EAST JORDAN, MICHIGAN, FRIDAY, MAY 2, 1930.

NUMBER 18

Boyer School Board Recalled

THREE MEMBERS VOTED OUT IN SPECIAL ELECTION, MONDAY.

(Petoskey News)

One of the most bitterly fought campaigns in the history of Boyer City, was brought to a close on Monday, April 28th, when three members of the school board, Anne Boylan, S. B. Neymark and Dwight B. Herrick, were recalled from office. This election was brought about by a petition, in which these members were accused of handling the school funds in a manner not according to law, which accusations have been broadcast, both by the press and local handbills. These allegations were denied by these members, offering the records of the Board for inspection.

The sole issue, then, of this election was the recall of these members, but some of the voters stated that they thought if the accused were recalled, other members could be elected who would engage a new Superintendent. The Superintendent was re-engaged and the contract signed early in March.

The supporters of both sides were out in such numbers that the poll exceeded that of any other election held in the city. It had been decided that the vote of women, who had no school children, and whose joint deeds in real estate did not show in the records, should be challenged, and many went prepared with their deeds as proof of their eligibility. This method was not kept in force long, as it slowed up the proceedings, and was not considered of enough importance to engage extra members on the election board to handle this office. Such great interest was shown in this question that citizens, who have not been near the polls for years, were present to lend their support to their chosen cause. The ballot stood as follows: Anne Boylan, Yes, 465, No, 308. Samuel B. Neymark, Yes 469, No. 302. Dwight B. Herrick, Yes, 440, No. 333.

It is understood that as the situation now stands, the judge of probate must, within five days, call a special election to be held within thirty days. At that time Board members will be named to fill the unexpired terms of those recalled. The term of Dwight B. Herrick expires in July this year and the terms of the other two members expire in 1931. However, at the regular July election, this year, the three offices will be filled for the full and unexpired terms.

Last Man's Club

Charles Lockwood of Chamberlain, S. D., 89-year-old Civil war veteran who, with the death of Peter O. Hall, 91 years old, of Atwater, Minn., became the lone survivor of the famous "Last Man's Club." On July 21, 1886, thirty-three members of B Company, first Minnesota volunteer infantry, who had served side by side in the Civil war, organized themselves into a "Last Man's Club." A bottle of Burgundy wine was purchased and each year the men assembled to drink each other's health. The original bottle of wine was not opened until three years ago when only three members were left. Peter Hall, who has just died, tasted it and the bottle was resealed. If Lockwood fulfills the original intent of the club, he will drink alone to his 32 departed comrades on July 21.

'Twas Ever Thus

Johnson: "So you gave up trying to teach your wife to drive the car?"
Williams: "Yes, when I told her to release her clutch she let go of the steering wheel."

"Your wife is talking of going to France this summer. Have you any objections?"
"No, certainly not, let her talk."

CENSUS REPORT OF PRECINCTS IN CHARLEVOIX COUNTY

Through courtesy of Fred N. Potter, Supervisor of Census of Alpena, Mich., the following preliminary count of returns of the 15th census for precincts in Charlevoix County are available.

Eveline Township—Population 465 as compared with 595 in 1920. Number of farms, 117.

Norwood Township—Population 292 as compared with 292 in 1920. Number of farms, 59.

Boyer City, Fourth Ward—Population 809 as compared with 1215 in 1920. There were 9 farms enumerated in this area.

Boyer City, Third Ward—Population 1005 as compared with 1497 in 1920. There were 8 farms enumerated in this area.

Wilson Township—Population 468 as compared with 601 in 1920. Number of farms, 112.

South Arm Township (excluding City of East Jordan)—Population 602 as compared with 744 in 1920. Number of farms, 116.

Hudson Township—Population 111 as compared with 209 in 1920. Number of farms, 24.

Bay Township—Population 322 as compared with 378 in 1920. Number of farms, 56.

Club Champions Announced

EXHIBITS AND PROGRAMS A WONDERFUL INSPIRATION.

It is next to impossible to express in writing all the splendid features connected with the "Local Achievement Days," that were held last week at some twelve rural schools in Charlevoix County, when A. G. Kettunen and Miss Sylvia Wixson, judged the displays and selected the champions. Of particular mention was the interest and enthusiasm displayed by the club members and the quality of programs given. A large attendance of parents and friends were present at many of the schools, and were simply amazed at the articles and garments made by these boys and girls, many of whom were only 10, 11 and 12 years of age.

The most inspiring program was that held at Marion Center. Very close to one hundred parents and friends were present to enjoy the program. It was indeed a great thrill to see these sixteen young girls appearing with their new dresses on for the first time, each of whom having made a fine selection of material and having done remarkable sewing. Then to realize that a twelve year old girl, Darleen Williams, president of the club, had the ability to take charge of the entire program, as a result of the training she had obtained from the club work.

Norwood school, Ironton school, Bay Shore school, Loeb school, Boyer Falls school, Walloon Lake school, Deer Lake school and Curfew school, likewise held mighty fine programs, that made the local Achievement Days an occasion not to be easily forgotten. Great credit should be given to the Walloon Lake clubs for finishing 100 per cent in view of the fact that their clubs were organized on Feb. 13, the latest of any in the County, and yet completed all requirements most efficiently.

Following are the local champions:

GIRLS' CLUBS

Marion Center School—

First year Junior Champions, tied, Frances Withers, Alice Ecklund.

First year Senior Champions, tied, Freda Greiner, Christina Withers.

Second year Champion, Bessie Straw.

First year Style Champions, tied, Mary Perron, Rosalia VanZant.

Boyer Falls School—

First year Local Champion, Lottie Szeplak.

Deer Lake School—

First year Champion, Beatrice Howe.

Second year Champion, Olive Tompkins.

Style Champion, Olive Tompkins.

Walloon Lake School—

First year Senior Champion, Elsie Ess.

First year Junior Champion, Marjorie Veith.

Style Champion, Audrey Kondzilla.

Curfew School—

First year Local Champion, Martha Bauman.

Style Champion, Frances Bauman.

Loeb School—

First year Local Champion, Mary Pop.

Style Champion, Katherine Guild.

Bay Shore School—

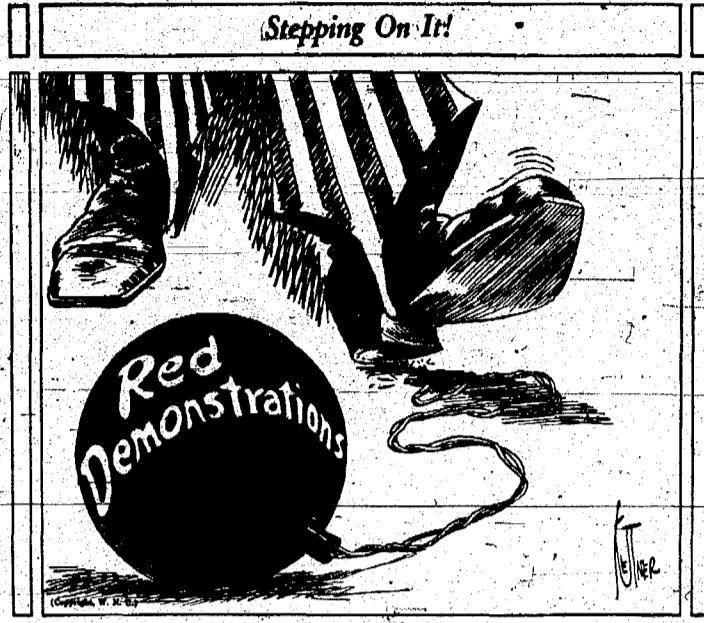

Sr. Local Champion, Anna Willis.

Jr. Local Champion, Arthella Zipp.

Style Champion, Eda Zipp.

McGeagh School—

Local Champion, Sophia Kichak.

Style Champion, Mildred Ager.
Norwood School—
First year Local Champion, Marjorie Richardson.
Nowland School—
Second year Champion, Edna Cunningham.
Style Champion, Luella Cunningham.

BOYS' CLUBS

Ironton School—

First yr. Senior Champion, Archie Ward.

First year Junior Champion, Wilson Ward.

Norwood School—

First year Champion, Senior, tied, Ralph Feboe, Nelson Kirby.

First year Champion, Junior, Doyle Richardson.

Demonstration Team—Newton Pierce and Milton Richardson.

