EAST JORDAN, MICHIGAN, FRIDAY, OCTOBER 28, 1927.

NUMBER 43

Fair Continues As Heretofore

FAIR DIRECTORS DECIDE TO CONTINUE WITH THEIR DUTIES.

At a Meeting of the officers and directors of the Charlevoix County Agricultural Association held in East Jordan last Saturday, Oct. 22nd, it was decided to continue the work of the Fair under the present incorporated management, rather than turn over the property and management to the Board of Supervisors of Charlevoix County.

That our readers may understand the reason for above action, The Herald herewith publishes the following excerpt from the proceedings of the Charlevoix County Board of Supervisors.

Wednesday, Oct. 12, 1927
After considerable discussion it was moved by Sup. Murphy and Seconded by Sup. Cook that this Board of Supervisors of Charlevoix County take over the County Fair Association's property and this board run the Fair if agreeable with the County Fair Association Committee. Motion carried.

Moved by Sup. Heller seconded by Sup. Murphy the Chairman appoint a Committee consisting of Five Supervisors to be known as the Charlevoix County Fair Committee. Motion carried.

COUNTY FAIR COMMITTEE.
The Chairman appointed the following five Supervisors Richard Lewis, William J. Pearson, Howard C. Stevens, Jay Adams and Alexander Heller, to be known as the Charlevoix County Fair Committee.

Cancer Is Increasing

The definite increase of human cancer has engaged the best minds of the surgical profession for some years. There is no doubt but that the people in this country are suffering from cancer to a larger extent than at any previous period. The annual death toll from this dreaded disease is enormous, and increasing.

Dr. James Coupal, official White House physician, in a recent article in the American Journal of Surgery, calls attention to the study of figures for the last twenty years. Sherechewsky estimates cancer increase at 46 per cent, while F. L. Hoffman thinks it is 50 percent. All accessible cancers are being decreased except those of the breast which continues to take its toll despite the measure of surgery. Internal cancers, of course, are the source of much of the increased cancer growth.

The estimates 50 per cent. increase is subject to interpretation. Ten per cent is caused, it is thought, by the longer life now enjoyed by mankind, which enables a larger number of people to reach the dangerous cancer age. Thirty per cent. is credited to better diagnosis rather than an actual increase of the disease, which is credited with only ten per cent of the increase, according to Dr. Coupal.

The point we have in mind in calling these figures to the attention of the readers of Charlevoix County Herald is that cancer, in its early stages, can be cured. People should watch anything that persists in growth. A small "sore" may be the beginning of a cancer. When in doubt see a physician and let him use his judgment.

Harrisville—Lyman Massey and Verne Shook pleaded guilty in Circuit Court here to a charge of stealing a deer last fall from the hunting camp of W. L. Culver, of Grand Rapids, in the Hubbard Lake region of Alcona County. Fines of \$200 each and suspended sentences of three years were imposed. Culver offered \$500 reward for the apprehension of the thieves and several months later in the shop of a taxidermist at Vassar he identified a head as that of the missing buck heralded as being "the largest ever shot in Michigan."

Ann Arbor—Temporary admission to the United States has been granted Dr. P. M. Jack, of the University of Aberdeen, Scotland, who last summer was named to head the department of rhetoric at the University of Michigan. Dr. Jack had been refused admission because of a technicality in immigration laws which specify that a professor to be eligible for admission under the non-quota provision must have followed his profession for two years prior to application. Dr. Jack had been engaged in research work for a semester.

This is the time of the year to be looking over your accumulated gifts of past Christmases in order to be able to intelligently distribute them among your friends later on.
Few men stay mad with the sweet young things.

Sewing and Handicraft Clubs Organize

A. G. Kettunen and Miss Ruth Featherly, State Club Leaders, cooperating with the local extension service visited many schools in the county last week in the interests of boys' and girls' club work.

Many of the schools had clubs last winter and were so pleased with the results that they are planning on carrying on more club work this winter. For the girls' sewing clubs are being organized and for the boys handicraft clubs. The girls make towels, caps, aprons, and at least one dress, while the boys make a bench hook and five other articles of use for the home and farm besides keeping reports of their time, labor, expense and value of product and exhibiting their articles in the early spring.

The following schools were visited: Slaughter School, Harold Ikens, teacher; Afton School, Conn Nowland, teacher; Chaddock School, Miss Lucille Belding, teacher; Barnard School, Miss Bernice Courier, teacher; Phelps School, Russell Duffey, teacher; Hilton School, Miss Lottie Webster, teacher; Hopyard School, Wesley Joliffe, teacher; Star School, Mrs. Florence Novotny, teacher; Walker School, Mrs. Ruth Taylor, teacher; Tainter School, Miss Josephine Ellis, teacher.

From present indications we hope to have at least fifteen clubs this winter, including seven handicraft, six sewing and two hot lunch clubs.
B. C. MELLENCAMP,
County Agr'l Agt.

Grayling Defeated, 33 to 0

COACH LEE'S MEN PLAY CLASSY FOOTBALL

It is quite a number of years since Grayling High School played football with the local High School. The return of athletic relations between the two schools after a lapse of years made the Grayling boys an unknown quantity, for outside of the comparative scores of the Kalkaska game, nothing was known of their strength. This kept Coach Lee and his men quite worried the past week and they were pleased and agreeably surprised to win by a margin of five touchdowns, for it has always been recognized that Grayling is an aggressive athletic town and stands for only the most aggressive, yet clean athletics. It was a pleasure to have Grayling come to East Jordan, for this game.

There was very little to choose in the weight of the two teams but one could see at the kick-off that Coach Lee's men showed a little more confidence and determination born of experience, foot-ball knowledge and the fact that they have cleaned the slate to date by winning their three previous games. Expecting a real battle from Grayling caused the businessmen to close their places of business at 2 o'clock and attend the game in large numbers. And by their comments on the side lines one would recognize that they got their moneys worth.

Captain Fenton of Grayling defended the north goal. In spite of two outside penalties against East Jordan, Grayling lost the ball on downs. It looked for a minute as though East Jordan was going to have very little trouble in circling the Grayling ends, but for about ten minutes, the Grayling boys put up a most stubborn defense and not until near the end of the first quarter, through the means of line bucks and line runs, alternating between Taylor and Barnett, did they lose out. Captain Bill Barnett winning a little trophy on the side by pushing over the first touch-down.

In the second quarter East Jordan got going full steam ahead. Barnett seemed to be very effective time after time in hitting the line, Taylor encircling the ends along with Muma, while Pray always supplied the little sneak that completed the first down, until Taylor carried the ball over a pretty little run around the end for the second score, and Taylor kicked goal making the score at the half 13-0.

Outside, it wants to be born in mind that although the back field seemed to be doing the scoring just like the man who makes the hit that scores the man in base-ball, the line was doing the clean-up for the back-field men and this is the reason the locals are a strong first-class Class C football team. For the back field has in front of them a very light, fast and aggressive line. Some of the men that did the stellar work through

The Spirit of Indian Summer

the first half and rest of the game making it impossible for the Grayling team to penetrate the East Jordan lines for any great gains, was Bruce Lintner, better known as "Mike" Lintner by the boys, along with LaPeer and tackle. Also StCharles, Blossie and Weaver did stellar work on the lines.

There isn't any better fighting line on any other High School in northern Michigan, as on East Jordan High School line, as far as fighting goes. Some of the new men like Beyers, Rosenthal, Hipp and Darbee fought like tigers. Rosenthal especially, being so aggressive and anxious that he wanted to start before the ball was passed. Coach Lee must have given the boys a little jar between halves as usual, for they came back and played sensational football in the third quarter.

The team played a very aggressive blocking game making it possible for the men to make gains almost at will. This seemed to be Chris Taylor's quarter for he made a sixty yard run for a touch-down and kicked the goal. Aided by Pray and Barnett, Chris took the ball around the end again for thirty yards and a touch-down, making the score 26-0.

As the first quarter seemed to be Barnett's; the second Taylor's, on the same line of reasoning, the last one was Pray's. Placing a punt on Grayling's 35 yard line, he carried the ball behind beautiful blocking on the side to the goal for the final score and Blossie kicked goal.

Captain Fenton for Grayling, played a fine aggressive game in the back field. The Smith brothers, by the way brothers of the famous Elmer Smith who played on the local team some years ago, played very fine games. In fact, it looked to the writer as though Grayling was simply out-classed as a team and not so much on real fighting and although the score looks one-sided Grayling's team did not stop fighting for one minute. Not only were they a snappy team but they played just as clean and sportsman-like football as was ever played in East Jordan. We like to play that kind of a team for the coach of East Jordan team asked his men to play clean and Teddy Roosevelt would say "Charge low and hit hard".

1 2 3 4
7 to 0 7 to 0 12 to 0 7 to 0
Referee—Dickie of Harbor Springs.
Umpire—Keefer of East Jordan.
Head—Linesman—Sneltenberger of East Jordan.

