EAST JORDAN, MICHIGAN, FRIDAY, JUNE 12, 1942.

NUMBER 24

Sugar For Home Canners

JUNE 18th AND 19th SET FOR CHARLEVOIX COUNTY

Sugar Rationing Registration will be held next week— June 18-19 throughout Charlevoix County.

In East Jordan it will be held at the City Building. Hours 9—11 a. m., 2—5 and 7—9 p. m.

IMPORTANT!

Each family unit to be registered by one adult member of the family. Bring War Ration Book for each member of the family at time of Registration.

Certificates for canning will not be issued under any circumstances unless the War Ration Book has been presented.

Be prepared to answer the following questions:

1. Number of quarts of fruit canned last year or previous year.
2. Number of quarts of fruit now in possession of the Family Unit you are registering.
3. Number of quarts of fruit to be canned during the 1942 Canning Season.
4. Excess sugar supply at the time of this registration.

The following Federal Regulations must be observed. The maximum amount of sugar to be allotted to individuals or family units has been set at 10 pounds per person for canning and one pound per person for jellies, jams and preserves.

For further information contact your local Rationing Board.

Unusual Graduation

An event of unusual interest was the fact that a high school diploma was given last week to Mrs. G. A. Jackson of Kalamazoo.

Mrs. Jackson (Myrtle O'Keefe) left East Jordan High School at the beginning of her Junior year in 1917, going to Muskegon, later to Kalamazoo where she took a business course and for several years was employed in the Shakespeare office. In the meantime she attended classes at night school, earning the necessary credits to entitle her to graduate and with the Class of 1942 received her diploma.

Mrs. Edward Van Horn Passes Away In Her 79th Year

Mrs. Edward Van Horn, passed away at her home in East Jordan, Wednesday, June 3rd, following an illness of two years.

Hannah M. Van Horn was born March 4, 1863 at Raymond, Ontario Canada. On March 21, 1889, she was united in marriage to Edward Van Horn at Bruce Mines, Ontario. They came to the United States when she was about the age of 25. They spent part of their life near Duluth, Minn., coming here about seven years ago.

Three children were born to them, all of them preceding her in death. Mrs. Van Horn was a member of the Mennonite Church.

She is survived by her husband. Nine grandchildren and eleven great-grandchildren.

Funeral services were held at her late home Saturday afternoon, June 6, conducted by Rev. G. N. Bridges, pastor of the Mennonite Church.

Among those here to attend the funeral were Mr. and Mrs. Arthur Thompson and family of Detroit. The gentlemen are grandsons of the deceased.

Temple Highlights

It's a hearty, swashbuckling, actionful week that Saturday ushers in at the Temple. Zane Grey and Alexandre Dumas provide the story material for two of the programs while two are thrillingly topical. Each bill includes a carefully balanced ration of selected short subjects and special attention is directed to the March of Time issue, "India At War," which is a featured part of the Thursday and Friday presentation. The week-at-a-glance will be found below:

Saturday only: Zane Grey's, "Lone Star Ranger." Our Gang Comedy. Travel, Novelty, Soaring Stars. Sunday, Monday; Alexandre Dumas, "Corsican Brothers" starring Douglas Fairbanks and Ruth Warrick. Tuesday, Wednesday; Family Nites; Lynn Bari and Joseph Allen in, "Night Before Divorce." Cartoon. Travel. Spy Smasher.

Thursday, Friday; Robert Preston and Martha O'Driscoll in, "Pacific Bleakout." March Of Time. Color Cartoon. News.

CARD OF THANKS

We wish to express our sincere appreciation for the many acts of kindness and thoughtfulness extended to us during the illness and at the death of our beloved husband and father, Jasper M. Warden.

Mrs. Josephine Warden and children.

Jasper M. Warden Resident Here For Many Years, Died June 3rd.

Jasper M. Warden, well known and esteemed farmer of this region, passed away at his home in this city, Wednesday, June 3rd, following a year's illness and in his 73rd year.

Mr. Warden was born in Sheboygan, Wis., March 15th, 1868. When nine years of age he came to East Jordan with his mother and step-father, George Bowen. It is from the step-father's name that Bowen's Addition received its name.

On February 4, 1889, he was united in marriage to Josephine Deits at Boyne City. They resided for many years near East Jordan following the farming occupation.

He is survived by the wife. Two daughters—Ottie Scheffles of North Dakota; Fae Turner of Dearborn. A brother, Willard Warden of West Virginia. Two half-brothers, Isaac and Ashland Bowen, East Jordan. Seven grandchildren and four great-grand children.

Funeral services were held at the Huffman Funeral Home last Friday afternoon, June 5th, conducted by Rev. C. W. Sidebotham, pastor of the Presbyterian Church. Burial was at Sunset Hill.

Among those here from out of town to attend the funeral were: Mrs. Fag Turner, Mr. and Mrs. Peter Dalton, Donald Turner, Lois Turner, Mr. and Mrs. Victor Henderson and son James, Jos. Heymes, of Dearborn; Vern Anderson, Tecumseh; Darwin Anderson, Adrian; Mr. and Mrs. Milo Scheffles, Mrs. Al Scheffles, Muskegon; Mrs. Rose Irwin, Mrs. Nita Johnson, Petoskey.

AN INVITATION

We, Ralph Josifek and Lucille Shupniewitz, invite each and everyone to our wedding dance at the Bohemian Settlement Hall on Thursday evening, June Twenty-Fifth.

Clean Grain Bin Aids War Effort

Another war job that is allied with sensible farming practice is to clean out grain bins and avoid weevil infestation before the 1942 crops are harvested.

Transportation has become an emergency. Great Lakes grain boats are to be restricted mostly to hauling ore. Central elevators are full and can't hold much of this year's crops.

Those are factors cited by Ray Hutson, head of Michigan State College entomology department, as reasons for taking better care of grain this year and not losing any of the crop to weevils. Farmers likely will face difficulty in obtaining fumigants, so prevention is doubly better than the fumigating cure.

"Clean out the grain bin corners. Wipe the broom and burn the rubbish," says Hutson.

"Cover holes and scrub out the cleaned bin with hot water and lye. Use of red rosin building paper for lining a bin is recommended to help keep the bin clean of insects."

Principal "don't" stressed by Hutson is not to put the new grain in a bin with old grain. That is one of the easiest ways to promote the happy home life of the grain weevil, in Hutson's opinion.

Park Attendance Lower This Year

Checking attendance records for 30 popular state parks for clues to what may be expected in the way of state park use this summer, conservation department officials have found that visitors in the week including Memorial Day this year were only two-thirds as many as in the same year ago, a drop from 223,000 to 150,000. The decline in the number of camp permits is proportional, amounting roughly to two camps for each three in 1941.

Sample state parks among those for which records are complete are: Bay City, with 5,700 this year in the week including Memorial Day as compared with 15,000 in the same week a year ago; Rochester, 16,500 against 25,000 a year ago; Cass Lake, 15,000 against 25,000; Hayes, 6,000 against 9,600; Muskegon, 8,700 against 10,800; Sterling (near Monroe) 7,400 against 11,200; Pigeon, 1,200 against 2,800; Onaway, 800 against 3,950; Silver Lake, 4,200 against 4,250; and for three upper peninsula parks, Indian Lake, 785 against 825; Palms-Book (Big Spring) 480 against 950; and Wells, 774 against 1,250.

Records for state park attendance to date this season show the Memorial week drop was no exception to the general trend. Bay City park's attendance to date is 37,000, compared with 49,000 at the same time a year ago; Rochester's is 80,000, compared with 114,000; East Tawas has 18,000 compared with 38,000; Hayes has 13,500 compared with 37,500; and Holland has 114,650 compared with 233,725.

The conservation department is now operating 40 state parks and three park sites, after closing 10 parks that were operated last year.

Extension Groups Achievement Day

AT EAST JORDAN TOURIST PARK THURSDAY, JUNE 18th

Over 200 Extension women throughout the county are already making plans for their big Achievement Day program to be held at the East Jordan Tourist Park beginning promptly at 7:00. A big community pot-luck supper will open the event. Due to the world conditions it was decided that an evening program would be most desirable and also the entire family could be in a position to attend.

The activity will start in the neighborhood of 8:30 with recreational features. At 9:00 a program will be given inside the new building and will include special numbers, talks, and moving pictures. Miss Ruth Peck, who has led the groups in their Extension projects will give a report on the results and accomplishments in the last project on Home Furnishing. Miss Roberta Hershey, Specialist in Nutrition, will present a short talk on nutrition. Miss Hershey at one time was the leader in this county and she is well known to a large number of Extension folks.

Following this a movie program will be presented which will feature the film "London Air Raids." While a few people have seen this film, fully 95% of the folks in the county have not had the opportunity. This film is loaned by the State Police and will do more than anything else to show us what air raids might mean. In other words any person seeing this film will be more anxious to cooperate with all defense efforts that are being carried on in the county.

Kindly remember this program is for the entire public and the Extension ladies who have completed this project in Home Furnishing will be delighted to have you as their guests. The Tourist Park has wonderful facilities. Don't come alone; make plans with your neighbors to eat together. Bring the entire family as we have purposely eliminated the day program so that all members of the family can be there at 7:00 p. m.

"Mining" rubber tires in Michigan. Thanks to ingenuity of Dow Chemical company scientists at Midland, this accomplishment may be a partial solution to today's war transportation problem.

An "unofficial" news story, published by the Midland Daily News from sources said to be very reliable, resulted in a hurried visit to Midland by Akron rubber company officials. William Low, president of the big chemical works, was called to Washington. The exclusive news break held promise of being one of the big newspaper stories of 1942 for public interest has been at fever pitch over the prospect of nation-wide rationing and a gradual withdrawal of millions of motor vehicles from roads as rubber tires wore out.

A combination of petroleum, sulphur and salt brine— all obtained from the ground— is employed by the Midland chemists to make a synthetic rubber product known to the trade as "thiokol."

Using a patented process developed by the Thiokol Corporation, the Michigan chemists collaborated in experiments for application of "thiokol" rubber for the retreading purpose. Tires were retreaded with the new synthetic rubber, and after 5,000 miles of highway travel they showed little evidence of wear. Furthermore, the new rubber can be applied in a simplified method that reduces cost and time.

Petroleum and salt brine are both produced in Michigan. Sulphur comes chiefly from the Southwest.

By utilizing the present shipping facilities the Dow company believes it would be possible to produce enough of the synthetic rubber by the end of 1942 to retread 1,000,000 automobile tires each month.

It sounds too good to be true. Farm chemistry, the science of utilizing farm products in industry, has had a national exponent in Dr. William Hale, Dow scientist at Midland.

Dr. Hale has foreseen the day when over-production of the farm will be a historical reference to the pre-World War II era. A few weeks ago Vice President Wallace made a speech in which he spoke of "the people's revolution" in this reversal of traditional thinking.

Alcohol, distilled from grain, can be utilized for production of buta-

(continued on last page)

Here AND There

BY MEMBERS OF THE EAST JORDAN GARDEN CLUB

A new coat of white paint on the Mike Gunderson residence makes it stand out in relief. The Maples in front, were planted about 60 years ago and afford fine shade as well as attractiveness.

"With the kiss of the sun for pardon And the song of the birds for mirth One is nearer God's heart in a garden Than anywhere else on earth."

