EAST JORDAN, MICHIGAN, FRIDAY, JANUARY 16, 1931.

NUMBER 3

## Indoor Baseball Season To Open Monday Night

### FOUNDRY VS. MASONS START THE BALL ROLLING AT 7:30.

The latent spirit of Baseball, which of late has been showing signs of an awakening, will burst forth in flame once again next Monday night, Jan. 19th. A season of unusual interest is anticipated as the four teams which will comprise the league are much stronger than they were last year.

Those interested wish the general public to know that anyone interested in the game or anyone desiring to participate in the same, may become a member of the 'Indoor Association' by handing in his name and fifty cents (50c) to Lewis Ellis. This 50c is to be used in paying for the expenses of the Association which include a new playing screen for the Gym, base balls, bats, electric lights and janitor fees. As soon as this fund becomes depleted, a small additional assessment will have to be levied on the members. If the membership is large enough, further assessments probably will not be necessary.

A new net has already been installed and meets the approval of all. It is planned to have a meeting of all interested at promptly 7:00 o'clock Monday night for the election of officers and the discussion of by-laws, etc. Games will start promptly at 7:30 p. m., and will be of seven innings duration.

The games Monday night are East Jordan Iron Works vs. Masons, American Legion vs. K. P.'s. No admission will be charged except when outside teams such as Petoskey, Mancelona or Boyne City are played.

## FATHER AND SON BANQUET FEB'Y 11

At the meeting of the Men's Fellowship Club, of the Methodist Church, held last Tuesday night, plans were well under way for the Eleventh Annual Father and Son Banquet. The date this year will be Feb'y 11th, the speaker will be Dr. W. W. Whitehouse, dean of Albion College. The Club is to be congratulated in being fortunate in being able to secure such a speaker as Dr. Whitehouse, he is more than the average speaker for such occasions. He speaks in Petoskey for the Father and Son Banquet on Feb'y 10th, here for the 11th, and then on to Detroit to speak before a Father and Son Banquet, given under the auspices of the Masonic fraternity of that city.

There will be the usual number of tickets sold this year at the old price, \$1.00. The Ladies Aid Society of the M. E. Church will serve.

## ANNUAL REPORT OF LIBRARY

Following is the annual report of the East Jordan Public Library for 1930:

Number of days open	302
Number of visitors	24,971
Number of books loaned	14,531
Average number of visitors per day	83
Average number of books loaned per day	48
Number of books given to the Library	82

Library closed six days for repairs in June, 1930.

Proceedings of the Board of Supervisors, Charlevoix County, October session 1930, also reports concerning the State are on file at the Public Library.

Harriet Empey, Librarian.

## All-Around Indian Star

This accomplished all-around redskin athlete of the Inskell Indian Institute is regarded by many as the logical successor to Jim Thorpe, world famed Carlisle redskin athlete of an other generation. This new star is Wilson "Buster" Charles, full-blooded Oneida Indian, who not only won the national decaathlon championship of the Amateur Athletic Union of Pitts burgh last year, but is a shining light at baseball and basketball.

## RED CROSS APPEALS FOR DROUTH SUFFERERS

The following telegram was received this week by Mrs. J. M. Harris of Boyne City, acting chairman of the Charlevoix County Chapter, American Red Cross:

St. Louis, Mo., Jan. 12, 1931

Greatly increased demands during last ten days have made imperative immediate campaign for Red Cross relief fund to meet emergency situation in parts of 21 States in drouth stricken area. Minimum ten million dollars needed to prevent untold suffering and actual starvation of thousands of families. Pollution water supply caused by dying cattle added to winter hardships in some sections. President Hoover in proclamation will urge immediate and generous response. Confident your people will not fail to meet their share of this humanitarian need but because of general conditions we desire to impress you with the necessity of a most vigorous possible campaign.

The success of our efforts will be regarded as test of Red Cross by President and entire nation and we must not fail. Your Chapter quota is \$300.00. Report action taken.

Wm. M. Baxter, Jr.

As will be noted, Charlevoix County's quota is \$300.00. The two Banks of East Jordan will receive contributions to this worthy fund and forward same to the proper officials.

## TWO BANKS OF EAST JORDAN HOLD ANNUAL MEETINGS

East Jordan's two Banks held their annual meeting, Tuesday, Jan. 13th. Both financial institutions re-elected their 1930 staff of Officers, and Directors, as follows:

**State Bank of East Jordan**

President—W. P. Porter  
Vice President—Fred Smith  
Cashier—R. A. Campbell  
Ass't Cashier—L. W. Ellis  
Teller—Alberta Nowland  
Directors—W. P. Porter, H. P. Porter, C. H. Pray, George Carr, Fred Smith, W. E. Malpass, R. A. Campbell.

**Peoples State Savings Bank**

President—W. A. Stroebel  
Vice President—Roscoe Mackey  
Vice President—R. O. Bisbee  
Cashier—W. G. Cornett  
Ass't Cashier—L. G. Cornett  
Teller—Agnes Kenny  
Directors—Dr. W. H. Parks, John Porter, Roscoe Mackey, C. H. Whittington, S. E. Rogers, W. A. Stroebel.

Jackson—The inmate population of the Michigan State Prison was 5,087, a net increase of 669 over the population of 4,418 on Jan. 1, 1930. The total number of commitments during the year was 2,827, offset by 2,158 releases.

Muskegon—Muskegon experienced the lowest fire loss in 16 years in 1930, it being \$38,000, or 79 cents per capita; Muskegon's fire loss has shown a steady decrease since 1921, when a fire prevention bureau was established.

Big Rapids—Francis Bushaw, who said he was 109 years old, died here following a paralytic stroke. He was born in Marysville, St. Clair County, and after many years in Canada returned to the United States and settled in Mecosta County during the Civil War.

Port Huron—Chamber of Commerce officials have received a message from Rep. Louis C. Cramton that the Government is considering Port Huron as a site for a Federal prison. The Chamber of Commerce will meet to decide whether the city wants a Federal prison near here.

Ionia—One woman is dead and three others are recovering of injuries suffered when their automobile careened into a tree, when a tire blew out, 18 miles from here. The dead woman is Mrs. Andrew Waltz, 69, of Grand Rapids. Her husband, a daughter and a son were injured.

Lansing—Gov. Brucker will retain the office in the Commerce Building, Detroit, which was used by Gov. Green, he said here. His plan is to spend one day a week in Detroit. Mrs. Florence Babbitt, who was Gov. Green's secretary in Detroit, will serve Gov. Brucker in the same capacity.

Kalamazoo—Provision for the care of her dog and her cats as long as they live was made by Mrs. Rebecca B. Cooper, of Schoolcraft, whose will was admitted to probate. It also provides for a fountain to be placed in the Schoolcraft cemetery at a cost of \$5,000, which shall furnish a place where birds and small animals may drink. The value of the estate is estimated at \$24,000.

## M-66 To Be Completed

### STATE OFFICIALS AUTHORIZE WORK NORTH OF MANCELONA.

At its first meeting under the new administration, January 12th, the administrative board road committee, consisting of Grover C. Dillman, Chairman; Frank D. Fitzgerald, Secretary of State; and Paul W. Voorheis, Attorney General, authorized the construction of several projects, among them, 8.5 miles of gravel on M-66, north of Mancelona in Antrim County.

Mr. Dillman is a new man on this important committee, having been appointed chairman of that body by Governor Brucker, to succeed State Treasurer, Howard Lawrence.

The East Jordan Chamber of Commerce has been working hard for a number of years, first to secure the location of M-66 from Mancelona to Charlevoix, through East Jordan and, since it's accomplishment, to secure proper improvement of the road bed.

The work, just authorized by Mr. Dillman, will connect with parts already improved, thus providing a good gravel road from Mancelona to East Jordan.

Proper marking, at the points where M-66 diverges from other trunk lines, together with a consistent series of advertisements along these routes, will induce many tourists to drive through this attractive region opened to them by this newly improved highway.

From the time the traveller enters the valley of the Cedar River, an ever-changing panorama unrolls before him.

Hills and plains, deep forests of evergreen, the lacy canopy of maples, turning to golden flame in the autumn season, the clear sparkling waters of Green River which is crossed a number of times, the famed, trout-inhabited Jordan River whose valley is followed for many miles until the road crosses it where it widens into the beautiful South Arm of Lake Charlevoix, whose wooded shores are rapidly being lined with charming summer homes.

Since an "all the year around" open highway has become an accomplished fact, many of these summer residents are building homes, substantial and warm enough to make them available for use during the carnival of winter sports, sponsored by the towns throughout this region. A new Club House was erected on the Jordan River during the past summer, and with M-66 completed, more will be built.

The rapid growth of the Canning industry will receive fresh impetus in the improved marketing advantages of a good road. All in all, East Jordan should give to Mr. Dillman and his committee, a rousing vote of thanks for the service they have rendered.

## QUICKLY STOPS DREADED COUGHING.

Coughing won't bother you this winter if you take genuine Foley's Honey and Tar Compound. Whether your cough results from a cold, irritated bronchial tubes, tickling throat, or a constant nervous hacking, each dose carries its curative balsamic virtues into direct contact with the irritated throat and air passages, giving instant relief. Sedative, without opiate or harmful chloroform, mildly laxative, acceptable to a sensitive stomach. Dependable and effective alike for children and grown persons. Over 100,000,000 bottles sold. Ask for Foley's, Family size, a real thrift buy. Sold by Hite's Drug Store. adv.

## 350 Farmers Are Members

### NEW CO-OPERATIVE CREAMERY GAINING HEADWAY.

Very satisfactory progress is being made in preliminary plans for the organization of a large Co-operative Creamery to serve both Antrim and Charlevoix Counties. At the present time fully 350 farmers have signed membership agreements. The work is being carried on by a fine and loyal group of solicitors in all the townships in the area. No rash promises are being made. No impossible statements have been uttered. Everyone seems to be highly interested.

The Creamery expects to establish cream routes in all heavy dairy centers to gather the fresh cream direct from the farms. High quality cream is a necessity if premiums for the 92 score butter is possible. As a result of a very recent meeting it is planned to have five sub-stations co-operate with the Co-operative Creamery. These sub-stations no doubt will service their own patrons, and the truck from the Creamery will gather the cream from each of these stations. Several local meetings have been held in various sections of the county. It is expected that the Creamery will handle over 300,000 pounds of butter fat the first year, as a result of co-operating with five highly successful Co-operative and independently owned institutions already operating.

Farmers, this is the biggest activity presented in years for your consideration. Consider it well. Learn all the details pertaining to its organization and what it can do.

REMEMBER THIS: If nothing is done about it you will continue to receive from 3 cents to 7 cents less for every pound of butterfat you sell for years to come, than other sections in the State are receiving. Or you can invest \$20.00 in a Co-operative Creamery and get from 3 cents to 7 cents more a pound for butterfat than you get at the present time.

WHICH COURSE OF ACTION DO YOU WISH TO FOLLOW?  
B. C. MELLENCAMP,  
Charlevoix County Agr'l Agent.

## DOROTHY WALTON MARRIED AT FLINT TO WM. B. POND

A very pretty wedding was solemnized New Year's eve, uniting Miss Dorothy Walton, daughter of Mr. and Mrs. Freeman Walton of Flint, to William B. Pond, son of Mr. and Mrs. A. L. Pond of Fairland, Indiana.

The ceremony took place at the home of the bride's parents at 114 Green St. The room was decorated with palms and ferns and tall candelabras. Rev. Little John of the Central Methodist Church officiated. Miss Margaret Bowen of Lansing, a girlhood pal of the bride, acted as bridesmaid, while Omer Lewis of Pontiac acted as best man.