The local team plays one of the crucial games at Harbor Springs Saturday, October 29. These teams have showed themselves to be one of the best class C teams in this section and it will be a game worth traveling far to see.

Water Tax Notice

Water Taxes for the City of East Jordan will be due and payable at my office on and after Nov. 1st, 1927.
G. E. BOSWELL
City Treasurer

First Iron Rails

Although the United States, as everybody knows, is the country with more railroad mileage than any other, it is surprising that the first iron rails for the building of the first of these miles were imported from Europe. It was in May, 1820, that the ship Alexander arrived at Baltimore from Liverpool with 50 tons of iron and equipment for the construction of the first railroad in the United States.

Radio Helps Sufferers

An operating room in St. Mark's hospital in New York is equipped for radio so that a patient may wear headphones on the operating table to distract the mind while surgeons operate on him, using local anesthetics.

Potato and Apple Show

AT GAYLORD NEXT WEDNESDAY, THURSDAY, FRIDAY.

The Top O' Michigan is ready for the staging of their fifth annual potato and apple show, which has all indications of being the biggest show ever held.

On Wednesday, Thursday, and Friday of next week the potato and apple growers will be at Gaylord to compete for the attractive premiums offered and to hear and take part in the discussions which have become such a great part of the three day show.

Eight representatives of the Michigan State College, headed by Dean R. S. Shaw, will be present to assist the farmers of Northern Michigan in the production and marketing of high quality potatoes and apples.

Hon. Herbert E. Powell, commissioner of agriculture, will also be present, as will Dr. E. L. Nixon of Pennsylvania State College, who was the originator of the certified seed potato idea in Michigan.

With a premium list larger than ever before offered Mr. A. C. Lytle, secretary of the show, has been assured of a large entry list. Over \$1600 in premiums will be paid.

The singing contest has already received twice the entries of last year and more are expected by the time of the contest on Friday morning, November 4.

The potato grading contest, the apple pie baking contest, the potato peeling contest, and the essay contest all have attractive awards for the winners.

Every potato and apple grower should plan to be at the show the full three days. No better school of instruction could be found anywhere than during the three days spent at this show.

The boys and girls are also expected to respond to the attractive premiums offered and to the contests. The Boys and Girls Club members will be guests of the Association at a luncheon on Friday noon.

Remember the three days—November 2-3-4. They will be apple day, potato day, and Boys and Girls Club day, respectively. Plan to attend.

Elsewhere in this issue you will find a paid advertisement concerning this show.

A. C. Lytle, Secretary.

Ypsilanti—Martin McKenna, 19 years old, was kidnaped recently by two men who drove up to McKenna as he was walking on the street and forced him at the point of a gun to enter their car. He was bound and gagged and taken to the south part of the city, where the robbers dumped him out after searching his pockets and taking 60 cents, all the money he had. McKenna crawled to a nearby residence where he thumped against the door and aroused the residents, who released him from the ropes with which he was bound.

Adrian—Walter Huyck, of Fruit Ridge, a cheesemaker, recently wrecked an automobile south of Adrian as he was returning home. A member of the sheriff's force, driving behind him, stopped to give assistance and noted that the license plates bore numbers of a car that had been reported stolen shortly before. Huyck looked at the plates and admitted they were not his. He was brought back to Adrian and found his own car, of the same make and model, parked on a downtown street. The car he wrecked belonged to another.

Lindbergh has set a remarkable record by his flight around the country. Almost without exception he has maintained his schedule.

Proper Method of Loading Potatoes

One of the new features of the Top O' Michigan Potato and Apple Show, which takes place at Gaylord on November 2nd, 3rd, and 4th, is a demonstration of proper loading methods for cold weather shipments. This demonstration will be carried on in an M. D. T. refrigerator car which includes all the very latest improvements in refrigerator car equipment. W. S. Jensen, from Rochester, N. Y., an expert on this subject, will be on hand to discuss and demonstrate the best methods for packing cars, loading, packing, and pre-heating all designed to prevent the potatoes from freezing in transit during cold weather.

Mr. Jensen, who is Superintendent of the Perishable Inspection Service of the Merchants Despatch, Inc., in accepting the invitation to discuss those shipping problems with our potato growers in Northern Michigan, said: "Our experience in inspecting Michigan potatoes leads us to believe that the proper pre-heating of cars, before loading will prevent 90 per cent of the damages which are now caused by the freezing of this produce and other protective material is also in transit. The liberal use of paper is very good insurance. Everybody loses when produce is damaged en route—carrier and shipper should cooperate to eliminate all preventable losses."

A. C. Lytle, Secretary of the Show, announces that a formal demonstration on proper loading will be given in this M. D. T. car each day of the show at 11:00 A. M. The car will be open all day for inspection, however. He urges that all cooperative managers and other old-line shippers plan on seeing this car and taking in one of these demonstrations.

State Back of Winter Sports

WILL ASSIST IN PROGRAMS OF RECREATION.

The state of Michigan will give active assistance in the establishment of Michigan as a winter playground. Not only will this help be given various localities desiring to carry out a program of winter sports, but at least three or four state parks will be made available for this recreation.

P. J. Hoffmaster, superintendent of parks, has the work in charge. During a conference this week with Director George Hogarth it was decided to provide skating rinks, toboggan and skii slides at Island Lake, at Grayling, at one of the western Michigan state parks and at one park in the upper peninsula.

Hoffmaster has acquired a large amount of data on the construction of the various types of slides and rinks, which will be available to any community wishing to avail itself of it. The department, through Hoffmaster also will assist in supervising several winter sports carnivals that are in prospect for the winter.

The Michigan winter sports program will not be carried out with a view of attracting the professional, but it is likely professionals will be brought into the state to exhibit at the various parks to stimulate interest in what the state and other interests are trying to do.

Many Wells Unsafe Shown By Analyses

That the water supply in many Michigan rural communities is contaminated, is shown by analyses made at the State laboratories in Lansing.

The water samples were submitted for analysis by farmers from six counties that were visited by specialists from the agricultural engineering and home economics departments of Michigan State College. These specialists urged that farmers take advantage of modern means of disposing of household sewage.

In one Michigan county, the samples of water analyzed showed that 64.5 per cent of the wells tested were contaminated. In another county, only 19.1 of the wells showed contamination.

Members of the agricultural engineering department believe that the deeper wells furnish a safer supply of drinking water. The analyses made show that the largest per cent of unsafe wells were in counties that are low and in which there are many shallow wells.

Reports made by county agricultural agents show that farmers are installing many septic tanks, which furnish an inexpensive and safe way of sewage disposal.

Not every man wants to hire the faster worker.

Road Commission Takes Over Ferry

ROAD COMMISSIONERS WILL BE APPOINTED HEREAFTER

(Charlevoix Courier)

Tuesday afternoon, Oct. 18, saw the close of the annual October meeting of the Charlevoix county board of supervisors. Peace and harmony marked the closing activities of the session. Some storm clouds of earlier days subsided and the meeting was marking by results accomplished.

Taking up the work from last Tuesday's session, which concluded the proceedings in last week's issue of the Courier, we find that on Wednesday the board adopted a resolution to take over the property of the county fair association and run the fair if agreeable to the association. A committee of five supervisors will be appointed to be known as the Charlevoix county fair committee.

The salary of the friend of the court was fixed at \$200 per annum together with actual and necessary expenses of the office.

In view of the fact that the work of the county agricultural agent was deemed to be of great value to farming of the county, a resolution was adopted to continue the work and an appropriation of \$2000.00 was made for this purpose. In connection with this work a committee of three to be known as the County Agricultural Committee was appointed, including William F. Tindall, Howard C. Stephens and Orton VanDusen.

An important bit of legislation in Thursday's session was a resolution adopted by the board that henceforth members of the board of county road commissioners shall be appointed by the board of supervisors of the county. At the October 1928 session of the board a member of the county road commission shall be elected for a term of six years beginning January 1st, 1929, and at its October session of each even numbered year thereafter a member of said board of county road commissioners shall be elected by the board of supervisors.

This new ruling is deemed far more favorable than the old system of electing road commissioners at the county election.

An appropriation of \$1000 for permanent improvements to Whiting park was moved and adopted Thursday.

As a result of a resolution adopted by the board at Thursday's session, the Ironton ferry will now become part of the county road system, with the control, management and operation of the ferry vested in the board of county road commissioners. All bills and accounts for the operation of the ferry, and statements of all expenditures will be submitted to the auditing committee of the board of supervisors, and shall be allowed from the general fund of the county, provided, however, that the board of county road commissioners shall not expend any money nor incur any indebtedness for permanent improvements in excess of five hundred dollars without an appropriation from the board of supervisors.

The reports of the county road auditing committee and the county agricultural agent were accepted, as were also the township and city clerk's reports.