What a delight to see the glory of gardens in June! The stately Iris the flaming Poppy in her gorgeous gown of red, and the Queen of all flowers the rose. "The world is full of roses, the rose is full of dew, the dew is full of heavenly love, that drips for me and you."

What a pleasure to see the Victory gardens throughout the city. Potatoes and peas in bloom and wonderfully advanced for this time of the year. And we know it takes patience, pluck and perseverance to have a successful garden. The garden at Roseawn, has border of sunflowers to persuade the birds to "sign a lease" to stay on the property. The Bluebirds have been nesting there for over 20 years, also the Orioles. There are 15 wren houses and gardener gets a real helper. Their song brings good cheer and they also fight the destructive pests, as they live almost exclusively on grasshoppers, beetles, bugs, and caterpillars, so they are a real asset in a garden.

We must not forget to mention the miracle of paint which greatly beautifies the "Spring Clean-up" in our city. Bader's Standard Service has "brightened up the corner where they are" by new coat of paint. Malpass Coal Station also had a paint "touch up," see that Carson's have given a new coat of red to their outdoor furniture. So Garfield and Main corner looks quite fresh and cheery. Thanks to all our enterprising friends and neighbors. Good Luck and success to all the Victory Gardens.

Keep the good old U. S. A. Flag flying.

"Fishing Season" For Lake Fishing

Two weeks from today, on June 25, "fishing season" opens for the many thousands of Michigan anglers who think of fishing in terms of bass, bluegills and panfish, and whose homely equipment features worms, a cane pole and an anchored rowboat.

Cold and rainy weather that has kept pike and trout fishermen idle in many parts of the state in recent weeks after the phenomenally perfect days of the trout season opening also have kept many a lake fisherman anxious about the success of the late spring spawners. State fish hatchery men observing brood stock on nests in rearing ponds noted some damage to the first bass fry produced but the later spawning bluegills have so far been unaffected by the unusual season.

When fishing becomes permissible on all of Michigan's 6,454 inland lakes June 25, the season will be open on every Michigan game and food fish except two that have year around protection: the grayling and sturgeon. The inland lake rules are changed very little, but no creel this year may contain more than five "big game fish"—black bass, or northern pike or walleyed pike or all three combined. No more than 15 bluegills may be taken, nor more than 25 panfish, including bluegills.

Though Michigan's inland lakes are so well distributed about the state that travel restrictions may not seriously hamper many fishermen, conservation department officials will be watching the season opening closely to observe indications of decreases in fishing pressure and fishing license sales.

ON THE OFFENSIVE AMERICA!

Wars are won by attacking, not by sitting in a fort!

And today America is taking the offensive against the Axis with hard-fighting, non-stopable men and material!

We're taking the offensive, too, against the enemy at home—the inflationary 6th column that blows prices sky high. You can help in both fights by saving at least 10% of your money in U. S. War Bonds every pay day. Attack the Axis with your dollars today. You can start with as little as 10c War Stamp and you can get a \$25.00 War Bond (maturity value) for only \$18.75—at your local post office, bank or other convenient sales agency.

U. S. Treasury Department

War-Time Restrictions On Telephone Service

While the Michigan Bell Telephone Company expects to be able to meet most requests for service at its summer resort exchanges this year, many persons still will be unable to get service because of war restrictions, officials of the company stated today.

Company officials also pointed out that new residential extension telephones will not be available at any point except when essential to the "public health, welfare, and security."

Telephone installations may be curtailed, officials said, if they involve considerable line construction. Only party-line service can be provided in some localities. Service also will be difficult to obtain if traffic over telephone lines at an exchange already is approaching switchboard capacity. That will mean that, at some points at least, some summer homes that have had service in past years may be unable to get it this year.

Every application for service, the company said, will be decided on its individual merits and the available facilities, including lines and central office apparatus and capacity, will be required to determine whether service can be made available.

Restrictions to date affect mostly those exchanges where service demands are greatly increased as a result of military or industrial activities arising from the war effort. Officials said the situation may become more severe should the War Production Board find it necessary to expand its restrictions in order to save even more materials than under present restrictions for the war effort.

Bible Lectures At The Bennett School House

Five Bible Lectures will be held at the Bennett School at 8:30 p. m. Sunday, June 14th to Thursday, June 18th inclusive. The public is cordially invited.

Elder S. W. Hyde

Change in Library Hours

Summer Schedule starts June 15th. Afternoons— 3:00 p. m. to 5 p. m.

Evenings— 7:00 p. m. to 8:30 p. m. Tuesday and Saturdays.

MARRIAGE

McKenzie — Holmquist

Announcement has been received of the marriage of Barbara Loveday McKenzie, daughter of Mr. and Mrs. Walter I. McKenzie, of Birch Crest Drive, Detroit, to Pvt. Thomas Henry Holmquist, of the 52nd pursuit squadron, son of Mr. and Mrs. Henry Holmquist at Wilmington, N. C., Friday, May 29.

AAA PROGRAM IN CHARLEVOIX CO.

Two additional cars of AAA fertilizer will be received very shortly in Charlevoix county for use in the 1942 "Food for Freedom" program. Notice of shipment was received last week. One car of 20 percent phosphate will be distributed at East Jordan and one car of 0-20-20 mixed fertilizer at the Charlevoix Co-op's. Farmers who have not yet received their full quota will be notified from the county office as soon as the shipments arrive. To date, 330 tons, fertilizer have been spread on hay and pasture lands under the provisions of the 1942 AAA program, in this county.

This week, AAA farm reporters are beginning the 1942 War Production Check-up on Charlevoix county farms. Data will be gathered from farmers regarding the efforts they are making to increase production this year over past years. This data will serve as a report to the Nation on the status of the agricultural war production effort in this area and will be the basis for future planning on agricultural output for war.

Our county AAA office is now settled in their new quarters in the former Chamber of Commerce building at the corner of Lake and Water Street, Boyne City. We cordially invite you to visit our office which is newly located for your convenience.

GETTING MORE MILEAGE OUT OF YOUR LIFE

How to keep your body in the best of condition by following the rules of the National Nutrition Program and by eating muscle-building proteins and the minerals your bones and teeth must have—pointed out by Dr. Leonard Keene Hirschberg, director-in-chief of the Institute for Medical Research—in The American Weekly with this Sunday's (June 14 issue) Detroit Sunday Times.

Home Canning Demonstration

WILL BE HELD IN CHARLEVOIX COUNTY, TUESDAY, JUNE 16th

How to fill the pantry and basement with the best from the garden is to be demonstrated in a series of four meetings planned for Charlevoix county on Tuesday, June 16th. These meetings will be held both forenoon and afternoon and will be in charge of Miss Roberta Hershey and Miss Ruth Peck, Assistant State Home Demonstration leaders.

The two forenoon meetings scheduled will each start at 10:00, and will be held in the Marlon Center and Maple Grove Grange Halls. The two afternoon meetings will each start at 2:00 promptly at the Boyne River and Peninsula Granges. With two leaders in the county, two meetings can be held at the same time, so please select the one that is most convenient for you to attend.

A variety of methods are to be shown when a specialist from Michigan State College will meet with volunteers from extension groups and at other organizations.

These "volunteers" are pledged to be contact persons in their own neighborhoods. They will in turn hold community halls and in their own kitchens, to show the latest and easiest ways to preserve fruits and vegetables.

Food preservation includes up-to-date ideas on canning, drying, freezer locker and of storing methods.

By using volunteers, the number of leaders is expected to include several thousand women, who, acting as local contact persons in their own communities will hold meetings and pass out bulletins or help other women fight in their own kitchens.

Nutrition leaders of the extension groups are taking the lead in contacting others. Any woman willing to be a volunteer planner is asked to get in touch with the county extension office in Boyne City for full particulars, or to come to the demonstration held nearest to her own home.

Good food canned or stored at home will provide good eating next winter. Thrifty women all over Michigan are making plans to insure a bountiful supply for their families and also are helping teach others the easiest way to have plenty in the home food supply.

B. C. Mellencamp
Co. Agr'l Agent

Engagement Announced

Mr. and Mrs. Floyd Potts announce the engagement and approaching marriage of their daughter, Marion, to John D. Pray, son of Mrs. Eva Pray of East Jordan. The marriage has been set for early in September. Mr. Pray is a student at Michigan State College, East Lansing.

The announcement was made at a 7 o'clock dinner on Thursday evening given at the Potts home. The guests besides Mrs. Potts and Miss Potts were Mrs. Frank Jacobs, Mrs. Leon Potts, Mrs. Ralph Ernst, Mrs. Don Ernst, Miss Lillian Leismser and Miss Signe Isaksen of Charlevoix.

An arrangement of red peonies, centered the dinner table. Petoskey Evening News, June 5th.

Pre-Nuptial Shower

Miss Jennette Ter Avést, a June bride-to-be, was honored with a pre-nuptial shower at the home of Mrs. Sherman Conway, Friday evening, June 5, assisted by Mrs. Gerrit Drenth.

The evening was spent in games. Many lovely gifts were received by the honoree.

BOWLING

The East Jordan Recreation, closed for several weeks, will open very shortly. The six alleys have been resurfaced by experts from Detroit and are now undergoing the slow procedure of lacquer finishing. Painters will take over redecorating this week and it is expected the job will be completed in time to reopen Saturday, June 20th.

STATE LAND SALE

NOTICE IS HEREBY GIVEN, That state lands in Charlevoix County upon which applications have been filed by the former owners, will be offered for sale at public auction as required by Section 6, Act 155, Public Acts of 1937, as amended, Tuesday, July 7, 1942, at ten o'clock in the forenoon, Eastern War Time, in the courthouse, Charlevoix, Michigan.

Lists of properties to be offered are available at the Charlevoix County Treasurer's office and the Lands Division, Department of Conservation, Lansing.

Department of Conservation
24-1 P. J. Hoffmaster, Director

WEEKLY NEWS ANALYSIS

Jap Air Thrust at Alaska and Midway Seen as Reprisal for Doolittle Raid; U. S. Declares War on Balkan Nations; RAF Smashes Reich War Industries

(EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.)
Released by Western Newspaper Union.

The harbor and town of Dutch Harbor, Alaska, U. S. naval base raided by Japanese bombers, is shown above. The air and naval base which threatens Japan's northern flank and forms a "springboard" for eventual offensives against Nippon is around the point to the left.

ALASKA FRONT: Japan Strikes

As had been expected ever since General Doolittle's spectacular air raid on Japan last April, Japanese warplanes struck at the American base at Dutch Harbor, Alaska. The first two attacks occurred within six hours of each other.

The fact that fighter planes accompanied the bombers on their raids indicated that the Japs came from aircraft carriers, since the nearest enemy island is 1,400 miles away—far beyond the range of fighter craft.

Significance of the Jap attack on the most formidable American bastion in the Aleutian archipelago lies across Japan's exposed northern flank. They offer an effective "springboard" for eventual offensives against Nippon.

By neutralizing Alaska and knocking out American air bases, Japan would protect its flank, delay indefinitely the possibility of American invasion via this route and shut off communications and supply lines to Russia in the event of a Japanese attack on Siberia.

Midway Island

When Jap task forces undertook an attack on Midway island, nearest American base to Japan, 24 hours after the Dutch Harbor assault, the growing power of American air and naval strength manifested itself.