The bride was lovely in an Ivory satin gown, fashioned on Grecian lines, and wore a veil which was caught on each side of the head with orange blossoms, and carried a beautiful shower bouquet of cream roses and freesias. Her bridesmaid was gowned in coral chiffon and carried flowers which matched her gown. Mrs. Melvin Pike of Ann Arbor, a cousin of the bride, sang "I Love You Truly," preceding the ceremony.

After the ceremony, dinner was served to sixteen guests including the immediate family of the bride.

Mr. and Mrs. Pond will be "At Home" at 329 W. Hamilton Ave., Flint, Mich.

Trifles make perfection, but perfection is no trifle.

## MISS L. B. CURTIS WILL SPEAK TO PTA WEDNESDAY, JAN. 21

Miss Lera B. Curtis, Assistant Physical Training Director of the State Department, Lansing, Michigan will be in East Jordan, Wednesday afternoon, January 21 to speak to the Parent Teachers Association.

Nothing is much more important than physical training of the boys and girls, and in as much as we are not, at the present, able to have a regular physical training teacher, Miss Curtis will be able to make many valuable suggestions to the Parents and Teachers. It will be to the interest of the parents to be at the above meeting.

The above mentioned meeting is a special one of the Association. Largely for the reason to get a person of Miss Curtis' standing the date had to be set to suit her convenience.

## JOHN M. MILES DIES SUDDENLY FROM STROKE

John Melvin Miles passed away at his home in this city, Monday, Jan. 12th, 1931, having suffered a paralytic stroke the day before.

Mr. Miles was born at Toronto, Ont., in 1863, and came with his parents, George and Margaret Miles, to Michigan in 1868, locating in Sanilac County. He came to East Jordan in 1884. He was united in marriage to Daisy Maude Barnard at Mancelona, Mich., in 1900. Mrs. Miles passed away June 19, 1930.

Deceased is survived by the following sons and daughters:—Paul Miles of Sault Ste Marie, Mich., Mrs. Beatrice Woodward of Newaygo; Mrs. Georgia Sloop and Lloyd Miles of East Jordan, and Irene Miles of Howell. Also a sister, Mrs. Samuel Ramsey of East Jordan.

Funeral services were held from his late home, Thursday afternoon, Jan. 15th, conducted by Elder L. Dudley, pastor of the L. D. S. Church. Interment at Sunset Hill.

## MRS. B. M. HERTEL DIED AT MEMPHIS, TENN.

Word has been received here of the death Sunday, January 4th, of Mrs. Blanche M. Hertel, widow of John M. Hertel, former manager of the Toledo Blade.

Mrs. Hertel died at the home of her daughter, Mrs. Dan W. James, at Memphis, Tenn.

Besides the daughter at whose home she died, Mrs. Hertel is survived by a granddaughter, Joan Elizabeth James, of Memphis; four sisters, Luella Boosinger, Toledo; Eugenia Boosinger, San Diego, Calif.; and Mrs. Harris E. Thomas, and Mrs. W. Asa Loveday of Lansing; one brother, Fred E. Boosinger of Cleveland, O. Funeral services were held Wednesday afternoon, Jan. 7th at the Collingwood Memorial Funeral Home, Toledo.—Lansing, Mich., State Journal.

## "OPEN HOUSE" AT P. T. A. MEETING THURSDAY, FEB. 12

Regular meeting of P. T. A. was held on Thursday, Jan. 8th, 1931.

Meeting was called to order by the President, Mrs. G. W. Bechtold, who introduced the Glee Club, led by Miss Clark, who gave two numbers which were enjoyed. Several suggestions were made and discussed of interest to parents, teachers and children. Refreshments were served at the close of the meeting by the teachers of the Grade Building.

The next meeting will be held on Thursday, February 12th with open house, commencing at 6:30 standard and continuing until 7:45, then there will be a program in the Auditorium in charge of the fathers.

Sometime in March the P. T. A. will have the movie—"Tom Sawyer and Huckleberry Finn."

The membership drive is still under way and we would be very happy to still retain the banner which we received last year for having the largest enrollment. This can only be done by the co-operation of everyone in joining the P. T. A.

Alice M. Smatts, Sec'y

Mr. Painter; "An officer arrested a man whose face he remembered for twenty years. Wasn't that a remarkable memory?"  
Mrs. Painter: "No; I'd say it was a remarkable face."

Al: "I am burning with love for you."  
Grace: "Oh, don't make a fuel of yourself!"

## Annual Meeting of Potato Show

### AT GAYLORD COURT HOUSE, TUESDAY, JAN. 20.

The annual meeting of the Top O' Michigan Potato Association will be held in the Gaylord Courthouse on Tuesday afternoon, January 20th, at 1:30 o'clock, standard time. The report of last year's Potato Show will be given by Secretary B. C. Mellenkamp, along with the financial report by Treasurer F. W. Dilworth. Officers and Directors for the new year will be elected.

Plans of a bigger and better Show in 1931 will be discussed. Year by year the Show has prospered and enlarged until today it is a vital agricultural force in the activities of Northern Michigan. Starting out in 1922 in a very small way with only four counties contributing, and with only potato entries competing, it has grown until today we have twelve counties financing the Show, and exhibiting not only potatoes but apples, and last year alfalfa seed for the first time. Many believe a new grain department should be placed in the premium books for another year.

This last year in spite of the adverse conditions a fine financial statement can be boasted.

A cordial invitation is extended to all business men and farmers to meet with the Directors and Officers and help formulate plans for a bigger and better Show for 1931.

B. C. MELLENCAMP,  
Sec'y Top O' Michigan  
Potato Show Association

## Honey In Northern Mich.

### THIS REGION OFFERS APIARIANS MANY ADVANTAGES.

A recent survey along apiarian lines, in the vicinity of East Jordan has revealed the wonderful natural advantages of this region for the production of a superior quality of honey and the extent to which the industry has grown.

The thousands of acres of cut-over lands in this part of the country furnish an abundance of nectar-bearing flowers, including the lavender spikes of the willow weed which makes of every swamp a thing of beauty, the purple milk weed whose cloying fragrance scents every hill and roadside, and the wild red raspberry, easily the peer, in delicacy of flavor, of any of its cultivated cousins.

Honey derived from these sources is marketed chiefly in bottled form because of its rare quality.

Increased acreage in the various clovers and alfalfa supply large amounts of nectar for this old favorite variety, while, for the darker honeys, the goldenrod, in the face of condemnation of its pollen by hay fever specialists, justifies its existence by producing a honey of rich color and distinctive flavor. The buckwheat fields supply a dark product for those who relish a strongly flavored honey.

Within a radius of twenty-five miles are to be found approximately 4000 colonies in seven apiaries and in addition to these, there are numerous smaller groups.

While the greater amount of honey is extracted, there is a growing demand for comb honey. This, naturally commands a much higher price since the bees have to spend time making comb which, under the extraction process, would be spent in gathering and storing nectar.

A slight idea of the extent of the industry in this vicinity may be gained from the following figures.

During the past season there was approximately twenty-five carloads, or over 700,000 pounds of honey produced from this area, with a total value of \$60,000 and in addition to this, about 7,000 pounds of bees wax, yet the demand for honey, both to be used in the preparation of food and as a table delicacy, is far in excess of the supply.

It is strange more people do, not take up this line of work, as there is so little expense involved, compared to returns on the investment.

An intelligent study of the subject, followed by strict attention to details (rules which apply to any line of work) cannot fail, in this favored locality, to bring good financial returns.

L. R.

## TO WHOM IT MAY CONCERN

I wish to warn certain parties not to haul, sell or except our food or farm implements without my consent. Also I will not be responsible for any debts charged to me.

ANTHONY REBEC

**Charlevoix County Herald**

Member National Editorial Ass'n.

Entered at the Postoffice at East Jordan, Michigan, as second class mail matter.

**PENINSULA**

(Edited by Mrs. E. Hayden)

Mr. and Mrs. David Gaunt and Mr. and Mrs. Ralph Gaunt and daughter were dinner guests of Mr. and Mrs. Joe Gaunt, at the Meggison farm, Friday.

Between 40 and 50 gathered at the Three Bells schoolhouse Saturday evening and had a jolly time and pot luck supper.

A salesman from the Monroe Nurseries was on the Peninsula Friday, taking orders for fruit trees.

Mrs. Alfreda Arnott of Lone Ash farm is caring for her aunt, Mrs. Elmer Faust and the little new daughter, at Mountain Ash farm.

Mr. and Mrs. Ray Loomis and family, and Mrs. Caroline Loomis of Gravel Hill called on the F. D. Russell family at Ridgeway farms, Sunday.

Mrs. Caroline Loomis visited in Boyne City from Thursday to Saturday.

Mr. and Mrs. Will Gaunt and family of Knoll Krest, and Mr. and Mrs. Robert Myers were Sunday dinner guests at the David Gaunt home.

Francis Boyington, who has been working at A. B. Nicloy's for some time, went to his home in Boyne City Saturday, and planned to go back to Detroit, but changed his mind at the last minute.

Miss Alice Russell of Ridgeway farm spent Wednesday night with her brother, Richard Russell and family at Breezy Point.

Robert Hayden of Orchard Hill spent Wednesday night in East Jordan with George Woerful and they attended the Basketball game.

Mr. and Mrs. George Hanson of Ironton were dinner guests of Mr. and Mrs. D. D. Tibbits at Cherry Hill Friday.

The Ladies Aid of the Free Methodist Church of Boyne City plan to meet with Mrs. D. D. Tibbits this week Wednesday.

Joe Kenny of the Northern Dairy Produce Co., of East Jordan purchased a truck load of veal calves of F. D. Russell, Monday.

Mrs. A. Reich of Lene Ash farm called on her sister, Mrs. Elmer Faust and little new daughter at Mountain Ash farm, Thursday.

Miss Lucy Reich was absent from school Thursday and Friday on account of illness.

A. B. Nicloy had a crew of men buzzing wood, Tuesday.

Orval Bennett of Honey Slope farm had a crew of men buzzing wood Tuesday with A. B. Nicloy's tractor, and while running, the radiator froze up and busted which put a stop to operations for a day or two. The job was finished Friday.

Mrs. Mable A. Hanson, Eveline Township treasurer was at the Advance store Friday to receive taxes. Quite a number paid their taxes.

Lake Charlevoix froze over Tuesday night and is as clear and smooth as a looking glass, which condition happens but rarely, but surely is a wonderful sight when it does happen.

January is more than a third gone and no storm since Dec. 31, but our January thaw is with us on a very modest scale.

Wednesday-morning was the coldest yet this winter.

**WILSON TOWNSHIP**

(Edited by Mrs. C. M. Nowland)

Wilson Grange met Thursday at the home of Mr. and Mrs. Ed. Nowland, the Steward and Chaplain. After a bountiful dinner at noon, a regular business session and lectures program was held. As the roads are good, it was decided to hold the next meeting at the Wilson Grange Hall at the usual time, Saturday, Jan. 24. Mr. and Mrs. Victor Peck spent Saturday evening at the home of Mr. and Mrs. Harlow Sweet of Advance.

Mrs. Albert Nowland spent the week end with her daughter, Mrs. Darius Shaw of Rock Elm.

Tom Shepard spent the week end with his brother, Stephen and wife, near East Jordan.

Mr. and Mrs. Roland Bowen and daughter of East Jordan were Sunday dinner guests of her grandparents, Mr. and Mrs. E. L. Nowland.

