almost instant relief from soreness, stiffness, lameness and pain follows a gentle rubbing with "St. Jacobs Oil."  
Rub this soothing, penetrating oil right on your painful back, and like magic, relief comes. "St. Jacobs Oil" is a harmless backache, lumbago and sciatica remedy which never disappoints and doesn't burn the skin.  
"Straighten up! Quit complaining! Stop those torturous "stitches." In a moment you will forget that you ever had a weak back, because it won't hurt or be stiff or lame. Don't suffer! Get a small trial bottle of old, honest "St. Jacobs Oil" from your druggist now and get this lasting relief.

**RHEUMATISM**

While in France with the American Army I obtained a noted French prescription for the treatment of Rheumatism and Neuritis. I have given this to thousands with wonderful results. The prescription cost me nothing. I ask nothing for it. I will mail it if you will send me your address. A postal will bring it. Write today. PAUL CASE, Dept. M-390, Brockton, Mass.

**RED PEPPERS END RHEUMATIC PAINS**

When you are suffering with rheumatism so you can hardly get around just try Red Pepper Rub and you will have the quickest relief known.  
Nothing has such concentrated, penetrating heat as red peppers. Instant relief. Just as soon as you apply Red Pepper Rub you feel the tingling heat. In three minutes it warms the sore spot through and through. Frees the blood circulation, breaks up the congestion—and the old rheumatism torture is gone.  
Rowles Red Pepper Rub, made from red peppers, costs little at any drug store. Get a jar at once. Use it for lumbago, neuritis, backache, stiff neck, sore muscles, colds in chest. Almost instant relief awaits you. Be sure to get the genuine, with the name Rowles on each package.

**PUT CREAM IN NOSE AND STOP CATARRH**

Tells How To Open Clogged Nostrils and End Head-Colds.

You feel fine in a few moments. Your cold in head or catarrh will be gone. Your clogged nostrils will open. The air passages of your head will clear and you can breathe freely. No more dullness, headache, no yawning, sneezing, mucous discharge or dryness; no struggling for breath at night.  
Tell your druggist you want a small bottle of Ely's Cream Balm. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, and relief comes instantly.  
It is just what every cold and catarrh sufferer needs. Don't stay stuffed-up and miserable.

## Election Notice

CITY OF EAST JORDAN

### BIENNIAL SPRING ELECTION AND ANNUAL CITY ELECTION

To the Qualified Electors of the City of East Jordan, State of Michigan,

NOTICE is hereby given that the next ensuing Biennial Spring Election and Annual City Election will be held on—

**MONDAY, APRIL 4, A. D. 1927**

At the places in the several Wards or Precincts as indicated below, viz: **FIRST WARD**—Old Gum Co. Bldg. **SECOND WARD**—Town Hall. **THIRD WARD**—Library Building. At which election the following officers are to be voted for, viz:—

**STATE**—Two Justices of the Supreme Court, full term; two Regents of the University; one Superintendent of Public Instruction; one Member State Board of Education; two Members State Board of Agriculture.

**COUNTY**—One County Commissioner of Schools.

**CITY**—One Mayor. One Alderman. One Supervisor and one Constable for each Ward. Notice Relative to Opening and Closing of the Polls

Act 351—Part IV—Chapter VIII, Public Acts of 1925.

Sec. 1. On the day of any election the polls shall be opened at 7:00 o'clock in the forenoon, or as soon thereafter as may be, and shall be continued open until 5:00 o'clock in the afternoon and no longer: PROVIDED, That in townships the Board of Inspectors of Election may, in its discretion, adjourn the polls at 12:00 o'clock noon, for one hour, and that the township board in townships and the legislative body in cities and villages may, by resolution adopted 15 days prior to the election and published with the notice of the election, provide that the polls shall be opened at six o'clock in the forenoon and may also provide that the polls shall be kept open not later than eight o'clock in the evening of the same day.

THE POLLS of said Election will be open at 7:00 o'clock a. m. and will remain open until 5:00 o'clock p. m. of said day of election.

Dated March 8, A. D. 1927.

OTIS J. SMITH, City Clerk.