Admiral Chester W. Nimitz, commander of the Pacific fleet, announced that his forces had damaged a battleship and an aircraft carrier and exacted a heavy toll of attacking planes.

BALKAN FOES: U. S. Acts

President Roosevelt asked for and obtained a declaration of war by congress on the three Nazi-stooge governments of Bulgaria, Hungary and Rumania.

On the home front this newest war move meant a general round-up of enemy aliens of these nations and a freezing of their funds.

On the European front it was calculated to produce a two-fold effect. It would underline closer American collaboration with Russia which long has desired such an action and contribute hearteningly to the Soviet's morale. It would serve notice on Hitler's three Balkan allies that they could not escape the consequences of their association with him. Few, however, expected America's war effort against the three new enemies to go beyond speeding up shipments of essential materials to Russia.

WAR WEAPONS: Army Has Plenty

Expanding power of Uncle Sam's army was disclosed in a report of Undersecretary of War Robert P. Patterson, who revealed that the army has all the weapons it can send abroad under present shipping conditions and enough to arm every soldier in the United States.

Mr. Patterson said the army today requires twice as many light arms per 1,000 men as it did before the extensive use of parachute troops.

SALVAGE PROGRAM: Patch and Pray

Greater civilian co-operation with the salvage program to speed up the flow of scrap metals and rubber loomed as William L. Batt, chairman of the requirement committee of the War Production board, warned that industry must get ready to "patch and pray."

Mr. Batt disclosed that many essential war materials are now short and declared that "our civilian economy is fast going on a minimum subsistence standard."

WHEAT STORAGE: Wickard Gets Bins

The answer to a question that has troubled Secretary of Agriculture Claude R. Wickard for weeks past came from the War Production board in the form of a "Yes."

The "Yes" was that he can have a large supply of lumber and wire nails to build bins for thousands of farms for storage of 200 million bushels of excess wheat.

With grain elevators already pressed for storage space and transportation facilities straining under a wartime peak, the problem of what to do with surplus wheat was becoming serious. With an estimated new crop of 811 million bushels added to a 630 million bushel carryover, the United States would have 1,441,000,000 bushels this summer.

Domestic consumption and immediate shipments abroad would take 721 million bushels. Of the 718 million bushels remaining, storage space would be available for 500 million bushels. The remaining 218 million bushels would have to be stored in farm bins built with lumber and nails.

GASOLINE: Permanent Rations

From Washington came the announcement that a permanent gasoline rationing system had been devised by the Office of Price Administration for the East coast that would entitle motorists to an average of 2,880 miles of travel annually, or about 55 miles weekly.

It was indicated that the system would become effective on July 15. Observers were of the opinion that the new plan might serve as a model for nation-wide gasoline rationing when that measure is deemed essential to conserve rubber tires.

The new plan would eliminate the controversial "X" cards entitling their holders to unlimited quantities of gasoline.

LABOR FRONT: Lewis Denounced

Accusing his former close friend and associate John L. Lewis, head of the mine workers of being "Hell bent on creating national confusion and national disunity," Phillip Murray, CIO president, sponsored a resolution declaring that Lewis is "attempting to sabotage the defense program and spread the spirit of defeatism."

Murray charged that Lewis proposed to him that they go before the CIO convention, in Detroit last fall and fight President Roosevelt's foreign policies. He said he rejected the proposal as "treasonable."

The CIO blast followed by only a few hours a pledge from Mr. Lewis of his full support of the war effort and flat rejection of criticism that his policies are inimical to victory.

HANGMAN'S END: Czechs Pay Price

REINHARD HEYDRICH
"Butcher of Moravia."

Reprisal measures which followed the wounding of Reinhard ("The Hangman") Heydrich in Prague, by a Czech patriot, increased in swiftness and severity when the news of the death of this sadistic executioner became public. The shooting of hundreds of Czechs suspected by the Nazis of complicity in the plot to rid the world of Heydrich was reported.

Ironically enough, the "butcher of Moravia" died in much the same manner as hundreds of unfortunate hostages he had ordered shot in France, Holland, Belgium, Norway, Poland and other countries during his hated career.

Hard-bitten Heydrich earned the soubriquet of "Der Henker" or hangman of the Nazi regime by reason of his ruthless application of repressive measures—usually the firing squad or the gallows—against those who dared challenge Hitler's rule.

The successful attack on this Nazi leader emphasized again the smoldering spirit of unrest in German-occupied countries—a spirit ready to flame high when Reich reverses make possible organized uprisings.

MISCELLANY:

BERNE.—German beer drinkers will find their favorite brew less potable from now on, according to Nazi announcements. Hereafter, no beer may be manufactured from malt, the basic ingredient for food in tablet form needed by the Reich's fighting forces on the Russian front. The "no malt" order followed the announcement that dining cars would no longer be operated.

At Barrage Balloon Training Center

Barrage training center, Camp Tyson, Tenn., where crews are trained to handle, sail and repair the huge gas bags. Upper left: Trainees seated around their instructor. Lower left: Gas filtered through the purification plant being forced through the high pressure manifold to be stored for re-use. Right: Sewing a seam in a barrage balloon—"a stitch in time."

Flock for Service on Navy's PT-Boats

The successes of our motor torpedo fleet in Philippine waters have brought a flood of applications to the navy from young officers who want to serve aboard the boats. Special schools have been set up for this purpose. At the left a group of officers is receiving instructions in the use of depth bombs. Picture at right shows a group of them gathered about an Orlikon automatic anti-aircraft cannon.

Salvage Work in Desert Battle Zone

This pile of shell cases is part of the huge collection of material salvaged from the battlefields of the Libyan desert by the British. The cases will be used again, for they are of valuable brass and copper. In many instances the British have taken Italian guns and ammunition and have used them against their former owners.

New War Bonnet

Arnold Headley, seaman, second class, is a full-blooded Arapahoe Indian from Ethete, Wyo. Here he is demonstrating with machine gun bullets at the U. S. naval air station at Corpus Christi, Texas, just how his ancestors looked with a head dress of war feathers. Headley is the station boxing champ.

To Manage All-Star Service Team

Lieut. Gordon ("Mickey") Cochrane has been appointed manager of the all-star service baseball team composed of former minor and major league players now in the navy. Shown above are (left to right) league players Gene Tunney, in charge of sports activities for the navy; Col. John Thomas Taylor, assistant director, bureau of public relations (war department), and "Mickey" Cochrane.

Gal in Every Port?

"Just one gal is enough for me," says an old song, but this sailor seems to be of a different turn of mind. While his arms are quite full, his wink speaks volumes.

FIRST-AID to the AILING HOUSE

by Roger B. Whitman
Roger B. Whitman—WNU Features.

MOSQUITOES ENTER HOUSE AT NIGHT THROUGH CHIMNEY FLUES

"ALTHOUGH my living-room is tightly screened," writes a correspondent, "we find many mosquitoes in it, especially at night. In spite of careful watching, we have not seen any coming through the screens, and are completely puzzled as to how they get in. Can you make any suggestions?"

If there is a fireplace in the room, and being a living-room there probably is one, the mosquitoes are undoubtedly coming down the chimney. At night when the room is lighted, the flying insects see the glow down the flues, and are attracted by it. The remedy is to keep the throat-damper closed; or if the fireplace has no throat-damper, the throat connecting with the flue can be stuffed with newspapers. I feel sure that this precaution will end the trouble. Of course, with a fire going, the insects will not come down. Naturally if the fire is to be lighted on a cool evening, the damper must be opened, or the newspapers taken out.

Cellar Wall Finish

Question: My cellar walls are tinted with something that I believe comes from acetylene gas. A second coat is needed. Can you tell me what the material is and where I can get more of it?

Answer: That material is actually a form of lime and is left over when acetylene gas is made from calcium carbide. This gas is used for welding and for other purposes, and welders are usually glad to give away the residue that comes from the generators. Companies making the generators, as well as the producers of calcium carbide, issue booklets describing the many uses for carbide-residue, including whitewash.

Hornet's Nest

Question: There is a hornet's nest in a crack in my roof, directly above my back porch door. I am in constant fear of being stung. How can I get rid of it?

Answer: Tackle the job at dusk on a cool evening. When the hornets will be partly dormant. Using a spray filled with kerosene, approach the nest quietly, and force the spray violently into the crack. The hornets will be stunned before they can get out. The crack can then be plugged with putty or otherwise. Before starting, you should observe carefully to note whether or not there is another opening to the nest, so that also can be closed.

Too Much Humidification

Question: Last summer I added a humidifier to my heating plant. The humidity varies from 30 to 40 per cent. The guide calls 40 to 60 per cent normal. My windows steam up considerably and the woodwork is getting black. What should I do?

Answer: Your percentage of humidity is evidently too high. The black on the woodwork is mildew. Shut off the humidifier for a few days and give the house a chance to dry out. You should turn on the humidifier only to the point at which the windows just begin to cloud over. That is your limit.

Sealing Sappy Wood

Question: When resinous wood is used for clabboards, is it only the knots that need shellacking to prevent bleeding into the paint? Should the shellac be sandpapered before painting?

Answer: All resinous places should be sealed. But before shellacking wash liberally with benzine to clear all of the surface pores of the resin, so that the shellac can soak in. Sandpapering will be necessary only when the shellacked surface is smooth and glossy.

Seasoning a Dutch Oven

Question: I recently purchased a cast iron Dutch oven which I cannot use because rust-forms as it is being used. Some one told me that such a utensil has to be "seasoned." How is this done?

Answer: One method is to render a chunk of beef suet in the Dutch oven, then rub the hot fat into all parts of the oven while it is hot. Let it stand for a half hour, then wash with soap and water. Do not use scouring powder.

Attic Insulation

Question: Where can I get information on the insulating of two rooms that I intend to build in my attic?

Answer: All manufacturers of insulating materials issue instructions for the insulating of attics, both with and without rooms. You can get these instructions direct from the manufacturer, from lumber yards and from dealers in building material.

PATTERNS SEWING CIRCLE

BANDS of ric rac on a slim waisted, full skirted apron! Inspires the sewing urge in you, doesn't it? Every woman who likes to "make her own" will enjoy sewing this useful, fresh flatterer apron—a style which can be completed with just two pieces. Not only is the pattern simplified, the apron is designed to put on in a jiffy—it ties in place firmly! the

straps stay up and it gives your dress complete protection.

Pattern No. 8127 is made for sizes 14 to 42. Size 16 requires 1 3/4 yards 32 or 35-inch material, 5 yards ric-rac braid for No. 1; 7 1/2 yards bias fold to trim No. 2. Send your order to:

SEWING CIRCLE PATTERN DEPT.
Room 1116 Chicago
211 West Wacker Dr.
Enclose 20 cents in coins for each pattern desired.

Horace Greeley Disliked Being Disillusioned

Horace Greeley, famous editor of the old New York Tribune, was notoriously absent-minded. While he was at work at his desk, a water pipe might spring a leak over his head and drip down on him for hours without his being in the least aware of it.

One cold Sunday morning, Mr. Greeley stepped into the Tribune office after church. Taking off his boots, he sat down before one of the hot-air registers to warm his feet and read the papers.

After a while the janitor happened by and, seeing the boss there, exclaimed: "There's no heat coming up from downstairs, Mr. Greeley. The boiler is being fixed."

