

English Law Demanded

Attendance at Church
 Sunday holiday makers and trippers will be interested to know that a statutory law in England years ago prohibited such frivolity, says the London Daily Mail. The Act of Uniformity, 1532, requires: All persons, except those dissenting from the worship or doctrines of the Church of England and usually attending some place of worship not belonging to the Church of England, are, if they have no lawful or reasonable excuse for absence, to endeavor to attend their parish church or accustomed chapel, or, if reasonably prevented from so doing, some other place where the divine service of the Church of England is performed, on all Sundays and other days ordained and used to be kept as holy days, and to abide there orderly and soberly during the time of common prayer, preaching, or other divine service there performed. Failure to observe this law renders the offending "parishioner or inhabitant of a parish" who is not legally exempt from attendance at divine service on Sundays and holy days "liable in proceedings taken against him in the ecclesiastical courts to be censured for the offense, admonished as to his attendance in the future, and to be condemned in the costs of the proceedings."

Ancient Builders' Idea

of Humor Quite Modern
 The builders of the old churches in England were not so serious but that they now and then perpetrated a joke, even in stone. On more than one of their creations they carved in relief a scene representing a monk preaching solemnly to a flock of geese. The same humorous spirit is sometimes to be detected in the domestic architecture of early times.

Just upon the boundaries of Bedfordshire and Hertfordshire formerly stood an old rambling farmhouse. The living-room was long and low, and on the center beam that went across the ceiling was inscribed this legend: "If you are cold, go to Hertfordshire."

This seemingly inhosptable invitation was explained by the fact that one-half of the room was in one county and one-half in the other. The fireplace was in Hertfordshire.

Disdainful of Physicians

Disraeli affected to regard all doctors with a sovereign disdain, writes a columnist in the Manchester Guardian. "Gull is all froth and words," he declared at seventy-three. "They are all alike. First of all they throw it on the weather; then there must be a change of scene; so Sir W. Jenner, after blundering and plundering in the usual way, sent me to Bournemouth, and Gull wants to send me to Ems; I should like to send both of them to Jericho." And Joseph Chamberlain's insistence that to go up to bed and to come down again constituted exercise enough for any man must have been a sore trial to his doctors.

Afraid of Life

"You're not afraid of life, are you?" she asks him, and Finch is startled into truth. "Yes, I am. I'm awfully afraid of it."

She reared her head from the pillow. "Afraid of life. What nonsense. I won't have it. You mustn't be afraid of life. Take it by the horns. Take it by the tail. Grasp it where the hair is short. Make it afraid of you. That's the way I did. Do you think I'd have been talking to you this night—if I'd been afraid of life? Look at this nose of mine. These eyes. Do they look afraid of life? And my mouth—when my teeth are in—it's not afraid either."—Kansas City Star.

Sunrise on the Moon

The transition from night to day on the moon is very rapid, for the moon has no atmosphere; no rosy tints paint its mountain tops at dawn. There are no graduations between darkness and night, no twilight with color-tinted clouds. Before the sun comes there is blank, black darkness, deeper and blacker than anything experienced on our earth. As the sunshine moves across its surface the first peaks to catch its rays stand suddenly out, fully defined in a harsh, untempered glare and in sharp contrast to the dense blackness of the nearby terrain, where it is still night.

Food Requirements

According to Prof. V. H. Mottram, an adult woman needs but 2,500 calories a day. An adult man engaged in sedentary occupation requires 3,000 calories daily. A man doing hard work should have 5,000 calories. The physiological reason given is that the feminine organism utilizes food more economically than man. A child's food should not be proportioned according to his age, as he requires more than half the food of an adult. Boys and girls of fourteen are to be considered as adults in food utilization.

Sanity in the Madhouse

I should imagine that a madhouse would be an excellent place to be in. I'd a long sight rather live in a nice, quiet, secluded madhouse than in intellectual clubs full of un-intellectual people, all chattering nonsense about the newest book of philosophy; or in some of those earnest, elbowing sort of movements that want you to go in for service and help to take away somebody else's toys.—From "The Poet and the Lunatics," by G. K. Chesterton.

ANALYZE THE ALLOWANCE ON YOUR USED CAR

If a dealer pays you more than the true worth of the car he must make up the difference by extra charges on the new car or re-sell it to some one else at too high a price

PERMANENT value is always better than a temporary bargain in the purchase of an automobile. It pays to look ahead and consider reliability and ultimate up-keep costs, as well as comfort, safety, speed, and beauty of line and color.

Since most automobiles are bought for replacement, the value set on your used car is a factor in almost every purchase. Frequently it is given an importance beyond its true worth.

Used cars have a definite market value and you are justly entitled to an allowance based on that value. It is not fair that you receive less. It is not to your best interests to receive more.

If a dealer pays you more than the true worth of the car he must either re-sell it to some one else at too high a price or make up the difference on the new car. This he cannot do unless he is allowed an excessive profit on the car or on financing, extra equipment and other charges. In either case, you pay the bill, for no way has yet been found to give something for nothing. The money must come from somewhere.

You may not get the largest used-car allowance from the Ford dealer, but that very fact should give you confidence that you are receiving full value in the new car. *Ford charges are not marked up or increased to cover a high trade-in allowance on your old car.*

Because there is no waste, extravagance or undue profit in manufacturing, distribution or selling, every dollar you pay for a Ford brings a full dollar in return. In lower first cost, in reliability and long life, in the low cost of operation, service and replacement parts, the Ford will save you much more than the seeming difference in trade allowance.

FURTHERMORE, at least \$75 extra value is given to you in the new Ford in the Triplex shatter-proof glass windshield, the Rustless Steel, the five steel-spoke wheels, and the four Houdaille hydraulic double-acting shock absorbers. The unusually large number of ball and roller bearings, and the extensive use of fine steel forgings instead of castings or stampings, are other features that show the extra quality built into the Ford car.

TORMENTING KIDNEY AILMENTS RELIEVED.

Hard workers, whose full pay envelope is a necessity, whose good health is their only capital, must keep themselves constantly at their best. When Arthur O'Malley, Carson Hill, Calif., had to drag his aching weary body from a sleepless bed, he did a wise thing—took Foley Pills diuretic, and says: "Less than two bottles of Foley Pills diuretic relieved me entirely of my kidney and rheumatic troubles and put me on my feet and to work again. I want other workers to know about them." Guaranteed to give satisfaction. Ask for them. For Sale by Hite's Drug Store.

Leonard Loomis and Otto Chrisman, Harbor Springs fishermen marooned at Skilagalee lighthouse since Tuesday when Lake Michigan ice fields parted off Cross Village, were rescued Thursday by Charlevoix coast guards under Captain Oscar Smith. Guardsmen found the two fishermen some distance north of the lighthouse and landed them near Middle Village.
Despite the fact that the village of Hooper is so small that it isn't given a place on the map, it is to be given a railroad. The village is the onion capital of Michigan. More onions are shipped from the little village each year than from all the rest of the State. The State's annual shipment is 2,800 cars and Hooper supplies 2,000 of these. Since the Michigan Railway Company, ceased operations about a year ago, the "muck crop town" has been without a rail line. The Michigan Central now has ambitions to run a spur line from Richland Junction to serve the village.
On account of a recent change of time on the M. C. R. R., G. R. & I., and B. C. G. & A. R. R., the latter train now leaves Boyne City at 8:30 a. m. Only mail for Boyne City is now dispatched over the Star Route. The East Jordan Postoffice, however, still receives the same amount of incoming mail consisting of first class mail and newspapers as heretofore via this Star Route.