### HELPS PAINFUL ACHING BACK

Lumbago and a stiff, aching back suggest at once the need of a good diuretic to stimulate kidney secretions and rid the system of troublesome poisons that cause the distressing aches. Mrs. Black of Petersburg, Va., says: "Before I took Foley Pills diuretic, I could not stoop over nor raise up without great pain. Now since taking them I have none." Ask for Foley Pills diuretic. A prompt improvement will amply repay you. Satisfaction guaranteed.—Hite's Drug Store. adv.

### Preparing for Hot Campaign

The photograph shows Ervin Sattisky, member of the University of Pennsylvania track team, practicing the high hurdles in preparation for a strenuous outdoor campaign.

### PROBATE ORDER

STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate office in the City of Charlevoix in said County, on the 23rd day of March A. D. 1927.

Present: Servetus A. Correll, Probate Judge.

In the Matter of the Estate of Charles A. Vallean, Deceased. The above estate having been admitted to probate and Robert A. Campbell, appointed administrator thereof.

It is ordered that four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said court on Thursday the 28th day of July, A. D. 1927, at ten o'clock in the forenoon, at the Probate office in the City of Charlevoix.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, once each week for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL, Judge of Probate.

### First M. E. Church

Victor J. Hufton, Pastor.

Sunday, March 27, 1927.

Standard Time.

10:00 a. m.—Morning Service.  
11:00 a. m.—Sunday School.  
6:00 p. m.—Epworth League.  
7:00 p. m.—Evening Service.

### Presbyterian Church

C. W. Sibletham, Pastor.  
C. R. Harper, Foreign Pastor.

"A Church for Folks."

Sunday, March 27, 1927.

10:00 a. m.—Morning Worship.  
Sermon Theme: "Three Traits of an Ideal Man."  
11:15 a. m.—Sunday School.

6:30 p. m.—Evening Worship.  
The Young People will have charge of the first 30 minutes and the Pastor will have charge of the remainder of the time.

### Latter Day Saints Church

L. Dudley, Pastor.

9:00 a. m.—Sunday School.

10:10 a. m.—Social Service.

7:00 p. m.—Evening Service.

7:00 p. m., Wednesday, Prayer Meeting.

7:00 p. m., Friday—Religio.

All are welcome to attend these services.

### Church of God

Rev. Roy L. Harris, Pastor.

Central Standard Time

10:00 a. m.—Sunday School.

11:00 a. m.—Frothing Service.

6:00 p. m.—Young People Meet.

7:00 p. m.—Evening Service.

Mid-Week Prayer Meeting, Wednesday, at 7:00 p. m.

### Pilgrim Holiness Church

Rev. B. E. Manker, Pastor.

Past Time

11:00 a. m.—Sunday School.

8:00 p. m.—General Service.

8:00 p. m., Friday night—Prayer Meeting.

The public is cordially invited to attend these services.

### Georgette and Velvet Frock for College Miss

Miss Yola D'Avril, popular screen star, adopts Dame Fashion's latest edict for the school or college miss. It is a one-piece frock that resembles a two-piece frock, conceived of French made bois de rose georgette and velvet. The sleeves are short, the neck has an abbreviated monk's collar, and large white buttons are placed zigzag on the costume.

# DAIRY FACTS

## PURITY OF MILK IS TOLD BY TEST

Guesswork in cheese factories and milk plants has been further reduced. A simple device known as the methylene blue test reveals the quality of milk accurately and quickly. The cost of the entire equipment is not more than a few dollars. It consists of a few dozen test tubes, two pipettes, a water-bath, an alcohol lamp and a thermometer.

The use of the test in Wisconsin dairy plants has been increasing steadily, says E. G. Hastings, bacteriologist at the Wisconsin Agriculture Experiment station, who described its operation as follows: Ten cubic centimeters of milk as it is received at the factory is placed in a test tube along with one cubic centimeter of a solution of the common dye, known as methylene blue. This is then kept at body temperature in a kettle of water which is heated by the lamp.