The editor glowered at the man. "You fool," he yelled. "What did you want to tell me that for? I was just getting nice and warm!"

Earned Fortune

That which we acquire with most difficulty we retain the longest; as those who have earned a fortune are commonly more careful of it than those by whom it may have been inherited.—Colton.

Nursemaid to a 20-ton Clipper!

HE'S A "SELF-STARTER"

PAN AMERICAN'S JOE WULLER is chief of the "Beaching Crew" for the big, ocean-flying-South American Clippers. He says: "You've got to keep your eyes open on a big job like this. The breakfast that helps keep me in there pitching is a big-bowl of Kellogg's Corn Flakes with fruit and plenty of milk! It's a great favorite here at the employees' cafeteria, too."

A STOOL often looks better in front of a desk or telephone stand than a chair with a high back. A substantial wooden box may make the foundation, and if well padded and smartly covered will be as attractive as anything that you could buy.

Before shopping for materials check over things on hand. Moss, horse hair, and even feathers from discarded upholstered pieces may be sewn in a cheese cloth bag and washed before using again. Worn draperies and bedspreads usually have unfaded good pieces in them that may be used for covering a small piece like this.

NOTE: Have you sent for a copy of the new BOOK 8, in the series of homemaking

Playing the Game

Oh!—Unseen Power that rules and controls the destinies of the children of earth; teach me the symphony of life so that my nature may be in tune with Thine . . . If I win, crown me with the laurels fitting to be worn by a victor, and if I fall, may it be with my face to the foe, fighting manfully, and falling, fling to the host behind—play up, play up, and play the game.—William J. Robinson.

Pattern 7272 contains instructions and charts for making the rug; illustrations of it and stitches; materials needed. Send your order to:

ASK ME ANOTHER?

A General Quiz

The Questions

1. Whose motto was this: "Everything comes to him who hustles while he waits"?
2. What was the "Invincible Armada"?
3. What fraction of a mile is a furlong?
4. How many railroads enter the City of Chicago?
5. In American political history the Free-Soil party sought to restrict what?
6. What is the second largest state in the Union?
7. Which is the oldest royal family in the world?

The Answers

1. Thomas Edison.
2. King Phillip of Spain's fleet that tried to capture England in 1588.
3. One-eighth.
4. Forty-one.
5. Slavery.
6. California.
7. The Japanese. The present emperor is the 112th of his line, which trails back to 660 B. C.

While There Is Life

Do not keep the alabaster boxes of your love and tenderness sealed up until your friends are dead. Fill their lives with sweetness. Speak approving, cheering words while their ears can hear them and while their hearts can be thrilled by them.—Henry Ward Beecher.

Casualty—1,000 miles from the enemy

ALMOST as fatal as a bullet or a shell is the breakdown in the spirit of a sailor or a soldier. Our men have the finest spirit in the world. But it must be maintained in the American way.

They must not be made to feel that they are mere automatons, fighting machines, as the armed forces of the dictators have been made to feel.

Life in our navy and army is hard. Discipline is tough. It must be. But there also must be moments when the sailor or soldier is treated as Mr. Somebody-or-other.

That's where the USO comes in. For the USO is the banding-together-of-six great agencies to serve one great purpose—to see that our boys in the camps

and naval stations have a place to go, to turn to, a "home away from home."

The duties of the USO have more than doubled during the year. Its field of operations has enlarged to include almost the entire face of the globe.

To carry on its all-important work, it needs funds. It needs your contribution. No matter how small you make that contribution, it needs it. Now.

You are beset by requests for help on all sides. By all means, try to meet those requests. But among them, don't neglect the USO.

Send your contribution to your local USO committee, or to USO, National Headquarters, Empire State Building, New York.

Give to the USO

PENINSULA
(Edited by Mrs. E. Hayden)

Because of telephone trouble news is impossible to get this week.

F. K. Hayden of Pleasant View farm goes to Antrim Co. Monday to shear sheep for Irvn Crawford.

Mr. and Mrs. Derby A. Hayden and family of Bob White farm helped with the farm work at Orchard Hill Tuesday and Wednesday.

There were 24 at the Star Sunday School June 7. It was decided to have the Children's Day and rally June 14 in unison with the Tatlatler School at the Star.

Mr. and Mrs. S. A. Hayden and family, C. A. Hayden and Mrs. J. W. Hayden of Orchard Hill called on the D. A. Hayden at Bob White farm Sunday.

Mr. and Mrs. Orval Bennett of Honey Slope farm visit their little daughter, Naomi at the Charlevoix hospital every evening and report her no better.

Mr. and Mrs. Frank Lisher and family of Petoskey and Mr. and Mrs. Lewis Kitson of Advance Dist. were supper guests of the A. Reich family at Lone Ash farm Sunday.

Mr. and Mrs. Ralph Kitson of Deer Lake gave a farewell dinner at their home Sunday for their son Lewis who leaves Monday evening for the service. The young people also had a party on the beach Saturday evening for him.

Company at Orchard Hill Sunday evening were Mr. and Mrs. Frank Lisher and family, Petoskey, Mr. and Mrs. S. A. Hayden and family of Dearborn, Mr. and Mrs. F. K. Hayden and family of Pleasant View farm and W. C. Howe of Overlook farm.

Mr. and Mrs. S. A. Hayden and family of Dearborn pulled into Orchard Hill for breakfast Sunday. They spent the day calling on friends returning to Dearborn, Monday a. m. They brought word that Mrs. P. Looze formerly of Cherry Hill but now of Detroit had been very ill in the hospital for an operation for some time but was expected home June 7.

SOUTH WILSON
(Edited by Miss Ardith Schroeder)

Mr. Joe Sysel was over to Pete Stanek on business Monday evening.

The Lutheran Ladies Aid met at the home of Mrs. Luther Brittnall, Thursday.

Mr. and Mrs. Peter Stanek visited his father Mr. Frank Stanek Sr. and family Sunday afternoon.

Mrs. Anthony Korton, Joe Korton and James Novak were Sunday callers on Mr. and Mrs. Frank Rebec.

Mr. and Mrs. Charles Schroeder and children were Tuesday evening callers on Mr. and Mrs. Luther Brittnall.

Mr. and Mrs. Fred Zoulek and children of Echo were Monday evening callers on Mr. and Mrs. Peter Zoulek.

Mr. and Mrs. Clifford Pumfrey & daughter of Kalamazoo are spending a few days at the Frank Lenosky home.

Mr. and Mrs. William Stanek and family of East Jordan visited his brother, Mr. and Mrs. Peter Stanek Sunday evening.

Mrs. James Canda and Mr. and Mrs. William Zoulek and children were Sunday callers on Mr. and Mrs. Peter Zoulek.

SOUTH ARM
(Edited by Ruth Goebel)

Walter Goebel and daughters and Andrew Wenderling were Sunday dinner guests at Mr. and Mrs. Herbert Trier of Petoskey.

Mr. and Mrs. R. V. Liskum and children were Sunday supper guests at the home of Mrs. Liskum's parents, Mr. and Mrs. Charles Murphy.

Mr. and Mrs. Rhine Staudenmeyer and children and Mrs. Staudenmeyer's sister were Thursday night supper guests at the George Nelson home.

Mr. and Mrs. Rhine Staudenmeyer and children and Mrs. Staudenmeyer's sister all of Chicago were Monday night visitors at the Walter Goebel home.

Mr. and Mrs. Rhine Staudenmeyer and children Fern and Roy and Mrs. Staudenmeyer's sister who spent a week here at their farm, returned to Chicago Saturday. Mrs. Emilia Goebel and Mrs. Walter Goebel returned with them.

Miss Virginia McCarthy and her girl friend both who are in nursing training at Grand Rapids are spending month's vacation here with Virginia's mother, Mrs. Robert McCarthy. Her dad drove her home and returned Tuesday to Muskegon where he is employed.

10% OF INCOME IS OUR QUOTA IN WAR BONDS

Texas Longhorn Not to Die Out

Herd of 145 of Picturesque Cattle Cared For in Wildlife Refuge.

WASHINGTON. — At one time nearly the whole plains country from the Gulf of Mexico to the Canadian border "belonged" to the longhorn. Today, according to the bureau of biological survey, fewer than 250 real Texas longhorn cattle are in existence.

The largest herd now is at the Wichita Mountains wildlife refuge near Cache, Okla., where about 145 of these picturesque animals roam the ranges under the biological survey's protection. Eighteen longhorns are on the Fort Niobara game preserve near Valentine, Neb., and others are in private ownership.

The cattle at the Wichita refuge descend from 30 longhorns brought to the area in 1927, when it was administered by the forest service. One member of that original herd from the coastal plains of Texas still lives—"Old Red," a gaunt cow more than 20 years old.

Longhorns may be described as leggy, hardy, active animals with long keen horns and an aggressive disposition. In color they range from black, brindle, dun, spotted, buckskin, red, roan, and white to various combinations of these colors. Special characteristics are coarse hairs about the forehead and in the ears, and a fish-shaped prominence of the bone along the top of the rump just back of a line across the hips.

Breed Slower to Develop.
Slow to grow, a longhorn requires two or three more years to attain maturity than do other breeds of cattle. As long as the animal grows, the horns continue growing. On record are horns with spreads of six, seven and even eight feet, from tip to tip.

Saga of the longhorn goes back to 1521, when the first cattle were brought to American shores by Gregorio Villalobos, a governor-general sent to "New Spain." John Hutton of the forest service and probably the outstanding living authority on longhorns, states that "these Spanish calves were the progenitors of the millions of leghorns that spread from Vera Cruz northerly over the coastal plains of Texas and the plains region of the Far West . . . They became the pioneers of our western cattle industry."

After the Civil war these cattle were still numerous. Then live stock breeders, however, began raising heavier, beefier cattle, and by 1920 it became apparent that only prompt action could save the Texas longhorn from extinction.

Attention was forcefully called to this fact by the late Will C. Barnes, public official, author and one-time cowman, who made it evident that the longhorn was dying out and should be preserved.

Wide Survey Made.
Barnes and John Hutton began a long trek back in July, 1927, in search of longhorns when they were working with the forest service. Not until the quest got under way did live stock breeders realize how close to extinction the longhorn was. In their efforts, the two foresters traveled more than 5,000 miles and examined more than 30,000 head of Texas cattle before they collected a herd of suitable specimens of the longhorn type.

Little by little, a herd of 20 cows, three bulls, three steers, and four calves was collected and shipped to the Wichita refuge, in August, 1927. From this nucleus of 30 the herd has increased to 146.

Longhorns are not a scrub breed, as many people think. Under favorable conditions, these cattle will develop into large, often fat animals.

Confusion of War Aids

Struggling Young Doctor
LONDON.—A young London doctor, who only a few months ago was barely able to pay his office rent, now holds a high government position—and all because of a mistake. Shortly after the outbreak of war, he received a letter from the ministry of health appointing him to take charge of a children's department outside of London.

Almost overcome with surprise and joy at being recognized by the government, the young man left London to take up his new post.

Later, it was discovered that it was a well-known Harley street specialist of the same name for whom the letter was intended, but by this time the young doctor was making such a good job of his new work that his appointment was regularized.

Dry Raiders Are Busy

On Prince Edward Isle
CHARLOTTETOWN, P. E. I.—Prince Edward Island, only province in Canada still under prohibition—plans to stay dry, even though thousands of troops are in training here. Military officers approve of the dry laws.