Charles Riedle, Henry Korhase, Eugene Kurchinski, and the Behling Brothers attended the citizens meeting and banquet at the Wolverine Hotel, Boyne City, Tuesday evening, Jan. 6th.

Miss Glenna Vrondran has been seriously ill with a cold.

Mr. and Mrs. Charles Shepard visited his mother and sister, Mrs. Anna Shepard, and Mr. and Mrs. Charles Stanek of Jordan Twp., Sunday, Jan. 5th.

Mr. and Mrs. Charles Janack and children of Boyne City were Sunday dinner guests of Mr. and Mrs. Albert St. John.

John Martin Jr., returned to Detroit, Friday, after a visit over the holidays with his parents, Mr. and Mrs. John Martin Sr., and other relatives.

Mrs. E. G. Kurchinski and baby Gladys Ann, visited Mrs. W. H. Davis and daughter, Mrs. Jack Waddell of Boyne City Friday evening.

Mr. and Mrs. Dell Underhill and son, Billy, of Boyne City were Sunday dinner guests of Mr. and Mrs. Charles Hott.

Mr. and Mrs. Bert Price of Rockland, U. P., on their way to Texas, stopped for a visit with her parents, Mr. and Mrs. Joel Sutton and other relatives.

Mr. and Mrs. Ray Nowland spent Saturday evening at the home of Mr. and Mrs. Milo Clute.

Mr. and Mrs. Will Korhase and children, and his mother, Mrs. Louise Korhase were Sunday visitors of the latter's sister, Mrs. Charles Shedina of East Jordan.

Mr. and Mrs. Will Kurtz and baby of Boyne City spent Sunday with his parents, Mr. and Mrs. Fred Kurtz Sr.

Little Florence Deming, about 3 or 4 years old, was very ill last week with threatened pneumonia. Through the timely care of Miss Caroline Gekens, the Boyne City school nurse, it was headed off, Saturday.

Mrs. Bert Lumley and children and Miss Sidney Lumley visited Mrs. Fred Morton last Thursday afternoon.

Mr. and Mrs. Elmer Bronnell and daughter of Boyne City spent Wednesday evening at the home of Mr. and Mrs. Leonard Dow.

Mrs. Clara Slaughter is home, after a few weeks caring for Mrs. H. Ensign of East Jordan.

The Home Management Club met with Mrs. Gertie Behling Thursday afternoon. Plans for future meetings were discussed, lunch was served. Six ladies were present.

Mr. and Mrs. Burton Brooks and children, and his sister, Miss Edna Brooks of Bay Springs skated across the lake and spent Sunday at the home of Mrs. Brook's parents, Mr. and Mrs. L. Dow.

**JORDAN TOWNSHIP**

Mrs. Pearl Stanek spent a few days last week in Elmira visiting relatives and friends.

Ernest Raymond left Saturday for a visit with his brother, Will and wife of Detroit.

The Kotalik Brothers were Saturday evening callers at the home of Albert Chanda.

The five children of John Johnson have recovered from a seige of the measles.

Miss Mary Rebec and Miss Mary Stanek are spending a few months at their homes, having worked at Petoskey all summer.

Mr. and Mrs. DeWitt Williams and son, Forrest, were Sunday afternoon visitors at the Eugene Raymond home.

Elwood and Janette, children of Mr. and Mrs. Zell Bricker of Maple Slope farm have had the measles.

Joseph Martinek is working for Francis Nemecek.

Rev. and Mrs. Peter Holton and son of Boyne City, and Mrs. Holton's sister, Miss Wilcox of the Soo, were Tuesday evening guests of Mr. and Mrs. Eugene Raymond.

Mr. and Mrs. Peter Stanek spent Sunday evening at the home of his brother, Mr. and Mrs. Frank Stanek Jr.

Eugene Raymond was a caller Monday at the home of Ernest Schultz.

Mrs. Anna Stanek visited Mrs. Albert Todd Thursday afternoon.

Maple Slope school started Monday after three weeks or more vacation, because most of the children had the measles.

Office Boy: "There's a salesman outside with a mustache."  
Boss: "Tell him I have a mustache."

**AFTON**

(Edited by Mrs. Henry Timmer)

Mr. and Mrs. Ed. Weldy and children spent Sunday at Charlevoix at the Ed. Cook home.

Guests Sunday at the John Vrondran home were Mr. and Mrs. A. J. Weldy, and Mr. and Mrs. L. Henderson and family.

Mr. and Mrs. G. R. Price spent the week end with her parents, Mr. and Mrs. J. L. Sutton. They left Monday for a short stay at Traverse City, after which they intend to motor to Florida and Texas.

School children in this township were examined this week for defects, as provided for by the Couzen's fund for medical examination of rural children.

Deer Lake Grange Glee Club met with Herman Barber Wednesday evening, with seven new members. Next week the place of meeting is at the Grange Hall, Wednesday, Jan. 21st.

Miss Christabel Sutton was able to return to Boyne City for examinations this week.

Mr. and Mrs. Bert Lumley visited Mrs. Fred Morton, Thursday.

Mrs. Chas. Shepard and mother, Mrs. Robert Davis were Petoskey shoppers, Monday.

Chas. Parks has moved his family to the tenant house on Silver Leaf Farm.

Afton Grange met last week Thursday at Albert Nowlands, with a pot luck dinner.

**MODERN COW THIEF USES MOTOR TRUCK**

**South Dakota Ranchers Report Heavy Losses.**

Sioux Falls, S. D.—Western films which depict cattle rustlers riding at breakneck speed on fleet-footed ponies as they round up the herds which they plan driving off will have to be revised to meet modern conditions. The modern cattle thief does not ride a horse. The modern truck has been substituted for the broncho in cattle rustling operations of the present day.

Some of the cattle thieves who operate in thinly settled districts in northwestern South Dakota, near the Wyoming and Montana boundary, lines, are said to have fleets of trucks, which they operate at night, and which have sufficient capacity to enable them to transport from 20 to 40 or 50 cattle or calves at a single trip.

**Best Animals Taken.**  
It was such rustlers who raided the herds of R. C. Morsman, rancher living northeast of Eagle Butte. He had 25 calves taken from a feed lot in one night. The same rustlers, with their fleet of trucks, may have been responsible for a raid on the cattle range of Hansley & Star, south of Lantry, for between dark and daylight 25 head of steers disappeared from their herds.

The animals had evidently been carefully "cut" from the herd, as only choice animals in good flesh were taken, scrubs and lean cattle not being molested. It is believed the cattle are taken by truck to some distant market and sold by the thieves to persons who have no suspicion that they have been stolen.

Matthew Tiernan, rancher in the Cheyenne river district, had 20 head of his cattle carried away by the truck-equipped rustlers. Dick Richardson, another rancher, lost 16 head of cattle, while W. H. Crowley had 25 head taken.

**Losses Are Heavy.**  
It is agreed by ranchers that operating as they do under modern conditions, and with swift trucks in which to carry away the stolen animals, the rustlers are causing cattle owners heavier losses than were caused big cattle men during the days of the great cattle ranges of western South Dakota. In those days, with rustlers operating with bronchos, they were satisfied in most instances with a "kill" of 12 or 15 cattle at a single raid.

"The losses sustained in the aggregate," said E. G. Wilkinson, prominent rancher of northwestern South Dakota and president of the Western South Dakota Stockmen's Protective association, "constitute the heaviest tax that the individual sufferers pay—but it is a crime tax which only criminals collect and profit by."

"A specialized police force constabulary, trained in detection of cattle thieves, as well as horses, poultry and other farm produce thieves, is needed in this sparsely settled west-river territory, where distance from point to point handicaps local peace officers in their work."

Muskegon — Harry McKinney, 20-year-old college student, arrived at his home in Chicago recently bringing to an end a vacation spent riding and pushing his bicycle over ice and snow-covered highways on a sight-seeing tour of Michigan. McKinney started the trip with \$9.12. The first two nights on his trip north he slept in the open, then decided to seek shelter in jails. He went as far north as Petoskey.

Flint—Flint taxpayers are paying approximately \$400 a day to provide malt, bottles, caps, cigarets, and in some cases money, to persons obtaining aid from the city according to a communication sent to the city commission. The communication is said to be supported by testimony of a police detective who took orders on the poor fund to five stores and obtained material to make home brew, it is reported.

**Delay Planting Various Seeds**

**Six to Eight Weeks Ahead of Time Is Favored for Many Crops.**

It is a mistake to start vegetable plants too soon. Six to eight weeks ahead of the time of setting the plants in the field is long enough, says Prof. J. E. Knott of Cornell university. The plants will do better and maintain a good steady growth if started later, and have a slight check for hardening before they are set in the field.

**Best Starting Soil.**  
A good soil in which to plant seed is a mixture of one part each of sand, loam and rotted manure. When plants are transplanted later in their development, a greater proportion of loam can be used.

Plants are better distributed if the seed is sown in furrows one-fourth to one-half inch wide rather than in the customary V-shaped furrow.

As soon as the seedlings show the first true leaf they may be transplanted to a wider spacing. When larger plants are moved, the check in growth caused by transplanting is more pronounced. Transplanting is done only as a means of providing greater space for the plant to develop, says Professor Knott. After transplanting, as soon as the growth slows down or a yellowish color is noticed, the plants should be watered with a solution of one ounce of nitrate of soda to a gallon of water. One treatment will ordinarily be enough, he says.

**Water Plants Under Glass.**  
It is best to water plants under glass when the temperature is rising. They should be soaked well and not receive more water until they need it, which may not be every day. On sunny days they may need a second watering. The plants should be dry when night comes. Damping off, or the dying of the seedlings at the surface of the ground, is a serious cause of loss in plant beds. Even if the soil is sterilized it is often desirable to water the plants with a solution of organic mercury. This, and care in ventilation, will control damping off.

Cool season crops should be kept at a temperature of 50 to 60 degrees Fahrenheit during the day and warm season crops at 60 to 70 degrees. The night temperatures may be somewhat lower. By gradually subjecting the plants to lower temperatures, or by withholding water the plants can be hardened before they are shifted to the field. Lower temperatures will induce seed-stalk formation in celery so the proper method with this vegetable is to withhold water to harden the plants.

**Air Treatment Favored as Milk Fever Remedy**

Dr. W. L. Boyd, Minnesota experiment station, has discovered a new treatment for milk fever. This disease at one time took a heavy toll of cows freshening in high condition. Since the discovery of the air treatment it has not been so seriously regarded. The air treatment is easy to give and almost 100 per cent effective. Occasionally, however, inflammation of the udder follows the infusion process and there is also a drop in milk production. The new treatment is not open to these objections. It consists of the intravenous injection of calcium chloride. Because of the method of injection, the treatment can be administered only by veterinarians, but it has been well tested and proven effective. Doctor Boyd does not anticipate that his treatment will quickly become popular because of the general satisfaction with the air treatment.

**Increased Yields Made Without Extra Expense**

Early plowing and careful preparation of the seedbed was responsible for the largest yield of wheat last year on the Ohio agricultural experiment fields, according to M. A. Bachtel, in charge of the work.

With the low price of wheat facing farmers who expect to sow wheat, they may not expect to increase their yields much by the use of fertilizers due to cost, but early plowing and seedbed preparation do not cost extra money and may account for several bushels per acre in yield, Bachtel suggests.

On the field where the best yield, 35 bushels, was obtained last year a similar field beside it yielded less grain per acre in spite of the fact that the latter field had sweet clover plowed under ahead of the crop, but where soil was not as well prepared.

