

Charlevoix County Herald.

VOLUME 31

EAST JORDAN, MICHIGAN, FRIDAY, OCTOBER 14, 1927.

NUMBER 41

Annual Meeting Fair Association

**NEXT YEAR'S FAIR TO BE HELD
LAST WEEK IN AUGUST.**

The annual meeting of the Charlevoix County Agricultural Society was held at the offices of the Peoples State Saving Bank in East Jordan last Saturday, Oct. 8th.

President, F. R. Bulow, Treas. Frank F. Bird and practically the full board of directors were present.

The Directors re-elected Vice President Richard Lewis, Secretary Kit Carson, and Marshal Robert Barnett. Standing Committees and Division Superintendents were appointed. H. A. Craig of Charlevoix, elected a director in September, decided he could not give sufficient time to the work, and tendered his resignation. H. Korthase of Boyne Falls was appointed by the directors to fill the vacancy.

In appreciation of his many years of service to the Association, the directors voted to place R. S. Shapton of Charlevoix on the membership honor roll. Mr. Shapton's term of office as director expired last month and he declined to succeed himself.

It was voted to hold the 1928 annual exhibit the last Tuesday, Wednesday, Thursday of August—28th, 29th, 30th. Plans for the Forty-fourth Annual were formulated, and next year's event promises to exceed those of previous years in many features. Much business connected with closing up the 1927 Fair was transacted, and it was found that the Association's finances were in a much better condition than a year ago.

The Merchants Side

This buying at home idea has two sides. Merchants who neglect to advertise, who fail to shout their wares, cannot complain when buyers, want-something, order it from a catalog where they see it instead of tramping over the town to find out if Mr. So and So has it.

We know of business men in East Jordan who think it is a crime to send money away from town for merchandise, or to patronize the products of out-of-town concerns, when local plants and merchants have similar things to sell. These same men, however, neglect to do what is first done by mail order people, advertise.

The Charlevoix County Herald has talked keeping money at home for many moons. Most merchants and business men have agreed with us. Some of them, when approached for advertising, grin and suggest that the public knows all about them. Others, keenly appreciating the advantage of keeping their name in print, give us advertisements large or small, as their circumstances happen to be. No cross word puzzler will have to perplex his brain to discover who is going to get most of the business of the people of East Jordan.

Owosso—For the first time in the history of Shiawassee county, a violator of the game laws has been sentenced to jail. Samuel Atkins, Owosso blacksmith, drew—10 days for shooting out of season. He also was fined \$50.

Lansing—A survey of the expense accounts of State employes has been undertaken by Frank D. McKay, State treasurer. He believes many thousands of dollars a year can be saved by cutting off employes who are not entitled to the expenses they are receiving.

Lansing—Michigan Concord grapes this year are of exceptionally high quality, according to a test completed by the State Department of Agriculture. The grapes have shown a sugar content as high as 18 per cent, as compared with an average of 17.2 per cent. The lowest percentage shown in the laboratory tests was 15.6.

Lansing—A motion that Arthur C. Rich, Battle Creek youth serving a life term in the Michigan State Prison at Jackson for assault, be released on bail pending the outcome of attempts to gain a new trial for him through the United States Supreme Court, has been filed in the Michigan Supreme Court. Rich was convicted of attacking Louise King, a Battle Creek College co-ed, on the golf links of the Battle Creek Country Club.

Ann Arbor—The University of Michigan's observatory at Bloemfontein, Orange Free State, Africa, is nearly finished, according to Prof. Ralph H. Curtis, director of the university observatory. Prof. Richard A. Rossiter, director of the operations at Bloemfontein, expects observations will begin before the end of December. Eight years of research work, principally on double stars, is to be done at the southern observatory.

Rebec-Sweet Post Elect Officers

At the regular meeting of Rebec-Sweet Post No. 227 American Legion held last week, the following officers were elected for the ensuing year:—
Commander—Thomas St. Charles
Adjutant—Edward Kamradt
Historian—Leslie Miles
Chaplain—Rev. Roy L. Harris
Publicity Officer—F. R. Bulow
Executive Committee—Wm. Murphy, Russell Barnett, Glenn Thomas, Sergeant-at-arms—Theodore Zess.
Installation will be held next Monday night, Oct. 17th, preceded by a chicken supper.

Michigan Fire Prevention Week

GOVERNOR GREEN URGES CITIZENS TO OBSERVE THIS WEEK.

To the People of Michigan:

More than Seventeen Million Dollars worth of property was destroyed by fire in this State last year. The removal of much of that vast sum from the assessment roll shifted the taxing of millions of values to the purses of others, many of whom themselves were energetic in preventing the spread of fire on their premises. In that year flames claimed the lives of three hundred thirty-nine Michigan people. Lives of many others imperiled. Competent investigators counsel us that seventy-six per cent of these disasters would have been prevented had diligence and care been exercised. The effect of fire waste is State-wide, though the task of overwhelming the evil almost wholly with the individual, with the farmer, the villager and the city dweller.

Fire prevention is vital to public welfare. To stimulate consciousness of the continual presence of danger from that source, and with the object of helping to prevent in some measure needless waste of life and property, I do especially designate the days including

**October Ninth to October Fifteenth
1927**

Michigan Fire Prevention Week
Citizens, individually and collectively, are urged to make special effort during that week to reduce the hazard from fire, to dispose of accumulated waste material inspect heating equipment, chimneys, wiring and ventilation; and make repairs necessary to safety. Public and private places where people congregate should be examined. Safeguards necessary to protect life and property should be provided. Fire drills and educational exercises in schools will be fitting. Press and pulpit, always our support in furtherance of mercy, wisdom and safety, now again are relied upon to render their quota of inspiration for the common security. Through reasonable endeavor, citizens may make the coming twelve months the year of their greatest conservation.

Given under my hand and the seal of the State, at the Capital in Lansing, this Eighth Day of September, in the year of Our Lord One Thousand Nine Hundred and twenty-seven, and of the State of Michigan the Ninetieth.

Fred W. Green,
Governor.

John S. Haggerty
Secretary of State

Iron Mountain—Circuit Judge Richard C. Flannigan, of Norway, has accepted the appointment to the Michigan Supreme Court, tendered him by Gov. Fred W. Green. He will succeed Justice Joseph S. Steers, of Sault Ste. Marie, whose retirement was caused by ill health. Judge Flannigan, whose judicial circuit, the Twenty-fifth, comprises the counties of Delta, Dickinson, Iron, Marquette and Menominee, is one of the best known judges in the state.

Buchanan—The second badger to make its appearance in Berrien county in six years and the first to be killed by dogs, is dead after having waged a losing fight with three collie dogs belonging to William F. Cauffman, a farmer residing five miles from here. The dogs are exhibiting many scars of the terrific battle which lasted an hour. The badger was five months old, a female, weighed 20 pounds and was 20 inches in length. Its claws were over two inches long.

Manistee—Mrs. Augusta Kreuger celebrated her one hundred and third birthday, at the home of her daughter Mrs. Emily Lidke, here recently. She was born in Posen, Germany, in 1824, and came to Manistee 47 years ago. She was the mother of eight children, three of whom are living. She has so many great grandchildren that she was unable to count them. She attributes her longevity to "hard work and sane living, and always keeping her house spotlessly clean and sanitary."

Left Flat

Flying Faster

The speed records of seaplanes has been beaten by the British, who won the Schneider cup last week in Venice by making more than 281 miles per hour. The former record was that made by Major Bernardi, of Italy, in this country last year, 246 miles per hour.

The progress of aviation is gauged by the fact that in 1913 Maurice Prevost of France, won the cup by making the then incredible speed of 72 miles per hour. The speed of travel in general can be fixed by the fact that it is common for automobiles to make that speed on the roads today.

Those who are still blind to the fact that mankind is rapidly taking to the air, and intends to utilize his new powers in the future, cannot but fail to see that further progress is certain. It won't be many years before East Jordan will have its airplanes and airport, and people in the United States will think nothing of traveling a thousand miles in a day.

FOOLED THE POLICEMAN

Spooning in public between husband and wife has been approved by a jury, which awarded \$3,675 damages to Mrs. Joseph Mack, who was arrested by a cynical cop when she sat in her husband's lap in a parked car, under the influence of a spring moon.

The officer, spying the demonstrative display, went to the car, asking Mr. Mack, "Who the dame?" When the reply came, "My wife," the officer was plainly from Missouri, and suggested that they tell it to the judge. So resolving he put them in jail.

While public spooning between husband and wife may be legal in the city of Cleveland it represents poor taste at best in any city. Imagine what our streets would look like if every husband and wife, on every moonlight night, decided to park their car while they hugged and kissed.

We sympathize with the cop, who "can't understand it."

It is about time for some young, boy in these parts to announce that he has invented a perpetual motion machine.

Peace may eventually arrive but it will never be permanent as long as nations and people try to cuss each other out over past warfare.

AT IT AGAIN

Most readers of the Charlevoix County Herald remember the amazing stories that filled the world about German prowess before the war Paris and London, and other capitals, vied with each other in telling of some new or super-invention which would overwhelm the foes of Germania.

Well, little of it was true. Germany went to war and was whipped. There would seem little occasion for further yarns along this line but the habit persists. Last week London reported that Germany had built two "wonder warships," which although of limited size are able to "overwhelm cruisers of much larger size" and "run away from almost everything else."

