VOLUME 31

EAST JORDAN, MICHIGAN, FRIDAY, APRIL 1, 1927.

NUMBER 13

Extend Seven Courtesies

TO THE THOUSANDS WHO VISIT NORTHERN MICHIGAN.

Courtesy, a small booklet put out by the Michigan Tourist and Resort Association is ready for distribution. They can be obtained free through application to the Association at 96 Monroe Ave., Grand Rapids. In this pamphlet 7 rules of courtesies are given that are worthy of consideration. These are reproduced as follows:

1. Be Prompt—When tourists come in remember they are our guests and should be treated as such.
2. Smile—Be cheerful. Remember that a tourist is away from home and that a friendly smile and greeting are among the things he cannot buy, but you can give without cost.
3. Be Fair—When a guest applies for accommodations, do not guess how high a rate he will stand, but try to estimate what sort of a room he wants and let him know he can have one better or less expensive if he wants it. Next year he will be back.
4. Be Helpful—When a stranger asks for information, take the time to give him accurate and specific instructions. Go and show him, if possible. Remember how grateful you have been as a visitor elsewhere to receive information in a gracious, unhurried spirit. See that motorists are furnished Western Michigan road maps.
5. Be Thoughtful—Suggest little tips in your locality which you think may add to the pleasure of the tourist's visit; this will keep them at your place, too, instead of moving on.
6. Be Appreciative—Let tourists know that you are glad to have them in Western Michigan and that you value their patronage.
7. Invite Them to Come Again—Give the parting guest the same warm handshake when he leaves that you give him when he comes.

Detroit—Further reduction in the admittance price to the Michigan State Fair was authorized at a recent meeting of the state fair board, who set the fee at 25 cents. Reduction in automobile parking fees also was made from 50 cents to 25 cents. At the business session Fred A. Chapman, of Ionia, was appointed to fill a new post that as manager of the state fair, hitherto filled by the secretary. An added feature at the fair will be a children's day.

Cassopolis—James Carothers, high school athlete, died from injuries received while playing basketball some weeks ago. While playing in one of the district tournament games he fell, injuring both legs below the knee. The hurt was not considered serious at first, but when the injury failed to respond to ordinary treatment an x-ray examination was made revealing a splintered bone that had become infected. The blood poisoning could not be checked and death resulted.

Beulah—Gov. Fred W. Green was one of the 3,000 sportsmen who were attracted here by the annual run of smelt in Cold Creek, and so great was the run that night of the curious fish and so large was the crowd awaiting the catch that the game warden's lines were insufficient to hold back the visitors. Visitors came here from Ohio, Illinois, Indiana and even New York and Texas, their automobiles filling every available parking space. News reel camera men were busy.

Lansing—Representative Joseph H. Warner, of Ypsilanti, has introduced a bill to provide for a total appropriation of \$500,000 for construction at Ann Arbor of not only an institution for the care and treatment of tuberculosis patients, but also to erect a research laboratory. Warner's measure is expected to bring peace between the two warring factions of the house, who have argued intermittently over the question of the removal of state tuberculosis hospital from Howell to Ann Arbor.

Peculiar Glass Drop

Prince Rupert's drop is a kind of glass drop with a long tail, made by dropping melted glass into water, and remarkable for the property (due to internal strain) of bursting into fragments when the surface is scratched or the tail broken. It is so called from Prince Rupert, nephew of Charles I, who first brought the drops to England.

Diagnostics

Medical science has developed so amazingly within the past few years that it is now almost impossible for a doctor to find anything all right about a patient.

Mary Chamberlain Passes Away

Mrs. M. E. Chamberlain passed away at her home in East Jordan, Tuesday, March 29th, following an illness of one month from paralysis.

Mary Ella Button was born at Finkton, Antrim County, July 7th, 1860, her parents being Mr. and Mrs. Francis Button. In 1884 she was united in marriage to John Chamberlain at the above place. Mr. Chamberlain passed away in 1908.

Deceased is survived by the following sons and daughters:—Mrs. Glenn Bulow of East Jordan; Mrs. J. C. Walker of Longview, Wash.; Mrs. Robert Boyce of San Diego, Calif.; Ernest of Detroit, Mich.; Roy of Longview, Wash.; and Grant of East Jordan. Also by two brothers—Loren Button of Finkton, and Wm. Button of Detroit.

Mrs. Chamberlain spent her entire 67 years as a resident of this vicinity. She was a member of the Free Methodist Church.

Funeral services were held from the M. E. Church Thursday afternoon March 31st, conducted by the pastor, Rev. V. J. Hufton. Interment at the Jones cemetery.

Grand Rapids—Struck by an automobile driven by Oliver Groenoyk, 15 years old, of Galewood, Ernest Larooy, 16, died a half hour later.

Lansing—Bills were introduced in the Senate to set the deer hunting season 10 days earlier in November, so that there would be no snow in which to track deer; to provide for joint ownership and transfer personal property by husband and wife, and to revise and modify the banking laws.

Lansing—A bill to regulate the sale of kosher meat was introduced in the House by Rep. Frank P. Darin, of Wayne. It prohibits the sale, as kosher meat, of meat not properly prepared and specifies any kosher dealer selling both kosher and non-kosher meat must display a sign to that effect.

Bad Axe—Erma, 6-year-old daughter of Mr. and Mrs. Martin Fisher, farmers at Smith's Corners, near here, was drowned when she fell into an open cistern in the kitchen. The father was taking water from the cistern and the little daughter, returning from school, ran through the kitchen, not noticing the trap door was open.

Port Huron—A "crying room" is the innovation adopted by a movie theatre just opened here. When mothers with babies attend the shows and the infants start to cry the mothers can take them into the "crying room," the stage side of which is of glass. There in comfort, and without annoyance to other patrons, the mother can enjoy the show.

Lansing—The legislature of Michigan has added its voice to that of Gov. Fred W. Green in inviting President and Mrs. Coolidge to spend their vacation next summer at Mackinac Island. The Rushton resolution embodying the official legislative invitation was adopted by the House by a unanimous vote. It already had been passed by the Senate.

Spartanburg—Justice of the peace at the age of 82 years, Oscar Beeby, who has resided here 45 years, is actively engaged every day in the discharge of his duties which he has handled 40 years. Enjoying the best of health, a regular attendant at church services and Sunday school, Justice Beeby looks forward with considerable expectation to many more years of usefulness.

Lansing—A resolution proposing a cleanup week to beautify the State and lessen the fire hazard was introduced in the House by Rep. William G. Walters, of Detroit. It advocated new coats of paint for city and village structures, that tourists and resorters might be greeted with a more pleasing aspect, and the removal of all debris or slashings that might constitute a forest fire menace.

Saginaw—The first gusher in the Saginaw oil field was struck when the Sun Oil company of Toledo, drilled down to a depth of 2,300 feet. Oil spurted over the top of the derrick and covered the ground for a radius of 300 feet. Although test wells have been driven to the Saginaw sand, this is the first well in the producing field to be sunk that deep. Officials of the company estimate the well will produce from 500 to 1,000 barrels a day.

East Lansing—The victim of one of the most unusual accidents on record here, is Kenneth Baughan, of Oscoda, a freshman at Michigan State College. The accident occurred when a group of students were swimming in the college pool. Glen Hitchings, of Petoskey, playing with the water polo ball, kicked it high. The ball hit the glass chandelier in the ceiling, and a piece of the glass fell, striking Baughan in the back and inflicting a deep cut.

April Showers

Ladies Hold Enthusiastic Meeting

The organization meeting held at Boyne City on the 23rd for the purpose of starting the Nutrition Project was a huge success from every angle.

With the exception of two communities, all the districts receiving work last year were represented by leaders or members of the classes. 46 ladies were present and heard Mrs. Louise Campbell, State Demonstration Agent Leader give an address that was of wonderful inspiration to these interested ladies present.

Two main groups will be organized as was the case last year, one to receive their lesson in Boyne City and the other in East Jordan. It is hoped that we can have at least 15 communities avail themselves of the opportunity of Foods and Nutrition. As Mrs. Campbell said, when you have money you have nothing, when you have an education you have something, but when you have health you have everything. Every mother desires to have her children healthy and well and yet, if Charlevoix County is similar to other counties, there are many children that are handicapped in not having the right kinds of food for their proper development and growth. Why not interest your community in getting this instruction? It costs you nothing and you receive much. You will get exactly as much good out of this "Nutrition Work" as you are interested in it.

The first lessons will probably be given on April 13th and 14th, so by all means get your community organized immediately. Your County Agent would only be too glad to assist you. Phone 171J or 161 and reserve a place for your district.

B. C. MELLENCAMP, Co. Agr'l Agent.

Register of Deeds Notice to the Public.

Have you an ABSTRACT of your property? If not, Now is the time to have your Abstracts made or revised to date before the BIG rush comes this spring.

ABSTRACTS MADE DIRECT FROM RECORDS.

FRANK F. BIRD, Register of Deeds & Abstractor. adv. 13-2. Charlevoix, Mich.

CARD OF THANKS

We wish to express our deepest appreciation and thanks to Rev. V. J. Hufton, neighbors and friends, who have so kindly helped us in our recent bereavement.

Mrs. Glenn Bulow
Mrs. Robert Boyce
Ernest Chamberlain
Grant Chamberlain

CARD OF THANKS

We wish to express our sincere appreciation for the many acts of kindness and sympathy extended by friends during the illness and death of Mrs. Orleansa Beals.