**Arguments in Favor of Proper Breeding Stock**

One of the best arguments in favor of good breeding stock of any kind is low prices, not low prices of breeding stock, but of our marketable products such as beef, pork, mutton, eggs and milk. This is because the market price alone does not determine our margin of profit, but rather the spread between cost of production and the selling price. Therefore when the market price drops there must likewise be a drop in cost of production, else we shall sustain a corresponding loss in profit. Yet we cannot lower the production cost by skimping on feed. Animals must be fed a sufficient amount of feed to produce a surplus, because it is from the surplus that we make our profit. The only way we can lower that cost is by increasing the capacity of our animals, which can only be done by good breeding.

**MILK RULES ARE BASED ON HEALTH**

**States Are Now Seeking the Same Level for Butterfat.**

That the rules for health are becoming standardized throughout the nation and they are becoming more uniform in the respective states is indicated by figures compiled from the latest government reports by the Holstein-Friesian Association of America and put in a condensed summary of "A Few Facts to Be Considered in Drafting a Milk Ordinance or Milk Regulations."

They show that 44 states have their own regulations in regard to the butterfat and total solids content sold as whole milk and that five use the federal regulations in this regard. Forty two states now have fat requirements of 3.25 per cent or less, compared to 39 states in 1928. One has a fat requirement of 3.3 per cent, two require 3.35 per cent, and four require 3.50 per cent. Since 1928, three more states have found it advisable to change the requirement from 3.50 to 3.25 per cent. No state requires 4 per cent fat and the federal score card no longer requires 4 per cent fat in order to have a "perfect" milk.

Chicago and New York recently considered the advisability of requiring the high fat standard of 3.5 per cent fat in whole milk but decided that 3.25 per cent was a better requirement. Doctors generally oppose a high fat requirement, especially for children and invalids, and some advocate 2 per cent fat in milk as more satisfactory for children. Commercial milk companies have discovered this same fact on their milk routes as they find that more butterfat (and consequently more milk) will be used by their patrons when the fat content more nearly approaches that of mother's milk which is comparable in fat content to that of the average cow.

**Clean Utensils Assist in High Grade Cream**

(By JAMES W. LINN, Extension Dairyman, Kansas State Agricultural College.)  
Past experience shows that it is impossible to make a truly high grade butter from butterfat that has come from frozen cream. It is not uncommon for cream to set on the floor of the kitchen or some other room and be a long time in cooling. Such a practice is no more desirable in the winter than in the summer nor is it best to add warm cream to cool cream or to older cream without first cooling the new cream.

For most profitable results recommendations call for clean utensils as soon as the milk comes in contact with them it will not be contaminated. The dairyman who is after high grade cream in the winter will pay attention to the cleanliness of his cows' clean stalls, clipping of the hair on the udder and right flank so that it will not retain the dirt and filth, and removal of loose particles of dirt with a darning brush or sponge will help in securing quality cream.

**Salt and Mineral Cups Increase Production**

Salt and mineral cups, which are a rather new piece of barn equipment, have been responsible for increased milk flow. These cups are used in connection with automatic drinking bowls, and attach to the stanchion within convenient reach of the cows. Besides supplying needed mineral food for milk production, constant access to salt also stimulates thirst and results in consumption of greater quantities of water. Many dairymen find that the definite increase in milk flow will pay for the cost of the cups in about two months time.

Much investigation has been made to determine the best design and shape of salt cups. It has been found that cows will waste much of the mineral if the containers are shallow and wide topped. Consequently the tendency is to make the cups with rather narrow openings so that the cow can reach the salt with her tongue only.

**Cattle Abortion Can Be Completely Eradicated**

The complete eradication of abortion disease from cattle herds is possible, and would mean stopping a serious source of loss to the dairymen according to Dr. H. J. Metzger of the New York State College of Agriculture, who recommends the blood test and the isolation of infected animals as a means of stamping out the disease.

These measures are complete isolation of the diseased animal, complete cleanliness, the rearing of all animals on the farm to keep from re-infecting a clean herd. A more complete discussion is given in a new bulletin, just written by Doctor Metzger and published by the college, which will be sent free of charge to anyone who will write to the college of agriculture at Ithaca and ask for bulletin B 182.

**Give Calf Chance**

Young calves are quite susceptible to certain infections, as also to indigestion brought about by improper feeding. It is one thing to bring a cow safely through calving and another thing to bring her calf safely through the first few weeks of its life. Young calves should be born in clean places. It is too much to expect good results with calves born in places teeming with the cause of infections. Navel infection is a frequent cause of digestive disturbance.

**PLEASANT HILL**

(Edited by Anson Hayward)

Anson Hayward butchered a beef last week, and his neighbors took part of it.

Ernest Lanway and Geo. Carpenter got up a pile of wood and expect to buzz it soon.

John Schroeder was up to his farm Monday to get a load of wood.

Charles Ruggles has been on the sick list, but is better now.

John Petrie is about through cutting logs on the Murphy place and expects to haul soon.

Henry VanDeventer made a business trip to Gaylord one day last week.

Henry VanDeventer is getting out some cedar ties for the East Jordan Lumber Co.

We are going to organize a Sunday School at the Vance Schoolhouse on Sunday, Jan. 18th. All are invited to attend.

"I wonder why three-fourths of the typists in business offices are women?"  
"Because that's one class of women the men can dictate to."

"Waiter, what on earth is this concoction?"  
"Why, that's bean soup, sir."  
"Never mind what it's been! What is it now?"

A modern novelist says: "Thirty is the proper age for a woman." Well, if she isn't proper by that time, she probably never will be.

**MORTGAGE FORECLOSURE NOTICE**

Default having been made in the terms and conditions of a certain mortgage made and executed by Robert D. Cook and Jessie G. Cook, his wife, and David Ruch, a widower, all of East Jordan, Michigan, to the Peoples State Savings Bank, of East Jordan, State of Michigan, a body corporate under the laws of Michigan, which said mortgage bears date the 15th day of March, 1915, and was recorded on the 16th day of March, 1915, in Liber forty (40) of Mortgages, on page two hundred fifty-eight (258), in the office of the Register of Deeds in and for the County of Charlevoix, Michigan, and that said mortgage is past due; and there is now claimed to be due and unpaid on said mortgage the sum of two thousand four hundred thirty-nine and 45-100 (\$2439.45) dollars at the date of this notice, including principal of \$2000.00, interest of \$310.34, taxes paid by mortgagee of \$94.11, and attorney fee of \$35.00 as provided for by said mortgage, and no suit or proceedings at law or in equity having been instituted to recover the moneys secured by said mortgage or any part thereof;

NOW, THEREFORE, by virtue of the power of sale in said mortgage contained, and of the statute in such case made and provided, NOTICE IS HEREBY GIVEN that on Friday, the 24th day of April, 1931, at ten o'clock in the forenoon, standard time, at the east front door of the court house in the City of Charlevoix, Michigan, that being the place where the Circuit Court for the County of Charlevoix is held, said Peoples State Savings Bank will sell at public auction to the highest bidder the premises described in said mortgage, or so much thereof as may be necessary to pay the amount due on said mortgage and all legal costs and attorney fee.

The premises described in said mortgage are as follows, to-wit: "All of the east one-half of the northwest quarter (E 1/2 of NW 1/4) of section number twenty (20), township thirty-two (32) north, range seven (7) west, Michigan, containing eighty (80) acres of land, more or less, according to the Government survey thereof, situated in the township of South Arm, County of Charlevoix and State of Michigan."

Dated January 16th, 1931.  
PEOPLES STATE SAVINGS BANK,  
Mortgagee,  
By Walter G. Corneil, Cashier.  
E. N. CLING,  
Attorney for Mortgagee,  
Business Address: East Jordan, Mich.

**PROBATE ORDER**

STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.  
At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 2nd day of January, A. D. 1931.  
Present: Hon. Ervan A. Ruegsegger, Judge of Probate.

In the Matter of the Estate of Elvena L. Heller, Deceased.  
Karl Heller having filed in said court his petition praying that said court adjudicate and determine who were at the time of her death the legal heirs of said deceased and entitled to inherit the real estate of which said deceased died seized.

It is ordered, that the 30th day of January, A. D. 1931, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition;  
It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald a newspaper printed and circulated in said County.  
ERVAN A. RUEGSEGGER,  
Judge of Probate.

BIRD DRAGGED IN BY CAT NOW PRIZE

Sings Words and Music and Imitates Animals.

Hagerstown, Md.—Four years ago it was just a bird the cat dragged in. Today it's the talk of the town. Not only does it trill the airy cadenzas of its feathered kin, but actually sings—words as well as music.

Moreover, it talks! All the neighbors have heard it. Nor is that all. It takes a keen delight in animal and human imitations, mimicking the "bow wow" of the family watchdog and the roisterous challenge of the sheik of the hen house.

The early history of this accomplished musician and all-around entertainer is veiled in mystery. Its record dates back to a predatory stroll four years ago of Mrs. L. B. Betts' pet cat. Kitty pounced upon what appeared to be a small blackbird and was on her way to dispose of it at her leisure when a delivery boy turned the bird, more dead than alive, over to Mrs. Betts. She nursed it back to health.

The little creature was not long in expressing its gratitude in song. Under the tutelage of its mistress, she says, it has learned to sing two stanzas of "Maryland, My Maryland."

Mrs. Betts' prodigy is never at a loss for conversational topics. And when there is nobody to talk to it amuses itself whistling. If a boy of the neighborhood drops in the bird is accustomed to inquire casually, "Are you a baseballer?" or to ask, "Will your dog bite?" The latter question invariably is accompanied by a realistic impersonation of an agitated dog.

Being nameless, the bird on occasion appears concerned over its origin and not infrequently startles an unsuspecting visitor with the plaintive query, "Am I a starling?" In its lighter moments it greets its audience with the invitation "Kiss your mother," followed up with a series of osculatory sounds.

The bird is believed to be a species of blackbird or starling. It has a long, pointed bill and dark, purple, spotted wings. Its neck is devoid of feathers.

Indians Favor Peyote Cult, Savant Declares

Washington.—The peyote cult, strange and ancient religion, is making progress among the Indian tribes of the Middle West, despite a strong modernist-fundamentalist controversy which splits its membership.

The religion, based on the curious effects of eating the peyote button, or dried top of a spineless cactus, is now the subject of an extensive study.

Dr. Maurice G. Smith of the University of Oklahoma, who is making the investigation, has pointed out that while some of the Oklahoma groups keep the Bible on the altar and almost always use the name of Christ in their prayers, the "modernists" wish to extend this so as to constitute a distinct Christian sect. The fundamentalists are fighting for retention of the Indian traditions.

Upon eating the peyote button, one receives curious physiological effects, presumably resulting in an excited feeling and visions. This, according to Doctor Smith, is the white man's interpretation based on experiments.

The purpose of the study conducted by Doctor Smith is to determine if the practice has a bad physical or moral effect. The ethic of the cult stresses the virtue of honesty, charity and temperance. The cult originated in Mexico.

Kansas Plans Hospital for "Jakeleg" Cases

Wichita, Kan.—A "Jakeleg" hospital is to be built in Kansas.

Such a hospital, the first of its kind in the United States, will be constructed at the Sedgewick county poor farm. Acting on the advice of Dr. Bruce Meeke, county physician, the board of commissioners has instructed a firm to draw plans for a \$10,000 frame hospital capable of housing 72 patients.

There are 52 sufferers of "jakittis" taking treatment at the poor farm. Sedgewick county has a total of 493 "jakittis" sufferers, state board of health figures show.

Nebraska Man Finds Old Pistol Near Oregon Trail

Columbus, Neb.—Clyde Oman, resident of Cheyenne county, has reported the finding of an old-time "powder ball, and percussion cap" revolver, apparently lost by some traveler along the old Oregon trail. The gun was found within a few yards of the old trail, about 20 miles east of Lodge Pole.