Ranney School—

First year Champion, Howard Evans.

Third year Champion, Gardelle Nice.

Walker School—

First year Champion Richard Zitka

Second year Champion, Dale Kiser.

Third year Champion, Gordon Boyer.

Marion Center School—

First year Champions, tied, Kenneth Celine, Adolph Ecklund.

Curfew School—

First year Champion, Tony Rogers.

Walloon Lake School—

First year Senior Champion, Jerome Kondzilla.

First year Junior Champion, Lester Stevens.

In the passing of Miss Clara C. Daugherty from our midst, the Boys' and Girls' Clubs of Charlevoix Co., have lost one of their most devoted leaders, a staunch supporter and truest friend. Our most sincere sympathy is extended to her family and friends in their sad bereavement by the members and friends of 4-H Club Work of Charlevoix County.

B. C. MELLENCAMP,

County Agr'l Agent.

Pretty Tweed Dress

Here's a pretty tweed dress for spring. It is made with a semi-fitted bodice, trimmed with buttons. The skirt is circular and of medium length.

He—I have a fine wrist watch that cost me \$50.

She—Is that so? What's its movements?

He—To and from the pawnshop.

When an automobile stops along the road in daylight, that's trouble. When it stops at night, it's romance.

Heiress and Her Newsboy Husband

Society circles of America and England were stirred recently when Miss Vivienne Huntington, daughter and heiress of the late Charles Pratt Huntington, who has been residing in London, became the bride of A. C. Durban, a newsboy of that city. The wedding took place while the bride's mother was in Switzerland. Mr. and Mrs. Durban are shown above, honeymooning in Chertton, England.

CHESTER WILLIAMSON AGED 66 YEARS DIED FRIDAY

Chester (Sam) Williamson passed away at his home near Nettleton's Corners, East Jordan, Friday, April 25th, 1930, following an illness of over a year from hardening of the arteries.

Little is known of Mr. Williamson's early history beyond the fact that he was born Dec. 26, 1863, and that previous to his coming to East Jordan he had been twice married and divorced.

He came to this city some sixteen years ago and was employed a number of years at the Chemical plant.

On Sept. 26, 1918, he was united in marriage to Mrs. Permelia Reed at East Jordan, who survives her husband.

Funeral services were held Sunday afternoon from the Latter Day Saints Church, conducted by the Pastor, Elder Leonard Dudley. Interment at Sunset Hill.

Sylvester Reed, a son of Mrs. Williamson, and wife were here from Bendon to attend the funeral.

East Jordan Loses 914

POPULATION DECREASES FROM 2428 TEN YEARS AGO TO 1514.

According to the preliminary announcement of population of the City of East Jordan, our City's population is now 1514 as shown by a preliminary count of the returns of the 15th U. S. Census, taken April 1st, 1930, as compared with 2428 on Jan. 1, 1920. The 1930 figures are preliminary and subject to correction. There were 15 farms enumerated in this area.

Above report is dated April 28, and is from Fred L. Potter, Supervisor of Census, Alpena, Mich.

THOS. McCARRY DIES AT OZARK, MICH.

Thomas McCarry, aged 59 years, a former resident of this city, passed away at the home of his son, Thomas Jr., Wednesday April 23, 1930, at Ozark, Mich. Interment in the Trout Lake cemetery.

He is survived by his wife, Mrs. Myrtle McCarry, three sons, Thomas, of Ozark; Ralph, of Trout Lake; and Randolph, of Flint. Seven daughters, Mrs. Myrtle McMillan of Manistique; Mrs. Elizabeth Stimmerman of Ozark; Mrs. Leonora Tegenhoff of Neebish, Mich.; Mrs. Rose Reynolds of Muskegon; Mrs. Dorothy Krulik of Charlevoix; Mrs. Alta Shute of Ottumwa, Iowa; and Mrs. Countess Hill of Flint. He is also survived by two sisters, Mrs. Elizabeth Bert of Pontiac, and Mrs. Jennie Burns of Chicago; and two brothers, Charles of Chicago, and Stephen, of Lake Ann, Mich.; and several grandchildren.

WATER TAX NOTICE!

Water Taxes for the City of East Jordan are due May 1st and payable during the month of May at my office in the Russell Hotel.

G. E. BOSWELL,
18-4 City Treasurer.

CARD OF THANKS

We wish to express our sincere appreciation of the many acts of kindness extended by friends and neighbors during the illness and death of my husband. Also for the beautiful flowers.

Mrs. Sam Williamson

Good Business Reasons

for Beautiful Factory

The successful factories of the future will not be a sprawling mass of unsightly brick and metal, but, for good business reasons, will tend toward the esthetic, according to Frank D. Tomson of Lincoln, Neb., who spoke before the twenty-first semiannual meeting of the American Railway Development association, at Chicago.

"Nice looking factories, especially those with parks and beautiful grounds, will be the rule for the future," he said.

"In building an architecturally beautiful factory the builder helps develop the property near his location, brings other business sites to the place and establishes a small commercial city. In the end he will benefit by his thoughtfulness for the beauty of his city."

People who are let in on the ground floor seem to overlook the fact that they are nearer the cellar.

Proclamation For Arbor Day

GREEN ISSUES ANNUAL REQUEST FOR PEOPLE TO PLANT TREES.

Governor Green has issued the following Arbor Day proclamation: "Michigan leads all States in the matter of reforestation. In 1930 the State will plant more trees in the State forests than ever before. In 26 years 71,457 acres have been planted to white, Norway and jack pine and before the close of the year this activity will have embraced 110,000 acres.

"This is a striking illustration of the manner in which the reforestation project has been growing made possible by greatly improved forest fire control. It is being proved that the State is capable of growing again the pine forests that were of so much value in laying Michigan's financial foundation.

"Annually Arbor Day has served as a means of stimulating interest in tree planting. This program should be carried on with the view of not only restocking our cut over areas but also to furnish sanctuaries for bird life, the preservation of which must come in a large measure thru instilling in the minds of school children love of nature and knowledge of her benefactions. Over a period of many years appropriate methods of observing the day have taught the children and their elders this real need for expansion of all forestry projects whether it be the planting of a single tree by the roadside or in the development of extensive areas. It is highly desirable that this work shall continue.

"The period of May 4 to 10 has been designated as Michigan forest week. Accordingly, Friday, May 9, is hereby designated as Arbor Day and fitting statewide observation is urged of the day and week."

State News in Brief

Union City—Bobbie Wilson, 4-year-old son of Floyd Wilson, suffered serious injuries as result of lacerations of the face and hands, incurred when he was attacked by a dog. The animal was killed and found to have rabies. Police have ordered all dogs muzzled.

Saginaw—Organization of a forestry project among the Four-H Club Boys of Saginaw County will be undertaken this spring, according to Leonard J. Braamse, county club leader. Under the plans now being worked out, each boy will be required to plant not less than 1,000 trees this year in an acre of unproductive land.

Lansing—Frosts have destroyed approximately 90 per cent of the sour-cherry blossoms in this section of the state and percentages ranging from 50 to 70 throughout the state, D. A. Sealey, in charge of the Government Weather Bureau office at East Lansing, said. The sour cherry crop, he said, was the only one far enough advanced to be affected.

Kalamazoo—Fire destroyed the main building, a three-story brick structure, at the Pine Crest Sanitarium, seven miles west of this city. The loss was estimated at more than \$35,000. Forty-eight patients, housed in small buildings in the immediate neighborhood, were removed without injury. Dr. B. A. Shepard announced the structure would be rebuilt at once.

Baldwin—"Cap" Meade, one of the early hunters and trappers of Lake County, rushed the season a bit by taking a gunnysack full of rainbow trout from the Manistee river, but he encountered two Inaac Walton league special deputies acting as conservation officers. He pleaded guilty to two counts, and was fined \$25 and costs, and was sentenced to 30 days in jail.

Grand Rapids—An aircraft beacon, said to be one of the largest in the world, went into service on top of the Grand Rapids National Bank building recently. The beacon is said to have a visibility of more than 125 miles on clear nights and can be seen across Lake Michigan. It consists of 500 feet of red gas tubes of 15,000 volts. The beacon will be operated nightly from 7:30 p. m. until midnight.