Artillery officers and Royal Canadian Mounted police have been conducting a series of raids through the capital, but as yet no bootleg liquor has been found. In one blind pig, however, what was described as a "considerable quantity" of military equipment, evidently traded in for liquor, was recovered.

THIS PIG BANK'S UNSAFE!

Invest your money in United States WAR SAVINGS BONDS AND STAMPS!

What You Buy With WAR BONDS

These huge 60-ton heavy tanks cost \$120,000, and America's automotive and locomotive plants are turning them out on a never-ending assembly line. Our army uses light tanks, weighing 14 tons, and medium tanks of 28 tons also, but we favor the medium tank over the other two.

These heavy tanks are needed for certain phases of modern warfare, and with their thick armor and heavy-gauge guns they are almost unstoppable. They are considered superior in gun power, in maneuverability and in the power of their huge tractor motors to Axis tanks. Americans everywhere are helping to pay for these monsters of war through their purchase of War Bonds. Invest at least ten percent of your income in War Bonds every pay day. U. S. Treasury Department

THE STORY SO FAR: Janice Trent runs away from wedding Ned Paxton, rich, but a gay blade. Unbeknown to Bruce Harcourt, a family friend, she becomes secretary of an Alaska camp of which he is chief engineer. Millicent Hale, wife of the man whom she succeeded, is also attracted to him. Bruce at first wants to send Janice back on a trip to the city, she encounters Paxton and tells him she is married to Harcourt. The latter hears it and insists on a wedding that day. That night, after a wedding party arranged by the Samp sisters, elderly owners of the Waffle Shop, Mrs. Hale breaks in on the newlyweds with the cry that her husband had been shot dead. She also says: "If you only had waited, Bruce." Bruce spends the night investigating the murder. A Commissioner arrives to conduct an official probe. Jimmie Chester, Mrs. Hale's brother, who hated her husband, runs off in a plane. Bruce and the Commissioner set out to find him. Ned Paxton and his yacht arrive at the headquarters town.

Now continue with the story.

CHAPTER XV

Ned Paxton looked stern. "What do you know of my scheme of living? I want a woman at the head of my house, for the mother of my children, who has an inflexible instinct for the fine and beautiful things of life and the courage to go after them. And I'm going to get her. You must have thought me an easy mark when we met at the hotel. I was dazzled by the news of your marriage. As the day wore on I grew suspicious. Asked a few questions. Discovered that you married Harcourt after you met me that morning. Why did you do it?"

Janice had almost liked him again, trusted him as he confided his ideal of family life. The savage contempt of his question hardened her heart.

"Continue sleuthing. Find out." "I have it on rather good authority that Harcourt was not in love with you. I suspect it was a case of knight-errantry on his part. Girl announces that she is married to him. What could he do but come across with the ring?"

"You will have to answer that question yourself, Ned. But, after all, how can you? What do you know of the ambitions, struggles, sacrifices, self-discipline which lie behind what you call knight-errantry? You see. You want. You buy."

His face was dark with anger. "You said that once before. I don't like it. I'll prove to you that I can earn one thing I want—that's you. Think I don't know that this marriage stuff is a bluff to save your face? He drew her close. She protested sharply:

"Ned! Let me go!" "The kitchen door banged open. Tong dashed into the room. Head lowered, brush drooping, one corner of his lip snarled to reveal a fang, baleful eyes watchful, he stood as motionless as a creature in bronze.

Paxton released Janice. His laugh showed a tinge of strain. "Pasca shuffled into the charged silence.

"Tatima in kitchen with deesh. Mees Samp seesters send her."

"Aren't they coming?" Janice's voice dripped disappointment. "Tell Tatima to come in, Pasca." Grant entered by the front door. "Tubby, I'm glad you have arrived to swell the list of those present, it looks as though my party might be a frost."

"Says you. How are you, Paxton? Where's Mrs. Hale? Well, what d'you know! See who's here!"

Tatima had come in from the kitchen. "Mees Samp seesters send plate. They say, sorry they can't come to party."

"Tell them that I am terribly disappointed." The girl lingered, twisting her bracelets in conscious expectancy. "I never saw so much lovely silver jewelry. Something tells me you've had a present."

Tatima assumed indifference. "Who, me? Kadyama geve to me. He geve me much more. I marry on him. He chief's son. Some day I beeg chief's squaw."

There was a thread of excitement in Grant's laugh. "Kadyama's struck pay-dirt, has he? Where's his gold-mine?"

"He nodding like gol' mine. Money owe him long time for card game. Yesterday man pay. Kadyama buy silver from Ossa."

"Who's the rich stranger? I'd like to get up a little game with him myself."

Tatima sniffed scorn. "Stranger! Pasca pay them. Pasca have beeg fat roll of money, Kadyama say."

Janice waved to those on the boat.

and considerably over twenty-one, quite old enough to make her own decisions. Had it all been Tubby's insistence, or had she been glad of the chance to be away when Bruce returned? After supper last night, Tubby had held her up outside her Waffle Shop—had begged her to second his efforts to have Millicent Hale away from headquarters when the Commissioner and Harcourt arrived the next afternoon. From the fact that his name had not been mentioned in the radio message, there was every reason to believe they were bringing Jimmy Chester. He had asked Paxton to co-operate by inviting a party on his yacht for a nearer view of the erupting volcano.

Grant's plan had seemed sound. Now on thinking back over the conversation, she wondered that he had not referred to Tatima's startling disclosure as to the source of the money which Kadyama had lavishly expended on silver jewelry. Where could Pasca get so much cash so suddenly? Was it part of that taken from Joe Hale when he was shot? It would account for Bruce's revolver having been used, for Pasca's absence from the squaw-dance.

A ship's bell struck. She counted. Eight bells. Was it possible they were making up your mind for a swim? Tea time. She joined the group under the awning. Paxton rose.

"You stood so long staring over the rail, we decided that you were making up your mind for a swim."

"Not in this icy water. I was wondering if we could approach the volcano near enough to get a picture. I brought a movie camera."

"I'll talk with the Captain and the native pilots. We have two aboard. Meanwhile, will you show Miss Mary the interior of the boat? You know every crack and cranny of it, though you haven't seen it since I had it re-decorated—for you."

The last words were so low that Janice wondered if anyone but herself heard them. Miss Mary admitted:

"I'd like real well to see it."

Mary Samp's eyes shone, her cheeks reddened with excitement as they passed from one part of the yacht to another. The silver and blue, black and rose and gold of the staterooms reduced her to a state of thrilled speechlessness. On the threshold of the main lounge she clasped ecstatic hands.

"Well, now! I suppose this is what folks call modernistic!"

Two Filipino boys were bringing the tea things when they returned to the lounge-deck. Janice's lips twitched with laughter as she remembered Pasca's high-held tray. That reminded her, where had the Eskimo procured the money to pay Kadyama?

"Janice!" She looked up. Paxton was standing before her fastening a holster belt. "That's better. You were a hundred miles from here. I'll bet you couldn't tell whether you've had tea or not. You have. The sea is running smooth. If you want to get near enough to the volcano to take a picture, the Captain says that it will be perfectly safe for the native pilots to take you in the launch."

Janice's premonition nerves tingled. Darn her imagination. Here was the opportunity of a lifetime. Would she let her fear-complex rule? She would not.

"I'm all excited! Am I to go alone?"

"No. I'll go to make sure that you don't fall out of the boat in your excitement. The sky is not quite so clear as it was, we'd better get a move on. The yacht will follow. We will turn back the moment you say the word."

Seated in the launch, Janice waved to the two women and the Captain bending over the rail to watch them start. Miss Mary's eyes were troubled, Millicent Hale's inscrutable, the Captain's complacent as he listened to the purr of the motor, rhythmic as a kitten's breathing, observed the skill of the native pilots who had shed their coats and caps, gold braided with the yacht's insignia, and had stolidly wriggled into kamalaykas, which looked like waterproof overshirts with a hood. When at a proper distance, Janice focused the camera on the group

on the deck. She cranked until the faces were dim.

"There! I wonder what Tubby will say to that. He is teaching me the motion-picture art. I've even learned to develop films. When I return to civilization I will be equipped to go on the lecture platform."

"Then you expect to return to civilization?"

Apparently absorbed in the intricacies of the black box she held, she answered abstractedly:

"Return! Of course. Then some day we are going to South America to build a bridge."

Paxton laughed skeptically before he crouched down behind the engine to light a cigarette.

From whence had that iridescent bit of fabrication bubbled, Janice demanded of herself in dismay. From the rows and rows of Spanish books in the H house? Had those spelled South America to her subconscious?

The launch was running parallel with a green shore from which twin mountains lightly clothed with alders and willows, arid, with volcano ash, rose in a graceful sweep to taper into dazzling white cones. Beyond towered higher peaks like purple shadows. She could make out an abandoned Indian village, its tumble-down huts shining weirdly white in the distance. Were those uprights carved totem poles? She turned eagerly to Paxton as he came aft.

"See that Indian village, Ned. I wish—"

The sentence died on her lips as a rain of tiny rocks showered upon the boat. They burned as they struck her hands, hissed as they fell into the water to float away like dingy snow-flakes. Orange and scarlet flames fired curling vapor, belching smoke, till the sky seemed one frightful conflagration.

"Hol' tight! Hol' tight!"

Janice hadn't needed the hoarse shouts of the pilots as a warning. Instinctively she had gripped the side of the launch.

"Come about! Make for the yacht!" Paxton shouted.

Too late. With the roar as of all the thunder-bolts forged in Vulcan's workshops let loose, with a crash which rocked the world, the volcano blew up. Fascinated eyes on the spectacle, Janice saw what looked to be the back of a great sea-monster rise to the surface. An island being born? Paxton caught her in one arm, clung tight with the other hand. A wave which seemed mountains high rolled toward the launch, caught it as though it had been a chip in a puddle, swept it shoreward with incredible speed. Sweat ran down the bronze face of one pilot as he strained at the wheel. The eyes of both bulged with terror. Overhead feathery, scooting clouds merged. The world which had been all sapphire, emerald and crystal went dreadnaught gray. Stinging white foam flew back in drenching spray. Smoke rolled and twisted like a boa-constrictor in the throes of acute indigestion. The boat climbed a huge roller, lunged sickeningly in the trough, staggered and shuddered when a fresh wave struck it. The sea snarled and hissed under a shower of hot stones. Spray blurred Janice's eyes as she strained them in an effort to see what lay ahead. Another mighty smash and shock of water, greater than its predecessor, lifted the boat like a toy and flung it on the shore.

For a dazed instant she sat with eyes tightly shut. She had thought that last plunge would end everything. Paxton touched her shoulder.

"We're safe, Jan. Don't, don't go to pieces now that the danger is over."

"Go to pieces!" She blinked, forced a smile. "I was merely orienting myself, that's all."

The launch was stranded on a pebbly beach. The native pilots were huddled in the bow. Paxton, livid, tense, was standing over them. With a final word he came back to her.

"We'll have to camp here until the yacht picks us up. The men say there is a hunter's shack somewhere on this shore. They are dumb with fright. That was all I could screw out of them. We'd better find it before another wave catches us."

Household Hints

by Lynn Chambers

A Bride's Cake to Greet You at the Reception!