The original recommendation of the county road commission to raise a county road tax of 4 mills was turned down by the board. At Tuesday's session the board adopted the amended report of the road commission, which provides for a county road tax of 3 mills, one mill lower than last year, for road purposes during the years 1927-28. It was recommended the amount be expended as follows: for construction div. No. 1 for Norwood road, \$5,000; construction div. No. 2, Boyne Falls-Deer Lake road, \$5,000; construction div. No. 3, to be spent on re-location of the Ironton-south road, \$5,000; maintenance of county roads, \$12,000; tools and equipment, \$6,107.17.

The original recommendation of the county sinking fund committee to raise a 3 1-2 mill tax for the purpose of purchasing and retiring county road and federal aid bonds and paying semi-annual interest on same was not accepted by the board, which at its Tuesday afternoon session adopted a resolution to raise 2 1-2 mills for this purpose. This is a cut of 1 mill from the amount assessed last year. This action was not looked for, as it was thought the board would cut down the road tax and allow the 3 1-2 mill sinking fund tax, which was deemed necessary by the sinking fund committee to retire bonds falling due in 1932.

A man told us the other day that he did not agree with everything that we wrote. Well, we like that; these columns often advance ideas for the sake of promoting discussion, without which intelligence might as well be dead.

The Limitations of Education

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

THE summer following my junior year in college I developed physical strength and a very limited balance in the bank by doing manual labor in the farming community in which I had grown up. We were thrashing for Cornelius O'Donnell down in the Dutch flats. Cornelius was a good farmer and a keen judge of human nature. He had known me almost from infancy, and I am afraid thought it a waste of time and money for me to put so many years in at college.

"How long you been in college?" he asked me.

"Three years," I said. "I've got a year more."

He looked at me quizzically. "I suppose there won't be anything you don't know or can't do by the end of that time," he remarked.

Well, a good deal more than I then realized, I have since discovered, education has its limitations. There are a great many things that even a doctor of philosophy doesn't know and an infinite number which he can't do.

When I was a graduate student at Harvard university a good many years ago, I became acquainted with a man of forty-five or so who was doing his level best to acquire a doctor's degree. He was married; he had a family of four or five children; and never having earned even a comfortable salary as a teacher, he was poor. It meant sacrifice for him and for every member of his family for him to go to college.

He had something of the opinion of Cornelius without having the old man's shrewdness and common sense. He believed that when the degree was conferred and the crimson-lined hood was slipped over his head he would know everything and be able to do anything he set himself to. He was quite mistaken. He would never even be able to do well the one thing for which he was preparing. He had no skill in presenting facts, no magnetism in holding attention, no insight into the way the human mind works or the human heart is stirred. No matter how many degrees he might obtain he would always be cold and dull and ineffective. Education could not recreate him.

The amount that any one man can know or do is relatively small. A friend of mine has put in the most of forty years in the study of earthworms and yet he admits that he knows relatively little about them. He has attached to his name a long string of degrees, honorary and earned, and yet I'm not at all sure that he could operate a simple motor car; and yet the three-year-old son of a friend of mine started the family automobile and piloted it around the block without accident.

One of the most distinguished scholars in linguistics in this country finds the operation of a hot-air furnace quite beyond his powers of comprehension, though his wife who has only been through high school can keep the house warm without difficulty. Nobody knows so very much, and the educated only a little more than the illiterate.

(© 1927, Western Newspaper Union.)

Commercial Hint

Business failure is not always the result of too much overhead or under-head, but often of excessive dunder-head.

Tree Makes Starch

In the course of a day, an average tree manufacturer some 20 pounds of starch.

Peoples' Wants

MUNNIMAKERS

Notices of Lost, Wanted, For Sale, For Rent, etc., in this Column is 25 cents for one insertion for 25 words or less. Initials count as one word and compound words count as two words. Above this number of words a charge of one cent a word will be made for the first insertion and one-half cent for subsequent insertions, with a minimum charge of 15 cents. These rates are for cash only. Ten cents extra per insertion if charged.

Community Building

Repairs Program Needs Most Careful Attention

Close inspection will disclose whatever is necessary to put a building in good shape. In the first place, there are the plaster walls and ceilings to repair before doing any decorating. Unsightly cracks should be carefully cut deeper with a putty knife so as to provide grooves for receiving the plaster of paris filler, which should then be applied.

Inside woodwork will of course need to be gone over with enamel, paint or varnish, or wax, as the case may be. For touching up old varnish, whatever the color of the original wood, one may now purchase colored varnish of any desired tone to match the original color. Enamel is excellent for going over old painted woodwork. It can be applied directly to the old material, but a better finish is obtained by applying an undercoat of flat paint of the desired color. Such treatment of woodwork will prove an efficient and economical aid in the up-keeping of the building.

Hardwood floors should never be permitted to wear out. The varnish or wax with which they were originally covered should be kept in condition with floor oil made for this purpose, and as soon as floors need it varnish, wax or other floor finish should be used liberally. Should the floors be in bad condition, however, it is often better to have the old finish entirely removed, using one of the compounds sold for this purpose, and then refinish the surface as good as new.

Home Owner Eliminates Loss From Moving

Those of you who complain about your rent, about having to move every two or three years because the landlord "won't fix up the place" or sells it "out from under you" consider this fact: The rent the home owner pays never goes up! Whether you own your home free of debt or are acquiring it under contract payments the charges you must pay per month are definitely fixed through the period of your possession. No one can compel you to pay more, nor can you be compelled to move elsewhere to seek lower rents.

It seems as if those who rent oftentimes fail to take into consideration this important fact. It is one of the reasons why the family committed to a program of home ownership begins to make headway from the moment it commits itself to such a program. Then the losses through continual moving are eliminated. The old adage that "three moves are as good as a fire" is certainly close to literal truth, as every renting family knows.

Making Energy Pay

Men too frequently regard as a mere threat the Biblical statement, "Such as ye sow ye shall also reap." In reality it is much better than a threat. It is a promise. Two Mississippi towns in the past ten days had cheese plants added to their list of industries. These towns a little while ago were working methodically and industriously for milk condenseries. They organized their business men, surveyed their situation and went after some outside capital. Although they failed to attain their specific goal, they gained something else as good or better. No well-directed energy is ultimately wasted. It will bear good fruit in one form or another.—Neshoba Democrat.

Kickers

Frequently one hears some fellow kicking on "the firm he works for, and wonders why he did not quit and get a job more to his liking. If he has a better job than he could get elsewhere then he has no cause to kick. More frequently one hears a man kicking on the town he lives in. If that town furnishes him a better living than any other town he should feel friendly to it and say so.—Newcastle Times.

Mushroom Growth

A word of caution for cities engaging in the scramble for industries is sounded by the organization service of the Chamber of Commerce of the United States. It draws the line between enlargement by substantial growth and enlargement by inflation and reiterates the warning that there is no virtue in mere bigness.

Color for Roof

Don't forget that the roof must be protected with paint or stain, as well as the siding. In selecting a color for the roof of your home, consider the surroundings. A red roof looks well against high, dark trees. A buff roof suits the house surrounded by little foliage.

Restores Home Life

Many writers have deplored what they call the passing of the American home, and the old-fashioned home life. Certainly any well-devised movement to check it and restore in full measure the old home life is of benefit to the community.

Well Worth It

It costs money to build up your local pride—and it's worth it.

Popularity of Legume Crops

Accounted for by Depth to Which Roots Penetrate Soil in Building.

Popularity of sweet clover and alfalfa for use as soil builders can be accounted for by the depth to which their roots penetrate the soil, says H. A. Lunt, of the soils and crops department, college of agriculture, University of Illinois.

"Measurements made on the Hartsburg experiment field of the college showed that the maximum depth of roots of various legumes in the fall following spring planting were: Common sweet clover 34 inches, alfalfa 30 inches, Grundy county sweet clover 28 inches, red clover 22 inches, alsike 18 inches, dalea 10 inches, hubam 9 inches and Korean lespedeza 8 inches."

Two Other Requirements

Vigorous growth and thorough inoculation with the proper bacteria are two other requirements which, along with deep root penetration, must be met by a legume that is to be used for building up the soil, Lunt pointed out. Responsibility for the last point, that of inoculation, rests upon the farmer himself, rather than upon the legume. The soils may or may not be already inoculated. If not, the farmer must supply the bacteria, if the nitrogen fixing property of the legume is to be utilized.

"A legume that makes a vigorous growth will add more easily decomposable material to the soil when it is plowed under than will a legume that makes a small growth. The object is to incorporate into the soil as much material as possible which will decompose rapidly and leave in the soil considerable humus containing plant food elements for future crops."

Building Up Soil

"For instance, a ton of legume hay, such as clover or alfalfa, when added to the soil is far more effective in building up the nitrogen and organic matter content of the soil than is an equal amount of straw, or corn stalks. This is true because: (1) the legume contains five to six times as much nitrogen as does straw, and (2) there is a smaller loss of organic matter during the decomposition of the legume than there is in the case of straw or corn stalks."

