## **Governor's Speech** Attracts 2,000 To **County Fairgrounds**

## Visitors Hear Talk On **Unemployment, Low Prices**

Gov. G. Mennen Williams stepped into this traditionally Republi-can area Sunday and drew the largest political crowd to assemble in Charlevoix county in several years.

He talked hard times at the Charlevoix fairgrounds before 2,000 northern Michigan farm union members, labor lead their families.

The Governor told his listeners that those working me employment are not finding a solution to the economic follems of the farmer.

He said they were working to aid one segment of our economy

\* \* \* A certain E. J. contractor hires women workers at 40c per minute. But he's cautious not to let them work too long. This big hammer and nail man was working up in the third ward and he needed someone to hold a line for a moment.

A lady came down the street and he asked her to help him a second. This she did. Then she went her merry way declaring she'd expect a check for her work.

All was forgotten by the lady until lo! and behold! and stuff. She received a 40c check in the mail for helping said contractor. When questioned about how he arrived at 40c the man said

of milk in retail stores. And he ask for a parity program that would actually work for the benefit of the farmers.

Throughout his speech the Governor called for cooperation between farmers, laborers and businessmen. They are all in the same boat right now, he said and if the boat sinks they all sink together.

HAS NO SOLUTION

He offered no immediate solution for the farmers problems or for the problem of unemployment. But he asked the farmer to be concerned about the city laborer and for the city laborer about the farmer and promised a "reasonable degree of prosperity."

He said once farmers and workers get together to find a solution to their problems things are going to happen.

The Governor pointed out that it is necessary to work together because "we can't have one economy in good health and the other in poor health."

The Governor hinted at the rapidly growing trend for small farmers to give up and find other jobs, while larger farmers acquire more farmland.

He spoke of a future monopoly if some way isn't found to keep the family-type farmer on the farm.

He sees the solution to this in some form of a suitable parity About 2.000 books of maps of program for farmers.

Second place went to Lloyd Stanley, of Petoskey and third money was taken by Ferman Montgomery of Traverse City.

The 28 entries from all northern Michigan drew nearly one thousand visitors who jammed Memorial Park and the area around the bridge.

Gene Hathaway, of Grosse Pointe took first in the B division with Henry Feick, of Alanson second. Pete Neason, of Traverse City was third.

In the D race Ron Peterson of Gaylord came in first and Dale Reburg, of Petoskey was second. Third was Billy Magel of Indian River.

Trophies were handed out to winners under sponsorship of The East Jordan Businessmen's Association.

First boats arrived 9:30 Sunday morning with additional boats and visitors arriving up to starting time 1:30 p.m.

Added entertainmnent included a local boat race between Dick Malpass, Ted Malpass and Ken Diller. They won in that order.

"Crash boats" manned by local owners were positioned around the course for possible upturns.

Early morning weather provided a mirror-like lake with overcast skies which later became windy providing choppy water, making "rough going."

An East Jordan member of the boat club, Basil Crawford, aided in providing the race here.

## Labor Day . . .

This Labor Day, history will record that America's industrial employees have achieved the world's highest standard of living, along with the highest records of productivity, income and benefits.

Thanks in large measure to industry's constantly improving techniques and equipment, the average industrial employee of today an produce more in 40 hours than his father of a generation ago produced in 60 hours. He is able to produce five times as much as 100 years ago-and therefore to have five times as much-with one-third the human effort.

This is the essence of human progress, and history has not witnessed its equal in the recorded annals of man.

# **4** Important Reasons why you should buy a PONTIAC RIGHT NOW!

## Pontiac is One of the Greatest Cars Ever Built!

Match today's Pontiac with America's finest cars and you'll get a dramatic picture of Pontiac value. First of all, Pontiac is bigbigger, in fact, than many cars costing hundreds of dollars more. Pontiac is beautiful-with its distinctive Silver Streak styling. Inside, you'll find genuine fine-car luxury and appointmentsalong with the roominess and comfort that come only with a long wheelbase. But the big surprise comes when you test Pontiac's performance. See how alert it is to every demand in traffic, how it handles and corners almost without effort, how it takes to the open road with plenty of power to spare and saves money every mile.

## Pontiac has the Best Resale Value in its Price Class I

Along with all its fine-car size, luxury and performance, Pontiac has a very special attribute no car at any price can beat-its unsurpassed reputation for year-in, year-out dependability. Pontiac's carefree, economical long life and its proved record of amazingly low maintenance expense are so widely known and acknowledged that it commands the highest resale value in its price class. Because Pontiac is America's most desirable used car, your original investment comes back in greater measure when you trade.

## Pontiac is Priced Just Above the Lowest I

After you've convinced yourself of Pontiac's value, after you've considered all the good things you've heard about its dependability-see how it compares dollar-wise. Despite the fact that it's a fine car in every sense of the term, Pontiac is priced so near the lowest that if you can afford any new car you can afford a Pontiac.

## We'll Make You a Deal You Can't Afford to Missl

Right now we're making such liberal trade-in allowances that you just can't afford to pass up the greatest opportunity you ever had to become a fine-car owner. Come in and get the facts,

Rasmussen will direct a force of 23 crew leaders and 205 enumerators in 36 counties.

