Yanks Advance on Two Fronts
As German Resistance Stiffens;
B-29s Blast Steel Mills in Japan

Top American military leaders are pictured during their visit to the Normandy beachhead. Left to right: facing camera, Adm. Ernest J. King, commander in chief of the United States fleet; Gen. George C. Marshall, chief of staff of the army; Gen. Dwight D. Eisenhower, supreme Allied commander, and Rear Adm. Alan G. Kirk.

THE INVASION:
Steady Progress

Supported by the greatest air fleets in battle history, Allied forces continued to expand their beachhead area in Normandy in the face of stiffening resistance on many fronts.

U. S. forces to the northeast of Cherbourg surged past Montebourg, which was still being contested, and captured Quineville on the east coast of the Cherbourg peninsula. Hammering to the west across the peninsula on a 10-mile front, the Yanks met stiff resistance from crack grenadiers of the fifth German tank division thrown into the Normandy fighting.

A communique from General Eisenhower's headquarters said that steady progress had been made west of Carentan across the base of the Cherbourg peninsula and between the Elle and Vire rivers toward St. Lo, key junction 15 miles southeast of Carentan.

Battle Westward

All along a 10-mile front, units of the American Fourth division and the 29th Air-Borne division were battling westward against strong resistance in a drive to pinch off the peninsula, and with it the prize port of Cherbourg.

Nazi Field Marshal Erwin Rommel had thrown approximately 700 tanks into the fighting on the eastern sector and appeared to be using far more infantry than the German command intended to use for the defense of one comparatively small section of the invasion coast.

Despite early successes on the invasion front, a word of warning came from Secretary of War Stimson who said that Allied troops in Normandy soon must face fiercer counter-blows "than any we have ever met." At the same time he predicted they would smash ahead until France is liberated and Germany crushed.

While the troops on the Normandy coast were fighting off the German counter-attacks on land, residents of England itself were dealt a serious "anti-invasion blow" when a fantastic stream of pilotless Nazi bombers rained fire and explosives across the island. This was Hitler's long-awaited "secret weapon" and no attempt was made by the British authorities to minimize the effectiveness of these robot, radio-controlled bombing plane attacks.

CONVENTIONS:
In Chicago

As the advance guard of the Republican party convention delegates began arriving in Chicago, political dopesters had all but awarded the Presidential nomination to Gov. Thomas E. Dewey of New York, but friends of Gov. John W. Bricker of Ohio would not let their candidate be counted out without a battle. They said that the contest for the nomination would go to the convention floor.

Bricker sources could not see a first-ballot victory for Dewey. However, the New York governor entered the convention with more delegates actually pledged to him than any other candidate, including Governor Bricker.

Officials in charge of arrangements for the Chicago meeting revealed that the candidate selected would probably make his acceptance speech from the convention floor on the day after his nomination.

Meanwhile the Democrats announced that Gov. Robert S. Kerr of Oklahoma would keynote their convention scheduled for July 19, also in Chicago.

PACIFIC:
Action Here, Too

U. S. citizens got a breath-taking indication of the mighty striking power of their vast armed forces when within ten days of the European D-Day, terrific blows were dealt the Japanese on the opposite side of the globe.

Day before the new Super-Flying Fortresses bombed Japan proper, a powerful navy sea and air force blasted the outer defenses of the island off Saipan in the Marianas to prepare the way for the landing of American troops on that strategic Jap base only 1,500 miles southeast of Tokyo.

To wrest Saipan from the Japanese, Americans had a job which combined the worst factors of Tarawa and Guadalcanal. For like at Tarawa they had to land over a well-defended coral reef and like on Guadalcanal, the Jap had himself well entrenched in good fortified positions which extended all the way across that jungle island. When the beachhead on Saipan was established there was still a long way to go but word from Adm. Chester W. Nimitz' headquarters indicated that the Yanks were advancing.

Initial reports listed moderate casualties while the official bulletin revealed that: "Virtually all heavy coastal and anti-aircraft batteries on the island were knocked out by naval gun fire and bombing."