Lansing—Inaugurating what is to be the State's greatest season of highway beautification, employees of the State Highway Department have begun the task of setting out 2,000 trees along U. S. 16 between Lansing and Grand Rapids. The trees are ash, sycamore, oak and maple. They have a diameter of about two inches and a height of 12 to 15 feet. The stretch of highway along which they will stand traverses three counties, Giltton, Ionia and Kent.

Community Building

Every Fire Represents Dollars Lost for Ever

The most rudimentary intelligence should be able to grasp the fact that every fire represents an irretrievable and unnecessary economic and social waste. A dollar spent in purchasing a commodity multiplies itself many fold. It is never inactive, and the entire nation is benefited by its service. A dollar lost because of fire can never be replaced. It has gone out of circulation and a black mark is placed against our record of prosperity. It is a common fallacy to believe that insurance "pays" for a fire. As a matter of fact, insurance can do nothing to offset the loss. It can merely recompense the few with funds collected from the nation at large. For every dollar paid in losses an insurance company must take in at least a dollar in premiums. Our gigantic record of fire waste belies our intelligence as a nation. Part of the income of every citizen is, directly or indirectly, destroyed by fire. Every fire, whether it consumes a great factory or a dog house, acts as a drag on progress.—Goshen Democrat.

New Jersey Will Keep Its Scenic Attractions

A forward step in the campaign to preserve the beauty of the American countryside against the encroachments of modern advertising, was taken by the board of freeholders of Warren county, New Jersey, when they adopted a resolution requiring the removal from the roadsides in that county of all billboards and advertising signs, even political posters.

Warren county, in the northwestern part of the state, is a region of rolling hills and rural vistas, with the Delaware water gap as one of its scenic attractions.

The freeholders decided that the unsightly representation on the billboards of articles of commerce constitute a nuisance, an eyesore, and a hindrance to the more charming prospect of the landscape—and that the billboards must give way.—Detroit Free Press.

House Should "Tie In"

The house which is finished in a combination of materials on the exterior walls must be very carefully designed. Too many times we see houses on which apparently little thought has been given to architectural charm, and the resulting "hodge-podge" of materials leads us to wonder if certain material had run short, necessitating the substitution of something else.

Every one has heard the statement that a new house should be designed to fit the site. In crowded suburban communities the most important of these factors to be considered are the houses on either side. To cite an instance, if a stucco house stands on one side of your property, and a brick one on the other the natural method of tying in with these two suggests the house with brick, stucco and siding in combination.

Home Setting Important

The house is the center of the little portion of the earth's surface we call home. To it lead the drives and paths, around it lie the lawns and gardens that mean so much to the hours of our recreation and delight. To make the surrounding a picture of harmony is to make the house truly a home.

Does your front entrance, a most prominent picture, have that air of both welcome and dignity so much desired? Are those paths and drives bordered with evergreen hedges, as well as your rose and perennial gardens? If so you are fortunate, indeed, but remember, no place should be considered complete until the patriarch of the evergreen tribe, the specimen box, is planted.—Exchange.

City Must "Sell" Itself

Philadelphia is starting out to spend \$1,000,000 on a three-year campaign to advertise the city and its industries. This, although the city is not a summer resort, has no extraordinary vacation attractions to offer and, having its growth, does not have to go after new business as a newer community must do.

The enterprise is a reminder that communities, like business, must advertise to hold their own in this highly competitive age, and it is significant that the schedule of Philadelphia's campaign is using newspaper space extensively.

Benefit of Zoning Laws

Zoning is an effort on the part of cities or counties to protect the interests of the business man and the home owner so each may realize the highest possible values from his land. For, although the tendencies toward grouping according to similar use are very definite, tendencies there are people who from motives of self interest would oppose this natural tendency, if zoning laws and restrictions did not operate to protect the general interest of the property owners of the area as a whole.

Plant Something

The home builder of a generation ago did not realize the investment value of planting, but the wise ones today know better. The real estate agents know this, too.—Country Home.

Size of Containers Regulated by Law

Federal Act Prescribes Dimensions of Baskets.

Baskets, hampers, and other containers in which fruit, vegetables and produce are marketed, must this season conform to the standard container act passed by the national congress in 1923, or pretty well everybody concerned will suffer. Because the law which fixes the sizes of the containers was passed by the national congress and based upon a clause of the Constitution—the weights and measures clause—no other body, state, county, city or village, can pass laws or ordinances which will make illegal the use of the baskets established by the national law, or legal the use of packages which are not in accordance with the national law.

The standard container act required eight years to get through congress, where it was introduced early in 1920. It was drawn at the instance of manufacturers of baskets and equipment, and interests engaged in commerce in vegetables and produce, and its result has been to decrease by 87 per cent the number of different sizes of hampers and by 50 per cent the number of sizes of splint-baskets, used in the marketing of these commodities. The resultant standardization has resulted in great savings to the manufacturers and users, as well as making things simpler for the purchaser.

The law is sufficiently full of teeth that prosecutions may be brought against nearly all parties concerned in the use of a container which does not fulfill the requirements of the law, and the containers themselves may be confiscated and destroyed.

Practical Advice Given on Back Yard Poultry

"Poultry Keeping in Back Yards," a popular bulletin in the series of poultry publications by the United States Department of Agriculture, has been out of print, but is again available in a revised edition for free distribution. As the title suggests, the bulletin is concerned primarily with breeding, feeding, and management of the small flock of poultry which is kept either as a hobby or for convenient and economical meat and egg production by utilizing kitchen wastes and table scrapings.

The authors, M. A. Jull and A. R. Lee, of the bureau of animal industry, refer frequently to other departmental publications that treat more fully certain phases of poultry keeping. The bulletin offers simple, practical, and concise suggestions for choosing the breed, starting the flock, breeding, incubating, brooding, feeding, housing, and managing a few birds on the relatively restricted areas usually obtainable in small cities and suburban communities. They devote some attention to the bantam breeds and their management either as a hobby or for profitable production.

Those interested may obtain Farmers' Bulletin 1508-F, "Poultry Keeping in Back Yards," by writing to the office of information, United States Department of Agriculture, Washington, D. C.

Pasture Management to Increase Its Capacity

A system of pasture management which has increased the carrying capacity of grass land is being used by the Nebraska School of Agriculture at Curtis. The pasture was divided into two equal parts. The cattle are kept in one half until the grass begins to get short. Then they are turned into the other half, until the grass there gets short. The grass in the vacant field thus has an opportunity to recuperate before the cows are turned into it again.

Before the practice of rotating the pasture was started, it was overrun with weeds and the stand of grass was thin. Now, although the cattle herd has been increased in size, the pasture has become better. The weeds are practically gone and the growth of the grass is much more luxuriant.

Apply Fertilizer With Drill for Best Results

Increased returns from commercial fertilizer are practically sure when the material is applied in drill rows, or deposited in hills with corn.

When fertilizer is placed in hills the distributing machine is an attachment on the ordinary corn planter. A significant point which a Wisconsin test revealed is that there are two positions in which it is advisable to place the material. These are at both sides of the hill, or in an arc or oval over the seed. This is important because the commercial product should not come in direct contact with the corn kernels.

Dwarf Essex Rape Most Excellent Hog Pasture

There is nothing that can be sown in the spring that will make hog pasture earlier than dwarf Essex rape. It is good policy, in sowing rape for pasture, to put with it some of the coarse grains and one of the clovers. A mixture of oats and barley in equal proportions, sown at the rate of two bushels per acre with three or four pounds of dwarf Essex rape and a couple of pounds of medium red clover, should give you a very excellent hog pasture. The addition of the red clover will make it last longer than if it is omitted.

The DAIRY

MILK OFTEN TO INCREASE YIELD

Striking Results Obtained at Beltsville Farm.

(Prepared by the United States Department of Agriculture.)

One way to make a cow give more milk is to milk her three times a day, instead of twice. This fact has been demonstrated a number of times in recent years, but perhaps the most striking results have been obtained at the dairy experimental farm of the United States Department of Agriculture at Beltsville, Md. Here, it was found that the extra milking gave 21.2 per cent more milk and 22.4 per cent more butterfat.

Much of this increase is attributed to the fact that the cows milked three times a day held up better in their milk flow. The decline in production from the first to the last 30 days of the lactation was only about 90 per cent as great with the cows milked three times a day as with those milked twice.