(See Recipes Below.)

Wedding Receptions

After the "I do's" have been said, and you have remembered to wear something borrowed, something blue, and something new, besides throwing your bouquet to some lucky bridesmaid, you are ready for the reception.

The reception is among the more elaborate forms of entertaining, but because of our wartime status, this year's event will undoubtedly be more simple. Simplicity, however, does not imply lack of charm or graciousness, indeed, it often enhances it the more.

White is the color for brides, so use your linens or damask on the wedding table. Flowers may be white calla lilies in crystal or silver centerpiece, or other delicate pastel flowers used with plenty of white to carry out the theme. Have your candles, white, too, as the occasion is somewhat formal.

At most weddings the trend is to have other refreshments besides the traditional white cake cut by the bride and the necessary assistance by the groom! If you are baking the cake at home—and it will be good if you do—plan to have a small pastry tube for the frills and decorations with celluloid or paper figures of the groom and bride as a decoration.

Chicken, because of its bland flavor and general adaptability, is the answer to your refreshment problem. Chicken in a molded egg ring makes the table a picture, and your guests can easily serve themselves:

***Chicken in Molded Egg Ring. (Serves 8)**

2 tablespoons unflavored gelatin
½ cup boiling water
½ cup cold water
1½ cups mayonnaise
4 tablespoons lemon juice
1 teaspoon salt
1 tablespoon grated onion
½ green pepper chopped
2 tablespoons chopped parsley
12 hard-cooked eggs

1 recipe of chicken salad
Soften gelatin in cold water for 5 minutes and dissolve in boiling water. Cool. Add mayonnaise, lemon juice, salt, onion, green pepper, parsley, and 10 eggs, chopped. Cover bottom of mold with one inch of the mixture. Slice remaining eggs and arrange slices around side of mold. Add remaining mixture and chill until firm. Unmold on lettuce, fill center with chicken salad and garnish with salted almonds and tomato wedges. Serve with mayonnaise or french dressing.

***Chicken Salad. (Serves 8)**

2 cups cooked, diced chicken
French dressing
½ cup diced celery
½ teaspoon onion juice
½ cup shredded, toasted almonds

Marinate chicken in french dressing for an hour. Drain. Add remaining ingredients with just enough salad dressing to moisten. Season

Lynn Says:

Here's help to solve your gift problems for the bride: Linen minimums include the following: 8 sheets, 6 pillowcases, 2 pairs blankets, 2 wool coverlets, 2 bathmats, 8 bath towels, 8 face cloths and 12 linen hand towels.

For the dining room, the bride will need 2 dinner sets with 6 to 8 napkins, 3 breakfast or luncheon sets, 6 to 8 extra dinner napkins, 12 tea napkins, and 2 hot plate mats.

If possible, the bride should have a set of 6 in each of the following pieces of china. If she expects to set up housekeeping on a larger scale, this list may be expanded to 8 or 12 pieces. China set includes: salad plates, soup plates, cups and saucers, dinner plates, sauce dishes, bread-and-butter plates. For serving dishes the following are "musts": 1 large platter (for meat and vegetables), 1 covered dish, 2 open vegetable dishes, tea and coffee pots, and sugar and creamers.

This Week's Menu

Wedding Reception
*Chicken in Molded Egg Ring
*Bride's Salad
Hot Rolls and Biscuits
Salted Nuts Preserves Olives
*Bride's Cake
Coffee

*Recipes Given

with salt and pepper to taste. Chill well.

Make the reception a really memorable occasion by serving a beautiful Bride's salad, all fruity and creamy with the Egg Mold. Here's how to do it:

***Bride's Salad. (Serves 8)**

1 large can pears
1 large can white cherries
½ pound almonds
1 large can sliced pineapple
½ pound marshmallows
Drain and cut fruits. Chop nuts and marshmallows with a wet scissors. Make the following cooked dressing:

Yolks of four eggs
Juice of one lemon
½ cup evaporated milk
¼ teaspoon mustard

Combine all ingredients and let cook over hot water until the mixture thickens. Cool. Fold in 2 cups whipped cream. Combine with fruit (well drained), add nuts and fold in marshmallows. Place in a mold, in the refrigerator overnight. Serve surrounded with endive or lettuce.

Now, the cake for the reception! This is a light butter cake, delicately flavored as befits the occasion:

***Bride's Cake. (Serves 8)**

¾ cup sifted cake flour
1½ teaspoons double acting baking powder
1¾ cups butter
2 cups sugar
1½ cups egg whites, unbeaten
¼ teaspoon vanilla
¼ teaspoon almond extract

Sift flour once, measure, add baking powder, and sift together three times. Cream butter thoroughly, add sugar gradually. Cream together until light and fluffy. Add egg whites, ¼ cup at a time, beating three minutes after each addition. Add flour, a small amount at a time, beating well after each addition. Add flavoring and beat vigorously. Turn into a 10-inch tube pan which has been greased and lined on the bottom, sides and around the tube with heavy, waxed paper. Bake in a slow (275-degree) oven 1 hour; then increase the heat slightly to 300 degrees, and bake 50 minutes longer, or until done. Insert favors, if desired, wrapping each in waxed paper, and pressing into small slits in the cake. Spread ornamental butter frosting smoothly on top and sides of cake. Decorate with simple borders and rosettes of the frosting, and trim with silver dragees. Serve on silver tray or platter with delicate sprays of fern, cosmos, or bridal wreath. Place special bridal favors on top of cake; or, tie small wedding bells or other favors to white ribbons and intertwine through sprays.

Ornamental Butter Frosting. (Serves 8)

4 tablespoons butter
5 cups sifted confectioners sugar
2 egg whites, unbeaten
2 tablespoons cream (about)
1½ teaspoons vanilla
¼ teaspoon salt

Cream butter; add part of sugar gradually, beating well after each addition. Add remaining sugar alternately with egg whites, then with cream, until of right consistency to spread. Beat after each addition until smooth. Add vanilla and salt.

Spread cake. Make Rosettes and borders with frosting forced through the pastry tube. Makes enough frosting to cover the above cake and to use for decorating.

Have you a particular household or cooking problem on which you would like expert advice? Write to Miss Lynn Chambers at Western Newspaper Union, 210 South Desplaines Street, Chicago, Illinois, explaining your problem fully to her. Please enclose a stamped, self-addressed envelope for your reply.

THINGS

LET'S take pattern Z9996 to the workshop. There, from scraps of plywood and with the aid of jig or keyhole saw, we can make these clever flower holders. Outlines for a dachshund, two bluebirds, a muffin-cheeked cat and his quizzical companion, for the sad-eyed hound, a wise owl, and a cute deer are traced to wood, sawed out, assembled and painted.

These are fascinating to make, and you've practical as well as decorative items when you've finished. Directions come with the pattern, which is 15 cents. Send your order to:

AUNT MARTHA
Kansas City, Mo.
Box 166-W
Enclose 15 cents for each pattern desired. Pattern No.
Name.....
Address.....

When armored knights met, it was customary for each knight to raise the visor of his helmet as a means of identification. This gesture has come down through all armies in the form of the salute. Traditional, too, is the Army man's preference for Camel Cigarettes. In the Army, Navy, Marines, and Coast Guard, actual sales records in their Service Stores show Camel is the favorite. Favorite gift with service men is also Camels by the carton. Local tobacco dealers are featuring Camel cartons to send to men in the armed forces anywhere.—Adv.

J. Fuller Pep

Talkin' to a fellow the other day, I couldn't help thinkin' that lots of folks claim they have an open mind when the fact of the matter is it's a closed book. Which reminds me that if you really think straight about vitamins, you'll see why I keep tellin' folks about KELLOGG'S PEP. An' that's because this swell cereal is extra-rich in the two vitamins most often short in ordinary meals—B₁ and D. And believe me, PEP is a mighty slick-tasting cereal. Why don't you try it tomorrow?

Kellogg's Pep
A delicious cereal that supplies per serving (1 oz.) the full minimum daily need of vitamin D; 1/4 the daily need of vitamin B₁.

Destination Known

The world turns aside to let any man pass who knows where he is going. But take time to get there. Patient years must be spent in preparation. Take time enough.—David Starr Jordan.

CORNS GO FAST

Pain goes quick, corns speedily removed when you use this soothing, cushioning Dr. Scholl's Zino-pads. Try them!

That Nagging Backache

May Warn of Disordered Kidney Action
Modern life with its hurried and worry, irregular habits, improper eating and drinking—its risk of exposure to infections—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting-up-at-night, leg pain, swelling, feet constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor.

Washington Digest

Newly Inducted Soldiers Find Army Is Efficient

Businesslike Military Routine Gives Boost to Morale; Recruits Are Anxious to Serve Where Best Fitted.

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1343 H Street, N-W, Washington, D. C.

I sat the other day in the office of General Hershey, Selective Service administrator, as he leaned back, one ankle drawn up on his khaki knee and listened to him talk about scarcities. Not the kind of scarcities we hear about when the old argument of scarcity-versus abundance of farm crops comes up, although it might have been such a talk for General Hershey is very much of a farmer. It was a talk about the scarcity of men of the ideal age for the army—ideal from the standpoint of—adeptability—to military life, physical energy, lack of dependents and other responsibility, lack of training that is needed for agriculture or industry.

The general did some lightning calculations that I couldn't follow but it started with the total number of men of ideal fighting age. Then came subtractions for the ones with dependents, the ones needed on the farm and in the factory and the 25 per cent more which it might be expected would have physical disabilities.

According to plans announced now the United States needs for the army, navy and marine corps (including two million for the air force) nine million men. About three million are now in the service.

When General Hershey finished with the figuring I found that there are about 18 million men available for military service from which six million must be recruited if the army plans are carried out. And out of that 18 million there has to be saved back the ones we can't get elsewhere for agriculture and industry and no one is sure how many that will be.

In any case it means that about one out of every three men of military age will eventually be called.

Grave Responsibilities

That is why such a heavy responsibility rests on the shoulders of the draft boards, and behind the draft boards on all employers of labor. That is also why congress has made the effort to get a sharp clarification regarding deferments because of dependents or because of employment needs. Meanwhile every man from 18 to 44 is left in a state of indecision, for of course all these men cannot be called at the same time. A lot of them would be glad to hear the call and get it over.

Last Sunday I had lunch with a young man who had been moving in a sea of uncertainty for months; it was impossible for him or his wife to make the necessary plans to arrange their existence in case he went into the army. Then out of a clear sky he was called. He had been in the army for one week when I saw him and I never saw such a change. It was largely due to relief. He had come home on a furlough granted him to take care of business matters. He was full of praise for army efficiency and had high hopes that he would be able to do just what he had found it impossible to do before; namely, find out the niche into which he would fit, where he would not only be doing the best job he could do for the country but a job which was best fitted to his experience and training and therefore his peace of mind. He was a man who was energetic and active and if he had been chained to a paper-work job he would have been a misfit. He had worried lest, because he was a college man and had to wear glasses, he would get some kind of clerical work rather than a more active assignment.

