

Charlevoix County Herald.

VOLUME 32

EAST JORDAN, MICHIGAN, FRIDAY, MARCH 9, 1928.

NUMBER 10

E. J. Surprises Basketball Fans

BY WINNING FROM HARBOR AND MANCELONA. E. J. WON SECOND-PLACE CUP.

On account of losing the game to Harbor Springs twenty-three to ten a week before and by losing another game by one basket earlier in the year, most sport-writers counted East Jordan out of the running, but not so with the local boys, coach, and many fans. East Jordan was aware that she had been in a slump because of too heavy a schedule for a light team. The East Jordan fans and team went to Boyne City to do just what they did—knock off the best team in the North, as far as the regular schedule was concerned. They did it in spite of the fact that one or two of their men had not been well. It was a real surprise to Harbor Springs and to some sport-writers in northern Michigan who incidentally mentioned that East Jordan would be at the tournament. They were there alright as shown by the results of the games and the fine playing of the East Jordan high school band. A total of nearly five hundred fans attended the tournament at Boyne City for the three evenings.

There has always been the very best athletic relations between Harbor Springs and East Jordan and we know that this is still true as far as school authorities are concerned, but a large crowd of Harbor Springs fans proved to be very poor losers and at the last game against Charlevoix they yelled in mass to have Charlevoix stall the last few minutes in order to make sure of their game against East Jordan, but Charlevoix's team proved to be altogether too good a bunch of sportsmen to do any such thing, and East Jordan would like to congratulate the Charlevoix boys for their fine, clean sportsmanship.

Incidentally East Jordan feels that Boyne City handled the tournament in the best shape of any Class C and D tournament thus far. Boyne City fans and Superintendent Fuehrer showed East Jordan every consideration, which they appreciated. Supt. Fuehrer and his assistants are to be congratulated on the fine manner in which the tournament was handled.

The local team congratulated itself on the fact that it drew Harbor for the first game for they felt that this was the quickest way to eliminate them from the tournament. Contrary to the general impression, created by losing two games to Harbor, East Jordan considered that when they were in condition they could beat Harbor on a large floor. The game with Harbor was a beautiful exhibition of Basketball. Quoting from the Petoskey Evening News: "Reversing the score in which the decision in their first of three meetings this year went to Harbor, the crack East Jordan high school class C basketball team sprung the big surprise of the Boyne City district tournament last night." It was mentioned in some papers that Harbor missed many foul shots; East Jordan missed just as many in proportion. This is easily accounted for by the fact that the teams were playing to the limit of their ability and were not steady enough to shoot fouls. To quote again: "Better on Long Ones." "East Jordan flashed the best team-work, getting more field baskets, four of the seven being long shots. East Jordan walked away with a five to two lead in the first quarter only to see Harbor slip in ahead at the half, nine to six. Peculiar parts of the count was that East Jordan was held to a single point in the second quarter, and Harbor to one point in the third quarter. The count in the last quarter was East Jordan 12, Harbor 10. Each team scored two field goals in the last quarter, Harbor also getting a free one.

One point behind with 15 seconds to go Captain Taylor of East Jordan sank one from almost half the length of the court. East Jordan's fine high school band and a large crowd of East Jordan rooters were on hand to help their team. Harbor Springs also was represented by a large cheering section.

Just 20 seconds before Taylor threw the sensational basket that won the game, St. Charles sank one from well down the floor to put us in the running; East Jordan scoring four points in the last forty seconds of playing. Every member of the East Jordan team played a cracker-jack of a game. Shepard and Barnett were hitting their regular stride which is good enough. Weaver, Taylor and St. Charles all played excellent basketball, as well as the substitutes—Bill Halstad and Cliff Dennis.

LINE-UP
East Jordan Harbor Springs
Shepard, r. f. McBride, r. f.
Taylor, l. f. Winegarden, l. f.
St. Charles, c. Grimes, c.

REARING POND ON DEER CREEK

District Game Warden, Ed Deuel, of Boyne City has announced the State Department of Conservation will not plant brook trout fry in the streams of this region this Spring other than enough to relieve the present congestion in fish hatcheries. A system of rearing ponds has been substituted for the old method and there the fry will be kept until it reaches fingerling size.

Rearing ponds have been arranged for Charlevoix County at the Advance mill pond, near Boyne City, and at Deer Creek, near the outlet of Jordan River. The new plan, it is expected, will mean the saving of thousands of brook trout that otherwise would perish due to rearing waters after the spring overflow period.

Johnson—1

The game on Friday night with the strong Mancelona team was not expected to be an easy game by East Jordan but many fans from other towns thought it would be a walk-away, but East Jordan has been fooled too many times by Mancelona to take any chances. Playing a very hard game Thursday night made it easily possible to lose to Mancelona the next. East Jordan's team slowed up and had a hard time winning from Mancelona. It looked all the while as though the locals were the strongest team and perhaps got two shots to one at the basket but simply could not put them through the ring. This was true the night before—East Jordan had two shots to Harbor's one and had the ball perhaps two-thirds of the time.

To quote the Petoskey Evening News, who had a regular reporter at the game—"East Jordan Wins Another." "East Jordan won another bang up, flashing finish game, defeating Mancelona 16 to 14. It was East Jordan's second win of the tournament. With ten seconds to go East Jordan had the ball out of bounds with St. Charles getting the pass. He sank the shot from about twenty-five feet down the court.

The Mancelona team got away to a 5 to 1 lead in the first quarter. By the half East Jordan had cut the lead to 11 to 9 with Mancelona ahead. Mancelona failed to find the hoop in the third quarter with East Jordan doing some very good guarding. East Jordan sank two to tie the count 11 to 11 to start the last period.

In the last period the Mancelona center, Captain Lossler, scored a field goal and a foul. For East Jordan, St. Charles sank a basket and Barnett sank two fouls and Shepard one foul. East Jordan used the same lineup which won from Harbor Springs 16 to 15 the night previous.

Mancelona Line-up:
Smith, r. f.
Cohran, l. f.
Lossler, c.
Brown, r. g.
Nessitt, l. g.
Makell went in for Smith, and Dollzell went in for Cohran, Stratteger went in for Brown in an effort to gain speed.

Charlevoix Wins Tournament
Many East Jordan fans knew that their boys, after two grueling games, were up against the real thing in their third game against Charlevoix. They had spent too much human energy in the first two games to expect to win against a very good basketball team and only lost the game by a single point—the score ending 25 to 24 in favor of Charlevoix. Boudin proved to be half the Charlevoix team by dropping them in from all corners of the floor. Novak at forward also starred. The Charlevoix-East Jordan game proved to be another sensational affair. When a team goes out on a basketball court in the kind of competition encountered in this day, and plays three sensational games in succession it is a real basketball team and deserves the support of every fan in East Jordan and a great deal of credit is due Coach Lee for the fine team work and aggressive playing of the local boys. It is also a credit to East Jordan to have the wonderful spirit displayed of never-say-die fighting scheme as has never been seen in a tournament in years.

Many comments were made on this fact and whether East Jordan wins the tournament at Petoskey or not, they are to be congratulated on the fine crowds of fans and on the band they sent to Boyne City. Unfortunately in drawing such a heavy schedule in the Boyne tournament, they were just as fortunate in the Petoskey tournament—drawing a lighter schedule in the Petoskey tournament. They drew a bye for Thursday night

so that they need not play until Friday night and then against the winner of the Custer-Grayling game.

Charlevoix battles it out with Rogers City and St. Francis of Traverse City draws a bye and has to play one of the two latter teams. This will give Charlevoix a little taste of what East Jordan went through in the Boyne Tournament. East Jordan has every chance to capture the laurels at Petoskey. The Band expects to go and it is hoped that many fans will follow.

East Jordan High School Band at Tournament.

A large share of the pep that was instilled in the Basketball team was due to the snappy music played by the East Jordan High School Band which was present every night at the games. A great deal of spirit and enthusiasm was aroused as the band played the different selections between halves and also between the games.

The members of the Band were taken over to Boyne City by business men, which has been highly appreciated by the student body.

The life and the pep with which they played seemed to thrill the audience and teams alike and has been a good spirit, as well as an advertisement for our city.

NO CITY PRIMARY WILL BE HELD THIS YEAR.

The time for filing petitions for offices in the City of East Jordan expired last Monday. Only two candidates for any one office having filed petitions, there will be no Primary Election, the Candidates going before the electorate at the regular Spring election, April 2nd.

Candidates filing petitions are as follows:

For Mayor—Hugh W. Dicken.
—Wm. H. Malpass.
FOR ALDERMEN
First Ward—James Gidley.
Second Ward—S. C. Sedgman.
Third Ward—James Ross, J. W. LaLonde.

SOUTH ARM PRIMARY THIS SATURDAY

The annual primary election for South Arm Township will be held this Saturday, March 10th. The only office contested for is that of Highway Commissioner. Following are those whose names appear on the ballot:

Supervisor—Charles P. Murphy.
Clerk—William G. Murphy.
Treasurer—Peter Umlor.
Highway Commissioner—Irving Crawford, Elmer Jensen, Wm. G. Murray.
Justice of Peace—James Nice.
Member Board of Review—Robert A. Gunsolus.

IN MEMORIAM—LAURA KNOP

In loving memory of our dear wife and mother, who left us just two years ago today—March 10th, 1926. No one knows how much we miss you; Friends may think the wound is healed; But they little know the heart aches That lie within our hearts concealed.
CHARLES F. KNOP and Family.

Once in a while you meet a man who has no use for his fellow men, and his fellow men h. n. u. f. h. Our idea of a joke on justice is the fact that Mr. Sinclair got six months for contempt of court and only three months for contempt of the country.

Reforestation In Michigan

NEW NATIONAL FOREST AREAS IN MICHIGAN.

Stimulated timber production through the determination of the best principles of forest management in the region and demonstration of their application to specific areas of land in Federal ownership will be the principal objective of the Forest Service, United States Department of Agriculture, in undertaking the administration of the two new areas just approved for purchase by the Government in the Upper Peninsula of Michigan.

The National Forest Reservation Commission on Feb'y 18 approved the establishment of the two new purchase units, under the provisions of Section 6 of the Clarke-McNary law, with a view to the ultimate acquisition of all lands within the area which are suitable for national forest purposes. One of these is the Marquette area, situated in Chippewa County, about 30 miles west of Sault Ste. Marie. The other is known as the Mackinac area, about ten miles south of Munising, in Delta, Schoolcraft and Alger Counties, Michigan.

In the Marquette Unit, the purchase of 250,000 acres is contemplated. This area surrounds the Marquette District of the present Michigan National Forest, and its acquisition will shape this into a more practicable administrative unit. The area is drained by the Pine River, flowing into Lake Huron, and the Park and Waishka Rivers which flow into St. Marys River, connecting Lake Superior and Lake Huron. St. Marys River is heavily used for navigation, all of the boat traffic from and to Lake Superior using it.