"Deep root penetration is essential in order that the potential plant food in the subsoil may be brought nearer to the surface. Furthermore, deep roots probably are a factor in opening up the tighter subsoil, their roots when decomposed making the soil more porous and building up the organic matter content of the soil."

Build Up Bee Colonies Before Winter Weather

The poor honey flow of the past season will mean weak colonies if the bees are not properly prepared for winter weather.

Those young bees that will live through the winter and make up the colony next spring are being reared before the first killing frost, states C. L. Sams, beekeeping specialist at the North Carolina State college. The older bees will die during the cold weather and will be of little value to the colony and so anything that interferes with brood rearing during October will result in the colony being in poor condition for winter.

"The successful beekeeper, therefore, sees to it that each colony has a good, prolific queen," says Mr. Sams. "A queen that has been reared during the past season is preferable. There should also be enough worker bees to care for four or five combs of brood. Each colony needs to have at least 20 pounds of honey so that brood rearing will not be restricted for lack of stores and extra room should be added for the storage of nectar in those sections where there is a fall flow of honey. When these conditions have been met, the bees will see to it that enough young bees are reared to winter the colonies."

Agricultural Items

Good seed is good crop insurance.

Lime and legumes are the best friends.

A farmer reaps what he sows. Plant out with wheat and you will reap the same.

The character of the people determines more than anything else the progress of the community.

Farmers who aim for the bull's-eye in their farming methods are the ones who will come out with a high score.

Lime does the same thing for soil that sugar does for a cup of coffee. It sweetens or corrects the acidity of the soil.

The wise farmer is usually prepared for a corn crop failure. His silo will turn into silage either a crop killed by drought or a green crop that can't ripen before frost.

One of the best green-podded beans is the Stringless Green Pod Refugee. It's an improvement over the old Refugee, yielding as well and being a real stringless variety—as not all the "stringless" beans are.

Redpath Lyceum Course

PROBATE ORDER
STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.
At a session of said Court, held at the Probate Office in the city of Charlevoix, in said County, on the 20th day of October, A. D. 1927.
Present: Hon. Servetus A. Correll, Judge of Probate.
In the Matter of the Estate of Essay G. Sidebotham, Deceased.
Wesley Sidebotham having filed in said court his petition praying that petitioner or some suitable person be appointed trustee of said trust estate.
It is ordered, that the 12th day of November, A. D. 1927, at ten o'clock in the forenoon, at said probate office be and is hereby appointed for hearing said petition;
It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said county.
SERVETUS A. CORRELL,
Judge of Probate.

Correct this sentence: "Don't bother to pay me the bill you owe: I have collected plenty of money already this month."

Wisdom in Reticence

"People who say little," said Hi Ho the sage of Chinatown, "reserve to themselves the time for thinking much."—Washington Star.

Hard Situation

It's a wise father who knows what his own son is doing and can check the young man up without arousing suspicion as to how he got so wise.

Rub Rheumatic Pain From Aching Joints

Rub Pain right out with small trial bottle of old "St. Jacobs Oil."

Stop "dosing" Rheumatism.

It's pain only; not one case in fifty requires internal treatment. Rub soothing, penetrating "St. Jacobs Oil" right on the "tender spot," and by the time you say Jack Robinson—out comes the rheumatic pain and distress. "St. Jacobs Oil" is a harmless rheumatism liniment which never disappears and doesn't burn the skin. It takes pain, soreness and stiffness from aching joints, muscles and bones; stops sciatica, lumbago, backache and neuralgia.

Limber up! Get a small trial bottle of old-time, honest "St. Jacobs Oil" from any drug store, and in a moment, you'll be free from pains, aches and stiffness. Don't suffer! Rub rheumatism away.

BREAK CHEST COLDS WITH RED PEPPER

Ease your tight, aching chest. Stop the pain. Break up the congestion. Feel a bad cold loosen up in just a short time.

"Red Pepper Rub" is the cold remedy that brings quickest relief. It can not hurt you and it certainly seems to end the tightness and drive the congestion and soreness right out.

Nothing has such concentrated, penetrating heat as red peppers, and when heat penetrates right down into colds, congestion, aching muscles and sore, stiff joints relief comes at once.

The moment you apply Red Pepper Rub you feel the tingling heat. In three minutes the congested spot is warmed through and through. When you are suffering from a cold, rheumatism, backache, stiff neck or sore muscles, just get a jar of Rowles Red Pepper Rub, made from red peppers, at any drug store. You will have the quickest relief known. Always say "Rowles."

MIKADO

Have Your Scribbles Analyzed

The Yellow Pencil with the Red Band

Louise Rice, world famous graphologist, can positively read your talents, virtues and faults in the drawings, words and what not that you scribble when "lost in thought."

Send your "scribbles" or signature for analysis. Enclose the picture of the Mikado head, cut from a box of Mikado pencils, and ten cents. Address Louise Rice, care of EAGLE PENCIL CO., NEW YORK CITY

IF SKIN BREAKS OUT AND ITCHES APPLY SULPHUR

Just the moment you apply Mentho-Sulphur to an itching, burning or broken out skin, the itching stops and healing begins, says a noted skin specialist. This sulphur preparation, made into a pleasant cold cream, gives such a quick relief, even to fiery eczema, that nothing has ever been found to take its place.

Because of its germ-destroying properties, it quickly subdues the itching, cools the irritation and heals the eczema right up, leaving a clear, smooth skin in place of ugly eruptions, rash, pimples or roughness.

You do not have to wait for improvement. It quickly shows. You can get a little jar of Rowles Mentho-Sulphur at any drug store.

State News in Brief

Manistee—Henry Larsen, 18 years old, blew away part of his left hand while duck hunting. He picked up his shotgun by the muzzle. The hammer caught in some twigs and fired.

Pompeii—George Jurek, 39 years old, was instantly killed and his son, John, 11, died in an Alma hospital a few hours later when the automobile in which they were riding was struck by a truck driven by Clifford Cowdrey of Ithaca, at a road intersection 3 1/2 miles northwest of here.

Mt. Clemens—Harry Lasky and Stanley Kalosinski, both 30 years old, have been held here in connection with the robbery of the Memphis State bank of \$6,000. They were arrested in Detroit and brought to the county jail here. Henry Brown, cashier of the Memphis bank, said they were the bandits who held him up.

Ann Arbor—Leo De Beaumont, 24 years old, of River Rouge, was killed here when a cave-in occurred in a gravel pit on the New Pleasant Lake road where he was working. He was buried under about five feet of gravel. Fellow workmen attempted to dig him out but it was necessary to use a scraper to remove the earth from the body. No inquest was held.

Traverse City—Traverse City resort proprietors and business men of Leelanau, Benzie, Antrim, Kalkaska and Grand Traverse counties met here recently to plan for the Grand Traverse region's 1928 resort season. They were addressed by Carroll Sweet, Grand Rapids banker; A. H. Landwehr, Holland manufacturer; Hugh J. Gray, secretary of the Michigan Tourist and Resort association, and former Congressman Diekmann.

Lansing—Higher rates on lumber shipments from Baraga, L'Anse and Chassel to Detroit will become effective November 1, according to an order by the public utilities commission. A rate of 27 1/2 cents a hundred was ordered some time ago but the Worcester Lumber company secured a suspension of the new schedule. The former rate was 20 cents. The commission announced the suspension will end November 1.

Lansing—That interest in the Fred Palm case in which the local man was sentenced to a life term at Jackson for possessing a pint of gin has become world-wide was evidenced by the receipt of a letter from Dr. R. Herrod, director of the International Bureau Against Alcoholism, with headquarters at Lausanne, Switzerland, for information in regard to the case. The letter was received by Mayor Laird J. Troyer.

Lansing—Governor Fred W. Green may have to summon the legislature back to Lansing in extraordinary session within a few weeks if the state supreme court sustains the opinion of Circuit Judge Guy A. Miller that the 3-cent gasoline tax law is unconstitutional. This developed here when a discussion in the state attorney general's department disclosed the probability that should the high court agree with Miller there would be no gasoline tax at all.

St. Ignace—Remains of a tragedy of at least three years ago were uncovered here recently when Raymond Majhotz, a railroad employe, found the body of a man in the woods near the city. County authorities said it had been there for at least three years. A little penciled note, tightly corked in a bottle, in one of the pockets told the story. It read: "Please bury me where I fall. Premed. a. e. d. suicide. No friends." That the body had lain so long without being found caused considerable comment by authorities.

Lansing—The State Administrative Board has refused to pay a bill for \$7,291.25 tendered by the City of Detroit for the maintenance of 430 state prisoners in the Detroit House of Correction at \$1.25 a day from August 18 to August 31. The Legislature passed a law empowering the State to enter into a contract with the City of Detroit for care of state prisoners. O. B. Fuller, auditor-general, pointed out the law did not become operative until Sept. 5, and as yet no contract had been entered into for the upkeep of prisoners.

