the LENNOX "Torrid Zone"

Coal Burning Furnace

"the World's Finest Coal Burning Furnace"

This famous Lennox Furnace burns the gas and the smoke, too! Its unique design makes maximum use of every pound of coal. The Lennox "Heat Saver" squeezes heat out of coal, coal gas, and smoke, before it has a chance to go up the chimney. Gas-tight, leakproof steel construction virtually frees your home of dirt and soot. Direct-draft damper prevents smoking from firing door when open. Locomotive-type bar grates are masters of fuel economy. They respond to the slightest touch of the waist-high shaker bar. No costly dumping of half-burned coal; only completely-burned ash sifts through. The "Torrid Zone" is readily adaptable as a heat generator for gas or oil and air conditioning any time you wish to change. Ask about this popular Lennox unit today.

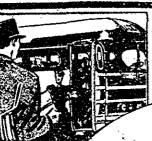

AVAILABLE IN SIX DIFFERENT SIZES

Sizes range from 22" to 35" in diameter. Your choice of models with de luxe Lennox square cabinets with rounded corners and smooth hard-baked enamel finish, or plain round steel casings.

SCRIPTURE: Mark 11:27-12:44.
DEVOTIONAL READING: Mark 12:1-12.

Jesus And Critics
Lesson for May 8, 1949

DURING JESUS' last week, his enemies were firing at point-blank range. They were dead set to kill him; but they did not want to do that if they could ruin him some other way. What they tried to do was to make him out either a rascal or a fool, or both. Mark's story shows how Jesus took it.

The first question they asked "Dr. Foreman sounded perfectly fair. 'Where did you get your authority?'" As we saw last week, Jesus had assumed simply tremendous authority. Wasn't it fair to ask him where he got it?

The trouble was that the men who asked the questions didn't want to know. They only wanted to heckle Jesus. The world is full of just such license-hunting snoots as these. They do not like it when a man succeeds. They particularly do not like it when a man succeeds without their help.

Taxes
IN JESUS TIME you could not vote either for more taxes, or less. You paid what the Roman soldier at your door said to pay, and you were thankful not to be poked in the ribs with his sword while you were fishing up the money. But no one dared to complain. The Romans had some deep dank dungeons for people who complained about high taxes. So the next question Jesus' enemies asked him was about taxes, or tribute, which means the same thing. They thought they had Jesus on a spot where whatever he said would put him in the wrong. Suppose he said: "Yes, pay taxes by all means." Then they would snarl: "Boot-licker of the Romans! Traitor to your country!" But if Jesus said, "No, don't pay taxes," then they would howl: "Treason! Police! Arrest this man who defies the Emperor!" Jesus' answer was a masterpiece, because he not only did not dodge the hot question, he did not leave the questioners a leg to stand on. (Mark 12:17).

Hairsplitters by Trade
THE CRITICS of Jesus were hairsplitters by trade. Yet none of them had ever been able to answer another tricky question with which they now expected to floor Jesus.

"Which is the greatest commandment of all?" The question had been going the rounds for generations. The greatest minds in Jewery had wrestled with it. But it was a foolish question after all.

Which is the most important brick in a wall? What position on a volley-ball team is the most important? What is the most important link in a chain? An answer to these questions would seem about as easy as answering that one about the greatest commandment. Jesus knew they were trying to show him up as a bungler, as a very poor and amateurish hairsplitter indeed. But instead, he did what no one expected him to do: he answered their question, and answered it so well that it is one of the cornerstones of our religion today.

How to Take Criticism
THE READER should consult Mark for the whole story. It bristles with practical thoughts, one of the most practical being how to take criticism. All of us can take it from our friends and families; we know they mean it for our own good. But criticism that is unfair from people who want only to show us up for fools or to get us into hot water—that is hard to take. Jesus should be our example.

He did not let other people's criticisms interfere with his work. He never avoided criticism. He did not "twist the lion's tail, he did not deliberately provoke criticism. But he would not claim exemption from what every one has to stand, being looked over and rated by the people who knew him.