While these no longer worried the Americans, they knew their test would come in the inner jungles as they faced the Jap artillery, mortar and machine gun fire.

Super Raid

From secret bases in China, not from an aircraft carrier this time, American planes dealt Japan proper a smashing air blow, when a squadron of the new Super Flying Fortresses bombed Japan's homeland. Tokyo radio said industrial areas of Moji and Shimonoseki were hit.

Only a dribble of official news came from American sources on the raid but announcement of aerial task force attack of the giant B-29's indicated that they flew from the China-Burma-India theater land bases.

This raid also revealed the formation of a new air force, the 20th, which would serve the United Nations cause as a roving, globe-circling task force much like a naval fleet. This air arm will not confine itself to attacks on Japan but is "able to participate in combined operations, or to be assigned to strike wherever the need is greatest."

Before any official announcement of the targets was made by the army, a report in congressional circles hinted that Tokyo itself was one of the main objectives.

ITALY:
Allied Drive Continues

German defenses on a broad front 50 to 80 miles above Rome were shattered when Allied Fifth and Eighth army troops drove north in a plunge which netted them hundreds of prisoners.

German resistance had cracked all the way from the Tyrrhenian sea-coast around the northern end of Lake Bolsena and down to Terni, 70 miles east of the Allied advance coastal columns.

The enemy was in full retreat from the entire Adriatic sector. Their retreat was so fast that speedy Eighth army flying columns were unable to contact Nazi rear guards. Even fresh German reinforcements, hastened from the north to halt the Allied advance, were routed after joining the Nazi 14th army in a furious three-day battle.

Household Hints

It pays to buy two pairs of stockings of the same color at the same time. Be sure to ask for your proper length, depending upon the length of your leg and your girdle.

When you want to remove food particles from sifters, graters, and so on without damage to metal, use a wood skewer.

Try cutting down and making smaller the embroidered end of a worn-out pillow case to fit baby's carriage or crib pillow. This saves a lot of needlework and fabric besides.

Sprinkle graham cracker, vanilla wafer, or ginger snap crumbs on top of puddings before cooling to prevent a tough skin from forming.

Movie Trick

In the film, "The Pride of the Yankees," right-handed Gary Cooper, who played the part of left-handed Lou Gehrig, was made to appear a southpaw in close-ups by reversing the initials of his club on his uniform, photographing him at third base instead of at first, and then reversing the negatives.

and YOU WILL GET EXTRA TRACTION, BETTER CLEANING and LONGER LIFE, TOO!

EVERY FARMER KNOWS an unbraced corner fence post leans with the pull of the wire, weakening the entire fence.
Unbraced tread bars on tractor tires, likewise bend and weaken under heavy loads. They slip, lose traction, lose time and wear rapidly.
Traction bars on Firestone Ground Grip tires are triple-braced and have up to 215 inches of extra bar length per tractor. That gives them extra strength, extra pulling power and extra long life. And triple-braced traction bars clean better, too.
If you want tires that pull better longer buy Ground Grips — the tires made by Firestone, the pioneer and pacemaker in the farm tire field.

FARM LABOR WAGE HEARING
The Antrim County Farm Wage Board will hold a public hearing at the Milton Town Hall, Friday evening, June 30, 1944, at 8:30 p. m., for the purpose of determining a prevailing wage rate for picking cherries.

Form Operators, Agricultural Workers, and other interested persons are invited to present testimony to assist the Board in making its recommendation to the State Extension Director.

TO RECEIVE NEEDED GASOLINE
In an effort to assist in the harvesting of our large cherry crop and other farm crops the Office of Price Administration has announced that needed gasoline will be available for the transportation of all such workers. Regulations have been set up and approved by the OPA making possible the securing of gasoline for harvest work similar to last year, says Walter G. Kirkpatrick, County Agricultural Agent.