So, they are invincible, if you believe what you read; but it is the bunk.

SYMPATHY TO ST. LOUIS

Thousands of citizens of St. Louis were terrified last week by a tornado, which bore down upon the West End, destroying thousands of homes and hurting scores of people.

Most of us have wondered what we would do if a tornado came to East Jordan. Well, we wouldn't have a chance to do anything, except to take what came, be it life or death.

The quick rescue work that began immediately, in the face of danger, speaks well for the police and firemen, and other citizens of St. Louis. It indicates what we are pleased to believe is characteristic of most men, a willingness to undertake the job at hand, regardless of what it may cost.

TO SEND MOTHERS TO FRANCE.

Representative Thomas S. Butler proposes that the government send the mothers of soldiers buried in Europe abroad at government expense order that they may, if they desire, visit the graves of their sons.

The proposition strikes us as worthy. The gold star mothers who permitted their sons to sleep in France should be given the trip. From a money standpoint, their journey will cost no more than it would have cost the government to bring the dead back to America.

When a man dies he is dead; that is all there is to it as far as the old world is concerned.

Any citizen of East Jordan can beat us when it comes to editing a newspaper, but we have a chance to be good by following the free advice.

Rock Elm Grange Elects Officers

At a regular meeting of Rock Elm Grange No. 705, the following officers were duly elected for the ensuing year:—

Master—Earl Danforth.
Overseer—Benj. B. Smatts.
Lecturer—Mabel Secord.
Ass't Steward—Edd. Kowalske.
Chaplin—Ellen Swanson.
Treasurer—James Secord.
Secretary—Alice Maude Smatts.
Gate Keeper—George Secord.
Ceres—Myrtle Danforth.
Pomona—Anna Kowalske.
Flora—Nellie Whitfield.
Lady Ass't Steward—Mabel Kowalske.

Dairy Herd Improvement Work

The herds in the Association for the month of September averaged 11 cows, 7,017 lbs. of Milk and 264.8 of B. F.

The high herd in B. F. is owned by Geo. Ver Snyder, Charlevoix, Mich. There are six Grade Jerseys and Guernseys in the herd, averaging 846 lbs. of Milk and 37.38 lbs. of B. F.

The Breezy Point farm of Ironton, Mich., was high in the Medium Herd group (7--15) they own eleven P. B. Holsteins, averaging 936 lbs. of Milk and 37.10 lbs. of B. F. in 30 days.

The three high cows under the two yr. old class are owned by Elmer Murray, of East Jordan, having a Gr. Jersey giving 49.9 lbs. of B. F. The Orchard Bay Farm, of Charlevoix, owning P. B. Holsteins giving 42.5 and 37.2 lbs. of B. F.

Owners of the three high cows in the three yr. old class are: Orchard Bay Farm owning two P. B. Holsteins, giving 39.9 and 36.7 lbs. of B. F. and a Gr. Holstein owned by Elmer Ingalls, of Charlevoix, giving 35.0 lbs. of B. F. for the month.

The three high cows in the four yr. old class are owned by Elmer Ingalls, having a Gr. Guernsey, giving 39.3 lbs. of B. F. A Gr. Guernsey owned by Geo. E. Nichols of Ellsworth, Mich. giving 39.1 lbs. of B. F. and a P. B. Jersey, owned by Elmer Ingalls, giving 37.7 lbs. of B. F. for the month.

The Breezy Point Farm has the three high in the Mature Cow class, consisting of P. B. Holsteins giving 59.6; 58.3 and 58.3 lbs. of B. F.

All of these members were feeding grain and most of them a roughage.
CECIL G. DOBBERN,
Charlevoix Co. Cow Tester.

Jackson—That the state is through with the brick plant at Onondaga was evidenced recently when the Michigan state prison commission authorized Warden Harry Jackson to advertise for bids for the property. More than 100 men, most of them incapacitated, have been moved from the new prison, and it was announced that the plant probably would be abandoned. The industry was a busy one a few years ago, but was halted after building trades had declared a boycott against prison-made bricks.

Jackson—Farmers who reside within a short radius of Michigan State prison may have their help problem solved by the action of the Michigan prison commission here which passed a resolution permitting the use of convict labor on farms where help was needed. The only provision is that the inmate workers must be returned to the prison for checking in purposes each night. The farmer who takes on the prison labor will be required to pay the expenses for a guard to accompany the men.

Jackson—The Michigan State Prison Commission has ratified a contract with the Cable Manufacturing company of Boston, for the construction of 250,000 steel chairs at Jackson prison. The contract involves \$250,000. According to the agreement, the Boston firm supplies the machinery which will be placed in quarters formerly used in the manufacture of coats for the same firm. The state furnishes the material and labor and lays down the completed chairs in a warehouse provided by the Cable company here.

Lansing—A warning against the importation of rabbits from the southwest for propagation in Michigan issued by Leigh J. Young, conservation director and Dr. Guy L. Kelfer, state health commissioner. According to Dr. Kelfer, laboratory tests have shown the imported rabbits are infected with tularemia, a disease which spreads to man on contact. Some clubs, according to Mr. Young, have imported rabbits and turned them loose in Michigan. In every case where one of the foreign rabbits was handled in a laboratory the disease was passed on.

The subscribers to this journal of debate are advised that October, being the tenth month, entitles them to pay their subscriptions at will.

We wonder if the little boy who won the Sunday school attendance prize fifteen years ago is setting any new mark for going to church.

Apple Pie For Everyone

**AT TOP O' MICHIGAN POTATO
AND APPLE SHOW.**

There will be apple pie for everyone attending the Top O' Michigan Potato & Apple Show at Gaylord on November 2 - 3 - 4 according to the recent announcement by the show officials. It all comes about by the introduction of an Apple Pie Baking Contest into the activities of the show.

Premiums totalling \$50.00 will be awarded for the best 30 pies and all the prize winning pies will be served at the annual banquet on Thursday evening, November 3rd. In order to make it attractive to the housewives, \$10.00 has been offered for the best looking and most appetizing pie.

Another new feature of the show will be the Potato Peeling Contest open to all who attend the show. Liberal premiums offered will make it worth while to enter.

Still another contest, which is probably the outstanding contest of the show, is the Potato Grading Contest. Fifty dollars has been set aside for this contest.

Each contestant will be given a quantity of field run potatoes and will be required to grade them into the respective standard grades in a limited time. When he has completed his grading, judges will determine who has most nearly met the grading standards.

This contest should prove particularly interesting this year in view of the fact that there has been so much interest shown in the new Michigan grading laws. State Department of Agriculture officials will be present to discuss the new law in its application to farmers, truckers and jobbers.

These contests are special features of the show. The regular attractive premiums will be offered in the potato classes and the apple exhibits will receive premiums in excess of those of last year.

The three day show will have something of interest allday. The first day has been designated as Apple Day; the second day as Potato Day and the third day as Boys' and Girls' Club day. The annual banquet will be held on the evening of the second day.

Fine Write-up of Reid-Graff Co.

The Muskegon Heights Record recently published an article relative to the Reid-Graff Plumbing Co., a former East Jordan firm. The article, in part, says:—

The Reid-Graff Plumbing Company, 1417 Peck street, of which H. E. Reid and G. W. Graff are the co-partners is equally as well known in North Muskegon, in Muskegon and in fact Muskegon county and the adjoining counties as well as they are known in Muskegon Heights.

The concern was established in 1911 in East Jordan, Michigan, and 1914 they branched out in a business way and established another shop in Rogers City, and for eight years they operated these two shops and contracted all kinds of public plumbing and heating jobs in northern Michigan.

Prior to the starting of the Rogers City branch during the years of 1911 to 1914 they specialized on plumbing and heating of public schools throughout the state of Michigan.

In 1922 they decided to sell out their holdings in East Jordan and Rogers City and in casting about for a suitable city chose Muskegon and Muskegon Heights have truly welcomed these men who think and act in big terms, for while they have been in this community only five years their concern is ranked as one of the leading plumbing and heating establishments in Western Michigan.

Reid-Graff have not only done work in Muskegon Heights and Muskegon but have finished contracts in many other cities and towns in Western Michigan in the past five years. Big Rapids, Fruitport, White Cloud, Grand Haven and Grand Rapids and other cities know and approve of Reid-Graff.

From ten to twelve men are on the pay roll of this concern at all times.

CARD OF THANKS.

We wish to express our sincere appreciation of the many act of kindness extended us by friends in our recent bereavement, and also by the various fraternal orders.

Mr. and Mrs. Hollie Baylis and daughter, Miss Rosie.

Many a sweet young thing has her own ideas about why they call it the harvest moon.

Will Live on Barrier Reef a Year

Dr. and Mrs. C. M. Yonge of London are members of the British scientific expedition to the Great Barrier reef of Australia and will live on a desert island of that reef for a year. Doctor Yonge is a member of the Marine Biological association.