David Beals and Children.

Cord Is Royal Decoration

The "Order of Solomon's Seal," created in 1874, is the only honorary decoration conferred by the ruler of Abyssinia, says the Here and There Magazine. It is simplicity itself, consisting merely of a strand of native cord.

Cream for Whipping

For cream to whip satisfactorily it should have 30 per cent of fat. A separating machine may be regulated to produce such cream, but if the milk is skimmed by hand it is impossible to get more than 18 or 20 per cent of fat.

Back From South America

Mrs. Theodore Roosevelt arriving in New York from a trip to Brazil and Paraguay. With her are Mr. and Mrs. Franklin D. Remington of New York. The widow of the late president is shown in the center.

Form Organization Against Corn Borer

East Lansing, March 28.—Definite plans to acquaint farmers with the educational phases of the campaign against the European corn borer were formulated at a conference held at the Michigan State College last week which was attended by county agents, township corn-borer committees, and business men from every county in the Michigan area and neighboring territory.

The area under state and federal quarantine was divided into five districts where demonstrations of effective control measures will be staged at centrally located points. The purpose of these demonstrations will be to show that the clean-up can be accomplished with implements which are necessary to the usual farm operations.

The demonstration for Lapeer, St. Clair, Macomb, and Oakland counties will be held on April 5, while the meeting for Huron, Bay, Tuscola and Sanilac is scheduled for April 7. The exact places where these demonstrations will be held and further details may be obtained from the county agents.

Demonstrations were scheduled this week at Milan, Coldwater, and Flushing for the remainder of the area.

It was the consensus of opinion at the conference that, after all, farmers are the ones who will benefit directly from the clean-up campaign, and that whatever is accomplished will be due to their own efforts. Many farmers in the corn borer area are already at work on clean-up measures, and indications are that practically all of this work will be carried out voluntarily by the farmers themselves.

County Park Commissioners Make Report

The Public is the hardest taskmaster. Usually men are put in charge of public work then no one pays any attention to what is done until some disgruntled individual begins to find fault with the work and by promulgating a statement made up of half truths and prejudiced opinion, discredits the work of men who have honestly and industriously tried to fill their duties. Half truths and distorted truths are the hardest to combat.

Very strong adverse criticism of the conduct of the affairs of the County Park Commission in regard to the conduct of the work on Whiting Park has developed in some sections. That commission is composed of W. H. White, chairman, who succeeded F. O. Barden, W. P. Porter of East Jordan; W. J. Pearson, Boyne Falls; S. M. Rose of Charlevoix, F. H. Wageman of Eveline Twp. These men by the terms of their appointment are serving without salary of any kind and for three years have carefully conducted the operation at the Park.

At the beginning, in the fall 1923 this commission was without funds, but in order that the park might be in some kind of condition for use of the public in the following spring county appropriation for which was not forthcoming until the following January (1924) the board borrowed \$400 from the First National Bank.

During that season was expended: Material and labor on four toilets, 5x12, 20 tables, 40 benches, two large tables \$365.00
Labor on grounds 16.44
Abstract of title 5.00
Recording Deed 1.10
Surveying 3.50
Total cash for season to Oct. 17, 1923 391.04

Paid to Boyne City Lumber Co. for labor, material and work on road, unpaid 256.69
\$647.73

Leaving an unpaid balance carried over to next year \$256.69 with a balance of borrowed money of \$8.96.

As no money was yet available from the county, the commission on October 20, 1923 borrowed an additional \$300 to take care of this unpaid balance, making a total of \$700 borrowed during the year.

During the year 1924 the receipts were as follows:
Apr. 23, 1923 borrowed from First National Bank \$300.00
Jan'y 29, 1924 County appropriation 1000.00
Jan. 10, 1924, borrowed from First National Bank 1000.00
Sept. 1, 1924 200.00
Balance on hand from previous loan 8.96

Total receipts \$2508.96

Pensions Are Delayed

APPROPRIATION BILL BLOCKED IN THE SENATE LAST DAY.

Definite announcement has been made by the Com. of Pensions that after the April 4th pension checks go out there will be no further pension payments until July 4th. This means that the monthly payments to all military pensioners of all classes and of all wars, including the blind and otherwise disabled Civil War veterans who are receiving the maximum of \$90 per month will be suspended for a period of 90 days because of the failure of the deficiency appropriation bill which was blocked in the Senate on the last day of the session by the objection of Walsh, democrat of Massachusetts.

In July the pensioners then living will receive three months' payments in one. The Administration was fully appreciative of the very real hardship which the delay in the payments will impose on the round half million persons on the pension rolls and considered all sorts of expedients to avoid it after Congress adjourned without providing the necessary money. There proved to be insurmountable legal barriers standing in the way.

The Com. of Pensions in his statement pointed out also that at present the pensioners are dying at the rate of 4,000 per month, which means that approximately 12,000 persons will die in the three month interval without the benefit of the pension due them.

Expenditures, Oct. 17, 1923 to Oct. 17, 1924:	
Paid on unpaid acc'ts 1923	\$256.69
Bath Houses	575.00
Surveying	124.60
Paid on notes given to First Nat. Bank, Principal & Int.	720.88
Graveling Beach Road	462.25
Lumber for culverts, beach rd.	33.76
Painting benches and tables	85.20
Park Attendant	200.00
Paid on Tables	75.00
Sundry small items	25.08

Total expenditures for year \$2508.44
The Beach road was estimated to cost \$1500.00. The actual expenditure for grading and graveling was \$800.94. At the close of the year, Oct. 17, 1924 \$1500.00 and interest was owed to the First National Bank with a balance of \$5.52.

From Oct. 17, 1924 to Oct. 17, 1925 receipts were as follows:

Oct. 20, 1924, received from County appropriation	\$500.00
Jan'y 2, 1925 received from County appropriation	1100.00
Feb'y 2, 1925 borrowed from First National Bank	50.00
Aug. 1, 1925 sold 170 rds fence	25.50
July 20, 1925 borrowed from First National Bank	500.00

Total \$2176.02

Boyne City Lumber Co., cutting brush and clearing	\$255.29
F. O. Barden Lumber Co.	21.48
B. C. Hdw. Co., cement	8.29
Pipe for spring	35.00
Tile, spring	18.10
Clearing, cleaning brush	178.50
Building 180 rods of roads upper road through woods	98.00
Repair on roads	21.00
Labor on piping from 2 springs	29.00
Cutting weeds and cleaning up	40.00
Payments on loans First National Bank	\$205.44
	1085.00
	1.17
	50.50

Total \$1292.11
Annual Picnic 126.11
Caretaker 50.00

Total \$2168.35
Leaving a balance Oct. 15, 1924 7.69

The charge for the annual Farmer's Picnic is made up:
Hand bills, Charlevoix Courier 26.61
Powers, Baseball 75.00
Mellencamp, Sport prizes 25.00

From Oct. 15, 1925 to Oct. 15, 1926

Balance \$ 7.69
Receipts appropriation 1000.00

Receipt from donation to picnic \$1007.69
Cutting weeds and brush 43.00
Building four stoves 86.25
Pump 8.50
Cement 6.00
Plates for Stoves 6.00
Clearing Beach 48.00
Repair benches 7.00
Repair of shore road 7.25
Labor repair 14.90
Clearing along highway 19.50
Clearing and cleaning brush 69.50
Labor on ground during and after picnic, general caretaker (Continued on Second Page)

REPORT OF THE CONDITION OF The Peoples State Savings Bank

Entered at the Postoffice at East Jordan, Michigan, as second class mail matter.

MILES DISTRICT (Edited by Mrs. A. Miles)

Mr. and Mrs. John Hodgkin Jr. of Ellsworth visited Sunday at the home of Mr. and Mrs. E. Miles.
Mr. and Mrs. Raymond Pearl and daughter, Helen, and Mr. and Mrs. Glenn Pearl of Charlevoix were callers at the Albert Miles home Sunday.
Mr. and Mrs. John Ter Wee of East Jordan took the G. Steenhagen family for a nice long ride in their new Chevrolet car, Sunday afternoon. Had supper at the Ter Wee home, returning home in the evening.
Harold Reed and Bobby Sommerville of East Jordan visited Harold's grandparents, Mr. and Mrs. Jerry Moblo, Sunday afternoon.
Mrs. Pauline LaLonde of East Jordan took dinner Wednesday at the home of her brother, Frank Addis, and called on her brother Mike in the afternoon.
Mrs. Eugene Miles visited Mrs. Sherman and Mrs. J. W. LaLonde in East Jordan one day last week.
John Ter Averst of Coopersville was in our neighborhood last week buying cattle.
Bert Burbanks of East Jordan took supper at the Dett Evans home, Monday.
Mrs. Roy Houston returned to her home in Detroit, Saturday, after a visit with her parents, Mr. and Mrs. Dett Evans.
Mr. and Mrs. Robert Evans and sons spent Thursday evening at the Dett Evans home.
Mr. and Mrs. Lawrence Addis and little son were Sunday visitors at the home of her uncle and aunt, Mr. and Mrs. Frank Zoulek, north of town.
Mr. and Mrs. James Canda of Ranney Dist. called on Mr. and Mrs. Frank Addis Thursday.