People living in Antrim County, or other counties in which cherry orchards are located, in which they desire to pick, can secure gasoline by applying at the County Office of the Ration Board. Here they fill out a form listing the riders riding with the applicant and the orchard in which they desire to pick. At least two people must ride in a coupe and four in a two seated car, to qualify for gasoline. If prospective pickers do not know of orchards the County Agricultural Agent will assign pickers to orchards needing help.

AAA PROGRAM IN CHARLEVOIX CO.
A lot of farmers are wearing a pleased expression right now as they are receiving their checks from the Commodity Credit Corporation for the surplus potatoes from their 1943 crop.

Through the efforts of the AAA, the C.C.C. purchased the surplus potatoes from growers at support prices and processed them into dairy feed.

A total of 25 cars were shipped from Charlevoix county which will return to the potato growers \$30,305.28. Without this support price program, there would have been no market for these potatoes and the farmers would have had the loss.

This amount combined with \$35,000.00, AAA Farm Payments and \$18,000.00 Dairy Feed Payments made by the AAA, reach a total of over \$83,000.00, which has been distributed through the AAA to farmers throughout the county during 1944.

Pickle News
By H. E. Brumm, Dist. Mgr.
H. J. Heinz Company
Charlevoix, Michigan

Weeds should not be allowed to grow in the pickle field. They do not protect the vines by affording them shade; they do take moisture and fertility, robbing the crop of these necessary properties. If large weeds spring up close to the hill or row, it is advisable to cut them off at the top of the ground with a hoe rather than pulling them out, which would tend to loosen the roots of the pickle vine in the hill nearby. During a dry season, this would prove very damaging to the vine.

Usually more pickle seeds are planted and grow than are needed to produce a good growth of vines. This is encouraged for insurance against loss of plants due to insect damage. However, after the plants are six to eight inches tall, it is necessary to thin if the plants are too thick in the hill or row. The plants to be removed should be cut off leaving 2 or 3 sturdy plants in the hill or one plant every 8 to 12 inches in the row. This method of thinning will allow plenty of fine growth for the maximum production of pickles with a minimum requirement of labor for picking.

Great opportunities come to those who make use of smaller ones.

True wisdom is to know what is best worth knowing and to do what is best worth doing.

The only thing that can cheat a woman out of the last word is the echo of her own voice.

INDEPENDENCE

a Fighting Word

Millions of young Americans are today fighting in foreign lands to preserve in their own land the independence which dates from July 4, 1776.

They are fighting for the right of small nations to live in peace, safe from the rule of the strong. They are fighting for the right of every individual of every race to independence of thought, belief, and of proper action.

We at home must help to win this fight. Unless we win a victory for all men, our own victory will not be secure.

A Phone Call, A Wire, A Postage Stamp

Your congressman is no further from you than a Phone Call, a Wire, or a Letter. Fred Bradley has given "personal service" to hundreds in his district whenever he has been called upon.

We know of no congressman who keeps as close touch with the "folks back home" as does Congressman Bradley. His weekly News Letter "This Week In Washington" is read by thousands of his constituents in the eleventh district and his weekly broadcasts over the Soo and Menominee stations give the people of this district a continual and close contact with their representative. This effort takes a good deal of time and considerable expense, but is in keeping with Congressman Bradley's policy of close contact with you.

YOUR INVASION!

FROM General Bradley, leading the Invasion ground forces, right through every rank, American men now face a brutal, desperate, able enemy. For this invasion has only begun—before our fighters lies a hard and bloody task, one that demands all *their* courage, backed by *all your faith* in their ultimate victory.

That faith will be tested many times in this invasion—in grim struggles, set-backs, possibly even temporary defeats. It will be up to you to remember that early victories

usually only mean more savage opposition from a foe made more bitter, more ruthless as the shadow of his doom grows larger—up to you to keep that faith in days and nights of gloom as well as in hours of triumph.

There is little that you can do to show that you realize what *they* must face, perhaps for many months. But one thing you *can* do—back the attack with every dollar you can spare! Let the Bonds you buy in this greatest of Drives be the measure of your belief in their ultimate victory!