Not more than two per cent of the entire Marquette area is suitable for agricultural use. Farming has been negligible and the population has been decreasing. The greater part of the proposed national forest unit will be practically deserted when current logging operations are completed, and many owners have been permitting their lands to revert to the State for non-payment of taxes. The highest economic value of this land is for growing timber crops, and it is the plan of the Forest Service to reforest the area and maintain it on a continuous timber production basis. Roughly, 79 per cent of the area has been repeatedly burned and will require replanting. Fifteen per cent has been burned or cut over, but is restocking to trees naturally. Fire protection and planting, according to the Government foresters, are the major requirements to reclaim the area.

All of the area but a narrow belt in the northern and western portions originally supported a heavy stand of Norway pine. On the north and west portions were fine stands of hardwoods, the removal of which is now in progress. The major portion of the area has been repeatedly burned and there now exist only occasional blocks of Jack pine reproduction and poles.

In the Mackinac unit the purchase of 150,000 acres is proposed. The region is drained by the Sturgeon, Whitefish and Westfork of the Manistique Rivers, and the contemplated reforestation of the area is expected to influence favorably potential power development. Less than three per cent of the area is or has been in cultivation or within fenced pastures. The farming population of the region has been decreasing along with the depletion of the timber supply. Logging and fire have largely depleted the timber on the Mackinac

COLLEGE TO STUDY VALUES OF LUMBER

East Lansing, Feb'y 28.—Utilization of the knowledge gained by Michigan farmers in the uses and durability of native lumber is planned by the agricultural engineering and forestry departments at Michigan State College.

Farmers are asked to send in samples of wood which has been in use in construction and which has given evidence of exceptional durability. A sample of the wood an inch in thickness and depth and six inches in length is sufficiently large to make identification possible.

The pieces of wood should be sent to the forestry department at East Lansing, and a brief history of the location, age, and place in construction should accompany each sample. It is known that many woods are satisfactory for certain purposes, but there is no definite data on the comparative merits of different timbers when used in construction. The knowledge gained from the samples submitted will be made available for all Michigan farmers.

Samples are wanted of all kinds of woods from both interior and exterior construction work. Any farmer who has knowledge of timber that has withstood the attacks of time exceptionally well can assist materially in this work by sending a sample piece to the M. S. C. department.

The area did support some excellent young growth but much of it was destroyed by severe fires two years ago, consequently extensive replanting will be necessary. In the small stands yet to be cut attempts will be made to have operators leave the lands in such condition that a new timber crop will be assured. The possibilities of forest regeneration on the area are considered excellent. Planting, fire protection, and careful forest management will be the principal requirements.

While the volume of timber these areas ultimately will produce will be important, their major value will lie in the opportunity they will afford for forest research and experimentation and for large-scale, practical demonstrations of the best methods of forest management within the regions of which they are parts. It is believed that by far the greater part of the land in the upper peninsula of Michigan has a higher economic value for timber production than for any other purpose, but before its forest value can be fully realized the best forest practices must be determined and demonstrated so that private owners may manage their properties with assurance and certainty. Thru the acquisition of these areas the Federal Government will be in a position to participate in the pioneer work of forest restoration in many ways that will be of value to all owners of forest lands to whom the results secured on the national forests will be available.

The following Directors were elected:—Mrs. Ruth A. Colden, Clarion; James Gallagher, St. James; Mrs. Florence Pearson, Boyne Falls; Chas. T. McCutcheon, Boyne City; Mary Ruegsegger, Boyne City; Nellie N. Harris, Boyne City; Howard Porter, East Jordan; Mrs. Mattie Palmer, East Jordan; Dr. Hugh Dicken, East Jordan; Albert F. Bridge, Charlevoix; Alonzo Powers, Charlevoix; Mrs. Ada Beeman, Charlevoix.

Immediately following, a Directors' meeting was held, and the following officers were elected for the ensuing year:—

Chairman, Howard Porter, East Jordan.
Vice-Chairman, Ada Beeman, Charlevoix.
Secretary, Lillie Malone, Boyne City.
Treasurer, A. F. Bridge, Charlevoix.

Moved and supported that the matter of relief of Ex-service families be decided by the Directors. There being no further business, movement was made to adjourn.

Mrs. E. A. Ruegsegger, Sec'y
Mrs. J. M. Harris, Chairman.

EDWARD LARSON PASSES AWAY

Edward Larson passed away at his farm home near East Jordan in South Arm Township, Thursday, March 1st, 1928, following an illness of some duration from heart trouble and diabetes.

Mr. Larson was born in Norway, August 6th, 1871, his parents being Mr. and Mrs. Lewis Larson. When about 14 years of age he came to this country with his mother, and family, locating at Suttons Bay, Mich. He came to East Jordan some 30 years ago, and has followed the farming occupation for the past 15 years. On July 4th, 1915, he was united in marriage to Augusta Johnson at Frankfort. Deceased is survived by the wife and one son—Ralph. Also by one sister, Mrs. Ole Johnson of Suttons Bay, and three brothers, Fred Larson of East Jordan, Severt Larson of Royal Oak, Mich., and Ole Johnson of Elberta, Mich.

Funeral services were held from the Norwegian Lutheran Church in East Jordan, Saturday afternoon, March 3rd, conducted by Rev. Johnson of Frankfort. Interment at Sunset Hill.

The lady who carries her style usually has a husband who carries a purse.

The average sweet young thing understands the average young man a lot better than the average young man thinks she does.

Charlevoix Co. Red Cross

REPORT OF ANNUAL MEETING HELD IN JANUARY.

The annual meeting of the Charlevoix County Chapter, A. R. C., was held Jan'y 13, 1928, at Charlevoix, in the office of the Charlevoix County Bank.

The minutes of the 1920 annual meeting, the August 21, 1923, and the June 15, 1926, special meetings were read and accepted.

The report of the Treasurer, A. F. Bridge, for 1926 and 1927 was read and accepted, which was as follows: RECEIPTS:

Feb. 24, 1927, Bal. on hand \$ 266.07
May 16, 1927, Contributions, (Flood Sufferers) 333.87
Dec. 3, 1927, Norwood Twp., (Flood Sufferers) 50.00
Red Cross Membership Drive, 1927:—Charlevoix \$149.00
Boyne City 45.00
East Jordan 79.00

273.00

Contributions, 1927:—
Charlevoix \$ 27.14
East Jordan 9.00

36.14

Total Receipts \$ 959.08

DISBURSEMENTS:

May 28, 1927, Check to Flood Sufferers \$ 317.87
Dec. 24, 1927, Boyne City, (order) 9.00
Jan. 13, 1928, Check to American Red Cross Treas. 136.50

Total Disbursements \$ 463.37

Balance on hand, Charlevoix County Bank, Jan. 13, 1928 495.71

Total \$ 959.08

In addition to this, Boyne City sent direct to Flood Relief Fund, \$307.78, and \$10.00 to Florida Hurricane Fund; East Jordan sent direct to Flood Relief, \$786.53; Walloon Lake sent to Florida Hurricane Fund, \$271.43.

The following Directors were elected:—Mrs. Ruth A. Colden, Clarion; James Gallagher, St. James; Mrs. Florence Pearson, Boyne Falls; Chas. T. McCutcheon, Boyne City; Mary Ruegsegger, Boyne City; Nellie N. Harris, Boyne City; Howard Porter, East Jordan; Mrs. Mattie Palmer, East Jordan; Dr. Hugh Dicken, East Jordan; Albert F. Bridge, Charlevoix; Alonzo Powers, Charlevoix; Mrs. Ada Beeman, Charlevoix.

Immediately following, a Directors' meeting was held, and the following officers were elected for the ensuing year:—

Chairman, Howard Porter, East Jordan.
Vice-Chairman, Ada Beeman, Charlevoix.
Secretary, Lillie Malone, Boyne City.
Treasurer, A. F. Bridge, Charlevoix.

Moved and supported that the matter of relief of Ex-service families be decided by the Directors. There being no further business, movement was made to adjourn.

Mrs. E. A. Ruegsegger, Sec'y
Mrs. J. M. Harris, Chairman.

Junior Play "Kempy"

WILL BE GIVEN AT H. S. AUDITORIUM, WEDNESDAY, MAR. 28.

The annual Junior Play, "Kempy" is to be given Wednesday, March 28, at the High School Auditorium. The play is making rapid progress and promises to furnish a real evening of entertainment.

The cast was chosen after try outs were held for each part. Mr. Rogers and the following cast are hard at work on the play.

"Dad" Bence—A. Retired Harness Manufacturer—Karl Rosenthal.
"Ma" Bence, his wife—Irene Wright.
Jane Wade—Their Eldest Daughter—Minnie Webster.
Ben Wade, her husband—Frank P. Severance.
Kate Bence—Second Daughter of the Family—Marian Sedgman.
Ruth Bence—The Youngest Daughter—Roberta Schroeder.
Kemp James—Healthy, good looking boy of 20—Robert Pray.
"Duke" Merrill—Distinctive looking business man of 40—Roderick Muma.

CARD OF THANKS

We wish to express our sincere appreciation of the many acts of kindness extended by friends and neighbors during the illness and at the death of our husband and father, Edward Larson.
MRS. EDWARD LARSON and Son

Things That Can't Be Explained

Charlevoix County Herald
G. A. LISK, Publisher.
Subscription Rate—\$1.50 per year.
Entered at the Postoffice at East Jordan, Michigan, as second class mail matter.

AFTON

Edited by Mrs. Henry Timmer.

Miss Sidney Lumley was given a surprise party on the evening of her birthday, March 6th.

Mrs. Terry Barber is quite ill with bronchitis.

Mr. and Mrs. J. L. Sutton were at Albert Nowland's Friday for dinner. Ruby Hardy was unable to return to school, Sunday, on account of the deep snow.

Percy Batterbee who has gone to Detroit to obtain employment, stopped at Afton school to tender farewells, Tuesday.

Quite a furor was created Sunday night about midnight when the call went forth for Aftonians to help locate two East Jordan school teachers, who were thought to be lost in the snow storm.

Visitors at Silver Leaf Farm the past week include Mr. and Mrs. H. C. McKinnon, Ernest Sandie, George Kaake, Russell Barnette.

Clarence McGeorge's little boy is almost well from his bronchial-pneumonia attack.

Mr. and Mrs. Roy Hammond were callers at R. E. Pearsall's.

Herman Goodman was a caller at Chas. Parks, Friday of last week.

Chas. Parks is cutting wood for Claude Pearsall.

Snow is so deep from Todd's corners south, A. K. Hill has been unable to get a team through to deliver the mail in that section.

Eddie Woods has returned from Spring Lake, and he, together with his sister, Leda, and mother, Mrs. R. H. Holmes have taken up residence on the West Side of East Jordan.

EVELINE

(Edited by Miss Hazel Harnden)

The roads were so bad Monday, the Mail Carrier did not get through, the recent bad storms filled them up. We surely need the work of a snow plow out here.