DEER CREEK DISTRICT (Edited by Mrs. Tom Kiser)

Mrs. Lee Farmer of Grand Rapids is here for a visit with her parents, Mr. and Mrs. Peter Lanway.
Mr. and Mrs. Geo. Etcher spent Sunday, March 20, with Joe Etcher and family at Boyne City.
Mrs. Sam Ulvund is home from the Charlevoix hospital, where she underwent an operation for appendicitis.
Ralph Larson, son of Mr. and Mrs. Ed. Larson was very ill last week.
Beatrice Lanway is spending the school spring vacation with her grand parents, Mr. and Mrs. James Murray, Dalton Gay and Charles Carson sold a few head of cattle to H. H. Cummings this week.
Bruce Lintner was a Sunday visitor at Richard Carson's home.
Andrew Franseph spent Sunday with Ed. Thorsen and family.
Mrs. O. T. Johnson and parents, Mr. and Mrs. James Murray spent Sunday with Jack Carney and family.
Mrs. Will Murray and family were Sunday visitors of Mr. and Mrs. Tom Bartholomew.
Spring plowing was started by Dalton Gay March 17th.

PENINSULA (Edited by Mrs. E. Hayden)

Wells Wildy of Boyne City is cutting stove wood on his farm in Star Dist.
Mr. Marvin, the Rawleigh man was making his round of Peninsula, Wednesday, the first time since winter set in.
Julius Meiers of East Jordan was on the Peninsula Friday taking orders for the Aladdin lamps.
Mrs. Anna Henry who has been confined to her bed for several weeks with rheumatism of the hips, is able to be out around the yard again at the home of her daughter, Mrs. W. C. Howe, Overlook farm.
An impromptu party was given at the home of Mr. and Mrs. Bert Staley in Mountain Dist. for Miss Sadie Murphy of East Jordan Friday evening. There were sixteen present. The evening was spent with cards, a pot luck luncheon was served at a late hour. All report a very jolly time.
Miss Sadie Murphy of East Jordan visited in the Mountain Dist. several days last week.
While cutting wood, Friday, Ira McKee of Star Dist. had the misfortune to cut his ankle with the axe, making a very painful wound, which will lay him up for some time.
Ira Weaver of East Jordan came Saturday to spend his spring vacation with his grandparents, Mr. and Mrs. Ira McKee in Star Dist.
On Saturday evening a crowd of folks from around Advance, and Mr. and Mrs. James Arnott and family of Maple Row farm, gathered at the home of Mr. and Mrs. Ray Loomis at Gravel Hill, north side, and spent a very pleasant evening playing progressive Pedro. Mrs. Pat O'Brien of Advance and James Arnott got the prizes for high score, and Ernest Loomis and Mrs. Billy Frank drew the consolation prizes. A pot luck lunch was served at midnight. All report a jolly time.
Clayton Healey of Star Dist. visited Geo. Woerful at Knoll Krest farm Saturday and Sunday.
Mr. and Mrs. John Matthews and

family of east of Boyne City visited Mr. and Mrs. Geo. Staley and family in Star Dist. Sunday.
The Star-of-Hope Sunday School are planning to have special music the first Sunday of each month, which is sure to be interesting and entertaining.
The Township election is working up to nearly fever heat and is sure to bring out the full vote.
L. E. Phillips of Boyne City is pruning his orchard in Advance Dist.
Claude Stanley has moved his live stock to his farm in Mountain Dist., from Boyne City, where he has lived during the winter.

County Park Commissioners Make Report

(Continued From First Page)
work 24.00
Unpaid taxes accrued before Park was taken over 119.31
Paid note First Nat. Bank 473.92
Balance on hand Oct. 15, 1926 158.44
\$849.23
The note at the bank was met by payment as shown plus donations turned back by Mellencamp from picnic \$45.76.
By careful analysis of statement it will be shown that for the years 1925 and 1926 the actual money spent on the park for 1925—\$361.50 and in 1926—\$256.00. The rest of the appropriations, \$260.00 total for those two years was used to clear up the borrowed money.
The commission begins the season of 1927 with a balance of \$158.44 with all obligations taken care of and the 1927 appropriation clear for work on the Park.
For the whole time that the Park Commission has been working they have worked under very adverse conditions, with heavy responsibilities, and no money to work with. They went ahead and assumed financial responsibilities, some of them personal, in order that the public might not be disappointed. For the past 2 years the expenditures have been cut to the lowest possible point with the result that we have a well equipped playground that is a source of pride to the people of the county and is of very great drawing power to tourists, a great number of whom take advantage of it.
Charlevoix County contributes large sums to the County Fair which lasts one week. The County Park costs the county \$1000.00 per year and contributes to the health and pleasure of our people for 8 or 9 months in the year.
It is unfortunate that talk and rumors started by people who do not know the facts, or are only acquainted with a part of the facts, should jeopardize the continuance of this most essential part of the attractions of Charlevoix County.
W. H. White, Chairman
W. P. Porter
W. J. Pearson
Sam Rose
Frank Wangeman
Charlevoix County Park Commission.

Notice To Voters of South Arm Twp.

We, the undersigned residents of South Arm Township, Charlevoix County, State of Michigan, do hereby petition the township board of South Arm Township to build a bridge across Intermediate Lake on the section line between sections 30 and 31 at the narrows.
Signed—Oscar Larsen, Archie Moss, Will Walker, Irvin Bancroft, Harrison Ranney, Ralph Ranney, James Nice, Walter Hieleman, Nate Liskum, Wm. Hosier, James Canda, Morris Walker, William G. Murray, and Alonzo Murray.
The above will be brought before the voters of South Arm Township at one o'clock fast time April 4, 1927, by an eye and nay vote.
Signed,
WM. G. MURPHY,
adv. 12-2 Clerk of So. Arm Twp.

Two More Sundays
and Then
EASTER
"A TEAR BOTTLE, A RAINBOW AND A THRONE."
is the sermon theme next Sunday morning at the
Presbyterian Church.

Pleasant Interview
It would have been a pleasure to interview Adam. He couldn't boast that he began life as a poor boy.—New York Telegram.

First "Liberty" Loan
In 215-B. C. the first government loan that can be correctly compared with the Liberty Loans during the World War was that asked by Rome of its citizens to help carry on the war against Hannibal. So far as is known it was the first time the state of Rome borrowed money from individuals to finance a war.

Hair Characteristics
The contour of the hair is circular, oval or flattened. Whether a hair is to be curly or straight is largely dependent upon its contour; the more oval or flattened it is the more it will be curled. The curliness is influenced also by the condition of the atmosphere; naturally curly hair becomes more curled when the hair is surcharged with moisture, and less so in dry weather.

Ancient Ceremony
The oldest ceremony that has been handed down from ancient times to the present day is that by which the corporation of the city of London pays its rent to the king for two pieces of land by the presentation of horseshoes and horseshoe nails, and by the cutting of faggots with a billhook and a hatchet.

Around Orchard

SAY ORCHARDISTS PRUNE TOO MUCH

Horticulturists at the experiment station at Geneva, N. Y., assert that many orchardists prune too much, without regard to the real need of the tree and that there is more danger of injuring the tree with too much pruning than with too little.

Trees which are carefully selected when the orchard is set out require only the removal of an occasional branch which may start out in the wrong place and the cutting out of dead, injured, and crossed limbs, say the station specialists.

If the trees are producing undersized fruits, if the tops contain many dead branches, or if the seasonal growth is short and scant, judicious pruning is recommended as a means of rejuvenation. "This usually consists in cutting back many branches and in entirely removing others," say the station authorities, who lay down the following general rules applicable under such conditions: "Prune weak-growing varieties heavily; strong-growing kinds lightly. Varieties which branch freely need little pruning; those with many unbranched limbs, much pruning. Prune trees in rich, deep soils lightly; in poor, shallow soils, heavily."

The cutting back of all the branches of a tree is practiced regularly only with paches and some plums, it is said. "This is attributed to the fact that, with these fruits, the wood of the past season, and therefore the crop, is borne progressively further away from the trunk, so that it is necessary to head-in these fruits by cutting back the branches in order to keep the bearing wood near the trunk. On the other hand, apples, pears, cherries and most plums are borne on spurs from wood two or more years old and with these heading-in is not so desirable. Experimental evidence obtained in tests on the station grounds indicates that winter pruning has no special advantage over summer pruning, except that the pressure of other work is less during the winter months."

Geraniol, New Attractor for Japanese Beetle

The new attractive agent, geraniol, developed by the bureau of entomology of the United States Department of Agriculture as an aid in its control work against the Japanese beetle, has been found very successful. Methods have been worked out whereby this material may be used to concentrate the beetles in a relatively small area. It was found that by spraying less than an acre of orchard with geraniol, beetles could be drawn on the leeward side of the orchard for a distance of nearly one-half mile within the first 15 minutes after the spray had been applied. This makes it possible to destroy large numbers of beetles with a comparatively small quantity of a contact spray. Further work has been done on traps baited with geraniol, but although these capture large numbers of beetles, it is not felt that a trap has been developed which can be recommended for general use.

Increased efforts were made last summer to develop a repellent which could be used on fruit trees without leaving a deposit on the foliage or fruit. It was found that certain odors, particularly the odor of tar, are distinctly repellent to the Japanese beetle, and these will be studied further.

New Fruit Varieties Are Described in a Bulletin

Thirty-two new improved fruits produced by horticulturists at the University of Minnesota at the state fruit breeding farm are described in a new bulletin. These varieties, which have been given names and introduced among fruit growers, include 14 kinds of plums, three plum-cherry hybrids, four apples, seven strawberries, one red raspberry, one gooseberry, and two ornamentals.