Man's Plea Quashes Intoxication Case

Poughkeepsie, N. Y.—William Martin won freedom from a sentence of three months in jail on charges of intoxication and disorderly conduct when he told the court the mere charge of "intoxication" was no crime.

BRITONS EVADING BIG TAX PAYMENTS

Assessments Are Dissipating Large Fortunes.

London.—Taxation is dissipating some of Great Britain's oldest and largest fortunes, transferring the ownership of vast estates and discouraging the amassing of wealth, a survey has just revealed.

The death duties are the most keenly felt of all taxes, and they rank second in the list of the government's sources of income. The 1930 budget revealed that more than \$4,000,000,000 was expected from estate duties.

The huge landowners have evolved several means of defeating this taxation. The most popular is to convert existing ownership into private limited liability companies. In this way the cost of operating the companies can be deducted from the income tax payments, the amount of taxation reduced during life, and death duties avoided.

Estates Protected.

It likewise has added inducement of protecting the estates from reckless heirs' extravagances. Among those titled owners who have transformed their estates into private liability companies have been the dukes of Buccleuch, Devonshire, Grafton, Leinster, Marlborough, Rutland and Sutherland; marquises of Zetland, the earls of Berkeley, Darnley, Harewood, Moray, Ossory, Roseberg, Spencer and Strathmore, and Viscounts Novar, Ullswater and Wemborne.

Another plan is transferring property to a younger member of the family. If the transfer is made six months before death, the estate is not subject to death duties.

Others are selling outright their holdings and living on the capital, which is not taxable. In 1927, Lord Derby, one of England's wealthiest peers and greatest sportsmen, sold Lancashire property for \$8,500,000, and explained he did it because his son would have had to sell more to pay death duties at his passing.

Standard Rate.

The standard rate of income tax increased from 20 per cent in 1929 to 22 1/2 per cent in 1930. The lower incomes, however, virtually were not affected by the increase and in some cases actually pay less.

Life insurance premiums are an important factor in relieving the amount taxable. An amount equal to 10 per cent of the premium paid can be deducted from the tax otherwise payable. The maximum amount of premiums subject to this relief, however, is a sum equal to one-sixth of the total income.

Many of the large landowners have been forced to sell their estates to tenants in order to pay the huge death tax. The recent retirement of Lord Durham from racing is said to have been due to a large extent to the necessity of selling some of his stable to pay death duties of more than \$3,500,000 through the death of two earls of Durham.

D. A. R. Marks Site of Ft. Custer With Tablet

Hardin, Mont.—The site of old Fort Custer, two miles south of Hardin, was the scene of impressive ceremonies recently when Shining Mountain chapter, Daughters of the American Revolution, Billings, dedicated a granite and bronze marker to the memory of pioneer days.

Fort Custer, named in honor of Gen. George A. Custer, who, with his Seventh cavalry, went down to defeat before the Sioux Indians in the battle of the Little Big Horn, was the base of military operations in the early days.

From this point troops watched over the safety and progress of those traveling the old Bozeman trail, which headed north through the Little Big Horn valley, the fort being abandoned in the late '30s. Fort Custer in the early days was one of the largest military posts of the Northwest.

The Girl Scouts of Hardin must be given credit for starting the initial movement to mark the old site. The merits of their work were seen by the Hardin Lions club. It sponsored the steps which led to the ultimate marking of the historic site by the D. A. R.

New Welland Canal Will Be Opened Next Year

Welland, Ont.—The Welland canal is certain to be officially opened next year.

This definite statement was made by Hon. Dr. R. J. Manton, minister of railways and canals, who visited this city to look over the progress of the work and to discuss with civic officials disturbances to the city's property by reason of the canal development.

"There is no doubt about the canal being officially opened next year," said Doctor Manton. "Everything is in first-class shape. It is largely in use now. There is nothing to delay completion."

New Orleans Mint Will Soon Be Federal Prison

New Orleans, La.—Plans for conversion of the old United States mint here into a federal jail have been perfected. The mint, long abandoned, will house approximately 300 prisoners who have been sentenced to twelve months or less. This will relieve federal penitentiaries and other prisons of men and women sentenced for violation of the liquor laws.

WINTER FEEDING HINTS FOR DAIRY

Legume Hay and Silage Are Favored in Ration.

"Without doubt, legume hay and silage are essential for economical milk production," says John M. Shaw of the Iowa State college dairy husbandry department. "The dairyman must realize he is competing with others who are producing dairy products and without both these good roughages he is handicapping himself at the start. While the dairy cow is, and always will be, a machine for converting farm produced feeds into products of high marketability, yet those who depend on the cow for this work must supply her with the best possible crops which the farm can produce."

frankly, but I believe truly, the man who does not supply his cows with leguminous hays and silage has no right to complain if he fails at dairying. These feeds are part of a dairy farmer's equipment.

"A good grain mixture can be made up of 500 pounds ground corn, 400 pounds ground oats and 100-150 pounds linseed oil meal, or coarsely ground soy beans. This mixture should be fed at the rate of about seven pounds daily per one pound of butterfat produced.

"The silage and hay should be fed liberally, but the cow will ordinarily handle silage at about the rate of three pounds daily per 100 pounds live weight and hay at the rate of one pound daily per 100 pounds live weight."

Dairymen Should Choose Tried Sires for Herds

Dairymen cannot expect to get help from cows able to produce 500 to 1,000 pounds of milk from a bull if the bull's dams and sires were able to produce only 200 to 400 pounds of milk, according to John M. Eppard, live stock expert. To get high record heifers one must seek bulls with parents having high records.

The answer to the problem, "How am I to tell what a bull's heifers will be able to produce?" is to use the "tried sire," Mr. Eppard states. The "tried sire" is an assured proposition the side with the inferior pedigree is a wild gamble as contrasted to the investment type of sire, or "tried sire."

The use of inferior sires for even short periods in the herd will cause shortage of milk and fat production in the herd for generations. Hence it is important that the prospective side of the future milkers should be chosen with extreme care.

The old statement that "the bull is half the herd" is only partly true due to the fact that he soon will dominate the entire herd.

Essential Factors for Producing Quality Milk

It is not difficult to find dairy farms with beautiful buildings and the latest types of equipment that are not producing high grade milk, or to find dairymen of education who, for one reason or another, are not doing so. Proper equipment and good education are valuable and helpful, but back of it all, the dairyman himself is the most important factor. There are many dairymen who produce high quality milk uniformly although they have simple equipment. It is the will to do the necessary things well and at the proper time that counts.

The essential factors that underlie the production of high quality milk may be summarized as follows: (1) Clean barns, clean milkhouse, clean milker, and clean and healthy cows (2) Proper washing and effective sterilization of all utensils. (3) Prompt cooling of the milk to 60 degrees Fahrenheit or lower and keeping it at that temperature until delivered.

Dairy Facts

Clover hay is two-and-a-half and alfalfa three-and-a-half times as rich in digestible protein as is timothy.

Heavy losses in butterfat occur whenever separators are poorly adjusted or not properly cleaned.

Milk production also carries responsibilities. When carelessly produced and improperly handled milk may be the means of spreading disease.

Every owner of a separator should have the skim milk tested at regular intervals to detect any loss of butter fat. Most creamery operators are glad to do this for their patrons.

Wheat is about equal to corn, pound for pound, as a feed for dairy cows because of its stickiness. It should be mixed with other grains and should not exceed one-third of the grain mixture.

Many bulls are confined to box stalls, which sometimes makes them hard to handle, offers no chance for exercise and is dangerous for farmers in handling the animals. The lack of exercise may get them out of condition.

Pedigrees must be something more than mere records of the names and numbers of the ancestors of animals offered if buyers are to be persuaded to pay prices very much above the commercial milk producing value of such animals.

Superior Plan for Setting Out Garden

Leave Space Between Rows So Horse May Be Used.

The best plan for planting the garden is to have the crops in long rows, not in beds. Lay out the rows the longest way of the garden, preferably north and south, and have the garden long enough so that a horse may be used both in plowing the soil and in cultivating the crops. Plant the rows far enough apart to allow the use of a cultivator drawn by horse power. Much more profit may be derived from a garden cultivated with a horse. Too much hand weeding and hoeing is not only tedious and irksome, but too often neglected besides being more expensive than horse labor.

Some garden plants are very tender and must not be planted in the spring garden until all danger of frost is over. Others are quite hardy and may be planted as early as the ground can be prepared.

The following list of vegetables are hardy and will resist a frost after sprouting: Potatoes, parsley, onions, lettuce, kale, horse-radish, endive, peas, salsify, rhubarb, radish, parsnip, spinach, turnip, carrot, cress, celery, cauliflower, cabbage, beets and asparagus. Vegetables that are injured by a slight frost and that should not be planted until all danger is past are: Tomato, pumpkin, cucumber, pepper, sweet corn, beans, eggplant, muskmelon, okra, squash, sweet potato and watermelon. Most of the latter list should be started growing earlier than the last frost. The seeds may be planted in hotbeds or in window boxes.

Applying Fertilizer With Drill in Kansas

A somewhat recent development in wheat seeding is the application of fertilizer by means of an attachment on the drill. Prof. F. Duley of Kansas reports that four year tests have shown an increase of 8.3 bushels per acre for broadcast fertilizers, while application in the row at seeding gave 4.7 bushels increase. Growth in the fall showed marked differences in favor of row applications and differences in early spring growth were even more striking. Applying the fertilizer with the seed by means of an attachment to the drill, gave slightly higher yields than when applied by hand either above or below the seed. Professor Duley has pointed out that fertilizer must be applied properly for greatest results, even in soil low in plant nutrients. Quoting him: "We are coming more and more to the idea of fertilizing the crop rather than fertilizing the soil."

Pear Blight Appears in Form of Epidemic

Pear blight appears periodically in the proportions of an epidemic. The intervals may be 7, 10 or 15 years. The last serious outbreak occurring in 1914. Pear blight is reduced as the vigor of the tree is reduced. For that reason it is necessary to avoid extensive pruning which stimulates young growth. Use of nitrogenous fertilizers instead of stable manures should be avoided while blight is active or threatening. It is also wise to reduce the cultivation of orchards and seed them instead to grass, clover or some cover crop which competes for the fertility of the soil.

Agricultural Hints

It is the garden that will reduce the yearly food expense of the family to the greatest extent.

A small potato or a cut piece should weigh at least one ounce to support life of the new plant.

Since small potatoes cannot be certified one has to rely on the honesty of the dealer selling him seed, to know it is good.

Germination tests of seed corn should be made sufficiently early so that a new supply of seed can be obtained if found necessary.

Shock corn is most excellent feed for breeding ewes. However, ewes will not do a good job of cleaning it up if it is thrown down in a dirty hog lot or barnyard.

In wet, heavy, water-logged soils, blackleg is more prevalent, due to the fact that moisture forces out oxygen which is essential to the development of the cork insulation on seed potatoes.

Ripe corn will not keep well in corn crib silos. Neither will corn that is frozen or dry. Adding moisture will not help much, as the cribbing lets the moisture out. Use crib silos only for green corn and you will get good results.

Plants of the cool season crops, such as cabbage, lettuce and cauliflower, may be started in a greenhouse or hotbed. In the daytime a temperature of 65 degrees F. is best, while at night it may drop to 45 degrees. The plants should be hardened to withstand light freezing.