In the experiments six cows were milked for two lactations each and two for three lactations each, making in all eighteen lactations. In eight of these lactations the cows were milked twice a day and in the other ten they were milked three times a day. Conditions were the same for all lactations except the number of times a day the cows were milked.

In order to determine whether milking three times a day is a profitable practice, one must know not only the probable increase in production but also the quantity and cost of the grain needed for the increased production, the cost of the extra milking, and the value of the increase in production. These items vary in different localities, and each dairyman will have to figure it out for himself, is the conclusion reached by the department.

Supplementing Pasture With Grain Best Plan

Putting the cows on pasture too early places the good cows under a condition whereby they cannot produce to their inherited capacity because they cannot gather enough nutrients. The higher producing cows cannot gather and masticate enough early pasture to supply their needs and for this reason some attention must be given to supplementing the pasture.

In supplementing the early pasture with grain it is worth while to know that the pasture is comparatively rich in protein at this time and for this reason it is often advisable and good economy to reduce the proportion of protein rich feeds in the grain supplement. If one finds it profitable to feed grain throughout the summer it is advisable to increase the proportion of protein rich feeds in the grain mixture as pastures become mature, short, dry, and less palatable.

Silage Is Succulent and Excellent as Balance

Silage is a succulent grass-like feed. It is cooling in effect, aids digestion, stimulates appetite and is an excellent balance for high protein concentrates. A dairy cow requires such a feed because she is doing hard work when producing a good flow of milk. The cow by nature is a user of roughage, and when fed in an artificial way on grains of high nutritive value there is need for a cooling grass-like feed, and silage comes in to fill this valuable place; silage has a high water content, but water is an important item of the ration. Milk is 87 per cent water and beef over 60 per cent.

Dairy Facts

The dry cow should be fed individually just as should the milking cow.

Sterility, udder trouble, and the loss of premature calves are all symptoms of abortion disease.

How to handle the dairy sire during the winter months—what to feed—and how much to feed—these are important questions.

Farmers who did not get their silage made before frost, may yet have good silage if they will utilize the dry fodder for this purpose.

Jerseys and Guernseys producing a high per cent fat should be fed a pound of grain for each two and a half or three pounds of milk produced, daily.

Dairy cows differ in their ability to pay the farmer good prices for his grain and hay crops. Low-producing cows should be culled out.

Dairy calves should have clean, light stalls or pens and be provided with an abundance of good feed and water during the winter.

Grassy flavor in milk is common in the spring, but may be eliminated or reduced easily. Take the cows off pasture several hours before milking or turn them on only in the morning.

FATALITIES ARE NOW ON DECLINE

Decrease in Death of Children Ascribed to Safety Education.

Chicago police department statistics just made public show that 166 children under fifteen years of age were killed in motor accidents last year in Chicago, as compared with 207 in 1925, according to a statement issued by the accident prevention department of the Chicago Motor club.

Adult fatalities, likewise, were sharply reduced in 1926. The total deaths were 637, as compared with 710 in 1925.

Child Fatalities.

Charles M. Hayes, president of the motor club, ascribed the decrease in child fatalities to the safety education which is now a part of the regular curriculum in most public, parochial and Lutheran schools, and to the efficient operation of the school boys' safety patrols.

"This form of instruction has been in progress for several years, and its benefits are now being reflected in the accident statistics," declared Mr. Hayes. "Early impressions last in a large degree, through life, and when the fundamentals of safety are stressed to little children we may expect them to walk more carefully during childhood and even to be more careful drivers when they have grown up than the present generation."

Boys' Patrol.

"Great credit is due the members of the school boys' patrol. Those boys, standing at intersections near schools in rain, snow and cold, are selected for their qualities of leadership, and assist their younger classmates across streets during julls in the traffic. They have made it possible for hundreds of policemen to be relieved of such assignments and thus available for the more serious but no less important task of preventing crime and catching criminals."

Oil Filter Saves Wear on Engine Piston Rings

An interesting test, conducted by the California agricultural experiment station with a view to determining the work done by oil filters used on motor car engines, is described in the S. A. E. Journal by Prof. A. H. Hoffman. Two cars, a roadster with delivery body and a coach, equipped with the filter being bypassed on the roadster but left to function on the coach. The principal wearing engine parts of both cars were measured and, where feasible, weighed before the test.

If seeing is believing, then men must have the most implicit confidence in women.

Horse Auction

AT CROWELL'S BARN, EAST JORDAN

SATURDAY, MAY 10th

Commencing at 1:00 o'clock p. m., Fast Time.

20 HEAD OF EXTRA GOOD IOWA HORSES AND MARES.

Weight 1300 to 1800 lbs. A number of matched teams. These horses are all broke to work and gentle. One pair of Roan Mares, weighing 3500 lbs. The balance of this load are an extra good lot of farm chunks. These horses are bought right out of the harness and are ready for work. If you are in need of a horse of any kind, be sure and attend this Sale. Will sell private or trade before sale.

Horses will arrive Wednesday, May 7th. Sale, Saturday, May 10, rain or shine. Terms, eight months time with seven per cent interest.

George Thompson, Owner

Walter Corneil, Clerk. E. Oster, Auctioneer.

Here's One

I like your column very much. As your poetic lines are just as funny as a crutch—like comic Valentines.

Natural Blunder

"How did the Smith wedding go off?"

"Fine until the parson asked the bride if she'd obey her husband."

"What happened then?"

"She replied: 'Do you think I'm crazy?' and the groom, who was in a sort of daze, replied, 'I do.'"

Disappointed Thrice

"So you have been three times disappointed in love?"

"Yes, the first left me for another, the second died on our wedding day, and the third I married."—Buen Humor, Madrid.

His Crime

Welfare Worker—And what are you here for, my man?

Prisoner—Flattery, ma'am. Caught imitating another man's signature on a cheque.

An ideal apartment is one that is occupied by some one else.

TORMENTING KIDNEY AILMENTS RELIEVED.

Hard workers, whose full pay envelope is a necessity, whose good health is their only capital, must keep themselves constantly at their best. When Arthur O'Malley, Carson Hill, Calif., had to drag his aching weary body from a sleepless bed, he did a wise thing—took Foley Pils diuretic, and says: "Less than two bottles of Foley Pils diuretic relieved me entirely of my kidney and rheumatic troubles and put me on my feet and to work again. I want other workers to know about them." Guaranteed to give satisfaction. Ask for them. For Sale by Hite's Drug Store.

First Lie—"See that girl? Her face is her fortune."

Second He—"Yeah, and it runs into a nice figure."

A lady phoned the water office relative to hours for watering the lawn. "What is the proper time to put on my hose?" she asked.

"Really, madam, I believe immediately after your B. V. D.'s," came the ready response.

The popover has just popped over

EAT IT NOW

THE TIME to eat a popover is when it has just popped over. When it has reached its climax, and is puffed and crisp. Listen to it crackle when you break it apart for butter.

And the time to eat vegetables is when they've just been picked. They will never be so fresh again. The peas will never be so firm, knuckled tight in their pods... nor the corn so glistening and sweet under its silk. Shell the peas, husk the corn, hustle them into the pot. Have all your vegetables at their climax moment—with a garden of your own.

Ferry's purebred Seeds are eager to burst into growing; and are fresh at the "store around the corner." They are purebred—all their name says they are. Their parent-plants and grandparents before them produced vegetables and flowers that approached perfection. What their parents were, these seeds will become. Use Ferry's Seed Annual to help you in selecting; and to know of mulch paper, and new ways to cook vegetables. For the Annual, write to D. M. Ferry & Co., Detroit, Michigan.

P. S.—A GARDENER HAS NO SECOND CHANCE. PLANT THE BEST.

SAID TO BE FROM ABERDEEN

A professional actor was coaching a dramatic society. "You must infuse more expression into your voices," he said. "Why, I remember an actor who could so read a menu as to make his audience weep."

Lovely Present "Where did you get that lovely walkingstick?" "It was a present from William Kruger." "Who is he?" "I don't know—but is all engraved on the gold knob."—Hamburg Hummel.

Better Light She—I'm putting up a better light. When the light is dim the gentlemen are apt to get rather bold. He—But that light is worn out. It won't light at all. She—So much the better.—Lustige Blätter.

He Was Willing Judge—You attacked this man on the street. Can you deny it? Accused—Yes, I can, Your Honor, if you think it will help me any.