"Many of these varieties are rapidly becoming accepted as standards in this and adjoining states, and the plums are being planted on a commercial scale," says the bulletin. "The wealth accruing to the state each year from the products of these 32 varieties far exceeds the total cost of all the state-supported fruit breeding experiments since the establishment of the first fruit breeding farm in 1878."

This bulletin is for free distribution and copies can be obtained by writing the Office of Publications at University Farm, St. Paul.

Keep an Account

Every progressive farmer should keep an account of his farm business if he is to know at the end of the year whether he has made a profit or loss, after paying all farm expenses; also to help him study his business and make such changes in his organization and operation as are important from the standpoint of increasing his profits. Farmers interested in keeping such a record this coming year, can get both information and help from his agricultural college

SCHOOL DAYS

SOMETHING TO THINK ABOUT

By F. A. WALKER

THE LITTLE THINGS

THERE is reluctance among many of us to accept at face value the intrinsic worth of little things, which in some way or another have an intimate bearing on our happiness.

If we will stop for a moment in the bustle of our frenzied existence, when our brains are cool and in condition to receive impressions and retain them, we will perceive how trifles often affect our attitude toward our fellow beings.

A sharply spoken word, suddenly flaring up between life-long friends has been known to foment an enmity that endured till death.

A little thing, to be sure, but tremendous in result.

A falling apple led Sir Isaac Newton to the discovery of the law of gravitation.

A caress and kiss from his adoring mother made Benjamin West a great painter.

Lincoln's famous speech at Gettysburg, November 19, 1863, comprising only 285 words, stirred the whole world by its sublime eloquence and its touching appeal to human hearts.

Large fortunes have their beginning in the saving of dimes.

The trusted bank clerk starts his ruinous career by little pilferings.

It is the little things that often take us to the heights, or to the valleys.

The commonplace mite in the end becomes the overpowering mammoth, and leads us gayly to good or evil.

Give serious thought to every word and act, to habits in the forming, to our deportment, our duty to one another, not forgetting duty to ourselves and those dependent on us.

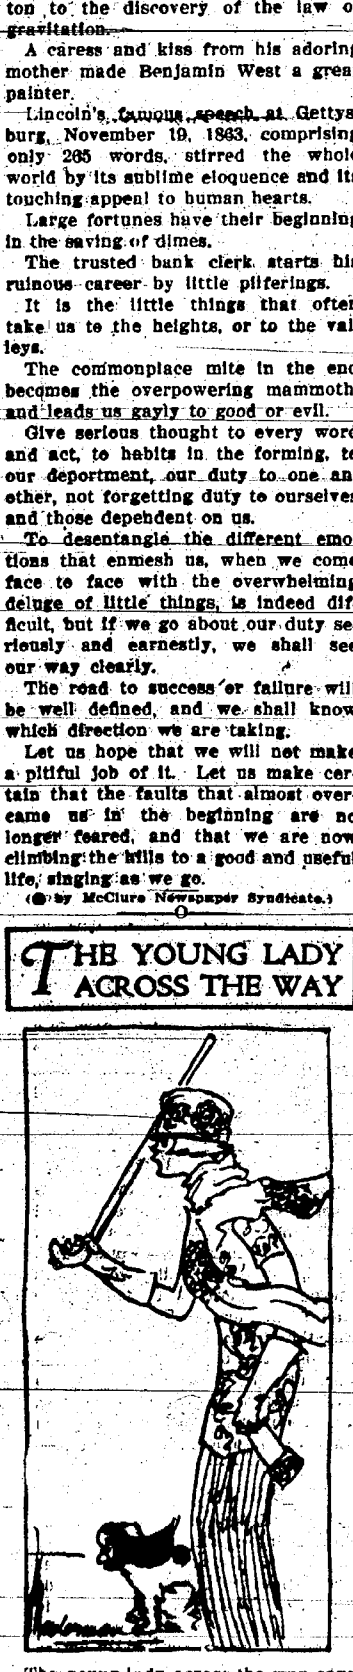

To disentangle the different emotions that enmesh us, when we come face to face with the overwhelming deluge of little things, is indeed difficult, but if we go about our duty seriously and earnestly, we shall see our way clearly.

The road to success or failure will be well defined, and we shall know which direction we are taking.

Let us hope that we will not make a pitiful job of it. Let us make certain that the faults that almost overcame us in the beginning are no longer feared, and that we are now climbing the hills to a good and useful life, singing as we go.

Mother's Cook Book

God thought to give the sweetest thing in His mighty power To earth and, deeply pondering What it should be one hour, In fondest joy and love of heart Outweighing every other, He moved the gates of heaven apart And gave to earth a Mother.

DESIRABLE DESSERTS

DURING the cold months stews, puddings and those rich in fat are more suitable and appetizing than in warm weather. Indian puddings rich in suet are enjoyed.

Betty's Pudding.
Take one and one-half cupsful of flour, one cupful each of brown sugar, suet, raisins, currants or prunes chopped, grated carrot, grated potato, one-half of a grated orange peel, one grated lemon peel, one-half grated nutmeg, one teaspoonful of cinnamon, one teaspoonful of cloves. Mix and steam three hours.

Cherry Pudding.
Beat one egg, add one-half cupful of milk and one-fourth cupful of sugar, one-tablespoonful of melted butter, two teaspoonfuls of baking powder, one-fourth of a teaspoonful of salt and one cupful of cherries; steam for an hour and a half. For the sauce add equal parts of whipped cream and cherry juice with sugar and almond extract to taste.

Date Pudding.
Beat two eggs, add one cupful of sugar, the same of walnut meats and dates; one-tablespoonful of baking powder, the same of vanilla, three table-spoonfuls of flour, three table-spoonfuls of milk. Bake in a slow oven for forty minutes. Serve with whipped cream.

Peach Custard.
Arrange alternate layers of cake and sections of canned peaches in a dish; cover with boiled-custard. Bananas, sweet oranges or preserves all are good.

Tapoca Pudding.
Cook one table-spoonful of minute tapoca fifteen minutes, add a pint of milk, dissolve a table-spoonful of gelatin in one-half cupful of cold water, add one-half cupful of sugar and the beaten yolks of two eggs. Pour over steamed dried peaches and one-half of a sliced banana. When cool stir in one-half cupful of whipped cream.

Foamy Sauce.
Cream two table-spoonfuls of butter, add one cupful of powdered sugar gradually, one beaten egg, salt, flavoring, beat well and add one cupful of whipped cream.

Nellie Maxwell

SAWS

By Viola Brothers Shore

FOR THE GOOSE—

A WOMAN never wholly belongs to a man till she realizes he can make her miserable.

It's hard enough to hear two and judge one—let alone hear one and judge two.

Lavishness ain't even a decent cousin to generosity.

FOR THE GANDER—

If you laugh too much, it's a sign of being a fool. But no more than if you never laugh at all.

The feller that's losin' is the only one that can afford to laugh.

Books without leisure is a pity. But leisure without books is death.

(Copyright.)

Some Vegetables Should Be Sown Early in Spring

The sowing of certain kinds of vegetables should be sown early in the spring for best results, states W. T. Macoun, Canadian horticulturist. One should be prepared to begin operations in the garden as soon as the soil is dry enough. Those plants of which the leaves are eaten which should be started early are lettuce, spinach, mustard and cross, and there is little danger of planting them too soon. Other vegetables which are grown for their bulbs or roots may also be planted at the same time, though they are not quite so hardy as those grown for their leaves. These are onions, carrots, beets, parsnips and early turnips. Peas are about as hardy as these but may rot if the weather turns cold and wet. However, it usually pays to plant peas at the same time as the others, as early sown peas give a much better crop—a rule than if sown late. Other vegetables which should be started early to get best results are cabbages, cauliflower, tomatoes and melons. The latter will not stand any frost hence the plants must be protected in hotbeds or cold frames or in the house until danger of frost is over. However, cabbage and cauliflower, if well hardened off before setting out will stand several degrees of frost.

FARM NOTES

Poor soils mean poverty-stricken farm homes.

Sow beans every ten days. The first bean crop is the best. It doesn't pay to make the same crop bear too much.

A day off occasionally to visit and study how successful farmers do it is a wise use of time even in a busy season.

Leafiness, good green color, soft stems, and freedom from weeds and trash are the best indications of high feed value in alfalfa hay.

Little potatoes are no good for seed, the Ohio agricultural experiment station says, unless you know they come from high-yielding disease-free hills.

There is an old saying that the best "catch crop" is to catch up with the weeds. That is well, but a better way is to keep ahead of them all the time.

Don't forget to plant the healthful string bean. They taste mighty good when winter comes. The Kansas Wonder is a very profitable one. Few, if any, excel it in this respect.

SAY "BAYER ASPIRIN" and INSIST!

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Paris Catacombs
The term "catacombs" has been applied to certain subterranean quarries in Paris which have been used since 1788 as burial places. It is said that 6,000,000 bodies lie in these catacombs, where the bones are arranged in fanciful designs along the sides of the passages.

Stamps Highly Prized
Among the rarest stamps are: The Alexandria stamp of 1845, 10 cents; Baltimore-Buchanan stamp of 1845; Boscawen stamp of 1846 and the Millbury stamp of 1847. The 24-cent Albany inverted stamp is also in demand.

Children Cry for

Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Charles H. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

AUCTION SALE!