THE NEW FORD

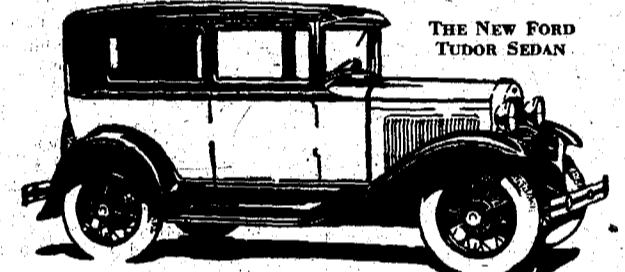

Everything you want or need in a motor car

THE more you see of the new Ford, the more you realize that it brings you everything you want or need in a motor car. . . . And at an unusually low price.

Its substantial beauty of line and color is apparent at a glance. Long, continuous service emphasizes the value of its simplicity of design and the high quality that has been built into every part.

The new Ford accelerates quickly and it will do 55 to 65 miles an hour. It is an easy-riding car because of its specially designed springs and four Houdaille double-acting hydraulic shock absorbers. It has fully enclosed four-wheel brakes and the added safety of a Triplex shatter-proof glass windshield. Operation and up-keep costs are low and it has the stamina and reliability that mean thousands of miles of uninterrupted service.

See the nearest dealer and have him give you a demonstration ride in the new Ford. Check up every point that goes to make a good automobile and you will know it is a value far above the price.

THE NEW FORD TUDOR SEDAN

LOW PRICES OF FORD CARS

\$435 to \$660

F. O. B. Detroit, plus freight and delivery. Bumpers and spare tire extra at small cost. You can purchase a Ford on economical terms through the Authorized Ford Finance Plans of the Universal Credit Company.

Mr. Brown: "There's no use talking. A woman can't take a joke." Mrs. Brown: "Can't they? Well what did I do when I married you?"

"Last night I dreamed you loved me. What does that mean?" "That you were dreaming."

Half: "I am always ill the night before a journey." Wit: "Then why don't you go a day earlier?"

"I understand that Arthur kisses weakly." "What? So seldom?"

## THE VALUE OF PRAISE

By THOMAS ARKLE CLARK  
Dean of Men, University of Illinois.

Sanders, not long ago, was telling me about his boss. Sanders was a good man, well-trained, efficient, reliable, and quite well up on his particular line of work. It would have been difficult to replace him had he pulled out and gone with another firm. He had been a part of the same organization for 30 years—had grown up with it, in fact, as it had grown up with him. The prosperity and success of the firm had depended very largely upon his efforts.

He had worked under the same head during all these years, and yet, he said to me that during 30 years he did not recall that he had ever directly received a word of praise from his superior officer. He knew that if he were ever called to the president's office it would be that he might have pointed out to him something that was wrong. The president never called anyone to commend him. He didn't believe in praise. His theory was that a man should do his best, and, having done that, he had done no more than should rightly be expected of him, and so was entitled to neither praise nor recognition of any sort. If his men did well they were never told so, but they knew that if they were not working up to the standards which he set, the fact would be called to their attention.

It isn't at all strange that there was discontent in his organization, that he was disliked, and that those from whom he should have co-operation and sympathy and love even gave him none of these things.

It was the king in one of Milne's poems, a man of simple tastes he claimed, who asked for nothing special excepting that he liked a little butter with his bread. He wasn't satisfied with being merely fed. He could easily have been properly nourished with the bread that was furnished him, but he wanted something that gave zest and taste to his eating. The most of us feel the same way about work. It is praise well spread on which furnishes the butter to the common bread of toil with which our days are filled. Without it we work with less enthusiasm, we grow discontented and restless.

I know another man quite unlike Sanders' boss, and very much more successful. When one of his men does a good piece of work he tells him so. More than that, he generally writes him a note so that his words of commendation may be reread and re-enjoyed and then taken home to the family that they, too, may get pleasure from the complimentary words. He thanks men when they do him a service; he recognizes efficiency and loyalty and effective service, and he does so freely and ungrudgingly. He never takes credit to himself for what others have done. His men adore him and would work their fingers to the bone, if need be, to win his praise. (© 1931, Western Newspaper Union.)

## Heads New Air Unit

Mrs. Opal Logan Kunz, one of the best known of America's aviatrices, who has been chosen as the first commander of the Betsy Ross corps, a group of women pilots who have banded together to serve their country in national emergencies of peace or war. Mrs. Kunz explained that the body was formed to serve "as a sort of auxiliary aerial motor corps." The constitution of the organization calls for a distinctive uniform for members.

Tess: "Engaged to two men at once? Does breach of promise mean nothing to you?"

Bess: "Of course! I'm trying to figure out how I can sue them both for it."

"John, whatever are you looking under all the ash-trays for?"

"I've mislaid my midget golf set, my dear."

"I want a box of cigars, please."

"Yes, madam—a strong cigar?"

"Oh, yes, my husband bites them so."

## PUMPING SYSTEM GOOD FOR WATER

Windmill Utilizes Cheapest Source of Power.

Demand for greater quantities of water for dairy and live stock uses calls for a pumping system which requires but little attention and utilizes the cheapest source of power available. Although the windmill has been a common sight on farms for a good many years, an increasing number of farmers are finding it possible to extend its usefulness beyond the single stock tank in the barnyard.

Dairy farmers have found that by placing a storage tank in the mow of the barn, drinking cups may be installed which greatly add to the profit from their herds. If the barn is well constructed, the heat from the stock will keep the water from freezing, particularly if the precaution is taken to remove the flooring from below the tank.

One farmer does not worry about getting a good pack in his silo, even in the face of an early frost. A light breeze provides the windmill on this Iowa farm with sufficient power to pump water directly into the silo, while a large under-ground storage tank holds plenty of water in reserve for his live stock. For household use, a windmill may be installed in connection with an air pressure system using a gasoline engine if necessary for supplementary power. This will provide running water for all conveniences in the home and may also be piped to the chicken house or to other outlying buildings if not too great a quantity is desired.

The adoption of anti-friction bearings and automatic oiling systems which require less attention have greatly increased the amount of power available for useful work. With lessened resistance they begin pumping in lighter winds which make them useful over longer periods of time and increase the quantity of water that can be pumped.

The capacity of the windmill varies according to the velocity of the wind, the diameter of the pump cylinder, the diameter of the wheel, and the lift required. By doubling the diameter of the cylinder, the capacity of the pump is increased by four times. However many make the mistake of using too large a cylinder which limits the usefulness of the mill to a strong wind.

## Bacteria Can't Thrive in Cold Temperature

Milk is the most perishable of any of the common foods, because it is an ideal place for bacteria to grow, says Prof. J. D. Brew of Cornell university.

The number of bacteria in the milk may vary from a few thousand to more than a million in a cubic centimeter, which is about 25 drops, and the more bacteria present the quicker the milk sours. Science has found three ways to stop this growth but only one is practical for farm use and that is to cool the milk to a point where the growth takes place slowly.

As crop growth is best at warm temperatures, and may be retarded by cool weather, and stopped by colder temperatures, so bacteria that will multiply rapidly in milk at 70 degrees Fahrenheit slacken growth at 60 degrees and at 50 degrees the bacteria crop outlook is poor.

Professor Hammer of Iowa found that a high grade of milk with a low bacteria count soured in 68 hours when kept at 60 degrees, the same milk kept sweet 86 hours at 50 degrees, and at 32 degrees it took more than a month to sour.

## Salt Quite Essential to Dairy Cows Daily

Salt is essential to dairy cows and they should have access to it daily. The average requirement is about three-fourths of an ounce daily per 1,000 pounds of live weight with an additional three-fourths of an ounce required for each 20 pounds of milk produced. Cows may be allowed free access to salt or it may be mixed with the grain feed. One of the most practical and satisfactory plans is to mix it with the grain in the proportion of one pound for each 100 pounds of the grain mixture.

## Ice Cream Production Continues to Increase

Ice cream production continued to increase last year and reached a grand total of 365,448,000 gallons as compared with 348,046,000 gallons in 1928, according to the United States Department of Agriculture. Inasmuch as imports and exports of ice cream are negligible, all of the production is assumed to have been consumed. On this basis, the consumption per person last year was three gallons. Ten years ago, the per capita consumption was a little more than two gallons.

## Profitable Cow

Dairy farmers know from experience that the profitable cow is the one producing a large record. The profitable meat-producing animal is the one that is grown quickly. All tests and experiments have proven the importance of obtaining volume in production. To keep animals in profit-making condition require a liberal supply of succulent and nourishing feed, and the silo can furnish the carbohydrate supply better and cheaper than any other method.

## Worry is Worst Enemy of Health, Doctor Says

Vienna.—If you have high blood pressure, if you have a nervous heart, are troubled with insomnia or some other chronic illness, don't worry.

That's the advice of Dr. Joseph Lobel, famous Austrian physician, who says that most of the fears of illness are unfounded.

"Everyone will quite readily abandon fear if he gets something else in exchange for it," the doctor says. "This should be confidence. The best means to prolong one's life is not to shorten it by melancholy."

"Man only dreads mystery. Anything that we understand thoroughly and realize cannot cause fear."

"So, above all, don't worry about your blood pressure. If you do you will drive it up."

## Judge Rules Bookworms Must Not Bathe in Library

Buffalo, N. Y.—Henry Vanek has learned that bathrooms are not for book lovers when located in a public library. He was locked accidentally in the public library for the night and wandered into the engineer's bathroom. Resigned to his fate, Vanek disrobed and was taking a bath when the engineer interrupted him. In City court Vanek was released with the advice to patronize public bath houses in the future.

## Daughter Finds Mother's Ring Lost 40 Years Ago

Wausau, Wis.—Forty years ago Mrs. John Gross and Mrs. William Hartkopf helped search for their mother's wedding ring lost in the flower garden of the family home. While working in the garden recently Mrs. Hartkopf found the lost ring.

## Two Silver Dollars Over 130 Years Old

Riverside, Mich.—Two silver dollars, more than one hundred and thirty years old, and a newspaper printed at the close of the Civil war are in the possession of Dr. H. B. Mix of Riverside.

The newspaper he has acquired was printed in Vicksburg, Miss., on wall paper.

## In Doubt

Jones: "Are you married?"  
Movie Actor: "I really don't know. My lawyer attends to all those things."

Friend—Have you a speaking part in your next picture?

Actor—No, I play the part of a husband.

Pedestrian: "Confound you, why don't you blow your horn?"

Motorist: "Who'do you think I am—Little Boy Blue?"

"How did you ever get a reference of being a perfect lady's maid?"

"The last lady I worked for was a perfect lady."

Blind Boy: "I can read you like a book."

Blind Girl: "Stop it, I'm not a Braille system!"

## MICHIGAN BELL TELEPHONE CO.

She finds TELEPHONING Inexpensive

FOR shopping, making social engagements and keeping in touch with out-of-town friends, she finds telephoning the quickest, most convenient, and least expensive way.

Her bridge group or dinner guests are assembled quickly by telephone. (Telephoned invitations are nearly always socially correct.)

She talks with out-of-town relatives frequently by Long Distance, and when friends move away, she maintains her acquaintanceship with them by telephone.

The cost of telephone service is low.

# Sign of Progress . . .

BETTERMENT. That is the watchword of American progress. As a nation we are not content to stand still. We want better foods, we want newer and better ways of doing things, labor-saving devices, short-cuts. We want more comforts and luxuries for our homes. We want better automobiles at lower costs. We want better houses, better stores, better means of transportation. We want to dress better and to play and enjoy ourselves more.

Progress is reflected by the advertising found in the newspapers. It is through advertising that we first learn of the newest methods, the newest of everything. Advertising is the sign of progress and often the source of it.