Algonac—Arthur La Ponsa, 25 years old, of St. Clair Flats, was accidentally shot and killed by Henry Sampier, while hunting ducks along Lake St. Clair recently. It was the second hunting fatality in the same district in two days. Each of the men had shot once at the ducks which were flying overhead. As Sampier fired a second time, La Ponsa rose in the boat and received the charge in the side of the face, dying almost instantly. In the first accident, Clarence G. Valentine, a Detroit salesman, was killed by John W. Knorr, also of Detroit.

Mt. Clemens—Theodore Bardecki, 16 years old, of Meade, became the first victim of the hunting season in Macomb County recently, when he received the full charge of a shotgun in his body. The gun was fired accidentally by Fred Goltick, a companion, who had been hunting with Bardecki. Goltick, overcome with grief, turned the gun on himself, but the weapon was wrested from his hands by Henry Bardecki, 10-year-old brother of the dead boy, before it was discharged. The accident happened at the Bardecki farm.

Community Building

Fire Prevention One of City's Problems

The fact that the United States annually builds with more than half a billion dollars' worth of property a funeral pyre on which are sacrificed 12,000 of its citizens, should force the nation to recognize that prevention of such terrible waste of life and property is one of the major problems before the people.

After unlocking vast stores of wealth by our methods of efficiency in industry and business, it is worse than mockery to permit carelessness to turn in and destroy not only a substantial part of this wealth, but also thousands of priceless lives along with it.

Irving T. Bush of New York declares that the country should put fires in the class of preventable diseases; as, for instance, yellow fever. Medical research and skill finally located the cause of that plague and stamped it out. Skilled fire prevention engineers could take the place of the medical scientists who blocked yellow fever. Certainly anything that takes the lives of 12,000 persons and more than half a billion dollars' worth of property a year in one country must be treated as a serious disease.

Always Well to Build With Resale in Mind

Have you ever thought of fashion in connection with home building? The fashions do change in buildings just as in clothes, although not so rapid, perhaps.

Fashions change in furniture, in plumbing and lighting fixtures of the house; fashions change in automobiles, and in fact in almost everything that we buy.

With rare exception, every man who builds a home should consider the resale value of the property. There are many factors which may make it necessary for him to sell. With sale in mind, or with protection of investment in mind, it would be unwise to build a home that was not in fashion.

The fashion in homes today is swiftly turning toward the permanent type.

Improves House's Setting

Those who are considering buying an old house and remodeling it will find an amazing variety of ways by which the grounds around the house may be improved.

Concrete today is playing a big part in the use of walks, drives, garden furniture and such ornamental accessories as pools, sun dials, etc. Brick can likewise be employed in all these capacities.

A moderate expenditure on the grounds of an old house goes a long way toward changing the entire appearance. While this is not essentially to be classified under the head of "remodeling," at the same time it has to be considered, and the results are far in excess of the effort and cost expended.

Investment That Pays

Economy in home planning need not imply the necessity for sacrifice of convenience or beauty; in fact, the reverse is very often true, particularly with the smaller, medium-priced home.

Such plans must meet certain family requirements, and at the same time come within a fixed appropriation. The result, if a competent architect has been employed, is compact arrangement and simple design which make for convenience and good taste.

The man who invests in such a home is richer not only in dollars and cents but, greater still, in the restfulness which simplicity of design assures. Particularly is his mind at rest if construction and cement-astbestos shingles have been used to make the house fire-safe and easy to maintain.

Inside, Not Outside

Says Rollin Everhart: "A marvelous fact about life is this: it can be lived greatly in any circumstances. Not the amount of paint in a picture, but the masterful use of what there is, makes it glorious. Many a man with a wealth of things supposed to give color and value to life is only a worthless dabbler, and many a man who has to live in drabs and browns is a picture of nobility. Those who know how can live greatly while they live, despite financial reverses, poverty, sickness, pain or hindrances that thwart all their hopes and plans."—Mobile Register.

Take Care of Home

Your house is one of your greatest assets. Its importance as an investment alone warrants the best of care. Unprotected wood weathers and decays. Paint protects it by forming a tough, flexible, waterproof film over the surface. A well-painted and cared-for house maintains its value and desirability as a residence long after a neglected house has crumbled into dust.

Construction Features

Four distinct elements enter into good residence construction, according to a building conference recently held in Chicago. These elements, listed in the order of their importance, are: Fire-safety, insulation, permanence and beauty.

Honored by Peru

Mrs. Frank Barrows Freyer, wife of Captain Freyer, U. S. N., has just been decorated with "El Sol Del Peru" (Sun of Peru), a medal bestowed upon very few Peruvians and no other American woman. The decoration is in recognition of her humane work in founding the Peruvian Humane association for the protection of children, and in creating better understanding between the two nations through familiarizing Americans with Peruvian art and culture.

Uses of Poverty

Poverty has played fairly godmother to many a man; not by changing him in the twinkling of an eye to something else, but by teaching him slowly and silently the lessons of industry and patience and courage and hope, until he found himself at last, only half-realizing how, a rich man in all that counts most—Youth's Companion.

Good Manners

To want the best of everything, the first chance, the last word, is childishly human. But to be able to stand aside and cheerfully, wholeheartedly make room for another is the mark of high breeding. It is also the sign of a beautiful spirit.

A GOOD THING—DON'T MISS IT.

Send this ad and ten cents to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive a trial bottle of Foley's Honey and Tar Compound, for coughs, colds, croup (spasmodic) and tickling throat; also a trial packet each of Foley Pills, a diuretic stimulant for the kidneys, and Foley Cathartic Tablets for constipation, biliousness, and sick headache. These reliable remedies have helped millions of people. Send for them.—Hite's Drug Store.

Canoeing Sport Revived

The old Indian practice of canoeing was slowly but surely dying out when it was brought back to life by the organization of the American Canoe association in 1890. Due to the work of this association canoeing today is one of the most popular of summer sports.

TOP O' MICHIGAN POTATO AND APPLE SHOW

GAYLORD, MICHIGAN

November 2nd, 3rd and 4th, 1927

This is the fifth anniversary of the founding of our potato and apple show. From a humble beginning in 1922 this show has had a steady growth and has continued to be the biggest show of its kind in the United States.

We are pleased to announce that this year will again set a new peak in premiums offered and program to be rendered. Over \$1600 will be paid out to exhibitors and contest winners. Noted speakers will appear on our program.

The success of this show has been due only to the hearty cooperation of the farmers and business men of the Top O' Michigan Counties and the other contributing agencies.

The usual three big days will be held this year. We want your attendance and we want your exhibits.

PATIENCE
By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

I HAVE just read an account of a recent speech of Governor Brewster of Maine with reference to the development of prohibition in his state, which, according to the statement quoted, it took 25 years to perfect. For years after the prohibition act was passed, the situation seemed hopeless. The sentiment in the state was almost equally divided; officers were elected who, if not pledged to ignore the law, at least made it clear that they would do so. And yet constantly the sentiment grew in favor of enforcement, officials in time became more strict, and ultimately prohibition became a fact; and today the law is rigidly enforced as Governor Brewster is convinced it will in due time, if we will be patient and keep after it, be true of national prohibition. The law has not failed, and he is sure it will not fail. Time is all that is necessary to prove this. We are impatient when an effort or a project or an innovation does not at once succeed.

I am reminded in this connection of my old professor of German. Most of us in his classes had little familiarity with any language excepting our own, and in many cases even English as it should be spoken was something near a foreign tongue. We were getting on very badly with our translations and when it came to pronunciation, the situation was little less than hopeless. But he was a patient old man and an experienced one.

"It will come," he used to say to the stammering, halting farmer boy. "It will come Patience and work will do it. It will come."

The old man's words have given me courage many a time during the years which have intervened since those far-away days. When I have worked at something or with somebody for a long time without seeming to get anywhere, and faith and patience are about gone, I recall the encouraging words of my old teacher, "Keep at it, and it will come."

Habits are not easily changed; custom and tradition have a tremendous hold on us, and when we attempt to change these we must not look for immediate nor for complete success.

It was my job years ago to eliminate hazing from the institution with which I was connected. It had been the custom, for I do not know how many years, to heap upon the poor freshman as soon as he got to the campus all sorts of indignities. There was no malice in it, it was just fun; but the people who needed such treatment usually escaped, and those who were shy and self-conscious and in need of encouragement, and friends were most likely to receive the harshest introduction to college life. The college was being injured very much by the practice, and it was generally agreed that it should be stopped. There were definite rules against it; the difficulty was in enforcing them. It took five years to make any definite impression and ten to wipe out the practice. For a long time it seemed as if no progress were being made at all.

It is so with every reform; but if we keep at the thing with patience and intelligence and persistence, it will come.

(© 1927, Western Newspaper Union.)