Counties to be covered from Ludington include Alcona, Alpena, Antrim, Arenac, Bay, Benzie, Charlevoix, Cheboygan, Clare, Crawford, Emmet, Gladwin, Grand Traverse, Iosco, Isabella, Kalkaska, Kent, Lake, Leelanau, Manistee, Mason, Mecosta, Midland, Missaukee, Montmorency, Muskegon, Newaygo, Ogemaw, Osceola, Oscoda, Otsego, Ottawa, Presque Isle, Roscommon and Wexford.

Both Rasmussen and Miss Sergeson reported on August 23 to the permanent Census Bureau district office at Chicago for a week's training. It covered administrative procedures, office routine, map work, practice in filling out farm census report forms and other duties and responsibilities connected with the ioh.

The 1954 Census of Agriculture will provide information on the number and size of farms, acreage and harvest of crops, livestock production and inventories, selected farm facilities and equipment, selected farm expenditures, farm values and mortgage debt.

Orchard **Notes** By C. Fairman

Many times the question comes up as to what it costs to produce a bushel of apples or other fruit. That takes the price of the land the trees are planted on, the time it takes for the trees to come in bearing, cost of labor, materials, etc., varieties etc. nursery stock, equipment and many other items.

Usually the grower starts to figure and then gives up. Farther down East, many apple growers fell by the wayside, especially those that had marginal orchards, trees too old or poor varieties or poor soil or site. Eastern processors are announcing very attractive prices as stated in the press. This reflects better prices for Michiganders. On the other hand, spray materials are higher, labor equipment etc. also. On this particular year it costs more to control apple scab and these late years insects are more numerous and considering all fruit, there are more species of insects.

However, this is all interesting to the tree fruit grower as he loves his art much more than money!

## **Protect Seed Against Flies**

Keep your seed wheat in a sack or a bin until you're sure the Hessian fly will give you no trouble.

That's a suggestion from Ed Rebman, Charlevoix county agricultural agent. The flyfree date for Charlevoix county is September 3, according to word from Ray Janes, Michigan State College extension entomologist.

The Hessian fly is one of the insects that attacks wheat in both fall and spring. The insect's larvae (maggots) feeds beneath the leaf sheath, usually next to the ground. That's the reason the fly is dangerous.

The fly overwinters in the "flaxseed" stage on the wheat. Maggots that come out of the "flaxseed" in the spring become the flies that lay the eggs for the spring generation.

The only way to control the insect is by planting wheat in the autumn after the late summer generation of the insect has died off. That prevents damage to the wheat in the fall from the maggots and cuts down on the number of flies overwintering for the spring generation.

Janes advises farmers who have been having trouble with Hessian fly to plant their wheat later than the fly-free date-if the wheat can make enough growth before its dormant period. A late fall, he explains, sometimes upsets the calculations on the fly-free date and some flies continue to lay eggs.

Mr. and Mr. Robert A. Campbell are announcing the birth of a granddaughter, Jane McNamara, weight 6 pounds 6 ounces, on August 19th. The parents are Mr. and Mrs. Joseph McNamara (formerly Jean Campbell) of Jackson. They have one other son, Bobby, 8.

#### Hi Fellas:

WE GET

Well, as Jake is no longer writing to you GI's, it looks as though we are going to be the headquarters for all your letters --- so be sure and keep them coming in. We want to keep up the Servicemen's Letter for the men overseas.

Here are a couple of letters we received this week.

Hi Jake. Say! I guess it is about time I got around to writing you a letter. Right now, I'm not doing much of anything except getting

ready to go home. I have three years in, all in Germany so they are shipping me back to the good old U.S.A. I am leaving Havav, Germany the 25th of this month ---this coming Wednesday. I want to say many thanks to everyone for everything you folks have done to keep the E. J. paper coming to us men over here. It sure has been a big help. I will be seeing you sometime next month about the 6th or 7th.

Cpl. Miles A. Prevo

Here's one from Larry Whiteford, who we will be seeing soon around the old home town, too. Dear Jake. Just thought I'd drop a line to

premium-priced gasolines for over-all performance. Yet New Blue Sunoco still sells at regular gasoline price.

Following the introduction of New Blue Sunoco, we invited a large group of automotive engineers to try this new gasoline in their cars. Then we asked them for their reactions. Of the original 1,384 who tried it, we received answers from 1.042.

## 9out of 10 say New Blue Sunoco equals or excels "Premiums" for power and pick-up

To us, a very significant group were those who had previously used a premium-priced gasoline. They compared New Blue Sunoco, selling at: regular gas price, with premiumpriced brands costing up to 3¢ more per gallon. 93% said New Blue Sunoco equals or excels "premiums" for power and pick-up.

8 out of 10 sav New Blue Sunoco equals or excels"Premiums" for Anti-Knock Performance Of those who compared New Blue Sunoco against premium-priced brands, 80% said it was equal or superior to the "premiums" for antiknock performance.

## 42% already users of Blue Sunoco

We were pleased, but not surprised, to discover that more engineers reported they were already users of Blue Sunoco than reported using all other premium gasolines combined.

Follow the lead of Automotive Engineers, the men who know most about cars-use New Blue Sunoco in your car.

## AMERICA'S GREATEST GASOLINE VALUE

## How Sun's one-grade policy gives you high-test performance at regular gas price

Sun Oil Company produces only one grade of gasoline. This policy saves on storage tanks, trucks, pumps. These savings are invested in research and new, improved refining processes which enable us to produce a gasoline with high anti-knock power especially designed for high compression engines, and sell it at regular gas price.