Read the advertisements in the newspapers. Study them. Profit by them. They will help you secure what you need and want for less money than you often expect to pay. Keep up with the advertising and advertising will help you keep abreast of the times. For advertising supplies new ideas, new methods, and new inspirations to a work-a-day world. Advertising is not only the sign of progress—advertising is progress.

Be progressive . . . keep in touch with the advertisements in this newspaper . . . it will be well worth your while.

Everybody welcome.

Ann Arbor—Exploding lacquer barrels started a blaze which destroyed the Cavac Radio Corporation plant here and caused a loss estimated by officials of the company at \$65,000. Three men were in the brick building at the time of the fire but escaped. The blaze was beyond control when the fire department arrived. An adjoining coal yard and a dozen houses which bordered the plant were saved by a westerly wind.

Monroe—Coaches and athletic directors of the Southeastern Athletic Association have been forbidden to aid newspapers in selecting all-S. E. A. teams in any sport. The league, which is made up of the high schools of Royal Oak, Pontiac, Ferndale, Fordson, Wyandotte, Monroe, Mt. Clemens, Adrian, and Port Huron, explains in a recent bulletin that "no all star team is just" and adds, "the league does not wish to be a party in the selecting of one."

Holland—The widow of Gerrit John Diekema, late United States minister to The Hague, was revealed here by the executors as the principal beneficiary in his will. The value of the estate and the exact amount involved in bequests were not made public. Mrs. Diekema and Willis A. Diekema are the executors. To Mrs. Diekema were willed the family home and the insurance her husband carried. The remainder of the estate is divided among the four children.

**Briefs of the Week**

Sam Kamradt is home from Grand Rapids for a short visit.

Born to Mr. and Mrs. Henry McWaters, a son, Monday, Jan. 12th.

Solon Barnes was at Petoskey hospital first of the week for treatment.

Mr. and Mrs. Chris Holstad and son, Clarence, of Mancelona visited East Jordan friends, Sunday.

Mrs. C. A. Brabant and nephew, Bruce Isaam left Monday for a visit with relatives in Ontario, Calif.

Bake Sale at the A. & P. store this Saturday afternoon, given by the ladies of the L. D. S. Church. adv.

Miss Velma LaCroix underwent a major operation at Lockwood hospital, Petoskey, Thursday.

Get the habit—tell the Editor of your visitors of the visits that you make or other items of local interest.

Four battery type 5-tube Radios will be given away absolutely free at C. J. Malpass Hdwe. Co. Ask about it. adv.

Miss Pauline Hoover returned to Saginaw, Tuesday, after a few weeks visit with her mother, Mrs. Lillian Hoover.

Mrs. John Monroe left Thursday for a visit with her son, L. C. Monroe at Muskegon. She goes from there to Detroit and Gary, Ind.

Saturday—Silks, 27c, 59c, 89c per yard. Laces and Embroideries, 2c yard. Dress goods, 3c yard, at the East Jordan Lumber Company. adv.

Mr. and Mrs. Joe Mayville and daughter returned home last Friday from St. Ignace, where Mr. Mayville has been employed for several months.

Joe Boyd was bitten on one of his hands, Thursday morning, when he attempted to separate a couple of dogs fighting. He was given treatment by a physician for the wound.

Winner work shirts, 83c; Winner Overalls, best grade, \$1.07; heavy fleece Underwear 79c each; \$1.75 Outing Night Shirts \$1.19, at East Jordan Lumber Company store. adv.

Red Raspberries—If interested in setting out plants, Ed. Douglas of Cheboygan, the largest grower in Michigan will be at East Jordan Canning Co., (Lumber) office, Saturday, Jan. 24th to take orders at \$10.00 per M. adv. 3-2

Mr. and Mrs. T. J. Hitchcock spent the week end with their son, Burton, who is taking treatment at the Howell Sanatorium. They were accompanied by Frank Severance who visited his father, Benj Severance at the Sanatorium.

Monday—Cotton suede gloves, all sizes, 25c. Sweaters, 63c. Crochet hooks, bone or wire, 5c. Tea towels, 8 for 50c. Extra large bath towels, 23c and 43c. Wash cloths 5c, at the East Jordan Lumber Company. adv.

A very bad accident happened at the intersection of US-131 and M-75 at Boyne Falls, Sunday afternoon when a new Buick Sedan car driven by Felix Hauseman of the firm of Hauseman & Jones Furniture Co., of Grand Rapids hit a car driven by Fred Nelson of East Jordan. It seems Mr. Nelson stopped then started across the highway probably not seeing the car coming from the north and before the Buick could stop it hit the East Jordan car in the middle, sending it into the sign post and stones in the triangle park at the intersection of these two highways. A crowd of people soon gathered and took the victims, Mr. Nelson and Mrs. Kate Gurner, who was riding with him, to the Petoskey Hospital to have their injuries attended to. The woman was thrown some fifteen feet from the car and the miracle was that she was not killed. The car was very badly wrecked, but the Buick escaped with less damage.—Boyne Citizen.

Mrs. Gurner is still confined to the hospital, suffering from a seriously injured spine. Mr. Nelson received cuts and bruises but no serious hurts.

Owosso — Mrs. Anna Sternaman Groh of this city, recently celebrated the one hundredth anniversary of her birth. She has outlived all but two of her nine children. Those living are Arthur Sternaman, 69, of Owosso, and Mrs. Carrie Hodges, 66, of Flint. Mrs. Groh has no criticism to offer of the present generation. Neither has she any particular formula for long living. She has lived a well regulated and simple life, she says, and worked hard. She eats heartily, and sleeps a great deal.

Ann Arbor—Reasons for the decline of the Mayan Empire, the oldest civilization of the New World, will be studied by three professors of the University of Michigan who are leaving Jan. 23 for Guatemala to carry out a biological reconnaissance. The three, Prof. Harvey H. Bartlett, director of the botanical gardens at the university; Dr. Josselyn Van Tine, assistant curator of birds in the museum of zoology, and Dr. Adolph Murie, assistant curator of mammals, will work under the sponsorship of the Carnegie Institute of Washington.

Ed. Kamradt was at Detroit first of the week on business.

Mr. and Mrs. Andrew Sackett have gone to Kewadin.

George Kake is confined to his bed by illness.

H. C. Blount returned home last week from a visit at Chicago.

Raymond Swafford has returned to Kalamazoo to attend College.

Bulow Bros. now have the agency for the Lansing State Journal. adv.

Wednesday—Boy's blouses, 19c. Khaki suits, assorted sizes, 25c. Fletcher's yarns, assorted colors, 23c, at the East Jordan Lumber Company. adv.

George A. Bell wishes to extend an invitation to all of his old and new customers to call on him at the Bon Ton Bake Shop for baked goods and fruits. adv.

Tuesday — Remnants, all lengths, all qualities at unheard of prices. Umbrellas, prices \$1.75 to \$4.00, 93c. Royal Society emb. floss, 2c skein. 15c Rit, 9c, at the East Jordan Lumber Company. adv.

The four-months old son of Mr. and Mrs. John Seganek died Sunday, Jan. 4th at their home near Phelps. Funeral services were held from the L. D. S. Church, Tuesday afternoon, conducted by Elder Leonard Dudley. Interment at Sunset Hill.

Mr. and Mrs. A. G. Rogers left Monday for St. Louis, Mo., where Mr. Rogers is a Michigan State delegate, appointed by Ex-Gov. Green, to attend the annual Convention and Road Show of the American Road Builders' Ass'n.

Members of Reber-Sweet Post, American Legion were royally entertained at Boyne City by the Legion Post there Monday evening. A fine supper was served, after which an excellent program was enjoyed.

A get-acquainted party was given at the home of Mr. and Mrs. Koo Klooster, Friday night, Jan. 9th. A very pleasant evening was spent in playing progressive pedro, and checkers, after which a dainty lunch was served. The neighbors are very pleased to have Mr. and Mrs. Klooster make their home on the Frank Zoulek farm.

A large delegation from Mark Chapter, O. E. S., attended a six o'clock supper given by the Boyne City Chapter, Monday evening. Guests were present from East Jordan, Charlevoix and Vanderbilt. The tables were decorated with candles and flowers. A business session followed in which the initiatory degrees were exemplified.

The oil station and roadside store, North Boyne City, which belongs to William Pryor, was destroyed by fire at 1:30 Wednesday morning. Dr. G. C. Conkle, returning from a late call, noticed the flames and called the owner, who lives next door. The alarm was sent in but the fire was beyond control. They found the scales and boxes of candy beside the road and when the fire had died down, discovered the stock in the store had been taken. The building was insured, but there was none on the stock.

Ignorance is a substitute for bliss, but a very cheap one.

**IMPORTANT**

We have employed Austin E. Bartlett as distributing agent for our famous Stock Salt and Poultry Conditioner, which every farmer should be interested in. Call at his store and he will explain to you the benefits obtained from its uses.

Forgotten Cash Held by Banks

Millions of Dollars Await Their Rightful Owners

Albany, N. Y.—Between one and two million orphaned dollars are lying in banks all over New York state awaiting their rightful owners.

Some of them have been waiting patiently for many years. Some of them may wait forever.

Thousands of them were deposited by mining companies and investment concerns that probably ceased operating years ago. They are all listed among the dormant bank accounts published periodically in the state banking department bulletin.

During the World war a public school started a war chest fund. It now lies forgotten in a bank. The bulletin lists an unclaimed deposit of "Memorial Hospital Workers," and another by the "Standing Committee of Palestine Charities."

Several athletic societies have been formed, collected money, banked it, and—forgotten about it. One of them was the Bronx Garden association.

Another New York bank carries the unclaimed deposit of a baroness, while still another has a 1908 class fund. There are hundreds of estates listed, with apparently nobody aware of the money deposited in the name of the administrators.

The state banking department has all of these unclaimed accounts listed alphabetically, and a score of clerks are kept busy checking up on inquiries all over the country.

"With trust companions and state banks an account becomes dormant after it has lain inactive for five years, and with savings banks after 20 years.

## DEBATING

Despite the fact that all three judges voted for Charlevoix in the Charlevoix-East Jordan Debate last Friday night, it was a very close debate; so close in fact that some of the Charlevoix people said they were not expecting the decision to be quite as it was.

Both teams were of credit to their schools. It is regrettable that more did not find it possible to attend in order to see what an improvement had been accomplished in the technique of debating by the local team. This was matched by the skill on the part of the Charlevoix debaters who were perhaps chiefly successful due to the refutation given by their third speaker.

Miss Perkins wishes to take this opportunity to express her appreciation to her debaters: Rea Healey, Gwenivere Gay and Victor Milliman, the first team, and Thelma Smith and Ruth Stallard, for their splendid cooperation; also to the several townspeople who have been helpfully interested.

To the members of the first team especially much credit has to be accorded for their persistency and willingness to work in the face of their handicap of meeting two veteran teams at the outset. They have shown true sportsmen-like qualities.

Again the value of debating has been proved by the very evident improvement that has been gained by every member of this previously inexperienced team.

Those schools of the Debating League who have gained a sufficient number of points, during these four preliminary debates, enter into the elimination series beginning the latter part of February.

 Admission—for dancing: Single, 25c; couple, 50c.

There will also be some good eats on sale by the Juniors. Ice Cream, candy, pop corn, hot dogs, hamburgs, coffee.

—Eloise Davis

## HOME ECONOMICS

As the 10th grade girls completed their sewing work before Xmas, they started last Monday with a new subject and also new books. They are now taking up the study of arranging our rooms interestingly, restful and attractive. They have found balance and proportion to be very important in securing an interesting room.