The dye colors the milk and the quality is determined by the length of time required for the color to disappear, states Hastings. The lower the number of bacteria the longer the blue color remains. High quality milk will still show the dye at the end of 5 1/2 hours, while milk of high germ content will return to its normal color in 30 minutes or even less.

"Only one small sample is necessary to determine the condition of a patron's milk," declares the bacteriologist, who points out that the test has proved of immense service to milk distributors and cheese makers who receive milk of different quality from a large number of farms. "Through the use of the test, it is much easier to help the farmers improve the quality of the milk which they deliver. Each patron may see the result of his test, and he can easily follow the effect of clean and sanitary practices about the barn and milk house."

## Utility Value of Pure-Bred Live Stock Shown

The greater earning power of improved live stock is shown in a circular just issued by the United States Department of Agriculture to be in striking contrast to the returns from inferior animals.

The publication, Department Circular 235-C, "Utility Value of Pure-Bred Live Stock," an answer to the frequent question: "What results from a utility standpoint can I expect from pure-bred live stock?" The higher price levels which constantly prevail for superior animals, meats, wool, eggs, and the like strongly indicate that the type of breeding animals used has much to do with profit and loss.

The circular contains reports of more than a thousand live stock owners who contributed their experiences in the use of pure-bred sires. It has information on the cost of pure-bred live stock, marketing pure breeds, its meat animals, registration of pure-bred live stock, incentives to raise superior domestic animals, and similar topics. It is illustrated and contains twenty-four pages.

Copies may be obtained, as long as the supply lasts, on application to the United States Department of Agriculture, Washington, D. C.

## Supply Fresh Water to Cows and Get More Milk

Every body process of the cow requires water respiration, consumption and digestion of food, carrying food in liquor form to all parts of the body, and the throwing off of waste materials. Approximately 87 pounds of every 100 pounds of milk is water and this means that cows must have all the water they want to drink at least two times daily in order to have high milk production.

Dairymen know that it pays to form regular habits for their cows. After a cow becomes used to cold weather she will more nearly drink all she wants every day, but sudden weather changes keep her from it. It is much easier to keep a cow at high production than it is to bring her back after a slump of some sort.

## Dairy Notes

Calves should have salt as soon as they begin to eat hay and grain.

A hand separator that is not properly adjusted will steal part of your profits every day. So will a poor one.

Soy bean and soy-bean hay are high protein feeds and experiments have proved them to be valuable feeds for the dairy cow.

Feeding boarder cows is worse than throwing away money, for it is also throwing away labor.

Because he carefully selects his herd bull, one dairy farmer in another state says that he has increased his annual production of milk one ton per cow in ten years' time.

Added variety to the cow's ration is a good thing if it can be obtained without much additional cost and without lowering the food value of the ration.

## CALLING THE DOCTOR

By THOMAS ARKLE CLARK  
Dean of Men, University of Illinois

WE WERE invited to a reception that night and the doctor had suggested that we go with him. His car is more elegant than our own. It is fitted up with all the rig-a-ma-jigs they put into modern cars and it is very convenient if you are cold blooded or want to light a cigar to press a button or pull out something and have your wants supplied. I don't smoke and I chafe with difficulty, but that's neither here nor there. I'd rather some one else would drive than I, so we said we'd ride with the doctor.

The reception was to be at half past eight and as I like to get to bed early we were to be prompt. I was ready at eight, sitting up straight lest I damage my shirt front. The telephone rang about half past eight. It was the doctor's wife speaking.

"The doctor had a call just as he was dressing," she explained. "I don't think he'll be long. Maybe you'd better go in your own car or call a cab."

I said I'd wait. It was nine before a second call came. There had been another call for medical assistance, and hope of transportation in the doctor's bus died within me. I called a cab.

"I didn't have a thing to do all day," he explained to me afterward. "It was after office hours when I got my first call. There were five of them finally in as many different parts of town. Nobody was very sick. Three of the invalids might just as well have come to the office during my regular hours as to have waited until dinner time, and the other two should have had me over during the morning. They just waited, hoping it wouldn't be necessary to have a doctor."