As a rule you will find, I believe, that the average man of military age feels this way: he is willing to do whatever job his country wants him to do. He wants to do the job he can do best. He doesn't want to break up his education, his family arrangements, his business career if he is not going to be called, yet he wants to plan ahead if he is sure any of these things are going to be necessary. When he is called, and the decision is made and he finds himself in the army and finds that army life and army routine are a lot more businesslike than he thought, his morale goes up like the mercury in August. That is the reason why a lot of soldiers are saying, "What's the matter with

civilian morale?" instead of it being the other way around as many people thought it would be at first.

With the launching of more and more Allied offensive action, with more and more American units engaged, the attitude of the pre-draftee is expected to change. The need of his help will be brought home. 1942 will see about 2,250,000 new men joining the army, air force and navy. Every effort will be made to defer those with dependents and to take the older men last. That is the reason for the army's insistence on drafting the 18 and 19 year group. The chief argument against calling the younger men is that it breaks up their schooling. But schooling can be taken up again. Taking family men disturbs the social and economic life of the nation. Taking skilled workers and men who are already fitted into the economic pattern of the nation, disturbs the war effort.

Although few but the most optimistic say so, it may not be necessary to call any more men after 1942—if the war is still going full tilt then another 2,250,000 will be needed in 1943—but there is no use counting our ugly ducklings before they are hatched.

An Old Comrade

From Ciudad Trujillo

This is the story of the main base for the military forces invading the Western hemisphere—the first and highly successful invasion of the American continent. It was from here that foreign invaders launched their pitiless attacks which placed the peoples of the western world under a European flag, despoiled their wealth, broke their spirit, destroyed their culture and reduced them to vassalage.

I am speaking of what is now known as Ciudad Trujillo.

The fortress built by the first invader still stands in that city—today this city is probably as far from the war and the rumors of war as any spot on earth. It is the capital city of the island of Santo Domingo where Columbus landed and whence Pizarro, Cortez, Ponce de Leon, Balboa, and every Spanish invader set forth to crush and conquer the New world.

But first a digression to bring you back by way of Paris to Washington where today's story starts:

There used to be a saying about Paris—that if you sat long enough at a table on the sidewalk in front of the Cafe de la Paix (at that fascinating corner of the Avenue de l'Opera and the Boulevard des Italiens) you would be certain to see somebody you-knew go by, no matter where you came from.

Today Pennsylvania avenue in Washington has become the world's boulevard—only we have no sidewalk cafes. We have only very crowded restaurants. Perhaps the real world rendezvous is the wide, waiting room of the executive offices of the White House.

Today, as I sat waiting for the correspondents to line up and show their passes and be admitted to the oval office for the regular semi-weekly press and radio conference, who should appear but my old comrade, Oliver Newman, major of infantry in the last war, one-time commissioner (mayor) of the District of Columbia, Iowa farm boy and prince of good fellows.

You ought to see Ollie around a horse—or a mule. What he doesn't know about these critters, whether they are pulling a load of hay, yanking a 75 out of the mud, or stretching noses toward the finish line, adds up to nearly minus.

But that is only a part of the accomplishments which have been many and varied in the field of politics, society, finance, and, shall we say, climatically, journalism.

Anyhow, Major Newman came up and extended his hand. I have met him surprisingly in other less congenious places than the White House. This time he had just returned from his distant post in Santo Domingo where he is advisor to the government, for a vacation in the capital which is half his home.

(Ciudad Trujillo—Santo Domingo—is the capital city of the Dominican Republic island which is situated southeast of Florida, between Cuba and Puerto Rico.)

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. (Released by Western Newspaper Union.)

Lesson for June 14

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

SUNDAY: THE RISEN CHRIST AND HIS DISCIPLES

LESSON TEXT—Luke 24:33-48. GOLDEN TEXT—Ye are witnesses of these things.—Luke 24:48.

The glory and gladness of the resurrection morning drove back the darkness of the tomb and replaced the disciples' sadness with holy gladness. God's message to His people is one of assurance and hope. The night may be dark, but the dawn will surely come.

Two of Jesus' disciples had been walking sadly along the road to Emmaus when suddenly a stranger was with them, telling them what the Scriptures taught about the Christ—His sufferings and His glory. Their hearts burned strangely within them (Luke 24:32), but they did not recognize Him until He broke the bread of their evening meal—and then He was gone.

But now they had a joyous message which sent them hurrying back to Jerusalem to the eleven who had gathered behind locked doors to discuss the reports which had also come to them of His resurrection. And suddenly—

I. "Jesus Himself Stood in the Midst" (vv. 33-43).

What a blessed and conclusive confirmation of their report. He, their beloved Lord and Master, stood there before them, alive and speaking His tender message of "Peace."

The disciples, however, were bewildered and slow to believe. Observe how kind and patient He was with these frightened and unbelieving men. And note what a splendid testimony it is to the truth of the resurrection that they who knew Him best expected proof before they believed.

Before we condemn them for lack of faith let us ask ourselves if we would have done better, and let us be thankful that their hesitation made assurance doubly sure. He was really there—alive. Partaking of food (which He did not need), and giving them opportunity to touch His body, He demonstrated the reality of the resurrection.

He next gave them a sure foundation for faith.

II. "Then Opened He Their Understanding" (vv. 44, 45).

This He did that they might "understand the scriptures." Their minds had become confused and He literally "disentangled" them. We need to have the knots and kinks taken out of our thinking about God's Word. Then we too will understand.

Dealing with the entire Old Testament (divided by the Hebrews into Law, prophets and psalms), He thus gave it His endorsement. Men may deny, but Jesus approved the Scriptures of the Old Testament—and we are ready to take His word. "All things must be fulfilled" is His statement concerning Himself. There is our Lord's guarantee that the promises of His second coming, and all that is associated with it, as well as with His future reign, will be fulfilled.

"This time of fellowship with the Lord around the Word of God was strengthening to their faith, but it had another purpose." The blessings of God are not for our own satisfaction alone, for it is His will that there be—

III. "Repentance Preached in His Name" (vv. 46-48).

There is a message to go out through His disciples to all nations. He died for the sins of the world. He arose for the justification of those who believe. There is remission of sin for those who in repentance and faith turn to Him.

Fellowship with Christ and an understanding of His Word which does not result in aggressive witness for Him is quite useless. We meet Him and study His Word not only that we may grow in grace, but that we may be witnesses to all nations.

To be a witness involves knowledge of a fact, to the truth of which the individual can bear testimony. The disciples were called to be witnesses, "not speculators, philosophers, moralists or legislators. They had neither to argue nor to dissertate, nor to lay down rules for conduct, nor to ventilate their own fancies." They were witnesses, and their business was to tell the truth, the whole truth, and nothing but the truth" (Alexander MacLaren).

The Christian by life possibly more than by word is to "adorn the doctrine of God," as Paul put it (Titus 2:10), commending it to those round about him. Observe that such a witness is to start right at home, "beginning at Jerusalem" (v. 47).

It may be difficult in our times to send witnesses to distant lands, for ships are busy carrying the men and implements of war. But right in your Jerusalem there is a spiritual need, in your little town or rural community, in the city where you live, in your home, office, shop, or school. You who read this who are in the service of the country will find a "Jerusalem" in your camp or on your ship.

Newest Beach and Swim Suits Feature Dressmaker Influence

By CHERIE NICHOLAS

ONE glance at the new bathing apparel gives us the heartening assurance that there will be no lack of charm, versatility or fashion interest on the beach this summer. Wool and rubber priorities have only added fresh impetus to an already important trend toward a wider use of other fabrics this season than usual to make up for the curtailment in other directions.

All of which means for swim wear a glamorous and exciting collection of graceful and flattering suits in a wide range of intriguing materials with very special emphasis on handsome rayon weaves which include such interesting textures as shantung, jerseys, luxurious looking crepes, taffetas, failles and many other types. Calicoes and ginghams, too, have their place in the swim suit realm, as do piques, fine sharkskins, and many other striking novelties.

Another important new angle to beach wear and swim-suit fashions is the dressmaker influence which prevails throughout their styling. That is not surprising, for the widespread use of a surprisingly long list of fabrics would inevitably call for dressmaker technique in their styling, and you may be sure the designers are making the most of it.

You can swim this year in a softly draped or molded dressmaker suit of fine rayon crepe or sleek jersey, or be gay and perky in a trim, bare midriff halter and shorts costume of brisk acetate rayon sharkskin. You'll see, also, "little girl" ruffled suits in crisp rayon taffeta, gingham or quaint calicoes. There are tailored princess styles galore in such rich materials as the new and very fashionable failles and shantungs which offer a range of most lovely brilliant and dusky colors.

The swim suits pictured in the above illustration subscribe to the

new dressmaker trend in versatile moods. Note the pert fashion at the top left in the group. The fact that it is fashioned of a fine rayon shantung in a sooty black is significant, for black is the smartest thing you can wear in play clothes. Black linens, thin black mesh weaves and black shantungs are also ultra chic for town wear in tailored jacket suit or two-piece jacket dresses. A thin white edging at neck and hem accents the rich black of the shantung that makes this flattering princess swim suit, with its "bra"-topped bodice, slender waistline and gracefully flared skirt. The narrow self-fabric sash ties at the front.

The vogue for fluid, molded lines has inspired the charming two-piece bathing suit shown at the upper right, which uses soft-draping acetate rayon jersey in a striking navy and white print design for its surplice-draped "bra"-top and new shirred-on dirndl skirt.

Very gay for beach or swimming is the flared one-piece suit at the lower left. It is intriguingly styled of rustling rayon taffeta in a tiny green and white check. Sprightly self ruffles outlined with navy rick-rack braid trim the brief skirt and flattering heart-shaped décolletage.

Party Finery

Even this six-year-old isn't too young for a beauty lesson that makes flowers its theme. See the pretty posy in her hair. Young girls, and children, too, are taking to wearing flowers in the hair instead of hair ribbons. As to the cunning bouquet she is carrying in her hand, it is a replica in miniature of the one her mother will be wearing. Yes, indeed, matching bouquet of snap dragons, carnations and sweet-hair roses make charming gifts for traveling or far-away soldier husbands and fathers to wire to mother and daughter when the calendar points to a birthday or some other very special event. Flowers, like the bright colors being featured this season, help to cheer both the wearer and those who see her looking so daintily charming. And it's her duty to look charming!

Many Still Prefer

Black-and-White

Regardless of all the fuss being made over vivid color and plenty of it, many women are turning enthusiastically to black and white.

They consider the costume ensemble ideal that includes a black and white print frock done in the latest manner of side drape, finished off with a pleated frill and pleated collar fitted to a low neckline. This is topped with a black straw wide brimmed hat crowned with waxen white gardenias. The shoes (low heeled pumps) and the bag should be in glistering patent leather.

Cotton Lace Suits Join

List of Summer 'Musts'

Lace is good news these days, for it is one item that is not on the government "want list." Very swank for summer is cotton lace in a large sporty pattern made into jacket and skirt suits for summer day wear.

You can get bewitching suits with skirts pleated for action, topped with jackets of the favorite long-torso type that so beautifully slenderize your figure. In navy these lace suits are too attractive looking for words, and for dressy summer wear a white or wheat-color lace suit gives you a costume that will take you anywhere with an assurance of being accounted among the best dressed.

Black Lace

There is a new fashion developing which is worth while considering. It is the blouse that is made of the most exquisite black lace you can find in the stores. Make it up simply but effectively. Wear it in the afternoon with a black satin or taffeta skirt and in the evening with a diaphanous chiffon skirt in lovely pastel coloring.