DEER CREEK DISTRICT
 (Edited by Mrs. Tom Kiser)

The first meeting, to form another nutrition club, was held at Mrs. Don Hott's home Tuesday afternoon. Those to attend were: Mrs. Don Hott, Mrs. Fred Larson, Mrs. Dalton Gay, Mrs. Jos. Etcher, Misses Ellen and Isabel Murray and Mrs. Tom Kiser. Mrs. Vern Vance, leader of the Nutrition Club of Pleasant Hill, attended and led the meeting, also gave the lesson. The lesson given was "Education of Nutrition and Right Living to General Health." Mrs. Vance gave the lesson so everyone understood and she makes a fine leader. Mrs. Hott is a leader also. Miss Isabel Murray was elected Chairman, Mrs. Tom Kiser Secretary and Treasurer. A nice pot luck lunch was served which everyone enjoyed. Our next meeting is to be held at Mrs. Dalton Gays, the first Wednesday after the 11th of Nov, which is the date set for the second training meeting given for the leader of the Nutrition clubs. We want or would like to have all of our neighbors attend the next meeting.

Ray Williams and family spent Sunday afternoon at the home of Mr. and Mrs. Geo. Etcher. Frank Kiser and family spent Sunday at Tom Kiser's home. Mr. and Mrs. Jos. Etcher, Mrs. D. Gay and Mr. Dick Murray called on Mr. and Mrs. T. Kiser Saturday evening.

Miss Bertha Larson called on Mrs. Don Hott Tuesday afternoon. The silo fillers were filling silo at Mr. Pearsall's Tuesday afternoon.

PENINSULA
 (Edited by Mrs. E. Hayden)

The School Board of Star Dist.—Christena Loomis, director; Mrs. Emma Arnott, treasurer; and Chas. Healey, Moderator; and Mrs. Chas. Healey, were at Charlevoix, Wednesday, to consult with the prosecuting attorney in regard to the state aid for poor school districts. The necessary papers, which were prepared and turned over to A. C. Belding who was then School Comm'r were found in the bottom of a box of school exhibits which were taken from the township meeting at Advance last spring and to the County Fair this fall—instead of having been forwarded to Lansing.

Quite a crowd from the Peninsula turned out in spite of the rain Thursday evening and went to the home of Harlow Sweet in Advance to Charivari Edwin Sweet and his bride, who was Miss Celia Petoskey of Grand Rapids. They were a noisy crowd, but as they had been married a week and been charivari several times before, they were all set for the crowd, which made a noisy beginning, but of very short duration. They were invited in and spent a very pleasant evening. Edwin was born and raised on the Peninsula. All kinds of good wishes are extended to the happy couple.

Mrs. Grace Phillips Nickerson of Newberry visited her father, L. E. Phillips, at his farm on the Peninsula part of last week, returning to her home the latter part of the week. Mr. and Mrs. George Weaver and

MUNNIMAKERS
 Notices of Lost, Wanted, For Sale, For Rent, etc., in this Column is 25 cents for one insertion for 25 words or less. Initials count as one word and compound words count as two words. Above this number of words a charge of one cent a word will be made for the first insertion and one-half cent for subsequent insertions, with a minimum charge of 15 cents. These rates are for cash only. Ten cents extra per insertion if charged.

WANTED

WANTED—A man with light car for advertising and sales work in Northeastern Michigan, by large nationally advertised Company; territory established, with over 1,000 customers; prefer a married man with insurance or retail store experience and accustomed to earning \$140 per month; A-1 references, required. Write 304 Eddy Bldg., Saginaw, Mich., giving age and qualifications. 40-2

FOR SALE—MISCELLANEOUS

FOR SALE—Brown leather Davenport in good condition. For particulars see MRS. CLARK BARRIE. 41x1

FOR SALE—Choice IRIS PLANTS, ready for planting now.—MRS. MAYBEL CARLSLE, phone 186-F5, East Jordan. 40-3

REPAIRS—You can get Repairs for any Stove, Range, Engines, Cars, Sewing Machines, Cream Separator, Plow, or any Farm Machinery at C. J. MALPASS-EDWE—CO. 10-t. f.

family of East Jordan were dinner guests of the latter's parents, Mr. and Mrs. Ira Mc Kee, Sunday. Mrs. Anna Crapsie of Boyne City visited, Mr. and Mrs. Ira Mc Kee in the Star dist., Sunday. John Looze and a friend came Monday for a short furlough from the Coast Guard Camp at North Manitowish Island. They visited his parents, Mr. and Mrs. Wilbur Looze in Three Bells dist.

The school exhibits that were at the County Fair have been returned. David Johnston three-year-old son of Mr. and Mrs. Clarence Johnston, drank a bottle of blueing, Friday evening, which made him very ill. He was rushed to a physician and was soon relieved.

Ralph Gaunt shot a large gray owl last week. This is the eighth owl gotten rid of in this community within a few months. They have been very destructive to turkeys the past summer.

Silo filling is well underway but somewhat held up by so much rain; making some fields too soft to get onto for the corn.

The first frost of the season to strike the Peninsula came Mon. morning Oct. 10. Ice formed in some places.

Ed. Guerin, who is employed at Ironton came home Thursday for the day to assist with the butchering. Corn cutting is practically finished.

Bob Jarman, who is employed on west side of South Arm lake came home Friday to do some trucking. He returned to his job.

Mrs. Elmer Faust of Mountain Ash farm, spent Thursday with Mrs. Harriett Conyer at Gravel Hill, south side.

The Star of Hope Sunday school of Mountain dist., which held their session at Star school Oct. 9th, was very well attended in spite of the rain. There were 51 in attendance.

Omer Scott was on duty at the fire tower, Monday, Oct. 10th, the first time for a long time; And as it rained as usual he probably won't be out again for some time.

Fred Looze of Three Bells dist., and Bert Gould of Mountain dist., went to North Manitowish island last week to join the Coast Guard Camp. They have three months to give it a try-out before they can enlist for three years.

AFTON
 Edited by Mrs. Henry Timmer.

Mr. and Mrs. George Plumb, of Howard City are visiting his sister Mrs. Matthew Hardy. Henry Cook of East Jordan was in the vicinity last week looking up delinquent dog taxes.

Mr. and Mrs. Aaron Ensign, one-time residents of Afton, butnow of Detroit, visited at the homes of Chas. Shepard and Matthew Hardy last week. They are still in this region staying with various friends and relatives.

Guy Lavalley, who had a slight accident to his foot at the flooring plant, is reported better and able to be around.

Wm. Tillotson purchased a cow last week from Mr. Davis of Pleasant Valley.

R. E. Pearsall has completed his dog and small animal hospital, and has already opened it for business.

Mrs. Henry Timmer and two children were present at the opening of the new stadium at Petoskey, Friday, and witnessed the Harbor Springs-Petoskey football game.

Wm. Lewis inflicted a painful cut on his hand with a butcher knife while cutting cabbage, necessitating a few stitches.

The silo fillers were busy last week at the Robert Carson farm. Mr. and Mrs. Earl Blair and family, of East Jordan, dined with Mr. and Mrs. Robert Carson, Sunday.

Mrs. Claude Pearsall, who has been very sick with indigestion is somewhat improved.

Mr. and Mrs. Edward Woods of East Jordan were guests of Mr. and Mrs. R. E. Pearsall Sunday.

Word has been received here of the death last Thursday of Mrs. Vern Anderson of Adrian, Mich. Mrs. Anderson was the daughter of Jap Warden and a resident of Afton almost all her life. She leaves many sorrowing friends in this community.

Mr. Wm. Tate is on the sick list. Mrs. Ambrose Bell (Mary Martin) of Muskegon is visiting at the home of her parents Mr. and Mrs. John Martin.

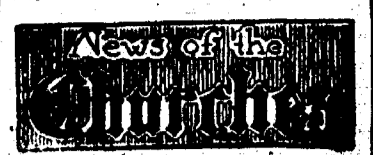

Miss Ester and Mr. Edward Shepard spent Sunday at the Vondran home.

After Gene Tunney makes a million he wants to help the youth of America to proper development. How can he expect them to follow his lead? The millions won't go around.

Our extra slice of pie for this week is awarded the man who admitted that he knew nothing about the "long count" at Chicago.

A GOOD THING—DON'T MISS IT.

Send this ad and ten cents to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive a trial bottle of Foley's Honey and Tar Compound, for coughs, colds, croup (spasmodic) and tickling throat; also a trial packet each of Foley's Pills, a diuretic stimulant for the kidneys, and Foley's Cathartic Tablets for constipation, biliousness, and sick headache. These reliable remedies have helped millions of people. Send for them.—Hite's Drug Store.

 Mid-Week Prayer Meeting, Thursday, at 7:00 p. m.

Most people want more money than they make.

Many a humorist fails to see anything funny in his own jokes.

The old oaken bucket is about to be replaced by the old time still.

The end of a perfect day does not always mean a perfect night.

Anything looks good in a catalog, after you read what is said about it.

In the long run buying on credit does not pay the buyer or the merchant.

Wagging tongues cause many a speaker to lose his reputation as a wag.

Many a man can use a typewriter with out being able to write anything.

Going to school is what the average child is not particularly crazy about.

Making love is an art these days and the sweet young things are very artistic.

You can go all around the world and find people just as disagreeable as you are.

SAT IN A DRAFT—THEN SUFFERED.