The undersigned will sell at his farm located 10 miles south of East Jordan, 1 1/2 miles south of Pleasant Valley School, 6 1/2 miles east of Central Lake and 1 1/2 miles north of Hitchcock, on—

WEDNESDAY, April 6th

Commencing at 1:00 o'clock p. m., fast time, the following described property:—

Black Horse, 13 yrs. old, weight 1550	6-h. p. Gasoline Engine
Bay Horse, 15 yrs. old, weight 1350	Buzz Saw and Frame.
Cow, 8 yrs. old, due to freshen June 2.	4-inch tire Harrison Wagon
Cow, 6 yrs. old, due to freshen June 17.	Set Work Harness. Good Hay Rake
Cow, 6 yrs. old, due to freshen June 7.	Light Blacksmith Outfit, Bits, Augers, Anvil, Vice, Drills, Hammers, etc.
Cow, 9 yrs. old, due to freshen June 2.	8-20 Disk, good as new.
Cow, 5 yrs. old, due to freshen June 8.	DeLaval Separator No. 15, good.
Cow, 5 yrs. old, due to freshen June 27.	Drag. Plow
Cow, 4 yrs. old, not bred	Saws, Axes, and small Tools of all kinds.
Heifer, 2 yrs. old, due to freshen June 1.	Quantity of Household Furniture.
Yearling Heifer.	Two Sets Sleighs
Brood Sow, due to farrow April 20.	400 square feet of Linoleum.
10 Turkey Hens; 1 Gobbler.	Other articles to numerous too mention.

Watch Elimination!

Good Health Depends Upon Good Elimination.

RETENTION of bodily waste in the blood is called a "toxic condition." This often gives rise to a dull, languid feeling and, sometimes, toxic backaches and headaches. That the kidneys are not functioning properly is often shown by burning or scanty passage of secretions. Thousands have learned to assist their kidneys by drinking plenty of pure water and the occasional use of a stimulant diuretic; 50,000 users give Doan's signed endorsement. Ask your neighbor!

DOAN'S PILLS
60c
Stimulant Diuretic to the Kidneys
Foster-McMillan Co., Mfg. Chem., Buffalo, N. Y.

and published with the notice of the election, provide that the polls shall be opened at six o'clock in the forenoon, and may also provide that the polls shall be kept open not later than eight o'clock in the evening of the same day.

THE POLLS, of said election will be open at 7 o'clock a. m., and will remain open until 5 o'clock p. m., of said day of election, unless the Board of Election Inspectors shall, in their discretion, adjourn the Polls at 12 o'clock, noon, for one hour.

Dated March 1, 1927.

EDD. NEMECEK,
Clerk of said Township.

Fishes With Lungs

The bureau of fisheries says that some fish have modified lungs in the form of an air bladder, which acts as a lung structurally, but not functionally. Most fish breathe through their gills.

Folklore Museum

The following are perhaps the best-known museums in the world specializing in folklore: Nordic museum, Stockholm; Museum of Volkerkunde, Berlin, and the Museum of Popular Traditions in Paris.

BRONCHITIS—"FOLEY'S" GIVES SURE RELIEF.

Foley's Honey and Tar Compound relieves at once distressing, alarming bronchial symptoms. It loosens the harsh cough, raises phlegm easily, soothes the irritated mucous membrane, eases the disagreeable tightness that grows worse toward nightfall.

From Mr. L. M. Charleston, W. Va.: "I am glad to say that Foley's Honey and Tar helped me over a bad attack of bronchitis." It is a reliable medicine, safe and effective for coughs and colds in children and grown persons. Your druggist sells and recommends it. Ask or phone for it.—Hite's Drug Store. adv.

Judge of Probate.

Community Building

Importance of Paint Hard to Overestimate

Nothing freshens and beautifies the countryside more than paint. An improved road generally is the forerunner of a larger use of paint. And paint applied to the farm dwelling is just in the lead of better agricultural methods without, and a happier and better educated family within. A good coat of white paint has been known to raise the standard of living in an entire countryside.

A far-sighted banker in southern Arkansas, Carl Hollis, vice president of the Merchants & Planters Trust & Savings bank of Warren, has earned the title of "White Paint Hollis," because he refused a small loan to a farmer, but agreed to loan a larger sum provided the borrower would paint his house white. The farmer took him up. The example has been catching, and now there are many white-painted houses in that county.

Our cities are growing at the expense of the country. The best way to keep the boys and girls on the farms is to make things there more attractive for them. Many a farm wife and mother has been praying for better things—more comforts and labor savers and education for her children—and maybe for herself. God has sometimes answered such prayers through the husband and father—and the banker—with a coat of paint as a starter. Paint preserves and brightens all it touches. New paint awakens a new spirit, new aspirations, stronger determination and fresh courage.

Front Yard Reveals Character of Owner

The planting in the front yard of a city or suburban home occupying a rectangular lot of ordinary size is as much a part of the public street as is the parkway. It should be developed with this in mind.

While fault has been found with the Americans' method of discarding walls and fences and setting their homes where all may see, no defense is needed other than the example of the beautiful results which this practice has achieved in our garden suburbs.

But these results depend upon the extent to which the planting in front yards is in keeping with the nature of our front yards. The planting should harmonize with that in adjoining grounds. It should enhance the merits and screen the faults of the house architecture. And it should express the occupants of the home as their clothes should express them. The public aspect of the home grounds should not be out of keeping with the character of its occupants.

Attractive Small Homes

It is a common sight in residential sections of our cities to see unsightly rows of houses of the type which are built by the mile and sold by the foot. They are identical in design, planning and setting. If careful attention had been given to the fundamental principles of good planning and designing, these same dwellings could have been built with far more pleasing results, and at no greater expense. Those who build small houses become responsible not only for creating the desire to build attractively and economically, but also for preserving the ideals which lead people to build beautiful homes with loving hands and eager hearts.

Guarding Against Fire

One of the most useful safeguards against fire hazards in dwelling construction is the fire stopping of walls, partitions and floors. Fire tends to spread upward. Hollow walls and partitions, hollow spaces back of turning on masonry walls, and even hollow floors offer inviting runways for the rapid communication of fire from cellar to attic, and from side to side. The remedy lies in adequate fire stopping, which will make an all-lumber residence considerably safer against the spread of fire than masonry wall and the lumber floor construction without fire stops.

Shingle Thatch Attractive

To those who desire an unusual roof treatment, the shingle thatch offers many attractions. It has become very popular for use on country houses, clubhouses, mountain camps, etc., as well as city residences. It produces a remarkably effective reproduction of the old-fashioned straw thatch and is often stained the color of weathered straw.

The Good Newspaper

A good newspaper is the community father; it advises, criticizes and compels. The editors are teachers, preachers and statesmen combined, and my hope is they will exercise their great power as justly as possible.—E. W. Howe's Monthly.

Community Co-operation

Instead of feeling the pulse of the community, feel your own pulse. If in these days when there is so much to be done, it does not beat in response to society's wants and needs, there's something the matter with you if with no one else.—Grit.

Skim Milk Good for Farm Stock

Can Be Made Into Concentrated Product for Poultry and Hogs.

(Prepared by the United States Department of Agriculture.)

Surplus skim milk at creameries and city milk plants can be made into a concentrated product suitable for poultry and hog feeding, says the United States Department of Agriculture. Improved methods of soured and concentrating skim milk, developed by the bureau of dairy industry, make it possible to manufacture a product that will keep without spoiling, thus overcoming the chief difficulty experienced in the past in using skim milk in this way. The method is described in department circular 404 C, just issued and now ready for distribution.

Special Culture Used.

Concentrated skim milk must have an acidity high enough to keep it from spoiling. The ordinary lactic bacteria in milk do not produce sufficient acidity for this purpose. In the new method a special culture which develops a high acidity is used. By this method the bureau has been able to develop an acidity in concentrated skim milk of 8 per cent, which is sufficient to keep the product indefinitely without appreciable change.

Many concerns are now making poultry and hog feed from skim milk concentrated by these improved methods. The product usually sells from 3 cents a pound at the factory when sold in car lots to 4 cents in small packages. No difficulty has been experienced in disposing of large quantities, either to poultrymen and hog raisers in the vicinity of the plant or to jobbers who specialize in poultry feeds.

Estimated Cost of Production.

At an estimated production cost of 1½ cents per pound for the product, a price of 3 cents at the factory would net about 25 cents per hundred for skim milk, and at 4 cents the return would be about 58 cents. As a means of disposing of surplus skim milk this product has certain advantages, says the bureau of dairy industry. It is a staple product with an established market. It can be made at any season of the year and stored to supply a uniform demand, or it can be sold to jobbers whenever a sufficient quantity for shipment has accumulated.

Copies of the circular may be obtained, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

Three Good Methods of Treating Oats for Smut

Three methods of treating seed oats for control of smut have been suggested. In the formaldehyde treatment the grain is spread on a clean floor or canvas and sprinkled with a solution of 1 pint of formaldehyde to 40 gallons of water. The solution is applied at the rate of three-fourths of a gallon to each bushel as the grain is shoveled and then the pile covered with a blanket or canvas for two or three hours. After the seed has been spread to dry, it should be sown as soon as possible to avoid injury to germination.

In the dry method, 1 pint of formaldehyde is diluted in 10 gallons of water. This being a stronger solution, only 1 pint per bushel is required and may be spread with a vapor sprayer, after which the grain is covered for two hours and then spread to dry.