He never broke his heart over what people said of him. He did not go around crying to himself.

WEEKLY NEWS ANALYSIS

Truman Signs Bill for Extension Of European Aid Another 15 Months; U. S. Launches Bond Sale Drive

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Men Who Found Kathy Remembered by Mail

The men who dug for little Kathy Fiscus, 3-year old who died in a California well shaft, were being remembered all over the nation.

More than 2,200 letters had been received by the Kathy Fiscus rescue fund from virtually every state in the union. Mayor Clark E. Bell, San Marino, chairman of the fund committee, said the first envelope opened contained \$1,020—an average contribution of \$5.10.

Donations ranged from 10 cents to \$50. It was pointed out that if the average continued, it would mean a total of more than \$11,000 for the men who worked for 52 hours to reach the child who fell to her death 92 feet down the well pipe.

AID BILL:

Has Truman Okay

A bill to give 5.58 billion dollars to the European recovery program over the next 15 months—with one billion available at once—was signed by President Truman.

MR. TRUMAN, as is a quaint capital custom in such matters, signed the bill with several pens—eight, in fact. Even Mr. Truman, himself, was moved to observe jestingly that "this will probably look like a forgery, but it really isn't."

The bill which Mr. Truman signed allots more than one-eighth of the entire budget of the United States to foreign aid.

Mr. Truman, ever a meticulous man, carefully wiped the points of the pens, handed one each to seven witnesses to the signing, and kept one for Sen. Arthur Vandenberg, who was unable to attend.

CHURCHMEN:

UN Asks Facts

The United Nations wasn't heeding protests of Hungary and Bulgaria against its consideration of the trials of Cardinal Mindszenty and Protestant churchmen. Instead, the UN invited the two Soviet satellite countries to tell their stories of the imprisonment of the Cardinal and other clergymen.

THE RUSSIAN delegation indicated the two nations would disregard the invitation, since both Hungary and Bulgaria have contended the trials were internal matters and no business of the UN.

The world organization, however, voted 30 to 7 to put the church cases on its agenda and to go on with a full discussion of them.

U. S. delegate Benjamin V. Cohen argued the committee should delay inviting any nations or churches to send spokesmen until it decides how it wants to deal with the question.

Russia's Jacob A. Malik indicated the two Russian satellites would reject such an invitation and accused Bolivia of violating the UN charter by seeking to invite religious organizations.

To the casual observer, the entire matter was even less than a tempest in a tea pot. Whatever the UN might find as a result of rehashing the convictions of the churchmen—what could UN do about it? The force of UN in world peace retention efforts has been so meager as to cause critics to begin comparing it already with the old League of Nations which died of impotency.

BOND DRIVE:

Plan for Security

Kick-off speaker at the opening of the "Opportunity Bond Drive," in which the government hopes to sell one billion, 40 million dollars worth of U. S. savings bonds to its people, President Truman keyed his remarks to the need for national security.

HE PICTURED the bond drive as providing another opportunity for purchasers to assure security for themselves and their country. Among other things, the President said:

"We know that we cannot have a sound and secure nation unless security is the common possession of our people. Farmer, factory worker, banker, merchant, school teacher, housewife—all are buying security for themselves and each other when they buy savings bonds."

He added that "every bond they have bought has given them much more reason to feel secure about the future—their own and their country's."

THE PRESIDENT said the kick-off dinner was to honor three million volunteers in the bond sales program, and declared they would be joined by another 250,000 new boys who would "ring the nation's doorbells, bringing the message of the Opportunity Bond Drive into 12 million American homes."

Top question plaguing bond officials was the recession in employment, lower prices and less consumer cash interfering with the bond drive's reaching its goal.

OASI COST:

In Billions

American taxpayers in covered employment would have to dig into their pockets to the tune of 3.75 billion dollars by 1955 to finance old age and survivors insurance under the proposals advanced by President Truman and his administration.