News from Europe brings the opinion that another war is not unlikely. Look out for propaganda.

ALL COVET IT—WORKERS MUST HAVE IT
Good Health! Men and women workers must possess it to be acceptable, satisfactory, successful. Kidney ailments and resulting ills are serious disorders, causing loss of health and efficiency, lack of energy and ambition, dull headaches, tired feeling, nervous depression. FOLEY PILLS, a diuretic stimulant for the kidneys, are a reliable, valuable, effective medicine. Men and women everywhere use and recommend them. John Gordon, Danville, Ill., says, "FOLEY PILLS diuretic made it possible for me to work steadily, to sleep better, to become stronger." Hite's Drug Store. adv.

PROBATE ORDER
STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.
At a session of said court, held at the Probate Office in the City of Charlevoix, in said County, on the 12th day of October A. D. 1927.
Present: Servetus A. Correll, Probate Judge.
In the Matter of the Estate of Kate Webster, Deceased.
The above estate having been admitted to probate and James Secord appointed administrator thereof.
It is ordered that four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said court on Tuesday, the 21st day of February A. D. 1928, at ten o'clock in the forenoon, at the Probate office in the City of Charlevoix.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said County.
SERVETUS A. CORRELL,
Judge of Probate.

Community Building

Beauty in Homes and Environment Is Sought

Many students of American life profess to see a marked desire on the part of our citizens for greater beauty in their homes and environment. This urge to be surrounded by beautiful things is not taking the form of theoretical discussions and philosophizing about art, music and landscaping, but is manifesting itself in a practical way.

The American wants a beautiful home, beautiful furniture and furnishings, beautiful gardens and surroundings, and so he is creating them himself or setting up a demand for them which artists and craftsmen are satisfying.

Art has served its full purpose only when the rank and file, the general citizenry, the vast majority of the populace want their environment, the utensils they use in their homes, their streets, business houses and factories created along beautiful lines. The knowledge which a few have of art serves only a limited purpose, while a general and widely spread appreciation of it benefits the whole nation.

One sees the spirit in the care and attention which many hundreds of citizens of Richmond bestow upon their yards. If this were being done by only a few groups, if a beautiful yard outlined with shrubbery and graced with flowers were to be found only here and there, there would be nothing noteworthy about it. There are hundreds and hundreds of back yards with their vista of grass and their borders of shrubs and flowers—a delight to the eye of anyone.—Richmond Palladium.

Coat of Paint Will Add to Resale Value of Home

Even when property has long been neglected, a coat of paint at any time will add to its resale value an amount considerably greater than the cost of application. In fact, it has been estimated that it adds approximately a thousand dollars. In addition to this increase in value as a result of the painting of a specific property, there is a further increase if the entire district conforms to the practice of painting at regular intervals. For such a practice does much toward keeping up the appearance and general desirability of a neighborhood. And this in turn is an important factor in real estate values.

The relative asset of owning a painted and an unpainted house is a point worth considering. Not only is the question important for rentals and resale, but it affects the facility with which it is possible to borrow money. For property in a good state of repair is usually accepted as an indication of an orderly management of affairs on the part of the owner.

Value of Zoning
There is hardly a law or regulation in existence that does not prove at times to be undesirable or "damaging" to somebody. But in all cases the general welfare must take precedence. In the end, all are served alike. If an individual is restricted in one direction he is aided in another. That holds with respect to zoning, as to other necessary regulations. The person who desires to override zoning restrictions in a certain way in order to gain a selfish advantage would be quite ready to object to such a procedure by another that threatened in convenience or actual damage to himself. Zoning is designed not so much to restrict the few as to aid all.—Kansas City Times.

Plan Program First
The preparation of a thoroughly considered program, based on exhaustive study of existing conditions and probable future trends, is a prerequisite of a worth-while city plan. That accomplished and the program adopted, it is vitally important that exceptions to the rules laid down be granted sparingly, short of a conclusive showing that the original requirement was an error. Otherwise, zoning becomes ineffective in practice. This is a danger that needs to be avoided in localities where city planning has been adopted. Rules, frequently broken, become worthless as a guide.

Rural School Studies
A western soil expert contends that the country school ought to be more agricultural-minded than at present, and believes that rural education needs but this one more advance step to make its emancipation complete. It is this gentleman's opinion that the country school should give more attention to common problems in terms of rural life, as city schools are integrated to urban conditions.—Fort Wayne News-Sentinel.

Keep House in Repair
Next in importance to owning your own home is the matter of keeping that home in good repair, so that its value may be maintained as time goes by.

If more home owners could realize the saving that can be effected by making repairs as needed there would be many less unkempt houses and greater home-owning satisfaction as a whole.

LIVE STOCK NEWS

WAY TO PREVENT SWINE PARALYSIS

There is at present considerable interest in the feeding of mineral matter to swine to prevent paralysis in brood sows and fattening hogs. A number of complaints are coming in from breeders regarding sows breaking down in the back after suckling litters. The following quotation from the forty-first annual report of the Ohio experiment station will be of interest to hog men who have had this trouble:

"Lameness, rickets, or partial paralysis is a common trouble with hogs in winter and early spring. This trouble can be prevented by feeding bright, leafy alfalfa, or other legume hay. Brood sows ordinarily consume enough of such hay when it is kept before them in suitable racks. For fattening hogs it may be preferable to include 3 to 5 per cent of ground or chopped alfalfa or other legume hay in their feed mixture. The addition of a mineral mixture containing steamed bone meal, ground limestone, acid phosphate and common salt is likewise conducive to health and thrift. From 2 to 3 per cent of a similar mixture in even a poor ration, has prevented paralysis in our swine under experiment."—Charles I. Bray, Associate Professor, Animal Husbandry, Colorado Agricultural College.

Horns on Cattle Cost Too Much to Breeders

In the fighting days when bulls and cows fought to survive and be fit physically and fight, horns may have been of some use. This was extremely far-fetched when bulls for barbarous bull fights were in demand by men and women who loved bloody thrills. Any careful observer may look at the horned cattle as they come out of stock pens at the stockyards and see 50 to 90 per cent of the cattle injured by horns. All the beef cattle horn marks injure the hides and the meat. Then, horned cattle require more space for shipping. Again, horns injure and often kill cattle, horses, mules and men. The horns when polished and curved and balanced may appear ornamental. The polished head is safe and just as ornamental.

In some places the horned animal is surgically dehorned. The operation causes loss of blood and in fly time the wound or opening in the head may become infested with fly larvae and infected with germs. It costs something to surgically dehorn cattle. Horns on cattle cost too much. They are not worth the price paid for them. They are not required to make beef or milk. The best thing for all breeders and for all breeds of cattle is to breed off the horns. May the time speedily come when there are no more horned cattle.

Lice Easily Controlled by Proper Sanitation

The two most expensive parasites for hogmen to raise are lice and worms. Both can be controlled by proper sanitary methods and simple treatments. Now is the time to control hog lice.

Winter sleeping quarters are the very best places for the propagation and spread of lice. If lousy hogs go into winter quarters and nothing is done to control the parasites, one may be assured that the lice will have a lively time all winter.

The right thing to do is to rid the hogs of lice before real cold weather comes. The sleeping quarters, likewise, should be cleaned thoroughly and new bedding supplied.

Crude oil is one of the best treatments for hog lice. Spent crank case oil is also good. If one has only a few hogs to treat, they may be closely confined and sprayed. If the herd is large, dipping is advised, using a standard creosote dip. Dipping should be done only when the day is warm.

Certain Minerals Help Hog Rations of Grain

Swine rations composed of grains and high protein supplements from plant sources are made more efficient by adding certain minerals. Corn and soy-bean oil meal or soy beans is such a ration.

The Ohio station found that the addition of salt and ground limestone brought about some improvement. A mixture of salt, limestone and 16 per cent acid phosphate brought about greater improvement but not as much as one of salt, limestone and bone meal. A mixture of salt 1 part, ground limestone 2 parts and bone meal 2 parts gave excellent results.

Ground rock phosphate, frequently recommended and used in mineral mixture for hogs, proved detrimental rather than helpful.

Dog Parasite Control

With dogs the problem of parasite control is a serious one with certain complications which have only recently been ascertained. For one thing it is now known that prenatal infection with ascariids may occur and it seems reasonably likely at present that such infection may prove to be of rather common occurrence. To prevent this will involve the treatment of the mother before breeding and the provision of sanitary surroundings in the yards and kennels.

Char. Sports Wraps for Cool Autumn Days

This model is wearing a smart sports wrap of black and white tweed. The detachable military cape is a new note of the season and the black fox collar adds the proper chic.

Supporters of this rag of debate are reminded that October is fleeting and the editor will need to buy coal in quantity soon.

Avoid Excess Uric Acid!

To Be Well There Must Be Proper Kidney Action.