The dust treatment, though more expensive, has an advantage inasmuch as the grain may be treated at any time before seeding, without impairing the germination. The dust is prepared by thoroughly mixing and pulverizing together 2 pounds of corrosive sublimate and 1 pound of copper sulphate or blue stone, and dusted on, 3 ounces to each bushel of grain.

FARM NOTES

Idle land is an expensive luxury.

One of the best uses of waste land is for growing a farm wood lot.

Lime put on the soil in the fall is best for the crops which follow and saves labor in the spring also.

Mixtures of sudan and soy beans grown together did not yield as much as sudan alone, but the quality of the hay was improved in test experiments carried out.

Late fall and winter dressings of manure on old stands of alfalfa have increased the hay yields by nearly one ton per acre, when the manure was applied at 2½ tons annually.

The sweet clover plant is hardy but that does not mean it needs no care or management. This crop is used in a number of different ways and its proper management is, therefore, dependent very largely upon the use made of it.

POULTRY

SUNSHINE AIDS IN EGG LAYING

Tests made at different experiment stations as well as the results of practical poultrymen have demonstrated that direct sunshine serves two useful purposes. It not only helps the hen to see, but it also enables her to make proper use of the minerals in her ration. This is especially true of the lime that is used in making egg shells. In young chickens the effect is noticed in the formation of bones. Chicks not getting sunshine develop leg weakness due to poor assimilation of minerals in the ration.

Hens kept in houses that are entirely closed with glass windows do not get the beneficial influence of the sunshine, because glass does not allow the ultra-violet rays to pass through and they are the rays that carry the power of helping in the assimilation of the minerals. It is a good plan, therefore, to provide the hens with outside scratching lots where they can get the sunshine. It is also a good plan to put some of the glass substitutes which allow the ultra-violet rays to pass through, in some of the windows, or to feed cod-liver oil in the ration. Cod-liver oil contains vitamins that act as a substitute for sunshine in helping to assimilate minerals.

Recent experiments show that the sunshine not only helps in the assimilation of minerals, but that it also helps hatchability. At the Kansas station hens that were allowed access to sunshine showed a hatching record of 78 per cent as compared to 52 per cent for hens that were kept in houses with glass windows.

Early Hatched Chicks Are Best Winter Layers

Late hatched pullets rarely lay until the middle of the winter or early spring. Chickens should be hatched not later than the last of May if they are expected to lay eggs in the late fall or early winter. Often it is difficult to get fully matured pullets before winter sets in. This can be done, however, by early hatching and proper feeding of the pullets during the later summer and early fall. If the pullets do not receive their proper growth by November and show signs of laying, it is doubtful whether they will lay to any extent until the following spring. The cockerels should be separated from the pullets as soon as possible, thus giving pullets plenty of opportunity to develop size. If they are allowed to flock with the old hens and cockerels they may be stunted, as it is impossible for them to get their proper allowance of food. Keeping them out on the range separated from the rest of the flock is the best method of handling them.

Best Quality Eggs Are Produced in the Spring

Early spring is the fowl's natural breeding season and the best quality eggs are produced at this time. These high quality eggs produce strong chicks, the mortality being lower than when late hatching is practiced. The conditions for chicks are more favorable in the spring than at a later season. The incubator is better ventilated and the hens have less trouble with parasites than in hot weather.

There is also an abundant green food supply which contains the necessary vitamins for proper growth. The early spring weather is much easier on the young chicks than are the hot days of June.

Good Test for Eggs

An egg may appear to be satisfactory, but when the contents are examined it may be found to be worthless for incubation. Some eggs may have cracked shells. These may be detected by the use of the tester or candler such as is used in testing eggs during incubation. Another method of detecting cracked shells is to tap two eggs gently together, and if there is a slightly ringing sound they may be considered all right. If there is a dull sound, one of the eggs is cracked and should be avoided.

Goslings With Weak Legs

Goslings that are weak in the legs and very thin sometimes are infested with worms. One remedy is to mix one-fourth pound sulphur, one-fourth pound epsom salts and two ounces powdered copperas in twenty-five pounds of the mash. The mash containing the medicine is used once each day. Goslings sometimes have congestion of the brain often due to fright, digestive disorders or worms. Two teaspoonfuls of castor oil to each gosling is sometimes a useful remedy.

Spread of Diseases

One of the common causes of the spread of infectious diseases among chickens is allowing soft feed to get mixed with the litter. If flat boards are used for feeding, have them wide enough so that the feed will not be scratched or carried off. It is better still to nail strips around the boards making them tray shaped, thus to prevent any chance of trouble from this cause. Feed that gets into the litter or on the ground should be removed promptly and never fed to the chicks.

"BATTLING BUTLER"

See Buster win the laugh championship in the funniest prize fight ever fought.

Comedy—"It's All Over Now."
Admission—10c and 25c

Briefs of the Week

Mrs. Samuel Ramsey is home from Cadillac for a visit.

Barney Milstein was a Detroit visitor first of the week.

Miss Jean Bechtold spent the week with relatives at Bellaire.

Miss Lillian Gorman is visiting relatives at Grayling this week.

Miss Lucille Ramsey of Cadillac is here this week visiting friends.

Miss Gwendolyn Ross was at Bellaire this week visiting friends.

Charles Case went to Saginaw this week, where he has employment.

Mr. and Mrs. John Lendarf of Frankfort visited friends here Sunday.

Earl Hager was home from the Soo the past week for a visit with his family.

Mrs. Ted LaCroix who has been at Detroit for a visit, returned home last Saturday.

30% off on all Stamped Goods for next 10 days. Eff an Dee Variety. adv.

Born to Mr. and Mrs. George W. Jenkins, a daughter, Kathleen May, March 30th.

R. H. Barnette returned Sunday from a business trip to Muskegon and Grand Rapids.

Mrs. Belle Whiteford underwent an operation Wednesday at the Charlevoix hospital.

Miss Elizabeth Sidebotham is home from her studies at Alma for the spring vacation.

Consult W. G. Searle, Optometrist, at Palmiter's Jewelry store, Friday, April 8th. adv.

Mrs. Glenn Thomas has been at Grand Rapids the past week for a visit with relatives.

Ralph Hodgkinson is here from Lansing to visit his wife, at the home of Mrs. Fred Richards.

The Banks of East Jordan will be closed next Monday, April 4th, it being General Election Day.

Miss Marjorie Mackey who is attending college at Milwaukee, Wis., is home this week for a visit.

Mr. and Mrs. H. A. Kimball who have spent the winter months in Florida, have returned home.

Mr. and Mrs. Joe Clark and children, and his mother, Mrs. A. B. Clark are visiting relatives at Lansing.

Mrs. Chester Gilmoth returned to Muskegon Wednesday, after a visit with Mr. and Mrs. Ernest Sandel.

Every Red Tag means money saved during our 10 Day Sale, look for them. Eff an Dee Variety. adv.

Mr. and Mrs. W. A. Stroebel and children are spending the week with friends at Saginaw, Detroit and other points.

Mrs. G. A. Lisk, who underwent an operation for goitre at the Charlevoix hospital, Wednesday, is getting along nicely.

Mrs. Floyd Rice and children of Charlevoix were here this week for a visit with her parents, Mr. and Mrs. W. R. Painter.

Mrs. C. Walsh who has been on an extended visit with friends at Ada, Grand Rapids and Detroit, returned home last Friday.

The Presbyterian Ladies Aid will meet with Mrs. B. J. Benker, Friday, April 8th. Mrs. Kate Bretz will assist in entertaining.

Misses Dorothy and Evelyn Webster entertained about 25 of their friends Tuesday evening. Progressive miscellaneous games were played.

Mrs. Wm. McPherson and Mrs. Wallace McPherson left first of the week to join their husbands at Muskegon, where they will make their home.

Farmers wanting to grow String Beans for the Canning Factory, can get contract at the East Jordan Co-operative Ass'n. adv. 11-3

Mrs. Julius Johnson and daughter, Miss Elsie, left Thursday for a visit with relatives at Detroit. From there they will go to Jackson, Mich., where they will make their home.

The following students are home for spring vacation from their studies at Mt. Pleasant Normal—Dorothy Webster, Marie McDonald, Carlton Bowen, Marguerite Rogers, Jasper Stallard, Annie and Helen Golden and Frances Rogers.

A party was given Wednesday evening in honor of Miss Lucille Ramsey of Cadillac at the home of Mrs. Harry Simmons. There were fifteen guests present, although two unexpected guests arrived somewhat late, under assumed names of Robina and Priscilla. A delightful evening was spent in singing and dancing, after which a luncheon was served.

Save 25 to 40% during our annual Clean-Up Sale now on. Eff an Dee Variety. adv.

Harry McHale spent the week with friends in Muskegon.

Mrs. Walter Cook is visiting her parents at Montague.

Miss Margaret Cook was home this week from her studies at Big Rapids.

Mrs. C. J. Barrie and Miss Helen Ruhling are visiting relatives at Flint.

Mrs. John McKinnon and daughter, Eunice, visited friends at Grayling this week.

Mrs. Alonzo Murray returned last Saturday from a visit with her sister at the Soo.

Mrs. Roy Houston returned to Detroit Saturday, after a three weeks' visit with her parents, Mr. and Mrs. Dett Evans.

Mrs. Kit Carson and Miss Eva McBride of Kalamazoo, and Miss Aura McBride of Martin, Mich., are home for their spring vacation.

Mr. and Mrs. Leo LaLonde and daughter, Beatrice, Mr. and Mrs. Lawrence LaLonde, and Joseph Nemecsek motored to Flint and Detroit first of the week.