Mr. and Mrs. Spidel arrived in East Jordan last week Tuesday from Grand Rapids, but could not bring their car home from there. They were met by Mrs. Harnden and made the rest of the distance with the team. They haven't been able to get their car home yet. Mrs. Joe Whitfield did not return with Mr. and Mrs. Spidel, she is helping to care for her brother who is seriously ill at Jackson.

The Walker school will have an old-fashioned spelling bee, Thursday of this week, with a pot luck dinner.

Mr. Griffin made the trip to East Jordan Monday with his daughter, Norma, and Bud Thomas, so they could attend high school.

CENTRAL LAKE

(Edited by Jesse Morse)

Roads are full of snow again. Roads to Charlevoix were good last Saturday.

Postmen were down Saturday putting up new signs.

Some cases of mumps have developed in the past few weeks.

Ivan Hill and wife were in from Atwood for the week end. They teach at Atwood.

Miss Thelma Snyder who is teaching the Creswell school, visited Saturday and Sunday with her parents.

Rev. W. P. Mosher of Bellaire returned home last week. He filled the pulpit at the M. E. Church here as the pastor was ill.

Mrs. Lashbrook, Miss McDonald, and Coach Jessup have resigned positions in the school here. Mrs. Lashbrook will attend Central State Teachers' College at Mt. Pleasant.

Lee O'Dell who has been working in Camp near Mancelona was home for a few days and attended caucus in town Saturday.

Albert Dawson who has been working in the Flint Buick factory for 12 years, has lost his position, and many others are in the same condition.

Rev. E. S. Carroll reports a good meeting at the S. S. Convention last week and announces a big meeting for March 12th, to which everyone is invited. He has sent S. S. members copies of the County S. S. publication.

About 60 people gathered at the Town Hall Saturday afternoon for the citizen's caucus. Things were rushed through in a hurry by A. Snitler, Chairman. The meeting lasting only forty-five minutes.

Albert Snitler was elected Chairman; J. W. Morse, Clerk; and Clare Savage and Orville Thompson, Tellers. The following who are about the same as last year were nominated: Supervisor, Moses King; Clerk, Everett Vanderberg; Treasurer, Duncan Crawford; Justices, Wm. Greenman, C. N. Bailey and Clare Savage.

Ever Hear of Air Fishing?

An air-fishing tribe of Igorotes recently was discovered north of Manila by a hiking detachment of United States marines. They fly queer-looking kites, with baited hooks at the end of the tails, every evening about dusk. They fish for bats in the air.

Iron Mountain—Miss Frances Campbell of Toledo, O., teacher in the public school here, is totally blinded from striking her head against the top of the automobile in which she was riding recently when the car struck a rut.

Brighton—Brighton schools have been ordered closed indefinitely, as the result of an outbreak of scarlet fever among pupils. Children also have been warned against attending public gatherings until the quarantine is removed.

Ironwood—A yearling buck staggering on the roadside with both its front legs broken was shot by Charles A. Noren, Iron County clerk, and put out of misery. It is believed that the deer was struck by an automobile during the night.

Alma—Several flocks of yellow grosbeaks, whose habitat is north-west of the Rocky Mountains and in Canada, are being observed in Alma. The rare birds are making themselves at home in the community, and are being fed by residents.

Lansing—Sturgis is to have a nine-man council and the present city commission of five must be abolished, the State Supreme Court ruled recently. The decision removes the necessity for an election on the recall of the five members of the present commission and the court therefore dismissed mandamus proceedings started for the purpose.

Grand Rapids—A new air transportation company to offer air taxi, photography and student aviation to Grand Rapids is planned by a group of business men here it was announced recently. The company probably will be known as the Grand Rapids Air Service Co., and will be capitalized at \$50,000. It is understood that the stock has been placed.

Detroit—Knocked from his position atop the 40-story steel structure of the Penobscot building by a swinging beam, Veno LaCroix, 31 years old, of Ecorse, a structural iron worker, narrowly escaped death. His fall was halted by a wooden platform at the thirty-seventh floor level. After his three-story drop, LaCroix was taken to Receiving hospital, where he was treated for minor bruises.

Lansing—Figures from the first of the year, which do not include all of February, show that 832,418 automobiles have been licensed and weight tax fees totaling \$12,807,788 have been collected, as compared with 1,156,340 registrations and a yield of \$16,886,986 for all of 1927, according to a report by the Department of State. This indicates a marked advance in receipts for the current year, it was estimated.

Midland—The beaver will be returned to this section of Michigan, if the work of the Midland chapter of the Izaak Walton League proves effective. Volunteer Waltonites with pick and shovel restored the old beaver dams on the Sanford reserve by plugging an old drain which at present carries the water from the marsh. With the drain plugged, the marsh will provide an excellent home for beaver and muskrat.

Lawrence—Woodrow Renning, 8-year-old son of Mr. and Mrs. Henry Renning, and Garfield Barker, also 8 years old, son of Mr. and Mrs. Clara Barker, were drowned in the mill pond here when the ice broke under them as they were sliding on a sled. A human chain headed by Deputy Sheriff George Brown rescued Hans Wincher, who saw the lads break through and was immersed himself when he attempted a rescue.

Luther—After almost two months of unconsciousness following an automobile accident near Grand Rapids January 2, in which she suffered a fractured skull, Miss Fannie Fairbanks, 29, is thought to be on her way to recovery. Miss Fairbanks has spoken her first intelligent word and is gradually recovering her faculties and her complete recovery now seems assured. She is the daughter of Dr. and Mrs. Earl Fairbanks, pioneer residents of this vicinity.

East Lansing—On petition of 15 Michigan State college co-eds, a new course in auto mechanics will be offered during the spring term by the engineering department, according to announcement here. The course will carry two credits and will be open only to the 15 co-eds who asked that it be established. Enrollment is already closed. They requested the course, it is stated because they want to be independent enough to drive a car without having to call on outside aid.

Olivet—Parsons Hall, a dormitory of Olivet College, was destroyed by fire here with a loss estimated at \$125,000. The building was insured for \$25,000. The fire started in the attic. Plans are being made to replace the dormitory from the proceeds of the \$1,000,000 endowment fund drive now being made, according to Frank Green, one of the college trustees. The dormitory housed 65 students, who will be accommodated in fraternity houses and private homes for the rest of the school year.

Reading—The death of Uriah O. Fitzsimmons, 90 years old, at his son's home here, following a stroke of paralysis, separates Michigan's oldest twins, believed to have been the oldest twins in the country. His brother, Luther, lives here. The twins were born on a farm within 100 rods of the house where Uriah Fitzsimmons died and they always have lived in this community. Records show only three births in Hillsdale County preceding those of the Fitzsimmons twins.

Heavy Oat Yield Costs Few Cents

At Least Five Additional Bushels to Acre May Be Had by Testing Seed.

Two and a half cents' worth of formaldehyde may add at least five additional bushels to the acre oat yields on many farms.

This is the average cost of treating for smut enough seed oats to sow an acre. This disease causes a large annual damage to the crops, taking a toll on some farms of as much as 10 out of every 100 bushels of grain, according to R. E. Vaughan, plant disease specialist at the Wisconsin College of Agriculture.

Treat Barley for Smut. Barley may also be treated with formaldehyde for smut. A pint or pound of the formaldehyde, obtainable at most drug stores, is added to 35 gallons of water. This solution may be sprinkled on the seed or the seed may be soaked in it for five minutes. Both methods give satisfactory results, Vaughan reports.

When preparing the seed for treatment, it should be thoroughly fanned in order to remove the light-blighted kernels, smut spores and dirt. After treating, the grain should be covered for two hours and then dried by spreading in on a clean strip of canvas. While the seed is damp, Vaughan cautions that care should be taken that it does not freeze nor heat, as either one of these conditions injure its germination power.

Seed Ready to Sow. The seed is ready to sow in 12 to 24 hours after treatment. If freshly treated seed is sown, Vaughan says the seeder should be opened so that three-fourths bushel more oats and one-half bushel more barley are sown to an acre than usual, this due to the fact that the seed has swollen during the treating process.

Feed Fowls Yellow Corn for Production of Eggs

Yellow corn is proving superior to white corn in rations for egg production. It is also much better for growing chicks. The beneficial effects of yellow corn are thought to be due to the fact that it is richer than white corn in vitamin A, a substance essential for normal growth of chickens.

When the hen's ration is deficient in vitamin A she is likely to develop eye trouble similar to roup, and lay fewer eggs which would hatch poorly if incubated.

If white corn is fed, the vitamin A deficiency may be corrected in a ration for hens by feeding green feed at the rate of one cubic inch per hen per day. Baby chicks cannot eat enough green feed to completely correct the vitamin A deficiency if white corn is fed. The deficiency can be supplied to chicks by adding cod-liver oil to the mash at the rate of 2 per cent by weight.

Narrow Type of Shed Is Useful for Implements

At this time of year every farm machine or piece of equipment needed should be under shelter with a card showing what adjustments and repairs are needed. Even a well-ruined straw shed is better than none, but often a shed does not give full protection.

Consider annual cost over a period of years rather than first cost, and use the materials of hand which will give the longest life and least upkeep at the lowest first cost. Reinforced concrete, concrete blocks, hollow clay tile, galvanized iron, lumber, and so on, should all be considered.

The long narrow type of shed is most usable and convenient about moving machines in and out. Square sheds waste space, especially if a driveway must be kept open. Round sheds are even less desirable. Long narrow sheds can be started small and added to as needed.

Agricultural Squibs

Clean the grain before you use it for seed.

The cardinal principle in the dairyman's creed is cleanliness.

The farm workshop should be the popular place to work these days.

Winter egg production is often cut short by a limited supply of water.

To insure a good flow of milk, a cow should be in good condition at freshening.

Tremendous losses are incurred by planting poor seed. Test before seeding is the best rule to follow.

Winter onions come up just after the snow disappears and perhaps are the first vegetable that will come from the garden.

Milk which is not immediately removed from the barn is very apt to absorb the characteristic odors, no matter how sanitary the barn may be.

Potatoes which are stored in bins should be watched for rot. It pays to examine the stored tubers from time to time and remove all rotten potatoes.

News of the Churches

Presbyterian Church

C. W. Sidebotham, Pastor.
C. R. Harper, Foreign Pastor.
"A Church for Folks."

Sunday, March 11, 1928.

8:00 p. m.—General Service.
8:00 p. m., Friday night—Prayer Meeting.

The public is cordially invited to attend these services.

Homespun Frock

The modern homespun frock we are showing, worn by Marceline Day, as the heroine of "The Big City," is a far cry from the old-fashioned homespun our grandmothers wore. It has a three-tiered skirt edged in dark brown with collar and cuffs of white linen edged with brown.

Council Proceedings

Regular meeting of the Common Council of the City of East Jordan, held at the council rooms, Monday evening, March 5, 1928.