It's never safe to sit where a draft of air strikes the kidneys. Painful congestion, severe back-ache, and a disturbed urinal flow are usual results. Mrs. C. L. B. Petersburg, Va., says, "I was so stiff and sore I could not stoop over nor rise up without great pain. Now, since taking FOLEY PILLS diuretic, I have none." A reliable valuable medicine, constantly in use over 25 years. Take them whenever irritations of the kidneys and bladder, and an irregular urinal flow cause distress and discomfort. Satisfaction guaranteed. Hite's Drug Store. adv.

PROBATE ORDER

STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.
 At a session of said Court, held at the Probate Office in the city of Charlevoix, in said County, on the 12th day of October A. D. 1927.
 Present: Servetus A. Correll, Probate Judge.

In the Matter of the Estate of Kate Webster, Deceased.

The above estate having been admitted to probate and James Secord appointed administrator thereof.

It is ordered that four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said court on Tuesday, the 21st day of February A. D. 1928, at ten o'clock in the forenoon, at the Probate office in the City of Charlevoix.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said County.

SERVETUS A. CORRELL, Judge of Probate.

Cholera Control
 Most Desirable

Best Maintained by Keeping Entire Herd Immune at All Times.

(Prepared by the United States Department of Agriculture.)

It has been suggested that efforts should be made to eradicate hog cholera in the United States. While eradication is desirable, according to U. G. Houck, in charge of hog cholera control, United States Department of Agriculture, the general distribution and prevalence of the disease and the enormous expense make such a gigantic undertaking inadvisable, especially while large sums are being expended by the federal and state governments for the elimination of the southern cattle tick and the eradication of bovine tuberculosis, dourine, and scabies of cattle and sheep.

Rigid Measures Required.
 The eradication of hog cholera would require the application of no less comprehensive and rigid measures than those adopted for the eradication of foot-and-mouth disease in this country, and our hog industry is in no condition to withstand such measures. Furthermore, says Doctor Houck, we have an effectual, practical preventive treatment against hog cholera, which is not the case with tuberculosis and some of the other diseases with which we are contending. Therefore, it seems advisable to continue present efforts to minimize losses through the proper use of the preventive treatment rather than to attempt the complete eradication of the disease.

A feeling of security was largely responsible for the severe and widespread outbreak of cholera last fall. Herds were comparatively free from the disease for a time and the owners became negligent and failed to treat their hogs. With so large a percentage of the hogs in the country susceptible it was only natural that the outbreak spread rapidly far and wide.

Control of Disease.
 Control of the disease is best maintained by keeping the entire herd immune at all times. The nature of serum production is such that it cannot be hastened to meet emergencies. Ordinarily about 55 days are required to produce and test a quantity of the product ready for marketing. Severe outbreaks like that of last fall create a shortage in the serum supply with the result that many herds are infected before they can be treated.

Practical Suggestions in Marketing of Honey

Fine points in the marketing of honey are discussed by Virgil N. Argo, extension specialist in agriculture at the Ohio State university, in a recent letter to beekeepers.

"The man who is selling comb honey," writes Mr. Argo, "should see that the sections are cleaned of any propolis which might be deposited on the wood. They should be sorted carefully so that but one grade will be found in a case.

"Get the grocer to feature the honey," the specialist suggests. "An agreement should be made with the retailer that the beekeeper will keep him supplied with plenty of fresh, clean sections, and then the beekeeper should come around at intervals to give the grocer any service necessary in keeping his stock in first-class shape.

"Extracted honey should be put in bottles and pails. In using glass be sure that you get pure white glass.

"Extracted honey should never be heated to a point higher than 160 degrees Fahrenheit, and should never be held at that temperature for more than a short period. Excessive heating darkens the honey and drives off the aroma and flavor."

Agricultural Facts

Crop rotation is the surest method of weed control.

The cow, sow and hen combination still remains a mortgage lifting trick.

Usually there is little more time for plowing in the fall than there is in the spring.

Many good alfalfa seed crops have been lost because the hay crop was removed too late.

An acre of corn can be placed in the silo at less cost than the same area can be husked and shredded.

The spores that produce the wheat smut fungus parasite are spread to the healthy seed when the grain is threshed.

A bin that has been used for storing potatoes should be cleaned and the remains of rotten potatoes scrubbed out.

Moldy slage is better for hogs than for cows. When opening the silo throw the spotted top layer into the barnyard; the hogs will appreciate it.

Soil fertility limits yields, yields limit profits, and profits limit rural life and prosperity. Build up soil fertility with crop rotations and applications of inexpensive fertilizers.

Auction Sale!
 HOUSEHOLD GOODS, FARM IMPLEMENTS

At my former farm residence in South Arm, 2 1/2 miles south-west of East Jordan, on

FRIDAY, Oct. 21st

commencing at 1:00 p.m., The following property:

- Oak Dining Table
- Oak Dresser
- 2 Stands
- 2 Beds Springs & Mattress
- Gray Fur Robe, Lined.
- Wash Stand
- 3 Kitchen Chairs
- Heating Stove
- Rugs & Carpets
- Large Butter Bowl
- Crocks and Cooking Utensils
- Small Flat Scales
- Forks, Hoes, Rakes, Shovels
- Mail Box
- Dynamite Auger
- About 5 ton Loose Hay
- 6 Oak Dining Chairs
- 6 Rockers
- Some Books
- Range—Acme Renown
- Set Dishes
- Wire Stretcher
- Roll Wire Netting
- 5 gal. Red Barn Paint
- Berry Crates and Carriers
- Other Small Articles
- Library Table
- Couche
- Spring Cot
- Parlor Lamp
- 3 Lamps
- Eight Day Clock
- Odd Dishes
- Ladle and Mold
- Flat Irons
- Crow Bar
- Sythe and Snath
- Hammers

TERMS—Under \$10 cash; over that amount, six months time on approved notes payable at Peoples State Saving Bank.

Arthur Stewart
 Byers & Boss, Auctioneers. W. G. Corneil, Clerk.

Not a New Discovery
 A scientist has discovered that plant growth may be speeded up by applying manganese and other metals. It has long been known that the application in the shape of a hoe works wonders on plant growth.

Must Be Perfect
 Emery wheels are made by mixing the proper proportion of emery in the cement of which the wheel is made. The cement must be thoroughly mixed and of the right degree of hardness to wear away with the emery, or the surface will soon become uneven.

EAST JORDAN LUMBER CO.

DRY GOODS DEP'T.

Prices generally are a little higher, but not at The East Jordan Lumber Co. Store.

Cold Nights
 Reminds One of Warmer Night Gowns

CONTROL CHOLERA BY VACCINATION

Although the vaccination of hogs against hog cholera is a necessary measure for the control of this disease, it is not practiced generally. In the average year, only 15 per cent of the hogs on farms in the corn belt are vaccinated. About 60 per cent of the vaccination is done about the time the pigs are weaned, and 40 per cent as a result of a cholera "scare" and in older hogs. These estimates show that the economic importance of protecting the pig crop against cholera is not appreciated by the average swine grower.

Two general outbreaks of hog cholera have occurred in the corn belt during the past five years. It is only in years when the disease becomes epidemic and the death loss runs into the millions of hogs and hundreds of thousands are marketed before they are finished that swine growers consider the disease of great economic importance.

We should not lose sight of the fact that cholera is responsible for a heavy annual death rate in hogs. Herd outbreaks of cholera occur every year in communities where there is a dense hog population. It is not uncommon for the disease to spread in late summer and in the fall, causing a heavy death rate in neighboring herds and seriously interfering with swine production in that community or section of the state.

The vaccination of pigs about weaning time will solve the problem of hog cholera control. Late summer and fall outbreaks of the disease cannot occur if the spring pig crop is protected by vaccination. This is the only general disease-control measure that can be recommended.—Dr. R. A. Craig, Purdue University.

Little Pig Troubles by Necrosis Infection

Loss of pig's ears and tails may come from necrosis infection; the infection occurs by being born in filth where necrosis germs are found quite constantly. Clean and disinfect the sow just before farrowing time and then move her to a clean disinfected farrowing pen or lot and keep it clean and dry. See that the pigs get dry and around to the lunch on a clean place. When the tips of the tail and ears get hard and dry apply a little of a mixture of equal parts of lard and tallow once or twice a week. The little pig may get too much milk and too little exercise and get the thumps. This rarely occurs when the sow has a large litter. Let the pig move around and play and then cut down the feed of the sow, especially the soft and wet feed. The little pig may have rickets (big joints, lameness and sometimes a large face). Give the sow milk and green feed, and sometimes it pays to give her or the pig cod liver oil in small doses. Little pigs may have scours. It may come from putting the sow suddenly out on green feed such as frosted oats or new corn. Correct the sow's feed, clean up the pens and disinfect. Also change pens and lots.

Pure-Bred Animals Are Always Most Desirable

Breeding from good stock is desirable and fundamental. Yet the tremendous losses among young live stock are due only to a very limited extent to faulty breeding. Pure-bred animals generally receive better care than ordinary stock because they are more valuable, and they are usually the property of the more skillful stockmen. But equally good care should be extended to young animals in general, regardless of whether they are pure bred. Live-stock owners must drop any attitude they may have to fatalism and indifference toward the deaths of young animals, and challenge every death to show cause why it occurred.

Live Stock Notes

A silo is the safest investment a farmer who keeps stock can make. It is a practical form of insurance against shortage of feed at critical times.