15% off on all Picture Frames made to order, for 10 days. Eff an Dee Variety. adv.

Camera Pistol

A camera pistol that should be useful to the police in tackling criminals has been invented by Adelbert Szard. It produces automatically and simultaneously with each shot fired, a picture of the object aimed at, even in darkness.

22,000 DEATHS FROM AUTOMOBILES

This was the number estimated for 1926. Serious personal injury and property damage accidents are even more frequent. Can you afford to run your car without Automobile Liability Insurance to protect you from damages. Consult a Maryland Casualty Agent about such insurance.

State Bank of East Jordan "THE BANK ON THE CORNER"

"Strength and Ability Plus the Willingness to Serve."

Coming April Fifth

Tuesday, April 5th is the date when Dr. J. Leahy, the Optometrist will again visit East Jordan. Office at the Russell Hotel. Headache, dizziness, nervousness, crossed eyes and all other symptoms of eye strain corrected. Difficult cases solicited. adv. 12-2

Forms of Jasper

Jasper is an impure form of crystalline quartz. The color is usually red, brown or yellow, according to the amount of iron oxide contained in the stone. There is also a form of jasper which is dark green and opalescent. This is probably the quality spoken of in the Bible as one of the jewels on the breastplate of the high priest and as a foundation stone of the wall of the New Jerusalem.

SHORT TALKS BY THOUGHTFUL MOTHERS

A California (Long Beach) mother speaks: "Only a mother who has passed through anxious nights of fear of croup, hearing that hoarse, croupy cough constantly, can appreciate our feeling of gratitude toward Foley's Honey and Tar Compound. It stopped Junior's dreadful cough the first night he took it and it was a great relief to see him drop into a quiet sleep." Good also for whooping cough, measles cough and heavy wheezy breathing. Sold and recommended everywhere.—Hite's Drug Store. adv.

Reform Must Be Early

Men and nations can only be reformed in their youth; they become incorrigible as they grow old.—Rousseau.

Life's Closing Days

Old men's lives are lengthened shadows; their evening sun falls coldly on the earth, but the shadows all point to the morning.—Richard.

DAIRY THE DAIRY

GOOD COW OUTDOES WORK OF A HORSE

A horse would have to work continuously slightly more than 18 1/2 hours every day to do the same amount of useful work as the dairy cow. Prof. W. W. Yapp, prominent dairy cattle judge and a member of the dairy department of the college of agriculture, University of Illinois, makes this comparison to show that it is necessary for the dairy cow to have a strong constitution in order to do her work day in and day out, month in and month out and year in and year out. Such a constitution is indicated by a full, broad chest and a strong, vigorous, rugged appearance, he says.

In addition to constitution and general health, there are three other characteristics of a dairy cow that should be taken into consideration in picking out a cow, according to Professor Yapp. These are dairy tendency, feeding capacity and development of the milking organs. These three characteristics, together with constitution and general health, are associated with the ability of the animals to produce milk and butterfat. The degree to which the cow excels in all of them is taken as the indication of her probable productive ability.

Dairy tendency in reality characterizes the dairy cow and is understood to mean her ability to utilize feed for milk and butterfat production. Dairy tendency in highly developed dairy cows is so pronounced, so well developed, that the animal will, if not given enough feed, deplete her own body tissues, even to removing the calcium from her bones in order to supply the necessary constituents for the milk which she produces. The extreme development of this character is highly prized by dairymen and is among the first characteristics to be considered in choosing an animal.

The constituents of which milk and butterfat are composed must come from the feed and water consumed by the dairy cow. Furthermore, all of the body processes including digestion and assimilation require energy which must come from feed. Therefore, it is necessary for the cow to have ample capacity to enable her to eat enough feed for all of these processes. A Holstein cow weighing 1,500 pounds and giving 40 pounds of 3.5 per cent milk requires for all purposes, 45 pounds of silage, 15 pounds of alfalfa hay, 7 pounds of ground corn, 4 pounds of wheat bran and 1 pound of oil meal or a total of 72 pounds of feed. A cow making exceptional productions sometimes eats 150 to 200 pounds of feed, exclusive of water, containing as much as 50 to 60 pounds dry matter. Furthermore, the digestive system of the cow is designed by nature to most efficiently utilize bulky feeds. Such feeds further tax the digestive system of the individual.

A large well-developed udder characterizes the dairy cow in heavy flow of milk. The entire mammary system, including udder, milk veins and milk wells is correlated to production. It is seldom, indeed, that cows with small and poorly formed udders produce large yields of milk and fat. All of these characteristics are important in the selection of a dairy cow. It is seldom advisable to choose an animal which is especially strong in some but not in all of these characteristics. Even with strict observation of the form of a dairy cow, such observations are at best but an approximation of the productive capacity of the animal and are best used to detect wide, rather than small, differences in production.

Many Dairy Calves Are Overlooked in Winter

Many dairy calves are neglected during the winter months because the owners feel that feed is too expensive and that it does not pay to give the calves proper care. When these same men try to buy heifers or young cows, however, they find that good ones are very expensive. Calves should have skim milk at least until they are six months old. They will come through the winter in fine shape when this is available along with a limited amount of grain and good alfalfa hay. Such calves should gain around one pound per day or slightly more. A fine heifer will result when this gain is not lost by improper feeding later in the life of the calf.

Some of the best grains to use along with skim milk in calf feeding are cracked corn, ground oats, ground barley and bran. These can be used alone or in combination and supply the needed fat that has been taken out of the skim milk. Corn is especially good as a feed to supply fat.

Machines Save Labor

Milking machines will save labor if a sufficient number of cows are being milked. The herd should number at least ten cows before a milker is a time-saving investment. A mechanical milker will not injure the udder or the cow or cause her to dry up if reasonable care is observed in its operation. Stripping after the machine is necessary to avoid drying up of the cow. Do not leave the milker on the cow too long after practically all the milk is drawn.

Josephine Dunn

Film men say that Josephine Dunn is one of the screen finds of the past year. She has the leading feminine role in "Love's Greatest Mistake." Miss Dunn made her screen debut in "Fascinating Youth." She is a decided blond.

WHEN I WAS TWENTY-ONE

BY JOSEPH KAYE

At 21—David Starr Jordan Taught a University Curriculum for \$25 a Week.

"AT TWENTY-ONE without any worldly experience, and ignorant and more or less scornful of the social duties supposed to be incumbent on tutors, I arrived at Lombard college, Galesburg, Ill., to begin my work as professor of natural science.

"I worked very hard at Lombard, did some excellent teaching and developed a certain degree of enthusiasm in the small body of students of whom there were not over a hundred in the entire collegiate department, with only eight in the graduating class.

"Natural Science," I found, was an expansive subject. My class demanded classes in zoology, botany, geology, mineralogy, chemistry, physics, political economy, Paley's "Evidences of Christianity" and, incidentally, German and Spanish. I also had charge of weekly "literary exercises" and in off hours I served as pitcher of the student ball team.

"My salary was \$1,300 a year.—David Starr Jordan."

TODAY—Mr. Jordan is perhaps grateful for those multitudinous duties of his early days; they gave him a most extensive experience in the teaching of the sciences which he has since utilized to good advantage. For David Starr Jordan is one of the greatest teachers of the natural sciences that this country has, accomplishing his work both at university classes and through the medium of numerous books.

How It Started

By JEAN NEWTON

"CORPORATIONS HAVE NO SOULS"

IN THE same sentiment as "the public be damned," which, fairly or unfairly, is the attitude often attributed to corporations, we frequently hear the saying that "Corporations have no souls."

Although the words have no alien sound to American ears, it is in England that the saying had its origin, its first recorded usage being in a famous lawsuit that was fought in the English courts.

Its authorship is credited to Sir Edward Coke, who during the proceedings in the case of Sutton's hospital, is recorded to have said: "They (corporations) cannot commit treason nor be outlawed nor excommunicated, for they have no souls." Subsequently this was affirmed by Lord Thurlow, who is recorded as having said: "You never expected justice from a corporation, did you? They have neither a soul to lose nor a body to wick."

A Modern Man

"You do a lot of baking, Mrs. Newlywed," smiled Grocer Bill.

"Yes," the young bride answered. "My hubby is a cake eater."—Progressive Grocer.

Community Building

Conditions in Alabama Will Apply Elsewhere

In no part of this country is it easier to have beautiful gardens than it is in Mobile county, whether in the city, or in outlying districts.

The lay and general character of the land is favorable, and the season for flowers and shrubs is all the year. Nor is landscaping difficult. It is never difficult where the land rolls, or in flat areas even where the soil is right and climatic conditions are favorable to the growth of plants. All these favorable conditions are to be found in this city and county, and that is one reason why we have so many attractive gardens here.

Probably we are not making the best possible use of our exceptional natural opportunities in all cases; but gardens here have long been prime assets, and they are likely to become even more important as we make progress in beautifying plans and work. There is not a home in the city or county of Mobile that ought to be without a garden of rare beauty, for it does not take much work or great expense to keep gardens in first-class condition in this part of Alabama.

Certainly nothing adds more to the attractiveness of the home setting than a beautiful garden.—Mobile Register.

Method of Speeding Up Brings Progress

"A city should first be sold to its own people," once said Mr. George C. Smith of Baltimore, a nationally recognized authority on the industrial possibilities of a community.

Once realtors, bankers, railroad men, department-store owners and managers tell the same consistent story about the industrial advantages of their city, the cumulative effect is certain to make itself felt.