NOT WELL KNOWN

"Bill knows his onions, all right." "Yes; but doesn't know 'em well enough not to eat 'em."

Yes, Sir! With family spat Confin'd to the feet Married life Will be complete.

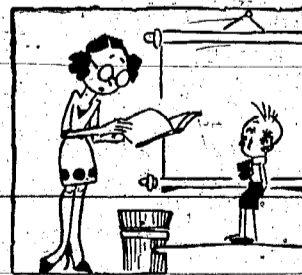

Foggy Excuse "I'm sorry Reggie's so late in bringing me home, mother. There was a dense fog, and his car was held up." "Why, it's a clear, moonlight night, child!" "So it is. I must have been thinking of some other night!"—Humorist.

What, indeed? "Don't see any more stuff like Spartacus to the Gladiators." "Eh?" "What's become of all those fellows that wrote for the old Third Reader?"

A Friendly Word Jasper—I haven't a good word for that feller Jim. Dexter—Well, they ain't much good said about him. But I'll say one good thing about Jim, he wasn't always as mean as he was sometimes.

Positions Altered Hattie—Oh, Evelyn, did he propose last night? Tell me what it was like! Evelyn—Oh, it was very simple. When he began he was on his knees, and when he finished I was on them.

TO STOP HER

Teacher—"Why should we put a full stop after the sentence, 'The woman said she was going after him with a stick'?" Pupil—"Why—er—to keep her from going too far."

Truth in Ads "I never smoke no cigarettes." The famous player said; But they had him on the signboards Recommending Shanghai Reds.

Facing Death Returned Explorer (boastfully)—Yes, gentlemen, I have faced death a hundred forms. Little Perkins—Really! Doctor, or undertaker?

Easy to Please "That hat makes you look ten years younger." "Then I won't do. When I take it off I shall look ten years older."

Good Roads Have Helped Farmers

Those Who Once Grow Only Staples Now Plant Many Good Crops.

The period of phenomenal progress in good road building throughout the United States which has marked the past ten years, has worked an unanticipated and extremely beneficial change in American diet. For every mile of improved highway laid down, some farmer has added to his production of wholesome green vegetables, readily marketable in the nearest city.

Change in North Carolina. "In North Carolina, for example, this amazing change has come about since the passage of the first \$50,000,000 state bond issue for good roads in 1921," he points out. "Farms where nothing but tobacco was grown for decades, are now green with truck crops of all kinds. Dairying, too, has sprung into prominence, for it has become an easy matter to ship dairy products to market by truck."

Essential to Farm Success. Farmers who a few years ago opposed road improvements or were dubious concerning their advantages are now conceding that paved highways are essential to farm success. "Not only individual farmers but farming sections are competing fiercely with each other today," says Mr. Duffy. "Certainly a rural community with 250 miles of smooth pavements, such as Fulton county, Georgia, is much better fitted to do battle for its share of prosperity than a neighboring county which must do business in 250 miles of mud."

Automobile Radios Are Getting Quite Common Only a short time ago the radio enthusiast who strung an aerial over the top of his car and installed a receiving set in the back so that he could hear programs as he drove along was looked upon as a bit queer and people smiled as they passed such an outfit along the road. Nowadays, with the vastly better receiving sets many of the better grades of automobiles are being regularly equipped with aerials built into the car tops, so that high-grade receiving sets can be installed at any time the owner desires. The main problem in connection with such an installation is the elimination of interference from the automobile spark plugs, which can be done with the proper arrangement of condensers and resistances. The low tension sparks at the circuit breaker and the generator commutator are even more easily taken care of.

Autoists Speeding Over Roads Built by Romans While the United States leads in road improvement and construction activity, European countries lead in mileage of surfaced roads. This is because their surfaced highways began with the old Romans, and these old highways have been kept in good condition throughout the ages. Europe has 688,000 miles of surfaced roads as compared to 150,000 in the United States. Following close on the heels of the United States comes Australia, with 66,000 miles of hard roads. The huge area of Asia, however, has only 105,000 miles of surfaced highways.

TOO EXPENSIVE A PASTIME

"Why are you so opposed to your daughter working?" asked the bachelor friend. "I can't afford to let her work," replied the family man. "What the heck do you mean, can't afford it?" demanded the B. F. "Say, she couldn't even earn the silk stockings, let alone all the party dresses she would need to wear to work," growled the F. M.

Points of Interest on the "Road to Mandalay" A few points of interest along the auto road to Mandalay, gleaned from an article in the magazine Fortune, read as follows: With a population of approximately 300,000,000 India has some 125,000 motor cars—about one car for every small town or big village. India's Satan is Black Yama, and Mohammedans consider green an unlucky color. Therefore black cars and green cars are unpopular. Elephants have caused many auto accidents, but now wear tall-lights, and like tall-lighted London bobbies possess a high visibility. Indian rajahs love spotlights, thus princely cars may carry ten or a dozen lamps. Religious pilgrimages stimulate traffic, so also does the Hindu taboo upon a man's marriage with a girl from his home town. But it is considered unlucky to travel east on Monday, north on Tuesday or Wednesday, south on Thursday, west on Friday or Saturday. Evil days for starting journeys are Tuesday, presaging fire at home; Saturday, foreshadowing loss by thieves; Sunday, portending sickness. Misfortune results from payments or deliveries on Tuesday or Saturday, and all bargaining, haying, selling and paying are suspended at Vishagadi, the poisonous hour of the day.

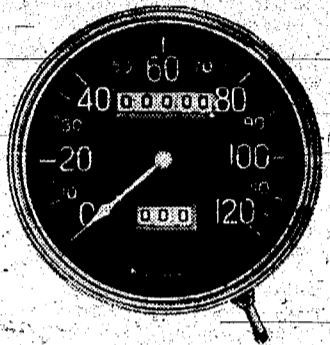

An opportunist is one who meets a wolf at the door, and appears the next day in a fur coat.

THE MOTOR QUE

Q. How many automobiles entered the national parks in 1929? Ans. According to government reports, 506,000. Q. What countries bar the use of certain automobile body colors and why? Ans. China bars red on account of its religious significance, while Spain prohibits the use of blue because it is the color of the royal family. Q. Why should spark plugs be securely screwed into the cylinder after installing new ones or cleaning? Ans. This prevents hot gases from escaping between the plug and cylinder threads, which would cause the plug to run too hot, resulting in loss of power. Q. How many automobiles were junked in 1928? Ans. More than 2,213,000.

Indication of Speed Is Obtained by a Pointer

A new "pointer" type speedometer was introduced at the recent New York and Chicago automobile shows. Indication of speed is obtained by means of the pointer, which moves

"Pointer" Speedometer. around a full circle scale, similar to that of a clock. At 60 miles an hour, for instance, the pointer would be in the twelve o'clock position of hands on a clock. Thus speed may also be known simply by the position of the pointer.

AUTOMOBILE FACTS

Be sure that the way is clear before entering a line of traffic from a parking place.

Other things being equal the better the gas used in winter the less crankcase dilution there will be.

Motor busses are now operated over 95 regular established routes in Germany, a total length of 1,500 miles.

"Look, mamma!" cried Willy, on being shown through the Egyptian room of the museum. "See the stuffed pedestrian!"

The hit-and-run driver continues building up a public resentment against his unholy works that should react dangerously when we catch him.

Because cold engines do not run smoothly there is a greater temptation to slip the clutch, and damage it, than during any other kind of driving.

Motor fatalities in 1929 showed an increase of more than 5 per cent. If this keeps up the growth in population will have to jump, as well as the pedestrian.

In addition to keeping the car looking its best relatively frequent washing will provide the artillery wheels with the degree of moisture that will give them strength and silence.

Points of Interest on the "Road to Mandalay"

A few points of interest along the auto road to Mandalay, gleaned from an article in the magazine Fortune, read as follows:

With a population of approximately 300,000,000 India has some 125,000 motor cars—about one car for every small town or big village.

India's Satan is Black Yama, and Mohammedans consider green an unlucky color. Therefore black cars and green cars are unpopular.

Indian rajahs love spotlights, thus princely cars may carry ten or a dozen lamps.

Religious pilgrimages stimulate traffic, so also does the Hindu taboo upon a man's marriage with a girl from his home town.