BY THE YEAR 2,000—when the program is expected to hit its peak—the proposed cost would have mounted to approximately 13 billion dollars.

This estimate, made by the Research Council for Economic Security, Chicago, is based on a report from the advisory council on social security to the 80th congress.

Of a labor force of over 60 million, OASI now covers about 35 million, or roughly three out of five jobs. Coverage is now limited to persons employed in industry and commerce. It is proposed that the system be extended to cover the entire labor force.

In presenting both sides of the question, the council's report includes a full page of pros and cons. Each side might be summarized as follows:

ON THE ONE HAND, if employees of commerce and industry are entitled to this protection, why not employees on the farm and in the household? If the goal of the system is to provide even a minimum of subsistence, benefits must be raised now to keep in step with living costs. An adequate OASI system will reduce substantially the heavy burden of old age assistance.

On the other hand, opponents of the proposed extension point out that of those excluded, the majority are either protected by other systems or are able to provide for themselves, while the lowest income classes are employed too irregularly to earn insured status under any program. If the cost of living is a valid reason for raising benefits now, then logically the whole system should be geared to the cost of living, fluctuating down as well as up. The bigger the system, the better the promises of bigger and better pensions.

Lady Sheriff

Mrs. Barkley Graham, weighing only 95 pounds, has become the first woman sheriff of McCracken county, Kentucky, birth place of Vice-President Alben W. Barkley. She succeeded her husband who resigned to become Paducah's chief of police.

FARM SURPLUS:

May Hasten Subsidy

The administration's farm experts weren't being too subtle in a movement to hasten payment of direct subsidies to farmers. They were pointing out in the capital that an over-supply of pork and milk expected within the next two months, may require President Truman to ask immediate authority for such action.

SECRETARY of Agriculture Brannan said he already had discussed such a proposal with the President. At the present time the government is committed to support prices of those commodities by buying any surplus and taking it off the market. This is supposed to keep the retail price up.

Farm legislation passed by the 80th congress authorized direct payments to farmers for pork and milk, but this law does not go into effect until January 1, 1950.

Meanwhile, the agriculture secretary said consumer prices on pork and milk probably would fall if the administration was allowed to make direct subsidy payments to producers.

DESPITE much sentiment to the contrary, Brannan said his department has had a "quite favorable" reaction to the proposed farm program which, briefly, would let farm products find their own price level through supply and demand, with the government paying the farmer the difference in this and the support price in cash.

Congressional critics of the farm program declare its cost will run into billions of dollars and that it will benefit neither the farmer nor the taxpayer, because, in the end, the farmer and the taxpayer will be paying additional taxes to finance the program.

CANCER:

Progress Seen

The men in white who wage an unceasing battle against cancer caught a glimmer of hope—they felt sure they had discovered, as they put it, "what is for all practical purposes a simple, cheap and reasonably sure blood test for cancer."

THE ANNOUNCEMENT was made with the customary caution and restraint of the men who work with test tubes—"reasonably sure" was how they described the test.

But if they had made such a discovery, it was a great stride forward toward victory over the terrible disease.

According to the announcement, comparative studies at the University of Chicago of the blood serum of cancer patients and normal and other non-cancerous individuals had revealed significant differences that led to the statement of the new cancer blood test.

Report of the university findings was made by Professor Charles B. Huggins, who 10 years ago originated a new treatment for prostatic cancer which has kept more than 25 per cent of the victims alive and well for more than eight years.

DISCUSSING the new test, he said that tests on almost 300 individuals—equally divided into cancer patients, apparently healthy persons, and patients with non-cancerous diseases—proved positive for all cancer cases, negative for all normal persons and negative for all other tested, except those with lung tuberculosis and massive acute infections.

Inasmuch as tuberculosis and inflammatory processes can be readily diagnosed, it was explained, the test was not expected to confound cancer with other conditions.