Calves should become acquainted with silage early in life, beginning with a very small quantity in connection with other roughage and increasing gradually.

Pullets hatched in April should lay in October or November, and will if they are properly grown. Growing stock need range, and the food should be of a nitrogenous order.

Keep the pigs on pasture and don't feed too much corn.

The self-feeder system is fine for pigs being fattened for market, but is a dangerous practice to follow when the object is to grow vigorous, strong-boned breeding stock.

Crops which may be used for hog pasture are oats, rye, oats and field peas together, and corn and soy beans together. Where corn and soy beans grown together are hogged-down, no other grain is needed.

Silo Has Great Value for Corn

Poor Crop and Borer Point Way to Proper Storage of Feed.

This fall the silo provides the best way to cope with the European corn borer, and to make the most of what may be saved from the corn crop, says the New York state college of agriculture at Cornell university.

Unless all signs fall this will be one of New York's poorest corn years, the college points out. Planting was late because of unfavorable weather; a shortage of good seed was responsible for many a poor stand; corn fields were disked and seeded to buckwheat. A late fall may help some but cannot compensate for the cool summer which has reduced yields in every corn field.

Put Soft Corn in Silo.
Much corn grown for grain will have to be put in the silo if it is to be saved. Soft corn which will not keep in a crib is safe in a silo; and corn stalks, cut up fine and put through the fermentation of silage cannot harbor live corn borers.

Corn properly stored in the silo retains more of its feeding value than by any other method. The college suggests that the farmer allow his corn to stand as long as possible, remembering that each day's growth means hundreds of pounds of feed; allow the ears to reach the glazed stage, if possible; if he must cut corn that is very immature, the bundles should lie on the ground a couple of days to evaporate some of the excess moisture. Extremely green silage is watery and poor in quality.

Reduce Spoilage in Silo.
Reduce the spoilage in the silo by having the walls air-tight; by cutting the pieces small; and by packing firmly to exclude even small air pockets where mold may start. In a year like this a good part of the feeding value is in the leaves of the corn plant, so none of the leaves should be lost.

Native Vegetables Are Most Valuable Plants

In the American vegetable garden eight principal food products had their origin in the Indian crops existing here before the advent of the white man. These include beans, corn, peppers, pumpkins, squash, tomato, potato and sweet potato. Vegetables of Old World origin are far more numerous. The United States Department of Agriculture lists 24 of importance, cucumbers, eggplant, muskmelon, watermelon, okra, asparagus, beets, Brussels sprouts, cabbage, carrots, cauliflower, celery, kale and collard, kohlrabi, leek, lettuce, onion, parsley, parsnips, peas, radish, salsify, spinach and turnip. But the value of the crop of the eight native vegetables is considered greater than the 24 of foreign origin. Since the discovery of America the white man has not "tamed" an native plants which the Indians had not already brought from warmer parts of America, but notable improvements have been made in the quality and yield of most of these vegetables.

Profitable Practice of Hogging Down Corn Crop

The practice of hogging down corn has been growing very rapidly in the corn belt states in recent years. It is a good practice because it saves labor and increases the rapidity of hog gains, provided the corn is properly supplemented. A few farmers still make the mistake of turning their spring pigs into corn without supplying a supplementary high protein and the proper amount of mineral matter. But the great majority of farmers who follow the practice of hogging down a portion of their corn are placing self-feeders containing a commercial high protein feed and a mineral mixture in the field to allow the pigs to balance their own ration. It is in this way that the most economical as well as the most rapid gains are obtained.

Agricultural Items

Sweet clover hay, properly cured, is practically equal to alfalfa.

Farmers seldom have trouble getting good prices for high-grade produce.

After haying and harvest is a good time to get at that concrete dairy-stable floor.

Millet hay should not be fed to horses for any length of time lest it injure their kidneys.

Poultry manure is the most valuable fertilizer. It is high in organic nitrogen, phosphoric acid and potash.

Nearly all diseases of poultry are taken into the body through the mouth, either with the feed or water.

It doesn't pay to keep a hen more than one year unless she has been an exceptionally good layer the first year.

A penny apparently saved by skipping the milk cow on her grain may mean the expenditure of several dollars later on.

This Street Ensemble Very Cleverly Designed

A smart street ensemble, consisting of a royal blue silk one-piece dress with a velvet jacket trimmed in chin chilla fur, worn by Marian Dixon, Universal star. With the ensemble is worn a smart felt hat of gray to match the chinchilla fur.

DIPPING INTO SCIENCE

The Sucker Feet of Flies
It is not only because the feet of flies excrete a sort of sticky substance that they can climb perpendicular surfaces or walk on ceilings. The bottoms of their feet are formed like tiny cups, the vacuum thus afforded helping them to grip to the surface.

Guessing and Prophecy
I shall always consider the best guesser the best prophet.—Cicero.

Flint — Lily Belle, one-year-old daughter of Mr. and Mrs. Earl Smith died of injuries suffered when she fell into a tub of scalding water.

Lansing—Jack Truax, 5 years old, was drowned in the Grand River while playing with a companion, George Rickets. The child tumbled into the river while attempting to dodge a small rock thrown by a playmate.

Holland—Formal organizing of the Ottawa County Poultry and Egg Producers' Association will take place at a meeting October 11. The organization has obtained contracts for 100,000 hens. The object of the association is the co-operative marketing of all poultry.

Lansing—Two holdup men served customers of the Westside Drug Store for a quarter of an hour one night recently after locking the proprietor, Frank Wieden, in a room at the rear of the store. At their leisure, the bandits removed about \$100 from the till and walked away.

Bay City—Efforts of the local chapter of the Isaac Walton league to secure a refuge for wild ducks and other water fowl at the mouth of the Saginaw river have been balked by the state laws. The league has been informed that the laws do not permit the closing to public use of any portion of the shores of the great lakes.

Caro—Subscriptions amounting to \$9,856 have been received by the joint committee of Board of Commerce and Rotary club for the new Caro Community hospital, and additional promised donations of \$300 will more than complete the \$10,000 fund. It is expected the remodeling of the Anna Black school building, purchased from the city for the purpose of a hospital, will be ready and opened for use November 15.

South Lyon—A freshman in the South Lyon high school this year, Charles L. Stafford, youngest son of Mr. and Mrs. Charles L. Stafford, holds the distinction of being the national champion essay writer for seventh and eighth grades. His essay on temperance, written last spring in the contest sponsored by the W. C. T. U., recently brought him the high honor. His effort went through the South Lyon school test, the district and state and finally the national contest.

The First Language
Some suppose Hebrew to have been spoken by Adam; others say that the Hebrew, Chaldee and Arabic are only dialects of the original tongue.

What Cost Privacy?

-only a few pennies!

With guests or members of the family near, it is often impossible to carry on a telephone conversation in privacy or quiet. An EXTENSION TELEPHONE in another part of the house—in a bedroom or the kitchen, for example—would insure both privacy and quiet. In addition, it would save the long trips to and from your main telephone, to make and answer calls.

An extension telephone costs only a few cents a day

MICHIGAN BELL TELEPHONE CO.

Old Anglo-Saxon Term

Quit rent is a corruption of the old Anglo-Saxon "hwit rent," or white rent, so called because it was paid in silver coins. It was an annual charge paid by a tenant to the lord of the manor in place of certain services which otherwise the tenant had to render, such as plowing in his lord's field.

Peril to Miners

Fire-damp is the ordinary name for carburetted hydrogen, which issues from "blowers," or fissures in coal seams. It is inflammable, and when mixed with air in certain proportions, is highly explosive. Its ignition is attended by the danger of an explosion of coal-dust.

FACTS

-AND THE OPEN MIND

THE MOST important element in business success—and the most difficult—is to be sure that you have all the facts before you act.

TO GET them all, from every possible source, is the first objective in General Motors. The Research Laboratories contribute some. These are nuggets, left in the crucible, after hundreds of ideas that looked good have been burned away. The Proving Ground contributes others. Dealers contribute. The public contributes. Every department contributes. Through the whole organization runs a spirit of inquiry and of rigid insistence on proof.

OUT OF such thinking come the new models announced from time to time by Chevrolet, Pontiac, Oldsmobile, Oakland, Buick, LaSalle, Cadillac—all with Fisher Bodies. And by Frigidaire. Each new model is a tested step forward. Nothing goes into it as a result of habit or guess or pride of opinion.

Nothing counts but hard-won facts, gathered and used with an open mind.

they lack beef, while they have speed
to burn. With a squad numbering 300
men, Rockne has a squad rich in re-
serve. Our photograph shows Capt.
John P. Smith, who was one of the
outstanding forwards in 1926 in the
Middle West, and is playing left
guard.

**DIPPING INTO
SCIENCE**

**Who Discovered Electric
Lights?**

Sir Humphrey Davy, a chem-
ist (1778-1829) discovered that
two wires attached to a battery
in a certain way and with char-
coal on the ends would allow
current to jump from one wire
to the other with such speed
that the charcoal became white
hot, producing a bridge of light.
From this beginning, lights
were developed.

PROBATE ORDER

STATE OF MICHIGAN, The Pro-
bate Court for the County of Char-
levoix.

At a session of said Court, held at
the Probate office in the City of Char-
levoix, in said County, on the 23rd
day of September, A. D. 1927.