But it is considered unlucky to travel east on Monday, north on Tuesday or Wednesday, south on Thursday, west on Friday or Saturday. Evil days for starting journeys are Tuesday, presaging fire at home; Saturday, foreshadowing loss by thieves; Sunday, portending sickness. Misfortune results from payments or deliveries on Tuesday or Saturday, and all bargaining, haying, selling and paying are suspended at Vishagadi, the poisonous hour of the day.

An opportunist is one who meets a wolf at the door, and appears the next day in a fur coat.

Beauty in Colored Shingles. In addition to the beautiful natural effects, which can be obtained with shingles for the walls of a house, there are numerous opportunities for rich colors, which create stains produce. These colors, unlike paint, allow the grain of the wood to show, and they give a surface which is almost ruglike in softness. A combination of harmonious browns, tans, reddish browns and yellowish browns may be used on the same wall by using shingles which have been dipped into these different tones. This mixing of various shades is often overdone, but when good taste is used in the selection many beautiful results are possible.

Roadside Trees Suitable tree planting along public highways, which greatly enhances their appearance and comfort, is most satisfactorily done by the community as a whole rather than by individuals, says the United States Department of Agriculture. Interest in country highways in the United States has increased rapidly during the last few years. The greater interest in rural roads is due largely to the growing automobile traffic, a large part of which is pleasure driving in which the most beautiful routes are naturally sought.

Saving the Trees The contractor is usually made responsible for trees and shrubs on the property that is desired to preserve. This is done by entering appropriate clauses into the general conditions of the contract, by which the contractor is required to mark all trees, to avoid piling building materials and rubbish against them, and to preserve shrubs in any suitable manner.

Hill City Planner We can see limitless possibilities for the city planner. We can see him, or her, bringing order out of chaos, making two beauty spots grow where not even one would grow before.

Money for Home Owners Life insurance companies are a big factor now for the furnishing of money for home ownership. So are trust companies and mortgage companies.

Parasites Abound Parasite plants often destroy trees by sucking the sap or tree life from the trunks. Parasite people also ruin communities by receiving its benefits and giving nothing in return.—New Albany Tribune.

Notice to Contractors!

Sealed bids will be received by the Board of County Road Commissioners at their office in the Court House, Charlevoix, Michigan until ten o'clock standard time, Monday, May 5, 1930 for the construction of grade and culverts on 6565 feet of road on Pleasant Valley County road in Wilson Township.

Bids on the above work are to be made according to bidding blanks furnished by the Road Commission and certified check for Three Hundred Dollars must accompany each bid.

The commission reserves the right to reject any or all bids or any part thereof.

ERNEST PEASLEE, Deputy Clerk.

W. E. BYERS, Chairman.

RESTFUL EASE AFTER COUGHING.

"The result of using Foley's Honey and Tar Compound for a dreadful cough that bothered me both day time and at nights was a restful one for me," says Mrs. Anne Davison, Long Beach, Calif. "It eased my cough at once, felt so good to my irritated throat and was very agreeable to take. No more coughing for me so long as I can get Foley's Honey and Tar Compound." Your druggist sells and recommends it. Ask for it. For Sale by Hite's Drug Store. adv.

MOTHER'S DAY SUNDAY, MAY 11th

a day to honor the Mother we are privileged to enjoy, a day to cherish the memory of the Mother who has passed on.

Mother's Day is a beautiful custom-- a day when some little gift or token of regard brings deep joy to the dearest of Mothers, or a day rich in memories and reverence to the Mother who has passed into the Great Beyond.

Might we make this a richer and fuller day, not only in tangible gifts or money cherished, but also by striving to live the honor we would bestow.

"The Bank With The Chime Clock."

Conductor (after stumbling over obstacle in the aisle)—"Madam, you must not leave your valise in the aisle."
Colored Lady—"Fo lan sakes, dat ain't no valise, dat's mah foot."

College Wisdom
"These are not my own figures," said the professor. "They're the figures of a man who knows what he's talking about."

Then the Fight Was On

Wife—"Dear, if you had it to do all over again, would you marry me?"
Brute—"Yes, if I had to do it over again."

Buyer—"Hey! These gloves are about six sizes too small for me."
Salesman—"Well, didn't you ask for kid gloves?"

A man learns more as he grows older, but it is of less importance.

Briefs of the Week

A. K. Hill left Saturday for a two weeks visit at Detroit.

Cups and Saucers, 12 1/2c at C. J. Malpass Hdwe. Co. adv.

Carl Shedins was home from Kalamazoo over the week end.

Robert Mackey visited friends here this week from Grand Rapids.

Just received a line of Miltex Dresses, price \$8.75, at Brabant's Store. adv.

Rug sale, 9x12 Linoleums \$5.75. Compare and buy. C. J. Malpass Hdwe. Co. adv.

Mrs. Joe Montroy underwent an operation at Charlevoix Hospital last week Thursday.

Henry Scholls left Tuesday for St. Ignace, where he has work with the Rogers Construction Co.

Rev. Lyman Brough and wife of Nashville, Mich., are visiting at the home of Mr. and Mrs. Ben Clark.

Frank McPherson and family of Frankfort visited Sunday with his parents, Mr. and Mrs. Wm. McPherson.

Mrs. W. H. Fuller and daughter, Miss Doris, left Tuesday for a few days visit at Grand Rapids and other points.

Mr. and Mrs. W. A. Loveday and Miss Louella Boosinger have arrived home from Lansing to spend the summer here.

Radios \$9.75 and up. We now have the most powerful radios made. Let us prove it. C. J. Malpass Hdwe. Co. adv.

Miss Marjorie, daughter of Mrs. Pearl McHale, underwent a serious operation, Tuesday, at the Lockwood Hospital, Petoskey.

Mrs. Elويدa Davis and children and Mr. and Mrs. Ernest Davis and children of Lansing were here over the week end for a visit with their mother, Mrs. Robert Grant.

Theo Scott of Grand Rapids is here this week visiting at the homes of John Whiteford and Archie Howe. His wife and children have been here for the past couple of weeks.

Mrs. G. A. Lisk received word last Friday from Rochester, Mich., of the death of her brother-in-law, Warren Miller, who was injured seriously by a team of horses which trampled on him.

Miss Thelma McDonald, who is student nurse at the Owosso Memorial Hospital, was home over the week end for a visit with her parents, Mr. and Mrs. R. T. McDonald.

Mrs. Helen Wilhelm-Dunn, aged 20 years, of Lansing, who has been here the past week visiting at the Leonard Hite home, was taken ill Wednesday and was taken to the Charlevoix Hospital.

Our new Seeds are here now. Golden Bantam sweet corn, 16c lb.; Garden Peas, any variety 20c lb. Low prices on other seeds at C. J. Malpass Hdwe. Co. Prizes given for the best vegetables grown from our seed. adv.

William Heath and mother, Mrs. Ellen Heath, and aunt, Mrs. Mary Wilcox came up from Kalamazoo latter part of last week. Mr. Heath has purchased the Sherman Conway residence and they will make their home here.

Julius Nachazel, with the extension department of the Michigan College of Mining at Houghton, was visiting East Jordan friends over the week end. He was enroute from Houghton to Detroit and Chicago in the interest of the College.

Married at the Methodist Episcopal Parsonage on Saturday, April 26th by the Rev. James Leitch, Foster G. Bair of Milwaukee, Wis., and Miss Madeline Genau (Mary Chew) of East Jordan. The double ring service was used. The happy couple will make their home in Milwaukee, Wis.

"Red" Stars for Dartmouth

"Red" Bolfe, of Pemacook, N. H., All-Eastern shortstop in 1920, who is again filling that position on the Green nins at Dartmouth.

Mrs. Ralph Ranney had her tonsils removed at Lockwood hospital last week.

All kinds of furniture on easy payments at C. J. Malpass Hdwe. Co. adv.

Just received a line of Miltex Dresses, price \$8.75, at Brabant's Store. adv.

Mr. and Mrs. Sherman Conway and children were here from Sparta over the week end.

Frank Bretz was up from Detroit over the week end. His wife accompanied him back for a two weeks visit.

Mr. and Mrs. Ben Reid and daughter left Sunday for Muskegon where Mr. Reid is employed and they will make their home.

Dr. E. J. Brenner has leased the second floor of the Peoples Bank building and will move his office to the new location the fore part of this month.

Raymond Swafford of East Jordan, who is a Junior at the Kalamazoo Western State Teachers College, is playing first base on the varsity baseball squad.