KIWI:

Rare Chick

Nature lovers in New Zealand rejoiced. A sturdy male kiwi chick was hatched at the Hawke's Bay game farm, bringing to six the only known existing family of this nocturnal, flightless bird which was thought to be extinct until a few years ago.

The male bird spent 81 days on the latest egg before the newcomer burst through the thick shell.

COMPARATIVE BENEFITS . . . Under present provision of the social security law it is assumed the worker has 10 years of coverage. Under proposed provisions, however, monthly benefits would not be affected by length of time spent in covered employment. Chart, prepared by Research Council for Economic Security, offers comparison of present benefit scales with those proposed in the administration program.

ACCIDENTS:

Fewer Noted

Hope was indicated that the appalling toll of death and injury on U. S. streets and highways might be Russian who sank and brought in cil reported that 92 cities of more than 10,000 population went through all of 1948 without a traffic death.

The council reported that Medford, Mass., with a population of 67,477, was the largest no-death city last year.

Rural Housing Off

According to Senator Fear (D., Del.) some of the nation's worst housing conditions still exist in rural areas—a conclusion familiar already to many, many Americans. The senator's statement was made during a hearing by a senate committee on the "multi-billion-dollar housing bill pending in congress."

There has been little talk of rural needs in discussion of the housing problem to date, although that need is as pressing, almost, as any other.

Defective brakes are one of America's greatest causes of traffic accidents. Add to these faulty brakes excessive speed and careless driving... and you'll find a record of tragedy — death!

Every driver has at some time or other had to "slam on the brakes" to avoid hitting a child or animal who has darted in front of your auto. Those "close calls" give you a mighty funny feeling, don't they? But, have you ever stopped to think what might have happened if your brakes had not responded the minute you stepped on them? You might have killed that child! ... and it might have been your own!

That's why it's so important to keep your automobile in perfect running condition at all times. That's why, too, police have been checking your brakes and lights. It's a protection for you, the driver, and for your entire family. Take your automobile in for a complete check-up — do it regularly to make sure that you can stop at an instant's notice, if necessary. And... talk about safe cars and careful driving to your friends, your neighbors—make your entire community safety conscious as added protection for your family and your friends. Remember... it might not be your auto when your child dashes in front of a car! Make safe driving — and safe cars "by-words" in your community. Keep Michigan's traffic accident rate down... and do your part to erase those tragic children's deaths from Michigan!

State of Michigan, The Probate Court for the County of Charlevoix. At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 28th day of April A. D., 1949.

Present, Honorable Floyd A. Supp, Judge of Probate. In the Matter of the Estate of Amanda Clark, Deceased.

Clarence Healey, Administrator of said estate, having filed in said Court his petition, praying for license to sell at private sale the interest of said estate in certain real estate therein described, for the purpose of paying debts, charges and expenses of said estate.

It is Ordered, That the 23rd day of May, A. D., 1949, at ten o'clock in the forenoon, at said Probate Office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said Court, at said time and place, to show cause why a license to sell at private sale the interest of said estate in said real estate should not be granted;

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said County.

FLOYD A. SUPP,
Judge of Probate.

MORE REPORTS ON GRASS
SILAGE

Burrell Henry, the Calhoun county agent, reports that farmers in that county who have used grass silage have given it their stamp of approval. Two of the dairymen in the county who have had experience with it think it is especially useful as a supplementary feed during July, August and September. One of them, Monty Johnson, has been making it for some years now and feels it is a definite factor in maintaining his herd's production in the late summer. Hugh White, another Calhoun county farmer, seconded this observation. He has put grass in the silo for the past three years.

Here's another slant on the subject from C. M. McCrary, superintendent of the Kellogg Experiment Station: They feel the grass silage is a fine feed but stopped making it because they had level enough land to grow corn for silage and because they have ample pasture through the late summer months. With such a situation, McCrary observes it is cheaper to let the cow harvest the pasture direct.