Meeting was called to order by the Mayor pro tem. Present: Mayor pro tem. Gidley, and Aldermen Ross, Taylor, Watson, Sedgman and Williams. Absent: Mayor Dicken. Minutes of the last meeting were read and approved.

Election boards were appointed by the Mayor pro tem as follows:—FIRST WARD—H. A. Goodman, Thomas Whiteford, D. J. Whiteford, Archie Kowalske and Theo Scott.

SECOND WARD—Nellie Blair, Iva Montroy, Marvel Barnette, Lela Bishaw and Ida Bashaw.

THIRD WARD—Richard Lewis, C. H. Whittington, Louis Trojansk, Janet Séverance and Retta LaLonde.

Moved by Alderman Sedgman, supported by Alderman Williams, that the appointments be confirmed. Motion carried by an aye and nay vote as follows:

Ayes—Ross, Taylor, Watson, Sedgman, Williams and Gidley.
Nays—None.

The matter of the rate of wages that should be paid for common labor was taken up, and after much discussion, it was moved by Alderman Taylor, that the rate be fixed at \$3.50 per day. Motion carried by an aye and nay vote as follows:

Ayes—Ross, Taylor, Watson, Sedgman, Williams and Gidley.
Nays—None.

Bills were presented for payment as follows:—

Mich. Bell Tel. Co., rentals and toll	\$ 3.70
Jerry Treas., paym't of labor	47.25
City Deshane, draying	.50
Bert Reinhart, labor	1.00
John Cook, salary	125.00
John Ter Wee, salary	50.00
John Whiteford, digging graves	12.00
R. G. Watson, mdse	12.45
Grace E. Boswell, sal. and postage	63.60
State Bank of E. J., ins. on fire truck	142.92
Hite Drug Co., express charges	1.17
Elec. Light Co., lighting streets	535.00
Elec. Light Co., pumping	145.45
Goodman & Bohn, mdse	5.66
Wolverine Sign Co., adv. sign	30.00
Healey Tire & Vulc. Co., chains for fire truck	14.25
East Jordan Lbr. Co., mdse	3.48
Chas. F. Strehl, gas and oil	6.07
G. A. Lisk, printing	44.15
Frank F. Bird, recording deed	1.00
Boyer Fire Apparatus Co., mdse	35.50
Bi-Lateral Hose Co., fire hose	600.00
B. L. Severance, mdse	6.81
Otis J. Smith, sal. & postage	36.70

On motion by Alderman Watson, the bills were allowed by an aye and nay vote as follows:—

Ayes—Ross, Taylor, Sedgman, Watson, Williams and Gidley.
Nays—None.

On motion by Alderman Ross, meeting was adjourned.

OTIS J. SMITH, City Clerk.

Buying Dairy Cows

When buying cows at a closing out sale of a man who has been in a Test association, one gets a chance at cows that have records. The better cows are mostly worth the money they bring, especially if they have not had the best of care. If one buys such a cow that has the earmarks of a dairy cow and has a fair record with ordinary care, and takes her home and feeds her and makes her comfortable one may venture to say the cow will do her part.

Sand Is Essential

Sand is essential for hens to supply grit, but not for dusting material. Even fine sand would not be dusty enough to do any good from the standpoint of a dust bath. Hens dust themselves in order to keep lice under control and their feathers in good condition. The fine dust gets into the breathing pores of the lice, thereby exterminating them. Supply the hens with a good quality dust and then give them sharp sand so that they can pick up the grit.

Peoples' Wants

MUNNIMAKERS
Notices of Lost, Wanted, For Sale, For Rent, etc., in this Column is 25 cents for one insertion for 25 words or less. Initials count as one word and compound words count as two words. Above this number of words a charge of one cent a word will be made for the first insertion and one-half cent for subsequent insertions, with a minimum charge of 15 cents. These rates are for cash only. Ten cents extra per insertion if charged.

**CITY OF EAST JORDAN
REGISTRATION NOTICE.**

For all Elections held April 2, 1928.

To the Qualified Electors of the City of East Jordan, State of Michigan.

Notice is hereby given that in conformity with the "Michigan Election Law," I, the undersigned City Clerk, will, upon any day except Sunday and a legal holiday, the day of any regular or special election or primary election, receive for registration the name of any legal voter in said City not already registered who may APPLY TO ME PERSONALLY for such registration. Provided, however, that I can receive no names for registration during the time intervening between the Second Saturday before any regular, special, or official primary election and the day of such election.

The last day for General Registration does not apply to persons who vote under the Absent Voters' Law. (See Registration by Affidavit.)

MARCH 24, 1928—LAST DAY

for General Registration by personal application for said election.

Notice is hereby given that I will be at my Office under Postoffice on—

MAR. 10 and MAR. 17, 1928.

From 8 o'clock a. m. until 8 o'clock p. m., on each said day for the purpose of REVIEWING the REGISTRATION and REGISTERING such of the qualified electors in said CITY as SHALL PROPERLY apply therefor.

The name of no person but an ACTUAL RESIDENT of the precinct at the time of registration, and entitled under the constitution, if remaining such resident, to vote at the next election shall be entered in the registration book.

REGISTRATION BY AFFIDAVIT

Sec. 10—Registering of Electors: Regular Session of 1925—Any absent voter, as defined in this act, whose name is not registered and who shall claim the right to vote by absent voter's ballot at any election or primary election, may at the time of making application for absent voter's ballot, present to the City Clerk an affidavit for registration which shall be in substantially the following form:

**AFFIDAVIT FOR REGISTRATION
STATE OF MICHIGAN,**

County of _____ ss.

I, _____ being duly sworn,

depose and say that I am a citizen and duly qualified elector of the _____

Ward of the City of _____ in the County of _____ and State of Michigan; that my postoffice address is No. _____ street, or R. F. D. No. _____ P. O. _____; that I am not now registered as an elector therein and that I am voting by absent voter's ballot at the election (or primary election) to be held upon the _____ day of _____, 192____, the application for which ballot accompanies this application; that I make this affidavit for the purpose of procuring my registration as an elector in accordance with the statute that I make the following statements in compliance with the Michigan Election Law: Age _____; Race _____; Birthplace _____; Date of naturalization _____; I further swear or affirm that the answers given to the above questions concerning my qualifications as an elector are true and correct to the best of my knowledge and belief.

Taken, subscribed and sworn to before me this _____ day of _____, 192____.

Signed _____

Notary Public in and for said County, State of Michigan.

My Commission expires _____ 192____.

Note—If this acknowledgement is taken outside of the State; the Certificate of the Court that the person making the acknowledgement is a citizen must be attached.

REGISTRATION OF ABSENTEE BY OATH.

If any person whose name is not registered shall offer and claim the right to vote at any election, or primary election, and shall UNDER OATH, state that he or she is a resident of such precinct and has resided in the WARD TWENTY DAYS next preceding such election, designating particularly the place of his or her residence and that he or she possesses the other qualifications of an elector under the constitution; and that, owing to the sickness or bodily infirmity of himself or herself, or some member of his or her family or owing to his or her absence from the City on public business or his or her own business, and without intent to avoid or delay his or her registration, he or she was unable to make application for registration on the last day provided by law for the registering of electors preceding such election, then the name of such person shall be registered, and he or she shall then be permitted to vote at such election. If such applicant shall in said matter, willfully make any false statement, he or she shall be deemed guilty of perjury, and upon conviction, be subjected to the pains and penalties thereof.

Provided, That any city may provide by its charter or by resolution approved by a majority of the members of its legislative body for the registration of such sick and absent voters on the last Saturday preceding any election or primary election at the places of voting in the several voting districts of such city, instead

of an election or primary election day.

PROVISION IN CASE OF REMOVAL TO ANOTHER PRECINCT.

Any registered and qualified voter who has MOVED from ONE ELECTION PRECINCT of a Ward to another election precinct of the same Ward shall have the right, on any day previous to election day, on application to the City Clerk, to have his or her name transferred from the registration book of the precinct from which he or she HAS REMOVED to the registration book of the precinct in which he or she THEN RESIDES. Such elector shall have the right to have such transfer made ON ELECTION DAY, or Primary election day, by obtaining from the board of inspectors of election of the precinct from which he or she HAS MOVED a CERTIFICATE OF TRANSFER, and presenting the said certificate to the BOARD OF ELECTION INSPECTORS OF THE PRECINCT IN WHICH HE OR SHE THEN RESIDES.

Dated February 20, A. D. 1928.

OTIS J. SMITH, City Clerk.

**GREATNESS AND
SLANDER**

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

ONE of the most interesting situations in biographical literature within recent years is the tendency of the biographer to unearth incidents of a disreputable character about the men whose greatness in history we have been accustomed to revere. It had its beginning in England first as I recall, but soon spread to our American heroes.

Washington, who since we first heard of him has been held up to every school boy as a model of propriety and veracity, has been shown by his recent biographer to have had all sorts of vulgarities and dissipated habits. Franklin and Lincoln and Webster and a host of others less noted, perhaps, have been featured as far from the perfect men that we were wont in our childhood to think them. We measure buildings by the shadows they cast and great men by the slanderous things said about them. An Asiatic proverb tells us. If you want to find out whether or not you amount to anything, run for a political office or try out for the presidency of the Daughters of the American Revolution.

Even good men who are great as well are not exempt from the attacks of those who would like to blacken their character and ruin their reputation. I am old enough to remember distinctly the great scandal which connected itself a half century or more ago with Henry Ward Beecher, one of the greatest preachers which this country has ever had. Even in those days when yellow journalism was not so widespread and murder and immorality were not broadcast under such heavy headlines, the newspapers were full of the vulgar details of the stories which in the end only went to show what a great man Mr. Beecher was. If he had been otherwise less fussy would have been made over his lack of discretion if it really was as much as that.

Jordan decided last spring that he would come out as a candidate for one of the undergraduate offices. This did not signify greatness on his part, but simply a desire to become great. He had been rather insignificant before, quiet, modest, unobtrusive—a boy about whom no one had much of any thing to say.

But the situation changed when he put himself forward for recognition and dared to aspire to a position of prominence. They began to say things about him, to dig up his past and to feature his mistakes and his irregularities. What they didn't know they made up until, if one believed half he had heard, Jordan was one of the most disreputable members of our community. He came to me almost in tears.

"What would you advise me to do?" he asked. "Should I withdraw?"

"By no means," I said. "The more evil they say about you, the more they fear your power. Just so it isn't true you are all right."

I was right; Jordan was elected. Whoever is not talked about is likely to be commonplace; it is inevitable that envy or fear should cause the great to be maligning.

(© 1928, Western Newspaper Union.)

STOPS COUGH QUICKLY—HEALING, DEMULCENT.