"The wisest plan, as soon as people get sick, would be to call the doctor, if he can help matters at all, the sooner he is on the job the better. We wait, however, hoping that matters will improve. As night comes on we begin to feel worse, and after everyone, including the doctor, has settled down to a quiet evening, or has gone to bed perhaps, we are the worst and must have help at once.

It is a state of mind that brings about night calls rather than a physical condition. As soon as we have time to think of our physical and mental ills, they grow more serious. Doctors long ago recognized that this is largely imagination. One is seldom so ill as to need a doctor in the middle of the night. Doctors need rest the same as ordinary people. I used to have the opinion that doctors and nurses could get along beautifully without the sleep that common people require, but it isn't true. If you need a doctor you should call him in the daytime when he is widest awake and in the best of humor, and when there are no night rates on. It's cheaper and safer.

(© 1917, Western Newspaper Union.)

## Honored by Germany

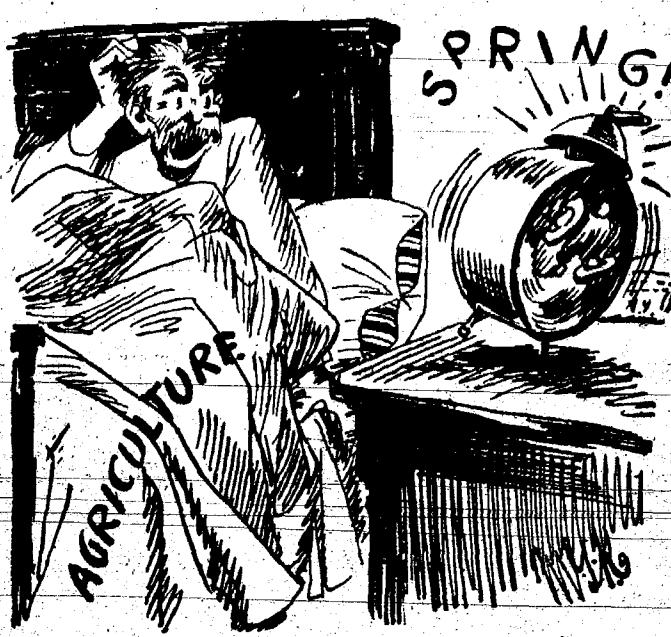

Dr. Sothe A. Nordhoff-Jung, Washington physician for more than thirty years and member of the Georgetown university hospital staff, has been awarded the cross of honor by the German government in recognition of her Red-Cross work there during the early period of the World War. Baron Maltzan, German ambassador, presented the cross with a note of congratulations to Doctor Nordhoff-Jung.

Lansing—A return to the bounty laws for killing wolves, coyotes and wild cats, is provided in a bill introduced in the Senate by Senator Joseph E. Watson of Bronson. The state would be required to pay a bounty of \$25 on wolves, \$25 on coyotes and \$5 on wildcats over six months of age, after thorough investigation of the killing by county treasurers and game wardens.

Lansing—Charging that the purchasing for the state department of public health had been "poorly managed," the administrative board voted to delegate the purchasing power for the department to Charles F. Foster, secretary of the board and state purchasing agent. Formerly the buying had been done by Dr. C. G. Foy, head of the state laboratory.

## Awaking

## Republican State Nominees

Every one is capable, diligent, faithful and honest, and in every way splendidly equipped to perform the duties of the office to which he has been nominated.

The State Central Committee appeals to the men and women of Michigan to roll up a great majority on April 4th for these deserving candidates.

GERRIT J. DIEKEMA, Chairman.  
MRS. JACOB STEKETEE, Vice-Chairman.  
JOHN S. HAGGERTY, Treasurer.  
DENNIS E. ALWARD, Secretary.

## Work Treatment for Patients

"Occupational therapy" may sound like something mysterious, but if it is translated into "work-treatment" its meaning is a great deal clearer. Occupational therapy is at its greatest development in hospitals for tubercular patients, mental patients, etc., where the disease requires a long period of treatment. The photograph shows Mr. Raymond Hill at the Wesley Memorial hospital, Chicago, who has been confined to the hospital for 22 weeks, wearing a rug.