Growing industries offer the best opportunities to a city's business progress. When a plant attains a certain capacity the directors will consider the advisability of building a branch elsewhere. Instead of risking the likelihood of overexpanding the old plant, thus a city that has called on this industry with personal representation is more likely to get consideration than many other cities which have been content to circulate.

New enterprises are always possible. The man who knows a business or the man who is able to finance a business is indispensable. Such men in a city will usually solve the bulk of the problems incidental to securing new industries and developing the city's present industries.

Roadside Markets

There ought to be a corking good suggestion to the average thoughtful farmer in the fact that last year in this country the roadside markets offering products to passing motorists did a business aggregating a little matter of \$25,000,000. Why not more roadside markets? Why not go at the thing systematically, and in a constructive way? Why not standardized roadside markets handling comprehensive and specifically advertised lines? Why not a systematic effort to please the public in place of a cunning attempt to skin somebody by unloading inferior or impossible goods on the stranger at the gate? The filling station is bound to give good service and honest goods and honest prices. The roadside market ought to build upon standardized honesty and popularize instead of discrediting the farmer's roadside stand.—Lafayette Journal and Courier.

Champion Tree Planter

T. C. Luther of Mechanicsville, N. Y., celebrated his sixty-third birthday in an unusual celebration, because Luther is an unusual man. The record of being the champion tree planter in America was already his. But he started out on his latest birthday to break that record. He began on a program to plant a million more pine trees. President Pack of the American Tree association voiced the opinion that Luther is putting more life into good use than any other man in this country, and that by so doing he is setting an example to the American people by leaving a birthday present for succeeding generations to share and enjoy. It is an example that should prompt emulation in all parts of the country in which forestation on a large scale is feasible.

Home Owners Live Longest

Insurance companies claim to be able to show by statistics gathered over a long period of years that those who provide for comfort during declining years live longer than do those who give no thought of tomorrow.

Real estate men and bankers concur in this opinion, the former insisting that owning one's home is the best kind of insurance against devastation of health by fear and worry.

To be constantly worried about moving, increased rents and the other cares that make the renter's life one of uncertainty tends to shorten life, it is argued.

Appearance of Town

The town that attracts strangers is often the one that takes the most interest in its physical appearance and sanitary condition.—Ashland (Ala.) Progress.

Farm Woodlot Made to Return Profit

Certain Trees of Low Value Should Be Cut.

Harvest time in the farm woodlot is here. Winter is the logical time for the farmer to cut his fuel, fence posts and such timber as he may need, says F. G. Wilson, extension forester, at the Wisconsin College of Agriculture.

"Weeding" the woodlot should be practiced when the wood is harvested. Certain trees, such as scarlet and black-oaks, ironwood, red maple and pin cherry, have such a low value that they should be considered as weeds. Cutting them for fuel and permitting other and more valuable trees to grow in their place is advised by the forester.

The farm woodlot may be made to yield a profit if given proper care, he states. For best results the woodlot must not be grazed and it should be protected from fires as much as possible. Unsound and badly formed trees should be removed and used as fuel. Overmature trees have reached, or passed the point of greatest value and should be cut and disposed of to the best advantage, either as timber or fuel.

Another advantage of removing trees of inferior varieties is to prevent them from seeding in the openings. Where young growth is lacking, seedlings of valuable species such as walnut, black cherry, red oak, white oak, ash, basswood and pine may be placed in the vacant areas of these varieties seeded there.

Trees which are standing too thickly will grow spindly and many will die and decay. Thinning them, saving the best, should result in more timber of a much higher quality. Waste land, of which there is some on most farms, can be profitably utilized if timber is grown on it and given the proper care, in the opinion of the specialist.

Sweet Clover Harmful in the Alfalfa Fields

Farmers who wish to sell a good quality of alfalfa seed cannot afford to allow sweet clover plants to remain in the crop. A few hours or days spent in removing these plants will be well repaid in the price received for alfalfa seed. The plants can be pulled or cut below the surface of the ground. Most buyers of seed object to the presence of sweet clover in alfalfa and a small amount of it may result in rejected shipments, loss of sales and various items of expense.

Buyers of certified seed expect to receive good seed and not a mixture. Sweet clover is a hindrance to the production of superior alfalfa seed. Through the extensive planting of sweet clover the seeds have become very general in the ground and it has become increasingly difficult to grow alfalfa without some sweet clover appearing in the seed crop either from volunteer plants in the field or from handling the alfalfa after sweet clover.

Facts for Poultrymen Found in Experiments

Extensive investigations in breeding and feeding of poultry were carried on by the bureau of animal industry, United States Department of Agriculture, during the last fiscal year, according to a report of the chief of that bureau. In experiments with Rhode Island Reds and Single Comb White Leghorns for increased egg production, there was a higher proportion of 200-egg records than during any previous year.

Other experiments with poultry involved chick mortality, hatchability and fertility of eggs, inheritance of egg production, and various experiments in feeding for egg production. In feeding tests for egg production, it was found that omitting limestone, a shell-forming ingredient, from the ration, reduced egg production 50 per cent.

Soy Beans Are Better Protein Feed Than Corn

It is usually a good practice to sow soy beans with corn when the corn is to be hogged off, because the bean supply is a better protein feed than corn, and for this reason the soys are worth more than the corn they displace in the crop. From a soil fertility standpoint the beans would not have a high value, though there might be some. It depends on conditions a good deal. On very poor land or land very low in nitrogen and humus, the soys would have more value; but on good corn land which will grow 40 to 50 bushels of corn per acre, the beans would be the most likely to have derived about all the nitrogen they contain from the soil, and hence there would not be any new supply of nitrogen added to the soil.

High-Yielding Pear Tree

The Bartlett pear produces most of its fruit on spurs which ordinarily live for many years. One of the requisites of a high-yielding pear tree is that it have an abundance of vigorous spurs well distributed over the tree. The pruning should be of such a nature as to avoid shading the spurs by dense foliage; to keep the fruiting wood in a healthy, vigorous condition; and to provide new spurs to replace the old and weak spurs which are liable to die during harvest.

Just as pure as it is sure!

FOLEY'S HONEY AND TAR COMPOUND

for all coughs and all ages

BUY IT EVERYWHERE THE SYMBOL OF PURITY

HITE'S DRUG STORE

Rub Rheumatic Pain, Soreness, Stiffness

Rub Pain right out with small trial bottle of old "St. Jacobs Oil."

What's Rheumatism? Pain only. Stop drugging! Not one case in fifty requires internal treatment. Rub soothing, penetrating "St. Jacobs Oil" directly upon the " tender spot" and relief comes instantly. "St. Jacobs Oil" is a harmless rheumatism and sciatica liniment, which never disappoints and cannot burn the skin.

Lumber up! Quit complaining! Get a small trial bottle from your druggist, and in just a moment you'll be free from rheumatic and sciatic pain, soreness, stiffness and swelling. Don't suffer! Relief awaits you. Old, honest "St. Jacobs Oil" has relieved millions of rheumatism sufferers in the last half century, and is just as good for sciatica, neuralgia, lumbago, backache, sprains and swellings.

RED PEPPER HEAT ENDS RHEUMATISM

Red Pepper Rub takes the "ouch" from sore, stiff, aching joints. It cannot hurt you, and it certainly stops that old rheumatism torture at once.

When you are suffering so you can hardly get around, just try Red Pepper Rub and you will have the quickest relief known. Nothing has such concentrated, penetrating heat as red peppers. Just as soon as you apply Red Pepper Rub you will feel the tingling heat in three minutes it warms the sore spot through and through. Pain and soreness are gone.

Ask any good druggist for a jar of Rowles Red Pepper Rub. Be sure to get the genuine, with the name Rowles on each package.

TRY SULPHUR ON AN ECZEMA SKIN

Costs Little and Overcomes Trouble Almost Over Night

Any breaking out of the skin, even fiery, itching eczema, can be quickly overcome by applying Mentho-Sulphur, declares a noted skin specialist. Because of its germ destroying properties, this sulphur preparation instantly brings ease from skin irritation, soothes and heals the eczema right up and leaves the skin clear and smooth.

It seldom fails to relieve the torment without delay. Sufferers from skin trouble should obtain a small jar of Rowles Mentho-Sulphur from any good druggist and use it like cold cream.

STOP CATARRH! OPEN NOSTRILS AND HEAD

Says Cream Applied in Nostrils Relieves Head-Colds at Once.

If your nostrils are clogged and your head is stuffed and you can't breathe freely because of a cold or catarrh, just get a small bottle of Ely's Cream Balm as any drug store. Apply a little of this fragrant, antiseptic cream into your nostrils and let it penetrate through every air passage of your head, soothing and healing the inflamed, swollen mucous membrane and you get instant relief.

Ah! How good it feels. Your nostrils are open, your head is clear, no more hawking, snuffing, blowing; no more headaches, dizziness or struggling for breath. Ely's Cream Balm is just what sufferers from head colds and catarrh need. It's a delight.

Colds Be quick—be sure

Deal promptly with a cold. Use the most efficient, most complete help. That is HILL'S. It is so ideal that we paid \$1,000,000 for it. HILL'S stops the cold in 24 hours, checks the fever, opens the bowels, tones the entire system. Millions now employ it. Start it today.

HILL'S Cough-Remedy-Quinine. Be sure you get HILL'S in the red box with portrait. At all druggists—30c.