Present: Hon. Servetus A. Cor-
rell, Judge of Probate.

In the Matter of the Estate of
Adolph M. Cincush, Deceased.

The above estate having been ad-
mitted to probate and Lawrence F.
Cincush appointed executor thereof.

It is ordered that four months
from this date be allowed for credi-
tors to present their claims against
said estate, and that such claims will
be heard by said court on Thursday,
the 2nd day of February, A. D. 1928,
at ten o'clock in the forenoon, at the
Probate office in the city of Char-
levoix.

It is Further Ordered, That public
notice thereof be given by publica-
tion of a copy of this order, for
three successive weeks previous to
said day of hearing, in the Char-
levoix County Herald a newspaper
printed and circulated in said
County.

**WHITE STAR
RESTAURANT**
331 Main St., E. Jordan
THE HOME OF
GOOD EATS
Open Day and Night.
E. W. GILES & SONS

**Community
Building**

**Life, Beauty of House
Depend on the Builder**

The proper finishing of the exterior
of the home is a subject of much
thought and study on the part of the
architect, and a matter which requires
the utmost skill on the part of the
builder in carrying out the plans. To
cover the technique of good exterior
construction would require a volume.
These brief generalities are offered as
suggestions.

All outside construction should be
such as to provide rapid drainage of
water and to prevent the accumulation
of debris. No enclosed flat spaces on
which water remains should be per-
mitted. All horizontal work should be
given a slope that will insure good
drainage. All joints at the end of
horizontal work should be constructed
so as to prevent the seepage of water
underneath.

The liberal use of metal flashings
over windows and doors, in gutters,
and on cornices will greatly lengthen
the life of the building. On the out-
side edge at the ends of drip caps and
window sills, an elevated edge of
metal will prevent water dripping
over the ends. This is especially ben-
eficial on stucco construction, as it
prevents streaking of the wall.

All end joints in the gutter should
be liberally daubed with white lead.
White lead should also be used in the
joints in the porch floor.

**Artistic Color Effects
Add to Beauty of Home**

Chief among the reasons why brick
is often painted is that paint brings
color variety to this material. Of
course, there are a number of tech-
nical and practical reasons why many
people prefer to have their brick
homes protected with paint, but it is
safe to warrant that color advan-
tages play a strong and prominent part in
influencing their decision.

"Can brick be painted, though, and
just what effects may be obtained?"
many people ask.

To the first part of the question the
answer is, of course, "Yes," while the
second half requires elaboration.

The fundamental principle un-
derlying successful painting is to adapt
the type of finish to the material
used. So, although brick may be
painted nearly any color of the spec-
trum, it is wiser and in better taste
to paint brick as brick and not try
to make it look like something else.
It is conceivable that under certain
conditions a brick house might be
painted white or cream with green
trim, but since that color scheme is
irrevocably associated with Colonial
houses with clapboard siding, it is
not in the best of taste to advise this
color scheme unreservedly.

Boosting Does It

Gadsden is a city of boosters, who
boost not alone with the tongue but
with action. More of the latter is
always to be desired and there is al-
ways opportunity for some criticism.
The latter is often just another name
for constructive effort. To search out
the mistakes and to fight for their
correction is to assist in the forward
drive. The good work is on the daily
program. Let there be no lagging in
the constant campaign for an even
greater Gadsden. It will make itself
just so much, and beyond that its
citizens must carry it.—Gadsden
Times.

City Planning

The city planning movement is
making great strides in America. Al-
most every community that has
passed beyond the crossroads stage is
at least talking about a city plan.
Such cities as Chicago, Detroit, Cleve-
land and Los Angeles are looking not
years but decades ahead. But city
planning brings about a new attitude
toward growth. Enlightened cities
begin to put emphasis upon the well-
being of present inhabitants, and this
well-being is not always advanced
when real estate values are kited and
new population is brought in more
rapidly than it can be cared for.

Lighting for Schools

Because of eye strain in schools due
to improper lighting the Illuminating
Engineering society in the United
States has framed a lighting code for
schools which authorities consider ad-
equate. The only states whose schools
are reported to conform to this code
are New York, Michigan, Minnesota
and Wisconsin. Other states and ter-
ritories are studying the code with
the idea of applying it.

Home Seen as Picture

To the artistic eye a home is a pic-
ture, with the house as the center of
interest, around which group, in plea-
sing composition, those other elements
that create an atmosphere of restful
charm and quiet privacy. How can
such a "homescap" be complete
without a fence of appropriate design?

Something in This

No town seems "narrow" to people
who behave themselves.—Detroit
News.

Power in Faith

Faith in your home town—what a
wonderful thing it is, and what a mar-
velous thing it will do.

**Electricity Fades
as Crop Stimulator**

**Bumper Yields Through Its
Use Not Possible.**

Growing bumper crops with the aid
of electricity, a thing predicted fre-
quently in recent years, has yet to be
proved possible.

L. H. Flint of the federal bureau of
plant industry is authority for this
view. He advances it after four
years of intensive experimentation.

Tests by the British ministry of
agriculture and fisheries a few years
ago led certain writers to predict
freely that before long plant develop-
ment could be so effectively stimu-
lated by electricity, that bumper crops
could be electrically grown.

But the United States Department
of Agriculture can find no basis for
such enthusiasm, according to Mr.
Flint. Though not abandoning experi-
ments to prove or disprove the theory,
federal scientists to date know of no
practical method of electrical stimula-
tion for plant growth.

Recent tests by the United States
Department of Agriculture were car-
ried on with corn, planted in boxes
on a revolving table. Above one set
of boxes is a network of wires, from
which a measured current of electric-
ity passes to the plants below. A set
of boxes containing corn, insulated
from the other set, and not treated
with the electrical current, is also on
the revolving table as a check in yield
against the electrically treated plants.

Soil-conducted currents, it was
thought at one time, might influence
plant growth. Unpromising experi-
mental results persuaded the scient-
ists to discontinue this method.

**Potatoes Are Improved
if Dried After Digging**

The time between frost and heavy
freezing is oftentimes too short to
permit potatoes to ripen before dig-
ging. Late planting prolongs the
growing season into late fall and the
crop is barely made before heavy
freezing. The result is immature
tubers with poor keeping qualities.
The yield may be satisfactory, but
the keeping and eating qualities are
poor. If weather conditions and time
permit, the potatoes should be left
on the ground for three or four hours
after being dug. This will dry off the
tubers and harden the skin, thereby
insuring better keeping qualities.
When the picking is done immedi-
ately after the tubers are dug, too much
moisture is carried to the cellar. Un-
less storage conditions are very good,
soft rot and decay are very apt to
cause heavy damages.

Digging, storage and many other
problems of the potato grower are
discussed at length in a bulletin dis-
tributed by the Colorado Experiment
station at Fort Collins.

**Find Frosted Corn Good
for Silage if Watered**

Good silage can be made from
frosted corn; and there is likely to be
a lot of corn caught by frost in
New York state this fall, because
wise farmers are giving the crop
every chance to grow after its late
start and poor progress through a
cool growing season.

The New York state college of agri-
culture at Cornell university, in mak-
ing these statements, adds that such
silage is not as good as that which
has not been subjected to freezing,
but that all of the crop will be need-
ed. Frosted corn is likely to be
withered and dried. If the frosted
corn can be put in the silo immedi-
ately after a frost there is little need
of adding water. But if it has a
chance to dry out, water should be
added to make it pack tight and thus
to insure fermentation rather than
molding.

All the leaves should be saved. In
feeding value, the ears come first,
leaves second, and stalks last.

**"Citrangequat" Is Name
of a New Hardy Fruit**

When horticulturists develop new
fruits or grains by breeding or cross
of familiar plants they have to name
the products. "Citrangequat" is an
example of a name evolved by breeders
for the Department of Agriculture. It
comes from a combination of "kum-
quat" with "citrange." Kumquat is an
Americanized spelling of the name for
the Chinese fruit. Citrange is itself a
fairly recent coinage that tells its own
story of a fruit that resembles an
orange in appearance with the sour-
ness of a lemon. Incidentally the
citrange is the result of a cross be-
tween the ordinary sweet orange and
a Japanese trifoliate orange of no
commercial value and does not resem-
ble either parent. Both these new
fruits are hardy substitutes for the
lime and lemon, capable of growing
in regions too cold for ordinary citrus
plants, and in addition are proving
of value as budding stocks for the
Satsuma orange.

Selecting Seed Corn

Autumn is the time to prepare for
a profitable corn crop by the follow-
ing season. Unless the community has
its experienced and honest corn breed-
ers, the best place for the farmer to
obtain seed corn is from the fields
on his farm or in his neighborhood
which has proved successful in the
locality. Bulletins telling how to field
select seed corn can be obtained from
the extension service, Colorado Agri-
cultural college, Fort Collins.

**Sylvia
of the
Minute**
By Helen R. Martin

AN idyl of the Pennsylvania Dutch in
which one of the daughters upsets
conventions. In doing so she takes a snob
into camp and causes much discomfort
among the prideful and highly placed. Sylvia
is one of the most charming of Mrs. Martin's
many engaging heroines, and "Sylvia of the
Minute" is one of her best novels.