They also have taken up the arrangement of flowers according to type of flowers, color and place where bouquet is to be placed; suitable vases or containers for different types of vases. They have been assigned to get illustrations of these things for their note books by next Monday.

Monday, Jan. 12, Mr. Maynard was asked to give a talk to the 10th grade class about different woods and their finishes, as that is what the girls are taking up now. His talk was interesting and a great many important things were covered. To help us in buying furniture, Mr. Maynard discussed the following things: Different kinds of woods, substitutes, and what is meant by veneering. He also discussed how to refinish furniture or woodwork.

## 9th Grade Girls

These girls are now taking up the study of Menus. They are testing definite ones for health, as many of our meals lack vitamins, minerals and roughage. They are also planning lunch which might be served to their own family.

—Ruth Stallard

## Dogs! Dogs! Where have they gone?

The Zoology class have been looking through everything printed for pictures of dogs. These are for dog notebooks. Each student collects all the dogs he can and writes a description of each. It took quite a while to do this but we found it was very interesting work.

The class started reviewing for the semester examination, Wednesday.

## Chemistry "Cooks"

Everyone reached a climax yesterday when Lab. Manuels were handed in. The students have been very busy drawing the pictures of the apparatus used for the experiments and answering a great many questions about them. These will be very helpful to use when studying for the chemistry examination.

—Gwendolyn Malpass

## GRADES

Kindergarten—We are going to make a shelf to put out for the birds to eat off from, and we also made some snowmen last week.

Second Grade—We have two new pupils now in our class and we have

been making lots of snowmen.

Third Grade—We have started some Eskimo booklets and have completed our Movie books. We also have a new picture of Sam, whose names are Check and Double-Check.

Fourth Grade—The following people had 100 in Long Division for the past week: Louise Bechtold, Irene Brintnall, Marie Essenberg, Robert Sloop, Buddy Porter, Richard Saxton, Elaine Collins, Jane Ellen Vance, Beatrice Valencourt, Gale Brintnall, Carl Grutsch.

The following had 100 in Spelling: Irene Brintnall, Marie Essenberg, John Pray, Anna Kraemer, Richard Saxton, Jane Ellen Vance, Elaine Collins, Buddy Staley, Beatrice Valencourt.

We have also been making an Eskimo Poster for our room.

Sixth Grade—Jane Davis is pianist in the Sixth Grade this week.

The monitors for the week are Lorena Brintnall, Alice Persons and Lily Sweet.

Henry Reinhart got the highest mark in "A" class Arithmetic test.

"A" class Arithmetic is beginning accounts. "B" class is working on percentage.

Thirty-two pupils had 100 in spelling every day last week.

The grade enjoyed a study of leaves from California Monday afternoon. They were encalyptus, acacia, redwood, pepper tree, cypress, banana palm, cedars, live oak, fig, and several flowering shrubs in the collection.

The grade is working for members for the P. T. A.—Eloise Gaunt has secured the most members to date.

The grade purchased flowers to show their sympathy for Lloyd Miles, whose father died so suddenly.

Spelling episode:

Teacher: "Please use the word 'meter' in a sentence."

Pupil: "We will meter in the skies."

Also—"There are three beets in a measure."

There were twenty people on the Honor Roll in December. That means that those people had an average of "B" or better.

—Eloise Davis

## SCHOOL DAYS

School will hold memories, Memories great and small,

And when you leave this old building

You will remember,

Remember them all.

And as you drift down life's highway,

Burdened with your load,

You can make it all the lighter,

If you will think

For what the old school stood.

—Margaret Bayliss

## Pruning of Grapevines Best in Early Spring

In general the most-satisfactory period, all factors considered, for the pruning of grapevines is in early spring after all danger from excessive low-temperatures has passed. This is true because the work is delayed until this period will enable the pruner to remove any wood that may have been killed by winter temperatures, and the canes which are selected and left for fruiting should be the healthiest and most suitable ones. If the pruning work is done at this period little or no bleeding will result, and even if it did, perhaps it would not be harmful. Shoots and cuttings are generally set out in the early spring as soon as weather and soil conditions will permit.

## Control San Jose Scale and Peach Leaf Curl

If San Jose scale and peach leaf curl must both be combated, these troubles may be controlled by using a 2 per cent lubricating oil emulsion with bordeaux, made according to the 3-4-50 formula. Where San Jose scale is not present, the bordeaux alone or lime-sulphur 1-15 or 1-20 is effective. One spraying is sufficient and it may be made in the fall after the leaves drop, or in the spring before growth starts. In the control of peach leaf curl, it is imperative that the work be done before the buds swell in the spring. For both San Jose scale and peach leaf curl, thorough spraying cannot be emphasized too strongly. Unsprayed or partly sprayed buds may show the scale and curl.

## Fertilized Silo Corn Found Best in Iowa

"When the corn was cut to put in the silo early this fall, more than twice as much fodder was found on the fertilized than on the untreated land."

This is the partial report of a trial at fertilizing corn for silage in Worth county, Iowa, in 1930. The report continues, "The corn on the fertilized soil had large vigorous stalks and was well matured, while the corn on the unfertilized ground showed little growth."

The soil type, containing some alkali, was treated with a commercial fertilizer containing 20 per cent each of phosphate and potash.

Hunter: "If a leopard was running after a man, could you spot the winner?"

Guide: "Yes suh! Tha winner is spotted."

"I learned to play the saxophone by ear."

"Didn't you ever get a cornache?"

# State News in Brief

Saginaw—With the time limit for filing nominating petitions still six weeks distant, prospects are for a field of record-breaking size for Saginaw's municipal primary March 29.

Corunna—Completion of the \$18,000 community house at McCurdy Park is assured by the approval of voters of a bond issue of \$8,000. The city already has raised \$10,000 for this purpose.

Charlotte—George W. Watson, of Eaton Rapids, Eaton County's new prosecuting attorney, announced that slot machines will not be tolerated in the county during his regime. He said he had been approached by several persons in regard to his attitude on the gambling devices.

Jackson—David A. Hazelton, a Michigan Central railway engineer, is seeking the identity of a man he saved from drowning in the city mill pond. Hazelton saw the man break through the ice. The engineer tore a board from a fence and rescued the man. He left without giving his name.

Kalamazoo—Kalamazoo police are looking for the thief who stole Charles Shadd's car while the accommodating owner was in a tobacco store buying him some cigars. The thief had called at Shadd's home with the explanation he wanted to buy the car. It was while demonstrating the car that Shadd stopped at the store.

Kingston—Four bandits entered the Kingston State Bank in this Tuscola County village, held up six persons and escaped with approximately \$2,200 after forcing an official of the bank to open the safe. They left town in a car driven by a fifth bandit. The bandits abandoned their car near Clifford, six miles southwest of here, and fled in another automobile. It is believed they headed for Detroit.

Flint—Planned under an overturned automobile, Mrs. Harvey Bortner, wife of a Millington farmer, was choked to death. Mrs. Bortner, her husband and three children were on their way to Clio, when the steering gear of the automobile broke, causing the car to run into the ditch. The auto tipped over and the running board pinned the woman to the ground. Other occupants of the car were uninjured.

Portland—A shepherd-dog answered his master's call near here and probably saved him from death. The master, Elmer A. Green, was knocked down from behind and gored by a bull he was leading. As the bull rushed at Green a second time, the dog rushed to the scene, snapped at the bull's hind legs and diverted its attention until farm hands dragged Green to safety. Green suffered two fractured ribs.

Bay City—Announcement of the purchase of more than a square mile of land adjacent to the Saginaw river and just north of Bay City by the Consumers Power Co., was made by Samuel Ball, district manager of the power company. The property will be used as the site for an electric generating plant. The proposed plant will be built in units and when completed will be three times the size of the present Saginaw River generating plant at Zilwaukee.

Marshall—Mayor Harold C. Brooks has purchased the old city hall which the city recently vacated when it opened its new municipal building. The city was "broke" and it looked as though a bond issue would have to be floated. Mayor Brooks suddenly offered \$7,000 for the old building and the council accepted his offer before he had a chance to change his mind. Mayor Brooks said he has no use for the building and is willing to sell it as soon as a purchaser appears.

Lansing—High school students must not join fraternities or similar secret societies, the supreme court ordered in upholding the validity of the anti-fraternity law passed in 1927. The bench was divided. Five justices signed the ruling opinion and the remaining three joined in a scathing denunciation of the law. The case came before the court as result of the action of the board of education of Lansing, in refusing to graduate several students last June who admitted they belonged to a fraternity.

Benton Harbor—A quintet of short haired girls, the Taylor Trunks, played an equal number of long haired men from the House of David in a basketball game at Chicago, the results of which were tough on the latter. Not only did the girls win the game, 18 to 9, but they played so roughly that one of the long haired House of David players had to take time out while a physician revived him. When little Violet Kornback jumped center against Clay Williams, who is six feet, two inches tall, she jumped so hard that Williams was knocked out.

Adrian—The New York Central motor coach service on the Monroe branch, between Adrian and Monroe, was discontinued January 5 and a mixed freight and passenger train substituted. Two trips a day were made formerly, while the new train will make but one round trip a day. A protest will be filed with the commission by business men from Monroe, Ida, Deerfield and Petersburg. The chief inspector of railway mail service will also go over the route before the business men take definite action.

## POTPOURRI

### World's Heavyweight Succession

Tom Bayers, an Englishman, was the first recognized world's heavyweight champion. He retired in 1890. Ten years later the next claimant was also an Englishman, Jem Mace. Then came Jake Kilrain of Boston, followed by Sullivan, Corbett, Fitzsimmons, Jeffries, Johnson, Wildard, Dempsey, Tunney and Schmeling. Prize fighting is more popular in America than elsewhere.

(© 1931, Western Newspaper Union.)

"Say Arthur, if you found ten bucks in your pocket, what would you think?"  
 "I'd think I had somebody else's pants on!"

He (angrily): "Do you believe everything every fool tells you?"  
 She: "Oh, no, darling. But sometimes you do sound so plausible."

"What do you think of the long skirts?"  
 "I'm strong for the short dames, myself."

Traffic Cop: "You can't turn around in the street, madam."  
 Fair Autoist: "Oh, there's plenty of room, I'm sure."

### Glycerin Mix Ends It 11 Years Constipation.

"For 11 years I tried to get rid of constipation," says Chas. E. Blair. "Then at last the simple mixture, Adierika, made me regular."  
 The simple mixture of glycerin, buckthorn bark, salina, etc., (Adierika) acts on BOTH upper and lower bowel, relieving constipation in two hours! Brings out poisons you never thought were in your system. Let Adierika give your stomach and bowels a REAL cleaning and see how good you feel! GIDLEY & MAC, Druggists. adv.

To forget a wrong is the best revenge.

# A Little Improvement on Nature

MAYBE the finest grapes do hang the highest.  
 Maybe the sweetest nuts are the hardest to crack.  
 Maybe every rose does have its thorn.

But—the best merchandise, the best values, the best buying opportunities, are the ones that are the easiest to discover today.

This little improvement on nature can be credited to the advertisements that appear in your paper. Their function is to make the best pianos and the best cigarettes and the best automobiles widely known and easily obtainable.

The very nature of its job has helped advertising to succeed. Everybody likes good news. And advertisements tell all of us how and where we can get the very best of the things that we want.

When it comes to deciding on your purchases, the easiest way is also the best one. When you follow the advertisements, you get the soundest values, the most improved merchandise and the greatest satisfaction for the money you spend.

IT PAYS TO READ THE ADVERTISEMENTS