A STIFF, achy feeling is a common sign of sluggish kidneys and excess uric acid. One is apt to be tired and languid; nervous and depressed; suffer nagging backache, headaches and dizziness. A common warning of sluggish kidney action is scanty or burning secretions. Doan's Pills, by stimulating the activity of the kidneys, assist them to eliminate excess uric acid. If your kidneys are acting sluggishly, use Doan's. They have been recommended since 1885. Are endorsed the country over. Ask your neighbor!

Briefs of the Week

Born to Mr. and Mrs. Clarence Healey, a daughter, Oct. 25th.

Mr. and Mrs. Lewis Ellis and children were at Grand Rapids this week.

Regular meeting of Mark Chapter No. 275, O. E. S., Friday night, Nov. 4th.

Stanley Bush is here from Marquette for a visit with friends and relatives.

Jay Walling, who has been spending the summer at St. John, returned to his home here, Monday.

Dr. and Mrs. F. P. Ramsey, Mrs. Rachel Webster, and Howard Cook were Flint visitors this week.

Mr. and Mrs. Gerrit Drogd motored to Ann Arbor, Tuesday, taking their two-months-old daughter there for treatment.

Mrs. N. Alper and daughter, Miss Anna Kling, were guests at the home of Mr. and Mrs. H. Rosenthal over the week end.

Annual Chicken Pie Supper of the Presbyterian Ladies Aid will be held at the church parlors, next Thursday, Nov. 3rd. adv.

Halloween Box Social October 31, 1927 at the Pleasant Hill School, Echo no. 6. A good program furnished. Everyone welcomed.

Mr. and Mrs. Benjamin Sharp of Flint were guests at the home of the latter's brother, Walter Davis, and family latter part of last week.

Mr. and Mrs. Wm. McPherson returned to East Jordan first of the week from Muskegon where they have been spending this past year.

Mr. and Mrs. Andrew Berg and daughter, Miss Anna, left Wednesday for Petoskey, where they will make their future home at 420 Emmet St.

Rev. and Mrs. V. J. Hufton are at Belaire this Friday attending a Convention of Grand Traverse Dist., Women's Foreign Missionary Society.

Miss Elhageen-French is here from Miami, Florida, for a visit at the home of Mr. and Mrs. R. C. Supernaw and renewing former acquaintances.

Mr. and Mrs. E. F. Thatcher, of the Peninsula Fox Farm at Traverse City, were guests at the home of Mr. and Mrs. W. M. Pickel Thursday of last week.

Mrs. R. T. Mc Donald returned home last Thursday from a visit with her daughter, Miss Marie, who is teaching in the public schools at Owosso.

Notice to Sunset Hill Lot Owners: To the members who own lots at the cemetery and have not paid for care of same, please remit.—Alveretta Roy, Com'r. adv. 43-2

Mrs. A. E. Wells and son Billy, Mrs. Jos. Junget and son Junior and Donald Jones—all of Detroit—are week-end guests at the home of Mr. and Mrs. L. A. Hoyt.

Miss Grace Sommerville—a returned Missionary from China, will give a talk at the Church of God next Sunday during the Sunday School hour, which starts at 10:00 A. M. standard.

About twenty neighbors and other friends tendered Mrs. Andrew Berg a farewell party at her home last Monday evening. Mrs. Berg was presented with some gifts of remembrance.

Tuesday November first is the date when Dr. Leahy the Optometrist will be at Hotel Russell. Headache and all other symptoms of eyestrain corrected. Glasses guaranteed to fit. adv.

At the home of the brides parents, Mr. and Mrs. Wm. Capelin, in this city, their daughter, Miss Alvira, was united in marriage to Wilbur Buchin, Thursday evening, Oct. 20th. Elder Charles H. McKinnon performed the services.

Mr. and Mrs. Roy E. Webster and daughter, Miss Evelyn, were at Big Rapids and Mt. Pleasant latter part of last week, returning home Monday. They attended the home coming celebration at Mt. Pleasant. Carleton Bowen accompanied them from East Jordan to the latter place, going from there to Ludington to attend the Teachers Convention.

Miss Genora Frederickson and Lester Dalton, both of this city, were united in marriage at Charlevoix, last Saturday evening, Oct. 22nd. A wedding supper was served to 35 guests at the home of the bride's parents, Mr. and Mrs. W. A. Frederickson. The young couple received many useful gifts. They went to Antrim, Mich., to make their home.

The Foreign Missionary Society of the M. E. Church met with Mrs. Jas. Hignite, Wednesday, and elected the following officers:—President, Mrs. B. E. Waterman; 1st Vice Pres., Mrs. Clark Barrie; 2nd Vice Pres., Mrs. Bert Fuller; Secretary, Mrs. Earl Clark; Treasurer, Mrs. Roy Webster; Cor. Sec'y, Mrs. Maddock; Mite-box Sec'y, Mrs. V. J. Hufton.

Our extra slice of pie for this week is given to the man who always plays safe on all public questions, usually relying on the old adage, there are two sides to every question.

Lansing—The State Administrative Board has approved the continuation of the services of Dr. R. E. Palmer as the state physician at Beaver Island at a salary of \$3,500 a year. Dr. Guy L. Kiefer, commissioner of the state department of health, had recommended the discontinuance of employment of a physician for the island at state expense. A number of residents of the island entered a protest.

Springport—Fire recently swept over three farms north of Springport, destroying all the buildings and a considerable amount of grain and livestock. The flames were discovered first on the farm of William Caldwell, and from there they spread to farms owned by William Burgess and James Briggs. The loss is estimated at \$17,000. Albion and Springport fire departments responded, but the fire had gained too great headway.

Mt. Clemens—State approval of a \$100,000 bridge across the Clinton river at Jefferson avenue has been announced by county highway officials following a conference with the state administrative board. Approval of plans by the war department and by the county board of supervisors is now sought pending construction of the span which will relieve Gratiot avenue of Detroit-Port Huron traffic and complete the link in a scenic lake shore drive.

Mt. Clemens—Consideration of a new \$750,000 Macomb county court house 10 stories high, was announced here following the appointment of a building committee by the board of supervisors. A special one mill tax was levied at the fall election a year ago to provide funds over a five year period for the erection of the new county building. The property on which the court house now stands was deeded to the county by Christian Clemens, founder of this city, 118 years ago.

Detroit—Airplane passenger service between Detroit and Cleveland will be inaugurated Nov. 1 by the Stout Air Services, Inc., according to an announcement made by N. W. Ayer & Son, advertising agents handling the Ford Motor Co. account. The equipment of the new line will consist of Ford tri-motored metal monoplanes, according to the announcement. Each plane will have a carrying capacity of 10 passengers with baggage, and a cruising speed of 100 miles an hour. It was stated.

SAT IN A DRAFT—THEN SUFFERED.

It's never safe to sit where a draft of air strikes the kidneys. Painful congestion, severe back-ache, and a disturbed urinal flow are usual results. Mrs. C. L. B., Petersburg, Va., says, "I was so stiff and sore I could not stoop over nor rise up without great pain. Now, since taking FOLEY PILLS diuretic, I have none." A reliable valuable medicine, constantly in use over 25 years. Take them whenever irritations of the kidneys and bladder, and an irregular urinal flow cause distress and discomfort. Satisfaction guaranteed. Hite's Drug Store. adv.

Deafness Not Lasting
Airplane deafness is only a transient disability lasting at most a few hours. It is caused largely by the crack of the exhaust. The main remedies are technical, such as the use of silencers, while the aviator may use some form of ear-stopper, either a simple plug of oiled cotton or mechanical stoppers attached to his cap or helmet.

DIPPING INTO SCIENCE

This Bird Spears Fish
An interesting bird is the "larler." He is a marvel of nature, as he tucks his food in the streams. He watches from a tree for his prey and, using his closed bill as a sword, dives into the water, spears the fish and, coming to the top, disposes of it loose to catch in his mouth.

Kit Guard

Kit Guard, the featured "movie" player, was born in Denmark. He had been a sailor, a blacksmith, a life insurance agent, a professional pugilist, a plumber's assistant and a legitimate actor before joining the silent drama. His latest picture is "The Wicker-cracker," but he has been seen to good advantage in numerous others.

For Meditation
By LEONARD A. BARRETT

TOO COSTLY A PRICE

THE asbestos curtain was unknown or at least unused until after a disastrous fire in a Chicago theater. It cost the price of many lives before stage managers were compelled by law to protect the public. An old man with a red lantern is charged with the responsibility of signaling automobiles of the approach of a fat train. The lantern may go out or the light not be distinguished from other lights on moving automobiles, with the result that lives are sacrificed at road crossings. After the price of a loss of life shall have been paid a superstructure is erected and the train passes over on elevated tracks. An engineer falls asleep at the throttle. The train is wrecked, lives are lost. After the catastrophe a law is enacted which forbids an engineer to work more than eight successive hours without sleep.