This Glowing Romance Will Run

**BEING "TOO TIRED" DOESN'T
PAY.**

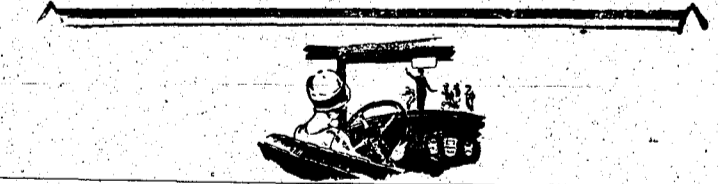

A healthy person never feels con-
stantly tired. Being "too tired" con-
tinually is a sign of something wrong.
Watch the kidneys. A very able
physician said, "When they are
affected, life is in danger." If elimi-
nation is too frequent, or too
scanty and burning, take FOLEY
PILLS diuretic. W. K. Holland, Har-
lingen, Texas, says: "I bet that 90
per cent of sufferers from kidney
irregularities never take anything
until it is too late, whereas FOLEY
PILLS diuretic would be a God-send
to them. Satisfaction guaranteed.—
Hite's Drug Store. adv.

Beads for Rosaries

The name "St. Cuthbert's Beads"
was given to the single joints of the
articulated stems of encoronites. The
central perforation permitted them to
be strung as beads, and they were
used for rosaries and associated with
the name of St. Cuthbert.

Record Meteor

The largest meteor ever found in
the United States is 10 feet long, 6 1/2
feet high and 4 feet 3 inches thick.
It weighs 31,107 pounds. It was found
at Willamette, Ore., in 1902, and is
now in the American Museum of Nat-
ural History, New York.

**You see all the road
when you drive a Buick**

The dreaded "blind spot" is gone forever! In Buick for
1928 closed car front posts are narrowed so that all the
road, ahead of you and at the side, is clear.
What a factor this is for safety! What extra pleasure it
gives to driving!
See Buick for 1928. Get behind the wheel and prove for
yourself how clearly you can see all the road from the
driver's seat.

Briefs of the Week

Born to Mr. and Mrs. E. B. Kent, a son, Wednesday, Oct. 12th.

Born to Mr. and Mrs. Edgar W. Ager, a son, Monday, Oct. 10th.

Mr. and Mrs. Arthur Stewart were here from Flint over Sunday on a business trip.

Apples for sale at our residence, 405 Second-St. Call on phone 116. A. L. Darbee. Adv.

Born to Mr. and Mrs. William J. Schroeder a son—William Thomas—Thursday, Oct. 13th.

A small blaze at the residence of Freeman Walton, Tuesday forenoon, called out the fire department.

Rev. V. J. Hufton was at Elk Rapids, Tuesday, attending a Grand Traverse Dist., M. E. Conference.

Mr. and Mrs. Wright Carr and Mrs. Len Swafford were week-end guest of Mrs. Harold Usler at Grand Rapids.

Coming Friday, Oct. 21st—G. O. Searle, Optometrist, of Petoskey— at Palmiter's Jewelry Store; all day. Adv.

Paul Sommerville who is in the Coast Guard service at Beaver Islands is home for a visit with his parents.

The price of Glass is 20% lower. A good time to supply your wants. "Our service the same." B. L. Sevance. adv.

East Jordan and this part of Northwest Michigan experienced its first killing frost for this fall last Sunday night, Oct. 9th.

A Bake Sale will be given by the Bible Class of the M. E. Church at the Company's store, this Saturday, Oct. 15th. Adv.

John Williams with daughter, Miss Blanche Stohman, and Patrick A. McKinnon left Monday by auto for a visit with relatives at Jackson.

Protect your eyesight by properly fitted glasses, thus relieving the eye-strain. G. O. Searle, Optometrist, at Palmiter's Jewelry Store, Friday, Oct. 21st. Adv.

Misses Lydia Beyer, Fern Gidley, Olga Schultz, Isabel Lintner and Dorothy Joynt were home over the week end from their studies at Ferris Institute, Big Rapids.

Summer's passing by no means should be allowed to lull the motorist into the belief that the touring season has passed. If the return of the busy period has brought an end to all prospects for the long trip, it has not diminished the opportunity for many short, healthful, zestful journeys. Fall touring, in its way, is just as delightful as the summer variety.

Some one with a mask and gloves on entered D. W. Lowe's house at Alba Sunday evening about 9:30 while Mrs. Lowe and children were into a neighbors. When she returned he met her as she came into the sitting room and demanded her money. She told him she had none but he insisted she had and caught hold of her wrist and twisted her to the floor and took six dollars out of her stocking. This money she had just earned picking up potatoes. Mr. Lowe and the oldest boy were away. The bandit escaped and they heard a car start away. No trace has as yet been found. It gave Mrs. Lowe a terrible scare. Mancelona Herald.

"Eighty of the eighty-three counties in Michigan are now organizing under the vigilante campaign, launched by the Michigan Bankers' association last spring," according to A. J. Haviland, president of the Grand Traverse County Bankers' federation. "The success of our vigilante system is already apparent. The bankers are thankful for the co-operation we have received from all law-abiding citizens. We realize as does the public in general, the fact that we are simply co-operating with the law enforcement officers of our state, county and community. The officers have cordially assisted us in every practical way."

Of interest to local deer hunters is the following item in the Cheboygan Daily Tribune: "It is reported that there are more evidence of deer this season between Point Nipigon and Point Au Sable than there has been for twenty years. Between the main road to Mackinaw City and the shore there are few homes and it appears to be a natural runway for the deer crossing to and from Bois Blanc Island—many straying from the game reserves at the north end of Emmet county. George Hanson, who has a small plot of ground near Nipigon for garden purposes, says that the place is all trampled down with deer feeding on the tops of his bean crop. They eat the tender leaves and leave the balance unharmed. He saw two in the patch yesterday."

Apples for sale at our residence, 405 Second-St. Call on phone 116. A. L. Darbee. Adv.

W. A. Stroebel was at Harrison, Mich., and Saginaw, over the week end.

Mrs. Mae Ward returned home last week from a visit with friends at Lansing.

The Improvement Club will meet with Mrs. Roy Webster next Tuesday evening, Oct. 18th.

Apples for sale at our residence, 405 Second-St. Call on phone 116. A. L. Darbee. Adv.

Alfred Bancroft returned home Tuesday from a visit with his daughter, Mrs. Albert Yeckel, at Detroit.

Have your eyes cared for by an expert Optometrist—G. O. Searle—at Palmiter's Jewelry Store, Friday, Oct. 21st. Adv.

Mrs. Walter Maisil and sisters, Misses Emma and Loretta Sherman, of Detroit, were guests at the home of Mr. and Mrs. Clark Barrie recently.

Jessamine Rebekah Lodge will hereafter hold their meetings on Wednesday nights, instead of Tuesday, commencing Wednesday, Oct. 19th.

The Good Will S. S. Class of the Methodist Church will hold a Rummage and Bake Sale at J. W. LaLonde's Auto sales room on Saturday, Oct. 22nd.

F. R. Bulow of East Jordan was recently appointed Charlevoix Co. Commander of the American Legion, the appointment being made by Michigan's Eleventh District Committee-man.

Ted Abrams, of Lansing, who is engaged in commercial aviation photography work, was a guest here of Mr. and Mrs. P. T. Mitchell. He has been taking air photographs at Traverse City and Charlevoix, and went from here to Onaway where his plane has been kept. Petoskey News.

Dates for the annual meeting of the nine districts of the Michigan Educational association have been fixed as follows: Oct. 6-8, Ironwood; Oct. 20-21, Saginaw and Jackson; Oct. 24-25, Ludington and Cheboygan; Oct. 27-28, Kalamazoo; Oct. 27-29, Detroit; Oct. 31-Nov. 1, Grand Rapids. Notable speakers are listed on the program.

The farmer in these parts are not worried over getting too much relief.

Smoking a pipe may mean contentment to a man but not if his wife hates the smell of tobacco.

Correct this sentence: "I can make a profit on the deal, sir, but I do not believe that you will be pleased."

When a peddler comes into a town he hopes that the residents have no idea of keeping their money at home.

Sylvia of the Minute

By Helen R. Martin
Author of "The Snob," "Ye That Judge," etc.

There is a dramatic simplicity about this vivid and intense human story, with its genuine humor and pathos, a story which follows the same general trend of thought of "The Snob," and other highly successful novels by this author

Read It as a Serial in Charlevoix Co. Herald

HEADS LEGION WOMEN

Mrs. Irene McIntyre Walbridge of Peterborough, N. H., was elected president of the American Legion auxiliary at the Paris convention. She is the daughter of Commissioner William McIntyre, head of the Salvation army in the southern states, and is a graduate of Mount Holyoke college. She served in France with the Salvation army during the war and was cited twice in army orders for bravery under fire. She has been president of the Legion auxiliary of New Hampshire.

Slowing Up?

Waste Poisons in the Blood Make One Tired and Inefficient.

Do you rise lame and stiff? Drag through the day, listless and depressed? Evening find you all worn out?

Have you given any thought to your kidneys?

Sluggish kidneys allow waste poisons to remain in the blood and make one tired and languid, with often nagging backache, drowsy headaches and dizziness. A common warning of sluggish kidney action is scanty or burning secretions. Assist the kidneys with Doan's Pills. Doan's have been used since 1885. Are recommended the country over. Ask your neighbor!