"I was bothered with a hard persistent cough, but found no other remedy so good and so quickly relieving as Foley's Honey and Tar Compound," says E. Bogges, Pomona, Calif. Coughs and throat irritations, hard bronchial coughs, lingering "flu" coughs, almost instantly stopped. It combines the curative influence of pure pine tar and the mollifying demulcent action of fresh clear honey with other healing ingredients. A boon to those who suffer from troublesome night coughs. Ask for Foley's Honey and Tar Compound.—Hite's Drug Store. adv.

Puzzles are interesting until solved.

You can go to the end of the world and you will wish you were back in East Jordan.

**Farm Products
Sold by Grades**

**Notable Progress Was First
Achieved During Recent
Depression.**

(Prepared by the United States Department of Agriculture.)

Although preliminary work in the development of national standards for farm products has been under way for many years, notable progress was first achieved during the recent period of agricultural depression when every function of the marketing machine was tested with a view to the possible elimination of waste. The value of standards and the probability of profit from grading have been widely discussed by many groups. In this connection, says Lloyd S. Tenny, chief of the bureau of agricultural economics, "whether or not the producer or marketer is paid for the additional effort and expense involved in making such classifications depends upon his subsequent marketing practice. For example, a country merchant seldom establishes price differentials for different grades when buying from producers in very small lots. On the contrary, a large assembler of eggs might find it practically impossible to engage in business through regular trade channels without conforming to recognized grading practices. As a general statement it may be said that the smaller the volume of business the less likely it is that grading to generally recognized standards will pay. In large-scale operation, however, standardization is now universally recognized as a basic requirement for success."

Standards Formulated.

Among the farm products for which standards have been formulated by the United States Department of Agriculture are cotton, dairy and poultry products, grains (corn, wheat, oats, rye, sorghums, barley, and rice), nine kinds of hay and related products, live stock and meats, tobacco, wool, and fruits, vegetables, and related products, including apples, artichokes, asparagus, beans, beets, cabbage, cantaloupes, carrots, cauliflower, celery, cherries, citrus fruit, green corn, cucumbers, dewberries and blackberries, eggplant, grapes, honey, lettuce, onion, peaches, peanuts, pears, peas, peppers, pineapples, plums and prunes, potatoes, sweet potatoes, radishes, shallots, spinach, strawberries, tomatoes, turnips and water melons.

Containers Standardized.

Several of the styles of containers for fruits and vegetables have also been standardized. In several of these classifications more than one set of standards have been prepared, depending on the use of the product, as for table use or canning, or by origin or variety.

Before recommending standards every effort is made to make them practical and acceptable to the established trade.

**Common Smut of Corn Is
Most Familiar Disease**

Common smut of corn is one of the most familiar, and widespread of all plant diseases. It undoubtedly is the most destructive disease of the corn crop that is now known. If we take into account the whole wide range of its occurrence, smut attacks only the parts of the plant that are above the ground. It lives through the winter in soil, in manure, and in other decaying organic material such as compost, and spreads by means of spores (virtually its seeds) which drift through the air. The spores lodge on the corn plant and enter its tissues through wounds or bruised places. They germinate and grow rapidly and soon form on the surfaces of the plant the lustrous lead-colored bottle which darkens and swells until they burst and let loose the black smut spores that carry over the disease in the soil for another year. If the smut bolls form in the ear, the ear is ruined. If they form on another part of the plant, the whole plant is weakened and the yield is reduced though the ear may not be directly injured.

Agricultural Squibs

A wise farmer knows by records what his crops cost.

A hobsled is a handy winter tool for odd jobs around the farm.

Start keeping farm records this winter when work is slack. You may be too busy to start next spring.

Close confinement reduces the resistance to disease, results in heavy mortality, poor egg production, and small profits.

The farm wagon is the most used piece of farm equipment. When its length of life is considered it is one of the cheapest.

Unless feeding begins soon after the silo is filled, considerable silage will spoil at the top from being exposed to the air.

Be fair to the young alfalfa. Don't pasture or graze the fields the first year. Give them a chance to grow a cover for a "hard winter."

The best and tidest way to keep leaves while they are rotting down is leaf-mold is to dig a pit for them in some odd corner of the garden.

**Battle on Live
Stock Parasites**

**Losses Have Been Tolerated
Too Long and Accepted
Too Complacently.**

(Prepared by the United States Department of Agriculture.)

Parasites injure live stock on the farms and ranches of the United States probably to the extent of hundreds of millions of dollars annually. This is the conclusion reached by Dr. John R. Mohler, chief of the bureau of animal industry, United States Department of Agriculture, after reviewing the evidence collected by his bureau. "The inroads of parasites, especially the internal kinds," he says, "constitute a live stock problem of great importance. Losses from parasites have been tolerated too long and accepted too complacently. The live stock industry cannot afford to let this situation continue, especially when certain parasites are exacting more and more tribute—more and more blood money."

Parasites Spreading.

As important pests Doctor Mohler mentions the nodular worms attacking sheep, which have been so troublesome in the South and now are spreading to the Middle West; the liver fluke in the Rocky mountain states and on the Pacific coast; the kidney worms so widespread in hogs; stomach worms in sheep; roundworms, tapeworms, and lung worms, and the better known, because more obvious, ticks, lice, and mites. The only way in which these parasitic losses can be stopped, Doctor Mohler believes, is through thorough and painstaking research work to reveal the life histories of the parasites and discover the points at which they can be attacked most successfully. This research should then be followed by campaigns of education among live stock growers for practical application.

As an example of the enormous reproductive capacity of some of the parasites, Doctor Mohler says that a female roundworm in the intestines of a hog may produce more than 25,000,000 eggs.

Injure by Sucking Blood.

These parasites do injury, as is commonly supposed, by sucking blood and by inflicting pain and irritation which interfere with the animal's rest and feed. But the injury does not cease with this. Some parasites produce poisons. Others make openings in the flesh and tissue which allow bacteria to enter. At times the accumulation of parasites in the body may be so great as to prevent the lungs, the kidneys, or the alimentary canal from functioning as they should.

That the parasites are causing concern to stockmen is indicated by the number of inquiries received by the Department of Agriculture. The experts of the department have devised an excellent system of sanitation for control of roundworms in swine, and Doctor Mohler says "we are planning to augment the present force of workers and to provide means and facilities for more research with the hope of finding better methods for checking the inroads of the more serious parasites for which present control methods are not fully effective."

**Grading and Sorting of
Eggs Need Attention**

With more attention paid to the sorting and grading of eggs so that they may command top market prices it is also necessary to pay more attention to keeping the eggs clean. Anyone experienced in marketing first-class eggs knows that a dirty egg must not be washed with water, as this dissolves the gelatinous substance in the shell, thus allowing air to reach the egg, and preventing it from keeping as well as it should. Of course, clean straw on the floor and nests is essential in keeping the eggs clean. An abundance of nests is also necessary and during the seasons when the fowls are producing heavily the eggs should be gathered more than once a day. Although a nest may have a dozen clean eggs in it, the bird laying the thirteenth egg may soil the entire number.

Short Farm Notes

Prudent farmers grow their own feed.

Cross-fencing a pasture will allow the acreage to provide better feed and thus carry more animals.

Long winter evenings will not seem as long or gloomy if a farm lighting plant dispels the early falling darkness.

In the absence of live stock the legumes and commercial fertilizers are indispensable in keeping up soil fertility.

Sweet clover, resistant red clover and alfalfa are great soil builders. On almost all soils these crops must have lime.

Potatoes stored in bins should be watched for rot. It pays to examine stored tubers from time to time and remove rotten ones.

A ton of manure is worth more by far on poor soil than rich soil. On individual fields the value of a ton of manure varied from 90 cents to \$6.88.

**MICHIGAN BELL
TELEPHONE CO.**

Long Distance Rates are Surprisingly Low
... For Instance

for \$1.00

Or Less, After 8:30 P. M.,

You can call the following points and talk for THREE MINUTES at the rates shown. Rates to other points are proportionately low.

FROM EAST JORDAN TO:	Night Station-to-Station Rate
AKRON, OHIO	\$.90
CLEVELAND, OHIO	.85
DAYTON, OHIO	.95
CHICAGO, ILLINOIS	.75
COLUMBUS, OHIO	1.00
INDIANAPOLIS, IND.	1.00
MILWAUKEE, WIS.	.60
TOLEDO, OHIO	.70
YPSILANTI, MICH.	.65
DETROIT, MICH.	.65
EVANSTON, ILL.	.70
MINNEAPOLIS, MINN.	1.00
OAK PARK, ILL.	.75

The rates quoted above are Station-to-Station night rates, effective from 8:30 p. m. to 4:30 a. m. A Station-to-Station call is one that is made to a certain telephone, rather than to some person in particular. If you do not know the number of the distant telephone, give the operator the name and address and specify that you will talk with "anyone" who answers at the called telephone. Day rates, 4:30 a. m. to 7 p. m., and evening rates, 7 p. m. to 8:30 p. m., are higher than night rates. A Person-to-Person call, because more work is involved, costs more than a Station-to-Station call. The rate on a Person-to-Person call is the same at all hours.

Additional rate information can be secured by calling the Long Distance operator

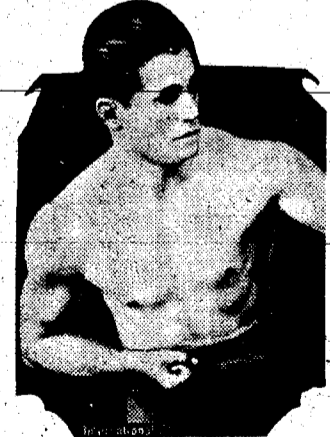

**Never a car
so Beautiful...
and Never a car so Good**

Today's Buick brings to its owners a higher degree of beauty than any other car in the Buick field has ever offered. Accompanying this beauty—and giving it real meaning—is the superlative goodness and reliability of Buick engineering. See Buick—drive it—compare it with others—and you'll agree there was never a car so beautiful and never a car so good!

SEDANS \$1195 to \$1995 COUPES \$1195 to \$1850
SPORT MODELS \$1195 to \$1525
All prices f.o.b. Flint, Mich., government tax to be added. The G.M.A.C. finance plan, the most desirable, is available.

Another Firpo Coming

The photograph shows Juan Firpo, brother of the one-time hard-hitting Luis Angel Firpo who is now grown so corpulent that he apparently cannot stage a comeback. The "Wild Bull of the Pampas" is grooming his younger brother for an appearance in the United States. Juan is a middle-weight.

**SULPHUR SOOTHES
UGLY, ITCHING SKIN**

The First Application Makes Skin Cool and Comfortable

If you are suffering from eczema or some other torturing, embarrassing skin trouble you may quickly be rid of it by using Mentho-Sulphur, declares a noted skin specialist.

This sulphur preparation, because of its germ destroying properties, seldom fails to quickly subdue itching, even of fiery eczema. The first application makes the skin cool and comfortable. Rash and blotches are healed right up. Rowies Mentho-Sulphur is perfectly harmless. You can obtain a small jar from any good druggist.