JUST

She Gave It to Him
"You're looking downcast, old man. What's on your mind?"
"A piece of my wife's."

Famous last words: Recruit (to commanding officer)—"I've been here two months now, how about a raise?"

Eerie
"Why do you always sing the same song?"
"It haunts me."
"No, wonder. You've murdered it."

So That's It!
It ups at a musical comedy. "Why are all the men in the front rows bald-headed?" she asked.
"Because they bought their tickets from scalpers," he replied.

At Least a Relief
Voice over phone—"Is this Mr. Sofologopolis speaking?"
"No, it is not."
"Well, aren't you glad?"

BRIEFS . . . by Baukhage

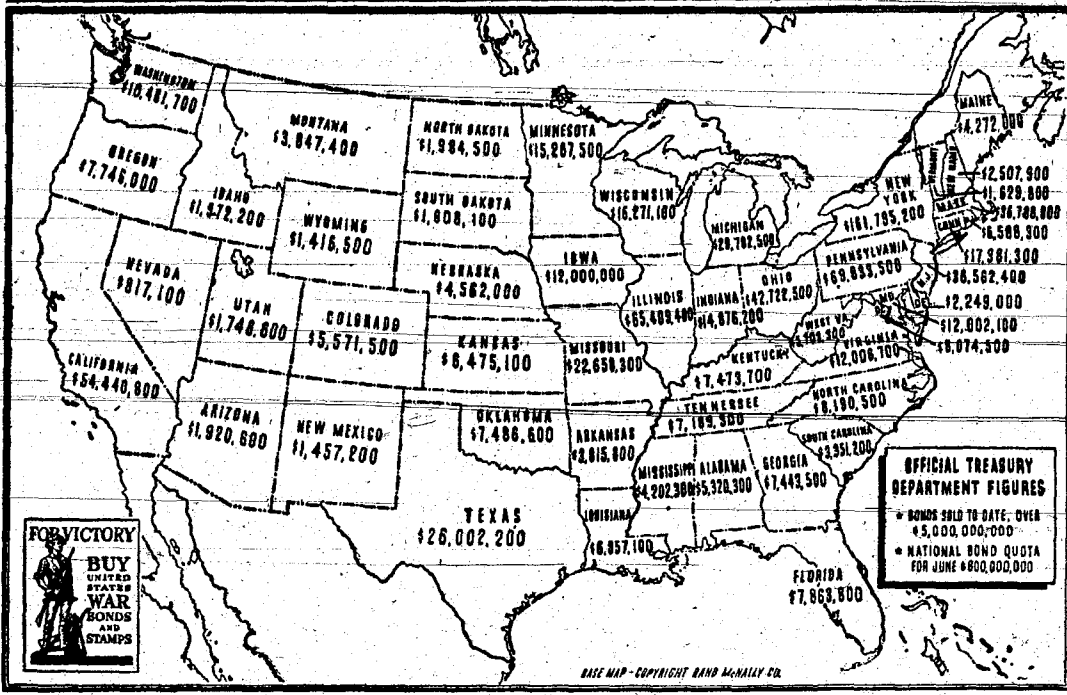

The Rockefeller foundation is providing yellow fever vaccine free to the government for the use of the armed forces.

Housewives and debutantes with the best of intentions are not making good on civilian defense jobs. The working girl is the best worker. The others haven't the necessary self-discipline.

The WPB has authorized motion picture producers to spend \$5,000 per picture for new material for the construction of movie sets.

Farm people have more things to think about and talk over and less leisure for thinking and talking, than at any other time I can remember.—Secretary of Agriculture Claude R. Wickard.

Official U. S. Treasury War Bond Quotas for June

The above map of the country shows the War Bond Quota by states for the month of June totalling \$800,000,000. Everybody every pay day is expected to invest at least ten per cent of his income in War Bonds to aid in financing America's offensive against the Axis powers.

The ultimate quota for the nation will be on a basis of one billion dollars per month effective in July. This sum is necessary to provide for all-out production of planes, guns, ships and munitions adequate to arm our fighting men with the tools necessary to win the war.

Garden Pests Causing Damage

The cool, moist spring from all indications is favorable for the increase in numbers of many insects and worms. A few brief comments might be of help in controlling these ailments of Victory gardens in this county.

CUT WORMS: These seem to be causing a lot of damage in many locations. The cheapest and easiest way to control these is the application of poison bait. The mixture is made up of five pounds of bran, about four ounces of paris green, one half pint of cheap molasses and about three pints of water and one ground orange, lemon or apple to give the mixture a slight flavor. This mixture will make about ten pounds of moist poison bait and this quantity will take care of one-half

acre to good advantage. This poison bran should be scattered thinly and evenly on a warm evening soon after the plants appear above the ground. During the evening the cut worms usually come to the surface and will get enough of this poison material to cause their death.

MAGGOTS: The three maggots, namely, bean, cabbage and onion are closely related and are controlled in the same way. Ordinarily it is well to plant your seed shallow so that the plant grows rapidly and gets above the ground in as short a time as possible. The most practical way of controlling the maggots is to use corrosive sublimate (bichloride of mercury.) This material is a violent poison and must be handled with care. As it corrodes metals, it must be handled in wood, pottery, glass or resistant containers. One ounce of this material is diluted with 8 gallons of water and applied on either side of the row on the ground. It seems that the moist soil having this solution turns the trick.

PLANT LICE BEETLES (CATERPILLARS AND OTHERS): The most convenient treatment for these bugs and insects are bordeaux mixtures to which is added calcium arsenate, or derris mixtures. Your dealer has a copper-lime dust instead of the spray. For small gardens, this dust is very effective. Calcium arsenate may be added to this copper-lime dust at the rate of one pound to 20 pounds of dust. This will do a very good job on practically all of your garden crops.

DERRIS: The toxic principle in derris is rotenone. A good rotenone dust may be made by mixing a pound of derris of 4% rotenone content with from four to six pounds of flour or lime. Derris dusts have the added advantage in that they are not poisonous to animals and human beings. It is also possible now to buy from most dealers a complete spray which has added nicotine sulphate to control sucking insects such as plant lice. This is practical because then you have a spray that will control 95 percent of all difficulties in one combination.

prevent and are usually on the under side of the leaf in large numbers.

PLANT LICE: These lice are very tenacious and harmful to plant life. They cause the leaf to curl up and finally die. The control for these is nicotine sulphate. One tablespoon of 40 percent nicotine sulphate in one quart of strong soap suds is very effective. Many folks have a small fly sprayer around the house. This may be used. The main thing that these plant lice have to be hit with this spray and you must hit the under side of the leaf. A poison application does not kill plant lice such as calcium arsenate or lead arsenate. However, the derris sprays usually are effective in controlling plant lice.

Certainly it will be a person's advantage to use every precaution possible to raise a well-cared for garden. In a very small garden a person can usually pick off a good many bugs and beetles. Then a very small amount of money spent for dusts will protect your foliage.

PROBATE ORDER

State of Michigan, The Probate Court for the County of Charlevoix. At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 25th day of May A. D. 1942.

Present, Hon. Ervan A. Ruegsegger, Judge of Probate.

In the Matter of the Estate of Marie Louise Johnson, Mentally Incompetent.

Albert T. Washburne, Guardian, having filed in said Court his petition, praying for license to sell the interest of said estate in certain real estate therein described, at private sale,

It is Ordered, That the 15th day of June A. D. 1942, at ten o'clock in the forenoon, at said Probate Office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said Court, at said time and place, to

Michigan Mirror

(Continued from first page) diene. Petroleum can also be used to make butadiene. And butadiene is the important base for manufacture of the synthetic rubber as Buna S and Buna N.

Converting grain or petroleum into rubber tires is verily a "revolution" in an economic sense.

Impressed with the potentialities, the RFC has expanded the official production program of synthetic rubber to an even 1,000,000 tons. But here is the "catch" to what would be otherwise a very rosy and optimistic tale. First, it will take 18 months to put the program into operation. Second, all of the 1,000,000 tons of artificial rubber are needed for military and lend-lease requirements, leaving NONE for civilian use such as buses, trucks, and automobiles.

That is why the Dow retreading processes may help to keep defense workers' automobiles on the road and otherwise assist in averting a serious transportation paralysis by 1943 and 1944.

The senate committee investigating the national defense program, headed by Senator Truman, Democrat of Missouri, recently filed a lengthy report at Washington about the national rubber shortage.

While we stew over the proposed inconvenience of greatly reduced rations for gasoline and fret about what may happen to our 1942 tourist business in Michigan, we read the following from the Truman committee report with no great satisfaction: "The fact that today—two years of his advanced age and the war, he has not been encouraged to run by Republican party leaders but it is a pity for that his hat will be in the ring once again. Dickinson has a habit of deciding matters himself, and it is likely that his mind was made up and set months ago. One Dickinson trait, familiar to his friends, is a stubbornness that used to be known as 'grit' and sometimes is glorified as 'will-power'."

Whether it would require more will power nor to run than to run at the age of 84 is another matter.

We'll know of his decision soon, after the fall of France—not one of those (synthetic rubber) plants is in operation is inescapable evidence not only of the admittedly difficult technical problems but also of the failure of the part of the officials in government to provide in time for one of the most fundamental needs of this country.

If private industry, such as Dow company, comes to the rescue of the American people in a situation where government itself has failed miserably, to get results, another bright page will be recorded in the war history of the Michigan home front.

General Motors, Ford, Chrysler and Hudson are other Michigan concerns which are performing the "impossible" in production of bombers, tanks, guns and shells.

It is evidence that Yankee ingenuity still exists... of the will of the American people to defeat the axis at whatever cost.

show cause why a license to sell the interest of said estate in said real estate should not be granted;

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said County.

Let's keep him on the run!

• This is a war of resources. And the housewife who saves tin and paper, uses up leftovers and remodells old clothes is helping make America's resources go as far as possible. So is her husband when he gets extra-shaves out of a razor blade, saves old nails and hardware, and walks to work.

Like other folks, Michigan Bell employees are pulling together to win the war. By getting along with what they have they are helping conserve vital war

materials. The girls in our offices keep extra vigilant watch over all supplies and equipment, to make them last.

Telephone men are finding new ways to keep old equipment in service. They take extra care of the tools with which they work. They are careful with cars and tires. And they even pick up small scraps of wire after a job is finished—not because it's economical in money, but because the material itself is the thing that's important now.

MICHIGAN BELL TELEPHONE COMPANY

WASTE IS AN ENEMY WE ALL CAN FIGHT!

The Mythical Land With Its Streets Of Gold,

Would Play Second Fiddle to America With Its Lines of Copper, Today

For several reasons, too. First, because copper is such a vital metal in the production of arms and ammunition that it has become almost as difficult to obtain... even in very small quantities... as gold.

Next, because the copper lines that weave a vital canopy over America, from coast to coast, pack a mighty wallop. For they transmit from generating source to wartime America more electric power than Germany, Italy, Japan and France, combined, can muster.

A gigantic supply of electric power that helps make possible our amazing war production that will blanket the axis with clouds of disaster.

If the magic geni were, today, to appear before Adolf and Benito and Hirohito, tempting them with the choice between a boulevard of gold, in the event of victory... or a duplicate of America's huge electric power system, right now... no doubt the street of gold would have to pay second fiddle.