Stimulant Diuretic to the Kidneys
Foster-Milburn Co., Mfg. Chem., Buffalo, N. Y.

USE SULPHUR TO HEAL YOUR SKIN

Broken Out Skin and Itching Eczema Helped Over Night

For unsightly skin eruptions, rash or blotches on face, neck, arms or body, you do not have to wait for relief from torture or embarrassment, declares a noted skin specialist. Apply a little Mentho-Sulphur and improvement shows next day.

Because of its germ destroying properties, nothing has ever been found to take the place of this sulphur preparation. The moment you apply it healing begins. Only those who have had unsightly skin troubles can know the delight this Mentho-Sulphur brings. Even fiery, itching eczema is dried right up. Get a small jar of Rowles Mentho-Sulphur from any good druggist

State News in Brief

Monroe—Mrs. Julia Matthews, 75 years old, of Toledo, injured in an automobile accident here some weeks ago, fell dead on the sidewalk in front of the Monroe hospital as she was leaving that institution. Mrs. Matthews, attendants at the hospital said, had recovered from her injuries and her sudden death was caused by heart disease.

Flint—Adoption of a resolution urging the state to float a \$10,000,000 bond issue for the care and extension of its forests as a means of furthering the conservation and propagation of wild life was the feature of the annual meeting of the Michigan Conservation Congress here recently. The resolution suggested license fees collected from sportsmen be used toward retiring the bonds.

Lansing—Members of the Michigan Bean Committee of Ten, appointed recently by Herbert E. Powell, agricultural commissioner, conferred here recently with Gov. Fred W. Green and decided to seek a higher tariff on beans. The committee reiterated its previous intention of advising producers to hold for at least \$5.00 a hundred and hope to fix a nationwide minimum. Gov. Green favored the proposal.

Jackson—Two inmates of the Michigan State prison were successful recently in one of the most daring escapes in years when they drove out of the gate at the new prison in an automobile belonging to a free foreman. The prisoners who got away were Leonard Johnson, sentenced to 5 to 15 years, from Detroit, for assault to commit robbery, and Eugene Griswold, sentenced from Grand Rapids to 7 to 15 years for robbery.

Kalamazoo—A claim he was a victim of somnambulism was the defense made by William E. Cardiff, 36 year old papermaker, when he was arraigned on a charge of raiding his neighbor's hen house. Two dead chickens lay at his feet when his neighbor flashed a light on him and called out, "Hello, Bill, I thought you were a weasel." He was placed on probation for six months and was required to pay the costs of \$25.

Port Huron—A pulmotor saved the life of Mrs. Frank Laforge, of Port Huron, when she was overcome by illuminating gas. Her husband awoke to find the house filled with gas from a burner which accidentally had been left open. He managed to get out of the house and call for help. Neighbors telephoned the police and a doctor and the pulmotor were rushed to the house. It was several hours before Mrs. Laforge was restored to consciousness.

Lansing—G. W. Macier, of Richmond, has been appointed cadet colonel, the highest military honor that can be bestowed upon a student, according to an announcement made by Col. T. L. Sherburne, commandant of the Michigan State College Military Department. Ward Estes of Carleton, was appointed infantry major. The artillery majors will be Harland Ray, of Manistee, and Ralph Dalley, of Detroit. Arnold Bean, of Jackson, will be the cavalry major.

Lansing—The Supreme Court has refused to grant an injunction restraining Monroe paper companies from polluting the waters of the Raisin River. The enjoining order was asked by the Monroe Carp Pond Co., on the ground that refuse from the paper plants was injuring fish reared by the latter concern and was injurious to public health and fish life. A Circuit Court decision denying the injunction, but granting the Carp Pond company \$23,141 for damages done to its fish, was affirmed.

Monroe—Through traffic has been established on road M-50 between Toledo, Monroe, Dundee and Jackson, as the result of completion of a viaduct over road M-50 near Grape, 12 miles west of here, built by the Detroit, Toledo & Ironton railroad and the state highway department. The viaduct cost approximately \$200,000, and was started two years ago. The distance between Monroe and Jackson over this road is 50 miles, or 64 miles from Toledo. Road M-50 starts at Monroe.

Mt. Clemens—Reverting to its primitive instinct when it saw the vast array of relics of the old west in the cottage of Gilbert E. Miller, at Fair Haven, recently, a pet bear, which was presented to the Detroit jewelry man by 16 of his boyhood friends, lunged from its harness in a dash for liberty. After chasing several persons to the rafters, including Sheriff Percy L. Moore and Mayor William Streit of this city, the bear was finally recaptured by Forrest Quick, of Mt. Clemens, who lassoed it. The bear had been purchased from the state conservation department for \$75.

Lansing—An order requiring O. B. Fuller, auditor-general, to show cause why he should not be compelled to reveal the expenses incurred at the governor's conference at Mackinac Island, has been issued by the State Supreme Court at the request of Ed A. Nowack, publisher of a weekly newspaper here. Nowack charges the auditor-general refused to let him inspect the expense accounts and expenditure vouchers, which he contends are public records. The legislature appropriated \$25,000 for the conference.

Community Building

Proper Color Scheme Important to House

A large house on a small plot is best painted in unobtrusive colors, that is to say, colors that blend readily with immediate surroundings. Grayed blues or grayed greens show off such a house to good advantage. Neighboring houses should also be kept in mind in deciding upon a color scheme. The proper consideration of them may sometimes mean sacrificing a good color scheme already chosen, but it will pay in the end. It is far better to discard a certain harmonious combination than to have it killed by others which are not in keeping with it.

An example may be cited, wherein a house on the left has been treated a light salmon color, while a house on the right has been accorded a green treatment. A harmony of sequence could be very nicely established in this case by treating the house in the center with a colonial yellow.

After an examination of any exterior color problem it will be readily seen that a little thought given in the selection of proper colors will do much toward establishing a pleasing, harmonious and decorative result, that will be in keeping with both the house and its surroundings.

Benefit in Proper Planning of Village

City planning as practiced in metropolitan centers has its counterpart in the development of villages that serve as social and trade centers for farming communities. The automobile affords the farmer a wider range of choice in selecting his recreation and in selling his products and buying supplies. Some of the elements of good physical make-up of towns and villages, according to Wayne C. Nason, of the division of farm population and rural life of the Department of Agriculture, are convenient and pleasing exits and entrances, broad tree-lined streets, a common or village green as a civic center, park and playground space, sanitation, good architecture in private dwellings, as well as in public buildings, which should be conveniently located, and all set back from the streets and surrounded with ample lawns and clean and attractive borders. Villages that do not minister to the needs of the farming communities are likely to complain of the drift to the cities and of ruinous competition. Villages that are attractive, as well as serviceable, also profit from the ever-increasing army of summer tourists.

Oil Used Mechanically

Olive oil in ancient times had a medicinal use. The prophet Isaiah alludes to the use of oil as ointment in medical treatment. In his first chapter Isaiah describes the national corruption of Judah, and in verse six he states: "From the sole of the foot even unto the head there is no soundness in it; but wounds and bruises and putrifying sores; they have not been closed, neither bound up, neither mollified with ointment"—the ointment being oil. Its use as a medicine is also enjoined by St. James in his Epistle V. 14.

Olive oil in lamps was used for lighting purposes. How common was the practice is shown by the reference to lamps and oil in the parable of the virgins. The great lamps in the temple were fed with oil.

Possibilities in Brick

Of the many good qualities of common brick, one of special interest is its flexibility. Due to the small size of the units the possibilities are almost unlimited for the wide range of effects. Not only can a variety of shades be secured by differences in bands, joint and mortar color, but by selection, pattern work may be successfully accomplished. The use of "arch" or "lammy" brick assists in obtaining a ruggedness of surface, difficult of accomplishment with other materials. It may be obtained in varying degrees of irregularity, and has been successfully combined with the standard brick.

Open Fencing Best

High walls or the old-time, fortunately almost obsolete, board fence, shielded so thoroughly that they have become a thing of the past. Fencing with an openness of texture permits wide range of vision from without or within that is of great added protective value.

All the advantages to be derived from fencing are achieved easily by the installation of woven-wire fence with steel posts set in concrete. Built high enough the woven-wire fence is unclimbable. Various types of this fence may be obtained which will harmonize with any style of architecture or landscaping.

Shingles Over Old Walls

By laying stained shingles right over old side walls in brown, gray or colonial white, you not only improve the appearance and value of your property but you add insulation that means cooler summers and warmer winters.

No Shot In the Arm Needed For Aviation High Test Gasoline

This Gasoline is noted for its purity and absence of carbon. It is also noted for

- Ease in starting.
- Acceleration.
- Most miles per gallon.
- Power in hill climbing.
- Absence in knock.
- Eliminates "crank case" dilution.
- Does away with unnecessary repair bills.
- Fuel used by flyers at official and other meets.

Aviation (High Test) Gasoline is one commodity that the public can absolutely depend on in-cold weather as being uniformly genuine and is a fuel that passenger car and truck owners will make their best runs and performances in the winter months. They get greater speed, more power, more pep, and greater milage.

REMEMBER this High Grade Product will be placed on sale not later than Saturday, October 15th.