Few small newspapers get the advertising patronage they deserve because few small town merchants think they can get the business they deserve.

A GOOD THING TO KNOW—REMEMBER IT.
Mrs. Mary B. (name furnished) San Francisco, Calif., says that "Foley Pills diuretic very quickly stopped a bad pain in my back, and where I used to be awake at night with rheumatic pains, I now sleep in comfort, and enjoy a good night's rest." No one should suffer backache, rheumatic pains, sleep disturbing kidney and bladder ailments, when Foley Pills diuretic may be so easily had and at so small a cost.—Hite's Drug Store. adv.

JUST HUMANS
By GERE CARE

THE MOST POPULAR KID IN THE NEIGHBORHOOD. HIS DAD RUNS "FIRE ENGINE NUMBER NINE."

Mother's Cook Book

"To watch the corn grow, or the blossoms set; to draw hard breath over the plowshare, or spade; to read, to think, to love, to pray—these are the things that make men happy."

SALADS, SALAD MAKING

SALAD time is from January to December, any time is salad time. The important thing to remember is that in salads are almost always the foods we need most. Green vegetables, fruits and succulent vegetables such as celery, cucumber, cabbage and green pepper, with the crisp and tender lettuce.
A crisp and delicate dish of salad will often cause the meal of heartier food to be well digested; without it, these foods could cause distress.
If one does one's own marketing, it is a delightful way to get an early morning walk and choose your own salads.
Certain green vegetables, too small or unattractive as to shape and size, though perfectly wholesome, may be used for salads, as they are to be cut into pieces.
Small-sized fruits which may have discolored skins, lowering the price, can be purchased for various salads and desserts. The quality is just as good and quite a saving on the food bills can be made in this way. This is true of celery, lettuce and many vegetables and fruits.
A handful of nuts, too few to serve as a whole, a bit of cheese too small to serve to guests, may be utilized in a salad and make a most gratifying dish. When there is too much acid in the blood, such fruits as produce an alkaline reaction should be served. Oranges and grapefruit are among these.

Cardinal Salad.

Dissolve a package of lemon jello in one and one-half cupsful of boiling water, add one-half cupful of the canned juice of beets. When cool add one cupful celery shredded, one cupful of diced cooked beets, one-half cupful of Spanish onion chopped fine and one green pepper finely shredded. Add one teaspoonful of salt and pour into molds to harden. Serve on lettuce, unrolled, with a mayonnaise dressing.

Uncommon Sense

By John Blake

SECOND WIND

THERE is nothing easier than convincing yourself that you have worked so long your brain has begun to fog.

Then you postpone the job till another day, and must spend perhaps an hour getting back to the mental state in which you left it off.

And the chances are then you will never get exactly back into the same swing you had when you quit.

Quitting a thing when it is half finished is, of course, due to the natural laziness in all of us, and which is the hardest thing we have to overcome.

... ..

We can all work twice as hard, mentally, as most of us do.

Only a terrific and overpowering interest in what we are doing will keep us at a task till our minds are so wide awake that they can bring all their powers to bear on it.

Men who do big things keep at them and at them—and they find that they can often get a second mental wind, which will make continuing as easy or easier than the work was before.

When James Russell Lowell wrote "The Vision of Sir Launfal" he shut himself up in a room and stayed there for two days till the job was done. And he was not exhausted when he got through.

The chances are that if he had tried to write the poem by fits and starts he could never have got it done.

... ..

If you were shut into a room, and knew that the only way you could ever reach sunlight and food again was to find a secret passage out, you would find the secret passage.

The passage to many sorts of success are secret, and have to be hunted out by the reason.

The fact that men accomplish great things proves that it can be done.

There are differences in minds, of course, but the commonplace mind, by grim determination, will often accomplish more than the brilliant one which is always ready to take a rest.

Just to "keep plugging" will not accomplish much. But to keep plugging with all the power of the mind will, and must, accomplish a great deal.

SAWS
By Viola Brothers Shore

FOR THE GOOSE—
WHEN a man's in love with one member of a family, he generally trusts everybody in it. When a woman's in love with one member of a family, she generally distrusts everybody in it.

The woman ain't livin' that would rather be loved well than wisely.

The satisfaction ain't in bein' beautiful, but havin' people recognize you are.

FOR THE GANDER—
Every man is a fool in some other man's opinion. And a wonder in some women's.

If a woman tells you a story with out names and the women in the story don't shine, it ain't her own.
You hate to buy hair tonic from a bald barber.

It's The Money You Spend Wisely That Counts

Someone has said that a rich man has more fun keeping a budget than a man of moderate means. Because the money he saves is tangible, he can see it and invest it, and put it to work. Be that as it may, a budget is an invaluable help to anyone.

A budget helps you to keep the right proportions between expenses, prevents you from spending more than is best for food and rent, or crimping more than you should on entertainment and luxury. But a budget is not a reason for getting cheap things, things in which you forfeit quality by attempting to save on price. A budget says to you: "Here is the amount of money you should spend for this. Spend all of it, but don't spend more." And it is up to you to get the best that can be got for that amount.

The person who spends his money wisely, who likes to get the utmost for it, always finds out from advertisements how he can spend it to the best advantage.

It is surprising how much more wisely you can buy if you make it a habit to read advertising. A little more value here... a little better workmanship there... in this thing slightly more durability... that product perhaps a bit finer. And every cent of your money you spend for advertised merchandise will bring you greater comfort, higher quality of goods, and a standard of excellence that is nationally recognized.

It Certainly Pays To Read The Advertisements

PROBATE ORDER
STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.
At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 29th day of February A. D. 1928.
Present: Hon. Servetus A. Correll, Judge of Probate.
In the Matter of the Estate of Charles A. Vallee, Deceased.
Robert A. Campbell having filed in said court his final administration account, and his petition praying for the allowance thereof and for the assignment and distribution of the residue of said estate.
It is Ordered, That the 23rd day of March A. D. 1928, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for examining—and allowing said account and hearing said petition;
It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said county.
SERVETUS A. CORRELL,
Judge of Probate.

Preceded the Umbrella
Before the umbrella came there was what was known as the quitsool—a parasol of oiled muslin, whose material was imported from India via England. The quitsool was a feminine monopoly. The man wore a "roque-laire," or cape of oiled muslin. The first umbrella was fashioned of this material and had ribs of rattan.

First Real Fire Engine
The first successful fire engine was built by Moses Latta of Cincinnati.

GOING UP
"Yes, having been born here, I thought I would come back and spend my old age among you. How much for this land?"
"One dollar a front foot."
"You could have bought it for \$10 an acre when I was a boy. How much for acreage?"
"One thousand plunks."
"How dear are the scenes of my childhood," sighed the city man as he turned away.

Who's Gertie?
Just about the time of the recent broadcast version of "Faust," a man told this story against himself:
He was one of a party just returned from Germany. At dinner he remarked to his wife: "I went to Gertie's home on the Sunday."
And his wife replied, hurriedly: "Who's Gertie?"

Exactly SUITS ELDERLY PEOPLE

Herbert Hoover's Humble Birthplace

This simple cottage at West Branch, Iowa, is the birthplace of Herbert Hoover, secretary of commerce and candidate for the Republican nomination for the Presidency of the United States.

Overcome Physical Ills

Elizabeth Barrett, before she married Browning, spent long years on her couch. At the age of fifteen she met with an injury to her spine, which kept her in a recumbent position for several years, and from the effects of which she never recovered. It was during these years that she wrote those sonnets which are the greatest claim to immortality.

What we could never understand is why some people are not understood.

Imperfect Rubber Goods

Many were the troubles that early manufacturers of rubber goods experienced on account of the propensity of rubber to expand and contract with the heat. Daniel Webster, who was Mr. Goodyear's counsel in his patent litigation, humorously referred to a fine cloak of India rubber he once owned, stating that in cold weather it stood well by itself, and that he often set it out on the porch surmounted by his hat, many persons passing by mistaking it for the Sage of Marshfield himself.

Briefs of the Week

Bulow Bros. are Agents for the Bensley's Dyers and Cleaners of Traverse City. Also Rug cleaning done. Goods called for and delivered. Phone 145, Bulow Bros., East Jordan. adv. 10-2

Heavy snow storms with high winds have blocked the roads around East Jordan so that it is impossible for the Rural Carriers out of East Jordan to make round trips. A year ago several of the Carriers were using autos for their daily trips. The main highway between East Jordan and Boyne City, via Deer Lake, and up to Petoskey have been kept open for auto traffic.

Mr. and Mrs. Archie McArthur returned home Tuesday from Detroit, where they were called by the death of the former's mother, Mrs. D. C. McArthur. She was for several years a resident of East Jordan. She passed away at Detroit, Thursday, March 1st, aged 69 years. Funeral services were held Saturday, with interment at Dutton, Ont. Deceased was a member of the O. E. S.

SPECIAL AND REGULAR MEETINGS, TUESDAY, MARCH 13.

Special Communication of East Jordan Lodge No. 379, F. & A. M. Tuesday afternoon, March 13th, commencing at 4:00 o'clock. Work in the M. M. degree. Dinner at 6:00 p. m. at Lodge rooms.

Regular communication commencing at 7:30 p. m., standard time.

To Fly Over Europe

An especially posed portrait of Miss Mildred Johnson of Philadelphia, Pa., aviation lecturer and writer and the only person to have flown completely over the air-mail routes of this country, who has left to fly over the airways of Europe to study and write about them.

S. E. Rogers spent a few days this week at Honor on business.

Archie Kowalske was a Charlevoix business visitor this week.

Mr. and Mrs. Howard Porter were Chicago visitors this week.

Rev. J. C. Johnson of Frankfort was in this city over the week end.

Percy Batterbee left this week for Flint and Detroit to seek employment.

Mrs. Marjorie Miller spent the week end with friends in Petoskey.

Miss Beatrice Burbank left Tuesday for Flint, where she has a position.

A. G. Rogers visited his daughter, Miss Frances, at Kalamazoo over Sunday.

Joe Boyd, who is attending Howe Military School at Howe, Ind., is expected home Saturday for Spring vacation.

Wm. Sexton, who has been laid up for several weeks with a badly burned foot, returned to his work Monday at the East Jordan Furnace Co.

St. Patrick's Supper given by the men of the Presbyterian Church at church parlors, Thursday evening, March 15th. Price 50c. adv.

M. E. Ladies Aid will be entertained at the home of Mrs. R. Maddock, Wednesday afternoon, March 14th, at 2:00 o'clock. Visitors welcome.

Gilbert, ten-days-old son of Mr. and Mrs. James Hignite, passed away last Thursday, March 1st. Funeral services were held from the home on Friday. Interment at Sunset Hill.

Mr. and Mrs. Matt Quinn were called to Grand Rapids first of the week by the death of the former's brother, Morris Quinn, who died at St. Mary's Hospital, Monday, from a complication of diseases. He was a former East Jordan resident, leaving here about 10 years ago.