Mr. and Mrs. Bert Reid and son, Earl, Mrs. Frances Graff and Mrs. Blaine Harrington were visiting East Jordan friends over the week end from Muskegon.

Miss Mabel Addis, who was called home by the death of her grandmother, Mrs. Irving Eaton, will return to Detroit first of the week to continue her study of music.

Abe Al Cohan, athletic coach of East Jordan Public Schools, is among the first student-coaches to make application for enrollment in the summer coaching school at Wittenberg College, Springfield, Ohio.

Our fire departments was called out three times the past week to check small blazes. On Saturday they were called to the Mrs. James Howard home where a garage was threatened. Tuesday afternoon they responded to two calls within an hour—the first a grass fire near the Boyne Falls State road, and the second a roof fire at the Wm. Webster home.

Mrs. Joseph (Anna) LaValley of Pontiac received serious injuries at that city Friday evening, April 18th, when she was struck by an auto while on her way home from church services. She was removed to the City Hospital, where it was found she had sustained a broken pelvis bone, two fingers broken on her left hand, and head bruises. She will be confined to the hospital for several weeks.

Sandusky—Three employees of the Michigan Bell Telephone Co. were burned to death after their automobile left M-51, a mile east of Croswell, and struck a tree. The victims were George Holliday, of Bunker Hill, Ind.; Warren Stevens, Independence, La., and Claud B. Phifer, Doyle, Tenn. Holliday and Stevens died in the blazing automobile and Phifer died later in Tweedie Hospital here. The driver of the car failed to notice a curve in the road. The men came here recently to do construction work.

Jackson—Introduction of a toy manufacturing industry in the Michigan State Prison was seen as a possibility as the result of a proposal made to the State Prison Commission. The Sturdy Toy Co., of Boston, offered to purchase steel toys manufactured by inmates, at the rate of 1,000 pieces a day. Such a contract would provide employment for at least 250 men, it is estimated. The commission decided to study the proposal, with the idea of taking action at a meeting to be held at Jackson within a few weeks.

Lansing—Savings deposits in State and industrial banks of Michigan amounted to \$768,277,318 on March 27, or \$6,872,150 more than at the close of 1924, according to a summary of quarterly reports prepared by R. E. Reichert, banking commissioner. The total was smaller by \$44,170,411, however, than that of the same date last year. Commercial deposits increased \$35,747,280 during the year, reaching a total of \$544,946,619. Between Dec. 31 and March 27, a decrease of \$546,496 was noted in commercial deposits.

Detroit—Sale of radio station WGHF to John H. Kunsky and George W. Trendle was announced recently by George B. Storer, the owner. The transfer becomes effective about June 1. The station will be operated under the name of the Kunsky-Trendle Broadcasting corporation. Kunsky and Trendle were associated for 22 years in the theater business, and for several years controlled practically all of the large motion picture houses in the city. They retired temporarily from the amusement field last fall after disposing of their interests.

Cadillac—Jim Todd, 79-year-old reclusive, was afraid he wouldn't live to get in the 1930 census, but he was counted, with the undertaker as a witness, and today he is dead. Ed Althouse, a neighbor, found him unconscious in his shack. Thinking he was dead, he called the undertaker. The undertaker found Jim alive, but critically ill. While Althouse and the undertaker were preparing to take him to a hospital, the census taker came along and Jim Todd was counted in the 1930 census. He died a few hours later in a hospital.

JUNIOR PLAY

The Junior Play went off "with a bang," so to say. Those who missed it missed a good thing, for the acting could almost be termed "superb."

Peter Hegerberg, as the Irish father, did not once portray the fact that he was not Irish—his Norwegian was completely concealed beneath his wonderful acting.

Ozello Scottfield, as the model daughter, and favorite of her father, proved that she could act as good as she looks.

But what about Marvè Rogers? As Pete's wife, she received an overdose of her own medicine, which proves that Pete was not so slow as he sometimes looks to be.

Donald Stokes. Ah, the wayward son, and unaware of any dangers, in love with the maid, Josephine Dolezel. And Josephine herself, she was sweet, and proved to be as much Irish as Pete himself.

Pete's other daughter, Moresen Bulow to be sure. Her mother's favorite, and truly quite as much of a society lady.

The significant dressmaker. That was Robert Kenny, a sure-enough Frenchman. Wee, wee, Monsieur.

The Villainess. And what a good one. Marian Maddock took the other characters breath's away. She told them just what to do and how to do it.

The detective was Martin Rahling who helped Pete with his troubles, and set Donald Stokes on the right path.

The hunchback was Francis Votriuba who coped with the villainess, in her crookedness.

Roy Gunderson was another star, in love with the society daughter, "and how."

The Juniors surely made an evening of it, and everyone enjoyed the entertainment.

Home Ec. Girls Co Crusading

The Home Economics Girls, with Miss Crofoot, went to Petoskey last Friday afternoon where they had an excellent time. True to their sex, they spent a great share of the time in shopping. Their trading tours did not, however, interfere with the appetizing dinner which they had ordered at the "Barbeque." Later in the evening they attended a talk.

GRADES

First Grade—The first grade have a new idea which worked out very well. They have created an atmosphere of butterflies and blue birds. These butterflies and birds are strung across the room by string which is not very visible. It makes the room very attractive.

Second Grade—The second grade are now making may flower baskets which are very attractive. We certainly would like one of them on our door.

Third Grade—The third grade have been busy making some very attractive posters of flowers and all that goes with the making of spring.

Fourth Grade—The pupils having "A" in spelling this week are: Jean Stroebel, Kathryn Kitman, Dorothy Sonnabend, Beatrice Justice, Leon Dunson, Billy Dunson.

In the contest the girls are ahead in spelling this week, but the boys are still ahead in arithmetic. Come on girls.

Sixth Grade—Those having 100% in arithmetic this month were: Lois Rude, Keith Bartlett, Barbara Stroebel, Phyllis Rogers, Charles Hart, Joyce Kamradt, Ruth Kamradt.

CONTESTS ON

There's a lot going on up to school this week, Band Contest, Commercial Contest, and everything. That is why the students are all going around with that worried care-worn look on their faces, looking as if they had lost their best friend.

But, they haven't lost their best friend, for in this case the friend happens to be Mr. Stick-To-It, and everyone who is a contestant is going to stick to the job until the last whistle blows. The Band members will go to Agn Arbor to compete in the State contest, and meanwhile, the Commercial girls will be warring with

typewriters and shorthand pencils, at Charlevoix. If the Band members win, they go on a trip to Europe, and if the Commercial students win, they go to Kalamazoo. Here's hoping everyone has the best of luck.

"CARRIE COMES TO COLLEGE"

"And we never knew that anything was sweeter."

Carrie surely is a sweet little co-ed, and her reception to the Bestax College is a warm one. She's an old-fashioned gingham gown girl, who is very thoughtful and unselfish, and who immediately wins the love of everyone she comes in contact with.

Then, there's Spencer, a collegian, who is very good-hearted, and well liked by everyone. He proves his strength of character in over-coming financial difficulties, even though everything seems to be against him. Of course he and Carrie are a very suitable couple.

Bobbie, a little spit-fire type of co-ed, has a great many quarrels with Tommy, a collegian, and, in fact, they get so used to quarreling with each other that they decide to keep it up through life. Of course, they really love each other very much, and therefore make a happy couple.

Porkey, a generous-hearted, stuttering chap who is always free with his purse, also comes in for his share of the humor. Then, there's Fred, another collegian, who is capable of making any audience roar with laughter. Ma Jenkins, of course, always keeps order at her boarding house and she is often very strict with her boys, although she loves all of her "children."

Other characters in the main cast carry out their parts almost to perfection—Madam Louise, Spencer's father, the Jew and his son, and, in addition, the girls who are in the dances know their steps very well. The main chorus will entertain also.

Proper Care for Spray

Hose Is of Importance

There are many years of service in a good spray hose if it is given proper care, but in many cases the hose is never thought of until it is needed. It is then often found to be useless because the rubber has become dry as a result of the hose hanging in a dry shed and when pressure is applied, the hose bursts, writes J. Marshall Porter in the American Fruit Grower Magazine. Also, a good hose is often out of use because mud bees have built in it.