FOR POTATO GROWERS

If you are a Michigan potato grower who is planning to grow the Russet Rural variety this year, you'll want this suggestion from H. C. Moore of the Michigan State College farm crops department. He says to be sure and get the Russet Rural planted between May 10 and June 10 so that it has a chance to mature. If you do this, it will make a potato a good market and cooking quality. If you don't give it a chance to mature it can cause trouble and here's why:

The Russet Rural requires 120 to 130 days to mature and many growers plant it too late. Frost often kills the crop when it is only 80 or 90 days old and the tubers are green or immature. The result is that potatoes bruise in harvesting and storing and then are liable to turn dark when cooked.

More than a pint of water per day is exhaled in the breath. Cricket fighting is a favorite sport in China.

Traffic Deaths are Steadily Increasing

Chief Harry Simmons today announced that the police of Michigan are continuing to find cars being driven which are in an unsafe driving condition and that state-wide traffic deaths are continuing to increase.

According to the Michigan State Safety Commission, the coordinating agency of the state-wide program in which the police of Michigan are checking brakes and lights, Michigan traffic violators are being stopped at the rate of 15,756 per week. In the first three weeks of this traffic accident prevention program, 47,268 traffic violators have been stopped. 1 out of 14 of these had unsafe brakes, 1 out of 4 had one headlight out, 1 out of 39 had two headlights out, 1 out of 7 had no tail light and 1 out of 27 had other defects. Every one of these cases represents a car that is a potential killer, Chief Harry Simmons said.

The Chief pointed out that the need for additional traffic law enforcement is shown by the fact that in March 1949, for the fifth consecutive month traffic deaths in Michigan increased. March deaths increased 18 per cent, when 17 more persons were killed than the 92 killed in Mar. of last year, according to information compiled by the Michigan State Police.

In the city of East Jordan, our department stopped 61 violators, the chief continued, and 10 defective brakes, 22 defective headlights, 10 defective tail lights, and 7 other defects were found.

Winner, Fourth National AAA
Traffic Safety Poster Contest.

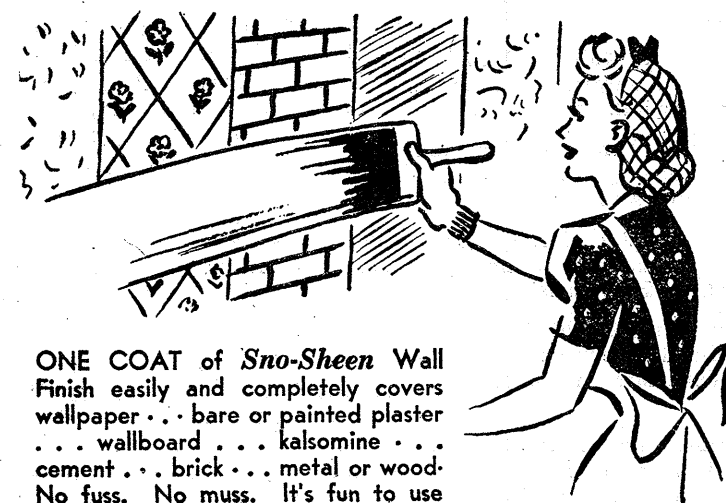

May days call youngsters and grownups to the old swimming hole and the baseball diamond; both are safe from traffic. Yet three out of ten U. S. school children killed in traffic last year were playing in the street. As a result 9,000 copies of this prize winning AAA poster, "Play Away From Traffic" have been distributed in state schools by Automobile Club of Michigan. 25,000 traffic safety lessons have gone along with the posters. Teachers and parents are urged by Auto Club to point out safe play places to the children for use during the active summer months when school is out.

A Texas man was in a rifle match and unaccountably missed every shot at 100 and 200 yards. He scored bull's-eyes, however, with every shot at 500 yards.

"How come?" a bystander wanted to know. "Well," said the Texan, "back home we never bother to shoot at anything less than 500 yards. We just throw rocks."