Did you say you had not attended Prayer Meetings for a number of years? Now wouldn't you like to go to one once more? The Church of God is having good, old-fashioned, spiritual prayer services every Thursday evening at 7:00 o'clock standard time. We invite you to attend. You will receive a hearty welcome.

The old John J. Galster store building at Boyne Falls was totally destroyed by fire at about 3 o'clock Monday morning. The building was just across from the Pennsylvania Lines station and for many years Mr. Galster operated his store there. It was now owned by Thomas Byron. Some insurance was carried.

Washington L. Barr, former Supt. of Cheboygan public schools, died from a stroke of apoplexy Sunday in St. Mary's Catholic Church in that city. Mr. Barr dropped at the final bell for high mass. He was to direct the choir. Father Vogt, conducting services, was affected greatly and changed the mass to a short low mass. Petoskey News.

Supt. Benjamin Klager of the Manistee public schools pleaded guilty Monday to an assault and battery charge brought by Ernest Kihnke, a student in his school, and paid a fine of \$8.35 which was imposed. Kihnke charged Klager with shoving his head through a window pane and knocking him down during an argument over pay earned while Kihnke operated a motion picture machine at the school.

Funeral services were completed Monday at Cheboygan for two baby girls who perished late Saturday in the ruins of the home of their parents, who were absent at the time of the fire. The children were, Rose 3, and Eva, seven months, daughters of Mr. and Mrs. William Tobias of Cheboygan, who were burned to death when their elder brother, Nelson, 6, accidentally fired the bedclothing while looking for a plaything under their bed. Paul, 9, attempted to extinguish the fire with water in a dishpan, but was driven from the house by the heat of the flames.

Judging from national scandals there seems to be money in oil.

Any lady who knows how to cook can find a man who knows how to eat.

Men's Rights

Men's rights are a great deal of trouble to them. They assert them and get them, and then they don't know what to do with them. A man's rights, half of them, are meant to give away. The beatitude of your rights is, they are your benevolences. You can yield them, give them away. And the law of social unity is the law of assertion of a man's individuality as a benevolence for those that are round about him.—Henry Ward Beecher.

Kisses Were Sacred

Among old laws against kissing, those of Iceland appear to have been the most severe. Banishment was the penalty laid down for kissing another man's wife, either with or without her consent, and the same punishment was enforced for kissing an unmarried woman against her will.

Roast Beef	Pineapple Sherbet	Mashed Potatoes
Creamed Peas in Thimble Shells	Salad Magnificat	Cheese
Mince Pie	Coffee	

State News in Brief

Birmingham—Widening of Woodward Avenue to 100 feet through this village will be started soon. Most of the land needed has been obtained.

Albion—Albion college will meet Notre Dame University in basket ball at South Bend, Dec. 12, 1928, in the first meeting of the two schools in 20 years. It was announced here.

Iron Mountain—Despondent over the loss of his winter earnings in the woods in a poker game, Ansel Kivisto, 45 years old, a lumberjack, ended his life by slashing his throat with a razor in a hotel room at Watersmeet.

Marshall—The state highway department announced here that six miles of U. S. 27 south from Marshall will be paved this spring. The contract will be let the latter part of March. The department announced the route around the southeast end of Lyon lake had been decided upon.

Royal Oak—Fearing Detroit water will not be available here before more water is needed next summer and autumn, the city commission ordered a contract awarded to the Ohio Well Digging Co. to sink a 12-inch well designed to produce 600 gallons of water a minute. The cost is to be approximately \$3,523.50.

Lansing—The State Conservation Department had district wardens and a corps of surveyors at work in the Upper Peninsula recently, investigating 75 deer yards with the purpose of establishing from three to six yards under state ownership and supervision next winter. It was announced here.

Traverse City—Fruit growers of the Grand Traverse peninsula have been relieved of fear of damage to their cherry crop by ice in Grand Traverse Bay. Both arms of the bay are frozen over, with the result that the south winds of March and April will be kept sufficiently cool to prevent budding of trees until the danger of frost has passed.

Coldwater—George Mott of Coldwater Lake, a resort near here, drove his sedan on the ice to his favorite fishing spot. Suddenly the ice gave away and Mott found himself a prisoner in the sinking car. The machine settled in 17 feet of water before the fisherman broke the door glass and came to the top where he was rescued, none the worse.

Kalamazoo—Mr. and Mrs. Ralph Johnson of this city, and Mrs. Della Lawrey, of Jerome, narrowly escaped from death in a burning automobile shortly before midnight one night recently, when the car in which they were driving south of the city, skidded, overturned, caught fire and was destroyed. The trio made their escape by kicking open the doors of the sedan.

Lansing—The decline of electric interurban service in Michigan is indicated by an application filed with the Michigan Public Utilities Commission by the Michigan Railroad Co. and the Michigan Electric Railway Co., twin concerns operating Michigan's only interurban electric lines except those of the Detroit United Lines, now in receivership. The companies ask authority to parallel their service lines with freight carrying motor trucks.

Marshall—The reunion of two sisters, separated in childhood and living within 13 miles of each other for 30 years without knowledge of the fact, was celebrated here recently. Mrs. Howard Vincent, of Tekonsha, wrote the superintendent of the state public school at Coldwater, asking aid in a search for her sister, Mabel Showers. Miss Showers, now Mrs. Harold Delaney of this city, was notified and the sisters met after nearly 30 years. A third sister lives in Detroit.

Lansing—Governor Fred W. Green has taken action to save for future generations what is said to be the largest white pine tree in Michigan, which was in danger of being cut down. The tree in question stands in a 400-acre tract of virgin timber in Missaukee County, not far from Stittsville, which is 15 miles northeast of Lake City. The tree is 180 feet high and has a stump of 17 feet. Its age is estimated at 700 years. Lumbermen say the tree would yield about 7,000 feet of four-inch deal and common lumber.

Ladington—Risking his life and suffering severe burns on the face and arms as he stumbled through the smoke and flames which destroyed their Eden Township farm home recently, Kennedy Johnston, 71 years old, rescued his two grandchildren, Mary Lou Stuart, 5 years old, and Betty Stuart, 3, who were overcome with fright and smoke. They are in a Ladington hospital. The grandfather found the two little girls in the basement and lifted them to safety through a basement window after Mrs. Stuart had broken the glass.

Lansing—The number of prisoners employed on highway construction this year will be double that of last year, according to an announcement made here. Jackson and Ionia prisons will supply 1,250 prisoners for road construction, instead of 600, as last year. Three new prison road camps are already in process of construction at Ovid, Lowell and Alledale, just outside Grand Rapids. Roads near Ionia and Jackson will be built by prisoners, who will go back and forth from the prisons to their work.

Science Conquers Bunt or Wheat Smut

Plant Breeders Have Been Trying Hard for Remedy.

(Prepared by the United States Department of Agriculture.)

After at least 2,000 years of injury to the wheat crop from bunt or stinking smut of wheat, it seems probable that science will soon conquer this fungous disease and make it innocuous. Since 1913 plant breeders in the United States Department of Agriculture and in state experiment stations have been striving to find means of saving the wheat that are better than chemical treatment of the seed. These chemical treatments are not always successful in the Pacific Coast states, where the fungus lives in the soil as well as on the seed.

Instead the plant breeders experimented with various strains of wheat, planting them under conditions favorable to smut development. Some strains were almost ruined by smut. Others were only lightly affected, and three—White Odessa, Martin, and Hussar—hardly at all. These and other wheats were crossed with susceptible but agriculturally important varieties, and the more desirable hybrids that proved smut free were selected for further propagation.

An offspring from Turkey and Florence wheat is called Riddit. This wheat has been tested by farmers and is so free from smut that it need not be treated, and about 1,200 acres were grown in 1926. Another smut-resistant hybrid is Albit, which descends from White Odessa and Hybrid 128. This has proved not only smut resistant but of superior quality and out-yields the standard varieties grown at the Washington agricultural experiment station. Riddit is a red wheat and Albit a white wheat. Other smut-resistant selections and hybrids are in process of development.

Yield of Alfalfa Crop Increased With Gypsum

It has been known for several years that sulphur increased the yields of alfalfa in certain sections of Oregon, but until recently practically nothing had been reported in this line of experimental work in the Upper Mississippi valley.

The Iowa station recently reported the results of some trials with gypsum, 20 per cent of which is sulphur. Gypsum is calcium sulphate composed of calcium, sulphur and oxygen, plus water. It was used as a fertilizer as many as 150 years ago in European countries. Its experimental use with general farm crops in various parts of this country has not indicated the necessity for its general use. These experiments with alfalfa indicate a possibility of using gypsum to good advantage.

Averaging all trials, 150 pounds per acre of gypsum increases the yield of alfalfa by 833 pounds per acre; 200 pounds gave 964 pounds; 300 pounds gave 1,075 pounds, and 500 pounds gave 1,335 pounds of alfalfa hay per acre increase over the check plots not treated. In no trial did the gypsum fail to show an increase in yield. The highest increase was 3,060 pounds and the lowest 500 pounds of alfalfa per acre.

The results with oats and clover were more variable than with alfalfa and were of such character that not nearly as much importance can be attached to them as with the increases from alfalfa.

Low Cost of Fertility in the United States

Figures show that if all the fertilizer used in the United States were equally distributed over all the acres farmed, each acre would receive a little less than six and one-half pounds—not enough to make any appreciable difference in yields. Compare this amount with the applications in other countries and we find a striking difference. On the same basis Holland uses 647 pounds, Belgium 513 pounds, Germany 200 pounds, and Italy 50 pounds. "But," some say, "our land is naturally richer and does not require such heavy applications." But will it be richer when it has been cropped as long as some of the European land? The chances are that it will not. American farmers are drawing on their reserve capital and should charge against their crops a sum equal to the cost of fertilizer necessary to maintain the fertility of their land. The European farmers are supplying plant food through their pocketbooks, but American farmers are drawing it out of their soil. The cost is the same either way.—Pennsylvania Farmer.

Alfalfa Is Best Legume for Soil Improvement

Alfalfa can hold its own with the best of the legumes in the matter of soil improvements, judging by actual yield records from the soil experiment fields of the college of agriculture, University of Illinois. On the Dixon soil field, for instance, untreated land made 48 bushels of corn an acre in a clover rotation as compared to 67 bushels an acre, or 9 more, in an alfalfa rotation, according to figures cited by F. W. Gault, of the agronomy department, at Mount Morris untreated land yielded 51 bushels of corn an acre in a clover rotation and 68 bushels, or 17 bushels more, in an alfalfa rotation. These yields are not just for one year, but instead are an average for six years.

Disinfection Is Best for Scab

Kills Organisms on Tuber and Prevents Introduction Into Soil.

(Prepared by the United States Department of Agriculture.)