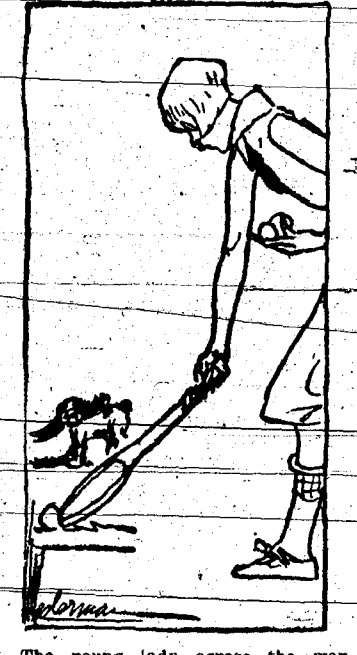

The Shenandoah was sent to her doom at a tremendous cost of human life. The commanding officer feared the danger and, according to reports, argued against the trip. He was ordered from his superior officers who were not conversant with the details of piloting a dirigible. When the Los Angeles was sent out on her initial voyage, the instructions given to those in charge of the ship read as follows: "The choice of routes and decisions as to start, continuation and termination of the flight rests with the commanding officer." The Los Angeles came back safely. But, the freedom granted to the commanding officer was made possible only through the sacrifice of fourteen lives, sent to their doom through the wreck of the Shenandoah.

There is nothing so precious in the world as a human life. The safeguarding of life should be the first consideration on the part of any corporation or institution. The sacrifice of human life is too costly a price to pay for our knowledge and experience, especially when it is needlessly sacrificed.

Why must so heavy a price in the toll of human life be paid before the public can have the protection it deserves?

AFTON
Edited by Mrs. Henry Timmer.

Wm. Malpass was calling in Afton, Monday afternoon.

About twenty people gathered at the home of Mr. and Mrs. Herbert Holland, on Saturday evening, to celebrate the thirteenth anniversary of their wedding.

Mr. Bert Lumley of Deer Lake, and Miss Helen Hardy were quietly married at the Presbyterian Manse, at Boyne City, Saturday. The wedding supper was at the home of the bride's parents, Mr. and Mrs. Matthew Hardy. All that night, and all of Sunday, the bridal pair was hunted by enthusiastic friends, who failed to find them, until Sunday night at 11:30 they were discovered at the home of Mr. and Mrs. Chas. Shepard, and were charivari by thirty-five automobiles full of their friends, until the echoes rang. The couple are among the most popular young people of this community, and will make their home at the Lumley farm at Deer Lake.

Afton Grange held election of officers Saturday night, and re-elected the same officers of last year.

Mr. and Mrs. Terry Barber were dinner guests Sunday at Mr. and Mrs. Albert Todd's.

Chas. Shepard and wife were callers in the Bohemian Settlement Sunday afternoon.

A series of meetings are being held this week by the Rev. Hall at the Deer Lake Grange Hall.

Mr. and Mrs. Wm. Vondran and two children were callers at the Schrader farm Sunday.

Mr. and Mrs. Joseph Sutton and granddaughter, Christabel had dinner Sunday at the home of their nephew, Charles Healey of Eveline township.

Mrs. A. E. Bulger of Deer Lake spent the afternoon with Mrs. Elmer Hayner, Monday.

Mr. and Mrs. Ernest Dean of Detroit were here for a short stay with Mr. and Mrs. R. E. Pearsall, returning Monday.

Afton school is holding their box social Friday evening of this week, at the Afton Grange Hall. Everyone is cordially invited to come and make this a success for the children. There will be dancing.

Mrs. Chas. Hott is helping her daughter, Mrs. Claude Shepard, clean and get their new home in Chaddock district ready for occupancy.

B. C. Mellencamp, accompanied by Miss Fetherly and Mr. Kanton, called at Afton school for the purpose of organizing a handicraft club for the boys, and a sewing club for the girls.

Miss Glennie Vondran and Mrs. Wm. Tate went to look for beaver dams, Sunday, but failed to find them as they are hidden deep in the swamp.

Frank Schultz has almost completed his threshing around Afton and the German settlement.

Mrs. Luther Brintnall called Thursday on Mrs. Henry Timmer at Silver Leaf Farm.

Mr. and Mrs. Holmes of East Jordan, who have just returned from a grape-picking trip to Spring Lake, visited her parents, Mr. and Mrs. R. E. Pearsall.

A motor party from East Jordan, drove out to Afton Monday night, and inaugurated the hunting season, at midnight. They failed to report any success, in taming Afton pheasants or rabbits.

PENINSULA
(Edited by Mrs. E. Hayden)

The East Jordan oil and gas truck did quite a business on the Peninsula, last Thursday.

A. Reich of Lone Ash farm, who is employed at the Chemical plant in East Jordan, is having a ten-days leave of absence to help with the farm work.

Richard Russell of Ridgeway farm is through working on the golf links where he has been employed since spring.

Mrs. Charles Kennedy of Hayden Park returned home Saturday afternoon after spending a week at Gibbs where Mr. Kennedy is employed in a cedar camp.

The Mountain school is having a box social at the school house Oct. 28. All are invited.

Guy Hitchcock of East Jordan, who has been employed in Lansing for some months, visited his cousin, Mrs. F. K. Hayden at Orchard Hill, Monday night.

Highway Com'r Wm. Looze has a crew of men and teams working on the road at George Staley's farm and other places.

Mr. Marvin, the Rawleigh man of East Jordan, made his regular round here Monday.

George Papineau of Boyne City spent the week-end with his son-in-law and daughter, Mr. and Mrs. Orval Bennett, at Honey Slope farm. Mrs. Papineau had been there all week caring for the little new granddaughter, who arrived Oct. 14th.

Silo-filling is completed. Bean harvesting is about finished and everyone is hustling out the potatoes, which are a very light crop.

Would you really believe it? We haven't had any rain since Oct. 14th.

Mrs. F. K. Hayden and daughter, Arlene, of Orchard Hill, returned

home Friday evening after spending the week in East Jordan.

John Looze took Miss Gertrude Looze and Mrs. Fred Looze to North Manitou Island, where Fred Looze is employed on trial at the Coast Guards.

Mrs. Will Looze is still at the hospital in Petoskey where she went Oct. 17th with her son, Charles, who is very ill from hemorrhages of nose caused by quinsy. Charles is better but not yet able to come home.

Mrs. Fred Croll and daughter, Eva, and her brother, Walter Staley, of Dave Staley Hill, and Mrs. Joe Perry of Advance, motored to Battle Creek, Wednesday, to visit another brother, Herahel Staley, who is ill in the Veteran's hospital there. They returned Saturday.

Quite a crowd from the Peninsula gave a Charivari and shower to Mr. and Mrs. Ed. Sweet at the home of Mr. and Mrs. Harlow Sweet in Advance. They had a very jolly time. The young people received some very nice presents. A pot luck supper was served.

Joel Bennett of Honey Slope farm is able to be around again after being confined to the house for a week with a lame back.

PLEASANT HILL
(Edited by Anson Hayward)

Farmers are busy digging potatoes and also pulling beans. Potatoes are not turning out very good, but are a good sample.

Trashing machine has been in the neighborhood.

A. Rukle has moved back to town again to be nearer his work.

Will Gaunt's folks were dinner guests at the A. Rukle home Sunday the 16.

Ernest Lanaway has gone to the upper Peninsula to seek employment.

Doris Bennett visited Miss Wilma Schroeder when up from Detroit and made other calls.

School vacation at Bennetts the past two weeks. Monday the 24 they will resume their work again.

Bennetts S. School was quite well attended Sunday, 23. Mr. and Mrs. Geo. Weaver and his partner worker called on the S. School and gave good address in regard to S. School work.

Mrs. Geo. Kenny and daughter Mae were dinner guests at the Rev. H. Van Deventer home, Sunday the 23, from there going to pleasant Valley School House in the evening.

Missionary worker from South Africa will be at Pleasant Valley School House on the evening of Nov. 1. I will give some good talk and work on S. Africa.

Rev. H. Van Deventer has his barn all enclosed now. He has been working with his truck drawing gravel the past week for Com'r Batterbee.

Rev. H. Van Deventer and family called on his sister and family, Mr. and Mrs. Wash Scott at Petoskey, October 16.

The sweet young things of East Jordan known how to treat the males but very often some stingy male doesn't know how to treat them.

Valuable Compound

Water glass is derived from silica, mixed soda and powdered coal heated together in a crucible. The molten mass is powdered when cold and extracted with water, followed by evaporation of the water. It is used in making fireproofing fabrics, cements, paints, filling for soap, dyeing and bleaching, preservatives for eggs, abrasives, etc.

Tides Travel Far

The ocean tide may be felt in the Mississippi river as far up as Red River landing, 307 miles above the mouth; in the Delaware river as far up as Trenton, N. J., 181.5 miles above the mouth, and in the Hudson as far up as Troy dam, 153 miles above the mouth.

Catastrophe Prevented