It is a good idea when you have finished with the sprayer to take the hose off and run clean water through it to clean the spray material out thoroughly. Then make a small wooden plug for each end to keep the bees out, coil the hose into a small roll and hang in the cellar, where there is just enough moisture to keep the dry rot from destroying the rubber. It takes only a few minutes to do this, and one hose treated this way will outwear five that are left on the sprayer in the dry shed.

Sprays and Dusts Quite

Irritating to the Eyes

A few years ago self-bolled lime sulphur was the universal spray for peaches and Japanese plums. Today the dry-mix sulphur-lime spray and sulphur dust have largely replaced the self-bolled spray, says the Indiana Farmer's Guide. Self-bolled sulphur, even though it was messy and required a great deal of time to prepare and use, possessed one advantage over the newer materials. It caused no great discomfort to the user.

Both the dry-mix spray and sulphur dust are irritating to the eyes. It is not unusual for the user of either to suffer considerable pain unless goggles are worn, and goggles are an inconvenience to the operator, especially when spraying.

After one has used either dry mix or sulphur dust, he should before washing, scrub the eyelids and eyebrows lightly with a soft brush. After washing use sweet milk in the eyes. A small eyewash cup is necessary.

Horticultural Facts

The two factors which influence the size and vigor of a strawberry plant the most, consequently the yields, are food and water.

Cultivate strawberries as you would any garden crop, by keeping down weeds and loosening the soil about the plants.

The marketing of fruit has become a big, complex problem. It is now a world-wide business in active operation throughout the year.

Don't neglect spraying the orchard because you are afraid of spray residue. Better have sound fruit with residue on than no fruit or worthless fruit without.

Spraying rigs are somewhat of a big subject. A good one is as important as the right spray. It need not cost a great lot for a small orchard. But get one that will deliver the spray in fine mist. That's what does the work.

The cost of grafting is still a serious handicap to the method coming into practical use. Indications are, however, that cheaper methods will soon follow, and in the meantime, grape-growers are urged to give the method a trial on a small scale.

Men of Inventive Mind

Belong to All Nations

Answering an inquiry as to the names and nationalities of the inventors or discoverers of the steamship, locomotive, telephone, printing press, automobile, radio, airplanes, airship, electricity, electric light, television, the Detroit News says:

As many of these inventions are the results of years of development by numerous workers rather than of one inventor, we can give only the name of the inventor of the first practical device. Steamship, Robert Fulton, United States; locomotive, George Stephenson, English; telephone, Alexander Graham Bell, Scottish inventor living in America; printing press, attributed to Johann Gutenberg, German, though printing presses were probably used first in China centuries before; automobile, Carl Benz and Gottlieb Daimler, Germans; radio, Guglielmo Marconi, Italian (wireless telegraphy), Valdemar Poulsen, Danish, Dr. Lee De Forest, United States, and others; airplane, Orville and Wilbur Wright, United States; airship, Henri Giffard, French, A Santos-Dumont, Brazilian, and Count Ferdinand von Zeppelin, German; electric light (incandescent), Thomas A. Edison, United States, and Joseph W. Swan, English; television, John L. Baird, Scottish. No man can be considered the inventor or discoverer of electricity; some of its manifestations have been known since the time of the ancient Greeks.

Humble Leech Has Its

Use in Modern Medicine

An excellent remedy for black eye is a leech, says a writer in the London Mail. These funny little slate-colored slug-like creatures, which were once so extensively used by doctors for sucking blood from patients, can also suck the black blood from a discolored eye. In a recent fight in London one of the contestants received a terrific punch in the eye, which began to swell rapidly. A leech was bought for a few pence from a neighboring chemist and attached to the eye. The result was that the leech also began to swell rapidly and the congealed blood was drawn from the eye. Leeches, which generally live in streams, ponds, marshes or ditches, have two suckers, one at each end. Most people imagine that they were useful only in the old and more barbaric days of medicine, but a press association reporter found recently that they are still frequently used with great success.

Wonderful Organ

Before the completion of the Mormon tabernacle, in the early 60s, Joseph Ridges began to superintend the building of an organ for the temple. One hundred men were employed constantly in the construction. White pine from the hills around Earowan was used. The logs were hauled by oxen. Glue for the pipes was made from cattle hides and buffalo skins. The organ, was first rebuilt in 1885 by Johnson, again in 1900 by Kimball and in 1915 by Austin. It now is a combination of seven organs, the whole operated electrically from a movable console with four manuals or key-boards and 270 stops and couplers. There are 8,000 pipes.

Made Quite a Hit

A Budapest restaurant proprietor, Matthias Woldhut, hit on an original idea to celebrate the twenty-fifth anniversary of the opening of his restaurant. He announced that on that day the price of meals would be the same as 25 years ago. The bill of fare showed: Soup, 1d; boiled beef, with horseradish, 5d; roast veal, with rice, 8d; baked carp, 4d; roast pork and cabbage, 8d; beer, 3d a pint. At eleven o'clock in the morning every seat in the restaurant was occupied, and at noon it was necessary to summon the police to prevent a further inroad of customers.

Horse Judges Hoaxed

Brian G. Hughes, who died several years ago and who was known far and wide for his practical jokes, once entered a horse in a New York horse show under the name "Puldaka Orphan." The animal was from the Fifty-seventh street car barns and was just a great big horse, but it had gone through five elimination tests, and was one of 27 entries left when one of the judges began to think that the name of the Hughes entry sounded a bit suspiciously like "Pulled a car often," and the pride of the car barns was withdrawn.—Detroit News.

Some Wood Will Sink

The leaves of some trees turn red in autumn like the maples and sumacs, says Forests and Mankind. Others turn yellow like the ash and tulip tree. Some have leaves so gigantic they could be wrapped about one like a robe and other leaves that are hardly bigger than your fingernail. Some trees have wood so soft you can tear it apart in your hands and other wood so hard no nail can pierce it and so heavy it sinks in water like a stone.

Father Sage Says:

The people who always say what they think might take a few lessons from the people who think what they say.

DIPPING INTO SCIENCE

Clams

Indians taught the Pilgrims the food value of clams, the ones used by them being the quahog, or hard shell clam, and is found south of Cape Cod. The soft-shell clam is also famous as food. Both are quite small as compared to the giant clam, found on Pacific coral reefs, the shell of which may weigh 400 pounds.

An outspoken man is one whose wife has the say.

—"Why are you wearing so many coats on such a hot day?"

Mike (carrying paint can)—"I'm going to paint me fence, and it says on this can, 'To obtain best results, put on at least three coats.'"

"Pardon me, dear, but your stockings seem rather wrinkled."

"You brute, I have no stockings on."

"Do you ever take Mrs. Glump for a ride in your car?"

"No, with her jabbering in the back seat my wife couldn't keep her mind on my driving."

When a man gives another a piece of his mind there is sometimes the suspicion that the part is greater than the whole.

CAREFUL MOTHERS READ ABOUT IT.

"Coughs never last long in our family, for we use Foley's Honey and Tar," says Mrs. J. M. Hill, Homer, Ga. "Foley's Honey and Tar has never failed to take care of coughs and colds in our family, and we have used it over 20 years," says Mrs. Oranstein, Green Bay, Wis. Dependable always, no opiates, no chloroform, nothing that a careful mother hesitates to give her children. That's why mothers endorse Foley's Honey and Tar. Ask for it. There are just two kinds of people: Those who have sense, and those who speed up when you foot to pass.

DON'T STUB YOUR TOE!

One dark night—so the story goes—a certain monarch placed a large boulder in the middle of the road. Thousands of his people, thereafter, severely stubbed their toes or troubled to walk around. At length, one lusty youth—wiser than the rest—seized the stone and heaved it from its path. And where it had rested, he found a bag of gold.

Are you stubbing your toe?—Are you overlooking any bags of gold? How about the advertising in this paper? Do you read it—consistently? It is a bag of gold to many of our readers. In our columns you will find the advertisements of alert, progressive merchants and manufacturers who seek to tell you something they think you ought to know. This advertising is news about the very things that interest you most—articles that will save you money, lessen your work, or add materially to your comfort and well-being.

Thrifty men and women read advertising. To them it is a plain, every-day business proposition—a duty they owe themselves and their purses. It tells them where they can buy exactly what they want at a price they can afford to pay.

Advertising pays them. They make it pay.

IT WILL PAY YOU TOO. READ IT.