The importance of seed disinfection in the growing of a clean crop of potatoes is much greater than the average grower realizes. Potato specialists at the college of agriculture in New Brunswick point out that in tests conducted in 1920 disinfected seed showed an increase of 33.9 bushels per acre over untreated seed. In addition to the increase in yield there was a considerable reduction in the number of scabby potatoes.

Not only will disinfection kill organisms on the tuber, but it prevents their introduction into the soil as well. This is especially true of scab organisms. Unquestionably, if seed treatment had been more generally adopted in the past, more growers would not be growing scabby potatoes.

There are two chemicals commonly recommended for seed treatment for malady and corrosive sublimate. Formaldehyde does not give as efficient control of scab, so the use of corrosive sublimate is advised. This material is a poison and must be kept away from animals; furthermore, it corrodes metal and must be made up and used in wooden containers.

Mix Corrosive Sublimate. The potatoes should be soaked in this solution for at least one-half hour, but if heavily infected with scab or rhizoctonia, confine the treatment one hour. As soon as potatoes are treated they should be removed from the solution and dried. Corrosive sublimate is removed from the solution by the potatoes, so measures must be adopted to keep it up to original strength. This may be done by adding one-half ounce of dissolved corrosive sublimate after treating every four bushels. Seed can be treated for from four to five cents a bushel.

Swine Flu Exceedingly Expensive to Breeders

Since the introduction of preventive measures for hog cholera, greater loss is sustained by hog producers from flu than from cholera. Flu undoubtedly causes greater financial loss to the producer of hogs than any other single disease. While many hogs actually die from flu the main damage occasioned by this disease is the result of loss in condition of the herd. When a herd is infected with the flu, even though recovery is secured without loss from death, there is a tremendous waste of feed, for the porkers not only fail to gain in weight while affected with the disease, but generally they also lose weight. When brood sows become affected with the flu, the problem is still more serious because it very often causes abortion and if not, many of the pigs will be born dead, so that the average number of pigs raised per sow, even though no sows are lost, may be reduced by 100 per cent, which makes the pigs very expensive. The thing to do is to institute preventive measures against this disease by supplying good, well-ventilated sleeping quarters, kept well bedded.

Take Vigorous Measures Against Pest of Rodents

With rats and mice in evidence in large numbers, farmers will do well to begin vigorous control measures against these filthy, destructive pests. Powdered barium carbonate, mixed with various types of food on a basis of one part of the poison to four parts of the selected food, has proved very effective. In the control of large rats, which are especially destructive to young poultry, a rabbit carcass with the poison worked into knife cuts, has given unusually good results. The poison should be worked into the cuts in the proportion of one part to four of the flesh, and the carcass placed where rats will have ready access, but poultry and other domestic animals will not be endangered. Securing the carcass firmly with wire will prevent large rats from dragging it away.

Short Farm Notes

- Scrub seed should not be allowed to reproduce themselves.
- Look up last year's garden plan and study it for improvements.
- Plan your plantings so all your work won't come at the same time.
- Sweet clover seed should not be sown too late in the spring or it may not give a good stand.
- Look over the lists of new garden tools. They turn out new and more efficient tools every year.
- Time spent selecting and testing seed corn will pay the farmer many dollars per hour for his labor.
- Early potatoes may be secured by early planting of early varieties in deep, rich, warm soil, followed by thorough cultivation or mulching with

Cholera Serum as Protection

Unusual Prevalence of Disease in 1926 Impressed Farmers With Danger.

(Prepared by the United States Department of Agriculture.)

Special reports made to the United States Department of Agriculture from 30 states in which co-operative hog cholera work is being conducted indicate an increased use of anthog cholera serum as a protection against hog cholera. Apparently, the unusual prevalence of the disease in the fall of 1926 did much to impress farmers with the potential danger of the malady and stimulated action in the adoption of preventive methods.

Protection by Serum. The spring crop of pigs received extensive protection by the preventive serum treatment, the number immunized ranging from 10 to 75 per cent of the entire production in the 30 states, according to the reports. There was also an increase in the number of herds immunized. These factors, no doubt, are largely responsible for the sudden drop in the death rate from cholera compared with that of last year.

The reports also indicated that the time they were submitted that, with the exception of Arkansas, Maryland, Michigan, North Carolina and Kentucky, the other states had suffered no greater losses from cholera this year than they had in 1924 and 1925, showing a sharp decline in the disease from the destructive wave of 1926.

Urge Sanitary Measures. The department stresses the importance and value of sanitary measures in the raising of swine, not only as an aid in the prevention of hog cholera but in preventing other diseases. It also calls attention to the fact that cholera infection may reach well-kept herds as well as those in insanitary surroundings, and if not immunized one will succumb as quickly as the other. After all the use of the simultaneous treatment is the only reliable safeguard against attacks of hog cholera.

Water Warmed for Fowls Increases Laying Power

Experiments emphasize the importance of warm water for laying hens. A summary of results follows: Pullets drank 25.4 per cent more warmed water than cold water during freezing weather. Water consumption was increased 5 per cent per pullet and 4.2 per cent per 100 eggs laid by warming it during average western winter weather. Temperatures were above freezing 90 per cent of the time. White-leghorn pullets laying at the average rate of approximately 60 per cent in midwinter drank 0.28 pound of water per pullet per day and 44 pounds of water per 100 eggs laid. Drinking water for poultry may be conveniently warmed with several styles of simple electric heaters at a cost about the same as for lighting two electric lamps. Heaters of 75 to 100 watts capacity are about right for warming two gallons of water. Specially constructed heaters to be immersed in water can be secured for a few dollars. In case of emergency a hermetically-sealed electric soldering iron makes an excellent water heater. Electric lamps may be used for water heating if they are supported close to the underside of the pan and both the pan and lamps protected to avoid heat losses.

The farmers need help but so do the politicians.

The beginning of March finds us hopeful that a number of subscribers will march in.

What Courtesy Overlooks

One way to make sure that you maintain amiable relations with your immediate neighbors is not to permit yourself to take advantage of their close proximity to you. There are always little things that you can learn about your neighbors that it is the part of courtesy to overlook.

ON READING BOOKS

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

IT WAS under a cartoon that I saw the query.

"How's that?" the owner of the library said to his friend in a boastful and self-satisfied tone, as he showed him his collection of books. "Every one of them a priceless first edition."

"What's this one alone over here?" the friend inquired as his eye catches a lonesome thin volume standing by itself upon an otherwise empty shelf.

"Oh!" the owner explains, "That's the one I've read."

It is one thing to have books; it is quite another thing to have read them. A good many people who have shelves full of books in their libraries might as well have only the false covers without the contents, such as we see in the stage setting of theaters or in furniture stores where they sell book-cases.

My friend Chesley is a collector of books—rare books, beautiful books, unusual books, books which are difficult to obtain, and yet he could hardly be called a regular reader of books. In fact he reads only moderately. If you would take his precious books from the shelves to give them a more careful examination, you would be likely to see how clean and white the pages are as if they had never had close contact with working hands.

You would no doubt discover, as I did, that the pages of many of them had never been cut, and so the book has yet to have its first reading.

Chesley would have no sense of duty neglected if you would call his attention to these facts. He doesn't find much pleasure in the reading of books, and he says so quite naively. His pleasure is in having something unusual, something that his friends cannot afford, cannot get their hands on. His is only the pleasure of a collector.

Lincoln, for instance, had read few books comparatively, for books were not common when and where he was a boy, but he had read these few carefully, thoroughly, and had absorbed the contents and been influenced by the style. The books which he had about him meant much to him—each one of them.

Public and educational libraries must contain many books which are seldom, if ever read, and many more which are only skimmed through for stray facts, isolated information, or for the point of view of a recognized authority. Scholars engaged in research might go quickly through a hundred books in order to get one fact, and these books may not be used again for a decade.

Not so with the libraries which you and I have in our houses. Our books we should be familiar with; they should be like old friends. As we stand in front of the shelves and look them over, each should recall old memories, old pleasures, forgotten experiences. The books that we have we should have read, they should have been a part of our lives, they should have had their part in the development of our characters.

How many of the books that you own have you read?

You can't build a town with a hammer.

DIPPING INTO SCIENCE

Water Came From Fire

It is hard to believe that water could have at one time been a part of the seething mass of fire that was the earth. But this is true, and such a large part of the gas or water vapor cooled down and became water that it covers nearly three quarters of the surface of the earth.

Ouch! Rub Backache, Stiffness, Lumbago

Rub Pain from back with small trial bottle of old "St. Jacobs Oil."

Back hurt you? Can't straighten up without feeling sudden pains, sharp aches and twinges? Now listen! That's lumbago, sciatica or maybe from a strain, and you'll get relief the moment you rub your back with soothing, penetrating "St. Jacobs Oil." Nothing else takes out soreness, lameness and stiffness so quickly. You simply rub it on your back and out comes the pain. It is harmless and doesn't burn the skin.

Limber up! Don't suffer! Get a small trial bottle of old, honest "St. Jacobs Oil" from any drug store, and after using it just once, you'll forget that you ever had backache, lumbago or sciatica, because your back will never hurt or cause any more misery. It never disappoints and has been recommended for 60 years.

SAYS RED PEPPER HEAT STOPS PAIN IN FEW MINUTES

Rheumatism, lumbago, neuritis, backache, stiff neck, sore muscles, strains, sprains, aching joints. When you are suffering so you can hardly get around, just try Red Pepper Rub.

Nothing has such concentrated, penetrating heat as red peppers, and when heat penetrates right down into pain and congestion relief comes at once.

Just as soon as you apply Red Pepper Rub you feel the tingling heat—in three minutes the sore spot is warmed through and through and the torture is gone.

Rowles Red Pepper Rub, made from red peppers, costs little at any drug store. Get a jar at once. Be sure to get the genuine, with the name Rowles on every package.

How Superstitions Arose

The Friday superstition arose because the crucifixion is supposed to have taken place on that day. Some persons think it is unlucky to spill salt, because Judas Iscariot seems to be spilling it in Da Vinci's picture. Others think that it is because salt is a symbol of incorruptibility, and spilling it is, therefore, a sign of broken friendships and general upsets.

First and Last Things

One of the first things a child wants to do is to get its hands on a lead pencil and make some zigzag marks on a sheet of paper, which it listlessly tells its happy mother is a letter to daddy. About the last thing an old man thinks of doing is to get an old stump of a lead pencil and tremblingly make notes for his lawyer, indicating to whom he wants to will his property.

WHY EVERY USER BECOMES A FRIEND.

"Never has any other cough medicine acted so quickly and satisfactorily as Foley's Honey and Tar Compound; and it gives complete satisfaction to friends who use it on my recommendation," says J. D. McComb, Toledo, Ohio. It spreads a healing, soothing coating in an irritated inflamed throat, stops coughing, raises phlegm easily. No opiates to cause constipation, no chloroform, no "dope." You take no chances with cough or cold when you buy Foley's Honey and Tar Compound. Ask for it.—Hite's Drug Store. adv.
